NOTE.—Minus sign (—) denotes decrease.

4. **Balance of Payments on Current Account—Monetary Groups.** Estimates are also made of Australia's current account transactions with various countries. With the exception of "dollar" countries, however, sufficient information is not yet available for the completion of regional capital accounts.

The table below shows the balance on current account in each of the years 1956-57 to 1958-59 for sterling and non-sterling countries. The latter include summaries for "dollar" countries, the European Economic Community and for "other" countries of the Organization for European Economic Cooperation (excluding the United Kingdom).

BALANCE OF PAYMENTS ON CURRENT ACCOUNT: AUSTRALIA
BY MONETARY GROUP.(a)

(a) For a list of the countries included in each monetary area see page 483. (b) Preliminary.
 For revised figures see Appendix. (c) European Economic Community, effective from 1st January, 1958.

NOTE.—Minus sign (—) denotes debits; other items are credits.

5. Balance of Payments with "Dollar" Countries. The following table shows a more detailed dissection of Australia's balance on current account with the dollar area. In addition to direct transactions with "dollar" countries, it shows all current account transactions which involve the receipt or payment of dollars (Item 9). Finally, details of investment and financing items, corresponding to a capital account, are shown, including the receipt and repayment of dollar loans from the International Bank and drawings on the International Monetary Fund.

Details of dollar financing transactions for 1958-59 may not be strictly comparable with those of previous periods due to events following the move to convertibility of non-resident sterling towards the end of 1958. As a result the estimates for some items shown in 1958-59 are incomplete.

NOTE.—In current account, — indicates debit items. In investment account, — indicates net decreases in liabilities or net increases in assets.

6. Conclusion.—Construction of the estimates of the Australian balance of payments involves the systematic assembly of much intricate data, from a variety of sources of which the following are the more important:—(i) Statistics of exports and imports, obtained in the first place from Australian trade statistics; (ii) information on particular invisible and capital items, obtained by regular inquiry from private organizations and government departments; (iii) details of many important receipts and payments of foreign exchange, provided by the banking system; (iv) information on dividends remitted, undistributed income and movements of private investment in companies, provided by statistics of overseas investment collected by this Bureau; and (v) information on international reserves, supplied by the Reserve Bank.

CHAPTER XIV.

TRANSPORT AND COMMUNICATION.

NOTE.—Most of the statistics in this chapter cover the year 1958–59. More detailed figures for this and earlier years will be found in the annual bulletin, *Transport and Communication*.

PART I.—TRANSPORT.

A. SHIPPING.

§ 1. Control of Shipping.

1. **War-time Control.**—An account of the action taken by the Commonwealth Government to control and regulate shipping throughout Australian waters during the 1939–45 War was given in Official Year Book No. 36, pages 121–30.

2. **Post-war Control and Developments.**—A brief account of the post-war control of shipping and the establishment of the Australian Stevedoring Industry Board and the Australian Shipping Board will be found in Official Year Book No. 39, pages 147–8.

The Maritime Industry Commission, established during the 1939–45 War under National Security legislation, was abolished on 19th December, 1952. Permanent legislation to cover many of the matters formerly dealt with by the Commission was enacted in 1952 in the form of amendments to the Navigation Act 1912–1950 (*see p. 528*).

As at 30th June, 1959, the Australian National Line operated 45 vessels totalling 183,420 gross tons, comprising eight "River" Class vessels of an average of 5,029 gross tons, five "B" Class vessels of an average of 3,923 gross tons, six "D" Class vessels of an average of 2,377 gross tons, two "W" Class vessels of an average of 2,407 gross tons, five "E" Class vessels of an average of 584 gross tons, two "Y" Class vessels of an average of 3,460 gross tons, eight "Lake" Class vessels of an average of 7,341 gross tons, three "I" Class vessels of an average of 4,890 gross tons, two "T" Class vessels of an average of 7,556 gross tons, two "N" Class vessels of an average of 1,467 gross tons, and two "ESK" Class vessels of an average of 1,607 gross tons, all of which were built in Australian yards, with the exception of four vessels, totalling 18,045 gross tons, which were built overseas. Of these, 19 are engaged in the heavy trades (two colliers), two are engaged in the shipment of pyrites and 19 carry general cargo. Owing to lack of interstate trade, four "River" Class vessels and one "D" Class vessel were laid up, pending sale.

In the international sphere, a convention establishing an Inter-governmental Maritime Consultative Organization within the framework of the United Nations was ratified by the last of the 21 ship-owning nations on 17th March, 1958. The major objectives of this organization are to provide machinery for co-operation among governments with shipping engaged in international trade, and to encourage the removal by governments of discriminatory action and unnecessary restrictions regarding such shipping.

§ 2. System of Record.

In the system of recording statistics of oversea shipping, Australia is considered as a unit, and therefore only one entry and one clearance are counted for each voyage, without regard to the number of States visited (*see also* § 4, p. 516).

On arrival at, or departure from, a port in Australia, whether from or for an oversea country or from or for another port in Australia, the master or agent must "enter" the vessel with the Customs authorities at the port, and supply certain prescribed information in regard to the ship, passengers and cargo. At the end of each month, the information so obtained is forwarded to the Bureau of Census and Statistics. This arrangement has been in operation since 1st July, 1924.

The volume of the vessel, as distinct from the cargo it carries, is recorded in net tons, i.e., the gross tonnage or internal cubic capacity less certain deductions on account of crew spaces, engine room, water ballast and other spaces not used for passengers or cargo. It is thus a rough measure of the capacity of the vessel for cargo or passengers. The unit of measurement is the *ton register* of 100 cubic feet.

The majority of cargo is recorded in terms of the ton weight of 2,240 lb. However, some additional cargo, mainly bulky commodities, is shipped and recorded on the basis of 40 cubic feet of space used representing 1 ton measurement.

From 1st July, 1914, trade and shipping statistics of Australia have been recorded for financial years ending 30th June.

§ 3. Oversea Shipping.

1. **Total Movement.**—The following table shows the number of entrances and clearances combined of oversea vessels at Australian ports, and the aggregate net tonnage, during each of the years 1954–55 to 1958–59:—

OVERSEA SHIPPING: ENTRANCES AND CLEARANCES (COMBINED) OF VESSELS DIRECT, AUSTRALIA.

Particulars.	1954–55.	1955–56.	1956–57.	1957–58.	1958–59.
Number of Vessels	4,505	4,882	5,290	5,254	5,463
Net Tonnage '000 tons	20,003	22,324	23,659	24,515	26,019

The average net tonnage per vessel rose from 2,919 in 1921–22 to 4,763 in 1958–59.

Particulars of the total oversea movement of shipping for each year from 1822 to 1920–21 were published in Official Year Book No. 15, page 507, and for each year from 1921–22 to 1950–51 in Official Year Book No. 40, page 97.

2. **Total Oversea Shipping, States.**—The following table shows, for each State and the Northern Territory, the number of entrances and clearances of vessels direct from and to oversea countries, and the aggregate net tonnage, during the year 1958–59.

**OVERSEA SHIPPING: ENTRANCES AND CLEARANCES OF VESSELS DIRECT,
1958-59.**

Particulars.			N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	Aust.
Entrances	No.	878	424	412	202	713	51	26	2,706	
	'000 net tons	3,995	2,601	1,413	833	3,858	180	67	12,947	
Clearances	No.	782	412	587	211	712	26	27	2,757	
	'000 net tons	3,652	2,550	2,234	822	3,632	122	60	13,072	

3. **Shipping Communication with Various Countries.**—A vessel arriving in Australia from overseas is recorded as coming from the country where the voyage commenced, irrespective of the number of intermediate ports of call. Similarly, a vessel leaving Australia is recorded as going to the country where the voyage is scheduled to terminate.

The following table shows statistics of the net tonnage entered and cleared, with cargo and in ballast, according to the principal countries where vessels commenced or terminated their voyages to or from Australia.

**OVERSEA SHIPPING: COUNTRIES FROM WHICH ENTERED OR FOR WHICH
CLEARED, AUSTRALIA.**

Country from which Entered or for which Cleared.	With Cargo or in Ballast.	Net Tonnage Entered ('000).			Net Tonnage Cleared ('000).

Total, Cargo and Ballast	11,815	12,384	12,947	11,845	12,131	13,072

4. **Country of Registration of Oversea Shipping.**—Vessels registered at ports in Commonwealth countries accounted for 51.3 per cent. of the net tonnage of shipping entering Australian ports in 1958-59. This proportion has varied considerably since the end of the 1939-45 War. By 1946-47, the proportion had increased from the low level of 43.4 per cent. recorded in 1943-44 to 76.2 per cent., but since then has steadily declined.

Particulars of oversea shipping which entered Australian ports during each of the years 1956-57 to 1958-59 are given in the following table according to country of registration of vessels.

**OVERSEA SHIPPING: COUNTRY OF REGISTRATION OF VESSELS
ENTERED, AUSTRALIA.

Japan ..	420	661	752				
Netherlands ..	670	612	748	Grand Total ..	11,815	12,384	12,947

(a) Includes New Caledonia.

(b) Federal Republic.

The Australian tonnage which entered Australian ports from overseas during the year 1958–59 represented 3.0 per cent. of the total tonnage entered and was confined mainly to the New Zealand and Pacific Islands trade.

The proportion of overseas shipping tonnage which entered Australia in cargo fell from 88.9 per cent. in 1938–39 to 79.4 per cent. in 1947–48. In 1958–59 it was 87.7 per cent. However, the proportion of shipping which cleared in cargo declined from 87.6 per cent. in 1938–39 to 65.0 per cent. in 1958–59, the trend over the period being generally downward.

§ 4. Interstate Shipping.

1. **System of Record.**—*Interstate Shipping* comprises two elements: (a) Vessels engaged solely in interstate trade; and (b) Vessels trading between Australia and overseas countries and in the course of their voyages proceeding from one State to another. (However, these vessels, except under special circumstances, do not engage in interstate carrying. Numerous overseas vessels obtain single voyage permits or exemptions under the Navigation Act. Such vessels include overseas tankers carrying petroleum products interstate, and, since the withdrawal of interstate passenger liners, other overseas vessels, under permit, carrying passengers and frozen cargo on the interstate run). No complexity enters into the record of those in category (a), but with regard to the method of recording the movements of the overseas vessels (b), some explanation is necessary. Each State desires that its shipping statistics should show in full its shipping communication with overseas countries, but at the same time it is necessary to avoid any duplication in the statistics for Australia as a whole. In order to meet these dual requirements, a vessel arriving in any State from an overseas country—say the United Kingdom—via another State, is recorded in the second State as from the United Kingdom “Overseas via States”, thus distinguishing the movement from a direct overseas entry. Continuing the voyage, the vessel is again recorded for the statistics of the third State as from the United Kingdom “Overseas via States”. On an inward voyage, the clearance from the first State to the second State is a clearance interstate, and is included with interstate tonnage in conformity with the pre-federation practice of the States, and to preserve the continuity of State statistics. Thus, movements of ships which are, from the standpoint of Australia as a whole, purely coastal movements, must for the individual States be recorded as “Overseas via States” or “Interstate” according to the direction of the movement. The significance of the record of these movements will be seen more clearly

from the following tabular presentation of the inward and outward voyages to and from Australia of a mail steamer which, it is presumed, reaches Fremantle (Western Australia) and then proceeds to the terminal port of the voyage—Sydney (New South Wales)—via South Australia and Victoria. From the terminal port the vessel will commence the outward voyage and retrace its inward track.

ITINERARY OF AN OVERSEA VESSEL ON THE AUSTRALIAN COAST.

Particulars.	Recorded as—	
	For the State and for Australia.	For the States.
Inward Voyage—		
Enters Fremantle from United Kingdom	Oversea direct	Interstate direct
Clears Fremantle for Adelaide		
Enters Adelaide from United Kingdom via Fremantle		Oversea via States
Clears Adelaide for Melbourne		Interstate direct
Enters Melbourne from United Kingdom via Adelaide		
Clears Melbourne for Sydney		Oversea via States
Enters Sydney from United Kingdom via Melbourne		Oversea via States
Outward Voyage—		
Clears Sydney for United Kingdom via Melbourne	Oversea direct	Oversea via States
Enters Melbourne from Sydney		Interstate direct
Clears Melbourne for United Kingdom via Adelaide		
Enters Adelaide from Melbourne		Oversea via States
Clears Adelaide for United Kingdom via Fremantle		Interstate direct
Enters Fremantle from Adelaide		
Clears Fremantle for United Kingdom ..		Oversea via States

From the method outlined above, the requirements for Australia and for the individual States are ascertained as follows. (a) The aggregate of all ships recorded for each State as "Oversea direct" gives the overseas shipping for Australia as a whole; (b) the aggregate for all ships recorded in any State as "Oversea direct" plus those recorded as "Oversea via States" gives the total *oversea shipping* for that State; and (c) the aggregate for all ships recorded as "Oversea via States" may also be used, together with those recorded as "Interstate direct", to furnish figures showing the total *interstate movement* of shipping.

However, it should be remembered that all overseas vessels do not follow the same itinerary as the vessel in the table above.

2. *Interstate Movement.*—(i) *Interstate Direct.* The following table shows the number of entrances and the net tonnage of vessels recorded into each State and the Northern Territory from any other State (including overseas vessels on interstate direct voyages) during each of the years 1956–57 to 1958–59.

INTERSTATE MOVEMENT OF SHIPPING: ENTRANCES OF VESSELS INTERSTATE DIRECT.

State or Territory.	Number.			Net Tons ('000).		
	1956–57.	1957–58.	1958–59.	1956–57.	1957–58.	1958–59.
New South Wales	1,711	1,861	1,865	4,853	5,119	5,172
Victoria	1,594	1,673	1,729	4,128	4,231	4,639
Queensland	688	690	701	1,806	1,766	1,853
South Australia	1,088	1,079	1,066	3,876	3,767	3,575
Western Australia	526	548	525	2,590	2,604	2,509
Tasmania	1,025	1,104	1,068	1,203	1,267	1,115
Northern Territory	45	47	54	93	86	82
Australia	6,677	7,002	7,008	18,549	18,840	18,945

(ii) *Oversea via States.* To ascertain the aggregate movement of shipping between the States, including the total interstate movement of overseas vessels, the figures in the following table, which show the number of entrances and clearances of vessels to and from overseas countries via other Australian States and the aggregate tonnage, must be added to those in the preceding table.

INTERSTATE MOVEMENT OF SHIPPING: ENTRANCES AND CLEARANCES OF VESSELS OVERSEA VIA OTHER AUSTRALIAN STATES, 1958-59.

Particulars.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	Aust.
Entrances No.	669	746	371	471	39	138	4	2,438
'000 net tons	3,367	3,740	1,661	2,337	206	671	5	11,987
Clearances No.	660	684	266	439	39	184	6	2,278
'000 net tons	3,115	3,507	1,142	2,144	196	842	15	10,961

Overseas vessels moving interstate are with few exceptions not engaged in the active interstate trade of Australia, but are merely proceeding to the several States in continuation of their overseas voyages.

(iii) *Total, Australia.* The following table shows the total interstate movement of shipping, including overseas vessels travelling overseas via States and interstate direct, for each of the years 1954-55 to 1958-59.

INTERSTATE MOVEMENT OF SHIPPING: TOTAL AUSTRALIA.

§ 6. Shipping Cargo.

1. **Oversea and Interstate Cargo.**—(i) *Australia.* The table hereunder shows the aggregate tonnage of oversea and interstate cargo discharged and shipped at Australian ports for the years 1954–55 to 1958–59. Most of the cargo is recorded in terms of the ton weight of 2,240 lb., the remainder, mainly bulky commodities, being shipped and recorded on the basis of 40 cubic feet of space occupied representing 1 ton measurement.

SHIPPING CARGO MOVEMENT: AUSTRALIA.

§ 7. Vessels Built and Registered.

1. **Vessels Built.**—The following table shows the number and tonnage of vessels built and registered in Australia during each of the calendar years 1955 to 1959, so far as such information can be ascertained from the Shipping Registers of the various States. However, the Merchant Shipping Act, under which vessels are registered in Australia, does not make it compulsory to register vessels under 15 tons burden if engaged in river or coastal trade. Larger vessels are also exempt from registration if not engaged in trade. Yachts and small trading vessels may be, and frequently are, registered at the request of the owners.

3. **World Shipping Tonnage.**—At 1st July, 1959, the total steamships, motorships and auxiliaries of 100 gross tons and upwards throughout the world amounted to 36,221, with a gross tonnage of 124,935,000. Of these totals, steamships numbered 15,496 for 73,749,000 gross tons, motorships 19,830 for 51,009,000 gross tons and auxiliaries 895 for 177,000 gross tons. Included therein were 4,341 oil tankers of 100 gross tons and upwards, with a gross tonnage of 37,890,000. Australian steamships, motorships and auxiliaries, 351 for 664,000 gross tons, constituted 0.97 per cent. and 0.53 per cent. respectively of the total number and tonnage. There was one Australian oil tanker of 12,624 gross tons registered. This information has been derived from *Lloyd's Register of Shipping*.

§ 8. Miscellaneous.

1. **Lighthouses.**—A list of the principal lighthouses on the coast of Australia, giving details of the location, number, colour, character, period, candle-power and visibility of each light so far as particulars are available, will be found in *Transport and Communication*, Bulletin No. 46.

2. **Distances by Sea.**—The distances by sea between the ports of the capital cities of Australia and the most important ports in other countries which trade with Australia are published in the annual bulletin, *Transport and Communication*.

3. **Shipping Freight Rates.**—The *Quarterly Summary of Australian Statistics* shows a list of the ruling freight rates for general merchandise in respect of both overseas and interstate shipments. At 31st December, 1959, the rate for general merchandise from Australia to the United Kingdom and the Continent was 204s. per ton weight or measurement, while

the rates for wheat and wool (greasy) were respectively £5 per ton weight and 3.39d. less 7 per cent. per lb. These rates, which are expressed in sterling, are subject to an adjustment of 25½ per cent. when freight is prepaid in Australia.

4. **Depth of Water at Main Ports.**—A table showing the depth of water available and tides at principal ports of Australia is published in the annual bulletin, *Transport and Communication*.

5. **Shipping Losses and Casualties.**—Courts of Marine Inquiry are constituted by a magistrate assisted by skilled assessors, and, when necessary, are held at the principal port in each State and at Launceston (Tasmania). Such courts have power to deal with the certificates of officers who are found at fault. Particulars of shipping losses and casualties reported on or near the coast during each of the years 1955 to 1959 are shown in the table below.

SHIPPING LOSSES AND CASUALTIES: AUSTRALIA.

Year.	Shipping Losses.			Other Shipping Casualties.			Total Shipping Casualties.		
	Vessels.	Net Tons.	Lives Lost.	Vessels.	Net Tons.	Lives Lost.	Vessels.	Net Tons.	Lives Lost.
1955 ..	1	53	..	220	694,847	..	221	694,900	..
1956 ..	2	529	18	237	771,418	..	239	771,947	18

1959 ..	2	346	1	200	623,475	9	202	623,821	10

6. **Commonwealth Navigation and Shipping Legislation.**—By section 51 (i) of the Commonwealth Constitution, the Parliament of the Commonwealth is empowered to make laws in respect of trade and commerce with other countries and among the States. By section 98, the power in this particular respect is further defined as extending to navigation and shipping.

A review of the introduction and development of the Navigation Act 1912–1950 was given in Official Year Book No. 40, pages 110–2. Amendments to the Principal Act were made by the Navigation Acts of 1952, 1953, 1956 and 1958.

Other shipping Acts under the trade and commerce power of the Commonwealth are the Sea-Carriage of Goods Act 1924, the Seamen's Compensation Act 1911–1954, and the Seamen's War Pensions and Allowances Act 1940–1958.

7. **Ports and Harbours.**—A report on "The Turn-round of Ships in Australian Ports" was submitted to the Commonwealth Government by Henry Basten, C.M.G., on 4th January, 1952. The report deals with all factors affecting the turn-round of ships and congestion in Australian ports and the measures that might be taken to effect improvement on both short-term and long-term bases. Further information on ports and harbours will be found in Chapter XIX.—Local Government.

B. GOVERNMENT RAILWAYS.

1. **General.**—The first steam-operated railway in Australia, between Melbourne and Port Melbourne, a distance of 2 miles, was opened on 12th September, 1854. It was owned and operated by the Melbourne and Hobson's Bay Railway Company. In the next 100 years the mileage increased greatly and at 30th June, 1954, 26,624 route-miles (excluding several hundred miles of privately-owned line) were open for traffic. However, the operation of Australia-wide services is greatly hampered by the presence of many break-of-gauge stations, necessitated by the several gauges at present in use. The policy of government ownership and control of railways has been adopted in each State and at 30th June, 1959, 24,079 route-miles were owned by the State Governments and 2,252 route-miles by the Commonwealth Government. In the following tables details of the four lines owned by the Commonwealth are grouped and shown with the totals for the various State-owned systems. Separate particulars for each Commonwealth line and more detailed statistics for all lines are shown in the annual bulletin, *Transport and Communication*.

In some States, there are comparatively small privately-owned railway systems offering passenger and freight services to the public. Details of these private railways were included in Official Year Book No. 39 and previous issues, but owing to their relative unimportance and the incomplete nature of the statistics available, the series has been discontinued.

2. **Railway Communication in Australia.**—An account of the progress of railway construction in Australia since the opening of the first line in 1854 was given in Official Year Book No. 6, page 681, and in No. 22, page 259. The main ports on the mainland are connected by lines running approximately parallel to the coast and are the focal points of lines which radiate inland to the agricultural, mining and pastoral areas of the continent to a distance of up to 600 miles at some points. However, Darwin in the Northern Territory is not connected by rail to any other port. A 3 ft. 6 in. gauge railway extends southward from Darwin to Birdum, a distance of 317 miles, and from Port Augusta in South Australia a 4 ft. 8½ in. gauge railway of 217 miles extends northwards to Marree and thence as a 3 ft. 6 in. gauge of 540 miles to Alice Springs.

In recent years, besides the construction of air-conditioned passenger trains and high-capacity goods rolling stock, many new locomotives have been built and others purchased. Also there has been a significant development of diesel-electric traction, the number of diesel-electric locomotives in service having risen from two at 30th June, 1949, to 402 at 30th June, 1959.

3. **Distances between Capital Cities.**—The distances by rail between the capital cities of Australia are published in the annual bulletin, *Transport and Communication*.

4. **Government Railways Development.**—In spite of the great extensions of State railways since 1875 and the construction of various railways by the Commonwealth Government, there are still, in some States, immense areas of country which are as yet practically undeveloped, and in which little in the nature of permanent settlement has been accomplished. The general policy of the States was to extend the existing lines inland in the form of light railways as settlement increased, and while it is true that lines which were not likely to be commercially successful in the immediate future were constructed from time to time for the purpose of encouraging settlement, the general principle that the railways should be self-supporting was kept in view.

The greatest recorded route-mileage of government railways was 27,234 at 30th June, 1941. Although short lengths of line have been opened since that date, most railway construction is being confined to the duplication and electrification of existing main lines. The closure of other lines (mainly developmental branch lines whose retention would have been uneconomic), especially in Victoria and Western Australia, has resulted in a considerable decrease in route-mileage. Variations in route-mileage in each State and Territory during the ten years ended 30th June, 1959, are shown in the following table:—

GOVERNMENT RAILWAYS: VARIATIONS IN ROUTE-MILEAGE, 1949 TO 1959.

State or Territory.	Route-mileage at 30th June, 1949.	Variations during Ten Years ended 30th June, 1959 due to—		Route-mileage at 30th June, 1959.
		Route Miles Opened.	Route Miles Closed.	
New South Wales	6,354	2	12	6,344
Victoria	4,452	14	374	4,092
Queensland	6,560	..	134	6,426
South Australia	3,799	235	198	3,836
Western Australia	4,775	16	220	4,571
Tasmania	614	2	49	567
Northern Territory	490	490
Australian Capital Territory	5	5
Australia	27,049	269	987	26,331

5. **Standardization of Railway Gauges.**—A summary of the report and recommendations relating to the standardization of Australia's railway gauges on the basis of a 4 ft. 8½ in. gauge, made in March, 1945, at the request of the Commonwealth Government by the late Sir Harold Clapp, together with an outline of the agreement between the Commonwealth Government and the States of New South Wales, Victoria and South Australia regarding the standardization of railway gauges in their respective States, was published in Official Year Book No. 37, pages 146–9. The agreement, which was signed in 1946, was ratified by the Governments of the Commonwealth, of Victoria and of South Australia, but not by the New South Wales Government. After some time had elapsed and New South Wales had failed to ratify the agreement, the Commonwealth Government decided to enter into a separate agreement with South Australia, and the necessary legislation was enacted in 1949

by each Government concerned. The Commonwealth-South Australia Agreement provides for the same standardization work to be carried out in South Australia as would have been carried out had New South Wales ratified the original Commonwealth-Three States Agreement, and that over a period of years the Commonwealth should contribute 70 per cent. and South Australia be responsible for the remaining 30 per cent. of the estimated cost.

As a further step towards standardization, a Committee consisting of members of the Federal Parliament was formed in March, 1956, to ascertain whether a scheme confined to the main trunk routes would be desirable. This Committee recommended in October, 1956, that standard gauge (4 ft. 8½ in.) lines be provided from Wodonga to Melbourne, from Broken Hill to Adelaide via Port Pirie and from Kalgoorlie to Fremantle via Perth. Action to implement these recommendations has been commenced in respect of the Wodonga to Melbourne line. This project envisages the construction of a new 4 ft. 8½ in. track alongside the present 5 ft. 3 in. single track between Wodonga and Mangalore, the conversion of one of the two existing tracks between Mangalore and Albion and a combination of new track and conversion of existing track between Albion and Spencer Street station.

Preparatory work in the field on the uniform gauge between Albury and Melbourne commenced in November, 1957. The work has been concerned with the duplication of bridges, extension of culverts and the establishment of camps. Funds for this project are being advanced by the Commonwealth to enable the work to proceed. An agreement was reached between the Commonwealth and the two States, New South Wales and Victoria, whereby the Commonwealth will meet 70 per cent. of the cost of unification and the two states will share equally the remaining 30 per cent. with the Commonwealth advancing the whole of the necessary funds initially and the States' portion, plus interest, being repayable over 50 years. Legislation was enacted by the Commonwealth and the two State Governments in three separate Acts assented to towards the close of 1958. Estimated total cost is about £10.7 million, just over £2 million having been spent to 30th June, 1959.

A map showing the railway systems of Australia according to gauge appears on page 523.

6. Grafton-South Brisbane Uniform Gauge Line.—The first step towards uniform gauge railway communication between the capitals of the mainland States was effected in 1930 with the construction of the 4 ft. 8½ in. gauge line from Grafton to South Brisbane. The finance required for the construction was provided by the Commonwealth Government. For details of the agreement between the Commonwealth and New South Wales and Queensland, see Official Year Book No. 31, page 122.

This line is operated by the New South Wales Railways and details of operations in New South Wales are included with those of the New South Wales system. Details of operations on the Queensland portion are included with Queensland railway statistics unless otherwise specified.

7. Mileage Open for Traffic, all Lines.—Almost all the railways open for general traffic in Australia are owned and controlled by the State or Commonwealth Governments. Private lines have been laid down for the purpose of opening up forest lands, mining districts or sugar areas. These lines are not generally used for the conveyance of passengers or the public conveyance of goods.

The following table shows the route-mileage of Commonwealth and State lines open in each State and Territory at various periods since the inauguration of railways in Australia in 1854:—

GOVERNMENT RAILWAYS: ROUTE-MILEAGE OPEN.
(Miles.)

At 30th June—	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
1855(a) ..	14	2	..	7	23
1861(a) ..	73	114	..	56	243
1871(a) ..	358	276	218	133	..	45	1,030
1881(a) ..	996	1,247	800	832	92	45	4,012
1891 ..	2,182	2,763	2,195	1,666	198	351	145	..	9,500
1901 ..	2,846	3,237	2,801	1,736	1,355	457	145	..	12,577

1959 ..	6,344	4,092	6,426	3,836	4,571	567	490	5	26,331

(a) At 31st December.

At 30th June, 1959, 256 route-miles in Victoria and 228 route-miles in New South Wales were electrified.

The next table shows for each State and Territory the length of government lines open in relation to both population and area at 30th June, 1959.

GOVERNMENT RAILWAYS: ROUTE-MILEAGE OPEN AT 30th JUNE, 1959.
(Miles.)

Particulars.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Route-mileage open ..	6,344	4,092	6,426	3,836	4,571	567	490	5	26,331
Per 1,000 of population..	1.69	1.45	4.46	4.17	6.36	1.66	23.40	0.11	2.62
Per 1,000 square miles ..	20.50	46.56	9.63	10.09	4.68	21.63	0.94	5.32	8.86

8. **Classification of Lines according to Gauge, at 30th June, 1959.**—The next table shows the route-mileage of government railways open in each State and Territory at 30th June, 1959, classified according to gauge.

GOVERNMENT RAILWAYS: GAUGES, AT 30th JUNE, 1959.
(Route-miles.)

Gauge.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
5 ft. 3 in. ..	(a) 241	4,058	..	1,674	5,973
4 ft. 8½ in. ..	6,103	..	(b) 69	(c) 871	(c) 454	(c) 5	7,502

2 ft. 6 in.	34	34
2 ft. 0 in.	30	30
Total ..	6,344	4,092	6,426	3,836	4,571	567	490	5	26,331

(a) Portion of Victorian system. (b) Queensland section of Grafton-South Brisbane Uniform Gauge Line. (c) Portion of Commonwealth system. (d) Includes 432 miles of Commonwealth system.

9. **Summary of Operations.**—In the following table a summary is shown of the operations of government railways open in Australia during 1958–59:—

GOVERNMENT RAILWAYS: SUMMARY OF OPERATIONS, 1958-59.

Particulars.	Commonwealth Railways.	State Railways.	Total.
Route-mileage, 30th June miles	2,252	24,079	26,331
Gross earnings £'000	5,584	179,328	184,912
„ „ per revenue train-mile pence	664	482	486
Working expenses £'000	(a) 3,647	181,349	184,996
„ „ per revenue train-mile pence	434	488	486
Net earnings £'000	(a) 1,937	—2,021	—84
„ „ per revenue train-mile pence	230	—5	—0.22
Revenue train-miles '000	2,018	89,267	91,285
Passenger-journeys '000	259	484,759	485,018
Goods and livestock carried '000 tons	1,405	46,626	48,031
Average number of employees(b)	2,633	135,829	138,462
„ earnings per employee £	997	981	982

(a) Excludes amounts paid for Commissioner's salary, government contributions under the Superannuation Act, Accident and Insurance Fund and proportion of salaries of Auditor-General's staff—total, £110,192. (b) Excludes construction staff except in respect of Victoria.

NOTE.—Minus sign (—) denotes loss.

A graph showing the route-mileage and traffic of government railways from 1870 to 1958–59 appears on page 524.

10. **Summary, States.**—The following table shows, for government railways in Australia, particulars of the mileage open, passengers and goods carried and revenue train-miles run during 1958–59.

GOVERNMENT RAILWAYS: SUMMARY, STATES, 1958–59.

Railway System.	Mileage Open.(a)		Passenger-journeys. (‘000.)	Goods and Livestock Carried. (‘000 tons.)	Revenue Train-miles. (‘000.)
	Route-miles.	Track-miles.			
New South Wales	6,103	8,488	254,055	19,700	35,195
Victoria	4,333	5,737	163,483	9,295	18,426
Queensland	6,426	7,474	33,457	8,373	19,509
South Australia	2,533	3,158	16,805	4,207	6,890
Western Australia	4,117	4,719	14,615	3,913	7,708
Tasmania	567	665	2,344	1,138	1,539
Commonwealth	2,252	2,452	259	1,405	2,018
Australia	26,331	32,693	485,018	48,031	91,285

(a) At 30th June.

11. **Gross Earnings.**—(i) *General.* Gross earnings are composed of earnings from (a) coaching traffic, including the carriage of mails, horses, parcels, etc., by passenger trains; (b) carriage of goods and livestock; and (c) rents and miscellaneous items. State Government grants are excluded. Details of these grants made during 1958–59 are shown in para. 14, page 535.

(ii) *Coaching, Goods and Miscellaneous Earnings.* (a) *Summary.* In the following table gross earnings are shown for the years 1956–57 to 1958–59, together with earnings per average route-mile worked and per revenue train-mile:—

GOVERNMENT RAILWAYS: GROSS EARNINGS.(a)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	C'wealth.	Aust.
GROSS EARNINGS. (£'000.)								
1956–57 ..	78,689	37,352	36,678	13,770	13,859	2,534	4,962	187,844
1957–58 ..	74,433	35,954	34,636	13,160	12,788	2,569	5,346	178,886
1958–59 ..	75,930	38,150	36,169	12,856	13,516	2,707	5,584	184,912

**GROSS EARNINGS PER AVERAGE ROUTE-MILE WORKED.
(£.)**

1956–57 ..	12,894	8,441	5,681	5,398	3,367	4,333	2,172	7,083
1957–58 ..	12,195	8,168	5,365	5,193	3,106	4,492	2,370	6,766
1958–59 ..	12,441	8,756	5,628	5,075	3,283	4,782	2,480	7,017

**GROSS EARNINGS PER REVENUE TRAIN-MILE.
(Pence.)**

1956–57 ..	509.99	483.42	438.94	459.80	401.80	328.00	557.51	474.12
1957–58 ..	510.11	470.15	436.78	446.05	418.89	393.28	671.57	475.49
1958–59 ..	517.78	496.89	444.96	447.80	420.87	421.99	663.99	486.15

(a) Excludes government grants; see para. 11 (i) above.

(b) *Distribution.* The following table shows gross earnings for the year 1958–59 classified according to the main three sources of earnings.

GOVERNMENT RAILWAYS: DISTRIBUTION OF GROSS EARNINGS(a), 1958-59.

Railway System.	Gross Earnings. (£'000.)			Proportion of Total. (Per Cent.)		
	Coaching.	Goods and Livestock.	Miscellaneous.	Coaching.	Goods and Livestock.	Miscellaneous.
New South Wales ..	21,730	50,524	3,676	28.62	66.54	4.84
Victoria ..	13,364	22,126	2,660	35.03	58.00	6.97
Queensland ..	4,926	30,115	1,128	13.62	83.26	3.12
South Australia ..	1,952	10,054	850	15.18	78.21	6.61
Western Australia ..	1,545	11,243	728	11.43	83.18	5.39
Tasmania ..	193	2,426	88	7.11	89.65	3.24
Commonwealth ..	979	4,243	362	17.54	75.98	6.48
Australia ..	44,689	130,731	9,492	24.17	70.70	5.13

(a) Excludes government grants; see para. 11 (i) on p. 532.

12. Working Expenses.—(i) *General*. In order to make an adequate comparison of the working expenses as between the several States and Territories, allowance should be made for the variation of gauges and of physical and traffic conditions, not only on the different systems of the State and Commonwealth railways, but also on different portions of the same system. When traffic is light, the proportion of working expenses to earnings is naturally greater than when traffic is heavy; and this is especially true in Australia, where ton-mile rates are in many cases based on a tapering principle—i.e., a lower rate per ton-mile is charged upon merchandise from remote interior districts—and where on many of the lines there is but little back loading.

Working expenses, wherever presented in the Railways section of this chapter, include reserves for depreciation in South Australia, Western Australia and Tasmania but exclude interest, sinking fund, exchange and certain other payments (see para. 14 following).

(ii) *Working Expenses*. The following table shows the total working expenses, the ratio of working expenses to gross earnings and working expenses per average route-mile worked and per revenue train-mile for the years 1956-57 to 1958-59.

GOVERNMENT RAILWAYS: WORKING EXPENSES.

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	C'wealth. (a)	Aust.
-------	--------	------	---------	----------	----------	------	------------------	-------

TOTAL WORKING EXPENSES.
(£'000.)

1956-57 ..	75,352	39,118	37,790	15,977	17,076	3,447	3,597	192,357
1957-58 ..	72,534	38,174	36,894	15,953	16,091	3,218	3,611	186,475

(a) See para. 9, note (a), p. 531.

NOTE.—Minus sign (—) denotes loss.

A graph showing the gross and net earnings and working expenses from 1870 to 1958–59 appears on page 525.

14. *Net Earnings, Grants to Railways, Interest, Sinking Fund, Surplus or Deficit, 1958–59.*—The following table shows, for each railway system for the year 1958–59, (i) net earnings as in para. 13 above, (ii) State grants and other items credited to railways accounts, (iii) loan interest, exchange, sinking fund, etc., payments charged against the accounts, and (iv) the net surplus or deficit after these items have been taken into account. Particulars of items (ii) to (iv) are not included in the preceding tables in this section.

GOVERNMENT RAILWAYS: SURPLUS OR DEFICIT AT 30th JUNE, 1959.
(£'000.)

(a) Grants to meet losses on country development lines £1,000,000; and to subsidize payments due from superannuation account £800,000. (b) Kerang-Koondrook Tramway recoup from Treasury.

(c) Net loss on railway-operated electric tramway and road motor services not included in previous pages. (d) Includes electric tramway and road motor services. (e) Net loss on Queensland portion of Uniform Gauge Railway as included in foregoing tables. (f) Excludes Queensland portion of Uniform Gauge Railway. (g) Grants towards working expenses £3,850,000 and debt charges £800,000. (h) Net profit on road motors not included in foregoing tables. (i) Interest and repayment under Railways Standardization Agreement, £59,696 interest and £25,291 repayment. (j) Includes road motor services. (k) £85 loss on road motor services. (l) £93 loan management expenses. (m) Includes salary of Railways Commissioner, Government contributions under Superannuation Act, expenditure from Railway Accident and Insurance Fund and proportion of salaries of Auditor-General's staff.

NOTE.—For further information on railways finance, in particular, expenditure from loan and other funds see Chapter XXI., Public Finance, of this Year Book. See also the reports of the various Commissioners.

15. **Traffic.**—(i) *General.* Reference has already been made to the difference in the traffic conditions on many of the lines. These conditions differ not only in the several State and Commonwealth systems, but also on different lines in the same system, and apply to both passenger and goods traffic. By far the greater part of the population of Australia is located in a fringe of country near the coast, more especially in the eastern and southern districts. A large proportion of the railway traffic between the chief centres of population is therefore carried over lines in the neighbourhood of the coast, and is thus, in some cases, open to seaborne competition. In recent years, competition from road and air transport has considerably increased.

The following table shows particulars of railway traffic for the years 1956–57 to 1958–59:—

GOVERNMENT RAILWAYS: TRAFFIC.

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	C'wea'th.	Aust.
-------	--------	------	---------	----------	----------	------	-----------	-------

1957-58	..	3,032	2,020	1,203	1,636	872	1,916	558	1,711
1958-59	..	3,228	2,133	1,303	1,661	950	2,010	624	1,823

(a) Partly estimated.

(ii) *Passenger Traffic.* With the exception of the Commonwealth Railway Systems, which operate only country services, all systems provide both suburban and country passenger services. Traffic classed as "suburban" moves between stations within a classified suburban area around each capital city, whilst traffic classified as "country" originates or terminates at stations outside of this suburban area. Particulars of suburban and country passenger traffic are shown separately in the two tables following.

(a) *Suburban Passenger Traffic.* The following table shows a summary of suburban passenger operations for the years 1956-57 to 1958-59. Most of the suburban services in New South Wales and Victoria are operated within electrified areas.

(a) Includes construction staff. (b) Included with operating staff. (c) Construction work is carried out by private contractors and the staff engaged is therefore not under the control of the Railway Commissioner. (d) Includes construction staff, Victoria.

C. TRAMWAY, TROLLEY-BUS AND OMNIBUS SERVICES.

1. **Systems in Operation.**—(i) *Tramway and Trolley-bus.* Since 1st April, 1947, all systems have been operated by government or municipal authorities. Tramway systems are located in the following cities—New South Wales, Sydney; Victoria, Melbourne, Bendigo and Ballarat; Queensland, Brisbane; South Australia, Adelaide; and Tasmania, Hobart. Trolley-bus services operate in Sydney, Brisbane, Adelaide, Perth and Hobart. All systems are electric.

In many parts of Australia, private lines used for special purposes in connexion with the timber, mining, sugar, or other industries are often called tramways, but they are more properly railways and the traffic on them has nothing in common with that of the street tramways for the conveyance of passengers, which are dealt with in the present section.

(ii) *Motor Omnibus.* Motor omnibus services are in operation in the capital cities and many other cities and towns of Australia. Government and municipal authorities operate certain services and the others are run by private operators; the former are run in conjunction with the existing electric tramway systems.

Particulars of motor omnibus services under the control of private operators are recorded in the States of New South Wales, Victoria, South Australia and Western Australia. In New South Wales particulars of private services are compiled for the Sydney Metropolitan and Newcastle transport district and the city of Greater Wollongong. In Victoria they relate to the Melbourne Metropolitan area only and in South Australia for services licensed by the Metropolitan Transport Trust and the Transport Control Board. In Western Australia particulars of all services throughout the State are included.

2. **Government and Municipal Services.**—(i) *Summary of Operations, States.* Because of the development in recent years of the various forms of public road transport under the control of single authorities, and the gradual replacement of tramway services by motor

omnibus services, it is no longer possible to obtain separate statistics for all phases of the activities of each form of transport, particularly as regards financial operations. In this section, therefore, statistics of public tramway, trolley-bus and motor omnibus services are now combined (with separate details shown for each form of transport where possible) in single tables, instead of, as formerly, in separate tables for tramway and trolley-bus services and for omnibus services.

Tramway and trolley-bus services are controlled by Government authorities in all States except Queensland where the control is municipal (85 route miles). For tramway services, there were, at 30th June, 1959, 281 route miles of 4 ft. 8½ in. gauge and 5 route miles of 3 ft. 6in. gauge.

The following table gives a summary of the operations of tramway, trolley-bus and omnibus systems controlled by Government and Municipal authorities, for 1958–59.

**TRAMWAY, TROLLEY-BUS AND OMNIBUS SERVICES: GOVERNMENT
AND MUNICIPAL, 1958–59.**

(a) Includes particulars for New South Wales trolley-buses. (b) Tramway vehicle miles compiled on a revised basis for New South Wales, therefore figures from 1956-57 will not be comparable with those for previous years. (c) Includes particulars for Tasmanian trams and trolley-buses. (d) Excludes government grants. (e) Includes provision of reserves for depreciation, etc., where possible. (f) Includes accidents relating to omnibuses operated by the Adelaide Municipal Tramways Trust and the Hobart and Launceston Metropolitan Transport Trust, and excludes accidents to employees in New South Wales.

NOTE.—Minus sign (—) denotes deficit.

3. *Private Services.—Summary of Operations.* The following table shows the operations of motor omnibus services under the control of private operators in New South Wales, Victoria, South Australia and Western Australia during each of the years 1955–56 to 1958–59:—

MOTOR OMNIBUS SERVICES: PRIVATE.

—Year.	Number of Omnibuses.	Omnibus-miles. (‘000.)	Passenger-journeys. (‘000.)	Value of Plant and Equipment. (£’000.)	Gross Revenue. (£’000.)	Persons Employed.

1958–59(h)	..	146	6,028	15,846	260	804	287

(a) Metropolitan, Newcastle and Wollongong transport districts only. (b) Metropolitan area only. (c) Vehicles only. (d) Drivers only. (e) Partly estimated. (f) Services licensed by the Metropolitan Transport Trust and the Transport Control Board. (g) Not available. (h) During 1958–59, five private services were taken over by the Metropolitan Transport Trust.

D. FERRY (PASSENGER) SERVICES.

1. *General.*—Ferry services to transport passengers are operated in the following States—New South Wales, at Sydney and Newcastle; Western Australia, on the Swan River at Perth; Tasmania, on the Derwent River at Hobart, on the Mersey River at Devonport and across D’Entrecasteaux Channel to Bruny Island. Control is exercised both by governmental authorities and by private operators. In Victoria and Queensland the services operated are not extensive, and there are no ferry services in South Australia.

2. **Summary of Operations.**—The operations of ferry passenger services in New South Wales, Western Australia and Tasmania during the years 1956–57 to 1958–59 are summarized in the following table. Particulars of passengers carried on vehicular ferries are not included.

FERRY (PASSENGER) SERVICES.

Year.	Number of Vessels.	Passenger Accommodation.	Passenger-journeys. (‘000.)	Gross Revenue. (£.)	Persons Employed.
-------	--------------------	--------------------------	--------------------------------	------------------------	-------------------

NEW SOUTH WALES—SYDNEY AND NEWCASTLE.

1958–59	5	1,602	445	22,202	23

E. MOTOR VEHICLES.

1. **Motor Industry.**—Chapter VI.—Manufacturing Industry contains summarized information on the motor industry of Australia and includes some data on the imports of motor bodies and chassis. Chapter XIII.—Trade contains further data on imports, including those of petroleum products.

2. **Registration.**—The arrangements for the registration of motor vehicles and the licensing of drivers and riders are not uniform throughout Australia. Particulars regarding methods of registration, licences, fees payable, etc., in each State and Territory at 30th June, 1957 were given in Official Year Book, No. 44, pages 407–10.

3. **Taxi-cabs and Other Hire Vehicles.**—In all the capital cities and in most of the provincial centres, taxi-cabs and other vehicles ply for hire under licence granted by either the Commissioner of Police or the local government authority concerned. As most of these vehicles are independently controlled by individuals or small companies, it has not been possible to obtain complete data in respect of their operations.

4. **Motor Omnibuses.**—In both urban and provincial centres, motor omnibus traffic has assumed considerable proportions during recent years and in some States, the railway and tramway systems run motor services complementary to their main services. There has been a considerable replacement also, during the last few years, of existing tramway services by trolley-bus and motor omnibus services. (See pp. 541–4.)

5. **Motor Vehicles on the Register, etc.**—(i) *Registrations and Revenue.* The following table shows particulars of the registration of motor vehicles, licences issued and revenue received for 1958–59 and a summary for Australia for each of the years 1954–55 to 1958–59. It should be noted that in Victoria registration is made on the basis of the purpose for which the vehicle is to be used; consequently, motor car registrations are overstated by the inclusion of commercial vehicles registered for private use.

A graph showing for all motor vehicles other than motor cycles the registrations in force at 30th June of each year from 1925 to 1959 will be found on page 526.

MOTOR VEHICLES: REGISTRATIONS AND REVENUE.

NOTE.—See NOTE to previous table.

6. **New Vehicles Registered.**—(i) *States and Territories, 1958–59.* The following table shows the number of new vehicles registered in each State and Territory during 1958–59. A graph showing the number of new motor vehicles (excluding motor cycles) registered during each of the years 1928–29 to 1958–59 will be found on page 526.

NEW MOTOR VEHICLES REGISTERED, 1958–59.

Vehicles.	N.S.W.	Vic.(a)	Q'land.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Motor cars (b) ..	58,302	56,337	20,956	16,760	10,389	5,416	391	1,630	170,181
Commercial vehicles, etc.(c) ..	34,357	14,620	11,278	6,110	5,140	2,059	352	474	74,390
Motor cycles ..	2,690	2,234	1,606	1,095	2,071	176	37	83	9,992
Total ..	95,349	73,191	33,840	23,965	17,600	7,651	780	2,187	254,563

(a) See para. 5 on p. 546. (b) Includes taxis and hire cars. (c) Includes utilities, panel vans, trucks, omnibuses and station wagons.

NOTE.—See NOTE to table on p. 546.

(ii) *Australia.* Particulars of the number of new vehicles registered in Australia during each of the years 1954–55 to 1958–59 are shown in the following table:—

NEW MOTOR VEHICLES REGISTERED: AUSTRALIA.

Vehicles.	1954–55.	1955–56.	1956–57.	1957–58.	1958–59.
Motor cars (a)(b)	166,801	163,598	149,695	165,236	170,181
Commercial vehicles, etc.(b)(c)	67,188	69,312	58,967	67,139	74,390
Motor cycles	11,282	10,530	9,655	10,604	9,992
Total	245,271	243,440	218,317	242,979	254,563

(a) Includes taxis and hire cars. (b) See para. 5 on p. 546. (c) Includes utilities, panel vans, trucks, omnibuses and station wagons.

NOTE.—See NOTE to table on p. 546.

7. **World Motor Vehicle Statistics, 1959.**—At 1st January, 1959 there were 112,724,300 motor cars, trucks and omnibuses registered in various countries of the world. This was an increase of 5.3 per cent. on the figure for the previous year, 107,023,800. Of the 1959 registrations, 67,824,700 or 60.2 per cent. of the world total were in the United States of America, whilst Australian registrations amounted to 2.3 per cent. This information is largely derived from the *American Automobile*, May, 1959.

F. ROAD TRAFFIC ACCIDENTS.

1. **General.**—Statistics, of “Total Accidents Recorded”, were collected to 31st December, 1957, on a comparable basis for all States except Tasmania, where, under legislation passed on 10th August, 1954, it became no longer obligatory to report accidents involving only damage to property. However, this series was suspended from 1st January, 1958, due to the inconsistency between States in recording “damage only” accidents and the distortion of the statistics caused by the difficulty of assessing damage to property.

Details are not available in respect of road traffic accidents which occur in the Northern Territory.

2. **Accidents Involving Casualties.**—(i) *States, 1958–59.* The following table gives a summary of accidents involving casualties in each State and the Australian Capital Territory for the year 1958–59.

**ROAD TRAFFIC ACCIDENTS INVOLVING CASUALTIES(a): ACCIDENTS
RECORDED AND CASUALTIES, 1958–59.**

State or Territory.	Accidents Involving Casualties.	Persons Killed.			Persons Injured.		
		Number.	Per 100,000 of Mean Population.	Per 10,000 Motor Vehicles Registered.	Number.	Per 100,000 of Mean Population.	Per 10,000 Motor Vehicles Registered.

(a) Accidents (reported to the police) which occurred in public thoroughfares and which caused death or injury to persons to an extent requiring surgical or medical treatment.

(iv) *Accidents Recorded and Casualties, classified according to Type of Vehicle, Road User, etc., Involved.* The following table shows, for the year 1958-59, the number of accidents involving casualties in which each of several classes of vehicles, road users, etc., were involved. The persons killed and injured are similarly classified.

ROAD TRAFFIC ACCIDENTS INVOLVING CASUALTIES(a), CLASSIFIED ACCORDING TO TYPE OF VEHICLE, ROAD USER, ETC., INVOLVED, AUSTRALIA, 1958-59.(b)

Particulars.	Motor Vehicle.	Motor Cycle.	Pedal Cycle.	Tram.	Animal and Animal-drawn Vehicle.	Pedestrian.	Fixed Object.	Other Vehicle.
Accidents Involving ..	38,520	6,461	4,613	390	499	8,423	2,738	285
Casualties ..	2,116	232	153	21	14	674	133	53
Persons Killed ..	51,713	7,353	4,697	437	596	8,274	3,775	348

(a) Accidents (reported to the police) which occurred in public thoroughfares and which caused death or injury to persons to an extent requiring surgical or medical treatment.

(b) It should be noted that, as accidents and casualties classified according to one type of road user, etc., may also be classified according to another, these totals cannot be added across to obtain grand totals. The figures above exclude 43 accidents involving casualties which were not classified according to type of vehicle, road user, etc., involved, from which there were 5 persons killed and 48 persons injured.

It will be seen, therefore, that in 1958-59, motor vehicles were involved in 38,520 accidents involving casualties from which there were 2,116 persons killed and 51,713 persons injured. The 38,520 accidents involving casualties in which motor vehicles were involved comprised 12,102 collisions with other motor vehicles, 4,151 with motor cycles, 3,815 with pedal cycles,

162 with trams, 266 with animals and animal-drawn vehicles, 7,621 with pedestrians, 2,389 with fixed objects, 211 with vehicles other than those mentioned, 7,262 instances of overturning or leaving the roadway, and 541 accidents to passengers only. The particulars of accidents involving casualties in which motor cycles, pedal cycles, etc., were involved with motor vehicles are also included under their respective headings in the table above. Consequently, since the figures in each column refer to the *total* accidents involving casualties in which the particular type of vehicle, etc., was involved, any aggregation across would result, through duplication, in considerable overstatement of the actual totals.

3. **Road Traffic Accidents Involving Casualties, and Persons Killed or Injured.**—The following table shows the number of road traffic accidents involving casualties and persons killed or injured in road traffic accidents in each State and the Australian Capital Territory during each of the years 1954–55 to 1958–59:—

**ROAD TRAFFIC ACCIDENTS INVOLVING CASUALTIES(a) AND PERSONS
KILLED OR INJURED.**

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Total.

(a) Accidents (reported to the police) which occurred in public thoroughfares and which caused death or injury to persons to an extent requiring surgical or medical treatment.

G. CIVIL AVIATION.

1. **Historical.**—A short review of the progress of civil aviation in Australia up to the date of foundation of a Civil Aviation Administration was published in Official Year Book No. 16, pages 534–5.

2. **Foundation and Administration of Civil Aviation.**—A brief account of the foundation and objects of this Administration will be found in Official Year Book No. 19, page 299. Official Year Book No. 38 and earlier issues contain information on the control of civil

aviation by the Board (1936) and later (1939) by the Department of that name. The Acts defining the broad principles of operation of the administration of civil aviation and the Regulations amplifying them, and the principal functions of the administration are also described.

The Department of Civil Aviation is divided into eleven Divisions as follows:—Air Transport and External Relations; Administration, Personal and Establishments; Finance and Stores; Airport Engineering; Aviation Buildings and Property; Flying Operations; Airworthiness; Airways Operations; Airways Engineering; Aviation Medicine; Accident Investigation and Analysis.

3. International Activity.—(i) *International Organizations.* A full report of the formation of the International Civil Aviation Organization, the Commonwealth Air Transport Council and the South Pacific Air Transport Council appeared in Official Year Book No. 37 and particulars of subsequent activity in the international field were included in issue No. 38. The International Civil Aviation Organization had a membership of 74 nations at the end of June, 1959. Australia has continued her representation on the Council, a position which she has held since I.C.A.O. was established in 1947. The thirteenth meeting of the South Pacific Air Transport Council was held in New Zealand in December, 1959. Further details will be found in Official Year Book No. 40 and earlier issues.

(ii) *International Air Services.* Qantas Empire Airways have introduced into service seven Boeing 707 jet aircraft and four Lockheed Electra aircraft. The Boeing 707 operates to North America and on to the United Kingdom and also to the United Kingdom via the Middle East. Qantas, in October, 1959 became the first airline to operate a round-the-world pure-jet air service. Lockheed Electra aircraft are in service to Japan via Manila and Hong Kong. Super Constellation aircraft provide services to South Africa across the Indian Ocean, to Papua and New Guinea, and a cargo service to United Kingdom via the Middle East. DC4 aircraft fly to Norfolk Island and DC3 aircraft fly to the British Solomon Islands and to Netherlands New Guinea. Qantas was operating aircraft over 62,365 route-miles on international services at 30th June, 1959. A summary of the operations of overseas services wholly or partly Australian-owned appears on page 556.

Three Lockheed Electra aircraft operated by Tasman Empire Airways Ltd., which is jointly owned by the Australian and New Zealand Governments, link Sydney and Melbourne with both Auckland and Christchurch.

4. Regular Air Services within Australia.—Details of the Government's rationalization scheme and the 1957 amendment to the Civil Aviation Agreement Act consequent upon Ansett Transport Industries Ltd. purchasing Australian National Airways Pty. Ltd. will be found in Official Year Book No. 44, page 421.

The Airlines Equipment Act assented to in October, 1958, gave effect to financial arrangements whereby re-equipment programmes would be assisted. This re-equipment programme has been highlighted by the introduction of Fokker Friendship and Lockheed Electra aircraft into regular air services provided within Australia.

The Act also contains further rationalization provisions whereby the Minister for Civil Aviation can determine the maximum capacity to be operated by the Australian National Airlines Commission and Ansett Transport Industries Ltd. on both competitive and non-competitive routes. In this regard the Act provides for consultation between the two Airlines and the Director-General of Civil Aviation for the purpose of considering matters relevant to the making of estimates and determinations of capacity.

A summary of the operations of regular air services within Australia appears on page 556 and a map showing air routes on pages 559-60.

5. Air Ambulance Services.—A brief statement on the foundation and objects of the Air Ambulance Services will be found in Official Year Book No. 32, pages 145 and 146.

During the year 1958-59, the Air Ambulance and Royal Flying Doctor Services continued to provide medical aid for the outback regions of Australia. The Commonwealth Department of Health operates the Northern Territory Aerial Medical Service with two Drovers and two Dove aircraft. The Royal Flying Doctor Service of Australia, operating from Broken Hill, New South Wales (two Drovers), and Port Hedland, Western Australia (three Cessna and one DH83), covers a wide area of inland Australia. The Bush Church

Aid Society for Australia and Tasmania, supported by funds from the Church of England, maintains two aircraft (one Percival Proctor III and one Lockheed 12A) at Ceduna, South Australia. The Federal Methodist Inland Mission (one DH82A) operates services from Meekatharra, Western Australia, and the Queensland Ambulance Transport Brigade operates a service from Cairns (one DH89A, one Auster J5B and one Cessna 182A).

6. Training of Air Pilots.—A brief statement of the pre-war policy of the Commonwealth Government regarding assistance to Aero Clubs was given in Official Year Book No. 32, page 146. A summary of the assistance granted during the years 1951 to 1956 will be found in Official Year Book No. 42, page 253, whilst details of the new contract, initiated on 1st January, 1957, and the assistance granted during 1956–57 will be found in Official Year Book No. 44, page 421.

During the year 1958–59, the flying training organizations (non-profit aero clubs and commercial flying schools) earned bonuses in respect of 393 private pilot licences, 106 commercial pilot licences and 41 initial instructor ratings. It should be noted that, under the new contract, commercial licence issue and instructor rating bonuses were substituted for renewal bonuses. Subsidized hours flown by aero clubs and flying schools numbered 82,165 and the total earnings of all organizations amounted to £189,985. An overall limit placed on the subsidy restricted the total payments to £145,000. There were 31 aero clubs and 6 commercial flying training schools in operation during the year, and, in addition to civil flying, some 13,724 unsubsidized civil hours and 4,953 service training hours were flown; in all, a total of 100,842 hours.

7. Gliding Clubs.—For the year 1958–59, a total subsidy of £3,000 was distributed to member clubs of the Gliding Federation of Australia, on the basis of £1,500 for membership and £1,500 for gliding certificates issued. In addition, the Federation received a grant of £1,000 towards the cost of operation of its school for instructors and engineers.

8. Airways Engineering.—In the fields of airways engineering which includes the provision of radio navigation facilities, radio communication systems and airport lighting, steady progress was made during the year 1958–59.

Both the high frequency and very high frequency communications systems have been extended. On the very high frequency side the expansion has been particularly noteworthy, the object being to increase the coverage area available for direct speech between aircraft in flight and air traffic controllers. With the completion of the Mount Barrow installation in Tasmania and the Arthur's Seat installation in Victoria there is now complete coverage over Bass Strait. The station at Kings Tableland, New South Wales, has been completed. This station is the major outlet for very high frequency transmission from the Sydney area and is one of the most important repeater stations. It provides remote control facilities from Kingsford-Smith Airport to the Sydney International Transmitting Station and is a vital station in the plan to provide voice communication with aircraft flying on the Sydney-Brisbane route.

The Sydney International Transmitting Station at Llandillo has now gone into full operation and is providing, amongst other services, five radio teletype circuits to overseas stations. This station together with the International Transmitting Station previously opened at Darwin has made possible substantial improvements to the overseas communications so vital in the control of international air traffic. Radio teletype circuits within the Commonwealth have been extended and these additional services have increased the efficiency of point to point communications. The high frequency air-ground-air communication networks have been extended to provide improved communications for commercial aircraft operations and an entirely separate network has been set up to provide exclusive channels for communications with light aircraft. Steady progress has been made towards improving communications in the Territory of Papua and New Guinea.

In the field of radio navigational aids, instrument landing systems have been installed at Adelaide, Port Moresby and Avalon. In addition 2 distance measuring beacons, 5 locators, 2 non-directional beacons and 2 visual aural ranges have been brought into service. Airport radar systems have been made operational at Melbourne and Sydney where they are being used as an aid to terminal air traffic control.

A special effort has been made in the field of air traffic control engineering and as a result the air traffic control centres and control towers at Hobart, Launceston and Darwin have been completely re-equipped. The aeradio station at Cloncurry has been rebuilt and this has become one of the Commonwealth's most important inland aeradio stations. In view of the large number of small aeradio stations in the Commonwealth that must be re-equipped, considerable attention has been given to the design and manufacture of component parts to prefabricate new installations which will be used to replace old ones. Although no installations of this nature have been made, the designs have been prepared and the materials are available and it is hoped this will result in a rapid re-equipment programme for aeradio stations.

In the field of airport lighting the most note-worthy addition to facilities has been the completion of three high intensity approach lighting installations at Sydney, Darwin and Hobart.

9. Meteorological Services.—The Department of Civil Aviation is the biggest user of meteorological services in the Australian Commonwealth and its territories, and therefore the requirements for civil aviation purposes have played a big part in determining the form of meteorological organization that exists at the present time.

The need for the dissemination of adequate and accurate meteorological information to flights has become more important in recent years with the greater demands of high performance aircraft, with their more critical fuel requirements and greater susceptibility to changes in atmospheric conditions.

The Department and the Commonwealth Bureau of Meteorology have now completed working arrangements designed to meet the very precise requirements of modern civil aviation in Australia.

The working arrangements specify the standards of service, times and places of operation and facilities required for the provision of meteorological services for civil aviation.

10. Search and Rescue.—On 1st November, 1958, the Department assumed full responsibility for co-ordination of search and rescue activity throughout the Australian flight information regions except Darwin, where by arrangement with the Royal Australian Air Force, search and rescue is co-ordinated by the Officer Commanding. The Department also arranges for the availability of search and rescue facilities.

Previously, the Royal Australian Air Force, in operational and financial agreement with the Department of Civil Aviation provided the bulk of the sea-air rescue facilities and the organization to co-ordinate those facilities.

The current search and rescue plan provides for the availability of search aircraft on a self-help basis from within the aviation industry, supplemented by special arrangements with the Department of Shipping and Transport, the Department of the Navy, launch owners, police and military forces, forestry units and so on.

In using general duty aircraft for sea-air rescue purposes, it is necessary to temporarily equip them with droppable dinghies and/or droppable storpedoes fitted with first aid gear, food and water. This, in turn, has necessitated the establishment of limited supplies of these facilities at strategic points throughout Australia and the Territory of Papua and New Guinea.

Along the coastlines of the Commonwealth, marine craft are available and serve as auxiliary sea-air rescue units. However, at selected major aerodromes near the coastline and at Cocos Islands, the Department provides marine craft on a lifeboat principle.

Due to the very high cost of long range ocean going rescue ships, oceanic rescue requirements must be satisfied by the use of naval and mercantile shipping diverted to the scene of distress. International law requires the master of a merchant ship at sea to proceed with the utmost dispatch to a distress scene and arrangements have been made for the plotting of all shipping movements upon the declaration of an emergency phase.

Land rescue units are organized in close co-operation with Air Force, Army, Forestry and Police organizations.

11. **Aircraft Parts and Materials.**—At 30th June, 1959, the number of firms and organizations approved by the Department of Civil Aviation to trade in the aircraft industry was 480.

12. **Aircraft Overhaul and Repair.**—Aircraft overhaul and repair is carried out in workshops approved by the Director-General of Civil Aviation. Components and accessories are now certified on release notes signed by approved members of the firm's inspection organization.

13. **Test and Examination of Aircraft Parts and Materials.**—This work is carried out in test houses and laboratories registered by the National Association of Testing Authorities, except when production is for the manufacturer's own use, when the testing, etc. can be done in an approved laboratory. Certificates issued under registrations by the Association are acceptable to any Commonwealth Government Department.

14. **Statistical Summaries.**—(i) *Registrations, Licences, etc.* The following table provides a summary of the civil aviation registrations and licences in force in Australia at 30th June in each of the years 1955 to 1959.

CIVIL AVIATION: REGISTRATIONS, LICENCES, ETC., AUSTRALIA.(a)

Particulars.	At 30th June—				
	1955.	1956.	1957.	1958.	1959.

Ton-miles(b) '000	7,927	8,458	9,450	9,789	8,834

(a) Airlines wholly or partly owned by Australian interests.

(b) In terms of short tons (2,000 lb.).

(v) *Accidents and Casualties.* The number of accidents involving aircraft on the Australian register in which persons were killed or injured is shown in the following table for the years 1954–55 to 1958–59.

CIVIL AVIATION: ACCIDENTS INVOLVING AUSTRALIAN AIRCRAFT.(a)

Particulars.	1954–55.	1955–56.	1956–57.	1957–58.	1958–59.
Number(b)	22	31	37	35	39
Persons killed	27	22	24	28	21
Persons injured	19	27	36	31	30

(a) Includes accidents and casualties in the Territory of Papua and New Guinea. all accidents irrespective of whether they involved death or injury.

(b) Includes

15. **Territory of Papua and New Guinea.**—In this area there were, at 31st December, 1959, 18 aerodromes and 21 water aerodromes under the control of the Department of Civil Aviation; 93 aerodromes under the control of the Territory Administration; 2 aerodromes under joint control by the Department of Civil Aviation and the Territory Administration; and 13 aerodromes (licensed for commercial operations) under private control. One permanently maintained heliport and approximately 25 permanently maintained helicopter clearings were also in existence, as well as a number of unlicensed private aerodromes and helicopter clearings.

Four companies conduct regular services between the major aerodromes. Charter flights can be arranged to almost any locality. Further information may be found in Chapter V.—The Territories of Australia.

During the year 1958–59, one accident (one death) involving aircraft occurred in the Territory of Papua and New Guinea.

PART II.—COMMUNICATION.

A. POSTS; TELEGRAPHS; TELEPHONES; CABLE AND RADIO COMMUNICATION.

NOTE.—In this Division particulars for the Australian Capital Territory are included with those for New South Wales, while the South Australian figures include particulars for the Northern Territory unless otherwise indicated.

§ 1. General.

1. **The Postmaster-General's Department.**—Under the provisions of the Post and Telegraph Act 1901, the Department was placed under the control of the Postmaster-General. The Director-General of Posts and Telegraphs controls the Department under the Postmaster-General, whilst the principal officer in each State is the Director of Posts and Telegraphs.

2. **Postal Facilities.**—(i) *Relation to Area and Population.* The following statement shows the number of post offices, the area in square miles and the number of inhabitants to each post office (including non-official offices) and the number of inhabitants to each 100 square miles in each State and in Australia at 30th June, 1959. In order to judge clearly the relative postal facilities provided in each State, the area of country to each office as well as the number of inhabitants per office should be taken into account.

POSTAL FACILITIES: RELATION TO AREA AND POPULATION AT 30th JUNE, 1959.

Particulars.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	Aust.
Number of post offices(a)	2,563	2,278	1,263	904	633	517	8,158
Number of square miles of territory per office	121	39	528	1,000	1,542	51	364
Number of inhabitants per office ..	1,484	1,236	1,141	1,042	1,136	662	1,233
Number of inhabitants per 100 square miles	1,225	3,203	216	104	74	1,306	339

(a) Includes "official", "semi-official", and "non-official" offices.

The foregoing table does not include "telephone" offices at which no postal business is transacted.

(ii) *Number of Offices.* The following table shows the number of post offices (exclusive of telephone offices) in each State at 30th June, 1959.

NUMBER OF POST OFFICES AT 30th JUNE, 1959.

Type of Office.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
Official and Semi-official(a) ..	512	320	221	167	148	53	1,421
Non-official	2,051	1,958	1,042	737	485	464	6,737
Total	2,563	2,278	1,263	904	633	517	8,158

(a) There were two semi-official post offices in N.S.W. and two in Victoria.

(iii) *Employees and Mail Contractors.* The number of employees and mail contractors in the Central Office and in each of the States at 30th June, 1959 are given in the following table:—

**NUMBER OF POSTAL EMPLOYEES AND MAIL CONTRACTORS AT
30th JUNE, 1959.**

Particulars.	Central Office.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	Aust.
Employees	1,220	36,058	26,718	13,973	9,319	6,723	3,762	97,773
Mail Contractors(a)	2,125	1,126	1,253	374	274	250	5,402

(a) Includes persons employed to drive vehicles.

3. *Gross Revenue, Branches—Postmaster-General's Department.*—The gross revenue (actual collections) in respect of each branch of the Department during the year 1958–59 is shown in the table hereunder:—

POSTMASTER-GENERAL'S DEPARTMENT: GROSS REVENUE, 1958-59.(a)
(£'000.)

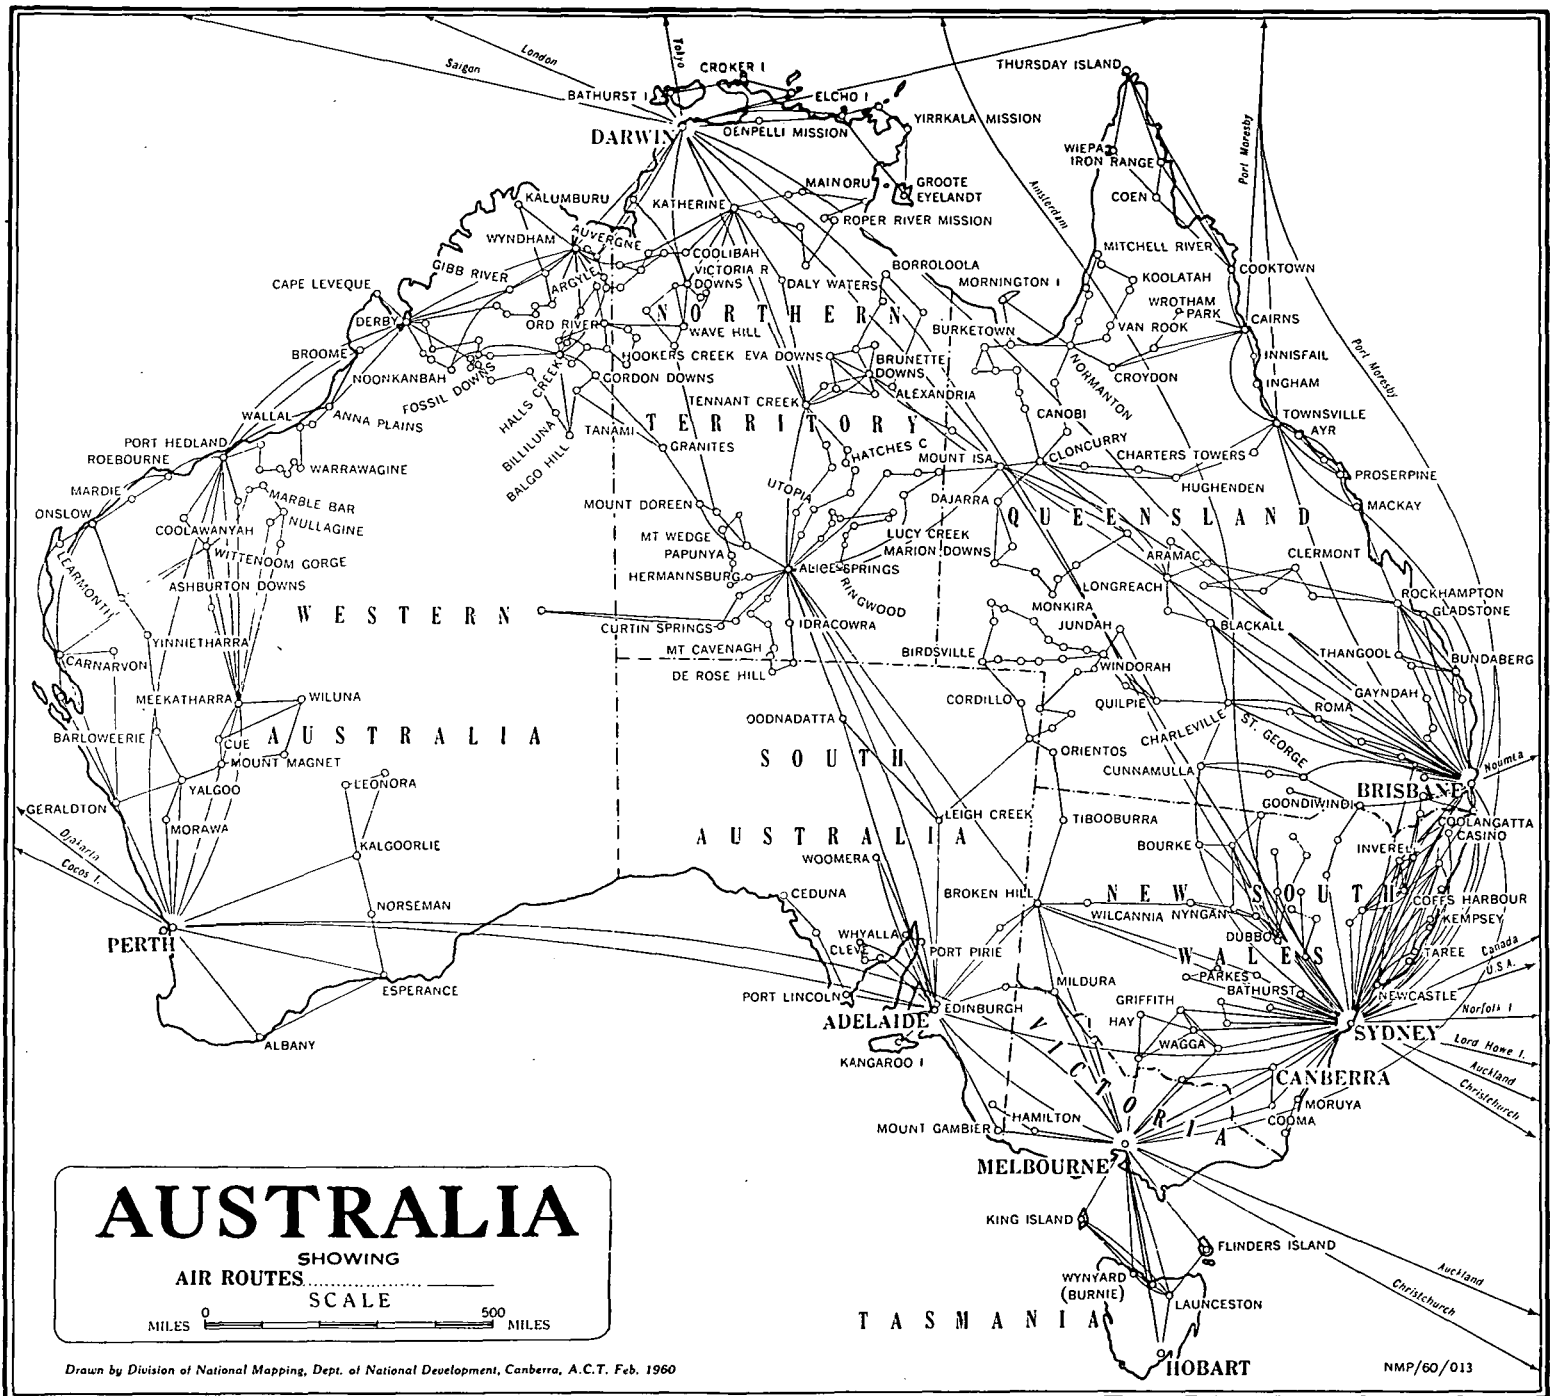

Sources.	N.S.W.	Vic.(b)	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.

Grand Total ..	40,278	31,270	13,902	9,096	6,109	2,812	103,467

(a) The figures in this table relate to revenue actually collected during the year as recorded for Treasury purposes. (b) Includes Central Office collections. (c) Includes Central Office revenue from airmail services.

For each of the years 1954–55 to 1957–58 the gross revenue for Australia was £72,825,000, £79,341,000, £90,074,000 and £96,776,000 respectively.

Gross revenue for the year 1958–59 increased by 6.9 per cent. compared with that for the previous year. Revenue of the Postal, Telegraph and Telephone branches increased by 6.1 per cent., 2.5 per cent. and 7.9 per cent. respectively.

4. *Expenditure, Postmaster-General's Department.*—(i) *Distribution.* The following table shows, as far as possible, the distribution of expenditure (actual payments) in each State during 1958–59, as shown by records kept for Treasury purposes. The table must not be regarded as a statement of the working expenses of the Department since items relating to new works, interest, etc., are included therein.

**POSTMASTER-GENERAL'S DEPARTMENT: DISTRIBUTION OF
EXPENDITURE, 1958-59.(a)**

(£'000.)

Particulars.	Central Office.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	Aust.
Expenditure from Ordinary Votes—								
Salaries and payments in the nature of salary	572	16,193	11,560	6,331	3,988	2,642	1,556	42,842

Other expenditure, not allocated to States	(c)3,799	3,799
Grand Total	10,038	48,779	35,188	17,470	12,206	8,572	4,580	136,833

(a) The figures in this table represent actual payments made during the year as recorded for Treasury purposes.

(b) Expenditure on airmail services.

(c) Includes expenditure not apportioned to States, i.e., interest on loans, £798,000; sinking fund, £798,000; superannuation contributions, £2,179,000; transferred officers' pensions and allowances, £2,000; pensions and retiring allowances, £4,000 and pension supplements, £18,000.

(ii) *Totals.* Grand total expenditure for Australia for each of the years 1954-55 to 1957-58, respectively, were:—£103,586,000, £114,497,000, £121,917,000 and £131,263,000. Total expenditure increased by 4.2 per cent. during 1958-59, compared with that during 1957-58.

5. Profit or Loss, Postmaster-General's Department.—The foregoing statements of gross revenue and expenditure represent actual collections and payments made and cannot be taken to represent the actual results of the working of the Department for the year. The net results for each branch, after providing for working expenses (including superannuation, pensions and depreciation) and interest charges including exchange, are shown in the following table for the years 1954-55 to 1958-59.

POSTMASTER-GENERAL'S DEPARTMENT: PROFIT OR LOSS, BRANCHES.

(£'000.)

Branch.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.

(a) Includes registered, cash on delivery and duty parcels.

2. **Cash on Delivery Parcels Post.**—(i) *General.* The Postmaster-General's Department undertakes, upon prepayment of a prescribed commission, to deliver registered articles sent by parcels post within Australia, or between Australia and Lord Howe Island, Norfolk Island, Nauru, the Territory of Papua and New Guinea, or Fiji, to recover from the addressee on delivery a sum of money specified by the sender, and to remit the sum to the sender. The object of the system is to meet the requirements of persons who wish to pay at the time of receipt for articles sent to them, and of traders and others who do not wish their goods to be delivered except on payment.

(ii) *States.* The next table shows particulars regarding the cash on delivery parcels posted in each State in 1958-59.

CASH ON DELIVERY PARCELS POST, 1958-59.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.

Revenue(a) £'000	96	35	36	15	11	1	194

(a) From commission and postage.

(iii) *Australia.* In the following table particulars of cash on delivery parcels posted in Australia are shown for the years 1954-55 to 1958-59.

CASH ON DELIVERY PARCELS POST: AUSTRALIA.

Particulars.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
Parcels posted .. '000	845	762	672	624	609
Value £'000	2,804	2,526	2,289	2,222	2,224
Revenue(a) £'000	225	206	215	200	194

(a) From commission and postage.

3. **Total Cost of Carriage of Mails.**—During 1958-59, the total amounts paid for the carriage of mails, as disclosed by the Profit and Loss Account of the Postal Branch, were as follows:—road (including departmental transport) £3,668,000; railway £1,405,000; sea £185,000; air—internal £717,000, oversea £3,742,000; Grand Total £9,717,000.

4. **Transactions of the Dead Letter Offices.**—During the year 1958–59, 1,491,000 letters were returned to senders or delivered, 348,000 were destroyed in accordance with the Act, and 199,000 were returned to other countries as unclaimed—a total of 2,038,000. Corresponding particulars for packets were—512,000, 265,000, 33,000 and 810,000. There were 2,848,000 articles handled in all.

5. **Money Orders and Postal Notes.**—(i) *General.* The issue of money orders and postal notes is regulated by sections 74–79 of the Post and Telegraph Act 1901–1950. The maximum amount for which a single money order payable within Australia may be obtained is £40, but additional orders will be issued upon request when larger amounts are to be remitted. The maximum amount permitted to be sent to any person in the dollar area is £A.5 a month and for remittances to countries outside the dollar area, £A.10 a week. A postal note cannot be issued for a sum larger than twenty shillings.

(ii) *States.* Particulars regarding the business transactions in each State for the year 1958–59 are shown hereunder:—

MONEY ORDERS AND POSTAL NOTES: TRANSACTIONS, 1958-59.

§ 3. Telegraphs.

1. General.—A review of the development of telegraph services in Australia up to 1921 appeared in Official Year Book No. 15, page 625, and subsequent developments of importance have been dealt with in later issues. During the past few years substantial improvements in both the speed and grade of telegraph services throughout Australia have been effected, the entire system being subjected to intensive re-organization. A new teleprinter reperforator switching system (TRESS) which eliminates the use of morse, was inaugurated in the telegraph service. The system is now operating in all mainland States and its extension to Tasmania is planned.

Telephone subscribers may telephone telegrams for onward transmission, or have messages telephoned to them. The fee for the service is small, and means, in effect, that the telegraph system is brought into the home of every telephone subscriber. The number of telegrams lodged by telephone during the year 1958-59 was about 8.7 million, or approximately 39 per cent. of the total lodgments. The number of telegrams telephoned to subscribers totalled 4.6 million.

A radiogram service is provided to certain isolated places throughout Australia and a number of privately-operated wireless transceiver stations have been established at various centres throughout the Commonwealth, enabling telegrams to be exchanged with departmental telegraph offices. Stations sponsored by the Royal Flying Doctor Service of Australia can communicate by wireless with base stations.

A picturegram service is provided at the capital cities of the States and certain country centres. The equipment at these points permits the direct transmission and reception of overseas photo-telegrams. In 1958-59, 6,633 picturegrams were lodged for destinations within Australia, 1,137 photo-telegrams were transmitted to overseas destinations and 6,881 were received from other countries.

The teleprinter exchange service (Telex) was introduced in Australia in September 1954 for use by subscribers between Sydney and Melbourne. The service has expanded quickly and is now firmly established in all capital cities including Canberra and 32 provincial centres. At the end of June, 1959 there were 502 private subscribers connected to the service throughout Australia.

The telex service is, in most respects, similar to the telephone service except that communications are exchanged on a printed word basis instead of speech. Special services provided for telex subscribers include, trunk and local calls, particular person calls, fixed time calls and conference and broadcast calls.

In addition to direct subscriber-to-subscriber communication, the telex service provides facilities which enable subscribers to lodge or receive telegrams through the Printergram Section at the local Telegraph Office. Moreover, Melbourne and Sydney subscribers may lodge their overseas telegrams direct with the offices of the Overseas Telecommunications Commission (Aust.) in those cities.

During the year 1958-59, 228,861 telex trunk calls were exchanged. In the same period subscribers lodged 704,347 telegrams and had 1,021,855 telegrams transmitted direct to their premises by means of the printergram facility.

The international telex service was inaugurated in Australia in October, 1958 with initial services to the United Kingdom, United States of America, Canada and Japan. The service has expanded rapidly and is now available to 28 countries.

During the 8 months ended 30th June, 1959, a total of 21,101 international telex calls, 9,958 originating and 11,143 terminating, was exchanged with overseas countries.

As distinct from telex subscribers, there were 1,032 leased private-wire teleprinter services in operation at the close of business 1958–59. These services are exclusive teleprinter channels leased on a full-time or part-time basis for use between points in the same area or long distance. Some services comprise networks embracing points in all States.

2. Telegraph and Telephone Mileage.—At 30th June, 1959, the combined single-wire mileages for both telegraph and telephone purposes were:—aerial, underground and submarine cables—7,819,000 miles, trunk telephone and telegraph 262,000 miles; aerial wires—telephone trunk and/or telegraph purposes 577,000 miles, exchange and non-exchange service lines 754,000 miles. The mileages of conduits and pole routes were 12,500 duct miles and 121,000 miles respectively. Conduits include only ducts and conduits with an internal diameter of 2 inches or over. Those with a diameter of less than 2 inches are not recorded separately and are included with underground cables. The mileages in each State at 30th June, 1959 may be found in *Transport and Communication*, Bulletin No. 50.

Joint use is now made of poles for power and telephone reticulation; this scheme operates extensively throughout the United States of America and Canada.

3. Telegraph Offices.—(i) *States.* The numbers of telegraph offices, including railway telegraph offices, in the various States at 30th June, 1959 were:—New South Wales, 3,042; Victoria, 2,320; Queensland, 1,777; South Australia, 979; Western Australia, 967; Tasmania, 570.

(ii) *Australia.* The numbers of telegraph offices in Australia at 30th June of each of the years 1955 to 1959 respectively were:—9,907, 9,896, 9,934, 9,708 and 9,655.

4. Telegrams Dispatched within Australia.—(i) *States.* The following table shows the number of telegrams dispatched to places within the Commonwealth and to adjacent islands and to ships at sea, according to the class of message transmitted:—

TELEGRAMS DISPATCHED, 1958-59.
(‘000.)

State.	Paid and Collect.							Unpaid (Ser- vice).	Total Tele- grams.
	Ordin- ary.	Meteor- ological.	Urgent.	Radio- grams.	Press.	Letter- grams.	Total.		
New South Wales	6,394	206	305	74	58	22	7,059	257	7,316
Victoria ..	3,869	127	163	6	17	17	4,199	148	4,347
Queensland ..	3,390	199	117	51	35	14	3,806	157	3,963
South Australia	1,531	93	46	42	23	15	1,750	46	1,796
Western Australia	1,460	140	43	69	17	19	1,748	48	1,796
Tasmania ..	445	43	16	2	5	7	519	26	545
Australia ..	17,090	808	690	244	155	94	19,081	682	19,763

(ii) *Australia.* Telegrams dispatched to destinations within Australia and to adjacent islands and to ships at sea, during each of the years 1954–55 to 1957–58 respectively, numbered:—22,713,000, 22,600,000, 21,144,000 and 20,107,000.

§ 4. Telephones.

1. General.—Particulars of the total mileage of lines used exclusively for telephone purposes are not available, but are combined with all other line mileage. Particulars of the total single wire mileage used for telephone, trunk and/or telegraph purposes are shown in § 3, para. 2, above.

During 1958-59, 140,176 telephone subscribers' lines and 208,259 telephones were added to the system, compared with 139,107 lines and 205,861 telephones in 1957-58. As 8,139 of the subscribers' lines installed in 1958-59 were duplex services, the increase in telephone services was 148,315. With an average at 30th June, 1959, of twenty telephones to every 100 persons, Australia had a telephone density exceeded by that of only three of those countries with 2 million or more telephones. The trunk line network was increased by 98,163 channel miles and at 30th June, 1959 had reached 1,162,807 miles; 81,206 additional channel miles were obtained by the installation of carrier-wave equipment, some of which was installed on radio-telephone bearers. Carrier-wave facilities enable several speech paths to be obtained from one pair of wires or, in the case of radio-telephone systems, without wires at all, and are designed to transmit the voice with greater fidelity than the wire pairs on which they are based. An alternative aerial route between Sydney-Melbourne-Adelaide has been completed and provides a direct route for traffic from Sydney to Adelaide and Perth. Additional trunk line channels are being provided between Tasmania and the mainland. A new pair of wires has been erected between Marree and Alice Springs to be used as a bearer for a twelve-channel system between Adelaide and Alice Springs.

Eight automatic exchanges were brought into operation in metropolitan areas during the year, together with 24 country and 123 (net) rural automatic exchanges. At 30th June, 1959, there were 306 automatic exchanges in the metropolitan areas and 1,342 in country districts, to which 1,553,000 telephones were connected, representing 76 per cent. of the total number in use in Australia.

The development of transit trunk switching was advanced by the installation at a number of exchanges of through trunk switching equipment which enables calls to be routed automatically through major provincial and capital city switching points. This is part of a master plan for the long range development of the telephone system, which envisages a completely automatic network with the connexion of calls, both local and trunk, under the direct control of the subscriber and known as Subscriber Trunk Dialling. Manual trunk service would be available for special calls.

The first of several subscribers' radio-telephone networks, planned for outback areas, was brought into service in the Broken Hill district in April, 1958. The transmitter-receiver and aerial equipment are leased to subscribers and the base station operates from the post office, where the radio-telephone network connects with the Commonwealth telephone system.

An automatic weather forecast system was introduced at Melbourne in October, 1957 and similar equipment was introduced at Brisbane in February, 1959, and at Sydney, Adelaide, Perth and Hobart in March, 1959.

2. Summary.—Particulars relating to the telephone services in each State at 30th June, 1959 are shown in the following table:—

TELEPHONE SERVICES: SUMMARY, 30th JUNE, 1959.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
Exchanges	2,278	1,794	1,358	725	771	400	7,326
Telephone offices (including ex- changes)	3,451	2,861	1,945	1,171	1,111	545	11,084
Lines connected '000	544	451	192	129	83	44	1,443
Instruments connected '000	795	647	256	182	116	60	2,056
(i) Subscribers' instruments '000	778	634	249	177	112	58	2,008
(ii) Public telephones '000	8.4	5.9	3.6	1.9	1.5	1.0	22.3
(iii) Other local instruments '000	8.3	7.4	3.9	3.0	2.3	1.3	26.2
Instruments per 1,000 of population	209	230	178	193	161	175	204

Of the total telephones (2,056,447) in service at 30th June, 1959, 749,624 or 36 per cent. were connected to exchanges situated beyond the limits of the metropolitan telephone networks.

3. **Calling Rates, Trunk Line and Local Calls.**—Short distance trunk line calls are now being recorded on subscribers meters and precise statistics distinguishing between local and trunk line calls are therefore not available. Statistics for the year 1957–58 may be found in Official Year Book No. 45, page 558.

4. **Oversea Telephone Services.**—During the year 1958–59, radio-telephone services were established between Australia and the Sudan, bringing the number of countries with which radio-telephone communication is available to 99. Arrangements were made for calls to and from Scotts Base, Antarctica, to be switched via New Zealand. A direct service was established with Japan in March, 1958 to replace the link via Hong Kong. Service is also provided to certain trans-Atlantic liners, ships off the Australian coast, H.M.A. ships, and H.M.N.Z. ships when cruising in Australian waters.

The amount of traffic handled over the radio-telephone services increased by 16 per cent. over that handled in 1957–58. During 1958–59 the number of calls connected was 91,986, comprising 46,722 originating in Australia and 45,264 incoming calls.

5. **Revenue from Telephones.**—Particulars regarding the revenue from telephone services are included in tables in § 1. (*see pp. 558 and 561*).

6. **World Telephone Statistics, 1959.**—The following table shows the number of telephones in use in various countries with 2 million or more telephones at 1st January, 1959 together with the number per 100 of population and the proportion in each country to the world total.

WORLD TELEPHONE STATISTICS(a) AT 1st JANUARY, 1959.

Country.					Number of Telephones. '000.	Telephones per 100 of Population.	Proportion of Total. (Per cent.)
United States of America(b)	66,645	38	53.4
United Kingdom(c)	7,525	15	6.0
Canada	5,122	30	4.1
Germany, Federal Republic of	5,090	9	4.1
Japan(c)	4,335	5	3.5
France	3,704	8	3.0
U.S.S.R.	3,700	2	3.0
Italy	3,182	6	2.5
Sweden	2,526	34	2.0
Australia	2,000	20	1.6
Other	20,971	(d)	16.8
Total					124,800	(d)	100.0

(a) Partly estimated. Information derived, in the main, from the "Worlds Telephones" compiled by the American Telephone and Telegraph Company. (b) Excludes Alaska and Hawaii. (c) At 31st March, 1959. (d) Not available.

§ 5. Cable and Radio Communication.

1. **General.**—Descriptions of the various cable services between Australia and other countries were given in Official Year Book No. 22, pages 335–6 and earlier issues.

Competition from beam wireless services brought about a merger between cable and wireless interests, which was not, however, completely satisfactory in combining the advantages of both systems. Details of the merger, and of subsequent developments which led eventually to the establishment, in 1946, of the Overseas Telecommunications Commission, were published in Official Year Book No. 37, pages 220–4.

2. Oversea Cable and Radio Traffic.—(i) *States.* The number of telegrams received from and dispatched overseas in each State during 1958–59 is shown hereunder:—

INTERNATIONAL TELEGRAMS, 1958-59.
(‘000.)

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
Received	685	427	77	63	88	(a) 20	1,360
Dispatched	653	465	90	82	76	20	1,386
Total	1,338	892	167	145	164	40	2,746

(a) Estimated.

(ii) *Australia.* (a) *Number of Telegrams.* The following table shows the number of international telegrams received from and dispatched overseas during the years 1954–55 to 1958–59:—

INTERNATIONAL TELEGRAMS: AUSTRALIA.
(‘000.)

Particulars.	1954–55.	1955–56.	1956–57.	1957–58.	1958–59.
Received	1,422	1,441	1,454	1,430	1,360
Dispatched	1,376	1,374	1,367	1,347	1,386
Total	2,798	2,815	2,821	2,777	2,746

(b) *Number of Words.* Particulars of the international business, originating and terminating in Australia, transacted over the cable and radio services, during 1958–59 are shown in the following table:—

INTERNATIONAL TELEGRAMS: NUMBER OF WORDS, AUSTRALIA, 1958-59.
(‘000 Words.)

Class of Telegram.	Words Transmitted to—			Words Received from—		
	United Kingdom.	Other Places.	Total.	United Kingdom.	Other Places.	Total.
Ordinary	4,497	8,148	12,645	3,892	6,690	10,582
Letter	4,749	10,255	15,004	4,474	8,358	12,832
Press	4,676	1,898	6,574	8,463	2,678	11,141
Government	256	965	1,221	1,069	1,375	2,444
Greetings	792	680	1,472	630	795	1,425
Other	11	11	..	61	61
Total	14,970	21,957	36,927	18,528	19,957	38,485

Words transmitted to “Other places” included 3,897,594 to the United States of America and 3,896,306 to New Zealand and the Pacific Islands. Words received from “Other places” included 3,544,026 from the United States of America and 4,780,712 from New Zealand and the Pacific Islands.

3. **Coast Stations.**—At 30th June, 1959, there were 79 radio stations established at points around the Australian coast and 14 about the coast of Papua and New Guinea and other External Territories. During the year ended 31st March, 1959, these stations handled 675,582 messages (570,777 paying, 16,024 free traffic and 88,781 meteorological) with a total of 14,739,530 words.

4. **Radio-communication Stations Authorized.**—(i) *States and Territories, 30th June, 1959.* The following table shows particulars of the different classes of radio-communication stations authorized in Australia and the External Territories at 30th June, 1959. Figures relate to radio-communication (radio telegraph and radio telephone) stations only; particulars of broadcasting stations and of broadcast listeners' licences are shown on pages 572 and 577.

Owing to the use of a new classification, some of the figures in the table below are not comparable with those published in issues of the Official Year Book prior to No. 44.

RADIO-COMMUNICATION STATIONS AUTHORIZED, 30th JUNE, 1959.

B. BROADCASTING AND TELEVISION.

§ 1. Introduction.

1. **General.**—Broadcasting and television services in Australia operate under the Broadcasting and Television Act 1942–1956 and comprise the National Broadcasting Service, the National Television Service, the Commercial Broadcasting Service and the Commercial Television Service. General control of these services is a function of the Australian Broadcasting Control Board (*see* para. 2 below). Details of each service will be found on pages 572–8.

Licence fees for commercial broadcasting and television stations are payable under the Broadcasting and Television Stations Licence Fees Act 1956.

2. **The Australian Broadcasting Control Board.**—The Board, which was constituted on 15th March, 1949, operates under the Ministerial jurisdiction of the Postmaster-General, and its principal functions, as set out in section 16 of the Broadcasting and Television Act 1942–1956, are to ensure:—(a) that services by broadcasting stations and television stations are provided in accordance with plans prepared from time to time by the Board and approved by the Minister; (b) that the technical equipment and operation of such stations are in accordance with such standards and practices as the Board considers to be appropriate; and (c) that adequate and comprehensive programmes are provided by the stations to serve the best interests of the general public.

In addition, the Board may exercise such other functions as are prescribed in relation to broadcasting stations and television stations.

The Board is empowered to make recommendations to the Minister as to the exercise by the Minister of any power under Part IV. of the Act which relates to the Commercial Broadcasting Service.

The Board has power, subject to the direction of the Minister:—(a) to determine the situation and operating power of a broadcasting or television station; (b) to determine the frequencies of broadcasting and television stations within bands of frequencies notified to the Board by the Postmaster-General as being available; (c) to regulate the establishment and operation of networks of commercial broadcasting or television stations and the making of arrangements by licensees for the provision of programmes or the broadcasting or televising of advertisements.

The Board also has power:—(a) to determine the conditions subject to which advertisements may be broadcast or televised by licensees; (b) to determine the hours during which programmes may be broadcast or televised; and (c) to conduct examinations as to the competency of persons to operate the technical equipment of broadcasting and television stations and to charge appropriate fees.

The Board is obliged to hold public inquiries into applications, made to the Minister, for licences for commercial broadcasting and television stations in areas for which the Minister proposes to grant licences and into any other matter within its functions if the Board thinks it necessary or desirable, or the Minister so directs. The Board, in exercising its powers and functions in relation to commercial broadcasting and television stations, is obliged to consult representatives of those stations.

Subject to the approval of the Minister and of the Treasurer, the Board may provide financial and other assistance to commercial broadcasting stations for the purpose of ensuring that programmes of adequate extent, standard and variety are provided in the areas served by these stations.

Section 8 of the Act provides that the Board shall consist of five members (including two part-time members) appointed by the Governor-General, one of whom, other than a part-time member, shall be chairman. No person shall be appointed as a member of the Board who:—(a) has any financial interest whether direct or indirect, in any company which is the licensee of, or an applicant for a licence for, a commercial broadcasting or television station or manufactures or deals in equipment for the transmission or reception of broadcasting or television programmes; (b) is a member of the governing body of any company or other association of persons which is the licensee of, or an applicant for a licence for, a commercial broadcasting or television station; or (c) is the licensee of, or an applicant for a licence for, a commercial broadcasting or television station.

3. The Australian Broadcasting Commission.—The Broadcasting and Television Act 1942–1956, provides that the Australian Broadcasting Commission, which consists of seven members, one of whom shall be a woman, shall control the activities of the National Broadcasting Service and the National Television Service.

Under the provisions of the Act the Commission shall provide, and shall broadcast or televise from transmitting stations made available by the Postmaster-General, adequate and comprehensive programmes and shall take in the interests of the community all such measures as, in the opinion of the Commission, are conducive to the full development of suitable broadcasting and television programmes.

The Commission prepares estimates of its receipts and expenditure for each financial year and submits these estimates to the Minister. Appropriations are made by Parliament for the purposes of the Commission and these, together with all other moneys received by the Commission, are paid into an account in the Commonwealth Bank of Australia. From this account are defrayed all costs, charges, expenses, etc., incurred by the Commission in the exercise of its powers and functions under the Act. For particulars of the financial operations of the Commission see Chapter XXI.—Public Finance.

§ 2. Broadcasting.

1. Broadcasting Stations.—The following table shows the number of broadcasting stations in operation at 30th June, 1959:—

BROADCASTING STATIONS, 30th JUNE, 1959.

Type of Station.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Papua and New Guinea.	Total.
National—										
Medium Frequency ..	16	5	12	8	7	4	2	2	1	57
High Frequency ..	1	3	2	..	2	1	9
Commercial ..	37	20	20	8	14	8	..	1	..	108

2. The National Broadcasting Service.—(i) *General.* In sound broadcasting, the programmes of the National Broadcasting Service are provided by the Australian Broadcasting Commission and the provision and operation of transmitters and technical facilities in the studios are the responsibility of the Postmaster-General's Department.

(ii) *Technical Facilities.* At 30th June, 1959, the National Broadcasting Service comprised 66 transmitting stations, as follows:—

Medium-frequency Stations—

New South Wales—

2BL and 2FC Sydney, 2BA Bega, 2CO Albury, 2CR Orange, 2GL Glen Innes, 2KP Kempsey, 2LG Lithgow, 2ML Murwillumbah, 2NA and 2NC Newcastle, 2NB Broken Hill, 2NR Grafton, 2NU Tamworth, 2TR Taree, 2WN Wollongong

Victoria—

3AR and 3LO Melbourne, 3GI Sale, 3WL Warrnambool, 3WV Horsham.

Queensland—

4QG and 4QR Brisbane, 4AT Atherton, 4GM Gympie, 4QA Mackay, 4QB Maryborough, 4QL Longreach, 4QN Townsville, 4QS Toowoomba, 4QY Cairns, 4RK Rockhampton, 4SO Southport.

South Australia—

5AN and 5CL Adelaide, 5CK Port Pirie, 5LN Port Lincoln, 5MG Mt. Gambier, 5MV Renmark, 5PA Penola, 5WM Woomera.

Western Australia—

6WF and 6WN Perth, 6AL Albany, 6GF Kalgoorlie, 6GN Geraldton, 6NM Northam, 6WA Wagin.

Tasmania—

7ZL and 7ZR Hobart, 7NT Launceston, 7QN Queenstown.

Northern Territory—

5AL Alice Springs, 5DR Darwin.

Australian Capital Territory—

2CN and 2CY Canberra.

Papua—

9PA Port Moresby.

High-frequency Stations—

VLI Sydney, New South Wales, VLG, VLH and VLR Lyndhurst, Victoria, VLM and VLQ Brisbane, Queensland, VLW and VLX Perth, Western Australia, VLT Port Moresby, Papua.

The medium-frequency transmitters operate in the broadcast band 540 to 1,600 kilocycles per second. The high-frequency stations, using frequencies within the band 3 to 30 megacycles per second, provide service to listeners in sparsely populated parts of Australia such as the north-west of Western Australia, the Northern Territory, and northern and central Queensland and in Papua and New Guinea and adjacent islands.

Many of the programmes provided by country stations are relayed from the capital cities, high-quality programme transmission lines being used for the purpose. A number of programme channels are utilized to link national broadcasting stations in the capital cities of Australia and, when necessary, this system is extended to connect both the national and commercial broadcasting stations.

In June, 1959, 44 of the medium-frequency stations were situated outside the six State capital cities. Additional country stations are to be established and, when these additions are complete, the medium-frequency and high-frequency stations together will provide for clear reception of the programmes of the National Broadcasting Service in practically every part of Australia.

(iii) *Programme Facilities.* (a) *General.* The programmes of the Australian Broadcasting Commission cover a wide range of activities, which are indicated briefly in the following paragraphs. The proportion of broadcasting time allocated to the various types of programme during 1958–59 was as follows:—Classical Music, 23.2 per cent.; Light Music, 12.0 per cent.; Variety, 21.2 per cent.; News, 7.1 per cent.; Talks, 7.1 per cent.; Sport, 5.6 per cent.; Drama and Features, 4.1 per cent.; Youth Education, 3.7 per cent.; Religion, 3.3 per cent.; Parliament, 3.3 per cent.; Children's Session, 2.5 per cent.; Rural Broadcasts, 1.7 per cent.; Non-departmental, 5.2 per cent.

(b) *Music.* The A.B.C., in addition to its extensive activities in the field of musical broadcasting, is one of the largest concert-giving organizations in the world. During the years of the Commission's existence, there has been an immense growth of interest in fine music. Today the regular broadcasts command a large listening audience and the number of subscribers to A.B.C. public concerts exceeds 50,000. This vigorous musical life is typified in the activities of the symphony orchestras in Sydney, Melbourne, Brisbane, Adelaide, Perth

and Hobart. These have developed from the studio broadcasting orchestras set up in 1936 in the six capital cities to bodies whose present standard compares favourably with that of orchestras in overseas musical centres of similar size. Until 1946, these orchestras were maintained solely by the A.B.C., but since then they have been subsidized by State Governments and major municipal bodies.

In 1958–59, the A.B.C. organized 576 public orchestral concerts (including 182 free concerts for school children and 35 free concerts for adults) and 192 public recitals by famous artists throughout the Commonwealth. Of these concerts, 270 were given outside the State capitals, including 73 free orchestral concerts for school children.

The policy of the A.B.C. has been to foster the highest standards of musical appreciation and performance, making the utmost use of the best local talent and at the same time giving Australian audiences the opportunity of hearing leading artists from overseas.

(c) *Drama and Features.* Drama programmes are designed to give listeners opportunities, which they might not otherwise have, of hearing the world's great plays as well as adaptations of the best modern stage plays and also those written specially for broadcasting. The main regular drama programmes are broadcast on Sunday afternoons and Sunday and Monday evenings, and special series of longer plays are also given at various times.

In recent years the technique of the feature programme has also been developed. The feature is a form of entertainment which is unique to radio, consisting of specially written programmes designed to present information in an interesting way. It may deal with a very wide variety of subjects ranging from history and current events to science and the arts. A number of Australian writers have become interested in this form of entertainment and about 97 per cent. of the features broadcast are written by Australians. Local writers also contribute a large proportion of the plays broadcast and every effort is made to assist and encourage their work.

(d) *Youth Education.* The A.B.C. provides a regular series of broadcasts to schools as an addition to normal class-room education. The total number of listening schools at the end of June, 1959 was 9,500 or about 93 per cent. of all schools, State and private, throughout the Commonwealth. Many of the school broadcasts are presented in dramatized form, as this method makes the material more vivid and interesting to the young listener. For the very young children, the Commission broadcasts every week-day the "Kindergarten of the Air", a type of broadcast which originated in Australia. (*See also* Chapter XV.—Education, on this subject.)

(e) *Talks.* The aim of the Talks Department is to provide programmes which will keep the listener well informed on current affairs and on general topics. Many of the talks in the first category are now presented in a magazine type of session consisting of a number of short items linked by a narrator. An extension of this type of programme is the documentary, in which radio goes into the field to analyse or to describe, using the actual sounds and voices recorded on location.

Major controversial topics are covered in the "Nation's Forum of the Air" (using the debating technique) and "I Put it to You", in which a well-known speaker presents a contentious theme before an audience chosen because it will generally be critical and afterwards the speaker must stand up to questioning by the audience. Another outstanding session is "News Review", containing comments on the news of the day recorded over landline from all States of the Commonwealth and, in the case of significant world events, from overseas by radio-telephone.

(f) *Rural Broadcasts.* The Rural Broadcasts Department devotes its programmes to weather and market reports and talks, interviews, etc., designed to provide useful information for the man on the land. These programmes are presented on a regional, State and national basis, many being directed to particular districts, because of the diversity of climate and conditions. Separate rural programmes originate at 18 regional stations and are relayed to all other regionals. Other programmes are broadcast throughout each State or on a national relay, depending on whether the information they contain is of general interest or refers only to the rural industries of one State.

Material for rural programmes is obtained from many sources in Australia, including the Departments of Agriculture, numerous government and private organizations and practical farmers. Talks, interviews, etc., are also secured from many overseas sources, thus bringing to rural listeners the latest information on overseas research that is relevant to Australia's primary industries. Programme material is exchanged regularly with British Commonwealth countries and with the U.S.A. and a number of officers from the broadcasting organizations

of South-East Asia have come to Australia, under the Colombo Plan and similar projects, to study A.B.C. rural broadcasting, with the aim of developing services of this type in their own countries.

During 1958–59, 6,674 talks and interviews on rural topics were broadcast by the A.B.C., as well as 9,300 weather reports and 10,466 interstate and local market reports. In times of emergency, the regular weather reports are supplemented by special services giving flood or fire warnings—a very important service because of the speed with which radio can reach a widely scattered audience.

(g) *News.* On 1st June, 1947, the Australian Broadcasting Commission's independent news service came into full operation. Since that date the Commission has collected all its Australian (including Papua and New Guinea) news through its own staff journalists and part-time correspondents. It also maintains a news room in London for the selection and transmission of news obtained from major overseas agencies and has special representatives in South-East Asia. Regional bulletins are broadcast from country centres and also from capital cities to cover near-city districts. Radio Australia (the Overseas Service of the A.B.C.) broadcasts Australian and overseas news daily in English, French, Mandarin, Indonesian and Thai, with special attention to Asia and the Pacific. Each day the A.B.C. re-broadcasts two news bulletins from the British Broadcasting Corporation. The A.B.C. broadcasts 150 news bulletins each day, including those given over Radio Australia.

(h) *Other Activities.* The broadcasting of the proceedings of Federal Parliament commenced as a regular service in July, 1946. At present, these broadcasts are confined to one of the two national transmitters in each capital city, one in Newcastle and to one domestic short-wave station (VLR).

The National Children's Hour, presented seven days a week, is composed of over 40 programme items, including stories, music, games, art, literature, natural history and sport. There is a children's newsreel and a Brains Trust, discussing, through children, topics of wide general interest. The Argonauts' Club is an important part of the session and encourages children between the ages of 7 and 17 in self-expression and the appreciation of cultural subjects, but the provision of entertainment suitable for children is the main purpose of the session.

In co-operation with the various religious denominations, the A.B.C. broadcasts several religious sessions each week-day in addition to those given on Sundays. These religious broadcasts include relays of normal church services and a variety of special programmes of talks and sacred music. The modern trend towards the use of religious drama is also followed.

The variety and sporting programmes of the A.B.C. provide the lighter side of the service. In its variety sessions the A.B.C. does everything possible to assist local artists in order to increase the amount of first-class talent in this country, and encouragement is also given to Australian composers of light music. The A.B.C. dance bands in Sydney and Melbourne are regarded as being two of the most outstanding bands in Australia.

The coverage of sport at home and abroad by the A.B.C. is comprehensive. On Saturday afternoons the sporting panel provides listeners with progress results, scores and descriptions from half a dozen or more fields of sport. Events of international interest such as Test matches, the Davis Cup, etc., are covered by simultaneous descriptions from A.B.C. commentators. In covering events overseas, the A.B.C. is indebted to the B.B.C. for its collaboration in Great Britain, to the New Zealand Broadcasting Service for events in New Zealand and to broadcasting organizations in many other countries.

3. The Commercial Broadcasting Service.—Commercial broadcasting stations are operated under licences granted and renewed by the Postmaster-General after taking into consideration any recommendations which have been made by the Board. The initial period of a licence is five years and renewals are granted for a period of one year. The fee payable for a licence is £25 on the grant of the licence, and thereafter £25 a year plus one per cent. of the gross earnings of the station from the broadcasting of advertisements or other matter during the preceding financial year. Licensees of these stations rely for their income on the broadcasting of advertisements and other publicity.

At 30th June, 1959, there were 108 commercial broadcasting stations in operation. A table showing the call sign, location, frequency and aerial power of each commercial broadcasting station licensed at 30th June, 1959, may be found in *Transport and Communication*, Bulletin No. 50.

4. Overseas Broadcasting Service.—There are three high-frequency stations at Shepparton, Victoria (VLA, VLB, VLC) which provide the overseas service known as "Radio Australia". As in the case of the National Broadcasting Service, these stations are

maintained and operated by the Postmaster-General's Department and their programmes are arranged by the A.B.C. During certain periods, station VLG Lyndhurst is also used for the purpose of overseas transmission. The programmes, which give news and information about Australia, presented objectively, as well as entertainment, are directed mainly to South-East Asia and the Pacific. The overseas audience has grown very substantially in recent years, as evidenced by a large and increasing number of letters from listeners abroad.

§ 3. Television.

1. **General.**—Television services in Australia operate under the Broadcasting and Television Act 1942–1956 and comprise the National Television Service and the Commercial Television Service.

2. **The National Television Service.**—(i) *General.* The A.B.C. provides the programmes for the National Television Service from stations provided and operated by the Postmaster-General. Three stations have been established ABN Sydney, ABV Melbourne and ABQ Brisbane, each of which operates on Channel 2. ABN commenced operation on 5th November, 1956; ABV 18th November, 1956 and ABQ 2nd November, 1959. Each station operates on a frequency of 64.25 megacycles a second for vision and 69.75 megacycles a second for sound. National stations ABS Adelaide, ABW Perth and ABT Hobart are in the course of construction.

(ii) *Programme Facilities.* (a) *General.* The television programmes provided by the A.B.C. cover a wide range of activities. The proportion of television time allocated among the A.B.C.'s various departments to 30th June, 1959 was as follows:—Talks Department, 18.8 per cent.; Drama and Features, 24.6 per cent.; Sport, 12.5 per cent.; Variety, 8.4 per cent.; Children's Session 8.9 per cent.; News, 6.4 per cent.; Classical Music, 1.7 per cent.; Light Music, 0.4 per cent.; Rural Services, 2.2 per cent.; Religion, 2.1 per cent.; Youth Education, 3.4 per cent.; Non-departmental (including trade demonstration films), 10.6 per cent. A summary of the activities of the departments in the field of television is given in the following paragraphs. Transmission hours in Sydney and Melbourne, for the 12 months ended 30th June, 1959, totalled 5,618.

(b) *Talks.* In television, Talks covers a very wide field, ranging from commentaries on international affairs to panel games and outside telecasts of public events. Discussions, topical interviews, magazine programmes, women's programmes, demonstrations and film and studio documentaries are all part of the regular output.

(c) *Drama and Features.* A considerable proportion of television time is devoted to drama and features, and "live" television plays featuring Australian artists may usually be seen fortnightly both in Sydney and Melbourne.

(d) *Music.* During 1957, the A.B.C.'s musical activities extended to the field of television. A number of public concerts and studio performances were successfully telecast and there is reason to believe that the new medium will contribute to the further development of musical appreciation in Australia.

(e) *Rural Services.* The emphasis has been on providing information for consumers and on giving city viewers, by means of films, demonstrations, etc., a picture of Australia's rural industries. Regular programmes featuring many facets of Australian agriculture and livestock activities have already been given, and this work will be developed as further facilities become available. Weather reports and forecasts are also telecast on six evenings a week.

(f) *Youth Education.* The A.B.C. provides a television programme for very young children each week-day, under the title "Kindergarten Playtime". Experimental television programmes for schools are being presented.

(g) *News.* Television news bulletins and newsreels have been included in the programmes presented in both Sydney and Melbourne since the television services began in November, 1956.

(h) *Other Activities.*—Special television programmes are presented for children, including filmed material obtained on an exchange basis from overseas television organizations. Church services have been televised in Sydney, Melbourne and Bathurst and other special religious programmes have been telecast. Outside broadcast cameras have covered a number of sporting events, including the Olympic Games, Davis Cup tennis, Test and Sheffield Shield cricket and swimming championships.

3. **The Commercial Television Service.**—Commercial television stations are operated under licences granted by the Postmaster-General. Licences for commercial television stations have been granted as follows:—Sydney—ATN (Channel 7), TCN (Channel 9); Melbourne—HSV (Channel 7), GTV (Channel 9); Brisbane—BTQ (Channel 7), QTQ (Channel 9); Adelaide—ADS (Channel 7), NWS (Channel 9); Perth—TVW (Channel 7) and Hobart—TVT (Channel 6). The stations commenced operations on the following dates:—ATN, 2nd December, 1956; TCN, 16th September, 1956; HSV, 4th November, 1956; GTV, 19th January, 1957; QTQ, 16th August, 1959; N.W.S., 5th September, 1959; TVW, 17th October, 1959; ADS, 25th October, 1959; BTQ, 1st November, 1959. It is anticipated that station TVT Hobart will commence operations in May, 1960.

The initial grant of a licence is for a period of five years and thereafter the licence is renewable annually. The fee payable is £100 for the first year and thereafter £100 a year plus one per cent. of the station's gross earnings from the televising of advertisements or other matter during the preceding financial year.

4. **Extension of Television Services.**—On 30th April, 1959, the Postmaster-General announced that the Government had decided to proceed with the third stage of development of the television services. Broadly, the areas to be considered in this phase are:—

New South Wales—

Newcastle-Hunter River, Illawarra, Richmond-Tweed Heads, Central Tablelands.

Victoria—

Ballarat, Bendigo, Latrobe Valley, Goulburn Valley.

Queensland—

Darling Downs, Rockhampton, Townsville.

Tasmania—

North Eastern Tasmania.

Australian Capital Territory—

Canberra.

This further extension of Television now planned will mean that 75 per cent. of the Australian people will be able to receive a television service. Consideration of the remaining provincial and rural areas will be given when this phase is well under way. Inquiries by the Australian Broadcasting Control Board into applications for licences for commercial television stations in the abovementioned areas are now proceeding.

The Broadcasting Control Board has prepared a provisional Frequency Assignment Plan which provides for the allocation of channels for four television services in each capital city and two services to reach every town with a population in excess of 5,000.

§ 4. Licences, etc.

1. **Broadcast Listeners' and Television Viewers' Licences.**—(i) *General.* Broadcast listeners' and television viewers' licences are issued at post offices in accordance with the provisions of the Broadcasting and Television Act 1942–1956, which stipulates that, except as prescribed, a person shall not use, maintain or have in his possession a broadcast or television receiver unless there is in force a licence which applies to that receiver. A broadcast listener's licence authorizes the operation of any broadcast receiver, and a television viewer's licence any television receiver, which is:—(a) in the possession of the holder of a licence, or of a member of his family, at the address specified in the licence and/or ordinarily kept at that address; (b) installed in a vehicle which is ordinarily in the possession of the holder, or of a member of his family, and is ordinarily kept at that address while not in use.

The fee for a broadcast listener's licence or a renewal thereof is:—Zone 1, £2 15s.; Zone 2, £1 8s. Zone 1 is the area within approximately 250 miles of specified broadcasting stations and Zone 2 is the remainder of the Commonwealth. A television viewer's licence costs £5.

A licence may be granted at reduced rates to any person who (a) is in receipt of a pension under Part III. or Part IV. of the Social Services Act 1947–1957, or a service pension, or a pension in respect of total and permanent incapacity, under the Repatriation Act 1920–1956, or the Repatriation (Far East Strategic Reserve) Act 1956; and (b) lives alone, with another pensioner, or with any person whose income does not exceed the maximum amount of income and pension allowed under Part III. or Part IV. of the Social Services Act

1947–1957, or section 87 of the Repatriation Act 1920–1956. Licence fees for pensioners are as follows:—broadcast listener's licence—Zone 1, 10s.; Zone 2, 7s.; television viewer's licence, £1 5s.

A licence may be granted free of charge to a blind person over 16 years of age or to a person or authority conducting a school. A tourist resident in Australia for not more than six months and an overseas diplomatic or consular representative or a member of his staff is not required to hold a licence. Inmates of a hospital or charitable institution are covered by the licence held by the institution.

(ii) *Licences in Force.* (a) *Broadcast Listeners'.* The following table shows the number of broadcast listeners' licences in force at five year intervals from 1925 to 1955, and for 1959.

BROADCAST LISTENERS' LICENCES IN FORCE.

At 30th June—	N.S.W.(a)	Vic.	Qld.	S.A.(b)	W.A.	Tas.	Aust.
1925	34,857	20,290	1,267	3,331	3,562	567	63,874
1930	111,253	140,072	23,335	25,729	5,755	6,048	312,192
1935	279,166	237,247	67,546	76,515	41,257	20,121	721,852
1940	458,256	348,264	151,152	124,928	87,790	42,191	1,212,581
1945(c)	548,074	394,315	180,089	146,611	98,210	47,930	1,415,229
1950(c)	683,271	505,078	260,033	195,261	133,199	64,369	1,841,211
1955	746,050	549,690	293,542	223,593	150,199	71,602	2,034,676
1959	827,453	605,340	337,760	247,468	169,272	76,419	2,263,712

(a) Includes the Australian Capital Territory. (b) Includes the Northern Territory. (c) Excludes licences for receivers in excess of one. These licences were introduced in July, 1942, and were abolished on 31st December, 1951.

Of the 2,263,712 broadcast listeners' licences in force at 30th June, 1959, 1,323,473 or 59 per cent. were held by persons living in metropolitan areas and 940,239 or 41 per cent. by persons in country areas. Of the latter, only 13,714 were in respect of Zone 2.

(b) *Television Viewers'.* The following table shows the number of television viewers' licences in force each year at 30th June and 31st December, 1957 to 1959.

TELEVISION VIEWERS' LICENCES IN FORCE.

Date.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	Aust.
30th June, 1957 ..	28,912	44,986	11	73,909
31st December, 1957 ..	74,627	91,922	27	166,576
30th June, 1958 ..	143,422	147,721	43	291,186
31st December, 1958 ..	232,473	222,172	51	454,696
30th June, 1959 ..	300,871	270,073	360	6,124	..	74	577,502
31st December, 1959 ..	358,544	307,950	27,590	34,060	9,621	90	737,855

Of the 577,502 television viewers' licences in force at 30th June, 1959, 516,440 or 89.4 per cent. were held by persons living in metropolitan areas.

2. **Radio-inductive Interference.**—In each State of the Commonwealth, the Postmaster-General's Department maintains a staff of experts with suitable equipment and transport, for the purpose of investigating complaints of radio-inductive interference to the reception of broadcast and television programmes and to defence and civil radio-communication services.

During the year 1958–59, 18,768 sources of trouble, including 5,533 affecting television reception, were eliminated as a result of Departmental efforts or by other action. More than 4,500 suppressors were fitted to offending appliances as recommended by investigating officers, who carried out 637,012 inspections in metropolitan and country areas.

3. **Prosecutions under the Broadcasting and Television Act.**—Persons convicted during the year ended 30th June, 1959, for operating unlicensed broadcast receivers numbered 6,652. Fines and costs amounting to £35,160 were imposed. During the year ended 30th June, 1959, 913 unlicensed television viewers were convicted and fined a total of £6,482, including costs.

CHAPTER XV.

EDUCATION.

§ 1. Introduction.

An account of the development of the Australian school system up to 1929 may be found in Official Year Books Nos. 1, 2, 17 and 22. In Official Year Book No. 40, a reasonably complete review of changes which occurred up to 1951 and of the practices then current was presented from material furnished in the main by the Commonwealth Office of Education.

In the sections which follow, the information relating to the educational programme applies mainly to the year 1959. The statistics given in the tables relate to 1958.

§ 2. Government Schools.

1. **Administration.**—Education is mainly the responsibility of the State Governments but the Commonwealth Government provides financial assistance to students and meets the full cost of education in Commonwealth Territories (*see* Chapter V.)

Although there is a tendency towards regional administration, State educational administration is centralized. The permanent head of the Education Department in each State is responsible to the Minister for Education. Contact with the schools is maintained principally through Inspectors or Superintendents. Departments are usually divided into primary, secondary and technical divisions. Some technical colleges are in a large measure autonomous. Universities are independent foundations although much of their income is derived from State and Commonwealth grants.

Examination Boards, which represent universities, Education Departments and non-government schools, control public examinations and syllabuses, and curriculum committees prepare primary and secondary curricula. State Ministers for Education meet periodically as the Australian Education Council, and Directors of Education meet annually as a standing committee of this Council.

2. **The School System.**—(i) *Compulsory.* In all States, there is legislation for compulsory school attendance. The original Victorian Education Act was passed in 1872, followed by similar Acts in Queensland (1875), South Australia (1875), New South Wales (1880), and Tasmania and Western Australia (1893).

In 1959, the ages between which children were required by law to attend school were as follows:—New South Wales, 6 to 15 years; Victoria, 6 to 14 years; Queensland, 6 to 14 years; South Australia, 6 to 14 years (children may not leave school until the end of the term during which they reach the age of 14 years); Western Australia, 6 to 14 years; and Tasmania, 6 to 16 years. The employment of children of school age is prohibited by law.

In Victoria, South Australia, and Western Australia, amendments to the Acts have provided for the raising of the school leaving age to 15 years, but to date this legislation has not been proclaimed.

Schooling may be given in government schools (including correspondence and special schools), in non-government schools, or by private tuition. Schooling in government schools is ordinarily free. Non-government schools charge fees and usually are not assisted financially by State or Commonwealth Governments.

(ii) *Non-Compulsory.* Modern development has demanded a diversity of skills and a general raising of the educational level of the population. The trend towards raising of the school leaving age and the tendency everywhere for children to stay longer at school have been expressions of public realization of this. In recent years, less than half of all children left school when they reached the age limit for compulsory attendance. Indeed, almost half now proceed to some form of further education beyond secondary school, either as full-time students, as part-time apprentices or trainees released during the day by their employers, or as part-time evening students.

In the early years of government provision of education, the main emphasis was on the primary school, which catered for children receiving compulsory education and offered a

course largely confined to the "tool" subjects, reading, writing and arithmetic. However, a process of extension and differentiation both at the bottom—infants' schools and kindergartens—and at the top—secondary schools—was well under way during the early years of this century.

3. **The Educational Ladder.**—(i) *Infants' Schools.* It is now customary, although not compulsory, for children to begin school when they are five years old. In larger primary schools they enter the infants' school, and in smaller schools infants' classes, which occupy two or three years, the first year in some States being called "Kindergarten" or "Preparatory". The emphasis in the infants' classes is very much on general development, on play activities and on the informal aspects of the educational processes. In some cases, the first two grades of primary education, together with any "Preparatory" or "Kindergarten" classes, are to be found in separate infants' schools or departments, but whether in a separate establishment or as a part of a primary school, there is a gradual move towards formal instruction. At the end of the period, most children are able to read with some fluency, carry out simple arithmetical operations founded on the basic number facts, and can write in pencil. In addition, they have acquired skills with art materials and the like. A good deal of the instruction is carried on through activity methods, involving, for example, dramatic work, puppetry, and school "shops". Children then pass at about the age of 8 or 9 to the more formal primary school, in which they normally spend four or five years.

(ii) *Primary Schools.* The main emphasis in the primary school as distinct from the infants' school still lies on the "tool" subjects (reading, writing and arithmetic) and, in more recent years, on oral language, but the methods of teaching have undergone considerable changes. Changes in the purpose and outlook of educationists, and the raising of the professional standards of teachers, have made for greater freedom for pupils and teachers, some departure from the methods of mass instruction, and the closer linking of the curriculum with the child's social environment.

In general, there is now less emphasis on results than formerly, and basic skills are taught at a somewhat later stage. At the same time, the curriculum has been broadened. More individual instruction has led to a reduction in minimum standards of achievement for the less able and a stress on curriculum enrichment for the bright. Retardation, i.e., the repeating of grades, has been considerably reduced, the aim being for each child to remain with his age group. In all States, opportunity classes exist for backward children, and in one State opportunity classes are provided for the especially bright.

(iii) *Secondary Schools.* At the age of 12 or 13 (in Queensland, 14), children transfer to a secondary school course. In the cities and larger country centres, this is provided in a separate school, but in less densely populated areas secondary classes share the same buildings as primary classes. In rural areas, secondary pupils may share teachers or classrooms with primary pupils, and in one-teacher schools a few secondary students may carry out correspondence assignments under the supervision of the primary teacher-in-charge.

Secondary curricula have developed from the matriculation requirements of the universities. Formerly English grammar and literature, and mathematics, including algebra, geometry and trigonometry, were the core. Languages, chiefly Latin and French, or science, chiefly physics and chemistry, and history had an important place. Geography and drawing were often taken in the first two or three years.

As a result of changes in the academic course for matriculation, greater emphasis has been placed on oral and written expression in the English course and on language generally (English or foreign languages); in two universities, new matriculation regulations require a pass in either mathematics or a foreign language (not necessarily Latin which, in recent years, has been less popular than previously). A general science course has been introduced in some States, and social studies, a synthesis of history, geography and civics, is a subject to matriculation level in two States. More emphasis has been placed on art, music and physical education.

In recent years, the provision of a secondary education for all has gained ground rapidly, although the entrance requirements of tertiary institutions are still provided for. Consequently, alongside the academic course, other courses have grown up. In country areas, they may be offered in the same school or the academic course may even be largely abandoned. In the city, it is usual to offer non-academic courses in separate schools, although there is a trend towards comprehensive high schools offering several types of courses and catering for all the pupils from the district. Schools providing academic courses are usually known as High Schools, while the other types are generally distinguished by such names as Junior Technical Schools and Home Science Schools.

Particular mention should be made of the recent development of the all-stage consolidated school sometimes with an agricultural bias, found under various names in different States. Tasmania and South Australia adapted the idea of the English village area schools Australian conditions and established "Area Schools", some of which have farms hed.

The courses followed in the non-academic schools are, in general, broader than in the academic schools. There is less concentration on establishing an academic discipline and method peculiar to each subject, but more attention to correlation between fields of knowledge, sometimes expressed by projects involving them all. Generally, less time is devoted to mathematics and the formal sciences, and more time to practical work and to art and musical appreciation. In English, oral language is emphasized rather more and grammar much less than in the academic schools.

(iv) *State Details.* Very brief particulars of the position in each of the States are given on pages 432-3 of Official Year Book No. 40.

4. *Examinations and Accrediting.*—(i) *Examinations.* The various public examinations which were formerly held at different stages of education were described in previous Year Books, in particular in No. 40 (1954). There are no public examinations in primary school, but each school normally holds internal examinations yearly or half-yearly. In most States, there is no public examination barrier at the end of primary school, and pupils proceed to high schools of various types. The trend is towards greater use of internal examinations, and headmasters' recommendations. In Queensland, a Scholarship Examination is held at the end of primary school, and pupils passing this examination qualify for free secondary education; this makes secondary education free for the great majority of children in Queensland. In all other States, secondary education is quite free. The length of the secondary schooling now varies from four years in Queensland to six years in Victoria.

There are two important examinations in secondary school—one about half-way through the course, and one at the end. The first examination is usually called the Intermediate or Junior and pupils sit for this after 2, 3 or 4 years of secondary study at the age of 15 or 16. Many pupils leave school at this stage and enter technical and agricultural colleges, or undertake commerce, insurance, banking certificate, or nursing and secretarial courses. The remaining pupils after one or two years further study, sit for the Leaving or Matriculation examination and qualify for entry to universities, teachers' colleges, technical college diploma courses or the clerical division of the public service. There are, of course, many variations from State to State, and details of these are given below. Most of the examinations are public ones, set and marked by an external authority and conducted on a Statewide scale, but some examinations are done internally, or a compromise between these two forms may be arranged to meet special circumstances.

(ii) *State Details. New South Wales.* The Intermediate Certificate Examination is taken after three years, either internally or externally, at an average age of 15, and the Leaving Certificate Examination (Matriculation), is taken after five years, at an average age of 17. However, it is planned to alter this in the near future to a six-year system, with a School Certificate after four years and a Higher School Certificate after six years.

Victoria. The Proficiency Certificate is taken internally after three years at school, at an average age of 14½; the Intermediate is taken at the end of the fourth year, the School Leaving at the end of the fifth year, and the Matriculation at the end of the sixth year. Pupils at approved schools may be accredited for the Intermediate and Leaving—i.e., the Certificate is awarded by the Education Department on the recommendation of the school principal under certain conditions.

Queensland. The Junior Public Examination is taken at the end of second year; pupils are then aged about 16. The Senior Public Examination (Matriculation) is held at the end of fourth year.

South Australia. The Intermediate Examination is taken at the end of third year, at an average age of 15½; the Leaving Certificate (Matriculation) at the end of fourth year; and the Leaving Honours at the end of fifth year.

Western Australia. The Junior Certificate Examination is taken at the end of third year by pupils aged about 15½; the Leaving (Matriculation) is taken at the end of fifth year. Certain schools are approved for accrediting in a few subjects at the Junior Certificate Examination.

Tasmania. The Modern School Certificate (an internal examination) is taken at the end of third year, when pupils are aged about 15; the Schools Board Certificate is taken at the end of fourth year, and the Matriculation at the end of fifth year. Certain schools are approved for accrediting for the Schools Board Certificate.

5. Health Services to Schools.—Information relating to school medical and dental services is given in Chapter XVII.—Public Health.

6. Guidance.—Each Australian State now has a comprehensive system of educational guidance administered by trained and experienced educational psychologists and backed by a system of school record cards. In general, the functions of these services are:—selection and differentiation for secondary education, diagnosis and guidance of atypical children, preliminary vocational guidance and, in some States, research. The weight given to each of these functions varies considerably from State to State, but the aim is to provide thorough educational guidance for all children.

Throughout Australia, branches of the Commonwealth Employment Service co-operate with State Education Departments by giving post-school vocational guidance, using the data obtained and made available by the Education Departments during the school career of the children. In New South Wales, a similar service is also provided by the Youth Welfare Section of the Department of Labour and Industry.

7. Research.—(i) *State Education Departments* All State Education Departments have set up research branches which function as integral parts of head offices. In several States, the officer who directs research is also responsible for the guidance service offered by his department. The research undertaken is directed towards departmental activities and the findings are examined carefully in the determination of policy and procedures; in addition, many problems of immediate importance are handled. In the majority of States, too, the Research Branch supervises the collation of statistics and also plays an important part in curriculum revision and modification of examinations.

(ii) *Australian Council for Educational Research.* The Australian Council for Educational Research, a non-governmental body, is also engaged on educational research in a wide variety of fields, ranging from tertiary to pre-school education. It conducts surveys and inquiries, makes grants to approved educational investigators, serves as a centre for disseminating educational information, provides training for research workers, and standardizes and distributes educational and psychological tests for use in Australia. Although this council is an autonomous body, the Commonwealth and State Governments contribute some financial support to it.

8. Atypical Children.—Pupils who, for one reason or another, cannot progress to their best advantage in an ordinary school are catered for by special schools or classes. Among groups given special attention are the mentally backward, the gifted, the physically handicapped, the blind, deaf and dumb, the epileptic, the cerebral palsied, the partially sighted, the hard-of-hearing and the delinquent. The provision of special schools and classes has involved the appointment of departmental specialists, special training courses and close liaison with school health services. In some States, special clinics attached to hospitals, or functioning as an independent child-welfare service, handle cases of personality maladjustment and work in co-operation with the psychological services of the Education Departments.

9. Education of Native Children in Australia.—The Commonwealth Government is responsible for the education of full-blood native children in the Northern Territory. Each State has responsibility for the welfare and education of native children within its boundaries.

Native children are admitted to government schools in all States except in areas where separate facilities are provided. In those States where natives are more numerous, special schools are located at or near aboriginal reserves, settlements and stations. The schools are for the most part staffed by teachers from the Education Departments, and the curriculum is similar to that in ordinary government schools with a bias towards handicrafts. Numbers of native children also attend the mission schools conducted in several States by the various religious denominations. The standard of education in these schools is similar generally to that in the government schools.

10. *Provision for Rural Areas.*—(i) *General.* The population of Australia is so scattered that there is a problem in providing primary, and more especially secondary, education for all children. One method of meeting this problem has been the establishment of a wide network of one-teacher primary schools, staffed in the main with trained teachers. The practice of sending itinerant teachers to assist correspondence students in outlying areas has been introduced in the far north of Western Australia.

(ii) *Subsidized Schools.* Where a group of children is too small to warrant the establishment of a one-teacher school, a "subsidized school" may be opened. The Education Department pays part of the cost, and in some States appoints a teacher. Some States also administer "provisional schools", which are completely financed by the Government but which are not large enough, or sufficiently assured of adequate continued attendance of pupils, to warrant classification as permanent schools.

(iii) *Consolidated Schools.* In some States, in districts where a number of small centres are scattered around a larger centre or country town, recent policy has been to close the one-teacher schools and transport pupils each day by bus to a "consolidated" school in the larger centre. Consolidated schools provide primary instruction and from two to four years of post-primary instruction. The post-primary curriculum adopted usually has a bias towards practical activities and training in subjects bearing on the primary industries of the locality.

(iv) *Special Assistance.* Another way of bringing children to the school has been the provision of financial assistance for children who have to live away from home in order to attend school. Most of these board in private homes but in the several States there are a few government hostels and over 60 private hostels (excluding private boarding schools), many of which are government-subsidized. Together, these cater for almost 2,000 children of secondary school age and a small number of primary school children also. In all States, some provision is made for financial assistance towards the living and travelling expenses of children who are obliged to live away from home in order to attend school.

(v) *Correspondence.* For children who are still unable to attend school, systems of correspondence tuition have been established in every State. The Education Departments provide tuition through primary and secondary school levels and up to matriculation standard if required. In addition, the Technical Correspondence Schools conducted by the senior technical college of each State arrange for correspondence tuition at secondary level up to matriculation standard for students over the school leaving age. Further reference to the work of the Technical Correspondence Schools is made in § 5 of this chapter, which deals with technical education (see p. 596).

11. *School Broadcasting in Australia.*—Over the years, an extensive school broadcasting system has been developed in Australia by the co-operative efforts of the Australian Broadcasting Commission and education authorities. The Youth Education Department of the A.B.C. is responsible for the broadcasting of the programmes, but it draws freely on the advice and services of teachers and maintains permanent liaison officers with the Education Departments. More than two-thirds of Australian schools are equipped with radio receivers.

School broadcasts are presented as part of the regular A.B.C. programmes without separate stations or wave lengths. Special efforts are made, however, to relate the broadcast to school work by the extensive distribution of booklets giving details of programmes in advance and subject notes accompanied by picture sheets, work books, and teachers' notes.

Broadcasting has proved to be a most effective way of reaching the outback children of Australia, and radio lessons have been designed to supplement correspondence lessons. The success of the first School of the Air, which has been in operation at Alice Springs in the Northern Territory since 1950 and serves correspondence pupils of the South Australian Education Department, has led to the opening of similar schools based at Ceduna and Port Augusta in South Australia, and at Broken Hill in the far west of New South Wales. In all, these schools serve a total of well over half a million square miles. By means of special two-way radio equipment, children hundreds of miles apart can participate in the same lesson and teachers and pupils can talk directly with each other.

The "Kindergarten of the Air" is described in § 4 of this chapter, which deals with pre-school education (see p. 595).

12. Teacher Training and Recruitment.—(i) *General.* The training of government school teachers is carried out by the State Education Departments, but in most States persons who wish to train for teaching in private schools may attend government training colleges on payment of a fee. Many non-government school teachers have been drawn from the government teaching services and others have been recruited at the university graduate level. Private training institutions also provide some teachers.

An account of the early growth of teacher training systems is to be found in Official Year Book No. 22 and subsequent developments were reviewed extensively in Official Year Book No. 40. The pupil-teacher system has been abandoned as the chief method of training teachers and teacher students are now recruited at matriculation level and given a professional course of training at colleges controlled by Education Departments or by university departments of education. The raising of standards and lengthening of training have led to a close association between the Education Departments and universities. The trend has been towards placing teacher training on the same basis as other professional training.

There is at present a shortage of teachers in Australia. Measures taken to overcome this shortage include substantial increases in teachers' salaries and liberalization of promotion systems, publicity drives to attract recruits and increases in living allowances to departmental teachers' college students. In some States, special arrangements are in force for intensive shorter training courses, in order to meet the immediate need. In others, recruitment of teachers overseas is undertaken to reduce the shortage.

(ii) *Training Colleges.* Every State maintains at least one teachers' training college. Most students are trained at colleges in the capital cities, although there has been a movement towards the establishment of colleges in the country. At the end of 1959, there were in Australia 25 teachers' colleges conducted by Education Departments and professional training for graduate teachers was provided by seven universities.

(iii) *Training of Primary Teachers.* In most States, teachers for government primary schools are trained in co-educational teachers' training colleges controlled and administered by the State Education Departments. Departmental trainees are given a monetary allowance while in training and are required to enter into a bond to serve for a specified period on completion of training or to repay all or portion of the cost of training.

The entrance standard is generally at the Leaving Certificate level at about the age of seventeen. In some States, intending teachers can obtain a scholarship at the Intermediate Certificate level to enable them to complete teachers' college entrance requirements. In return, they are required to enter into a bond of service additional to that normally required of departmental teachers' college trainees.

In general, the duration of courses is two years for primary teachers, including infants' teachers. The basic subjects taken in the various courses are principles, history and general methods of teaching, special methods of teaching primary school subjects and educational psychology. In addition, students undertake courses in physical education, art, music, school hygiene and handicrafts as well as lectures designed to widen their own cultural background.

In South Australia, primary teacher trainees attend certain university courses, including education, as part of their training. In Tasmania, while the majority of departmental teacher trainees receive their training at the university, there is also a government teachers' college providing courses in infant, primary and home arts teaching.

In some States, separate courses are provided for teachers in infants' schools and in small one-teacher schools. In Victoria, an extension course of one year following the primary course is designed to train teachers of home-crafts for primary schools.

(iv) *Training of Secondary Teachers.* Prospective secondary teachers are required to undertake a degree course followed by a one-year post-graduate course leading to a university degree or diploma in education, or a two or three year course at a teachers' college. Both these periods of training include lectures on subjects associated with educational theory and practice, study of methods and techniques appropriate to secondary school subjects, periods of practice teaching and the observation of classroom techniques in the teaching of special subjects.

(v) *Training of Specialist Teachers.* Teachers of specialist subjects such as music, art, manual arts, domestic science and commercial subjects receive from two to five years' training varying according to the institution concerned and the type of secondary school in which the teacher is to teach. In several States, the shorter courses are provided wholly

by the teachers' colleges. Where the specialist course is given at an institution other than the teachers' college—for example, at a university, technical college or conservatorium of music—as is usual for teachers of specialist subjects in high schools, trainees are required to attend teachers' college or university lectures in education and in some cases the specialist course is followed by a year of professional training.

There are conservatoria of music in four States. In New South Wales and Queensland, the conservatorium is a State institution under the Minister for Education; in Victoria and South Australia, it is attached to the university.

Courses designed to train physical education teachers are offered in five States, in one at a teachers' college and in the others by the universities.

Training for teachers of agricultural subjects in secondary schools is available in five States and consists of either an agricultural college diploma or a university degree course together with professional training. In Victoria, the two-year agricultural college diploma course follows the normal two-year primary teachers' course. In New South Wales, in addition to the three-year university agricultural course followed by one year's professional training, there is a two-year teachers' college agricultural course.

(vi) *Training of Technical Teachers.* Teachers of general subjects in technical schools and colleges usually receive their training either as primary or as secondary teachers and, after some experience in either or both fields, are transferred to a technical institution.

Teachers of specialist subjects in technical schools are usually recruited from the ranks of qualified tradesmen engaged in either industry or commerce. Upon appointment, teachers of technical subjects usually receive instruction in classroom teaching techniques and procedures. A separate Technical Teachers' College has been established in Victoria.

(vii) *In-service Training.* As almost all teachers now enter the profession by way of teachers' colleges, where they receive basic professional training, in-service training in Australia is directed chiefly towards keeping teachers abreast of developments and adding to their basic training.

Such training usually takes the form of short courses held sometimes during vacations, sometimes during school-time or in the evenings. Courses consist of discussions and lectures given by senior staff members of Education Departments and university and teachers' college lecturers, on such subjects as classroom techniques and supervision, librarianship, visual aids, music, arts and crafts and physical education. In some States, there are also in-service courses for special groups of teachers, such as headmasters or teachers of one-teacher schools. In addition, district inspectors are responsible for organizing short conferences of teachers where professional topics are discussed.

Education Departments encourage teachers to pursue university courses, and in some States pay the cost of courses undertaken by selected teachers.

The official publications of the Education Departments contain articles dealing with educational theory and practice. In most States, the magazines of the teachers' organizations, which reach the majority of government teachers, also contain articles of this type.

(viii) *State Details.* The details of teacher training in the States are given on pages 442–3 of Official Year Book No. 40.

(ix) *Sex and Status of Teachers.* Although about half of the teachers in State schools in Australia are men, the ratio varies from State to State. In the infants' schools and generally in girls' departments, women teachers only are employed. Men, however, predominate in the senior positions, both because of their greater preponderance amongst those with long service and because the higher promotion positions are generally reserved for men, except in infants' schools and girls' schools.

13. *School Buildings and Grounds.*—In 1930, school building programmes were seriously cut because of the financial difficulties of the depression. The 1939–45 War intervened before school building could be resumed on a large scale. After the war, the building of schools was given a high priority, but the rapid post-war increases in school population have imposed a severe strain on available school accommodation and such emergency measures as the use of halls, cloakrooms and weather-sheds for class instruction have been adopted in some areas.

The post-war buildings fall into two groups, portable and permanent. In primary schools in particular, some Education Departments favour the use of both kinds of classroom in conjunction, thus enabling them to cope with the changing age-composition of particular areas. Prefabricated buildings and classrooms have been imported or locally produced in increasing quantities and include timber-frame units aluminium and steel units, and single and multiple pre-cast concrete units. Such prefabricated buildings are used, not only in extending the facilities of existing schools and to provide multi-purpose units such as assembly hall gymnasiums, but also for erecting entire schools. Expenditure on school building has increased greatly in all States over recent years.

14. Equipment.—(i) *Text Books and Materials.* The State Education Departments supply government schools with essential equipment free of charge, including scientific apparatus and equipment, maps, blackboards, chalk and cleaning materials, and non-consumable equipment for commercial, home science and manual training. Garden tools and physical training equipment are supplied free in most States.

Primers and writing equipment for individual pupils are usually supplied free in primary schools and each Department except one produces in addition monthly school magazines which are supplied free or at a small cost. Textbooks, however, are supplied to primary pupils free of charge in one State only. In other primary schools and in all secondary schools, textbooks must be purchased by students, although in several States schools own stocks of textbooks which are hired to students and in one State secondary textbooks are sold at reduced rates.

Other equipment is supplied free by the Departments on a limited basis only. Equipment such as radios, film and filmstrip projectors, pianos, duplicators and library books are ordinarily purchased for individual schools by the parent and citizen organizations associated with them, with the assistance of subsidies from the Departments.

(ii) *Furniture.* There has been considerable development in this field. Originally most schools were equipped with long desks and benches, seating six to eight pupils, but these were later replaced by the standard dual desk with tip-up seat, and in infant classes by individual chairs and small tables. After the war, considerable research was undertaken on posture and the physical measurement of children. The dual desk is now being replaced in some States by the individual table and chair, provided in a range of sizes suitable to each class. In some States, tubular steel furniture is used. The new type of furniture is more suitable for flexible arrangements of the class in line with modern educational practice.

(iii) *Visual Aids.* In the past 20 years, there has been a remarkable growth in the use of visual aids in education. After some resourceful pioneering work had been done by individuals, the Departments of Education, between 1936 and 1939, appointed special committees and teacher demonstrators to guide the development of the new educational medium. Production units to produce film strips suitable for use in schools were set up in five States and an Australian-produced film-strip projector was manufactured. After the war, the emphasis moved from the strip projector to the 16 mm. sound machine and the Australian National Film Board, set up by the Commonwealth Government to promote the use of educational films, became the main producer of these films. Film companies are also designing films primarily for class-room use and several manufacturers have produced 16 mm. sound projectors. Education Departments have their own film libraries to distribute films to schools and, in addition, borrow from the Commonwealth National Library, which is the main distributing centre for non-technical films in Australia.

15. Parent and Citizen Organizations.—In Australia, where all government schools are administered by central departments, there is little opportunity for local administration of education. Public interest is expressed through parents' committees or organizations of parents and other citizens interested in supporting their local school. The Education Acts of all States provide for the formation of groups of this type, whose aims are to promote the interest of the school by bringing parents, pupils and teaching staff together, to help provide teaching aids and recreation materials not supplied by the departments, to assist in the regular attendance of children at school and to help find accommodation for teachers.

In several States, the general maintenance of school buildings, equipment and grounds is a statutory responsibility of the parent groups, costs being covered by government grants. Lunch canteen services at local schools, where Oslo lunches may be purchased, are maintained by groups in some States.

A notable achievement of the parent groups has been the establishment of school children's insurance schemes, operated through State government insurance offices or private insurance companies. These schemes cover accidents to children which occur between the time of leaving home for school and returning home by the usual direct route.

State-wide councils of federations of parents' groups are associated in a federal body, the Australian Council of School Organizations.

16. School Banking.—Particulars of School Savings Banks are included in Chapter XX.—Private Finance.

17. Statistics of Government Schools.—(i) *General.* The government schools shown in the following tables include primary, secondary, junior technical, correspondence and subsidized schools, but exclude senior technical colleges, evening schools and continuation classes.

Particulars relating to senior technical colleges are given in § 5, page 596.

Enrolments may be measured in a number of ways:—

Gross Enrolment means the number of names entered on the school rolls during the course of a year. Some children are thus counted more than once if they transfer from school to school during the year.

Net Enrolment means the gross enrolment less transfers from school to school. This is sometimes referred to as "the number of children instructed" at any time during the year. Children transferring between government and non-government schools are still counted in both places. Net enrolment is less than gross enrolment, but greater than the number of children enrolled at one time.

Average Weekly Enrolment may mean either (1) the average of the highest enrolment in each week; or (2) the average of the average enrolments for all weeks in the year. These figures do not differ appreciably, but some States use one and some the other.

Average Weekly Enrolment, by either method, may include a few children counted twice. It may be less than net enrolment and less than the greatest number of children enrolled at one time.

Census Enrolment means the number of children enrolled on a chosen day, usually 1st August. The figures thus determined usually approximate to the average weekly enrolment. If the census is at the end of the year, the figure may be higher than average weekly enrolment for primary schools and lower for secondary schools.

Average Daily Attendance which means the average number of children present for each whole school-day. In some States, half-day absences are taken into account in computing "average daily attendance" thus lowering the figure which would be obtained if presence for half a day were counted as presence for a whole day.

(ii) *Statistical Summary.* The following table shows for 1958 the number of government schools, together with the number of teachers employed and teachers in training:—

GOVERNMENT SCHOOLS(a), 1958.

State or Territory.	Schools Open.	Teachers Employed (excluding Teachers in Training).	Teachers in Training.
New South Wales(b)	2,660	(c) 18,300	(c) 4,070
Victoria	2,096	13,729	3,780
Queensland	1,558	7,942	3,165
South Australia	647	5,504	1,022
Western Australia	503	3,663	1,044
Tasmania	283	2,535	546
Northern Territory	13	124	..
Australia	7,760	51,797	13,627

(a) Excludes Senior Technical Colleges. (b) Includes Australian Capital Territory. (c) At 30th June, 1958.

(iii) *Average Enrolment and Attendance.* The average enrolment and attendance in each State and the Northern Territory during 1958 are shown below:—

GOVERNMENT SCHOOLS(a): AVERAGE ENROLMENT AND ATTENDANCE, 1958.

State or Territory.	Average Weekly Enrolment.	Average Daily Attendance.	Percentage of Attendance to Enrolment.
New South Wales(b)	554,223	502,643	90.69
Victoria	388,946	349,521	89.86
Queensland	(c) 224,237	199,633	89.03
South Australia	(d) 150,056	137,706	91.77
Western Australia	111,186	104,166	93.69
Tasmania	60,921	56,121	92.12
Northern Territory	(d) 2,786	2,491	89.41
Australia	1,492,355	1,352,281	90.61

(a) Excludes Senior Technical Colleges.
enrolment at 1st August.

(b) Includes Australian Capital Territory.
(d) Average daily enrolment.

(c) Census

The average attendance at government schools in Australia is shown in the following table for the year 1891 and at varying intervals to 1958:—

GOVERNMENT SCHOOLS(a): AVERAGE ATTENDANCE, AUSTRALIA.

Year.	Total Population. (b)	Average Daily Attendance.	Year.	Total Population. (b)	Average Daily Attendance.
	'000.	No.		'000.	No.
1891	3,421	350,773	1952	8,740	974,934
1901	3,825	450,246	1953	8,903	1,037,621
1911	4,574	463,799	1954	9,090	1,089,484
1921	5,511	666,498	1955	9,313	1,153,628
1931	6,553	817,262	1956	9,533	1,219,081
1941	7,144	732,116	1957	9,747	1,272,153
1951	8,528	899,514	1958	9,952	1,352,281

(a) Excludes Senior Technical Colleges.

(b) At 31st December.

(iv) *Schools in the Australian Capital Territory.* During 1958, 15 government schools were in operation in the Australian Capital Territory. Enrolment at the end of the school year numbered 6,638 and average daily attendance was 5,960. By arrangement with the Commonwealth Government, these schools are conducted by the New South Wales Education Department with provision for primary and secondary education, the Department being recouped for expenditure. The cost of the teaching staff in 1957-58 was £292,789, while the cost of general maintenance amounted to £146,100. The figures quoted exclude enrolment, etc., at the Canberra Technical College and the Evening Continuation School. For further particulars of educational facilities in the Australian Capital Territory, see Chapter V.—The Territories of Australia, Australian Capital Territory, page 121.

(v) *Expenditure.* (a) *Maintenance—All Schools (except Senior Technical Colleges).* The net expenditure on maintenance in all grades of schools, except senior technical colleges and, in Victoria, junior technical schools, and the cost per head of average attendance for each of the years 1954 to 1958 are shown in the following table. The figures do not include expenditure on buildings, which is shown in a subsequent table. In all expenditure tables, the figures for Victoria, Queensland, Western Australia and the Northern Territory relate to the financial year ended six months earlier than the calendar year.

GOVERNMENT SCHOOLS(a) NET EXPENDITURE ON MAINTENANCE.

Year.	N.S.W. (b)	Vic. (c)(d)	Q'land. (d)	S. Aust.	W. Aust. (d)	Tas.	N.T. (d)	A.C.T.	Aust.

(a) Excludes Senior Technical Colleges.

(b) Gross figures, receipts not being available.

(c) Excludes Junior Technical Schools.

(d) Twelve months ended 30th June of year shown.

(e) Estimated.

(f) Not available.

(b) *Maintenance—Secondary Schools.* The figures shown in the preceding table refer to expenditure on the maintenance of all government primary and secondary schools, excluding senior technical colleges. It has been the practice of the State Education Department to give separate information in regard to the cost of secondary education. The fact, however, that both elementary and higher education are in some instances given in the same school and by the same teacher makes difficult any satisfactory allocation of expenditure between primary and secondary education. Furthermore, the term "secondary" has not the same meaning in all States. Similar difficulties arise in connexion with the apportionment amongst the various branches of expenditure on administration, inspection and the training of teachers. The figures quoted hereunder in respect of cost have been extracted mainly from the reports of the State Education Departments, and are subject to the foregoing qualifications. There are no secondary schools in the Northern Territory, although some primary schools have secondary tops. Consequently no figures are given in the following table for the Northern Territory.

GOVERNMENT SECONDARY SCHOOLS(a): EXPENDITURE ON MAINTENANCE.

State.	1956.		1957.		1958.	
	Cost.	Cost per Head of Population.	Cost.	Cost per Head of Population.	Cost.	Cost per Head of Population.
	£	£ s. d.	£	£ s. d.	£	£ s. d.
New South Wales(b)	7,217,534	2 0 2	8,023,854	2 3 11	9,116,529	2 8 10
Victoria..	4,763,622	1 16 7	5,557,264	2 1 7	5,868,973	2 2 10
Queensland ..	1,027,837	0 15 1	1,154,012	0 16 7	1,350,465	0 19 1

(a) Excludes Senior Technical Colleges. (b) Gross expenditure, receipts not being available.
(c) Figures relate to 12 months ended 31st December of year shown. (d) Figures relate to 12 months ended 30th June of year shown. (e) Excludes Junior Technical Schools. (f) Excludes expenditure on buildings. (g) Not available.

The figures in the preceding tables refer to all grades of government schools with the exception of senior technical colleges, and in Victoria, junior technical schools.

§ 3. Non-Government Schools.

1. *Public Authority and the Non-Government Schools.*—In all States, education is compulsory for all children between certain ages. It must be received in a government school, unless the child is under “regular and efficient” instruction elsewhere. This may be at home, or in a non-government school. The provision for control over the regularity and efficiency of instruction in the non-government schools varies considerably from State to State. In New South Wales and Western Australia, provision is made for an initial inspection when a new school starts, and for inspections thereafter as the Minister requires, to ensure efficiency. In Victoria and Tasmania, registers are kept of teachers and schools, and both teachers and schools must satisfy the administering authority that they are efficient before registration is granted. Without such registration, neither a teacher nor a school can operate. Provision is made, too, for inspections at any time by the registering authority.

In Queensland, eight grammar schools, which exist by statutory authority and are subsidized by the State, are subject to annual inspection. These are the only non-government schools in Australia for which an annual inspection is prescribed by statute. Other non-government schools in Queensland may be inspected at their own request, but it is possible for these schools—and also those in South Australia—to exist without inspection.

Public authority over schools or institutions having scholars above the compulsory ages is generally less direct. It is effected directly by the registration procedures in Victoria

and Tasmania, and in all States there is a measure of indirect control through provisions governing the award of State scholarships, bursaries or other forms of financial assistance to secondary scholars, which are available only in government or approved non-government schools. In New South Wales, also, the Intermediate and Leaving Certificates are awarded only to pupils of schools whose courses of study are approved by the Department of Education.

In all States, non-government schools are required, under the authority of either the Education Acts or Statistics Acts, to furnish certain statistical returns. The form of these returns may be prescribed in the Acts or may be subject to alteration with the Minister's consent.

2. Non-Government Schools Finance.—Most Roman Catholic parochial schools do not charge fees, but families make a contribution if they can afford to do so. With this exception, pupils of non-government schools must ordinarily pay fees. At the majority of non-government secondary schools, privately endowed scholarships are available in varying numbers and reductions in fees are normally made for children of clergy or for two or more members of one family attending the same school.

Certain State scholarships and bursaries are, as noted above, tenable at approved non-government secondary schools. Since the establishment of educational systems by the State Governments, official policy has been largely against the provision of direct financial assistance to non-government schools. Eight undenominational grammar schools in Queensland, however, receive a State subsidy under the Grammar Schools Acts 1860–1900. In 1957, the Tasmanian State Government brought down legislation, which was subsequently rejected by the Legislative Council, for the provision of capital grants to non-government schools, and in 1956, the Commonwealth Government arranged to contribute to the interest payments on loans raised by churches in order to build denominational secondary schools in the Australian Capital Territory.

3. Numbers of Non-Government Schools, Teachers and Enrolments.—The numbers of non-government schools, teachers and enrolments for 1958 are shown in the following table:—

NON-GOVERNMENT SCHOOLS, 1958.

Denomination.	N.S.W. (a)	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	Aust.

1941	256,580	224,355	1958	473,186	(b)446,620

(a) See Note (c) to previous table.

(b) Partly estimated.

5. **The Organization of Roman Catholic Education.**—There is, in each State capital, an official who acts under the Archbishop as a Director of Catholic Education for the area. Each diocese within the area is, however, autonomous and manages its own educational affairs subject to the local episcopal authority. The State Director has, in addition to possible inspectorial functions within his own diocese, the duty of co-ordination of educational matters within his area, and of liaison with other educational authorities, particularly the State Education Department.

The system includes kindergartens, sub-primary, primary, academic secondary, home science, commercial, agricultural and technical schools, juniorates and seminaries, schools for the mentally and physically handicapped, orphanages and a variety of special schools of a charitable nature for under-privileged or socially handicapped children.

With the exception of a small number of permanent lay teachers and a number of visiting teachers, usually specialists in such matters as physical education, sport, and speech, teaching is done by members of religious orders.

6. **The Organization of Other Non-Government Education.**—(i) *General.* Practically all non-government schools, except a limited number under private ownership, are governed by a controlling body known variously as a School Council or Board of Trustees or Governors.

Within each State, although the other non-government schools may be organized into loose forms of association for purposes such as sports, conferences, and uniform conditions, there is no system corresponding in size, detail or organization with the Roman Catholic schools.

The Headmasters' Conference of Australia and the Headmistresses' Association of Australia are composed of headmasters and headmistresses respectively of a number of the larger non-government schools, including some Roman Catholic schools. Neither body has executive powers. One of the chief considerations for the admission of new members is the degree of independence enjoyed by the governing body and principal of the school concerned.

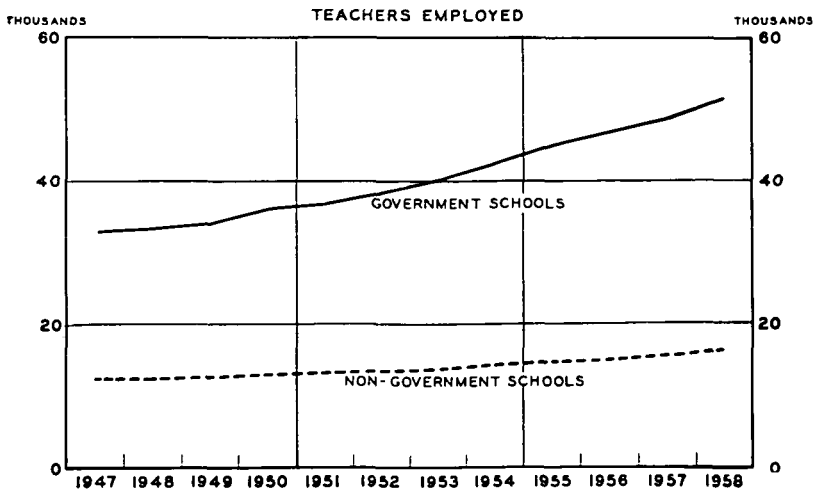

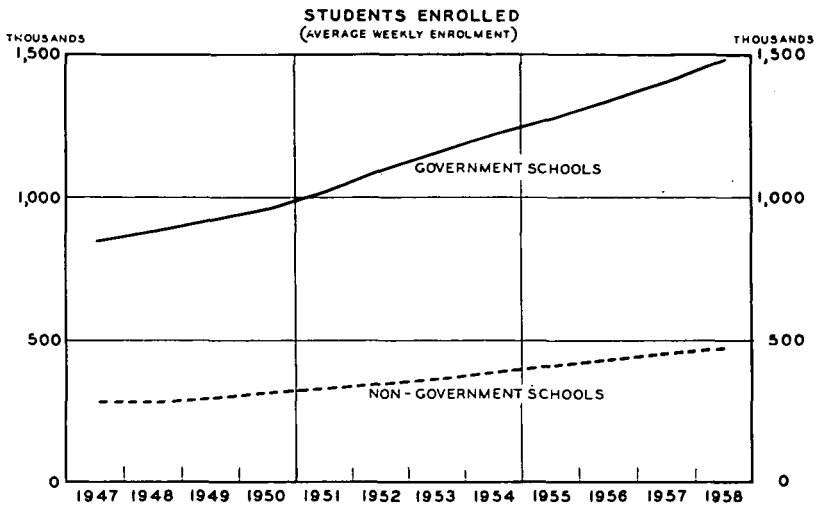

(ii) *Church of England.* The various types of Church of England schools include small schools associated with a local parish; schools under direct ownership of a diocese; schools established by Acts of the Church Synod, in which the majority of the members of the council are church representatives but which, otherwise, have almost complete independence; and schools conducted by religious orders of the church.

The proportion of members of a school council nominated by the church varies. In some schools, members may also be nominated by parents, by former students, and by the council itself.

In general, schools incorporating the words "Church of England" in their title follow a diocesan syllabus of religious education.

(iii) *Other Denominations.* In general, control of Presbyterian schools is exercised through School Councils appointed by the General Assembly of the Presbyterian Church in the State concerned. Councils vary considerably in size and in the bodies represented on them. Similarly, appointments to councils of Methodist schools are made by the annual Conference of each State. In Queensland, five schools are operated under the joint auspices of the Presbyterian and Methodist churches.

STUDENTS ENROLLED (AVERAGE WEEKLY ENROLMENT)
AND TEACHERS EMPLOYED IN
GOVERNMENT AND NON-GOVERNMENT SCHOOLS
AUSTRALIA, 1947 TO 1958

A limited number of schools are conducted by other denominations, such as the Baptist, Congregational and Lutheran churches and by the Seventh-day Adventists. The Society of Friends conducts one school in Australia, the Friends' School, Hobart.

Jewish schools are conducted in several capital cities.

(iv) *Undenominational*. There are a number of undenominational schools in Australia. Some of the larger, although not State-operated, have Government nominees on their boards. They include Sydney Grammar School, the Hale School, Perth, and the eight Queensland grammar schools. Other undenominational schools operate under the auspices of corporate bodies, usually in the form of a limited liability company, while others are privately owned. The majority of schools in this last category are small kindergartens and primary schools.

§ 4. Pre-School Education.

1. *Types of Pre-School Centres*.—Free kindergartens were originally established in congested industrial areas and financed mainly by voluntary effort, but over the years the Commonwealth Government, the State Governments and some municipal councils have provided an increasing amount of financial assistance, and in addition themselves maintain pre-school centres in certain areas.

In 1938, the six Kindergarten Unions, the voluntary organizations which pioneered pre-school education in Australia, met to form a federal organization. Its title "Australian Association for Pre-school Child Development" was changed in 1954 to "Australian Pre-school Association". Its membership is now open to all organizations whose main objective is the care of the pre-school child, and includes bodies in the Australian Capital Territory, the Northern Territory, and the Territory of Papua and New Guinea.

The aim of the association is to promote the continuous advancement of pre-school movements throughout Australia. It sets out standards which act as a guide throughout Australia to those sponsoring pre-school centres, and is responsible for the administration of the six Lady Gowrie Child Centres. These centres are demonstration nursery schools which the Commonwealth Government established in each of the capital cities in 1940 and which are maintained by Commonwealth grants.

To-day, pre-school centres are found not only in inner city areas but also in suburban and country districts. Programmes are adapted to suit the areas in which the centres are situated. Types of pre-school centres include nursery kindergartens, crèches with full-day care for children of working mothers, play groups and play centres, occasional care centres and residential holiday homes.

There are only a limited number of State-subsidized pre-school centres and kindergartens conducted by public authorities and voluntary bodies such as the Kindergarten Unions. However, many children of pre-school age attend private non-subsidized nursery schools or kindergartens. No comprehensive statistics are available concerning the operations of pre-school centres and kindergartens.

2. *The Training of Teachers*.—Although the principle is that all types of pre-school work should be under the guidance of trained pre-school teachers, this cannot always be put into practice, owing to the shortage of teachers.

The Kindergarten Unions in all States except Tasmania have established teacher training colleges providing three year courses. The minimum entrance age is seventeen and the Leaving Certificate is usually required before admission. In addition, in New South Wales, the Sydney Day Nursery and Nursery Schools' Association maintains a training college and a two-year course for nursery teachers is available at the Sydney Teachers' College.

In Tasmania, prospective teachers complete a two-year course of training at one of the Education Department's pre-school centres. Those wishing to gain a Kindergarten Training College diploma must attend a college on the mainland.

Many students-in-training receive government scholarships, and others are sponsored by government departments or voluntary organizations.

3. *Kindergarten of the Air*.—The Kindergarten of the Air came into being in 1942 in Western Australia, where, under the stress of the war, kindergartens could not remain open. It was conducted by the Australian Broadcasting Commission and proved so successful that within a few years it was being broadcast throughout Australia and has inspired similar projects overseas. It consists of a daily programme of 25 minutes based on the interests of children from 3 to 5 years of age.

§ 5. Technical Education.

1. **General.**—In this section, technical education refers to that branch of education which is concerned with the preparation for entry to skilled occupations, including trades and professions. In the main, this education is vocational and is chiefly part-time, being carried out by the student while he is engaged in his occupation. The work of technical high schools, junior technical schools and other schools of this nature, which provide courses with a bias towards technical handwork, has been excluded, as these schools provide a form of education which is more properly regarded as secondary education.

The chief institutions for higher education other than the universities are the technical colleges, which are administered in five States by a division of the Education Department. In New South Wales, a separate Department of Technical Education has been established, and in Victoria a number of the foremost technical colleges are controlled by independent councils which, although responsible to the Minister of Education, enjoy a large measure of autonomy.

The technical colleges offer training not only in all the major industrial skills, but also in a variety of commercial, artistic and domestic occupations. Their courses may be divided into three main types, as follows:—

- (i) Diploma courses giving advanced training in the technical professions and other fields such as accountancy and art.
- (ii) Vocational courses, usually leading to the award of a certificate, for skilled technical and semi-professional workers. Many of these courses are in fields not covered by an apprenticeship award.
- (iii) Craftsman or artisan training in the apprenticeship trades.

The University of New South Wales (formerly the N.S.W. University of Technology) conducts a number of diploma courses on behalf of the Department of Technical Education.

A brief description of the expansion in technical training since the 1939–45 War appears in Official Year Book No. 43, page 449. The following table gives some indication of the growth of technical education in the years 1954 to 1958:—

TECHNICAL EDUCATION: AUSTRALIA.

Year.	No. of Colleges.	No. of Students.	No. of Teachers.(a)	Total. Expenditure.
				£
1954	148	168,923	7,149	9,245,560
1955	151	177,081	7,632	10,058,917
1956	164	(b)	8,364	11,395,445
1957	169	204,268	8,967	12,243,824
1958	171	(b)	9,765	13,813,071

(a) Includes both full-time and part-time teachers.

(b) Not available.

Training in certain technical aspects of agriculture such as farm mechanics, wool classing, and in related fields such as food technology is also provided by the technical colleges, while the seven State agricultural colleges (*see also* § 27 of Chapter XXII), located in all States except Tasmania, provide comprehensive agricultural courses of two to three years duration which lead to diplomas in agriculture. At some colleges, other diploma courses are offered in addition, including horticulture, dairying and dairy manufactures, food technology and oenology. The Queensland Agricultural High School and College is administered by the Department of Education; in other States, the Departments of Agriculture are responsible for administration of the colleges.

2. **Correspondence Training.**—Technical correspondence courses were first offered in Australia about 1910. During the period 1940 to 1944, technical correspondence schools were founded in each State in conjunction with the Commonwealth and these have become an important part of the system of technical education in the Australian States.

These schools not only offer a wide variety of correspondence courses, including trade and apprenticeship, rural, commercial and art courses, but, in addition, provide secondary courses up to matriculation or diploma entrance standard. Students who because of distance or working hours cannot attend technical college classes may enrol for these courses. In New South Wales, "mobile instructional units" consisting of rail cars equipped as self-contained workshops are used to provide practical experience for correspondence students, as well as for the instruction of apprentices and tradesmen at smaller country centres.

In 1955, the Royal Melbourne Technical College established a shortwave broadcasting station to provide further tuition for its correspondence students.

An interesting recent development in technical correspondence education, in which the Australian technical colleges are co-operating with the Commonwealth Government, is the correspondence scholarship scheme operating under the Colombo Plan. Through this scheme, South and South-east Asian students may take correspondence courses conducted by the technical colleges and by the University of Queensland, which has a highly organized system of external tuition. Courses include commercial, rural and teacher-training, engineering and other technical courses. Where practical training is required as part of the course, it is taken by the student in his own country.

3. **Teacher Training.**—Prior to the 1939–45 War, technical colleges were staffed chiefly by men drawn from two sources. They were either trained teachers in the employment of the Education Department or technicians drawn from industry. Although some of the latter were highly qualified, the great majority had not been trained as teachers. In order to remedy this, there has been a move to develop schemes of training technical college teachers without breaking the important link provided by recruiting specialist tradesmen to teach in the colleges. In Victoria, the Technical Teacher's College provides training for students with the appropriate diploma or trade qualifications and suitable industrial experience. In New South Wales, technical college lecturers and tradesmen-instructors receive an in-service course of teacher training in both general educational theory and teaching method, and correspondence courses and visiting lecturers care for the newly appointed teacher-instructor in country colleges. Modifications of this scheme are in operation in other States. Many technical teachers, principally of academic, commercial and domestic science subjects, hold trained teachers' certificates from teachers' colleges.

4. **Colleges, Teachers and Students.**—The number of colleges, teachers and enrolments of individual students during the years 1954 to 1958 are given in the following table:—

TECHNICAL EDUCATION: COLLEGES, TEACHERS AND ENROLMENTS.

State.	Colleges.	Teachers.			Individual Students Enrolled.		
		Full-time.	Part-time.	Total.	Males.	Females.	Persons.
New South Wales(a)—

(a) Excludes correspondence students. The figures for 1954 represent enrolment in courses
 (b) Not available. (c) Estimated.

5. **Expenditure.**—The expenditure on technical education in each State for 1958 is shown in the following table:—

TECHNICAL EDUCATION: EXPENDITURE, 1958.

(Including Loan Fund Expenditure.)

(£.)

State.	Salaries and Maintenance.	Equipment.	Buildings.	Gross Expenditure.(a)	Receipts—Fees, etc.	Net Expenditure.
New South Wales ..	3,218,037	137,983	891,543	4,249,304	494,440	3,754,864
Victoria(b)(c) ..	3,952,542	108,572	1,060,580	6,005,558	539,246	5,466,312
Queensland ..	581,675	174,992	161,869	918,536	53,828	864,708
South Australia ..	786,075	(d)	630,075	1,416,175	116,252	1,299,923
Western Australia(c) ..	718,980	(d)	68,511	787,491	58,446	729,045
Tasmania ..	242,126	25,973	16,620	285,860	(f)	(f)
Aust. Capital Terr.(c) ..	46,398	2,217	..	53,395	6,060	47,335
Australia(e) ..	9,545,833	449,737	2,829,198	13,716,319	(f)	(f)

(a) The differences between amounts shown in this column and the sums of the three preceding columns represent expenditure on other items. (b) Includes expenditure on Junior Technical Schools. In other States, this type of expenditure is included with expenditure on Government schools. (c) Year ended June, 1958. (d) Included with salaries and maintenance. (e) There is no technical college in the Northern Territory. (f) Not available.

Fees and other receipts are paid into Consolidated Revenue in all States except Victoria, where they are retained and spent by the Technical School Councils. The expenditure on buildings is financed largely from loan moneys, the sums provided from this source in 1958 being: New South Wales, £754,604; Victoria, £1,060,580; Queensland, £137,067; South Australia, £598,052; Western Australia, £37,968; Tasmania, nil.

§ 6. Commonwealth Activities.

Although the primary responsibility for education rests with the States, the Commonwealth Government is committed to a number of educational activities related to its other functions. For example, it maintains officer training colleges and education services for each of its defence services, a School of Pacific Administration for the training of Administrative and other officers for service in Commonwealth Territories, and a School of Forestry. In each of the Australian Territories, the educational programme provides for both the native and white children who live there. References to these programmes appear in Chapter V.—The Territories of Australia.

The Australian Broadcasting Commission features school broadcasts and other educational broadcasts as part of its daily programmes. The Commonwealth Scientific and Industrial Research Organization undertakes research, the results of which are made available to educational institutions. Under the Commonwealth Reconstruction Training Scheme, many ex-servicemen and women have received training which has enabled them to enter a variety of trades and professions.

The Commonwealth Office of Education, established under the Education Act 1945, acts as the Commonwealth's educational adviser, undertakes research work as Commonwealth activities require and is the channel for liaison between Commonwealth and State educational authorities. This office has responsibilities with regard to the education of migrants, international relations, including the association of Australia with the aims and activities of the United Nations Educational, Scientific and Cultural Organization, (UNESCO), and the provision of scholarships and fellowships for selected students under the Technical Co-operation Scheme (Colombo Plan) and under the scheme known as Australian International Awards. The office also acts as a co-ordinating body in the administration of the British Commonwealth Scholarship and Fellowship Plan.

The activities of the Commonwealth Scholarships Board, which was formerly known as the Universities Commission, are described in § 8, para. 5 of this Chapter.

The Commonwealth assists a number of other bodies concerned with education. Besides grants to organizations such as the Australian Council for Educational Research, grants are made to the States for payment to universities.

Further details of Commonwealth assistance to students (including the Commonwealth Scholarship Scheme) and of grants for universities are given in § 8, para. 5 of this chapter.

§ 7. Australia and International Relations in Education.

Australia has always been responsive to educational developments in overseas countries, particularly those in the United Kingdom, but it is only recently that it has begun to make any considerable impact on educational thought overseas.

In this connexion, there have been important developments since the 1939-45 War. For instance, there has been a remarkable increase in the volume of information on educational matters exchanged between Australia and South-east Asia, and Australia participates in the Technical Co-operation Scheme (Colombo Plan), the United Nations Technical Assistance programme, the cultural programme of SEATO, and the scheme of Australian International Awards, under which a limited number of scholarships are given annually. Australia also participates in the British Commonwealth Scholarship and Fellowship Plan.

Perhaps the most important single factor behind the quickening of Australian interest in international cultural affairs has been membership of UNESCO. Australia has been a member since 1946. Twelve expert committees in Australia are responsible for a wide and varied programme of activities on behalf of UNESCO. Their advice has helped to make Australia's contribution to international conferences and seminars highly effective. Other work undertaken by these committees has included the provision of technical material and advice to the countries of South and South-east Asia, the conducting of seminars in Australia, arranging for exhibitions and displays in Australia and overseas, and the publication of handbooks and brochures to assist teachers and other persons in meeting the problems involved in educating for international understanding.

The Australian National Advisory Committee for UNESCO, on which all the other committees are represented, advises the Commonwealth Government and co-ordinates the work of the specialist committees.

§ 8. Universities.

1. **General.**—There are at present, nine universities and two university colleges in Australia. The following list shows the date of foundation and the faculties existing at each university in Australia.

University of Sydney, established in 1850, located in Sydney, New South Wales. Agriculture, Architecture, Arts, Dentistry, Economics, Engineering, Law, Medicine, Science, Veterinary Science.

University of Melbourne, established in 1853, located in Melbourne, Victoria. Agriculture, Architecture, Arts, Dental Science, Economics and Commerce, Education, Engineering, Law, Medicine, Music, Science.

University of Adelaide, established in 1874, located in Adelaide, South Australia. Agricultural Science, Architecture, Arts, Dentistry, Economics, Engineering, Law, Medicine, Music, Science, Technology.

University of Tasmania, established in 1890, located in Hobart, Tasmania. Arts, Commerce, Engineering, Law, Science.

University of Queensland, established in 1909, located in Brisbane, Queensland. Agriculture, Architecture, Arts, Dentistry, Economics and Commerce, Education, Engineering, Law, Medicine, Science, Veterinary Science.

University of Western Australia, established in 1912, located at Nedlands, Perth, Western Australia. Agriculture, Arts, Dental Science, Education, Economics, Engineering, Law, Medicine, Science.

Australian National University, established in 1946. A post-graduate research institution, located in Canberra, A.C.T. John Curtin School of Medical Research, the Research School of Physical Sciences, the Research School of Social Sciences, the Research School of Pacific Studies.

University of New South Wales, established in 1958 (1948 established as New South Wales University of Technology), located at Kensington, Sydney, New South Wales. Architecture, Commerce, Engineering, Humanities and Social Sciences, Science, Technology. The University also provides part-time instruction in science and engineering at technical colleges in country towns in New South Wales.

University of New England, established in 1954, (1938 established as New England University College), located in Armidale, New South Wales. Agricultural Economics, Arts, Rural Science, Science.

There are also two university colleges in Australia:—Canberra University College, founded in 1930, located in Canberra, Australian Capital Territory, was associated with the University of Melbourne until early in 1960 when it was associated with the Australian National

University. It has degree courses in Arts, Economics, Law and Science; and Newcastle University College, founded in 1951, located in Newcastle, New South Wales, is affiliated with the University of New South Wales and has degree and diploma courses in the faculties of Commerce, Engineering, Technology and Science, and diploma courses in the faculties of Architecture, and Humanities and Social Sciences. The Arts courses at the Newcastle University College are provided by the University of New England in co-operation with the University of New South Wales.

A second university in Victoria, Monash University, is at present in course of establishment. Under the Monash University Act, an interim council was appointed in May, 1958, by the Governor-in-Council and includes representatives of academic, scientific and industrial interests, together with three *ex officio* members—the Vice-Chancellor, the Director of Education and the Chief Inspector of Technical Schools in Victoria. The Act provides for training in Agriculture, Arts, Applied Science and Technology, Commerce, Education, Engineering, Law, Letters, Medicine, Pure Science, and Veterinary Science. The University is also to provide facilities for university education throughout Victoria by the affiliation of other educational institutions and by the establishment of tutorial correspondence and vacation classes.

2.—**Expansion within the Universities.**—Within the past 20 years, the appearance of some of the universities has altered to a striking extent. Many new permanent buildings and some temporary ones have been erected and new wings have been added. The universities are expanding their accommodation greatly to meet an expected record enrolment in the next decade.

There was a continuing increase in university enrolments from 1929 (approximately 9,000) to 1940 followed by a slight recession. In the closing year of the 1939–45 War, however, the number of students had risen beyond any previous figure, and rapid post-war expansion was responsible for a peak enrolment of 32,453 students in 1948. After 1948, the numbers decreased each year until 1953 as ex-service personnel completed their training under the Commonwealth Reconstruction Training Scheme. Thereafter, enrolments increased again and it is expected that they will continue to increase rapidly. Enrolments in 1958 were 41,865.

3. **Courses.**—A brief survey of developments in university courses since the war and up to 1954 was given in Official Year Book No. 42 (p. 476). An outline of some developments during 1955 and 1956 appeared in Year Book No. 43 (p. 453), and one for 1957 in Year Book No. 44 (p. 466).

At the University of New England, a four year degree course in Agricultural Economics commenced in 1958.

At the University of Sydney, a course in Criminology is under consideration.

At the University of New South Wales, the establishment of faculties of Medicine and Arts are under consideration, and it is expected that the first year course in Arts will commence in 1960. Several new types of courses have been instituted at this University since 1958—a Bachelor of Science course in Industrial Arts, and in Fuel Technology; a Bachelor of Commerce course in Industrial Relations, and in Wool Commerce; a Bachelor of Engineering course in Naval Architecture; and Master of Technology courses in Civil Engineering, and in Highway and Traffic Engineering.

At the University of Western Australia, the subjects available in the Faculty of Medicine were increased in 1959 to include all six years of the course.

For the majority of university courses, full-time attendance is required. At most universities, however, certain courses, such as arts, commerce and economics, may also be undertaken by part-time or evening study. At the University of New South Wales, a variety of degree courses are available to evening students.

Several universities have limited systems of external tuition whereby students in country areas may take a restricted number of courses by correspondence. The University of Queensland has developed a system of correspondence tuition which now caters not only for students within the State but for those in the Northern Territory, Papua and New Guinea and adjacent Pacific islands. External students within Queensland receive tutorial assistance at university centres in the principal country towns. In addition, the university co-operates in the Colombo Plan Correspondence Scholarship Scheme (see p. 597).

The University of New England's Department of External Studies offers a wide range of subjects for external study, leading to the degree of Bachelor of Arts and the Diploma in Education. External students must attend short annual residential schools of instruction in their subjects, usually held at the university.

4. **Research.**—A wide range of research work is carried out by the Universities as part of their normal functions. The research activities of the universities have been greatly stimulated over recent years by the interest and assistance of the Commonwealth and State Governments, government instrumentalities such as the Commonwealth Bank, the Rural

Bank of New South Wales, and the C.S.I.R.O., private foundations, both over sea and Australian, such as the Nuffield Foundation, the Carnegie Corporation and the Water Research Foundation of Australia, and industrial undertakings. Details of research work carried out at each university can be obtained from its calendar or research report.

Grants are made by the Commonwealth Government to bodies such as the Post-Graduate Committee in Medicine at the University of Sydney to facilitate arrangements for medical specialists from overseas to lecture and demonstrate advanced techniques in Australia.

Grants have been made by the Commonwealth Government, through the Australian Atomic Energy Commission, to a number of Australian universities for nuclear research.

The further expansion of teaching and research in various agricultural and veterinary fields was assisted by the annual and special grants of the Commonwealth Bank's Rural Credits Development Fund to several Australian universities. The C.S.I.R.O. also contributed to research in these and other fields.

5. *The Commonwealth and the Universities*—(i) *General*. The Commonwealth has given support to the Australian universities for many years. Prior to 1939, Commonwealth assistance was almost entirely concerned with research projects carried out by or in collaboration with the universities. During and since the 1939–45 War, the Commonwealth extended assistance to university students, at first to increase the number of highly trained people required for the war effort, then with the object of rehabilitating ex-servicemen, and finally as a social service benefit to the community. For the purpose of reconstruction training, the Commonwealth Government made available to the universities approximately £1 million for buildings and £500,000 for equipment. Since 1951, the Commonwealth has made special grants to the States for their universities and during the same time has continued to support the university institutions for which it is responsible.

(ii) *Assistance to Students*. Up to 1945, the Universities Commission functioned under National Security Regulations but in that year it was established on a permanent basis under the Education Act. After the 1939–45 War, the Commission continued to provide financial assistance to students under an interim scheme until 1951, when the interim scheme was superseded by the Commonwealth Scholarships Scheme.

Under this scheme, 3,000 scholarships are allocated annually to the States on a population basis. These scholarships are tenable at universities and other approved institutions. Awards are made on merit and all successful applicants have their fees paid. In addition, scholarship holders may be paid a living allowance subject to a means test. As from 1st January, 1959, the maximum rates of allowance are £338 per annum for a scholar living away from home and £221 per annum in the case where he lives at home.

At 30th September, 1959, 13,049 scholars had completed courses of training under the Scheme. At the same date, there were 11,256 scholars in training of whom 10,209 were at universities and 1,047 at other institutions.

As from 1st January, 1959, post-graduate awards for training at Australian Universities were made available under the Scheme. One hundred awards were granted in 1959 and a similar number will be available each year. The benefits comprise a living allowance without a means test and payment to universities for tuition and facilities.

The Commonwealth Scholarships Board, which was formerly known as the Universities Commission, also provides for the training at universities and similar institutions of ex-service personnel and war widows under the Reconstruction Training Scheme, the Korea and Malaya Training Scheme and the Disabled Members' and Widows' Training Scheme. A detailed description of the Reconstruction Training Scheme was given on page 240 of Official Year Book No. 39. At 30th June, 1959, 21,478 students had completed courses under these schemes and at the same date there were 71 in training.

(iii) *Commonwealth Grants to the States for University Purposes*. Following a report submitted by a committee of enquiry appointed to report on university finances and requirements, the Commonwealth since 1951 has made grants to the States for recurrent expenditure on university purposes. The payments have been made under the various States Grants (Universities) Acts.*

In 1957, the Prime Minister appointed a committee to investigate the problems of Australian universities. The Committee was given wide terms of reference. Among other things, it was asked to consider the role of the university in the Australian community, the extension and co-ordination of university facilities, technological education at university level, the financial needs of universities and appropriate means of providing for those needs, and the Commonwealth Scholarship Scheme.

* No. 81 of 1951; No. 75 of 1953; No. 28 of 1955; No. 37 of 1956 and No. 7 of 1957.

In accepting the principal recommendations of the Committee (Murray Report)* the Commonwealth agreed to continue grants for recurrent expenditure in 1958, 1959 and 1960, to make additional unmatched recurrent grants, and to assist with the capital needs of the universities for building projects and for equipment. The Commonwealth is also to provide grants between 1958 and 1960 for the building programmes of residential colleges affiliated with universities.

The States Grants (Universities) Act No. 27 of 1958 operated from 1st January, 1958, and gave effect to these recommendations. This Act amended those parts of the States Grants (Universities) Act No. 7 of 1957 which referred to 1958 and provided for payments for 1957 to the South Australian School of Mines and Industries (now the South Australian Institute of Technology).

Under the Australian Universities Commission Act No. 30 of 1959, the Australian Universities Commission was established. Its principal functions are to advise the Prime Minister on financial assistance to Commonwealth Universities and to States in relation to their Universities and also on the balanced development of Australian Universities. The Commission commenced its work in July, 1959.

The maximum Commonwealth recurrent grants for 1959 are shown in the following table:—

RECURRENT COMMONWEALTH GRANTS TO UNIVERSITIES, 1959.
(£.)

University.	Emergency Grant for Recurrent Expenditure.	Amount to be paid from (2) for Teaching and Administrative Costs of Residential Colleges.	General Grant for Recurrent Expenditure.	Amount to be paid from (4) for Teaching and Administrative Costs of Residential Colleges.
(1)	(2)	(3)	(4)	(5)
New South Wales—				
The University of Sydney ..	360,000	9,150	749,350	14,800
The University of New South Wales ..	172,500	3,000	368,900	4,800
The University of New England ..	49,500	2,625	82,650	4,200
Victoria—				
University of Melbourne ..	322,500	9,000	657,600	14,500
Queensland—				
University of Queensland ..	202,500	6,300	385,400	10,100
South Australia—				
The University of Adelaide ..	193,500	3,900	357,400	6,300
The South Australian Institute of Technology	43,350	350
Western Australia—				
The University of Western Australia	135,000	2,700	245,300	4,400
Tasmania—				
The University of Tasmania ..	64,500	825	122,950	1,300
Total	1,500,000	37,500	3,012,900	60,750

The emergency grant for recurrent expenditure (column 2) is an unmatched grant aimed at assisting the universities to meet some of their most urgent deficiencies in staff and equipment. The general grant for recurrent expenditure is a continuation of matched grants provided since 1951 and the maximum amount available in 1959 is shown in column 4. In general terms, the matched grants are made on a basis of £1 of Commonwealth money for every £3 of income received by a university from fees and State grants.

Columns 3 and 5 of the above table show the amounts which are required to be paid by each university from the emergency and the general recurrent grants, respectively, for the teaching and administrative costs of residential colleges administered by or affiliated with the university.

* Report of the Committee on Australian Universities (Canberra, Commonwealth Government Printer, 1957).

Provision is made in the States Grants (Universities) Act No. 27 of 1958 for these grants to be paid at a higher level in 1960.

Between 1958 and 1960, the Commonwealth will make grants for selected building projects, shown in detail in the Third Schedule to the Act. Payments are made up to a given maximum for each project, in the same proportion to State grants for these projects as that shown in the totals given for each university in the following table:—

COMMONWEALTH GRANTS FOR UNIVERSITY BUILDING PROJECTS, ETC.
(£.)

University.	Commonwealth Contribution.	State Contribution.
New South Wales—		
The University of Sydney	1,300,000	750,000
The University of New South Wales	950,000	1,500,000
The University of New England	450,000	450,000
Victoria—		
University of Melbourne	875,000	875,000
Monash University	75,000	75,000
Queensland—		
University of Queensland	775,000	775,000
South Australia—		
The University of Adelaide	375,000	375,000
Western Australia—		
The University of Western Australia	630,000	505,000
Tasmania—		
The University of Tasmania	840,000	670,000
Total	6,270,000	5,975,000

In addition a grant of 16 per cent. of the cost to the Commonwealth of each project is to be made for equipment.

The Commonwealth is also to make grants for capital buildings for residential colleges affiliated with a university. The Commonwealth will make grants of one half of the cost, at the request of a State, for the purchase, erection or alteration of a building at an affiliated residential college. The maximum amount available for distribution in each State in the period 1958–60 is shown in the following table:—

MAXIMUM COMMONWEALTH GRANTS FOR RESIDENTIAL COLLEGE BUILDINGS.
(£.)

State.	Maximum Grant.
New South Wales	180,000
Victoria	170,000
Queensland	110,000
South Australia	80,000
Western Australia	40,000
Tasmania	20,000
Total	600,000

The grants for capital building projects at universities and residential colleges are payable at any time within the period 1958-60.

6. **Teaching and Research Staff.**—The following table shows particulars of the teaching and research staff of Australian universities during 1958:—

UNIVERSITIES: TEACHING AND RESEARCH STAFF, 1958.

University or College.	Pro-fessors.	Readers. (a)	Lecturers.(b)		Demonstrators, Tutors and Research Assistants.		Honorary Lec-turers and Demon-strators.	Total.
			Full-time.	Part-time.	Full-time.	Part-time.(c)		
Australian National University	22	18	(d) 90	..	19	4	..	153

1957	274	229	1,494	936	(d) 410	346	50	30	3,769
1958	292	256	1,733	960	(d) 490	391	51	37	4,210

(a) Includes associate professors, assistant professors and lecturers-in-charge. (b) Includes senior lecturers, assistant lecturers, senior fellows, fellows and research fellows. (c) Excludes part-time demonstrators. (d) Includes technical officers of the University of New South Wales.

7. **Students.**—(i) Total. The number of students enrolled for courses at the universities for the year 1958 is shown in the following table:—

UNIVERSITIES: STUDENTS ENROLLED, 1958.

University or College.	Degree Courses.	Diploma Courses.		Certificate Courses.	Miscellaneous Subjects.	Adjusted Total.(a)
		Post-graduate.	Sub-graduate.			
Australian National University ..	93	2	95
Sydney	7,746	145	968	..	187	8,996
New South Wales	2,447	..	3,218	133	239	6,014
New England	1,425	98	51	1,567
Melbourne	8,070	270	327	158	559	9,020
Queensland	4,628	41	733	955	386	6,718
Adelaide	3,588	141	835	11	705	5,189
Western Australia	2,456	95	107	2,655
Tasmania	812	56	61	170	69	1,138
Canberra University College ..	327	..	26	..	126	473
Total	31,592	846	6,168	1,427	2,431	41,865

(a) Adjustment made for students enrolled for more than one course.

Of the students enrolled in 1958, 32,642 were males and 9,223 females. Included in those enrolled for degrees were 93 enrolled for higher degree courses at the Australian National University, 261 in Sydney, 297 at the University of New South Wales, 55 at the University of New England, 305 in Melbourne, 184 in Queensland, 221 in Adelaide, 184 in Western Australia, 36 in Tasmania, and 36 at the Canberra University College.

The following table shows the number of students enrolled at Australian universities for each of the years from 1954 to 1958:—

UNIVERSITIES: STUDENTS ENROLLED, SUMMARY, AUSTRALIA.

Year.	Degree Courses.		Diploma Courses.		Certificate Courses.	Miscellaneous Subjects.	Adjusted Total.(a)
	Higher Degrees.	Bachelor Degrees.	Post-graduate.	Sub-graduate.			
1954	917	20,358	315	5,093	677	2,191	29,445
1955	1,094	21,539	321	5,153	801	2,130	30,868
1956	1,188	23,686	550	5,977	1,025	2,206	34,480
1957	1,357	26,153	735	5,834	1,135	2,006	36,903
1958	1,672	29,920	846	6,168	1,427	2,431	41,865

(a) Adjustment made for students enrolled for more than one course.

(ii) *New Students Enrolled.* The number of new students enrolled for courses at the universities during the year 1958 is shown in the following table:—

UNIVERSITIES: NEW STUDENTS ENROLLED, 1958.

University or College.	Degree Courses.	Diploma Courses.		Certificate Courses.	Miscellaneous Subjects.	Adjusted Total.(a)
		Post-graduate.	Sub-graduate.			
Australian National University ..	44	2	46
Sydney	2,218	20	307	..	81	2,626
New South Wales	811	..	708	70	183	1,772
New England	699	43	35	776
Melbourne	2,253	21	109	8	247	2,512
Queensland	1,233	1	247	309	230	2,017
Adelaide	865	4	265	..	272	1,378
Western Australia	669	3	35	707
Tasmania	220	..	15	70	33	337
Canberra University College ..	135	..	6	..	76	216
Total	9,147	92	1,657	457	1,194	12,387

(a) Adjustment made for students enrolled for more than one course.

Of the new students enrolled in 1958, 9,147 were males and 3,240 females. Included in those enrolled for degrees were 211 enrolled for higher degree courses—Australian National University 44, Sydney 26, University of New South Wales 44, New England 12, Melbourne 35, Queensland 11, Adelaide 13, Western Australia 7, Tasmania 3 and Canberra University College 16.

The following table shows the number of new students enrolled at Australian universities during each of the years from 1954 to 1958:—

UNIVERSITIES: NEW STUDENTS ENROLLED, SUMMARY, AUSTRALIA.

Year.	Degree Courses.		Diploma Courses.		Certificate Courses.	Miscellaneous Subjects.	Adjusted Total.(a)
	Higher Degrees.	Bachelor Degrees.	Post-graduate.	Sub-graduate.			
1954	137	4,951	37	1,265	175	860	7,420
1955	125	5,791	55	1,412	254	926	8,549
1956	134	6,881	112	2,184	317	976	10,590
1957	119	7,401	121	1,601	333	874	10,418
1958	211	8,936	92	1,657	457	1,194	12,387

(a) Adjustment made for students enrolled for more than one course.

8. *Principal University Benefactions.*—Earlier issues of the *Official Year Book* included details of the principal private benefactions to universities. (See *Year Book No. 40*, pp. 467–8.)

9. *University Income for General Activities.*—The income of the universities is derived principally from State and Commonwealth Government grants, students' fees, and income from private foundations. From all sources other than new bequests, the income during 1958 for general university functions was as shown in the table below. In South Australia, Government grants and income from private foundations include amounts in respect of the Waite Agricultural Research Institute.

UNIVERSITIES: INCOME FOR GENERAL ACTIVITIES, 1958.

(£.)

University or College.	Government Grants.	Students' Fees.	Interest, Rent, Dividends and Donations.	Other.	Total.
Australian National University	1,751,650	889	50,045	77,458	1,880,042
Sydney	1,971,034	699,819	74,954	53,723	2,799,530
New South Wales	2,706,195	230,299	..	71,078	3,007,572
New England	591,863	48,938	1,210	81,552	723,563
Melbourne	1,869,604	587,435	58,830	49,417	2,565,286
Queensland	1,131,312	279,114	28,738	23,230	1,462,394
Adelaide	1,480,280	144,472	51,233	10,852	1,686,837
Western Australia	947,519	45,896	31,347	48,819	1,073,581
Tasmania	446,972	41,331	728	5,561	494,592
Canberra University College..	207,340	12,398	..	1,039	220,777
Total	13,103,769	2,090,591	297,085	422,729	15,914,174

10. *University Expenditure for General Activities.*—The principal item of disbursements on general university activities is the maintenance of the teaching and research staff, representing 65.9 per cent. of the total in 1958 compared with 66.0 per cent. in 1957.

The following table shows the expenditure including capital expenditure during the year 1958:—

UNIVERSITIES: EXPENDITURE FOR GENERAL ACTIVITIES, 1958.

(£.)

University or College.	Adminis- tration.	Maintenance of—			Other (including Buildings.)	Total.
		Teaching and Research Depart- ments.	Premises and Grounds.	Libraries.

of B.S. degrees conferred.

(b) Excludes the number

§ 9. Other Aspects of Education.

1. **General.**—Beyond the schools, colleges and universities, there are agencies engaged in less direct educational work which cannot be readily assessed and described. Among these are such things as press, film, radio and television, which are powerful educational forces—whether they are used specifically to disseminate information such as new agricultural techniques or preventative health measures, or, on the other hand, in a much more general way to exert an influence on the cultural level of the population. There are also bodies and institutions such as the adult education authorities, libraries, art galleries and museums which aim at catering for the educational and cultural needs of the general public.

2. **Adult Education.**—(i) *General.* The term “adult education” is used in Australia to refer in the main to non-vocational educational and cultural activities for adults provided by some of the universities and by various adult education authorities, which vary in form from State to State.

The Workers' Educational Association movement, which has for its object the bringing of the universities into closer relationship with the community in general and providing for higher education in civic and cultural subjects, has been active in Australia. In 1913, associations were formed in all the Australian States. In four States, the associations have been superseded by Adult Education Boards or Councils—set up by the State Governments in Victoria, Queensland and Tasmania and by the university in Western Australia. In the other two States, New South Wales and South Australia, the associations continue to co-operate with the universities in their extension work and are given direct grants by the governments concerned.

While the choice of courses offered by these bodies is naturally more limited in the smaller States, a variety of topics including social studies and current affairs, language and literature, drama, music, arts and crafts are available in all States.

(ii) *New South Wales:* (a) *Adult Education Advisory Board.*—State Government grants for adult education are allocated by the Adult Education Advisory Board. Grants are made to the University of Sydney (Department of Tutorial Classes), the Workers' Educational Association, the University of New England (Department of Adult Education), the Public Library of N.S.W. (Adult Education Section) and the Arts Council of Australia (N.S.W. Division).

(b) *University of Sydney.*—The Extension Board of the University of Sydney provides lectures and short courses in city and country.

In 1914, the Department of Tutorial Classes was established to provide classes and study groups along the lines of similar work in England. Its activities include the provision of tutorial classes in a wide variety of subjects, discussion groups and “kits” to serve the needs of country districts and people who cannot be catered for by tutorial classes, and publication of the fortnightly *Current Affairs Bulletin*. This publication, begun in 1942 and produced for four years by the Australian Army Education Service, was recommenced in 1947 as a civilian and service publication by the Commonwealth Office of Education. At the beginning of 1952, the Department of Tutorial Classes took over full responsibility for the bulletin. It receives an annual grant from the Commonwealth Government for this purpose.

In 1958, there were 142 tutorial classes with a total enrolment of 4,231 and 144 discussion groups with a total enrolment of 2,224.

The department works in conjunction with the Workers' Educational Association through the Joint Committee of Tutorial Classes, appointed by the university senate.

(c) *Workers Educational Association.*—In addition to co-operating with the Department of Tutorial Classes in organizing certain classes and groups, the Association itself provides classes in a wide variety of fields. It publishes *Highway*, a bi-monthly journal of adult education and maintains a property near Sydney where short residential schools are held throughout the year.

In 1958, the Association ran 60 classes, for which there were 3,575 enrolments.

(d) *University of New England.*—When the New England University College became an autonomous university in 1954, its Department of Adult Education took over full responsibility for the activities formerly undertaken by it on behalf of the Department of Tutorial Classes of the University of Sydney. It brings university extension activities to the people of northern New South Wales and conducts classes in arts and social sciences in towns throughout this region. Short residential courses are held on topics of interest to primary producers in the area.

(e) *Public Library of New South Wales*.—The Public Library's Adult Education Section provides an adult education library service for all classes and groups conducted by the Department of Tutorial Classes of the University of Sydney, the Workers' Educational Association, and the Department of Adult Education of the University of New England.

(f) *Arts Council*.—The New South Wales Division of the Arts Council of Australia provides a mobile theatre unit and organizes touring companies in ballet, opera and drama to country towns. Musicians provide some short lecture courses in the city.

(g) *Education Department*.—The New South Wales Education Department provides evening colleges, housed in its schools and staffed by trained teachers, which provide non-vocational courses in a wide variety of crafts and dramatic and musical activities. Adults may prepare for the Intermediate and Matriculation examinations at certain of these colleges.

(iii) *Victoria*.—The Council of Adult Education is a government instrumentality established by the Adult Education Act 1946. Its aims are to stimulate adult education in Victoria and to encourage voluntary organizations and associations by giving them advice and assistance. Its activities include a variety of classes (91 were available in 1957–58) on topics ranging from social studies, psychology, language and literature, to crafts, music, drama, etc., and usually lasting from 10 to 20 weeks. An annual 10-day summer school is another important activity. The Council publishes a monthly bulletin, *C.A.E. Newsletter* and a quarterly journal, *Adult Education*. Its group service assists and provides programme material for the discussion groups formed by organizations and individuals throughout the State. In 1957–58, there were 4,780 enrolments for classes and 2,556 individual enrolments in 219 discussion groups.

A recent development of importance is the extension of the council's activities, including classes and discussion groups, to the prisons, as part of a general plan for penal reform in Victoria.

Through its Community Arts Service, the Council organizes tours by musicians and by theatrical and other companies in country towns which otherwise would have no opportunity of seeing such performances. It provides an advisory service to musical societies and co-operates with the National Gallery of Victoria in the organization of travelling art exhibitions.

The council's income is derived mainly from a government grant, but also from student fees and Community Arts Service performances.

(iv) *Queensland*.—The Queensland Board of Adult Education was constituted in 1944 and is responsible under the Minister for Education for the provision of adult education facilities throughout the State. Under the executive officer of the Board, the Supervisor, are six district officers, one based in Brisbane and five in large country towns, who are responsible for organizing activities in country areas.

The cost of the programme is borne by the State Government and admission to all courses is free. Activities include lectures, group meetings on a variety of topics, generally short-term but some of which extend over a full year, and film screenings. Library and film services are provided.

In 1958, enrolments for lectures totalled 2,821. Some form of adult education activity was available in almost 200 centres.

(v) *South Australia*.—Since 1917, the University of Adelaide, through the Joint Committee for Tutorial Classes, has provided year by year in the metropolitan area a series of tutorial classes, lecture classes and study circles on a wide range of subjects of cultural and current interest, in co-operation with the Workers' Educational Association of South Australia.

In 1957, a Department of Adult Education was established and a full-time Director of Adult Education appointed. A wide range of University extension courses and educational conferences, summer schools and seminars, including a number dealing with subjects at post-graduate level, are organized directly by the University.

The Workers' Educational Association of South Australia, in addition, carries on an independent educational programme of classes, schools, and exhibitions or film festivals.

The State Education Department also arranges an extensive programme of educational activities.

(vi) *Western Australia*.—Adult education in Western Australia is organized by the Adult Education Board, established in 1928 under the terms of the statutes of the University of Western Australia. The board has a considerable degree of autonomy. Its executive officer is the Director of Adult Education.

The Board conducts in the metropolitan areas classes, refresher courses and short schools, conferences, seminars and public lectures, and maintains a library. Thirty-two classes were held in 1958 with a total enrolment of 1,511. The Board's country work is mainly operated through a Box Library Scheme for discussion groups, of which there were 71 in 1958. Lecture tours and week-end schools are held and local adult education is encouraged through semi-autonomous local committees. Metropolitan and country work is drawn together in an annual summer school.

The Board also operates a Community Arts Service in city and country and arranges screenings of foreign films. Regional Drama Festivals and Music Festivals are arranged culminating in the annual Festival of Perth, inaugurated and administered by the Board.

(vii) *Tasmania*.—Some form of adult education has existed since the formation in 1913 of a Workers' Educational Association, which worked in conjunction with the University of Tasmania for a number of years, receiving a grant through the university, which had a Director of Tutorial Classes. Later the grant was paid direct to the Association by the Government and the university's tutorial department ceased to exist. In 1948, the Adult Education Act was passed providing for the formation of an Adult Education Board whose functions are to plan and develop adult education in Tasmania and to assist other bodies actively engaged in adult education.

The executive officer of the board, located at Hobart, is the Director of Adult Education. Activities are organized on a regional basis by organizers based in Hobart, Launceston and three large country centres.

The board organizes classes of ten weeks' duration on a wide range of subjects. In 1958, 390 courses were held with a total enrolment of 4,750. It sponsors special lectures, film screenings and art exhibitions, recitals of music and dramatic performances, in both city and country areas. Its income is derived from a State Government grant and from students' fees.

3. *The New Education Fellowship*.—The New Education Fellowship is a world organization of parents, educators, and other citizens interested in the development of new educational practices. It was founded in London in 1915 and spread to Australia at the time of a regional conference held here in 1937. There are now sections in each State. Its Australia-wide journal *New Horizons in Education* is published quarterly.

4. *Australian College of Education*.—An Australian College of Education was formed in 1959. Its aim is to bring together leading members of every field of education for their mutual benefit and the furtherance of education in the Commonwealth.

5. *Migrant Education*.—The Commonwealth Government's post-war immigration policy has brought to Australia some thousands of immigrants with little or no knowledge of English. To assist their assimilation into the Australian community, a system of migrant education has been developed to teach them English and to give them information about Australia.

Before arriving in Australia, migrants who do not speak English are given some instruction in English by shipboard education officers.

In Australia, free evening classes are arranged by State Education Departments wherever a group of nine or more migrants in country areas, or twelve or more migrants in city areas, wish to learn English. Should migrants find it impossible to attend classes, they may apply, through State Education Departments, for a free correspondence course in English. In addition, English lessons are broadcast regularly by the Australian Broadcasting Commission. The Commonwealth Office of Education provides technical advice on all aspects of migrant education and is responsible for the preparation of teaching materials.

In December, 1959, 14,259 migrants were enrolled in evening classes and 9,626 were taking correspondence lessons. At the same time, 17,026 were receiving the monthly booklet accompanying the radio lessons.

§ 10. The Commonwealth Literary Fund.

In 1908, the Commonwealth Government, under Alfred Deakin, first established the Commonwealth Literary Fund. The Fund was entirely a compassionate one devoted to literary pensions for aged or infirm authors, for the families of literary men who died in poverty and for writers who were unable for financial reasons to continue their activities.

In 1939, in an endeavour to encourage the development of Australian literature and to foster appreciation of it, the Commonwealth Government greatly enlarged the scope of the Fund. The Fund now awards a limited number of Fellowships each year, assists in the publication of manuscripts of high literary merit, makes annual grants for lectures in Australian literature and awards pensions to writers who have achieved a nation-wide reputation for their work in the field of creative literature.

The Fellowships are awarded each year to writers who have proved their capacity to do creative work in the field of literature but who are prevented from exercising their abilities because of financial circumstances. The Fellowship gives a writer the opportunity to devote all his time to creative writing for a period of up to one year. Since 1956, the Fellowships have had a maximum value of £1,000 per annum. The Fund does not seek out people on whom to bestow Fellowships, but considers only those who submit applications.

The Fund also assists in the publication of manuscripts which have outstanding literary merit but which would not be commercially attractive propositions. This assistance takes the form of a guarantee of assistance to the publisher. The Fund does not itself enter the field of the publisher.

Since 1940, annual grants for lectures in Australian literature have been made to universities. In 1956, the Fund decided to extend the scheme to cover lectures to the general public and schools in both city and country areas. With the co-operation of the Adult Education authorities, major state-wide tours have taken place in Tasmania, Queensland, Western Australia and South Australia. The scheme will be extended to Victoria in 1960 and to New South Wales in 1961. By 1961, annual lectures will be given in all States. In this way, the Fund hopes to spread a knowledge and appreciation of Australian literature.

The Fund also assists two literary magazines of long standing and recognized literary value.

The Fund is administered by a Committee consisting of the Prime Minister (Chairman), the Leader of the Country Party and the leader of the Opposition in the House of Representatives assisted by an Advisory Board of five persons with special literary qualifications.

§ 11. Libraries.

1. *General.*—The Munn-Pitt report of 1935 greatly stimulated interest in libraries and librarianship throughout Australia. This is seen in the rapid development of libraries, the passing of legislation in all States to increase library services, and in the establishment in 1937 of the Australian Institute of Librarians to improve the standard of librarianship. This body was reconstituted in 1949 as the Library Association of Australia and its functions now include the promotion and improvement of libraries and library services. The Association conducts annual examinations for which students are prepared by courses of instruction in all States. Formal library schools exist in the Commonwealth National Library, Canberra, and the Public Libraries at Sydney and Melbourne. In 1960, the first library school to be attached to an Australian University will be opened. This will be in the University of New South Wales.

2. *Commonwealth.*—(i) *Commonwealth National Library.* This library grew directly from the Library of the Commonwealth Parliament established in 1901. While providing, as a primary responsibility, for the general reading and reference needs of Members of Parliament, it has developed into a central source of information for the government and its departments and other agencies. The close association of the National Library with the central government follows the pattern of the Library of Congress at Washington, U.S.A. Like the latter, it has also inherited the basic elements of the national library concept of the older countries of Europe: that a national library is the proper place to collect the national literature systematically and to make it known and available for use, and that it is a place to which scholars may turn for what is most significant in the literature of other countries.

Through its Legislative Reference Branch, the National Library aims to provide for the Parliament and the government an up-to-date reservoir of fact and opinion on public issues both domestic and foreign. In addition to assembling material, the staff compiles bibliographies and reference guides to the literature on special subjects and, in 1959, handled 1,400 inquiries involving special search. A further service to the government flows from the activities of the Archives Division, a central element in the government machinery for the management and preservation of its records. Archival repositories for Commonwealth records are maintained in Canberra, Sydney, Melbourne, Brisbane, Adelaide and Perth.

As well as the governmental record of national life and development, the National Library systematically collects and preserves Australian books, periodicals, newspapers, government publications, pictures, prints, manuscripts, maps, moving-picture films and sound recordings. It is assisted by the Copyright Act 1912-1950, which requires one copy of all material printed in Australia to be deposited in the Library, and has been enriched by the acquisition of such notable collections as the Petherick collection of 16,500 items in 1911, the Cook manuscripts in 1923, the Cumpston collection of Public Health in Australia in 1936, the Mathews ornithological collection in 1940, the Nan Kivell collection of 16,000 items of Australian and Pacific interest including original paintings, prints, manuscripts and printed material in 1959, and the Ferguson sociological collection now being transferred to the library. A special feature of the Library's Australian work is the copying on microfilm, in association with the Public Library of New South Wales, of all important unique material overseas relating to Australia, including about two million pages in the Public Record Office in London.

The Library fulfils its obligations to make Australian publications widely known, both at home and abroad, through a series of select lists which include *Australian Public Affairs Information Service* (monthly with an annual cumulation), *Australian Books* (annual) and full bibliographies in the monthly *Australian Government Publications* and *Books Published in Australia*, cumulated as the *Annual Catalogue of Australian Publications*. Collections of Australian books are maintained by the library at all posts at which Australia is officially represented abroad. In London and New York, the National Library maintains and staffs Australian Reference Libraries.

In 1956, the Australian Bibliographical Centre was established within the National Library to serve as the secretariat of the Australian Advisory Council on Bibliographical Services. The Council, made up of representatives of the National Library, State libraries and library boards, the Commonwealth Scientific and Industrial Organization, the universities, and the Library Association of Australia, plans the further development and co-ordination of bibliographical services and co-operates with UNESCO and the International Advisory Committee on Bibliography. The centre organizes bibliographical projects recommended by the Council, and operates as a centre for bibliographical information in Australia and overseas. It has published a *Union List of Newspapers in Australian Libraries, Part 1: Newspapers Published Outside Australia*, 1959, and in 1960 began publication of the *National Union Catalogue of Current Monograph Accessions*.

The Library acts as a central library of documentary and educational films, its film collection containing over 4,400 titles, together with Australian historical films and a great number of film strips. In 1959, it published *Australian Films: a Catalogue of Scientific, Educational and Cultural Films, 1948-1958*. Special efforts are being made to discover and preserve samples of early Australian film-making.

Local library services are provided by the Library for the residents of the Australian Capital Territory, the Northern Territory, the Territory of Papua and New Guinea, and Norfolk Island.

The National Library's collections contain approximately 550,000 volumes, together with very extensive holdings of pamphlets, pictures, prints, maps, manuscripts and microfilm and about 6 million feet of motion picture films. Its permanent and temporary holdings of archives were, in 1959, approximately 132,000 cubic feet. Special features of the Library's book collections are its strong holdings of Australiana, materials relating to the Pacific area and to East and South-east Asia, the publications of foreign governments and of international organizations, works in the social sciences and in particular in political theory and economics.

(ii) *Patent Office Library*. The Library of the Commonwealth Patent Office, Canberra, contains approximately 8,500 books and a wide variety of periodicals and other literature relating to pure and applied science, industrial technology and the industrial property (patent, trade mark, design and copyright) laws and practice of most countries. Patent specifications of inventions are received from the principal countries of the world; present holdings are more than 6,000,000.

(iii) *Commonwealth Scientific and Industrial Research Organization*. The library holdings of the Organization cover the pure and applied sciences. In addition to the Head Office Library in East Melbourne, each of 40 Divisions and Sections has a specialized collection covering such subjects as food preservation, forest products, chemistry, physics, animal health and fisheries. The collections are particularly strong in the publications of overseas scientific and technical research institutions, with many of which extensive exchange arrangements have been made.

The Head Office library maintains a union catalogue of the holdings of all C.S.I.R.O. libraries, and is responsible for the following publications:—

(a) *Scientific Serials in Australian Libraries.*

(b) *Australian Science Index.*—Index of articles published in Australian scientific and technical periodicals.

(c) *C.S.I.R.O. Abstracts* which includes abstracts of papers published by C.S.I.R.O. officers, C.S.I.R.O. translations, translations available from other Australian organizations and additions to the British Commonwealth Index of Scientific Translations.

The larger libraries in the Organization have photocopying facilities which, while normally for internal use, will provide a service for the public when a publication is not held elsewhere in Australia.

(iv) *The Australian War Memorial Library.* In the War Memorial library are housed the documentary and pictorial records of Australia's fighting services in the 1914–18 and 1939–45 Wars, together with collections covering the war in Korea, 1950–53, and earlier wars in which Australian troops participated—Sudan, 1885, South Africa, 1899–1902 and the Boxer Rebellion in China, 1900–01. Books, periodicals and other records covering contemporary trends and events in the fields of military history and military science are constantly being added.

The printed records section contains approximately 65,000 volumes, a large collection of military maps, newscuttings and newspapers, sound recordings of war leaders, personalities and events, war posters and postage stamps. Many personal collections by distinguished soldiers and historical documents relating to the wars have also been placed in the Memorial's custody for preservation.

Written records comprise correspondence files of headquarters and units of both world wars, and the original war diaries compiled from day to day by each unit during its service.

The collection of official war photographs covering the 1914–18, 1939–45 and Korean Wars numbers over 250,000, and a collection of official motion picture film depicts Australia at war.

Facilities for public research are not yet fully developed, but all requests for information are met where practicable.

(v) *Other Commonwealth Government Libraries.* Most Commonwealth authorities have specialized collections in their own fields, and in addition draw largely on the National Library.

3. *States.* (Other than University Libraries, see para. 4).—(i) *State Public Libraries.* In each of the capital cities, there is a well-equipped public library, the libraries in Melbourne and Sydney especially comparing very favourably with similar institutions elsewhere in the world. The following statement gives the number of volumes in the public library of each capital city at 30th June, 1958.

STATE PUBLIC LIBRARIES, 30th JUNE, 1958.

City.	Number of Volumes in—			Total.
	Reference Branch.	Ordinary Lending Branch.	Country Lending Branch.	
Canberra(a)	550,000	..	(b)	550,000
Sydney	(c) 555,785	..	(d) 152,179	707,964
Melbourne	650,825	110,855	45,051	806,731
Brisbane	183,699	183,699
Adelaide	184,195	(e) 58,625	63,159	305,979
Perth	319,000	319,000
Hobart	60,842	(f) 141,492	105,932	308,266
Darwin(g)	31,284	..	31,284

(a) Commonwealth National Library, including Parliamentary Section. (b) Books are lent to libraries or students throughout Australia wherever necessary for research work. (c) Includes 162,014 volumes in the Mitchell Library and 11,940 volumes in the Dixon Library. (d) Includes 1,943 volumes in the Model School Library. (e) Includes 16,178 volumes in the Children's Branch and 4,159 volumes in the Youth Lending Branch. (f) Includes 111,542 volumes in the Children's Branch. (g) Northern Territory Library Service. Includes the Country Lending Branch and the Children's Branch.

(ii) *New South Wales.* The Free Library movement in New South Wales, founded for the establishment of a system of public libraries on the basis suggested in the Munn-Pitt Report of 1935, helped to pave the way for the Library Act 1939, which was fully proclaimed as from 1st January, 1944. Of the 161 councils which have adopted the Library Act, 140 have put their adoption into effect. During 1958-59, they spent on their libraries £1,016,789, including £359,248 received in subsidy. There are 164 libraries of which 42 are in the metropolitan area and 122 in the country. There are also 15 bookmobiles, of which two are in Sydney six in the suburbs of Sydney and seven in country municipalities and shires. These libraries contain 1,832,456 volumes.

New South Wales departmental libraries are staffed by officers seconded from the State Library, which also provides a central cataloguing service for certain municipal and shire libraries constituted under the 1939 Act. The State Library assists the library of the University Tutorial Classes.

The Country Circulation Department forwards books on loan to State schools, to municipal and shire libraries and to individual students. During 1958-59, 99,493 books were lent to small State schools, and 23,327 to country libraries, while 39,191 reference works were lent to individual country students and to libraries to satisfy special requests.

The State Library includes a general reference department of 391,546 volumes together with the Shakespeare Tercentenary Memorial Library, and the Mitchell and Dixson Libraries and Galleries which are mainly devoted to Australian and Pacific material. The Mitchell Library, of more than 60,000 volumes and pamphlets and 300 paintings, was bequeathed to the trustees of the Public Library in 1907 by Mr. D. S. Mitchell, together with an endowment of £70,000. There are now 165,000 volumes in the library, in addition to valuable manuscripts, maps and other material. In 1929, Sir William Dixson gave a collection of historical pictures then valued at £25,000. These were subsequently added to and, at his death in 1952, Sir William bequeathed the whole of his collection of books, manuscripts, pictures and other material together with an endowment of more than £113,000, mainly for the printing or reprinting of historical documents relating to Australia and the Pacific.

The maintenance and control of the ordinary lending branch of the Public Library were transferred in 1908 to the Sydney Municipal Council.

The State Library also takes care of the State archives.

Other important libraries in New South Wales are the Sydney Public Library, 186,713 volumes, Australian Museum, 32,500; Teachers' Colleges, 180,541; Technical Education Branch, 77,440; Railways Institute, 157,770; Government Transport Institute, 42,720; Cooper Library of the New South Wales Public School Teachers' Federation, 22,900; Workers' Educational Association, 12,200; and the Library at the National Hebarium, 10,350 volumes. At 30th June, 1959, the Parliamentary Library contained 130,250 volumes.

(iii) *Victoria.* Until the establishment of the Free Library Service Board in 1947, the only public library facilities available in Victoria (apart from those of the State Public Library and one or two Metropolitan Municipal Libraries) were those offered by about 200 Mechanics' Institute Libraries situated in country areas all over the State. The Board's policy has been to replace these services with modern public libraries controlled by local Municipal Councils and subsidized by the Board. Since the Board's inception, 89 municipalities, comprising 1,662,083 of the State's population, have established libraries. Of these, 21 are in the city, serving 1,099,690 people, and 68 in the country, serving 562,393 people. More than £240,000 was paid to the Councils in library subsidy for the year 1958-59 and over £480,000 was expended in Municipal Library Service for the same year. There are 1,250,000 books available to the communities in which libraries are established and combined circulation figures were over 6,100,000 as at 30th September, 1958.

A feature of the services provided in the country is the number of co-operative or regional library groups now being developed. These services, of which there are fourteen, comprising a total of 43 Councils, consist of groups of Councils which pool their financial resources, book-stocks and trained staff, in order to provide more comprehensive, efficient library facilities.

Approximately 140 Mechanics' Institute Libraries are still in existence in country areas. In 1958, 52 of them shared a grant of £2,000.

(iv) *Queensland.* The Library Board of Queensland was established in 1945 under the provisions of the Libraries Act of 1943. Its duty is to attain the fullest co-operation and improvement of the library facilities of the State, with the object of placing such facilities on a sound basis for the benefit and educational improvement of the citizens generally. The Board consists of six members with the State Librarian as *ex officio* member and secretary.

A general function of the Board is to ensure that the fullest co-operation exists with the Department of Education, the University of Queensland, local bodies, and other bodies having for their object the encouragement of education, literature and the arts and sciences. A specific function of the board is the control and management of the Public Library of Queensland. Its policy is to build up the main collection of the Library, being as it is the State's reference centre.

The Country Extension Service, which is administered as a department of the Public Library, lends books of non-fiction free to adults and children residing outside the metropolitan area and to municipal libraries in areas of low population.

The Oxley Memorial Library, established in 1923, has been administered as a department of the Public Library since 1946 and the collection has been kept separate. Its object is to collect books, manuscripts, pamphlets and other graphic material relating to the history and literature of Australia and of Queensland in particular, and to provide facilities for research students in Queensland literature and history.

In 1958, the section of the Libraries Act dealing with the preservation of public records was proclaimed, and in 1959 an Archives Section of the Public Library was instituted and an archivist was appointed.

Since 1948, a course in librarianship has been held annually at the Public Library for the purpose of preparing trainees for the Preliminary Examination of the Library Association of Australia. In 1959, a course covering the compulsory subjects of the Association's Registration Examination was inaugurated at the Central Technical College, Brisbane.

The holdings of the Public Library of Queensland and its extension services in 1958-59 were:—Main Reference Collection, 116,003 volumes and 5,563 maps and pamphlets; Country Extension Service, 61,049 volumes; Oxley Memorial Library, 19,643 volumes and 8,180 maps, pamphlets and miscellaneous items. Local authorities are empowered by the Libraries Act to establish and conduct library services as a function of local government. The Board encourages local authorities to use these powers. In 1958-59, 61 local authorities were conducting 79 library services and 11 others indicated that they would do so in the near future. The Brisbane City Council has established 11 of these libraries. There were 52 libraries in Queensland free to adults.

To help overcome the problems of large area and sparse population, various local authorities provide library services on a regional basis. By 30th June, 1959, four regional library services had been established:—the South Western (one town and six shires), the Central Western (seven shires), the North Western (six shires), and the Central Highlands (five shires), with head-quarters at Charleville, Barcaldine, Mt. Isa and Emerald respectively. Other regional services are being planned.

During 1958-59, the Board received a grant of £125,500 from consolidated revenue to finance the activities of the Public Library and to pay subsidies to local bodies of fifty per cent. on the purchase of books and the acquisition or improvement of library buildings and equipment. Subsidies were paid to four regional library service boards, 61 local authorities, 42 schools of arts and nine other bodies.

The library of the Parliament of Queensland was established in 1860. At 30th June, 1959, the library held 86,464 books and pamphlets, consisting of official publications and books devoted largely to history, the social sciences, biography and literature.

The Libraries Act Amendment Act, 1949, provides for the Public Library and the Parliamentary Library each to receive a copy of all books, pamphlets, maps and other printed material published in Queensland.

(v) *South Australia.* In the reference department of the Public Library of South Australia, there are about 190,000 volumes, most of which may be borrowed. Over 3,000 periodicals are filed, and the collection of newspapers includes every newspaper printed in South Australia. There are 38,000 volumes in the lending department available to persons living in the metropolitan area, and the Country Lending Service has 78,000 volumes, of which more than half are suitable for children.

The Research Service specializes in scientific and technical inquiries, and supplements the resources of the Public Library by borrowing from other libraries and by obtaining microfilm copies of material not available locally. It has an extensive collection of trade catalogues.

The library of the Parliament of South Australia held approximately 65,000 volumes at 31st December, 1958.

The Institute's Association in 1958 comprised 223 suburban and country libraries with 752,970 volumes.

(vi) *Western Australia.* In 1955, the Library Board of Western Australia was made responsible for all public library services, throughout the State, to which the State Government contributes funds.

The Board has the following major functions:—

- (a) To encourage local authorities throughout the State to establish public libraries and to provide as a State subsidy all books and bibliographical services necessary for such libraries when established;
- (b) To administer the State Library;
- (c) To advise the Government on all matters relating to libraries;
- (d) To provide for the training of librarians.

Local public libraries are subsidized on a £1 for £1 basis, the local authority providing accommodation and staffing and the Board all books and related services. The Board provides at least one volume per head of the population. All non-fiction books may be made available at any public library throughout the State on request to the Board. All cataloguing is done by the Board. The first library under this scheme was opened in August, 1954. By 30th June, 1959, 35 libraries had been established.

Prior to the establishment of the Library Board, the government appointed a Country Free Lending Libraries Committee in 1944 to make small grants to local authorities for library purposes. With the more comprehensive service now available through the Library Board, the activities of this Committee are becoming less important and it will cease to function altogether, probably in 1961.

The State Library, established in 1887, is the reference division of the Library Service of Western Australia. In addition to providing the normal facilities of a reference library for the metropolitan area, it extends its service throughout the State through local public libraries. It is divided into four subject departments as follows:

- J. S. Battye Library of West Australian History.
- Library of Business, Science and Technology.
- Library of Social Sciences, Philosophy and Religion.
- Library of Literature and the Arts.

The State Bibliographical Centre is housed at the State Library and there is also a Commercial Information Centre. The State archives are maintained by the State Library and managed by the staff of the Battye Library. The State Library is fully equipped with microfilm and photocopy apparatus.

The bookstock of the Board at 30th June, 1959, was approximately:

- Lending library services (including books in public libraries): 147,000 volumes.
- State Library: 182,000 bound volumes.

The University of Western Australia, through its Adult Education Board, manages the Adult Education Library of some 14,000 volumes of general reading and fiction. Books are sent to country readers by post.

There are some 100 special libraries in government departments and industrial firms.

Union catalogues of periodicals and books received in the libraries of all types in the State are maintained by the Library Board of Western Australia in the Bibliographical Centre of the State Library.

(vii) *Tasmania.* The Tasmanian Library Board, constituted in 1944, is responsible for administering the State library head-quarters in Hobart, for the extension of library services throughout the State and for the control of State aid for libraries. State aid to municipalities is provided in the form of books of a value equal to the amount of library rates collected. The total cost of library services to the State during 1957–58 amounted to £99,078.

The Tasmanian Library Board provides lending and reference services for the people of Hobart and operates a reference service for people throughout the State. In addition it conducts screenings of documentary films, recitals of recorded music, lectures, library weeks in country centres, puppetry demonstrations, etc.

The Parliamentary Library works in close collaboration with the State Library, which provides a reference officer to serve members during session. It catalogues all new books added to the library and supplies recreational reading.

4. University Libraries.—The libraries of the Australian universities provide material not only for the education of graduates and undergraduates, but also for research workers and practical investigators all over the continent. Much of the material they contain is not available elsewhere, for although in most cases smaller, they are in many directions more highly specialized than the public libraries. They lend to one another and to State and private institutions as well as to individual investigators. Each of them

is governed by a librarian, who is responsible as a rule to an executive sub-committee and a committee which is practically co-extensive with the professional staff. In size, the library of the University of Sydney is the fourth library in Australia, and the libraries of the Universities of Melbourne and Adelaide are respectively eighth and ninth. The following table shows the sizes, accessions during the year, and expenditure of the Australian university libraries; borrowing statistics are not shown, as they differ too widely to be comparable without considerable explanation.

UNIVERSITY LIBRARIES, 1958.

University or College.	Volumes.	Accessions during year.	Expenditure.
			£
Australian National University	138,664	8,883	52,584
Sydney(a)	420,532	18,188	81,243
New South Wales	93,411	10,966	72,253
New England(a)	63,982	13,015	37,953
Melbourne(a)	257,090	12,685	96,114
Queensland	178,081	17,110	66,313
Adelaide	233,090	11,494	71,919
Western Australia	157,888	11,061	57,181
Tasmania(a)	103,900	6,486	34,352
Canberra University College(a)	52,060	11,060	27,539
Total	1,698,698	120,948	597,451

(a) Includes pamphlets.

The library of the Australian National University was founded in 1948. At the end of 1959, stock comprised about 150 000 volumes, including a collection in oriental languages. The library is designed to serve the staff and students of a post-graduate institution but its resources are freely available to all serious readers. It specializes in the fields of the physical and medical sciences, excluding clinical works. In the social sciences, it aims to provide a good working collection while giving consideration to the holdings of the Commonwealth National Library. It possesses significant collections in anthropology, linguistics, mathematics and mathematical statistics.

The library of the University of Sydney consists of the central collection which is known as the Fisher Library, the Law Library, the Medical Branch Library, the Burkitt Library for preclinical medicine, and some fifty departmental libraries. Although the University library contains more than 400,000 volumes, other libraries in the University grounds account for half as much again. In 1959, a storage library for less used material was established in Darlington.

The first books were acquired in 1851 and shortly afterwards the library of Sydney College was added. The notable collection of Nicholas D. Stenhouse was acquired in 1878 as the gift of Thomas Walker. In 1885, Thomas Fisher bequeathed the sum of £30,000, the income from which is used as a book Fund. Perhaps the finest collection in extent and importance which has been given to the University is that of Sir Charles Nicholson. There have been numerous other benefactions, among which may be mentioned the library of Sir Francis Anderson, the W. H. Deane collection of books and manuscripts and the Dalley-Scarlett music library.

The University of New South Wales used as its first library that of the Sydney Technical College. This became a joint central library with branches wherever the University had courses, until in 1959 the library at Kensington became the University's central library with a University librarian. In November, 1959, the University had 108,900 volumes (32,600 in the Sydney Technical College, 30,600 at Kensington, 36,200 in the Newcastle University College, and 9,500 at other centres).

The University of New England library was founded in 1938, and bears the name of its first benefactor, Sir William Dixon. At the end of 1959, it contained 74,000 volumes on the open shelves and subscribed to 1,450 current periodicals. The library is at present housed in temporary quarters with seating for 100 readers. The bindery and

Compactus shelving for newspapers and local records are housed in the two basement areas. Microfilm and microcard readers are available. The permanent library building is at present being erected and will hold 278,000 volumes and 190 readers, as well as the bindery and photographic departments. This is expected to be ready for occupation at the end of 1960.

Early in 1854, the University of Melbourne made its first allocation for books, but the library was housed in temporary quarters until 1959. The W. L. Baillieu Trust made available the first instalments of a £100,000 gift for building purposes, which have been followed by subsequent gifts and substantial grants from the Commonwealth and State governments, and a new building costing £750,000 was occupied at the beginning of 1959, the first in the University to be designed for library purposes. It provides space for 1,000 readers and 300,000 books. During the academic year, admissions of readers to the building average nearly 8,000 a day. Most of the books are accessible on open shelves, and though the library is intended primarily for reference purposes, borrowing, except of text-books and certain valuable volumes, is made as easy as possible. The resources of the library are also extensively used on inter-library loan by industries and other organizations throughout Australia. The University library, including 13 branch libraries in various departments, is administered from the centrally situated Baillieu Library and, at the end of 1959, it contained 269,824 books and pamphlets. The large medical branch library is specially rich in periodicals.

The library of the University of Queensland was founded in 1911. The main library is in its own building in the University at St. Lucia, and there are a considerable number of departmental libraries. All books are in open access and most are available for borrowing. At 1st October, 1959, the library contained more than 180,000 volumes. The main library includes a special collection of material relating to the history, development and culture of the countries surrounding the Pacific Ocean.

The Adelaide University library bears the title of its original benefactor, Robert Barr Smith, who, with members of his family in and after 1892, gave the university over £50,000 for the library. Although all readers have access to all parts of the library, the book collection is in two divisions, a collection of some 25,000 of the most frequently used books being kept in the main reading room and the remainder, consisting of older and more specialized books, being shelved on the four levels of the extensions. Bound periodicals are shelved in steel stacks under the main reading room. Borrowing facilities are available to all matriculated students, to country students and to graduates. There are branch libraries for medicine, law and music. The British Medical Association (S.A. Branch) and the Australian Physiotherapy Association (S.A. Branch) make annual contributions towards the maintenance of the medical library in return for borrowing privileges for their members. The Waite Agricultural Research Institute has a separately administered library of publications in agriculture.

In the University of Western Australia, the first permanent library staff was not appointed until 1927. Provision for a permanent library was not possible when the university moved to its present site, and space and facilities have consequently been inadequate. The whole collection, consisting of about 170,000 volumes, is accessible on open shelves. There are a Law Library, a Medical Library, a number of departmental libraries, and a bindery. The library possesses a good range of periodicals, especially legal and scientific and is building up a useful collection of Australian literature.

Although the library of the University of Tasmania was founded in 1893, a full-time librarian was appointed for the first time at the end of 1945. Since 1954, a Hobart Union List of Serials has been housed in and kept up to date by the university library, thus providing a major reference tool for all bibliographic inquiries in the State. At the end of 1959, the Library contained approximately 117,000 volumes and received 2,150 periodicals currently.

The Canberra University College library was established in 1938. In 1959, it contained 60,000 volumes, which are on open shelves.

5. Children's Libraries and School Libraries.—(i) *New South Wales.* Children's libraries are being developed as departments of municipal and shire libraries. The Education Department maintains a school library service for the fostering of State school libraries, which are maintained partly by parents' and citizens' associations and partly by departmental subsidy. Secondary and central schools have trained teacher librarians.

(ii) *Victoria.* Under the auspices of the Free Library Service Board, 89 municipal children's libraries have been, or are being, established as part of the library services provided by the councils concerned. All these libraries provide comprehensive modern

children's book collections which are constantly being refreshed. An annual grant of £5,000, which is additional to the ordinary annual municipal library grant, is provided to assist these libraries. In addition, seven independently controlled children's libraries shared in this grant in 1958.

The Education Department is making provision for the building of library rooms in new schools. Where accommodation is available in existing schools, library furniture is provided free of cost to the schools and the government subsidises the purchase of books. In December, 1958, 315 schools had central libraries.

A scheme of circulating libraries for small schools, particularly in remote areas, has been operating for some years. Three hundred and fifty schools benefited from this scheme in 1958.

The Department has a Library Service Officer with a small staff to advise and assist schools in the establishment and organization of libraries. A one-year course for the training of teacher-librarians was established at Melbourne Teachers' College in 1955. Approximately 20 teachers are trained each year.

(iii) *Queensland.* The Library Board of Queensland stresses to local bodies the importance of providing adequate library services for children. There are in Queensland 10 libraries free to children, of which 9 are conducted by the Brisbane City Council. The children's libraries at Rockhampton, Toowoomba, and Townsville are particularly active. Country children who are not catered for locally may borrow from the Country Extension Service which possesses a separate children's collection. The purchase of books in State school libraries in Queensland is financed by school committees and parents' associations, with a subsidy from the Department of Education on a £1 for £1 basis. Trainees at the Teachers Training College are instructed in school library organization and management.

(iv) *South Australia.* A Children's Library of 19,000 volumes is used by school classes and individual children living in the metropolitan area. Except for works of reference, all books are available for loan. In August, 1957, a Youth Lending Service was opened for young people from 13 to 18 years of age. It has a stock of 6,400 volumes.

(v) *Western Australia.* The State Education Department makes library subsidies and grants to government schools.

All high schools are provided with a library room and furniture, and trained teacher-librarians are appointed to them. Building plans do not provide for primary school libraries, but a number of the schools have set up central libraries when rooms have become available.

One-teacher and two-teacher schools are served by the Charles Hadley travelling library and the Small Schools Fixed Library services. Under the Fixed Library Scheme, permanent libraries of reference books and encyclopaedias were placed in each such school. Books to the value of £15 were added to each of these libraries annually from 1948 to 1954. Since then, the grant for these books is made at three year intervals. The Hadley library provides recreational reading and operates 340 boxes which are exchanged every three months. The government grants £500 per annum for this service, and the participating schools contribute the commission received from the Commonwealth Savings Bank—about £170.

Children in isolated areas who are unable to attend school are catered for by books sent out by the State Correspondence School's Library. The children are kept in touch with the library by means of radio talks and leaflets issued periodically.

(vi) *Tasmania.* The Lady Clark Memorial Children's Libraries, at the State Library, Hobart, aim to serve all children in Tasmania with books. At 30th June, 1958, 198 children's libraries and depots had been established.

Practically all State secondary schools in Tasmania have libraries, with full-time librarians in four of them. A Schools' Library Service gives a book service to schools and assists schools wishing to set up their own libraries. In 1958, the number of schools receiving service was 107 and the number of books issued was 10,871.

6. *Special Libraries.*—Before the 1939–45 War, the number of special libraries, apart from those maintained by government departments, was small, but during recent years, many manufacturing, commercial, research and other firms, as well as statutory bodies have found it necessary to establish special libraries to serve their staff. These libraries, which are most numerous in Sydney and Melbourne, are being administered increasingly by trained librarians.

7. **Microfilms.**—The following libraries supply microfilm or photostat copies of material usually at a small charge (the letter "P" signifies photostat supplied and "M" microfilm supplied):—*Australian Capital Territory*—Australian War Memorial (P), Commonwealth National Library (PM), C.S.I.R.O. (M), Australian National University (M), Patent Office (P); *New South Wales*—Metropolitan Water, Sewerage and Drainage Board (P), Public Library of New South Wales (M), Standards Association of Australia (P), School of Public Health and Tropical Medicine (M), Fisher Library, University of Sydney (PM); *Victoria*—Commonwealth Serum Laboratories (P), Technical Information Section, Munitions Supply Laboratories (PM), Public Library of Victoria (M), Standards Association of Australia (Melbourne Branch) (P), University of Melbourne (PM), C.S.I.R.O. (M); *Queensland*—Public Library (P); *South Australia*—Public Library of South Australia (PM), University of Adelaide (PM), Waite Agricultural Research Institute (P); *Western Australia*—State Library (PM); *Tasmania*—University of Tasmania (PM).

§ 12. Public Museums.

(i) *New South Wales.* The Australian Museum in Sydney, founded in 1836, is the oldest in Australia. In addition to possessing fine collections of Australian fauna, the museum contains valuable anthropological and mineral collections. The number of visitors to the institution during 1957–58 was 300,700 and the average attendance on week-days 742 and on Sundays, 1,317. The expenditure for 1957–58 amounted to £80,894. A valuable library containing 32,000 volumes is attached to the museum. Courses of evening popular lectures are delivered and lecturers also visit distant suburbs and country districts, and afternoon lectures for school children are provided; 13,810 children attended during 1957–58. Representative collections illustrative of the natural wealth of the country are to be found in the Agricultural and Forestry Museum and the Mining and Geological Museum. The latter institution prepares collections of specimens to be used as teaching aids to country schools. The "Nicholson" Museum of Antiquities, the "Macleay" Museum of Natural History and the Museum of Normal and Morbid Anatomy attached to the University of Sydney, and the National Herbarium and Botanical Museum at the Sydney Botanic Gardens, are all accessible to the public.

There is a Museum of Applied Arts and Sciences in Sydney with branches in three country centres. Valuable research work is being performed by the scientific staff in connexion with oil and other products of the eucalyptus and the gums, kinos, tanning materials, and other economic products of native vegetation generally. Expenditure during the year 1957–58 was £51,451.

(ii) *Victoria.* The National Museum at Melbourne, devoted to natural history, geology and ethnology is in the eastern section of the Public Library Building. The Museum of Applied Science, also housed under the same roof, contained at 30th June, 1958, 24,300 exhibits which covered applied and economic aspects of all branches of science. There is a fine Museum of Botany and Plant Products in the Melbourne Botanic Gardens. In addition to the large collection in the geological museum attached to the Mines Department in Melbourne, well-equipped museums of mining and geological specimens are established in connexion with the School of Mines in the chief mining districts.

(iii) *Queensland.* The Queensland Museum, founded in 1855, is the State museum of natural science. It is a Government sub-department and is maintained by the State. The collections comprise extensive exhibited and reference series, mainly in the fields of zoology, geology, and ethnology, and some mechanical and historical material is held with a view to future museum development. Lessons supported by film displays are arranged for the public and an annual refresher course in natural science is conducted for teachers. The museum is now the recognized State depository for valuable material in natural science, and the collections in general are constantly being increased. In addition, the Museum contains the outstanding library of the State in the fields of zoology, geology and anthropology.

(iv) *South Australia.* The South Australian Museum has considerable collections of most branches of natural history. In 1958–59, there were at least 200,000 visitors and expenditure was £50,224.

(v) *Western Australia.* The Western Australian Museum was established in 1895. It is under the statutory management of a board of five members, appointed by the State Government, but operates under its own director and staff. It is primarily a museum of natural history, with principal research interests in the fauna of Western Australia and the ethnology of the Western Australian aboriginal and has extensive geological collections and also historical and technological exhibits.

The Education Department of Western Australia has two teachers attached to the Museum. One gives instruction to visiting classes from schools in the metropolitan area and 2,735 children attended these classes during 1959. The other acts in an advisory capacity to teachers in country schools.

(vi) *Tasmania.* There are two museums in Tasmania—the Tasmanian Museum at Hobart, and the Victoria Museum and Art Gallery at Launceston—both of which contain valuable collections of botanical, mineral and miscellaneous products. The museum received aid from the Government during 1957–58 to the extent of £26,100.

§ 13. Public Art Galleries.

(i) *New South Wales.* The National Art Gallery of New South Wales originated in the Academy of Art founded in 1871. At the end of 1958, its contents comprised 1,456 oil paintings, 925 water colours, 2,423 prints and drawings, 291 sculptures and casts, and 1,330 ceramics, works in metal and miscellaneous. Since 1895, loan collections of pictures have been exhibited regularly in important country towns. The expenditure for 1957–58 was £42,010.

(ii) *Victoria.* The National Gallery at Melbourne at 30th June, 1958, contained 1,208 oil paintings, 7,678 objects of statuary, bronzes, ceramics, etc., and 8,144 water colour drawings, engravings and photographs. The Gallery is situated in the same building as the Museum and Public Library. Expenditure allocated to the National Gallery in 1957–58 was £67,529, including £3,413 for purchases of works of art. Several bequests have been made to the institution by private citizens. There are provincial art galleries at Ballarat, Bendigo, Castlemaine, Geelong, Mildura, Shepparton, St. Arnaud and Warrnambool, to which, periodically, pictures are sent on loan from the National Gallery.

(iii) *Queensland.* The Queensland Art Gallery, maintained by the State Government, was established in 1895.

During 1959, the Government passed a new Queensland Art Gallery Act re-organizing the gallery, appointing a new Board of Trustees and granting a site for the building of a new Art Gallery.

Within recent years, gifts and bequests have enriched the gallery. In 1959, an anonymous gift of £126,000 was presented. The collection comprises 464 oils, 610 watercolours and drawings, 63 sculptures and 146 art objects.

(iv) *South Australia.* The National Gallery at Adelaide originated in an exhibition of pictures in the Public Library Building in 1881. Many bequests made by private citizens have materially assisted its growth. At 30th June, 1959, there were in the Gallery 1,839 paintings in oil, water colours and pastels, 131 items of statuary and large collections of drawings, prints, furniture, ceramics and coins. The expenditure during 1958–59 was £22,563.

(v) *Western Australia.* The Art Gallery of Western Australia was established in 1895. Although under the statutory management of a board of five members, appointed by the State Government, it functions under its own director and staff. At 30th June, 1959, the collection included 352 oil paintings, 176 water colours, 10 pastels, 789 drawings, 515 prints, 9 miniatures and 20 pieces of sculpture. International and interstate exhibitions are frequently held and travelling exhibitions are sent to country centres.

(vi) *Tasmania.* In Tasmania, the Art Gallery at Hobart was opened in 1887. In June, 1958, it contained 185 oil paintings, 181 water colours, 127 black and white, three statuary and 146 etchings, engravings, etc. Expenditure in 1957–58 was £22,287.

The Art Gallery at Launceston was opened in 1891. Only a small proportion of the contents belongs to the gallery, the majority of the pictures being obtained on loan. In June, 1958, there were on view 224 oil paintings, 122 water colours, 72 black and white, and 117 miscellaneous exhibits. Expenditure in 1957–58 was £11,743.

§ 14. Scientific Societies.

1. **Royal Societies.**—The following table contains the latest available statistical information regarding the Royal Society in each State, the headquarters of which are in the capital cities.

ROYAL SOCIETIES.

Particulars.	Sydney.	Mel- bourne.	Bris- bane.	Ade- laide.	Perth.	Hobart.	Can- berra.
Year ended—	Feb. 1959.	Dec. 1959.	Dec. 1959.	Sept. 1959.	Dec. 1958.	Dec. 1959.	Dec. 1958.
Year of foundation	1866	1854	1884	1880	1914	1843	1930
Number of members	319	351	259	171	195	518	180
Volumes of transactions issued	92	(a) 950	70	82	41	93	..
Number of books in library	40,500	25,000	54,305	21,500	5,600	32,200	..
Societies on exchange list	381	320	336	246	214	300	..
Income	£ 3,150	4,437	818	2,831	(b) 776	1,647	107
Expenditure	£ 3,056	4,385	1,029	3,175	(b) 577	1,600	89

(a) Proceedings.

(b) 30th June, 1958.

2. **Australian Academy of Science.**—The Australian Academy of Science was founded in 1954 to promote scientific knowledge, to maintain standards of scientific endeavour and achievement in the natural sciences in Australia, and to represent Australian science at national and international level. These objectives it shares with the Royal Society of London and with the national academies of science of most other countries.

Prior to 1954 Australian science had been represented in international activities by the Australian National Research Council.

During the Royal Visit, Her Majesty Queen Elizabeth II was graciously pleased to present her Charter to the provisional Council of the Academy at a simple ceremony at Government House, Canberra, on 16th February, 1954, thus following the precedent of King Charles II who presented his Charter to the Royal Society of London in 1662.

Six Fellows, distinguished for their achievements in the natural sciences, are elected annually. The total Fellowship is now 85.

The affairs of the Academy are managed by an elected Council consisting of the President, the Treasurer, two Secretaries (one representing the Physical and the other the Biological Sciences) and eight other members. The Assistant Secretary (who must not be a Fellow) is the Academy's salaried administrative officer.

The headquarters of the Academy is situated in Gordon Street, Canberra City. This building, which is of unconventional design, houses the offices of the Academy and provides a conference centre of international standard for scientific and other meetings.

3. **The Australian and New Zealand Association for the Advancement of Science.**—This association was founded in 1887. Its headquarters are at Science House, Gloucester Street, Sydney, and congresses are held at intervals of approximately eighteen months in the various States and in the Dominion of New Zealand. The next congress is scheduled to take place in Brisbane in May, 1961.

4. **Other Scientific Bodies.**—A number of scientific bodies have been set up by the Commonwealth Government. These are the Commonwealth Scientific and Industrial Research Organization, the Commonwealth Observatory (which has now been incorporated in the Australian National University), the Ionospheric Prediction Service, and the Atomic Energy Commission. Particulars concerning these bodies may be found in Chapter XXX.—Miscellaneous.

The Linnean Society of New South Wales, with head-quarters in Sydney, was founded in 1874. Sir William Macleay, who died in 1891, during his lifetime and by his will endowed the Society to the amount of £67,000, which has been increased by investment to approximately £100,000. The Society offers annually to graduates of the University of Sydney who are members of the Society and resident in New South Wales, research fellowships (Linnean Macleay Fellowships) in various branches of natural history. One fellowship

was awarded in 1959. The library comprises some 19,000 volumes. Eighty-four volumes of proceedings have been issued, and the Society exchanges with about 300 kindred institutions and universities throughout the world. The membership at the end of 1959 was 260.

The British Astronomical Society has a branch in Sydney, and in each of the States there is a branch of the British Medical Association.

In addition to the societies enumerated above, there are various others in each State devoted to branches of scientific investigation.

§ 15. State Government Expenditure on Education, Science and Art.

The expenditure by each State Government on education, science and art during the year 1957–58 is shown in the following table. Owing to the details not being available in all States, the figures exclude officers' pensions and superannuation, pay-roll tax, and interest and sinking fund on capital expended on buildings. The cost of the medical and dental inspection of school children is also excluded, as this service is more appropriately classified under public health.

STATE EXPENDITURE ON EDUCATION, SCIENCE AND ART, 1957-58.
(£'000.)

State.	Expenditure from—				Receipts.	Net Expenditure.
	Revenue.	Loan.	Other Funds.	Total.		
New South Wales ..	41,196	9,227	..	50,423	941	49,482
Victoria ..	29,073	7,844	..	36,917	375	36,542

Total ..	106,016	24,801	590	131,407	2,813	128,594

CHAPTER XVI.

PUBLIC JUSTICE.

NOTE.—In interpreting statistics of public justice, it should be realized that a number of factors affect comparability from State to State and from year to year, e.g.:

- (a) Differences in the jurisdiction of courts;
- (b) Changes in the law in particular States and differences in the laws between States;
- (c) The methods of compilation of the figures (e.g. *see* footnotes to the tables dealing with convictions);
- (d) The attitude to laws such as those connected with liquor, vagrancy, gaming, and traffic offences;
- (e) The strength and distribution of the police force;
- (f) The proportion of various types of crimes reported and solved.

§ 1. The Australian Legal System.

1. **General.**—Australia, being a federation, has two systems of courts—State and federal. The only federal courts are the High Court of Australia, the Federal Court of Bankruptcy and the Commonwealth Industrial Court. Otherwise, federal jurisdiction is vested in the State courts.

Thus, while the High Court has extensive original jurisdiction, most civil cases involving federal jurisdiction are heard in the State courts. Almost all criminal matters involving federal jurisdiction are tried in State courts. In the tables in this chapter which give statistics of proceedings in State courts, no distinction has been drawn between State cases proper and cases where State courts are exercising federal jurisdiction.

2. **State Courts.**—(i) *Civil jurisdiction.* Lower courts (which term includes, for the purposes of this chapter, Magistrates' Courts, Courts of Petty Sessions, and Small Debts Courts) are presided over by a stipendiary or police magistrate. In some limited instances, justices of the peace may exercise the jurisdiction of the court. The powers of the magistrates in the various States and Territories are set out in § 2 below. In most cases, unless the amount involved is very small, appeal may be made to a higher court against a magistrate's decision. In any case, the Supreme Court has a supervisory power, by means of prerogative writs, to examine whether a lower court has properly exercised its jurisdiction.

In the higher courts (which term includes, for the purposes of this chapter, District Courts, County Courts, and the Supreme Courts), actions are usually tried by a single judge, sitting with or without a jury, from whose judgment appeal lies to the bench of the Supreme Court. In certain cases, the appeal can be carried to the High Court of Australia. Appeals to the Privy Council are discussed below.

(ii) *Criminal jurisdiction.*—Criminal courts are of two kinds, namely, courts of summary jurisdiction, usually called Courts of Petty Sessions, which may deal summarily with minor offences, and higher courts, known as Courts of Sessions, Quarter Sessions or General Sessions, and the Supreme Court, which hear indictable offences. A court of summary jurisdiction consists of a stipendiary or police magistrate, or two or more justices of the peace; a higher court consists of a judge or chairman, sitting with a jury. The jury finds as to the facts of the case and the judge determines the applicable law.

In the case of other than minor offences, a preliminary hearing is held before a stipendiary magistrate or justice of the peace for the purpose of determining whether a *prima facie* case has been made out. If the magistrate or justice of the peace finds that there is a case to answer, the person charged is committed for trial at a higher court. A magistrate or justice of the peace has power to release on bail.

There is an appeal to a higher court from the decision of a court of summary jurisdiction hearing a minor offence, and an appeal from a higher court to the full bench of the Supreme Court, or Court of Criminal Appeal. A further appeal may, with leave, be brought to the High Court of Australia.

3. **Federal Courts.**—The judicial power of the Commonwealth is vested in the High Court of Australia (the Federal Supreme Court), in the Federal courts created by Parliament (the Federal Court of Bankruptcy and the Commonwealth Industrial Court), and in the State courts invested by Parliament with Federal jurisdiction, both civil and criminal. Further particulars regarding the judicial power of the Commonwealth will be found in Chapter III. (§§ 71-73) of the Commonwealth Constitution (*see* p. 16 of this Year Book).

Particulars concerning the Federal Court of Bankruptcy and the High Court of Australia will be found in sections 4c and 5, respectively, of this chapter. Information regarding the Commonwealth Industrial Court, which was established under the Conciliation and Arbitration Act 1904-1958, will be found in Chapter XII.—Labour, Wages and Prices (p. 416).

4. **Appeal to the Privy Council.**—There is an appeal, by special leave of the Privy Council, from the High Court to the Privy Council. In certain important types of constitutional disputes, involving questions of the powers of the Commonwealth *vis-à-vis* the States, a certificate of the High Court in effect granting leave to appeal is necessary. There is also an appeal from the State Supreme Courts direct to the Privy Council.

§ 2. Lower (Magistrates') Courts.

A. POWERS OF THE MAGISTRATES.

1. **New South Wales.**—There is no general limit to the powers of the magistrates with regard to offences punishable summarily, their authority depending in each case on the statute which creates the offence and gives them jurisdiction. Except in the case of a very few statutes, and excluding cumulative sentences, the power of sentence is limited to twelve months. Imprisonment in default of fine is regulated by a scale limiting the maximum period according to the sum ordered to be paid, but in no case exceeding twelve months. Actions for debt and damage within certain limits also come within magisterial jurisdiction. In cases of liquidated debts, and damages whether liquidated or unliquidated, the amount is limited to £50 before a court constituted by a stipendiary magistrate. Magistrates have power to entertain claims of up to £250 under the Hire Purchase Agreements Acts. The amount in actions of debt before two or more justices of the peace is limited to £30 and in actions of damage it is limited to £10, but may extend to £30 with the consent of the defendant. Outside the Metropolitan Area of Sydney and certain other prescribed districts, one justice of the peace may hear cases of debt, liquidated or unliquidated, or damage up to £5 or to £30 by consent of parties.

2. **Victoria.**—The civil jurisdiction of magistrates is restricted to what may be designated ordinary debts, damages for assault, restitution of goods, etc., where the amount in dispute does not exceed £100, and to actions arising out of torts or contracts to the extent of £250. No definite limit is fixed to the powers of the magistrates on the criminal side, and for some offences, sentences of up to two years' imprisonment may be imposed. The proportion of long sentences is, however, comparatively small.

3. **Queensland.**—Generally speaking, the maximum term of imprisonment which justices can impose is six months, but in certain exceptional cases, such as offences against sections 233, 344 and 445 of the Criminal Code (betting houses, aggravated assaults, and unlawfully using animals), sentences of twelve months may be imposed.

There is provision for applying cumulative sentences, but in practice not more than one sentence is generally made cumulative on a previous sentence.

4. South Australia.—The power of special magistrates to impose fines and imprisonment is defined by the special Act creating the offence and conferring jurisdiction. In the case of minor indictable offences which are tried summarily, a maximum penalty of £100 fine or two years' imprisonment is fixed by the Justices Act 1921–1957. Magistrates also have power to hear certain civil actions in which the amount claimed is less than £1,250.

5. Western Australia.—The powers of magistrates and justices with regard to offences which are tried summarily are governed by the Act creating the offence and giving them jurisdiction. Imprisonment in default of payment of a fine is regulated by a scale limiting the period according to the amount of the fine but not to exceed six months.

The civil jurisdiction of Local Courts is restricted in general to £500. By consent of the parties, any action that might be brought in the Supreme Court may be dealt with in a Local Court. Justices may act in the case of illness or absence of the magistrate.

Magistrates are coroners and justices may be appointed as acting coroners.

Magistrates have appellate jurisdiction under some statutes and in country districts act as Chairmen of the Courts of Session. They may be appointed as Commissioners of the Supreme Court. On the goldfields, the magistrate is also the warden.

6. Tasmania.—Magistrates are empowered to hear and determine in Courts of Petty Sessions all offences when an enactment expressly or by implication provides that the matter is to be determined summarily, or by or before justices, or that any offence is to be punishable upon summary conviction. In addition, stealing and analogous crimes may be heard and determined summarily on the election of the person charged, when the amount involved does not exceed £100.

No general limit is fixed in respect of sentences, the statute creating the offence almost invariably laying down the penalty. Where this is not the case, the Contravention of Statutes Act 1889 provides that a fine of £50 may be imposed. Sentences of imprisonment which justices may impose vary with the nature of the offence, with a maximum of two years. The aggregate of terms of cumulative sentences may not exceed two years.

The civil jurisdiction of magistrates is divided into two categories. A Commissioner of the Court of Requests, provided he is a legal practitioner, may hear actions for the recovery of debts and damages not exceeding £250. As Commissioners are invariably police magistrates, this jurisdiction is State-wide. Courts of General Sessions, constituted by at least two justices, exercise similar powers, but the jurisdiction cannot exceed £50. Only one court, that at Currie, King Island, has the maximum jurisdiction, the others being limited to £30.

7. Northern Territory. Magistrates constituting courts of summary jurisdiction try offences punishable summarily. The punishment that may be imposed depends on the law creating the offence. Where there is no magistrate available the offence may be tried by two or more justices of the peace or, if all parties consent, by one justice. Proceedings for committal on indictable offences may be heard by either a magistrate or a justice of the peace. Certain minor indictable offences may be tried summarily by a magistrate or two justices of the peace who may impose a fine up to £100 or two years' imprisonment.

A stipendiary magistrate constituting a local court has a civil jurisdiction to hear and determine claims for not more than £1,000. A local court constituted by two justices of the peace has a civil jurisdiction to hear claims up to £50.

8. Australian Capital Territory. Magistrates have jurisdiction to try an offence which is punishable summarily and also where a person is made liable to a penalty or punishment and no other provision is made for trial. The punishment depends upon the statute which creates the offence. Certain indictable offences of a less serious nature may be tried summarily by a magistrate, who may impose a fine of £50 or imprisonment for one year. Magistrates also hear proceedings for committal on indictable offences. The stipendiary magistrate is also the coroner. In civil proceedings, magistrates try actions for amounts up to £200. Justices of the peace have no judicial functions.

B. CRIMINAL PROCEEDINGS.

1. **Cases Tried.**—The total numbers of cases tried at magistrates' courts in each State for the years 1954 to 1958 are shown in the following table:—

CASES TRIED AT MAGISTRATES' COURTS.

State or Territory.	1954.	1955.	1956.	1957.	1958.
New South Wales (a) ..	271,105	254,487	271,172	307,824	323,097
Victoria	135,409	149,296	175,899	224,015	270,017
Queensland(b) ..	46,482	49,372	47,072	53,611	62,468
South Australia(b) ..	28,757	32,593	31,799	34,399	36,305
Western Australia ..	50,640	67,739	(c) 62,753	(c) 59,205	(c) 49,945
Tasmania	19,814	19,672	19,274	19,120	20,009
Northern Territory ..	(b) 2,077	(b) 2,105	(b) 2,779	(b) 2,615	3,103
Australian Capital Territory	1,406	1,480	1,564	1,875	2,197
Australia	555,690	576,744	612,312	702,664	767,141

(a) In addition the following numbers of minor traffic offences were settled by payment of fines to the Police Department, without court appearances: 1954—23,177; 1955—61,179; 1956—163,921; 1957—237,811; 1958—315,058. (b) Twelve months ended 30th June of year shown. (c) In addition the following numbers of fines for minor traffic offences were paid to Crown Law Departments: 1956—32,130; 1957—31,405; 1958—36,999.

2. **Convictions at Magistrates' Courts.**—Of the persons who appeared before Magistrates' Courts in 1958, the following table shows the number who were convicted in each State.

CONVICTIONS AT MAGISTRATES' COURTS, 1958.

Class of Offence.	N.S.W.	Vic.	Qld. (a)(b)	S.A. (a)	W.A.	Tas.	N.T.	A.C.T.	Aust.
Against the Person ..	3,701	1,568	470	313	470	284	84	118	7,008
Against Property ..	23,921	9,509	3,831	2,021	5,546	1,379	112	239	46,558
Forgery and Offences against the Currency ..	338	55	4	4	..	3	13	(c)	413
Against Good Order ..	100,590	38,887	31,050	5,680	6,594	1,670	1,736	472	186,679
Other	165,990	201,046	25,241	24,603	34,427	13,880	770	1,081	467,038
Total	294,540	251,065	60,592	32,621	47,037	17,216	2,715	1,910	707,696

(a) Year ended 30th June. (b) A person convicted on several counts at the one hearing is included only once, but if a person has been convicted at different hearings during the year, whether for the same or for a different type of offence, the results of all hearings are recorded separately. (c) Included in offences against property.

The following table shows the number of convictions in each year from 1954 to 1958:—

CONVICTIONS AT MAGISTRATES' COURTS.

State or Territory.	1954.	1955.	1956.	1957.	1958.
New South Wales (a) ..	250,019	233,777	249,131	282,489	294,540
Victoria	121,919	133,575	158,869	208,125	251,065
Queensland(b)(c) ..	42,590	46,242	45,711	52,113	60,592
South Australia(b) ..	25,482	29,264	28,221	30,658	32,621
Western Australia ..	48,005	65,118	(d) 59,883	(d) 56,297	(d) 47,037
Tasmania	17,299	17,314	17,029	17,040	17,216
Northern Territory ..	(b) 1,915	(b) 1,864	(b) 2,444	(b) 2,340	2,715
Australian Capital Territory ..	1,128	1,285	1,209	1,597	1,910
Australia	508,357	528,439	562,497	650,659	707,696

(a) See footnote (a) to table in para. 1 above. (b) Twelve months ended 30th June of year shown. (c) A person convicted on several counts at the one hearing is included only once, but if a person has been convicted at different hearings during the year, whether for the same or for a different type of offence the results of all hearings are recorded separately. (d) See footnote (c) to table in para. 1 above.

3. **Convictions for Serious Crime at Magistrates' Courts.**—(i) *General.* The figures given in the preceding tables refer to all convictions, and include offences of a technical nature, drunkenness, and minor breaches of good order which come under the heading of crime in a very different sense from the more serious offences. The following table has therefore been prepared to show convictions at Magistrates' Courts for what may be regarded as the more serious offences, i.e. offences against the person, offences against property, forgery and offences against the currency.

(ii) *Number and Rates.* The following table shows the number of convictions for serious crime at Magistrates' Courts for the years 1954 to 1958:—

CONVICTIONS FOR SERIOUS(a) CRIME AT MAGISTRATES' COURTS.

State or Territory.	1954.	1955.	1956.	1957.	1958.
New South Wales	17,085	19,803	21,399	23,510	27,960
Victoria	7,471	7,318	8,504	8,926	11,132
Queensland(b)(c)	3,226	3,546	3,942	4,079	4,301
South Australia(b)	1,744	1,867	1,889	2,298	2,338
Western Australia	4,241	4,368	5,289	5,205	6,016
Tasmania	898	1,127	1,176	1,738	1,666
Northern Territory	(b) 195	(b) 177	(b) 115	(b) 247	209
Australian Capital Territory	231	138	102	295	357
Australia	35,091	38,344	42,416	46,298	53,979

(a) Offences against the person, offences against property, forgery and offences against the currency.
 (b) Twelve months ended 30th June of year shown. (c) A person convicted on several counts at the one hearing is included only once, but if a person has been convicted at different hearings during the year, whether for the same or for a different type of offence, the results of all hearings are recorded separately.

The number of convictions for serious crime at Magistrates' Courts per 10,000 of population for the same series of years is shown in the following table:—

CONVICTIONS FOR SERIOUS CRIME AT MAGISTRATES' COURTS.

(PER 10,000 OF POPULATION.)

State or Territory.	1954.	1955.	1956.	1957.	1958.
New South Wales	49.8	56.7	60.2	64.9	75.7
Victoria	30.5	29.0	32.7	33.4	40.6
Queensland(a)	24.8	26.8	29.1	29.5	30.2
South Australia(a)	22.2	23.1	22.6	26.7	25.7
Western Australia	66.3	66.3	78.1	75.2	85.3
Tasmania	28.9	35.6	36.5	52.6	49.3
Northern Territory	(a) 122.4	(a) 107.0	(a) 65.8	(a) 134.7	108.7
Australian Capital Territory ..	76.0	42.6	49.4	78.3	90.9
Australia	39.1	41.8	45.1	48.1	54.7

(a) Twelve months ended 30th June of year shown.

(iii) *Rate of Convictions 1881 to 1951.* The rate of convictions at ten-year intervals over a period of 70 years is shown below.

**RATE OF CONVICTIONS FOR SERIOUS CRIME AT MAGISTRATES' COURTS:
AUSTRALIA.**

Year	1881.	1891.	1901.	1911.	1921.	1931.	1941.	1951.
Convictions per 10,000 persons. .	69.3	44.8	29.1	24.6	29.2	37.1	33.6	37.1

4. **Committals to Higher Courts.**—(i) *Number of Committals.* The following table shows the number of offences, classified according to the nature of the offence, for which persons appearing in the lower courts were committed to higher courts for each State and Territory for the year 1958:—

COMMITTALS TO HIGHER COURTS, 1958.

Class of Offence.	N.S.W.	Vic.	Q'land. (a)(b)	S. Aust. (a)	W.Aust.	Tas.	N.T.	A.C.T.	Aus- tralia.
Against the Person ..	1,374	789	227	193	86	48	32	12	2,761
Against Property ..	5,523	2,830	675	266	339	455	24	61	10,173
Forgery and Offences against the Currency ..	95	201	4	23	13	70	3	1	410
Against Good Order ..	79	63	3	7	8	7	3	..	170
Other ..	256	344	2	16	17	20	4	..	659
Total ..	7,327	4,227	911	505	463	600	66	74	14,173

(a) Twelve months ended 30th June of year shown. (b) A person convicted on several counts at the one hearing is included only once, but if a person has been convicted at different hearings during the year, whether for the same or for a different type of offence, the results of all hearings are recorded separately.

The following table shows the number of committals to higher courts for each of the years 1954 to 1958:—

COMMITTALS TO HIGHER COURTS.

State or Territory.	1954.	1955.	1956.	1957.	1958.
New South Wales ..	4,205	4,792	6,056	7,221	7,327
Victoria ..	2,082	2,198	2,624	2,707	4,227
Queensland(a) ..	609	482	572	712	911
South Australia(a) ..	422	426	432	552	505
Western Australia ..	381	454	386	356	463
Tasmania ..	357	348	321	604	600
Northern Territory ..	(a) 46	(a) 45	(a) 87	(a) 62	66
Australian Capital Territory ..	23	25	40	37	74
Australia ..	8,125	8,770	10,518	12,251	14,173

(a) Twelve months ended 30th June of year shown.

(ii) *Rate of Committals, 1881 to 1951.* The rate of committals to higher courts for serious crime at ten-year intervals since 1881 is shown below:—

RATE OF COMMITTALS TO HIGHER COURTS, AUSTRALIA.

Year ..	1881.	1891.	1901.	1911.	1921.	1931.	1941.	1951.
Committals per 10,000 persons ..	12	11	8	6	7	8	5	8

5. **Drunkenness.**—(i) *Cases and Convictions.* The numbers of arrests for drunkenness and the convictions recorded during each of the years 1954 to 1958 are given in the following table:—

DRUNKENNESS: CASES AND CONVICTIONS.

State or Territory.	1954.	1955.	1956.	1957.	1958.
CASES.					
New South Wales ..	72,591	81,199	77,867	76,700	69,085
Victoria ..	20,167	20,685	20,457	25,657	29,752
Queensland(a) ..	21,257	23,986	22,748	23,550	28,242
South Australia(a) ..	5,530	4,772	4,739	5,030	4,312
Western Australia ..	5,850	5,752	5,959	5,484	4,870

Australia ..	127,178	137,888	133,261	138,624	138,361

(a) Twelve months ended 30th June of year shown.

DRUNKENNESS: CASES AND CONVICTIONS—*continued.*

State or Territory.	1954.	1955.	1956.	1957.	1958.
CONVICTIONS.					
New South Wales	72,541	80,457	77,195	75,953	68,354
Victoria	19,955	20,437	20,184	25,284	29,434
Queensland(a)	21,199	23,947	22,687	23,521	28,196
South Australia(a)	5,509	4,765	4,732	5,019	4,299
Western Australia	5,809	5,720	5,912	5,428	4,821
Tasmania	798	757	674	760	718
Northern Territory	(a) 699	(a) 474	(a) 502	(a) 1,029	926
Australian Capital Territory	240	231	271	322	380
Australia	126,750	136,788	132,157	137,316	137,128

(a) Twelve months ended 30th June of year shown.

The term "drunkenness" includes drunkenness and disorderliness, and habitual drunkenness.

(ii) *Convictions per 10,000 of Population.* In the twenties, the convictions for drunkenness averaged approximately 100 per 10,000 of population, but the rate fell away considerably during 1930 and 1931, being only 57.1 in the latter year. The average then rose steadily, the annual average for the period 1936 to 1939 being 82.7 and that for the years 1940 to 1945, 90.8. In 1946, the convictions per 10,000 rose very steeply to 132.1, increasing further to 174.5 by 1951, since when they have declined again to 138.9 in 1958.

The rates of convictions for drunkenness since 1954 are shown in the following table:—

CONVICTIONS FOR DRUNKENNESS.
(PER 10,000 OF POPULATION.)

State or Territory.	1954.	1955.	1956.	1957.	1958.
New South Wales	211.6	230.4	217.1	209.7	185.1
Victoria	81.3	80.9	77.5	94.6	107.4
Queensland(a)	163.0	180.7	167.7	170.4	200.9
South Australia(a)	70.1	59.0	56.7	58.3	48.5
Western Australia	90.7	86.8	87.3	79.5	68.3
Tasmania	25.6	23.9	20.9	23.0	21.3
Northern Territory	(a)438.8	(a)286.6	(a)287.3	(a)555.8	481.6
Australian Capital Territory	79.0	71.3	78.1	85.6	88.5
Australia	141.4	149.1	140.6	142.8	138.9

(a) Twelve months ended 30th June of year shown.

(iii) *Consumption of Intoxicants.* The following table shows the consumption of spirits, wine and beer per head of population in Australia during the years 1954–55 to 1958–59:—

CONSUMPTION OF INTOXICANTS IN AUSTRALIA PER HEAD OF POPULATION.

Year.	Spirits.	Wine.	Beer.
	Proof Gals.	Gals.	Gals.
1954–55	0.29	1.11	24.26
1955–56	0.31	1.11	24.16
1956–57	0.28	1.15	22.88
1957–58	0.28	1.14	23.00
1958–59	0.30	1.14	22.17

(iv) *Remedial Treatment of Drunkenness.* Legislation has been passed in each State providing for the committal of inebriates to special government institutions. The laws in the various States are as follows:—New South Wales, Inebriates Act, 1912–1949; Victoria, Inebriates Act 1958; Queensland, Inebriate Institutions Act of 1896; South Australia, Inebriates Act, 1908–1934, Convicted Inebriates Act, 1913–1934; Western Australia, Inebriates Act, 1912–1919; Tasmania, Inebriates Act, 1885, Inebriate Hospitals Acts, 1892 and 1941; Northern Territory, the Inebriates Act, 1908, of South Australia; Australian Capital Territory, the Inebriates Act, 1900, of New South Wales as amended in 1909, and the Inebriates Ordinance 1938 of the Australian Capital Territory. In New South Wales, the care and treatment of inebriates other than those convicted of an offence are under the control of the Inspector-General of Mental Hospitals. In Victoria, a Psychiatric Clinic has been established at Pentridge Gaol and some remedial treatment is carried out there under the control of the Department of Mental Hygiene. It is proposed to add an alcoholics section to the Psychiatric Clinic in the near future. The Inebriates Home in Queensland is under the control of the Department of Health and Home Affairs. An alcoholism clinic was opened as an annexe to the Brisbane General Hospital in 1958 and in-patient and out-patient treatment is given there to voluntary patients. In Western Australia, the treatment of inebriates is under the control of the Inspector-General of Mental Health Services. In Tasmania, a charitable institution has been established by the Prisons Department, but treatment is purely custodial. A certain amount of remedial treatment is undertaken by the Director of Mental Health. Under an agreement between the Commonwealth and New South Wales and by virtue of the Insane Persons and Inebriates (Committal and Detention) Ordinance 1936–1937, inebriates committed to an institution from the Australian Capital Territory are placed in New South Wales institutions, where they are under the control of the appropriate New South Wales authorities and receive the same care and treatment as inebriates committed in the State.

6. *First Offenders.*—In all States, statutes dealing with first offenders have been in force for many years. Existing legislation is as follows:—New South Wales, Crimes Act, 1900–1955, First Offenders (Women) Act, 1919, amended in 1929; Victoria, Crimes Act 1958; Queensland, Criminal Code Acts, 1899 to 1945; South Australia, Offenders Probation Act, 1913–1953; Western Australia, Criminal Code Act, 1913–1956; Tasmania, Probation of Offenders Act, 1934; Northern Territory, the Offenders Probation Act, 1887, of South Australia; Australian Capital Territory, the Crimes Act, 1900, of New South Wales amended by Crimes Ordinances 1931, 1942, 1944 and 1951. Provisions similar to those of the First Offenders (Women) Act, 1919, of New South Wales have been incorporated in the Australian Capital Territory law by the First Offenders (Women) Ordinance 1947. In New South Wales, Queensland, South Australia, and Western Australia, the court may allow a first offender convicted of a minor offence to go free on recognizances being entered into for his good behaviour for a certain period. In Victoria, in accordance with the provisions of the Crimes Act 1958, and in Queensland, in accordance with the Offenders Probation and Parole Act of 1959, where any person is convicted by any court of any offence for which a term of imprisonment may be imposed (otherwise than in default of payment of a fine) and the court is of the opinion that, having regard to the circumstances, including the nature of the offence and the character and antecedents of the offender, it is expedient to do so, the court may, instead of sentencing him, make a probation order requiring him to be under the supervision of a probation officer for such period being not less than one year and not more than five years as is specified in the order. In Western Australia, the court may also dismiss the indictment or complaint without proceeding to conviction. In Tasmania, the court may discharge an offender on his recognizance, with or without sureties, to be of good behaviour and to appear for sentence when called upon at any time during the following three years. The offender may be placed under the supervision of a probation officer. In the Northern Territory, the court may suspend the sentence imposed on a first offender punishable on summary conviction, or by less than two years imprisonment, upon his entering into a recognizance to be of good behaviour for a certain period. In the Australian Capital Territory, the court may, without proceeding to a conviction, dismiss a charge in respect of an offence punishable summarily, or may discharge the person charged conditionally on his entering into a recognizance to be of good behaviour for a certain period. Alternatively, the court may suspend the sentence imposed on a first offender upon his entering into a recognizance to be of good behaviour for a certain period.

C. CIVIL PROCEEDINGS.

The total numbers of complaints entered and the amounts awarded to plaintiffs during 1958 are shown in the following table. The figures are compiled from returns from the Small Debts Courts in New South Wales, Courts of Petty Sessions in Victoria, Magistrates' Courts in Queensland, Local Courts in South Australia and Western Australia, Courts of Requests in Tasmania, Courts of Summary Jurisdiction in the Northern Territory and the Court of Petty Sessions in the Australian Capital Territory.

(a) Twelve months ended 30th June, 1958.

§ 3. Children's Courts.

1. **New South Wales.**—Children's Courts, established in 1905, exercise jurisdiction under the Child Welfare Act, 1939–55. Where practicable, they are not held in ordinary court rooms, and persons not directly interested are excluded from any hearing in order that children may be protected against the adverse influences which they would encounter in ordinary courts.

The magistrates exercise all the powers of a Court of Petty Sessions in respect of offences committed by or against children under 18 years of age. They also exercise jurisdiction in respect of neglected and uncontrollable children. Their functions are reformative, not punitive; they may commit children to institutions, to the care of persons other than the parents, or to the care of the Minister for Education.

2. **Victoria.**—Under the Children's Court Act 1958, the jurisdiction of Children's Courts is restricted, with certain exceptions, to children up to 17 years of age. Two stipendiary special magistrates with jurisdiction throughout the State and, in addition, honorary special magistrates operate in some metropolitan courts and provincial cities. At country courts to which no special magistrates are appointed, the local stipendiary magistrate usually constitutes the bench. The Children's Court may deal with all offences except homicide. However, consent to the jurisdiction of the Children's Court must be indicated by the child (or by a parent if the child is under 14 years of age) before an indictable case may proceed.

The primary aim of the Children's Court is reformation and rehabilitation of the offender and the court is bound under Section 27(3) of the Children's Court Act 1958 to "firstly have regard to the welfare of the child".

The probation system has been in use by the Children's Court since 1907, and there are now in Victoria a large number of honorary probation officers as well as six stipendiary probation officers. Problem cases are referred by the Court for investigation to a Children's Court Clinic, which is staffed by psychiatrists, psychologists and social workers.

3. **Queensland.**—Children, under the age of 17 years, before the Court on summary charges are dealt with under the Children's Court Acts, 1907–1930, and the State Children Acts, 1911–1955. The Children's Court in the metropolitan area is presided over by a magistrate, and the services of the psychiatric clinic are available to him if he considers they are needed. Proceedings are held *in camera*. A non-commissioned police officer is present to offer any observations he considers necessary and to assist the magistrate. In country areas, the court is presided over by the local stipendiary magistrate or, in his absence, by two justices. If found guilty, a child may be either admonished, released on probation or committed to the care of the State Children Department or an institution. A conviction will not necessarily be recorded against him. His parent or guardian may be ordered to pay damages to the wronged party, and in default is liable to the same consequences as a defendant in an ordinary Court of Petty Sessions.

4. South Australia. Provision for the treatment of juvenile offenders under the age of 18 years is contained in various Acts, the main ones being the Maintenance Act, 1926–1952, the Juvenile Courts Act, 1941, the Justices Act, 1921–1957, and the Offenders Probation Act, 1913–1953. A Juvenile Court to hear cases of offences by children is constituted by a special magistrate or two justices of a Juvenile Court and it has power to determine all charges other than homicide. A child convicted of an offence punishable by imprisonment can be committed by a court only to a reformatory. For indictable offences, the penalty is committal to a reformatory or a fine of up to £50.

5. Western Australia. Children's Courts deal with offenders under the age of 18 years and to hear cases of certain offences against children. Special magistrates are appointed for Children's Courts, and the Governor may appoint other persons to be members of a particular Children's Court. One member may sit and adjudicate with the special magistrate, but in the magistrate's absence at least two members must be present.

A Children's Court is deemed to be a court of summary jurisdiction and may exercise exclusive jurisdiction in respect of all offences except wilful murder, murder, manslaughter or treason alleged to have been committed by children.

Adults charged with certain indictable offences against children may forgo the right to trial by jury and agree to be dealt with summarily by Children's Courts.

6. Tasmania. Under the provisions of the Infants' Welfare Act 1935, Children's Courts are established to deal with offenders under the age of 17 years. Special magistrates are appointed for the Children's Courts by the Governor. One or two special magistrates, or one or two justices, constitute a court.

A Children's Court is deemed to be a court of summary jurisdiction, and may exercise exclusive jurisdiction in respect of all offences alleged to have been committed by children.

7. Northern Territory. The Child Welfare Ordinance 1958 provides for the establishment of Children's Courts. These courts are constituted by a special magistrate and one member of the Child Welfare Council authorized to sit as a member of the Children's Court. Where no Children's Court has been established for a particular area, or where special circumstances require it, the jurisdiction of a Children's Court may be exercised by a court of summary jurisdiction constituted by a special magistrate.

Proceedings in a Children's Court are in form similar to proceedings in a court of summary jurisdiction, but no reports of proceedings may be published without the express authority of the Court, and any person not directly concerned may be excluded from the hearing.

A Children's Court has jurisdiction in respect of all offences committed by persons under 18 years of age in respect of which proceedings may be taken in a court of summary jurisdiction. In dealing with such offences, the Court may, in cases other than homicide, impose a fine not exceeding fifty pounds or a sentence of imprisonment for not more than six months, and, in addition to or in lieu of these punishments, may make an order committing the child to the care of the Director of Child Welfare or of a person who is willing to undertake the care on the Courts' terms and conditions (in which case the child may be declared a State child), or it may commit the child to an institution for a specified period or release the child on probation on such conditions as the Court orders. Children's Courts also exercise jurisdiction in respect of destitute, neglected, incorrigible or uncontrollable children.

8. Australian Capital Territory. The Child Welfare Ordinance 1957 provides that the Court of Petty Sessions constitutes the Children's Court when it is hearing proceedings involving persons under the age of 18 years. Its proceedings are similar to those of an ordinary Court of Petty Sessions except that persons not directly interested are excluded from the Court.

In addition to the power to deal with summary offences, the Children's Court has power to hear and determine summarily a charge for an indictable offence other than an offence punishable by death. In either case, the Court's powers include releasing an offender on probation, committing him to the care of a specified person, making him a government ward, or committing him to an institution for up to three years.

§ 4. Higher (Judges') Courts.

A. CRIMINAL PROCEEDINGS.

1. Persons Convicted at Higher Courts.—The following table shows for each State and Territory and for Australia as a whole the number of persons convicted at higher courts during 1958, classified according to the nature of the offence:—

PERSONS CONVICTED AT HIGHER COURTS, 1958.

Offence.	N.S.W.	Vic.	Q'land. (a)(b)	S. Aust.	W. Aus.	Tas. (c)	N.T.	A.C.T.	Aus- tralia.

Australian Capital Territory ..	8.6	6.2	11.5	8.5	18.7
Australia	4.1	4.2	4.8	5.6	6.1

(a) Twelve months ended 30th June of year shown. (b) A person convicted on several counts at the one hearing is included only once, but if a person has been convicted at different hearings during the year, whether for the same or for a different type of offence, the results of all hearings are recorded separately. (c) Convictions.

3. **Habitual Offenders.**—An account of the methods adopted in each State in connexion with habitual offenders is given in the following paragraphs.

(i) *New South Wales.* The Habitual Criminals Act, 1957 gives power to judges to declare as an habitual criminal any person of or above the age of 25 years who has been convicted on indictment and has on at least two occasions previously served separate terms of imprisonment as a consequence of convictions for indictable offences provided that such offences were not dealt with summarily without his consent. A person may also be pronounced by a Judge to be an habitual criminal upon recommendation by a Stipendiary Magistrate.

A judge, having pronounced a person to be an habitual criminal, shall sentence him to a term of imprisonment of not less than five years nor more than fourteen years.

An habitual criminal so sentenced may be considered for release on licence in the light of his conduct and attitude after he has served two-thirds of his sentence. He will, in any event, be granted a remission to permit his release on licence after five-sixths of his sentence, subject to good conduct and industry.

At 30th June, 1959, there were 101 prisoners detained in pursuance of the legislation.

(ii) *Victoria.* The Indeterminate Sentences provisions of the Crimes Act were abolished as from 1st July, 1957, with the proclamation of the Penal Reform Act 1956. The terms "reformatory prison" and "habitual criminal" also ceased to exist as from that date.

Under the Penal Reform Act 1956, a sentence of twelve months or more must contain provision for an offender's release on parole after he has served a minimum term which must be named. With sentences of under twelve months, the courts may fix a minimum term.

The relevant parts of the Penal Reform Act 1956 have now been embodied in Sections 506 to 542 of the Crimes Act 1958. In the case of the persistent offender, if the court is satisfied that it is expedient for the protection of the public that he should be detained in gaol for a substantial time, the court may pass a sentence of preventive detention for a term of not more than ten years and where any such sentence is passed shall fix a minimum term during which the offender shall not be eligible to be released on parole.

(iii) *Queensland.* Sections 659A to 659I of the Queensland Criminal Code deal with habitual criminals. Only the Supreme Court or a judge thereof may declare a person to be an habitual criminal. An habitual criminal is detained in a reformatory prison (Section 659D) and there employed (Section 659F).

Where the Supreme Court or a judge recommends the discharge of an habitual criminal, the Governor may direct his discharge and may order him so long as he remains in Queensland to report at intervals during any period not exceeding two years (Section 659G).

An habitual criminal may be released by order in writing (called a "parole order") by the Parole Board set up under the provisions of "The Offenders Probation and Parole Act of 1959" after he has been detained during a period of two years (Section 32).

(iv) *South Australia.* The Criminal Law Consolidation Act, 1935-1956 provides that persons previously convicted of a certain number of indictable offences of a particular class may be declared habitual criminals and shall then be detained during Her Majesty's pleasure. Proof of previous convictions is in all cases relevant to the question of penalty.

(v) *Western Australia.* Under the Criminal Code Amendment Act, 1918, power is given to sentence prisoners to be detained in a reformatory prison during the Governor's pleasure, where such prisoner is deemed to be an habitual criminal, or in other special circumstances where the Court considers such a sentence is fit.

The number under preventive detention on 30th June, 1958, was 21 and the total number dealt with since the passing of the Act was 175.

(vi) *Tasmania.* Since the Indeterminate Sentences Act came into operation in 1922, 98 persons have been confined under its provisions and 15 were in custody at the end of 1959.

Of the 83 released on probation 23 have been re-committed.

(vii) *Northern Territory.* The Habitual Criminals Amendment Act, 1907, of South Australia is still in force in the Northern Territory. By virtue of that Act, the Judge of the Northern Territory has power to declare as habitual criminals persons of any age who come before him for sentence and have had at least two or, in some cases, three previous convictions for certain indictable offences specified in the Act. The result of the declaration is that the offender is detained for an indefinite period after the completion of his sentence, and is released only when he is considered fit to be at large.

(viii) *Australian Capital Territory.* The Habitual Criminals Act, 1905, of New South Wales is still in force in the Australian Capital Territory. By virtue of that Act, a judge of the Australian Capital Territory Supreme Court has power to declare as habitual criminals persons of any age who come before him for sentence and have had at least two or, in some cases, three previous convictions for certain indictable offences specified in the Act. The result of the declaration is that the offender is confined for an indefinite period after the completion of his sentence, and is released only when he is considered fit to be at large. Habitual criminals declared in the Australian Capital Territory are detained in New South Wales.

4. *Capital Punishment.*—There were ten executions in Australia during the period 1949 to 1958. Three took place in Victoria (in 1951), four in South Australia (one each in 1950, 1953, 1956, and 1958) one in Western Australia (in 1952), and two in the Northern Territory (in 1952). In each case the offence was murder.

Under the Criminal Code Amendment Act of 1922, capital punishment was abolished in Queensland, and in New South Wales the Crimes Act was amended in 1955 abolishing capital punishment for all offences except treason and piracy. In the Australian Capital Territory, the Child Welfare Ordinance 1957 now provides that no death sentence is to be pronounced or recorded against a person under the age of 18 years.

In the early days of the history of Australia, the penalty of death was attached to a large number of offences, many of which would now be dealt with in a Magistrate's Court. The present tendency is to restrict death sentences to persons convicted of murder. Although rape is a capital offence in some States, the penalty of death has not been imposed in recent years on persons convicted of it.

The average annual number of executions in Australia from 1861 to 1880 was 9; from 1881 to 1900, 6; from 1901 to 1910, 4; from 1911 to 1920, 2; from 1921 to 1930, 2; from 1931 to 1940, 1; and from 1941 to 1950, 0.5.

B. DIVORCE AND OTHER MATRIMONIAL RELIEF.

1. Separation and Maintenance Orders of Courts of Summary Jurisdiction.—In all States and Territories there are laws enabling a wife whose husband leaves her or the children of the marriage without adequate means of support to obtain a maintenance order against the husband from a court of summary jurisdiction. In some States and the Northern Territory, courts of summary jurisdiction also have power to make separation orders. *A separation order is primarily intended for the protection of the person of the wife.*

2. Divorce and Other Matrimonial Relief Granted by Higher Courts.—The matrimonial relationship may be terminated by a Supreme Court of a State or Territory in one of three ways. Firstly, there may be a dissolution of the marriage, commonly known as divorce; secondly, the courts may annul a marriage; and thirdly, there can be a judicial separation of the parties.

Up till now, each State has been primarily responsible for the provision of matrimonial relief. The law has varied from State to State, for example, as to the period of desertion needed to obtain a decree for the dissolution of marriage.

In 1959, however, the Commonwealth Parliament passed the Matrimonial Causes Act 1959 which will probably come into force in the second half of 1960. The Act establishes uniform grounds throughout the whole of the Commonwealth for the termination of marriage. While the Act displaces corresponding State law, it vests jurisdiction in existing State and Territorial Courts.

All statistical information given in this section relates to proceedings under the system before the passing of the Commonwealth Act. The various grounds of dissolution available are shown in the tables.

3. Matrimonial Causes Act 1959.—When the Commonwealth Act, the Matrimonial Causes Act 1959, comes into force, a decree for the dissolution of marriage may be granted under it on various grounds, such as adultery, desertion, insanity, separation for five years in certain circumstances, or failure to comply with a restitution decree.

Proceedings for nullity of marriage may be instituted in respect of a marriage which is void or voidable. A marriage which is void has no existence at all and so it is not legally necessary to obtain a decree of nullity of marriage, but since the issue may depend on difficult questions of fact, such as proof that the consent of one of the parties to the marriage was not a real consent, it is advisable and customary to seek a court judgment which decides the question of the validity of the marriage.

Proceedings for annulling a voidable marriage may be instituted on various grounds as, for example, where at the time of the marriage either party was a mental defective. Proceedings must be taken before the marriage is terminated by dissolution or death. A voidable marriage is void from the date of the decree absolute, but until then the parties have the status of married people and transactions concluded on the basis of the existence of that status cannot be undone or reopened. Since the parties to a marriage which is void or which has been voided do not have the status of married people, they may re-marry.

A decree for the dissolution or annulment is first a decree nisi. The decree automatically becomes absolute at the expiration of three months unless it is in the meantime rescinded, appeal proceedings are instituted, or there are children of the marriage under the age of 16, in which case the Court must be satisfied that appropriate arrangements have been made for their welfare before the decree will become absolute. The parties cannot re-marry until a decree nisi has become absolute.

A decree of judicial separation is available on most of the grounds available for divorce. It leaves unimpaired the status of marriage but suspends rights and duties with respect to cohabitation. A husband is not responsible for the acts of his wife except that he is liable for necessities supplied to her if he has failed to pay alimony ordered by a court. Persons who have judicially separated cannot re-marry but a divorce may be obtained on the same facts as those on which the decree of judicial separation is based.

The new Commonwealth Act provides for financial grants to approved marriage guidance organizations and the courts are enjoined to consider at all times the possibility of reconciliation, and they may take certain steps to endeavour to effect a reconciliation.

4. **Number of Petitions Filed.**—The following table shows the number of petitions for dissolution of marriage, nullity of marriage and judicial separation filed in each State during 1958:—

PETITIONS FILED FOR DISSOLUTION OF MARRIAGE, NULLITY OF MARRIAGE AND JUDICIAL SEPARATION, 1958.

(a) Includes non-compliance with order for restitution of conjugal rights, 375.

9. **Ages of Husband and Wife at Time of Dissolution of Marriage.**—The following table shows the number of husbands and wives in each age group who were parties to marriages dissolved in 1958. Age is taken at the time the decree absolute is made.

Forty-two per cent. of wives were in the 25–34 years age group and 42 per cent. of husbands in the 30–39 years age group. These proportions have varied little during recent years and are considerably higher than the proportions of married persons of those age groups in the whole population (27 per cent. and 26 per cent. respectively at the Census of 30th June, 1947; 28 per cent. and 26 per cent. respectively at the Census of 30th June, 1954).

AGES OF PARTIES AT TIME OF DISSOLUTION OF MARRIAGE, AUSTRALIA, 1958.

Age of Husband (Years).	Age of Wife (Years).											Total Husbands.
	Under 21.	21 to 24.	25 to 29.	30 to 34.	35 to 39.	40 to 44.	45 to 49.	50 to 54.	55 to 59.	60 and over.	Not stated.

10. **Duration of Marriages Dissolved and Number of Children.**—The following table shows the number of dissolutions of marriage granted in 1958, classified according to the legal duration of the marriage (i.e., the period from the date of marriage to the date when the decree nisi was made absolute) and number of children. The majority of marriages dissolved are of less than fifteen years' duration and 40 per cent. of them are of less than ten years' duration.

DURATION OF MARRIAGES DISSOLVED AND NUMBER OF CHILDREN(a) AUSTRALIA, 1958.

Duration of Marriage (Years).	Number of Marriages dissolved with—											Total Dis- solutions of Marriage.	Total Chil- dren. (a)

(a) The term "children" used in the above table, being dependent upon State legislation and court rules, is not comparable in all States, and is defined as follows:—New South Wales, Victoria and Western Australia, issue of the marriage of all ages, living and dead; Queensland, children, including adoptions and step-children of all ages, living and dead; South Australia, issue of the marriage, living, under 16; Tasmania, living issue of the marriage.

11. Number of Divorced Persons at each Census 1901 to 1954.—The following table shows the number and proportion of divorced persons in Australia at each census from 1901 to 1954. A classification of these persons by age appeared in earlier issues of the Official Year Book (*see* No. 39, p. 269). Prior to 1911, no record was made of divorced persons in South Australia, so comparisons cannot be made to extend beyond that date.

DIVORCED PERSONS AT CENSUS DATES: AUSTRALIA.

Sex.	Number.						Proportion per 10,000 of population, 15 years of age and over.					
	1901. (a)	1911.	1921.	1933.	1947.	1954.	1901. (a)	1911.	1921.	1933.	1947.	1954.

(a) Excludes South Australia.

C. BANKRUPTCY.

1. General.—Particulars relating to bankruptcy in each State to the end of 1927 were incorporated in issues of the Official Year Book prior to No. 23. On 1st August, 1928, the Commonwealth Bankruptcy Act, which is now the Bankruptcy Act 1924–1959, came into operation.

Under the Bankruptcy Act 1924–1959, the Commonwealth is divided into bankruptcy districts which coincide generally with State boundaries. A Federal Court of Bankruptcy has been established with jurisdiction throughout Australia but it exercises this jurisdiction mainly in the bankruptcy districts of New South Wales, which includes the Australian Capital Territory, and Victoria. Certain State courts have been invested with federal jurisdiction in bankruptcy and, outside New South Wales and Victoria, usually exercise that jurisdiction in the appropriate bankruptcy district.

Any person unable to pay his debts may voluntarily apply for the sequestration of his estate, or his creditors may apply for a compulsory sequestration, if he has committed an act of bankruptcy. The act of bankruptcy usually relied on is non-compliance by a debtor with a bankruptcy notice which requires the debtor to whom it is addressed to pay within a specified time, to a creditor who has obtained a final judgment or order to pay, the amount of the debt or satisfy the Court that he has a counter-claim, set-off, or cross demand which equals or exceeds the judgment debt. If a bankruptcy notice is not complied with, a creditor may thereupon present a petition against a debtor provided that—

- (1) the debt or debts amount to £50;
- (2) the act of bankruptcy relied on has occurred within the six months preceding the presentation of the petition; and
- (3) the statutory requirements relating to domicile or residence are applicable to the debtor.

Upon the issue of a sequestration order, the property of the bankrupt vests in the official receiver named in the order and his property is divisible among his creditors in accordance with the provisions of the Act. No creditor to whom the bankrupt is indebted in respect of any debt provable in bankruptcy has any remedy against the property or person of the bankrupt except by leave of the court.

Under Part XI of the Bankruptcy Act 1924–1959, instead of having a sequestration order made against his estate, a debtor may compound with his creditors or assign his estate for their benefit. Under Part XII of the Act, a debtor may enter into a scheme of arrangement. The object of Parts XI and XII of the Act is to allow a debtor and his creditors to enter into an agreement concerning the debts due to the creditors without having a sequestration order made against the debtor.

The Court has power to decide questions of law affecting a bankrupt estate. Questions of fact may be tried before a jury.

The Bankruptcy Act 1924–1959 provides for an Inspector-General in Bankruptcy, who performs such duties as are prescribed. The Act also provides for a Registrar and an Official Receiver to be appointed for each bankruptcy district.

A Registrar in Bankruptcy is controlled by the Court and has such duties as the Attorney-General of the Commonwealth directs, or as are prescribed, and exercises such functions of an administrative nature as are authorized by the Court. He may examine a bankrupt or a person indebted to a bankrupt or having in his possession any of the estate or effects of a bankrupt. Stipendiary magistrates are appointed Deputy Registrars in country districts.

All sequestrated estates are vested in an Official Receiver, who is a permanent officer of the Commonwealth Public Service. His duties are to investigate the conduct, property and transactions of the debtor, and the cause of bankruptcy of a debtor and to realize and administer the estate of the debtor. In respect of these activities, the Official Receiver is under the control of the Court.

Persons registered by the Court as qualified to act as trustees may be appointed by resolution of the creditors to be trustees of estates. In cases where a registered trustee under a deed of arrangement, composition, or assignment (Parts XI and XII of the Bankruptcy Act) is removed from or vacates his office, the official receiver may be appointed by the Court to complete the administration of the estate, or the Court may direct the official receiver to convene a meeting of the creditors in the estate to enable them to appoint a registered trustee to complete the administration of the estate.

2. **Bankruptcy Proceedings.**—The following table shows the number of bankruptcies of the various types in each State, together with the assets and liabilities of the debtors, during the twelve months ended 30th June, 1959:—

BANKRUPTCY PROCEEDINGS, 1958-59.

Australia						

(a) Includes the Australian Capital Territory.

For purposes of comparison, the two tables which follow show Australian figures in respect of each of the various types of bankruptcy, and State figures in respect of all types of bankruptcy for the past five years.

Until 1954-55, the bankruptcy year ended on the 31st July. Thereafter it has ended on the 30th June. Figures for 1955-56, therefore, cover only eleven months.

(a) Includes the Australian Capital Territory.

(b) Eleven months.

D. OTHER CIVIL PROCEEDINGS.

The following table shows the civil judgments (excluding those for divorce and bankruptcy) in the higher courts during 1958. The particulars given below include the number and amount of judgments entered by default or confession, or agreement, and differ from those in previous issues of the Official Year Book, which related in most States only to cases tried during the year.

CIVIL CASES AT HIGHER COURTS, 1958.

Particulars.	N.S.W. (a)	Vic.	Q'land. (b)	S. Aust.	W. Aust. (c)	Tas.	N.T. (b)	A.C.T.	Aus- tralia.
Judgments No.	3,400	10,475	980	163	275	521	(d)	62	(d)
Amount Awarded £	(d)	2,648,115	395,084	223,635	301,986	305,761	(d)	43,140	(d)

(a) Excludes judgments signed in the Supreme Court.

(b) Twelve months ended 30th June, 1958.

(c) Judgments signed and entered.

(d) Not available.

§ 5. High Court of Australia.

Under the provisions of Section 71 of the Commonwealth Constitution, the judicial power of the Commonwealth is vested in a Supreme Court called the High Court of Australia and in such other courts as the Parliament creates or invests with Federal jurisdiction. The High Court of Australia possesses both original and appellate jurisdiction. The powers of the Court are defined in the Commonwealth Constitution, and in the Judiciary Act 1903-55. The Court consists of a Chief Justice and six other judges. Sittings of the Court are held in the capitals of the various States as occasion requires. The High Court functions as a Court of Appeal for Australia. The following statement shows the transactions of the High Court for 1958 and 1959:—

TRANSACTIONS OF THE HIGH COURT OF AUSTRALIA.

Original Jurisdiction. (a)	1958.	1959.	Appellate Jurisdiction.	1958.	1959.
Number of writs issued	196	156	Number of appeals set down for hearing ..	99	119
Number of cases entered for trial ..	48	31	Number allowed ..	25	41
Judgments for plaintiffs	29	41	Number dismissed ..	46	59
Judgments for defendants	2	5	Otherwise disposed of	21	16
Otherwise disposed of ..	16	12			
Amount of judgments ..	£57,589	£122,970			

(a) Some matters dealt with by the High Court neither originate as writs nor are entered as cases.

During 1958 and 1959, respectively, the High Court dealt also with the following: Appeals from Assessments under the Taxation Assessment Act, 25, 30; Special cases stated for the opinion of the Full Court, 19, 8; Applications for Prohibition, etc., 41, 26. The fees collected amounted to £3,201 in 1958 and £3,349 in 1959.

§ 6. Police, Prisons and Prisoners.

1. **Police.**—The primary duties of the police are to prevent crime, to detect and detain offenders, to protect life and property, to enforce the law, and to maintain peace and good order. In addition, they perform many duties in the service of the State, e.g. they act as clerks of petty sessions in small centres, as crown land bailiffs, foresters, mining wardens and inspectors under the fisheries and various other acts. In metropolitan and large country areas, they also regulate the street traffic. With the exception of a small body of Commonwealth police in the Northern Territory and the Australian Capital Territory, the police forces of Australia are under the control of the State governments, but their members perform certain functions for the Commonwealth government, such as acting as aliens registration officers and policing various acts and regulations.

Women police perform special duties at places where young women and girls are subject to moral danger, control traffic at school crossings, and lecture school children on road safety. They also assist male police as required in the performance of normal police duties.

The strength of the police force in each State and Territory and the number of police officers per 10,000 of population are shown in the following tables for the years 1954 to 1958. The figures include traffic police, probationers, cadets, special constables and women police, but exclude parking police, native trackers (natives employed in outlying districts in tracking lost persons and persons wanted by the police), female searchers, wardresses and interpreters. Figures refer to the 30th June, except where otherwise indicated.

STRENGTH OF POLICE FORCES.

As at 30th June—	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aus- tralia.

1958	7	1	23	(b)	4	..	31	..	66

(a) Figures refer to 31st December of year shown. (b) One native tracker, who is paid a small weekly retainer and is supplied with rations, is continually on call.

2. Prisons and Prison Accommodation.—The table below shows the number of prisons in each State and the accommodation therein in 1958. All figures refer to 30th June, except where otherwise indicated.

PRISONS AND PRISON ACCOMMODATION, 1958.

Particulars.	N.S.W.	Vic. (a)	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	Aus- tralia.
Prisons	17	11	7	16	19	1	2	73
Accommodation ..	2,568	1,945	849	859	876	206	59	7,362

(a) 31st December.

There is no gaol in the Australian Capital Territory, but there is a lock-up consisting of five cells attached to the police station at Canberra, and another lock-up at Jervis Bay, where offenders are held while awaiting trial or serving short sentences not exceeding one week imposed by a Magistrate's Court.

3. **Convicted Prisoners.**—The number of convicted prisoners at 30th June of each of the years 1954 to 1958 and the proportion per 10,000 of the population are shown in the following table. The figures exclude aborigines, except for New South Wales and Victoria.

CONVICTED PRISONERS.

At 30th June—	N.S.W. (a)	Vic. (b)	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	Aus- tralia.
NUMBER.								
1954	2,155	1,108	606	(b) 377	360	152	47	4,805
1955	2,238	1,229	580	413	386	163	50	5,059
1956	2,860	1,462	612	457	482	149	21	6,043
1957	3,050	1,441	680	569	488	162	29	6,419
1958	3,126	1,397	799	526	527	196	32	6,603
NUMBER PER 10,000 OF POPULATION.								
1954	6.2	4.5	4.6	(b) 4.7	5.6	4.9	28.5	5.3

1957	8.3	5.3	4.9	6.6	7.1	5.0	15.8	6.6
1958	8.4	5.0	5.6	5.9	7.5	5.8	16.3	6.7

(a) Includes the Australian Capital Territory.

(b) At 31st December of year shown.

§ 7. Cost of Administration of Law and Order.

1. **Expenditure by the States.**—The tables below show the net expenditure (i.e., gross expenditure less receipts from fees, fines, recoup for services rendered, etc.) from Consolidated Revenue during 1958–59 in connexion with the administration of justice, police and prisons in each State.

In South Australia, the receipts for legal fees and registrations exceed the expenditure under "Justice". Because of differing legislative and administrative arrangements in the various States, the activities covered by the figures shown are not exactly the same in each State. Small differences also result from differing accounting practices. However, the figures shown for individual States are comparable from year to year.

NET EXPENDITURE ON LAW AND ORDER, 1958-59.

State.	Net Expenditure.			Per Head of Population.		
	Justice.	Police.	Prisons.	Justice.	Police.	Prisons.
	£.	£.	£.	s. d.	s. d.	s. d.

Total	2,048,141	21,228,876	3,035,200	4 2	43 0	6 2

2. **Commonwealth Expenditure.**—(i) *Police and Prisons.* The expenditure shown in the previous table is that incurred by the State Governments. Expenditure by the Commonwealth Government on police in the Australian Capital Territory and police and prisons in the Northern Territory is shown in the following table.

EXPENDITURE ON POLICE AND PRISONS IN THE NORTHERN TERRITORY AND THE AUSTRALIAN CAPITAL TERRITORY.

(£.)

Year.					Northern Territory.	Australian Capital Territory.(a)
1954-55	135,738	87,126
1955-56	145,387	98,720
1956-57	136,000	109,710
1957-58	208,099	142,462
1958-59	227,031	137,894

(a) Expenditure on police only. There is no prison in the Australian Capital Territory.

(ii) *Attorney-General's Department.* Expenditure by the Commonwealth Attorney-General's Department throughout Australia is shown in the two tables which follow:—

EXPENDITURE BY THE COMMONWEALTH ATTORNEY-GENERAL'S DEPARTMENT.

(£.)

Year.					Gross Expenditure.	Receipts.	Net Expenditure.
1954-55	1,715,945	370,759	1,345,186
1955-56	1,896,741	407,474	1,489,267
1956-57	1,952,184	451,758	1,500,426
1957-58	1,984,776	516,090	1,468,686
1958-59	2,100,388	572,771	1,527,617

EXPENDITURE BY THE COMMONWEALTH ATTORNEY-GENERAL'S DEPARTMENT, 1958-59.

Item.					Gross Expenditure. £.
Administration	281,231
Bankruptcy	180,105
Commonwealth Investigation Service	123,570
Industrial Registrars' Branch	167,785
Court Reporting Branch	112,178
Crown Solicitor's Office	343,528
High Court	130,654
Industrial Court	77,747
Judges' Salaries and Pensions	16,009
Legal Service Bureau	60,384
Miscellaneous Services	16,642
Patents, Trade Marks and Designs	413,735
Peace Officer Guard	99,741
Public Service Arbitrator's Office	4,984
Rent	62,350
Repairs and Maintenance	9,745
Total	2,100,388

In addition £244,323 was spent by the Attorney-General's Department on capital works and services.

(iii) *Receipts of Commonwealth Attorney-General's Department.*—The above items of expenditure are gross. Revenue received by the Commonwealth Attorney-General's Department, which offsets this expenditure to some extent, is shown in the following table:—

**RECEIPTS OF THE COMMONWEALTH ATTORNEY-GENERAL'S
DEPARTMENT, 1958-59.**

Item.	Amount. (£.)
Bankruptcy	98,229

Fees, Fines and Costs of Court	43,455
Patents, Trade Marks and Designs, Copyright	351,185
Miscellaneous	7,140
Total	572,771

CHAPTER XVII.

PUBLIC HEALTH.

A. STATE GOVERNMENT ACTIVITIES

(including activities of the Commonwealth Government in the Northern Territory and the Australian Capital Territory).

§ 1. Public Health Legislation and Administration.

1. **New South Wales.**—The Department of Public Health comes under the jurisdiction of the Minister for Health, with an Under-Secretary as Permanent Head of the Department for administrative purposes.

There is also a Director-General of Public Health and Chief Medical Adviser to the Government, who is *ex officio* President of the Board of Health and Chairman of the Nurses' Registration Board.

The Director of State Psychiatric Services is responsible for the administration of that part of the Mental Health Act relating to the care and treatment of mental patients.

The Department's activities embrace all matters relating to public health and the greater part of the general medical work of the Government. These include:—*(a)* Supervision of the work of local authorities (municipal and shire councils) in relation to public health matters connected with the following Acts—Public Health Act, Noxious Trades Act and Pure Food Act; *(b)* Scientific divisions (Government Analyst, Microbiological Laboratory, and Division of Occupational Health); *(c)* Tuberculosis and Social Hygiene Divisions; *(d)* Medical Officers of Health at Sydney, Broken Hill, Newcastle, Wollongong, Bathurst and Lismore; *(e)* State hospitals and homes and State sanatoria; *(f)* Mental hospitals; *(g)* Public hospitals (Hospitals Commission); *(h)* Maternal and baby welfare (Baby health centres); *(i)* School medical and dental services; and *(j)* Publicity, nutrition and library services.

2. **Victoria.**—The Department of Health, which is constituted under the Health Act 1958, contains, in addition to the central administration, four branches, the General Health Branch, the Maternal and Child Hygiene Branch, the Tuberculosis Branch and the Mental Hygiene Branch. The work of these branches is described below.

(a) The General Health Branch. The branch, which, *inter alia*, is the administrative branch for the Commission of Public Health, protects or promotes the health of the community in the following ways:—

The Engineering Division scrutinizes from a public health point of view the plans of all public buildings and provincial sewerage installations and makes periodical inspections. Other activities include prevention of stream pollution and supervision of abattoirs and cattle sale yards.

The Poliomyelitis Division provides a comprehensive orthopaedic, physiotherapy and respirator service for all eligible patients and carries out rehabilitation in conjunction with the Commonwealth Government. Facilities developed for poliomyelitis are now being used for other neurological disorders. The Division is also concerned with the Salk immunization campaign being undertaken in Victoria. Through the municipalities, immunization against poliomyelitis, diphtheria, smallpox, whooping cough, and tetanus is encouraged and supervised.

Prevention and control of infectious diseases are functions of this Branch, which also sponsors original research into virus diseases and epidemiological investigations throughout Victoria.

The Venereal Diseases Division provides a centrally situated headquarters where the use of modern remedies is effecting a general improvement in the standard of treatment.

Standards of quality and purity of foods and drugs are fixed by the Food Standards Committee and are administered and enforced by both departmental and municipal health inspectors.

Investigations into occupational hazards to the health of workers, the treatment and incidence of occupational diseases and research into the effects of toxic substances used in industry are conducted by the Industrial Health Division.

Subsidies are granted to municipalities to provide meals for pensioners, to clubs for elderly citizens, and to emergency housekeeper services.

Other services operated by the Branch are: registering plumbers and gasfitters; providing free travel to hospital for people with limited incomes; analysing food, drink, water and sewerage effluents; registering cinematograph operators; administering the Cemeteries Acts and the Clean Air Act; and advising industry on health hazards associated with handling radioactive substances.

(b) *The Maternal and Child Hygiene Branch.* This branch is concerned with pre-natal hygiene, the development of pre-school services, and the school medical and dental services.

(c) *The Tuberculosis Branch.* The Tuberculosis Branch is concerned with the prevention of tuberculosis and the treatment and rehabilitation of tubercular patients.

(d) *The Mental Hygiene Branch.*—This Branch is controlled by the Mental Hygiene Authority and consists of institutions for in-patient care and out-patient's clinics and other services necessary for a comprehensive community mental health programme. Since the appointment of the Authority in 1951, existing buildings have been remodelled and new ones provided. Services have been re-organized to conform with modern requirements.

(e) *The Cancer Institute.*—This Institute, which was incorporated in 1948, provides, *inter alia*, facilities for research and investigation related to the causes, prevention, diagnosis and treatment of cancer and allied conditions. The policy of the Cancer Institute Board has been to ensure the provision of maximum clinical service to patients and to carry out related research. Clinics have been opened in a number of country centres in co-operation with the local hospital committees.

Under an agreement with the Government of Tasmania, clinics are also conducted at Launceston and Hobart.

A 4 mega-volt linear accelerator was installed in Melbourne in 1956 and a Cobalt 60 unit in Launceston in 1957. Another 4 mega-volt linear accelerator is to be installed in Melbourne in late 1960. Out-patient attendances during the twelve months ended 30th June, 1959, were 32,297, and X-ray therapy treatments administered totalled 83,142. One hundred in-patient beds are now available.

3. **Queensland.**—(i) *General.* The Health Acts 1937 to 1955 are administered by the Director-General of Health and Medical Services subject to the Minister for Health and Home Affairs. A central staff controls the following divisions:—

(a) *Division of Public Health Supervision.* This Division is controlled by the Deputy Director-General of Health and Medical Services and comprises separate sections of communicable disease control, environmental sanitation, food and drug control, enthetic (venereal) diseases, hookworm control and Hansen's disease (leprosy) control. Free treatment of venereal diseases is offered at the Department's clinics in Brisbane, and at any public hospital. Free immunization against poliomyelitis, diphtheria, whooping cough and tetanus is offered by most of the local authorities. About 94 per cent. of school children in the Greater Brisbane area and 90 per cent. in the rest of the State have been immunized against diphtheria, while 86 per cent. of the population aged under 15 years have been immunized against poliomyelitis.

(b) *Division of Tuberculosis.* A central chest clinic in Brisbane offers Mantoux tests, X-ray examinations, and inoculations of Mantoux negative reactors free of charge and this service is extensively used. Mobile X-ray units visit country districts. Children in the final grade of primary schools are now being Mantoux-tested and given B.C.G. vaccine. The compulsory X-ray examination of all persons over the age of 14 years has commenced in Northern Queensland and will be applied progressively to other areas of the State.

(c) *Division of Industrial Medicine.* The services of this division are available both to industry and the trade union movement for the prevention of industrial hazards. This division is particularly interested in occupational diseases, such as silicosis and lead and other poisoning and advises on industrial problems such as lighting, ventilation, fatigue, air pollution and the use of radio-active isotopes.

(d) *Division of Maternal and Child Welfare.* This Division offers supervision and advice on the rearing and health of infants and pre-school children at 242 baby health centres throughout the State. Outlying centres are visited by air or by special rail car. Homes for in-patient treatment of infants with feeding problems have been established at Brisbane, Toowoomba, Ipswich and Rockhampton.

(e) *Division of School Health Services.* This Division comprises the Chief Medical Officer, School Health Services, and a staff of doctors, dentists and visiting school nurses. Every child has a medical examination at least once in three years.

(f) *Division of Mental Hygiene.* The Director is responsible for the care and treatment of mentally sick patients in the State's four mental hospitals at Brisbane, Toowoomba, Ipswich and Charters Towers.

(g) *Division of Laboratory Services.* Two laboratories—the Laboratory of Microbiology and Pathology and the Government Chemical Laboratory—are maintained to ensure the purity of a wide range of foodstuffs and materials. The former also offers a service in clinical pathology to institutions, country hospitals and private doctors.

(ii) *Hospitals.* All public hospitals operate under the district system, which provides for the constitution of hospitals regions and hospitals districts and a hospitals board for each district. The State is divided into 11 hospitals regions with a base hospital for each region. Each region comprises a number of hospital districts, the purpose of the regional scheme being to co-ordinate the public hospitals in the region with the base hospital. The administration of the hospital services, including public dental services, in each hospitals district is vested in the hospitals board, which comprises not less than four members nor more than eight members appointed by the Governor-in-Council and one member elected by the component local authorities. There are 57 hospitals boards controlling 132 public hospitals. In addition five other hospitals provide public accommodation and receive aid from the Government.

An institution for the treatment of Hansen's disease in aboriginals is maintained at Fantome Island near Townsville. Modern therapy has rendered the Peel Island institution unnecessary and white patients are now treated at the South Brisbane Hospital.

Private hospitals in Queensland are controlled under the provisions of the Health Acts, 1937 to 1955 and the Private Hospitals Regulations, 1937. There are 58 private hospitals licensed in the State, containing 1,739 beds and cots, of which 20 containing 778 beds and cots, are in Brisbane.

4. *South Australia.*—The Department of Public Health embraces the activities of the Central Board of Health, the Food Drugs Advisory Committee, the Radiological Advisory Committee, the School Health Services (comprising School Medical and Dental Services and Deafness Guidance Clinic), Poliomyelitis Services and the public health aspect of the control of tuberculosis, including the State X-ray Health Survey, under the control of the Director of Tuberculosis.

The Central Board of Health consists of five members, three of whom (including the chairman) are appointed by the Governor, while one is elected by metropolitan local boards and one by all other local boards. The Central Board of Health administers the Health, Food and Drugs, Dangerous Drugs, Noxious Trades, Bakehouses Registrations and Early Notification of Birth Acts. The Board is also concerned to some degree with Acts relating to local government, abattoirs and cremation. Other legislation administered by the Department of Public Health relates to venereal diseases and vaccination.

The Health Act 1935–1956 constitutes every municipal council and every district council a local board of health for its municipality or district. There are 143 local boards under the general control and supervision of the Central Board. Under the Food and Drugs Act, each local board is constituted the local authority for its respective district except in the metropolitan area, for which the Metropolitan County Board is the local authority.

5. *Western Australia.*—Health services are provided under the Health Act 1911–1958. The central authority is the Department of Public Health, controlled by a Commissioner, who must be a qualified medical practitioner. The State is divided into 147 local government areas which are administered either by municipal councils or by road boards. Each type of authority has health administration powers.

In any emergency, the Commissioner may exercise all the powers of a health authority in any part of the State.

Features of recent legislation are as follows:—(a) Act No. 70 of 1948 gives power to control sufferers from tuberculosis and established a Tuberculosis Control Branch; (b) Act No. 11 of 1952 gives wide powers to regulate the sale and use of pesticides; (c) Act No. 34 of 1954 provides for the licensing of manufacturers of therapeutic substances; (d) Act No. 21 of 1957 gives power to require the notification of any prescribed condition of health in addition to infectious diseases; (e) Act No. 17 of 1956 gives local authorities power to provide or subsidize centres for the accommodation and care of the aged; (f) Act No. 30 of 1958 provides for the establishment of the Health Education Council with the object of promoting and improving the health of the people of Western Australia; and (g) Act No. 43 of 1958 provides for the establishment of the Cancer Council of Western Australia with the objects of co-ordinating, promoting and subsidizing cancer research.

6. *Tasmania*.—The Department of Health Services is under the jurisdiction of the Minister of Health. The Department consists of a Headquarters and three Divisions. The Director-General of Health Services is the permanent head of the Department and he administers the Department through Directors of each of the three divisions (Division of Public Health, Division of Mental Health, and Division of Tuberculosis) and through several other clinical directors and other senior officers attached to the Headquarters of the Department including the Directors of Orthopaedics, Pathology and Anaesthetics and the Government Analyst and Chemist.

In addition to his responsibility for the functioning of the Department as a whole, the Director-General of Health Services directly administers the various branches of the work performed by Headquarters. This is concerned particularly with the following:—

- (a) The Administration of the Hospital Services throughout the State.
- (b) The Government Medical Service.
- (c) The Hospital and Government Nursing Service, which includes the administration of 27 District Nursing Centres throughout the State.
- (d) Legislation concerned with Health and allied matters and the Nurses' Registration Board.
- (e) The Health Education Council and National Fitness Council.
- (f) Specialist Medical Services.
- (g) Statistical classification of Diseases and Injuries.
- (h) Liaison with other States and the Commonwealth Health Department, and all matters dealing with the maintenance of Departmental property and the appointments and salaries of Departmental staff.

The Division of Public Health administers laws relating to sanitation, notification of infectious diseases, and food and drug legislation. The Division also controls the school medical and dental services and child health services.

The Division of Mental Health is responsible for the supervision of mental hospitals, the consultative diagnosis and treatment of psychiatric cases, the treatment and care of the mentally ill, the treatment and care of inebriates, the treatment and custody of sexual offenders, the treatment of psychopathic cases, and the care and treatment of retarded children. The Tuberculosis Division is concerned with the prevention (including B.C.G. vaccination), detection, notification, examination and treatment of all forms of tuberculosis occurring in the State. This Division also conducts the compulsory mass chest-X-ray examinations and maintains chest hospitals and diagnostic clinics.

7. *Northern Territory*.—The Commonwealth Department of Health provides hospital, health and medical services in the Northern Territory.

Four general hospitals have been established. The Darwin Hospital has accommodation for 235 in-patients, Alice Springs Hospital, 120, Katherine Hospital, 36, and Tennant Creek Hospital, 34. The treatment of Hansen's disease (leprosy) is carried out at East Arm Settlement. A full range of ancillary services is available at the Darwin hospital which serves as a base hospital for the Territory. Dental clinics have been set up at Darwin and Alice Springs.

Medical and dental services to outback areas are provided by road and air. Aircraft used in the Territory are two De Havilland Doves stationed at Darwin, and one Drovcr at Alice Springs. They are staffed and serviced by Trans-Australia Airlines and are extensively

used in ambulance and survey medical work. At Alice Springs, doctors of the Northern Territory provide the medical services to the Royal Flying Doctor Service (South Australian) base.

A section of the Department of Health undertakes continuous investigation into native health.

School doctors and dentists travel throughout the Territory to carry out diagnosis and treatment. Public health services are provided and health inspectors periodically visit all settlements.

Darwin, as a first port of entry for oversea aircraft and shipping, has a quarantine station.

8. Australian Capital Territory.—The Public Health Ordinance 1928–1951 places under the control of the Minister for Health all matters relating to public health and hygiene in the Australian Capital Territory. A Medical Officer of Health and a number of Health Inspectors are appointed to administer and police this ordinance. The Canberra Community Hospital is administered subject to the Minister for Health by a board consisting of five elected members and three members appointed by the Minister. The hospital has accommodation for 253 in-patients. A district nursing service administered by the Commonwealth Department of Health was established in 1950 to provide a home-nursing service for the sick and aged. The service is available at the request of a registered doctor.

§ 2. Supervision and Care of Infant Life.

1. General.—The number of infant deaths and the rate of infant mortality for the five years 1954 to 1958 are given in the following table. Further information regarding infant mortality (including information for each State as a whole and for the Territories) will be found in Chapter X.—Vital Statistics (*see* p. 356).

INFANT DEATHS AND DEATH RATES.

(a) Excludes Territories.

(b) Number of deaths of children under one year of age per 1,000

live births registered.

Because the health of mothers and infants depends largely on pre-natal attention as well as after-care, government and private organizations provide instruction and treatment for mothers before and after confinement. The health and well-being of mother and child are looked after by baby health centres, baby clinics, crèches, etc.

In all States, Acts have been passed with the object of supervising the conditions of infant life and reducing the rate of mortality. Departments control the boarding-out of the wards of the State to suitable persons and wherever possible the child is boarded out to

its mother or to a near female relative. Stringent conditions regulate the adoption, nursing and maintenance of children placed in foster-homes by private persons, while special attention is devoted to the welfare of ex-nuptial children.

Under the provisions of Part V. of the Social Services Act 1947–1959, a sum of £15 is payable to the mother in respect of each confinement at which a living or viable child is born if the mother has no other children under 16 years of age. Where there are one or two other children under 16 the amount payable is £16, and where there are three or more other children under 16 the amount payable is £17 10s. Where more than one child is born at a birth the amount of the allowance is increased by £5 in respect of each additional child born at that birth. More detailed information concerning maternity allowances is given in Chapter XVIII.—Welfare Services.

2. **Nursing Activities.**—(i) *General.* In several of the States, the Government maintains institutions which provide treatment for mothers and children, and, in addition, subsidies are granted to various associations engaged in welfare work.

(ii) *Details by States.* In earlier issues of the Official Year Book (*see* No. 22, pp. 515–16) information concerning the activities of institutions in each State is given.

(iii) *Summary.* The following table gives particulars of the activities of Baby Health Centres and Bush Nursing Associations for the year 1959.

BABY HEALTH CENTRES AND BUSH NURSING ASSOCIATIONS, 1959.

(c) Not

In the last thirty years, the number of attendances at the Baby Health Centres has more than trebled. The numbers of attendances, at five-year intervals, since 1930 were as follows:—1930, 919,893; 1935, 1,355,306; 1940, 2,035,299; 1945, 2,927,764; 1950, 3,049,375; and 1955, 3,099,233. During the year 1959, the number of attendances was 3,443,808.

§ 3. Medical Inspection of School Children.

1. **General.**—Medical inspection of school children is carried out in all States, in the Northern Territory and in the Australian Capital Territory. In some States, travelling clinics have been established to deal with dental and ocular defects.

2. **New South Wales.**—(i) *School Medical Service.* Doctors of the School Medical Service examine children attending all schools administered by the Department of Education and the majority of other schools in the State. They make annual visits to schools in the metropolitan, Newcastle and Wollongong areas, and in Armidale, Tamworth, Bathurst, Orange and Wagga, and examine children in kindergarten or 1st grade in primary schools and 1st and 4th years in secondary schools. Children in other classes are examined or reviewed as necessary. The vision and hearing of pupils in 4th grade are re-tested. In country areas, doctors aim to visit schools every three years, and examine all children attending. Owing to insufficient staff, the country portion of the programme cannot be completed each year.

If treatment is necessary, the parent is informed in writing and, if possible, is called in for interview. In the metropolitan, Newcastle and Wollongong areas, school nurses follow up these cases with the object of persuading parents to seek medical advice for the children.

As well as examining school children, the medical officer examines the sanitary arrangements at each school. Bush nurses act as school nurses in schools at or near the bush nursing centres.

Medical officers of this service examined 152,620 children in 1958. Notifiable defects were found in 25.2 per cent. of the children examined.

Various surveys of school children are undertaken from time to time, e.g. hearing surveys, hookworm surveys, height-weight surveys, nutrition surveys, and investigations to determine the incidence of enlargement of the thyroid gland, defective vision, and postural defects.

Five child guidance clinics, all in the metropolitan area, operate under the administration of the School Medical Service. One clinic functions at the Yasmar Boys' Shelter and deals exclusively with cases which come before the Children's Courts. Each clinic is staffed by a psychiatrist, a psychologist and social workers.

(ii) *School Dental Service.* The aim of the School Dental Service is to provide dental treatment for children on the school premises, to train them in the care of their teeth, and to teach them the principles of dental health.

Of 35,007 children examined in 1958, 29,083 were included in a Dental Health Survey. Of these, 6.7 per cent. were found to have naturally healthy dentitions and 77 per cent. were in need of treatment.

In 1958, the clinics treated 16,055 children in 47,724 visits, 26,035 teeth were extracted, and 43,641 permanent fillings and 48,894 other treatments, including prophylaxis, were provided. As the number of clinics is not sufficient to provide more than a limited service, it is necessary to restrict treatment to the ages 6-8 years in the metropolitan area, and 6-9 years in large country centres. In small outlying rural schools, children of all ages are included.

3. *Victoria.*—School Medical Services are conducted in close association with the Education Department. All children between the ages of 5 and 14 years attending State and registered primary schools are examined regularly, and any disabilities found in the children are brought to the notice of their parents. School nurses, under medical direction, visit the homes and schools. Children suffering from physical and mental disabilities are recommended to attend appropriate schools or classes by the medical officers. Some special training for the handicapped is given.

The School Dental Service has a staff of 43 dental officers and provides dental attention for children in parts of the metropolitan area at one of three dental centres and for a number of country districts by means of 15 mobile units. It also provides dental service for children's institutions in and around Melbourne and certain provincial centres. This service is now providing dental attention for some 80,000 primary school children.

4. *Queensland.*—During 1958-59, medical officers and nurses examined 101,211 school children, referring children with defects to their own doctors. In western Queensland, local doctors act as part-time ophthalmic officers. In north Queensland, two school sisters assist in the control of hookworm. Advice is given on school sanitation, infectious diseases in schools, and health education.

During 1958-59, school dentists gave treatment to 9,511 school children whose parents could not afford private treatment. The treatment was carried out at four rail dental clinics and with portable equipment at schools. In addition, school children are treated at hospital dental clinics in the larger towns.

5. *South Australia.*—Children in State schools are examined while in Grades 1, 4 and 7 in the primary schools, and in their second and fourth years in secondary schools. Efforts are made to visit country schools every three years and all the children are examined. Students who wish to become teachers are examined on appointment as Leaving Teaching

Scholars while still attending secondary schools, again immediately prior to entering the Teachers' College and finally when they leave the College to take up teaching. Courses of lectures in hygiene and in first aid are given to all College students and, in addition, domestic arts students are lectured on home nursing.

During 1958, 58,808 children were examined by medical officers in 159 country and 101 metropolitan schools. Of these, 3,898 required treatment for defective vision, 1,234 for defective hearing, and 14,416 for dental disorders.

There were 996 children examined at the deafness guidance clinic during 1958. Of the 487 new patients, 370 were referred to doctors or hospitals for treatment.

Educational work was assisted by talks to mothers' clubs and interviews with parents by doctors and dentists, and by home visits and interviews by nurses.

The Psychology Branch of the Education Department examines difficult children of many types, including those with such problems as backwardness, truancy and delinquency, and assists the parents of the children interviewed in handling these problems. In addition to supervising opportunity and special classes for children who are hard-of-hearing or backward in school work, it advises on questions of placement and types of education for ordinary children. Its guidance officers organize vocational guidance work in schools, interview pupils and visit schools. They also lecture to students of the Teachers' College as well as to other interested organizations such as mothers' clubs. Expenditure on the Psychology Branch during 1958 was £22,985.

6. Western Australia.—The School Medical Service of the State Health Department employs five full-time medical officers for schools. During 1958, these officers examined 37,569 children (metropolitan 23,151, country 14,418) of whom 19,431 were boys and 18,138 girls. The 257 schools visited comprised—metropolitan, 126 (state schools 94, convents 32), and country, 131 (state schools 109, convents 22). The aim is to examine each school child three times in his school career.

During 1958, the 15 full-time dentists employed by the School Dental Service visited 15 metropolitan schools, 157 country schools, 11 orphanages and 13 native missions. The number of children examined was 13,502. With the consent of their parents, 7,744 of these were treated. The number of dental vans operating was 12. The cost of this service for 1957–58 was £47,902.

7. Tasmania.—During 1958, one full-time and five part-time medical officers examined school children in State and private schools, and 13 full-time and 2 part-time sisters visited homes and schools. Of the 22,989 children examined by medical officers, 8,776 were found to have defects.

There are 20 school dental clinics. Surgeries are located at Hobart, Launceston, Queenstown, Burnie and Devonport, and 15 mobile clinics are operated in other districts. A full-time dental surgeon is in charge of each surgery or clinic. During the year, there were 18,054 new visits to the school dentists and 28,998 repeat visits.

The cost of school medical and school dental services for the year ended 30th June, 1958, was £79,967.

8. Northern Territory.—(i) *School Medical Service.* The Schools Medical Officer makes routine physical examinations of all children attending both pre-school centres and the schools which come under the supervision of the Assistant Supervisor of Education in the Northern Territory. The only children not examined by him are those at the Native Welfare Settlement School, i.e. full-blood aboriginals, who are examined during native health surveys.

An immunization clinic and a paediatric clinic are held each week at the Darwin Hospital.

(ii) *School Dental Service.* A special service for school and pre-school children is available in Darwin.

9. Australian Capital Territory.—The Commonwealth Department of Health is responsible for health aspects of child welfare in the Australian Capital Territory. These include a school medical service, carried out by a medical officer and a trained nurse, who are full time officers of the Health Department.

Routine examinations are carried out at all schools, public and private, within the Territory. The programme is planned to provide for examinations at the ages of six, eight, 12, 15 and 17 years. During 1959, the total number of children examined in the above age groups was 3,931.

Examinations of children attending Pre-School Centres are made according to the time available, an attempt being made to cover children aged 4½ to five years. In 1959, lack of time prevented full coverage but 154 pre-school children were examined.

In addition, an immunization programme for the protection of children aged from six months to 12 years against diphtheria, whooping cough and tetanus is carried out by the school doctor and nurse. Injections given during 1959 numbered 5,433.

The officer-in-charge of the school service also acts as medical adviser to the Mothercraft Council.

The school dental service is staffed by eight dentists and nine dental nurses, and has operated since 1950. Free dental treatment is available to children at primary and infants' schools and pre-school centres. Approximately 90 per cent. of children accept treatment. During 1959, 7,065 children were examined, involving 21,220 visits by these children.

§ 4. Inspection of Food and Drugs for Sale.

Public health legislation in force in all States provides for the inspection of foods and drugs with the object of ensuring that all goods sold shall be wholesome, clean, and free from contamination or adulteration, and that all receptacles, places and vehicles used for their manufacture, storage, or carriage shall be clean.

§ 5. Supervision of Dairies, Milk Supply, etc.

Earlier issues of the Official Year Book (*see* No. 22, p. 498), refer to the legislation in force in the various States to ensure the purity of dairy produce.

§ 6. Disposal of Dead by Cremation.

The first crematorium in Australia was opened in South Australia in 1903. At 31st December, 1959, there were seventeen crematoria in Australia, situated as follows:—

CREMATORIA, 31st DECEMBER, 1959.

New South Wales	7
Victoria	3
Queensland	2
South Australia	1
Western Australia	2
Tasmania	2
Australia	17

There is no crematorium in the Northern Territory or the Australian Capital Territory.

The following table shows the number of cremations in each State for each of the years 1955 to 1959:—

CREMATIONS.

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
1955	11,128	6,119	2,993	431	1,169	549	22,389
1956	12,358	6,733	3,341	514	1,201	551	24,698
1957	12,189	6,849	3,250	539	1,239	688	24,754
1958	12,190	6,913	3,308	620	1,363	622	25,016
1959	13,352	7,549	3,678	779	1,433	666	27,457

B. COMMONWEALTH GOVERNMENT ACTIVITIES.**§ 1. General.**

At the time of federation, the only health function given to the Commonwealth Government under the Constitution was the power to make laws with respect to quarantine. All other health powers remained with the State Governments. Under this power, the systems of State quarantine formerly in operation were abolished with the passing of the Quarantine Act 1908 and a branch of the Department of Trade and Customs, under the control of a Director of Quarantine, was created on 1st July, 1909.

The Commonwealth Department of Health was formed in 1921 by the extension and development of the quarantine service, the Director of Quarantine becoming the Director-General of Health. It had certain other functions in the field of public health. An amendment to the Constitution in 1946 gave the Commonwealth power to make laws with respect to pharmaceutical, hospital and sickness benefits, and medical and dental services. In addition, the Commonwealth Government has used its powers under Section 96 of the Constitution to make grants to the States for health purposes.

§ 2. National Health Benefits.

1. Pharmaceutical Benefits.—Prior to 1st March, 1960, certain life-saving and disease-preventing drugs were provided free of charge to the general community provided they had been prescribed by a doctor registered in Australia. These benefits, together with the drugs listed in the British Pharmacopoeia, were provided free to pensioners.

Total expenditure on pharmaceutical benefits in the year 1958–59 was £20,972,797.

As from 1st March, 1960, benefits previously available only to pensioners, with certain additions and deletions, are also available to the general community but a fee of 5s. per prescription has been imposed for each prescription both for the life-saving and the wider range of drugs.

As in the past, pensioners who benefit under the Pensioner Medical Service (*see* para. 5, page 663), will receive all benefits without any charge being made.

2. Hospital Benefits.—The payment of hospital benefits to the States is authorized under Part V. of the National Health Act 1953–1959. This Act continues the agreements entered into with the various States under the Hospital Benefits Act 1951. Under these agreements, the Commonwealth pays the States certain sums of money which vary according to the number of occupied beds in public hospitals and the status of patients.

The agreements provide for the payment of 12s. a day for patients who are pensioners or their dependants, and for patients in certain South Australian hospitals. The rate of 8s. a day is paid for other patients.

The National Health Act also provides for the payment of 8s. a day for patients in approved private hospitals. This payment is made to the proprietor of the private hospital. A condition of the benefit is that an equivalent amount has been allowed against the patient's account.

Commonwealth additional benefit is paid in the case of patients who are members of a registered hospital benefit organization. The additional benefit is payable at the rate of 4s. a day if a person contributes for a fund benefit of at least 6s. a day but less than 16s. a day, and at the rate of 12s. a day if a person contributes for a fund benefit of at least 16s. a day. Payment of the additional benefit is made through the benefit organization and the patient normally receives it with the amount of fund benefit payable by the organization. Reimbursement of the Commonwealth additional benefit is subsequently made to the organization by the Commonwealth.

Until 1st January, 1959, organizations' rules generally provided for disallowance of claims for fund benefit in cases of chronic or pre-existing ailments, or after the contributor had received benefit for a certain maximum period each year. As from 1st January, 1959, provision was made for fund benefit to be paid in these cases. The fund benefit generally

payable in such cases is 16s. a day and is paid either from special accounts guaranteed by the Commonwealth, or from the ordinary accounts of the organizations. One of the original conditions of payment was that the treatment was given in a hospital recognized for the purpose of paying this benefit. While this condition still remains as a general rule, provision has been made as from 1st January, 1960, for fund benefit to be paid in certain circumstances to particular cases for treatment in hospitals which are not recognized.

Australian residents and their dependants who receive hospital treatment while temporarily living overseas are eligible to receive the benefit of 8s. a day and the additional benefit to which they are entitled.

Expenditure on hospital benefits in 1958-59 was £14,802,290. This does not include expenditure on mental hospitals (*see* para. 3, below).

The following tables show the amount of ordinary benefit paid for each of the years 1956-57 to 1958-59 together with the number of registered organizations, the membership thereof, and payments of Commonwealth additional benefit and hospital fund benefit on account of occupied beds in public and approved private hospitals for the year 1958-59. As many persons contribute on behalf of both themselves and their dependants, the total number of persons covered by hospital benefit schemes is considerably higher than the number of members. Reliable figures for coverage are not available.

HOSPITAL BENEFITS: SUMMARY 1956-57 to 1958-59.

1. Ordinary Benefits (a). Paid to Hospitals in respect of occupied beds.

(£.)

Year Ended 30th June.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Territories and Overseas.	Aus- tralia.

(a) An additional benefit of 4s. a day is payable to registered hospital benefit organizations for persons who contribute for a fund benefit of at least 6s. a day but less than 16s. a day, or 12s. a day for those who contribute for a fund benefit of at least 16s. a day.

(b) No hospital benefit organization is registered in the Northern Territory or the Australian Capital Territory. Persons who live in one of these territories, or who are overseas, receive their Commonwealth additional benefit and fund benefit through membership of an organization registered in one of the States.

3. Mental Hospitals.—In 1946, when Commonwealth hospital benefits were introduced for patients in public hospitals, no provision was made for patients in mental hospitals. To help meet the cost of maintaining patients in mental hospitals, the Commonwealth Parliament passed the Mental Institutions Benefits Act 1948. This Act ratified agreements with the States whereunder it was provided that:—

- (a) the Commonwealth would pay the States a benefit equal to the amount being collected by the States from the relatives of patients in mental hospitals by way of charges for maintenance; and
- (b) the States would cease making charges for the maintenance of mental patients.

These agreements operated for five years, and terminated in the latter half of 1954. The amount contributed by the Commonwealth during the operation of the agreements was approximately one shilling a day for each patient. When the agreements terminated, Dr. Alan Stoller, of the Victorian Mental Hygiene Authority, was commissioned to undertake a survey on mental health facilities and needs in Australia. His report was released in May, 1955. The report stated that serious overcrowding existed in the majority of mental hospitals in Australia. The provision of more beds was the most urgent need, but other accommodation and rehabilitation facilities were also required.

Following the report, the Commonwealth made an offer of £10 million to the States as part of a capital expenditure programme of £30 million on increasing and improving patient accommodation. All States accepted the Commonwealth offer.

The following table sets out the amounts which have been paid to the State Governments by the Commonwealth Government each year from 1954–55 to 1958–59.

EXPENDITURE ON MENTAL HOSPITALS BY THE COMMONWEALTH GOVERNMENT.

(£.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
1954–55 ..	106,525	53,820	36,460	15,871	9,453	3,457	225,586
1955–56 ..	208,763	445,747	66,588	12,245	9,984	29,822	773,149
1956–57 ..	383,555	527,213	88,068	128,467	51,855	68,974	1,248,132
1957–58 ..	324,151	545,365	114,104	152,159	29,236	91,384	1,256,399
1958–59 ..	196,831	619,585	118,512	122,328	17,210	45,892	1,120,358

Amounts shown in the foregoing table in respect of the year 1954–55 represent payments made under the Mental Institutions Benefits Act 1948. Amounts shown in respect of 1955–56 to 1958–59 represent payments made during the year shown under the States Grants (Mental Institutions) Act 1955. The total amounts payable to each State under the last-mentioned Act are as follows:—

	£
New South Wales	3,830,000
Victoria	2,740,000
Queensland	1,460,000
South Australia	895,000
Western Australia	720,000
Tasmania	355,000
Australia	10,000,000

There are no mental hospitals in the Northern Territory or the Australian Capital Territory.

4. Medical Benefits.—A medical benefits scheme has operated since July, 1953, being authorized firstly by the National Health (Medical Benefits) Regulations and then by the National Health Act 1953.

The basic principle of the scheme is Commonwealth support of voluntary insurance towards meeting the costs of medical attention. The benefits payable by the Commonwealth are paid either on a fee-for-service basis in respect of the items set out in the first and second schedules to the National Health Act, or in the form of a subsidy not exceeding half of the payments made to doctors by registered organizations under contract arrangements.

In order to qualify for the Commonwealth benefit, a person is required to be insured with a registered medical benefits organization. The organization pays the Commonwealth benefit to the contributor, usually at the time it pays its own benefit. Reimbursement of the Commonwealth benefit is subsequently made to the organization by the Commonwealth.

Provision was made from 1st January, 1959, for payments of fund benefit in cases of pre-existing ailments and long-term illnesses.

Substantially increased Commonwealth and fund benefits were introduced for a number of medical services from 1st January, 1960. The largest increases were for major operations where the combined benefits were doubled.

An organization wishing to be registered by the Commonwealth for the purposes of the medical benefits scheme is required to provide to its contributors, subject to its rules, all benefits specified in the first schedule to the National Health Act 1953–59, at rates not less than those provided by the Commonwealth. The organization must be non-profit-making.

In 1958–59, Commonwealth expenditure on medical benefits was £7,779,451.

The following table shows the number of registered medical benefit organizations, their membership, the number of medical services rendered to members and their dependants, and payments of Commonwealth benefits and medical fund benefits to members of registered organizations. As many persons contribute on behalf of both themselves and their dependants, the total number of persons covered by medical benefit schemes is considerably higher than the number of contributors. Reliable figures for coverage are not available.

MEDICAL BENEFITS: SUMMARY, YEAR ENDED 30th JUNE, 1959.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia. (a)
Registered Organizations							
Members No.	26	22	6	9	9	10	82
Medical Services No.	1,230,496	611,999	290,458	241,814	199,429	92,788	2,666,984
Commonwealth Benefit £	7,188,796	4,152,415	1,818,244	1,678,988	1,519,362	460,851	16,818,656
Fund Benefit £	3,383,799	1,872,049	824,123	795,859	699,802	203,819	7,779,451
	4,437,512	1,859,049	1,032,243	898,712	906,888	276,213	9,410,617

(a) No medical benefit organization is registered in the Northern Territory or the Australian Capital Territory. Persons who live in one of those territories, or who are overseas, receive their Commonwealth Benefit and fund benefit through membership of an organization registered in one of the States.

5. Pensioner Medical Service.—The Pensioner Medical Service, which commenced on 21st February, 1951, was introduced under the authority of the National Health (Medical Services to Pensioners) Regulations made under the provisions of the National Health Services Act 1948–1949. The service has been continued under the provisions of the National Health Act 1953–1959.

The service provided to eligible pensioners consists of medicines provided free of cost and a medical service of a general practitioner nature such as that ordinarily rendered by a general medical practitioner in his surgery or at the patient's home. Specialist services are not provided. Patients may be charged a small fee by doctors for travelling and attendance outside normal surgery or visiting hours. Doctors participating in the scheme are paid on a fee-for-service basis by the Commonwealth Government.

Persons eligible to receive the benefits of the service are those who satisfy a means test and are receiving an age, invalid or widow's pension under the Social Services Act or a service pension under the Repatriation Act; persons receiving a tuberculosis allowance under the Tuberculosis Act; and dependants of persons eligible for the service.

Since 1st November, 1955, the means test which has applied to new enrolments in the service is the income test that had to be satisfied in order to qualify for a full rate pension as at 31st December, 1953.

The means test does not apply to persons who had applied for and were eligible to receive a pension prior to 1st November, 1955, or to persons receiving a tuberculosis allowance.

At 30th June, 1959, 5,531 doctors were enrolled in the scheme to attend to approximately 720,053 pensioners and their dependants.

During the year ended 30th June, 1959, doctors in the scheme performed 6,441,121 services—visits and surgery consultations—for persons enrolled in the scheme. For these services, they were paid £3,806,457. The average number of services rendered by doctors to each person was nine.

6. Anti-Tuberculosis Campaign.—The main provisions of the Tuberculosis Act 1948 are as follows:—(a) Section 5 authorizes the Commonwealth to enter into an arrangement with the States for a national campaign against tuberculosis; (b) Section 6 empowers the Commonwealth to take over or provide specified facilities for the diagnosis, treatment and control of tuberculosis; (c) Section 8 provides for the setting up of an advisory council to advise the Commonwealth Minister for Health on matters relating to the national campaign; and (d) Section 9 authorizes the Commonwealth to pay allowances to sufferers from tuberculosis and their dependants.

Under an arrangement with the Commonwealth Government, each State conducts a campaign against tuberculosis. The Commonwealth Government reimburses the State for all approved capital expenditure in relation to tuberculosis, and for net maintenance expenditure to the extent that it exceeds net maintenance expenditure for the year 1947–48. Thus the States carry out the physical or field work of the national campaign and the Commonwealth acts in an advisory, co-ordinating and financial capacity. For this reason, the Commonwealth has not found it necessary to make much use of its powers under Section 6.

An advisory council, known as the National Tuberculosis Advisory Council, has been set up. There are twelve members, the chairman being the Commonwealth Director-General of Health. Other members are the Commonwealth Director of Tuberculosis, the six State Directors of Tuberculosis, the Consultant (Chest Diseases) of the Department of Repatriation, two specialist private practitioners, and the Chief Administrative Officer of the Commonwealth Department of Health.

To help reduce the spread of infection, the Commonwealth Government pays living allowances to persons suffering from tuberculosis, so that they may give up work and undergo treatment. These allowances have been in operation since 13th July, 1950. Since 8th October, 1959, the rates payable have been:

Married sufferer with a dependent wife	£11 2s. 6d. a week.
Each dependent child under the age of sixteen years	10s. a week (additional to child endowment)
Sufferer without dependants	£6 17s. 6d. a week (reducible to £4 15s. a week if a person is maintained free of charge in an institution).

There is a means test on income but not on property. The allowance is reduced by the amount by which a person's income from sources other than his allowance exceeds, in the case of a married person, £7 a week, and in the case of a person without a dependent wife, £3 10s. a week.

The following table gives particulars of the number of new cases of tuberculosis notified in Australia for the year 1958–59 :—

TUBERCULOSIS: NEW CASES NOTIFIED, YEAR ENDED 30TH JUNE, 1959.

State or Territory.	Age Group.					Total.
	0–14.	15–34.	35–54.	55 and over.	Not Stated.

Northern Territory
Australian Capital Territory
Australia	1,062,609	4,844,106	1,411,062	7,317,777

The following table sets out expenditure by the Commonwealth Government on its anti-tuberculosis campaign since the start of the campaign.

ANTI-TUBERCULOSIS CAMPAIGN: EXPENDITURE BY THE COMMONWEALTH GOVERNMENT 1947-48 TO 1958-59.
(£.)

Year.	Allowances.	Maintenance.	Capital.	Total.
Total 1947-48 to 1953-54 ..	7,620,256	9,702,894	4,049,570	21,372,720
1954-55	1,904,467	3,752,856	1,709,405	7,366,728
1955-56	1,689,774	4,006,869	1,757,612	7,454,255
1956-57	1,460,651	4,754,765	2,381,210	8,596,626
1957-58	1,254,693	4,569,215	2,128,462	7,952,370
1958-59	1,062,609	4,844,106	1,411,062	7,317,777

7. Anti-Poliomyelitis Campaign.—The success of the 1954 United States field trials of the poliomyelitis vaccine developed by Dr. Jonas Salk and his associates at the University of Pittsburg was announced in April, 1955. The Commonwealth Government immediately decided to produce the anti-polio vaccine in Australia.

With the advantage of the experience of the campaigns in the United States and Canada, Australia has adopted a vaccine which has proved to be safe and effective in building up immunity against poliomyelitis.

The vaccine was being produced in Australia by the end of 1955 under the most rigid safety conditions. Plans were made for comprehensive testing procedures to be carried out at many stages both during the production process and with the finished product. These tests ensured the maintenance of safety standards no less rigid than those laid down in other countries where vaccination campaigns were in progress. The Research Laboratory at the Fairfield Hospital, Melbourne, agreed to act as an independent testing authority under an arrangement with the Commonwealth Government, and the pathology department of the University of Melbourne also agreed to conduct tests. No vaccine was released for use unless the searching requirements of the Commonwealth Serum Laboratories, the Fairfield Hospital, and the University of Melbourne were met.

The vaccine was supplied to the States free of charge and the States accepted responsibility for the cost of their particular vaccination programmes. No child can be vaccinated without the consent of his parents or guardian.

Distribution of the Salk poliomyelitis vaccine to the States began in July, 1956. The States are responsible for the organization and running of their own campaigns and for the distribution of the vaccine in accordance with priority groups established by the National Health and Medical Research Council. The first priority group consists of children in the 0-14 age group, expectant mothers, and persons subjected to special risk. These persons have been found to be the most vulnerable.

Vaccination against poliomyelitis takes the form of three injections of the vaccine. The second injection is given approximately four weeks after the first, and the third injection is given not less than 32 weeks after the first.

Where the incidence of the disease in certain areas approaches epidemic proportions, special efforts have been made to vaccinate as soon as possible all persons in the area who give their consent.

By 30th June, 1959, approximately 2,375,000 children had completed the course of injections and, in addition, approximately 404,000 children had commenced the course.

Campaigns for the mass immunization of adults were not commenced until early in 1958 because available supplies of vaccine up to that time were required for the immunization of children and groups subject to special risk. By 30th June, 1959, 347,795 adults had completed the course of injections, and a further 838,810 had commenced the course.

POLIOMYELITIS: NEW CASES NOTIFIED.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

8. **Free Milk for School Children Scheme.**—In 1950, the States Grants (Milk for School Children) Act was passed. The object of this Act was to improve the diet of school children by the addition of a small quantity of milk each day. All children under the age of thirteen years attending public or private primary schools, including nursery schools, kindergartens, crèches and aboriginal missions, are eligible to receive free milk. The cost of the milk plus half the capital or incidental costs, including administrative expenses of the scheme, is reimbursed by the Commonwealth to the States. All States now participate in the scheme. At 30th June, 1959, approximately 1,485,000 children were entitled to receive free milk under this scheme.

Expenditure by the Commonwealth Government under the scheme since its inception has been as follows:—

COMMONWEALTH EXPENDITURE ON MILK FOR SCHOOL CHILDREN SCHEME.

(£.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Australia.
1950-51 to 1953-54 ..	2,059,047	1,002,766	259,600	406,042	267,614	369,970	943	16,233	4,382,215
1954-55 ..	980,589	498,000	323,340	156,000	127,015	145,695	921	10,760	2,242,320
1955-56 ..	1,042,173	540,000	308,000	184,000	137,211	185,000	1,016	14,048	2,411,448
1956-57 ..	1,094,469	600,901	386,999	200,000	158,659	156,275	1,323	16,146	2,614,772
1957-58 ..	1,139,512	677,000	401,000	212,000	153,600	160,433	860	18,186	2,762,591
1958-59 ..	1,190,048	782,623	474,909	235,879	182,249	181,025	2,799	19,104	3,068,636

The figures in the foregoing table differ slightly from those in the table shown in Chapter XVIII., Welfare Services, page 686, as they include capital and administrative costs. Figures in the latter table represent only expenditure which is a charge on the National Welfare Fund (i.e., the cost of the milk).

§ 3. Commonwealth Laboratories and Research Institutions.

1. **National Health and Medical Research Council.**—In 1926, the Commonwealth Government established a Federal Health Council, in accordance with a recommendation of the Royal Commission on Health (1925), "for the purpose of securing closer co-operation between the Commonwealth and State Health Authorities". This council held sessions each year except in 1932. In 1936, the Commonwealth Government decided to create a body with wider functions and representation, and the National Health and Medical Research Council was established with the following functions:—

- To advise Commonwealth and State Governments on all matters of public health legislation and administration, on matters concerning the health of the public and on medical research.
- To advise the Commonwealth Government on the expenditure of money specifically appropriated to be spent on the advice of this Council.
- To advise the Commonwealth Government on the expenditure of money on medical research and on projects of medical research generally.
- To advise Commonwealth and State Governments upon the merits of reputed cures or methods of treatment which are from time to time brought forward for recognition.

The council consists of the Commonwealth Director-General of Health (as chairman), three officers of his department, the official head of the Health Department in each State, and the Director of Public Health for Papua and New Guinea, together with ten other members one each being nominated by the Federal Council of the British Medical Association, the Royal Australasian College of Surgeons, the Royal Australasian College of Physicians, the Australian Regional Council of the Royal College of Obstetricians and Gynaecologists, the Council of the Australian College of General Practitioners, the College of Pathologists of Australia, the Australian Dental Association, the Australian Paediatric Association, the College of Radiologists of Australasia and (jointly) the Australian universities having medical schools. An eminent layman and laywoman, appointed by the Commonwealth Minister of State for Health, also serve on the council.

The first session of the National Health and Medical Research Council was held at Hobart in February, 1937. The forty-eighth session was held at Sydney in November, 1959.

Under the Medical Research Endowment Act 1937, the Commonwealth Government has made an annual appropriation of funds to assist:—(a) departments of the Commonwealth or of a State engaged in medical research; (b) universities for the purpose of medical research; (c) institutions and persons engaged in medical research; and (d) in the training of persons in medical research.

Approved research institutions under this system now number 74. For 1960, grants for projects numbered 118 in the following fields:—bacteriology, biochemistry, biophysics, clinical research, dentistry, epidemiology, haematology, medical chemistry, neurology, neuro-physiology, obstetrics, pathology, physiology and pharmacology, tuberculosis and diseases due to viruses. In certain instances, equipment and apparatus have been made available by the council; this has greatly facilitated some specialized lines of research. The wide scope of work being carried out is greatly assisted by the formation of committees which meet regularly and advise the council on such subjects as industrial hygiene, public health, epidemiology, maternal and child welfare, radio-active isotopes, antibiotic distribution, nursing, tropical physiology and hygiene, tuberculosis, staphylococcus infections, dentistry and the latest developments in X-ray technology and application.

The research work being done under these grants is of a high standard, many of the individual investigators enjoying international reputations. Beyond this practical achievement, the original objectives of the council are being attained by encouraging young graduates to take up research work and by securing a continuity and permanence of medical research in Australia.

Four scholarships are available each year to allow study overseas for one year. In addition, assistance is often given to scholarship-holders to cover part of their travel expenses.

2. **The National Biological Standards Laboratory.** The Therapeutic Substances Act 1953 provides the Commonwealth with powers to ensure that therapeutic substances used for the prevention, diagnosis and treatment of disease in man and animals are safe, pure and potent.

The Director-General of Health is authorized under this Act to set up laboratories to test such substances. Since 1956, products have been analysed for the Commonwealth in the pharmacology laboratories of the Universities of Sydney and Melbourne, and in the Commonwealth Laboratory, Department of Customs and Excise, Melbourne. In 1958, the first steps were taken to establish an Australian National Biological Standards Laboratory in Canberra.

The Laboratory is divided into two main divisions, a Biological Division and a Pharmaceutical Division. The Biological Division consists of the Bacterial Products Laboratory, the Viral Products Laboratory and an Antibiotics Laboratory. The Pharmaceutical Division consists of an Analytical Chemistry Laboratory, an Endocrine Products Laboratory and a Pharmacology Laboratory.

The Antibiotics Laboratory tests samples of the most widely used antibiotics collected from pharmacies in all States and from the manufacturers. The Analytical Chemistry Laboratory commenced work in March, 1960, the Viral Products Laboratory and the Pharmacology Laboratory in April, 1960.

The National Biological Standards Laboratory will analyse therapeutic substances used in human and veterinary medicine to determine whether they conform to the standards in the British Pharmacopoeia. The laboratories receive International Reference Standards from stocks maintained in London and will issue Australian Reference Standards which have been assayed against the International Standards.

3. Commonwealth Serum Laboratories.—The Laboratories were established in 1916 under the administration of the Department of Trade and Customs and since 1921 have operated under the Department of Health.

Their basic function is to ensure the supply of essential biological products to the Commonwealth in line with its national health needs. This includes—

- (a) Production and supply of essential biological products.
- (b) Research and development relating to biological products and allied fields.
- (c) The maintenance of potential production capacity for use in emergencies.

Since their foundation, the Laboratories have greatly extended in size and scope. They now produce some 450 regular products and many special products for use in the diagnosis, prevention and treatment of human and animal diseases. Professional, technical and other staffs total over 1,100.

Products comprise a full range of human bacterial and virus vaccines, veterinary bacterial and virus vaccines, serum products such as blood fractions, a wide variety of antibacterial and antitoxic sera, antivenenes, penicillin, endocrines, including insulin, A.C.T.H., pituitary and thyroid extracts, allergy test materials and desensitizing preparations, culture media and diagnostic agents for clinical and laboratory work.

Continuous research is conducted into the relevant aspects of bacteriology and immunology, and related fields. As the growth of medical and scientific knowledge in Australia and overseas reveals new methods of diagnosis, prevention and treatment of diseases, this information is applied to the preparation of new biological products at the Laboratories, the most recent being the production of poliomyelitis (Salk) vaccine.

Facilities are maintained for investigation in relation to public health matters which it is inconvenient or impracticable to handle at the Commonwealth Health Laboratories or the School of Public Health and Tropical Medicine.

The Laboratories serve as a national centre for the maintenance in Australia of International Standards of the Permanent Commission on Biological Standards (World Health Organization). They act as a regional reference centre for W.H.O. in collating reports of the prevalence of certain infectious diseases, and provide facilities for the identification of diseases.

Veterinary biological products produced at the Laboratories have given the lead to other producers in Australia, resulting in the diminution of incidence of a number of serious infectious stock diseases.

4. The Commonwealth Health Laboratories.—Health Laboratories, of which there are fourteen, are situated in the following towns: Albury, Bendigo, Cairns, Canberra, Darwin, Hobart, Kalgoorlie, Launceston, Lismore, Port Pirie, Rockhampton, Tamworth, Toowoomba and Townsville. They were established as an essential part of the quarantine

system but were also to undertake research into local health problems and to provide doctors of each district with up-to-date facilities for laboratory investigation and diagnosis. It was realized that co-operation between the general practitioner with his clinical observations and knowledge of the environment of disease on the one hand, and the staff of a well-equipped laboratory on the other, is essential to the investigation and control of disease.

From this standpoint, the Laboratories have already proved their value in the determination of leptospirosis and endemic typhus in North Queensland, in the investigation of special local problems in Darwin, of undulant fever throughout Australia, of silicosis and tuberculosis at Kalgoorlie and of plumbism at Port Pirie. In these investigations, close co-operation has existed with State and local health and hospital services, especially in Queensland where collaboration has yielded exceptionally valuable results in differentiating the groups of fevers previously unclassified in that State. In this investigational work, as well as in more routine activities, the Laboratories have at their disposal the full resources and technical and specialist facilities available at the Commonwealth Serum Laboratories and the School of Public Health and Tropical Medicine, Sydney.

5. Commonwealth Acoustic Laboratories.—Sponsored by the National Health and Medical Research Council, the Acoustic Research Laboratory, Sydney, investigated inter-communication difficulties and noise problems in aircraft and tanks (1942–46). It then investigated the problem of congenital deafness in children resulting from maternal rubella. The Department of Health took over this laboratory in January, 1947, and subsequently established branch laboratories in all other State capitals.

The Acoustic Laboratories Act 1948 gave the Minister for Health the right to establish, maintain and operate, within the Commonwealth, acoustic laboratories for scientific investigations, including tests in respect of hearing aids and their application to the needs of individuals and in respect of problems associated with noise as it affects individuals. In 1949, the Government approved the provision and maintenance of hearing aids, without charge, to deaf school and pre-school children. The minister has extended the Laboratories' functions to include:—(1) provision and maintenance of hearing aids on behalf of Repatriation and other Commonwealth Departments; (2) assistance to the State Education Departments in measuring deafness by providing and maintaining portable audiometers; (3) the making of hearing tests of Civil Aviation aircrew as required by international agreement; and (4) the making of independent tests on behalf of State and other authorities.

The Sydney Laboratory is responsible for staff training, production of equipment, calibration of hearing-aids and audiometers, and the technical administration of branch laboratories.

6. Commonwealth X-ray and Radium Laboratory.—The Commonwealth Radium Laboratory was established in 1929 by the Commonwealth Department of Health to act as the custodian of radium and to ensure its equitable distribution and satisfactory use.

A total of 10 grams of radium, purchased in 1928 by the Commonwealth Government for use in treatment and research, has been distributed on loan to treatment centres throughout Australia. Under the terms of this loan, treatment at well-equipped clinics is available to all persons requiring it, irrespective of their ability to pay. This work is co-ordinated by the Department. From time to time, portions of the original radium holding have been remounted by the Department in forms more suitable for recently developed techniques.

In 1935, the Commonwealth Department of Health extended the work of the Commonwealth Radium Laboratory to include the investigation of the physical problems of radiation therapy generally. This laboratory, now known as the Commonwealth X-ray and Radium Laboratory, is maintained, controlled, and staffed by the Commonwealth Department of Health. It is specifically designed for work with X-rays and radium, and is amply provided with all necessary equipment for research work, including a 400,000 volt high-tension generator. The free-air chamber which acts as the Australian standard X-ray dosimeter is maintained in the Laboratory.

The Laboratory co-operates closely with the local physical services which have been developed in the other capital cities of Australia to provide local facilities for the production of radon, for the calibration of X-ray therapy equipment, and for the measurement of radiation exposure of X-ray and radium workers. It also undertakes investigations into physical problems arising in the use of X-rays and radium treatment. In recent years, the Laboratory has widened its functions to include investigations of the physical aspects of the diagnostic use of X-rays with particular emphasis on miniature radiography.

During the year 1958-59, 66,646 millicuries of radon were prepared and issued from the Laboratory in the form of implants, needles and tubes for use in Victoria, Tasmania, South Australia and Western Australia. A further 23,776 millicuries were issued by the associated centres in Sydney and Brisbane. The corresponding figures for 1957-58 were 77,572 and 23,994 millicuries respectively. The issue of radon from a few centres to serve hospitals all over the continent is an Australian development and enables very efficient use to be made of the radium available.

Supplies of artificial radio-isotopes have been made available through the development of atomic energy programmes overseas. The radio-isotopes can be used medically either as an alternative to natural radio-active materials such as radium and radon, or they may be administered orally or intravenously to patients, in which case the selective up-take by a particular organ or tissue may be used to determine its condition. In addition, radio-isotopes are used in industry, in production control, the investigation of the efficiency of processes and as research tools.

The importation of artificial radio-isotopes is restricted under the Customs (Prohibited Imports) Regulations, approval for importation being given through the Laboratory by the Director-General of Health after it has been established that the isotope will be used safely and usefully. Isotopes used in Australia are obtained from Great Britain, Canada and the United States of America, and are imported through the Laboratory.

During 1958-59, 50 different radio-isotopes were imported for all purposes. This represented 660 separate deliveries from overseas sources of supply. Of this number of shipments, 330 were for medical purposes, 284 for research purposes and 46 for industrial purposes. In 1957-58, the total deliveries were 656, of which 328 were for medical purposes, 280 for research purposes and 48 for industrial purposes. In addition to the 660 deliveries of radio-isotopes arranged by the Laboratory in the year 1958-59, 55 certificates of approval under the Customs (Prohibited Imports) Regulations were issued to permit the entry of radioactive materials imported directly by local firms from their overseas principals. These radioactive materials were for use in industry, medicine and research. In the year 1957-58, the corresponding figure was 43. In addition, in the year 1958-59, 39 certificates of approval were issued to the Australian Atomic Energy Commission to permit the entry of special radio-active materials, including calibrated reference sources, for use within that establishment. Six shipments of static isotopes were also procured.

Regular bulk supplies of radio-isotopes for medical purposes are obtained and these are distributed by the Laboratory as individual doses for use on patients throughout Australia according to a policy developed by the Committee on Radio-isotopes of the National Health and Medical Research Council. These radio-isotopes are issued free of charge.

Seven different radio-isotopes were imported in the year 1958-59 for medical purposes, labelled compounds of radio-iodine, radio-phosphorus and radio-colloidal gold being in greatest demand. However, the use of radio-colloidal gold for therapeutic purposes was reduced to approximately half that of the previous year; colloids of chromic and zirconium phosphate labelled with radio-phosphorus being used as the preferred alternative. During 1958-59, the demand for special compounds labelled with radio-iodine and for radio-chromium, radio-iron and radio-cobalt labelled vitamin B12 continued.

In all, approximately 6,400 individual doses of radio-isotopes were issued by the Laboratory during 1958-59 for use on patients. The corresponding figure for 1957-58 was approximately 6,100.

The use of radio-isotopes in research and industry is also steadily increasing.

Investigations of the degree of protection necessary in particular applications of X-rays and radio-active materials continue to be an important activity of the Laboratory. It prepares specifications of the protection facilities necessary in departments and laboratories employing ionizing radiation in medicine, research and industry and carries out measurements of radiation levels in existing departments and laboratories. An extensive film badge service to measure the radiation dose received by those exposed to ionizing radiation is maintained. In 1958-59, 18,049 film badges were processed and assessed. The corresponding figure for 1957-58 was 16,010 films.

The Laboratory has an extensive library of special radiological literature and issues regular library bulletins. Through its advisory service, the Laboratory is available for consultation to all users of ionizing radiation. Technical communications on topics related to its functions are issued from time to time to medical men engaged in the clinical investigation and treatment of cancer and to research workers and those in industry interested in applications of radiation.

Officers of the Laboratory serve on a number of committees, both national and international.

7. The School of Public Health and Tropical Medicine.—In March, 1930, the Commonwealth Government, under an agreement with the University of Sydney, established a School of Public Health and Tropical Medicine at the University of Sydney for the purpose of training medical graduates and students in the subjects of public health and tropical medicine. The organization of the Australian Institute of Tropical Medicine at Townsville was merged in the new school, and the staff, equipment and material were transferred to Sydney.

The School comprises sections of Preventive Medicine, Tropical Medicine, Occupational Health, Environmental Health, Biochemistry, Bacteriology and Pathology, Parasitology, Medical Entomology and Medical Statistics. The Child Welfare section of the Institute of Child Health is located at the School, with which it is closely associated. The library, which includes approximately 17,000 bound volumes and a large collection of official and institutional papers and reports, forms an important information centre in the subjects of public health and tropical medicine.

The work of the school comprises both teaching and investigation. Courses are held for the university post-graduate diploma in public health and the diploma in tropical medicine and hygiene. Lectures are given in public health and preventive medicine as prescribed for the fifth year of the medical curriculum. Courses are also provided in hygiene and social medicine for students of architecture and social studies, in tropical medicine for lay officers, nurses in tropical service, and missionaries, and in industrial health for engineering students. Training is also provided for certain personnel of the armed services, for laboratory workers from various services and institutions, and for post-graduate nursing diploma students.

Investigation covers a wide field of public health and medical subjects, both in the laboratory and in the field. Field work has been carried out in Australia and in Papua, New Guinea, Norfolk Island and Nauru in co-operation with the local administrations and the South Pacific Commission.

8. Institute of Child Health.—The institute, which was established early in 1950 in association with the School of Public Health and Tropical Medicine, Sydney, is located at the Royal Alexandra Hospital for Children, where a special teaching and research unit with the necessary ancillary services was made available by the Board of the Hospital.

The Director of the Institute is a senior honorary paediatrician on the staff of the Hospital, and thus has access to the 430 beds for teaching purposes. He is also the Professor of Child Health in the University of Sydney.

The Director is required to co-ordinate and control under-graduate and post-graduate teaching in paediatrics and child health, and thus the Institute and its staff are brought into close contact with each group of medical students who attend the Children's Hospital for 10 weeks tuition in paediatrics and child health.

In the 10 years since its foundation, the staff of the Institute has carried out a number of substantial research projects, including the natural history and prevention of rheumatic fever in childhood, accident prevention, endemic goitre, endocrine disorders and stress in children. All told some 90 scientific papers describing the research work have been published in Australian and overseas scientific journals.

The Institute and its staff have come to be recognized as an authoritative source for advice and information on many matters relating to paediatrics and child health. The Director and senior members have acted as consultants to Medical Schools of Universities and to Commonwealth and State Authorities and on missions for the World Health Organization to a number of foreign countries. At present, the staff consists of the Director, a Senior Medical Officer, two other medical officers (full time), four part-time medical officers, a social psychologist, a social worker, clerical and stenographic staff.

9. Commonwealth Bureau of Dental Standards.—This laboratory is concerned with research, standards, and testing, related to dental and allied materials and processes. It became part of the Department of Health in January, 1947, but for the preceding eight years it was sponsored by the National Health and Medical Research Council. During that time, the former Dental Materials Research Laboratory established itself as a recognized authority in its special field and proved to be of particular value to the defence services, government

departments, the dental profession and manufacturers of dental products. By maintaining the quality of dental materials and improving techniques for their use, the Bureau continues to assist the dentist in his service to the community—a service that calls for restorations and appliances of a high degree of precision and permanence under very exacting conditions.

The functions of the Bureau are: (1) original research into dental equipment, materials, techniques and processes; (2) regular reporting of the results of these investigations in recognized Australian scientific journals; (3) the development of specifications for dental materials and equipment, through the Standards Association of Australia, in consultation with a committee representing the Commonwealth Department of Health, the Australian Dental Association, and manufacturers and distributors, and (4) the provision of a consultative service and testing facilities for manufacturers and distributors of dental materials with a view to assisting them in the improvement of existing products and the development of new materials.

10. The Australian Institute of Anatomy.—The Australian Institute of Anatomy is situated in a building erected in Canberra by the Commonwealth Government under the Zoological Museum Agreement Act of 1924. Prior to the passing of this Act, the Commonwealth Government had expressed regret that the Australian nation possessed neither a collection of specimens of the unique and fast disappearing fauna of Australia, nor a museum in which such specimens could be preserved for future generations. Sir Colin MacKenzie, the first Director of the Institute of Anatomy, presented his entire private collection of Australian fauna to the Commonwealth Government. This gift was housed in the Institute. The Institute became part of the Commonwealth Department of Health in 1931.

The original collection has been greatly augmented. A list of gifts to the Australian nation may be found in Official Year Book No. 39, page 1277. In addition to these donations of material, there have been several endowments for orations and lectures, particulars of which are shown in previous issues of the Official Year Book.

The Institute consists of a museum section and a laboratory section. In the museum section, which is open to the public, a portion of the original collection of anatomical specimens assembled by Sir Colin MacKenzie is displayed, together with ethnological collections which have been added since the foundation of the Institute. The material has been arranged to present simple lessons in human hygiene, to display the anatomical features and peculiarities of Australian fauna, and to display aspects of the character of Australian aboriginals and natives of Papua and New Guinea.

A number of Health Department sections are now situated in the Institute. These include the Museum and Medical Artistry Section, the Nutrition Section, the Commonwealth Health Laboratory for the Australian Capital Territory and a Veterinary Laboratory.

The scientific research work of the Institute is now concentrated on problems of nutrition. It takes the form of field surveys of the dietary status of the Australian population and laboratory investigations into the biochemistry of nutrition and metabolism. For further information concerning the Institute, see Official Year Book No. 32, pages 919–21.

§ 4. Control of Infectious and Contagious Diseases.

1. General.—The provisions of the various Acts with regard to the compulsory notification of infectious diseases and the precautions to be taken against the spread thereof may be conveniently dealt with under the heading of quarantine and notifiable diseases, including venereal diseases.

2. Quarantine.—The Quarantine Act is administered by the Commonwealth Department of Health, and has three sections of disease control, as follows:—(i) Human quarantine, which controls the movements of persons arriving from overseas until it is apparent that they are free of quarantinable disease; (ii) Animal quarantine, which controls the importation of animals and animal products from overseas and the security of other animals present on vessels in Australian ports; and (iii) Plant quarantine, which regulates the conditions of importation of all plants and plant products with the object of excluding plant diseases, insect pests and weeds.

In respect of interstate movements of animals and plants, the Act becomes operative only if the Governor-General considers that Commonwealth action is necessary for the protection of any State or States and, in general, the administration of interstate movements of animals and plants is left in the hands of the States.

(i) *Human Quarantine.* All passengers and crews arriving in Australia from overseas, whether by air or sea, are subjected to a medical inspection by quarantine officers for the purpose of preventing the introduction of disease into Australia. At the major ports, full-time quarantine officers carry out the work but in the minor ports local doctors act as part-time quarantine officers. In each State, quarantine activities are controlled by a medical officer of the Commonwealth Department of Health with the title of Commonwealth Director of Health.

The main concern of the examining officers is to detect cases of the quarantinable diseases smallpox, cholera, yellow fever, plague and typhus fever. These diseases are not endemic to Australia and it is of great importance to prevent their entry. Quarantine stations at the major ports and at Darwin, Thursday Island and Townsville are kept ready for occupation at all times. In addition, persons arriving in Australia and suffering from infectious diseases such as chicken pox, mumps, scarlet fever and measles are directed to appropriate care and placed in isolation where necessary.

The increasing use of air travel has created particular quarantine problems. Before the use of air transport, persons suffering from an infectious disease would show symptoms on arrival and before disembarkation. Passengers travelling by air, however, can arrive well within the incubation period, and they are, therefore, required to be vaccinated against smallpox before departure. Those from an area infected with cholera or yellow fever are required to be inoculated in addition against the particular disease prevalent in that area. They are also required to report any sickness which they might suffer within the fourteen days after arrival. Passengers arriving in Australia by sea are also required to be vaccinated against smallpox, but exemption is granted to those who hold religious convictions against vaccination or who are suffering from a medical condition which makes vaccination undesirable. All passengers, whether they arrive by sea or air, are required to give their intended place of residence so that they may be traced if a case of disease occurs among the passengers on the aircraft or ship by which they travelled to Australia.

The number of cases of infectious (non-quarantinable) diseases which were discovered among the passengers and crew of oversea vessels and aircraft calling at Australian ports during the year ended 30th June, 1959, and during the preceding four years, are shown in the following tables.

HUMAN QUARANTINE: CASES OF INFECTIOUS (NON-QUARANTINABLE) DISEASES ON OVERSEA VESSELS AND AIRCRAFT CALLING AT AUSTRALIAN PORTS, YEAR ENDED 30th JUNE, 1959.

Disease.				Number of Oversea Vessels and Aircraft on which Cases were Found.	Number of Cases of Infectious Disease.	
					Passengers.	Crew.
Chicken Pox	23	83	1
Gastro Enteritis	1	65	..
Infective Hepatitis	1	..	1
Influenza	1	17	..
Measles	29	144	5
Mumps	11	22	..
Poliomyelitis	1	1	..
Rubella	3	3	..
Scarlet Fever	1	1	..
Syphilis	1	..	1
Varicella	4	5	1
Whooping Cough	2	3	..
Total	(a) 63	344	9

(a) On some vessels there were cases of more than one disease.

HUMAN QUARANTINE: OVERSEA VESSELS AND AIRCRAFT ARRIVING IN AUSTRALIA AND CASES OF INFECTIOUS (NON-QUARANTINABLE) DISEASE FOUND THEREON.

Year ended 30th June.	Number of Oversea Vessels and Aircraft Cleared.		Number of Oversea Vessels and Aircraft on which Cases were Found.	Number of Cases of Infectious Disease.	
	Ships.	Aircraft.		Passengers.	Crew.
1955	2,319	1,310	48	267	3
1956	2,592	1,417	26	104	4
1957	2,702	1,747	53	216	10
1958	2,658	1,881	61	202	20
1959	2,826	1,938	63	344	9

(ii) *Animal Quarantine.* Animal quarantine, authorized by the provisions of the Quarantine Act 1908–1950, aims at preventing the introduction or spread of animal diseases. It covers the importation of all animals, raw animal products and biological cultures associated with animal diseases, and goods associated with animals.

Domesticated animals, i.e., horses, cattle, pigs, sheep, goats, dogs, cats and poultry, are admitted from a limited number of countries depending on diseases present in the country of origin. All must be accompanied by health certificates which include prescribed tests. On arrival in Australia, they are subject to quarantine detention.

Zoological specimens are imported into registered zoos where they remain in permanent quarantine. Circuses are also registered if exotic species of animals are kept. In a somewhat similar manner, animals for scientific purposes are imported to approved laboratories. All these premises are kept under constant surveillance. Raw animal products such as hair, special types of wool, skins and hides, are specially treated under quarantine control, while such items as raw meat, sausage casings and eggs, which cannot be sterilized, are admitted from very few countries. Other items such as harness fittings, fodder, and ship's refuse, are treated to destroy any possible infection.

The Division of Veterinary Hygiene was created in 1926 to deal with the administration of animal quarantine. Formerly, the full responsibility for this administration fell on the Director of Quarantine. The organization of the Division provides an excellent example of Commonwealth and State co-operation. The central administration is situated within the Health Department at Canberra, with a Director, an Assistant Director and Veterinary Officers. The Principal Veterinary Officer of the Department of Agriculture in each State is appointed Chief Quarantine Officer (Animals) of the State, and members of his staff Quarantine Officers (Animals). These State officers carry out the quarantine policy formulated by the central administration. Quarantine accommodation is provided in permanent animal quarantine stations at each capital city.

The Division participates in world-wide international notification of the more serious contagious diseases of animals and maintains a census of such diseases throughout the world. Information regarding animal diseases and parasites in Australia is also collected and disseminated by means of service publications. Consultation on technical matters is maintained with various scientific institutions, notably the Commonwealth Scientific and Industrial Research Organization. In matters of policy and the quarantine control of imports, there is a close liaison with the Department of Customs and Excise.

The Division collaborates with the "General" and "Plant" divisions of the quarantine service. Many diseases of animals are communicable to man and for this reason "Animal" and "General" quarantine administration are in some respects inseparable. Similarly the interests of "Animal" and "Plant" divisions overlap, many items such as insects, fodder and straw being the subject of combined control.

In each alternate year, the Director of the Division convenes the Biennial Conference of Principal Commonwealth and State Veterinarians which meets under the auspices of the Australian Agricultural Council to discuss problems of animal health and disease control and animal quarantine.

In the Australian Capital Territory, veterinary officers of the division exercise control over animal disease, dairy and piggery hygiene, manage the Canberra abattoir and give advice to stockowners.

(iii) *Plant Quarantine.* Since 1st July, 1909, the importation into Australia of all plants or parts of plants, cuttings, seeds and fruits, whether living or dead, has been subject to an increasingly stringent quarantine with the object of preventing the introduction of insect pests, plant diseases and weeds not yet established in this country. Under the Quarantine Act 1908-1950, quarantine inspectors are required to examine all plant material at the first port of entry and to release only material free from diseases and pests. Everyone entering Australia is required to declare if he or she has any plant material in luggage or personal effects. Heavy penalties are laid down for those found evading the regulations. All plant material entering as cargo must also be declared.

When the Commonwealth became responsible for all plant quarantine, the State Governments agreed to co-operate by providing and maintaining inspection facilities and personnel, for which they are reimbursed by the Commonwealth. In 1921, the administration of the regulations came under the newly-formed Department of Health, and in 1927 the Division of Plant Quarantine was created, under a Director who is responsible for policy and legislation and for co-ordinating the work of the State officers, who carry out the detailed administration in their capacity as Commonwealth officers.

Any plant material found carrying diseases or pests, or suspected of doing so, may be ordered into quarantine for remedial treatment, or if the treatment be impracticable may be destroyed. The cost of treatment is met by the importer. Regulations governing the different types of plants are based on the following broad principles:—(a) The importation of plants likely to be infected with plant diseases, noxious fungi or poison plants is prohibited; (b) Agricultural seed must conform to standards of purity, insect pest and disease freedom; (c) Many commodities such as hops, cotton, peanuts in shell, potatoes, certain crop seeds, vines and specified plants may be imported only by approved importers under special conditions; (d) Certain plant products such as bulbs and timber (in logs or sawn) from specified areas may be imported only if accompanied by certificates showing that prescribed treatment has been given in the country of origin; (e) All nursery stock, including bulbs, must be grown in post-entry quarantine. It may only be imported by approved importers who are registered for this purpose. The numbers of plants which may be imported in any one year are limited.

3. *Notifiable Diseases.*—(i) *General.* (a) *Methods of Prevention and Control.* Provision exists in the Health Acts of all the States for the observance of precautions against the spread of, and the compulsory notification of, infectious disease. When any such disease occurs, the local authority must be notified at once, and in some States notification must be made also to the Health Department.

As a rule, the local authorities are required to report from time to time to the Central Board of Health in each State on the health, cleanliness and general sanitary state of their several districts, and on the appearance of certain diseases. Regulations are prescribed for the disinfecting and cleansing of premises, and for the disinfection or destruction of bedding, clothing or other articles which have been exposed to infection. Bacteriological examinations for the detection of plague, diphtheria, tuberculosis, typhoid and other infectious diseases within the meaning of the Health Acts are continually being carried out. Regulations are provided in most of the States for the treatment and custody of persons suffering from certain dangerous infectious diseases, such as smallpox and leprosy.

(b) *Diseases Notifiable and Cases Notified in each State and Territory.* The following table, which has been compiled by the Commonwealth Department of Health, shows for each State and Territory the diseases notifiable in 1958 and the number of cases notified. Diseases not notifiable in a State or Territory are indicated by an asterisk.

**DISEASES NOTIFIABLE IN EACH STATE AND TERRITORY OF AUSTRALIA

* Not notifiable.

(a) Notifiable from December, 1958.

(b) Notifiable from August, 1958.

NOTE.—No cases of cholera, plague, smallpox, epidemic typhus or yellow fever were notified.

(ii) *Venereal Diseases.* The prevention and control of venereal diseases are undertaken by the States. Each State except South Australia has a Venereal Diseases Act, or provisions in its Health Act govern the control of these diseases. Under these Acts, treatment has been made compulsory. Consequent steps have been taken to ensure free treatment by medical practitioners or in subsidized hospitals and clinics. Registered pharmaceutical chemists are allowed to dispense prescriptions for venereal diseases only if they are signed by medical practitioners. Clinics have been established and, in some cases, beds in public hospitals have been set aside for patients suffering from these diseases.

Penalties may be imposed on a patient who fails to continue under treatment. Clauses are inserted in the Acts which aim at preventing the marriage of any infected person and the employment of an infected person in the manufacture or distribution of foodstuffs.

§ 5. Commonwealth Grants to Organizations Associated with Public Health.

1. **General.**—In addition to providing the services mentioned in sections 1–4 above, the Commonwealth Government gives financial assistance to certain organizations associated with public health. Examples of organizations included in this category are the National Fitness Organizations, the Royal Flying Doctor Service of Australia, the Red Cross Blood Transfusion Service, and the Lady Gowrie Child Centres.

2. **National Fitness.**—In 1938, arising from a recommendation of the National Health and Medical Research Council, the Commonwealth Government appointed a Commonwealth Council for National Fitness, under the Commonwealth Minister for Health, to effect collaboration of Commonwealth, State and Local Government authorities in the National

Fitness Movement. Following the recommendations of the first Commonwealth Council meeting in 1939, the Commonwealth Government agreed to make available an annual sum of £20,000 for five years and grants were allocated to each State for purposes of organization and to each of the six Australian universities to establish lectureships in physical education. In June, 1942, this grant was increased to £72,500 to include grants to State Education Departments and for the work in the Australian Capital Territory.

The functions of autonomous National Fitness Councils operating in each State are connected with voluntary leader training, camping and hostels, assisting the work of voluntary youth and amateur sports organizations, and providing advisory services to these organizations.

The six State Education Departments spend their Commonwealth grants to assist the promotion of physical education programmes in schools and teachers' colleges. This is done mainly through the organization of training courses for teachers and the development of school camping, which in most States is part of the regular school physical education programme. In New South Wales and Victoria, holiday play centres and camps have become a special feature of the programmes, while Queensland has led the way in the provision of school swimming pools financed in co-operation with parent organizations.

In the universities, departments of physical education provide either a diploma course in physical education or a major course in physical education as part of a degree course.

An annual grant of £2,000 is allocated in the Australian Capital Territory and is distributed on a £1 for £1 basis to youth and sports organizations for the purchase of equipment, the development of coaching schemes, and the extension of club and camp facilities.

3. Royal Flying Doctor Service of Australia.—The purpose of the Royal Flying Doctor Service of Australia is to provide medical and dental services to white and aboriginal persons in isolated areas. Most remote homesteads are equipped with two-way radio sets which they use for receiving ordinary radio programmes, participating in the School of the Air, and for contacting each other. In cases of minor illness or injury, they also use these sets to seek medical advice. If the illness or injury is serious, a doctor flies to the homestead and, if necessary, flies the patient to the nearest hospital. Standard medicine chests are supplied by the service. Each chest contains a first-aid book and instructions on the use of the various drugs and medical supplies in it. Further instructions are given by doctors over the air.

From time to time, special purpose work is undertaken in connexion with flood relief, searching for lost parties and co-ordinating cattle movements.

The service is not conducted with a view to profit. In some sections, small charges are made for particular services or a fixed annual charge is levied on graziers. Other sections rely on voluntary contributions from those who use their services. Donations and government contributions help to provide much of the overhead and capital expenditure incurred each year.

The Commonwealth has made an annual grant to this organization for operational expenses since 1936. Prior to that, from 1928 to 1931, the Commonwealth subsidized the Australian Inland Mission Aerial Medical Service. The Commonwealth annual grant to the Royal Flying Doctor Service of Australia towards maintenance was increased from £25,000 to £40,000 per annum for four years from 1st July, 1958. The Commonwealth grant towards capital expenditure was increased from £15,000 to £27,500 per annum for the same period. This capital expenditure grant is made on a £1 for £1 basis, in respect of approved projects.

The Royal Flying Doctor Service of Australia is conducted by a federal council comprising representatives of six sections, namely Queensland, New South Wales, Victoria, South Australia, Western Australia and the Eastern Goldfields of Western Australia. The Queensland, New South Wales and South Australian sections are centred in their own States but in Western Australia there are three centres, that in the far north being under the control of the Victorian section, and that in the south-east under the control of the Eastern Goldfields section. The third one, which has bases at Port Hedland and Meekatharra, is sponsored by the Western Australian section.

4. Red Cross Blood Transfusion Service.—The Australian Red Cross Society conducts a blood transfusion service in all States.

Before 1952–53, the cost of the Red Cross Blood Transfusion Service was borne by the Red Cross Society with assistance from the State Governments. In 1952, the Commonwealth made an amount of £50,000 available to the Red Cross Society through the State Governments. The States were to continue to assist the society at the same level as previously and make arrangements with the society to share any deficit still remaining.

The Commonwealth recognized that the proper maintenance of a blood transfusion service was of the utmost importance to the welfare of the community and that the service was one eminently suited for operation by the Australian Red Cross Society. In March, 1954, therefore, the Commonwealth offered each State Government a grant equal to 30 per cent. of the certifiable operating expenses incurred by the Society in the conduct of the blood transfusion service in that State. The grant was to be made subject to the conditions that the government of the State concerned agreed to meet 60 per cent. of the cost of operating the service in that State, leaving the society to meet the remaining 10 per cent. of the cost. All States accepted this proposal. The following table sets out the payments made by the Commonwealth government to the State governments in 1958-59:—

RED CROSS BLOOD TRANSFUSION SERVICE: PAYMENTS TO STATES FOR 1958-59.

					£
New South Wales	35,263
Victoria	40,858
Queensland	25,102
South Australia	13,468
Western Australia	12,008
Tasmania	4,830
Total	131,529

5. Lady Gowrie Child Centres.—In 1940, the Commonwealth Government established a pre-school demonstration centre in each of the six capital cities. These centres are known as the Lady Gowrie Child Centres and are administered by the Australian Pre-school Association for the Commonwealth Department of Health.

The specialized function of the centres is that of demonstration and research and the programmes are carried out under the supervision of the Federal Pre-school Officer. Each centre is concerned with a study of the factors promoting and retarding physical and mental health in young children, and in demonstrating an educational health programme based on the developing needs of children aged 3 to 6 years.

The centres are used for observation by university students of Medicine, Psychology, Education, Social Studies, Architecture, Physical Education, Teacher Training Colleges, Nursing Colleges and Domestic Science.

Fuller information concerning these centres was given in earlier issues of the Year Book (*see* No. 44, p. 536).

C. INSTITUTIONS.

§ 1. General.

In Australia, institutions related to public health may be classified to three groups: (a) State, (b) public and (c) private. To the first group belong those institutions wholly provided for by the State, such as the principal mental hospitals in the various States and the Government and leased hospitals in Western Australia. To the second group belong public institutions of two kinds, namely:—(i) those partially subsidized by the State or by State endowments for maintenance, but receiving also private aid, and (ii) those wholly dependent upon private aid. To the first of these two kinds belong such institutions as the principal metropolitan hospitals; in the second are included institutions established and endowed by individuals for the benefit of the needy generally. All institutions of a private character are included in the third group. A more or less accurate statistical account is possible in classes (a) and (b), but in respect of (c) general tabulation is impossible. Owing to differences in the dates of collection and tabulation, it is impossible to bring statistics of some charitable institutions to a common year.

§ 2. Public Hospitals (other than Mental Hospitals).

1. General.—All the State capitals have several large and well-equipped hospitals and there is at least one in every important town. In large centres, there are special hospitals for infectious diseases, tubercular patients, women, children, and patients suffering from chronic diseases.

The particulars given herein refer to public hospitals at the latest available date and include all institutions affording hospital relief, whether general or special, with the exception of mental hospitals, repatriation hospitals, and private hospitals conducted commercially.

2. **Number, Staff and Accommodation.**—Details regarding the number of public hospitals, staff, and accommodation for the year 1957–58 are given in the following table:—

PUBLIC HOSPITALS: NUMBER, STAFF AND ACCOMMODATION, 1957–58.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

The figures for accommodation shown in the table above include particulars, where available, of a considerable number of beds and cots for certain classes of cases in outdoor or verandah sleeping places.

3. **In-Patients Treated.**—The following table furnishes particulars of in-patients treated. The figures shown refer to cases, that is to say, a person who is admitted to hospital twice during a year is counted twice. Newborn babies are excluded unless they remain in hospital after their mothers' discharge.

PUBLIC HOSPITALS: IN-PATIENTS TREATED, 1957–58.

In-patients at end of year—									
Males ..	6,540	3,599	3,618	1,116	1,444	827	166	64	17,374
Females ..	9,003	5,110	4,143	1,411	1,487	918	126	117	22,315
<i>Persons ..</i>	<i>15,543</i>	<i>8,709</i>	<i>7,761</i>	<i>2,527</i>	<i>2,931</i>	<i>1,745</i>	<i>292</i>	<i>181</i>	<i>39,689</i>
Average daily number resident ..	16,629	8,474	7,490	2,527	2,748	1,740	266	182	40,056

In addition to those admitted to the hospitals, there are large numbers of out-patients treated. During 1957–58, there were 1,107,073 out-patients treated in New South Wales, 541,743 in Victoria, 588,878 in Queensland, 92,718 in South Australia, 127,000 (estimated)

in Western Australia, 83,398 in Tasmania, 86,238 in the Northern Territory and 13,960 in the Australian Capital Territory, making an estimated total for Australia of 2,641,000. The figures quoted refer to cases, as distinct from persons and attendances.

4. **Revenue and Expenditure.**—Details of the revenue and expenditure for the year 1957–58 are shown in the next table. The revenue includes the Commonwealth Hospital Benefits Scheme.

PUBLIC HOSPITALS: REVENUE AND EXPENDITURE, 1957–58.

(a) Partly estimated.
for New South Wales.

(b) Up to and including 1954–55, excludes loan receipts and expenditure

§ 3. Leper Hospitals.

Isolation hospitals for the care and treatment of persons suffering from Hansen's disease (leprosy) are located at Little Bay, New South Wales; Fantome Island, North Queensland; Derby, Western Australia; and East Arm Settlement, Northern Territory. Special wards for the isolation of leprosy patients have been provided at Fairfield (Victoria) and Wooroloo (Western Australia). Peel Island (Queensland) lazaret was closed down on 5th August, 1959, the patients being transferred to the chronic diseases section of South Brisbane Hospital. At the end of 1959, there were seven cases at Little Bay, 20 at Fantome Island, 126 at Derby, 164 at East Arm Settlement, seven at Fairfield, one at Wooroloo and 10 at South Brisbane Hospital, including three voluntary patients (arrested cases). Of the 335 cases, 263 were full-blood aboriginals, 43 were half-caste aboriginals (including one Japanese-aboriginal half-caste), two were South Sea Islanders, one was an Asian and 26 were Europeans.

§ 4. Mental Hospitals.

1. **General.**—The methods of compiling statistics of mental patients are fairly uniform throughout the States, but there is an element of uncertainty about possible differences in diagnosis in the early stages of the disease. Statistics of mental hospitals (except those relating to revenue and expenditure) include particulars of the two licenced houses in New South Wales. The figures exclude those of reception houses and observation wards in gaols. There are no mental hospitals in the Northern Territory or the Australian Capital Territory.

2. **Hospitals, Staff and Accommodation.**—Particulars regarding the number of hospitals, the medical and nursing staff, and accommodation are given in the following table for the year 1958. Figures for Victoria and Western Australia relate to 31st December, 1958. Figures for the other States relate to 30th June, 1958.

MENTAL HOSPITALS: NUMBER, STAFF, ACCOMMODATION, 1957-58.

Females	3.83	3.67	3.01	2.90	2.42	2.32	3.41
Persons	3.73	3.54	3.25	2.97	2.70	2.26	3.39
Average number of patients resident in mental hospitals per 1,000 of population—							
Males	3.19	2.93	3.35	3.00	2.71	2.15	3.03
Females	3.20	3.13	2.81	2.80	2.04	2.34	2.96
Persons	3.20	3.03	3.08	2.90	2.38	2.24	3.00

(a) Year ended 31st December, 1958.

(b) Includes persons treated at the Epileptic Home.

Persons who are well advanced towards recovery are allowed to leave the hospitals and live with their relatives or friends, but they are under supervision and their names are kept in the records. These persons have been included in the above table as patients at the end of the year.

4. Revenue and Expenditure, 1957-58.—Mental hospitals are maintained by the State Governments. They derive a small proportion of their revenue from other sources (chiefly patients' fees, pharmaceutical benefits and sale of farm produce), but in 1957-58 this source provided less than 4 per cent. of all their revenue. For a statement on the funds provided by the Commonwealth Government for mental hospitals, see para. 3. Mental Hospitals, page 661.

In New South Wales, the expenditure includes the cost of Broken Hill patients treated in South Australian mental hospitals:—

6. Number of Mental Patients.—The total number returned as under treatment at the end of each year shows a slight increase during the period but the proportion to total population shows a slight decline. A more rational attitude towards the treatment of mental cases has resulted in a greater willingness in recent years to submit afflicted persons to treatment at an early stage, and an increase in the number of recorded cases, therefore, does not necessarily imply an increase in mental diseases. The difference between States in the number of patients in mental hospitals per 1,000 of population may also to some extent be the result of differences in practice. Figures for Victoria and Western Australia relate to 31st December of the year shown; figures for the other States relate to 30th June of the year shown.

CHAPTER XVIII.

WELFARE SERVICES.

A. COMMONWEALTH SOCIAL SERVICES.

§ 1. Introduction.

Under the provisions of section 51 of the Constitution, the Commonwealth Government is empowered to legislate on:—

“(xxiii) Invalid and old-age pensions:

(xxiiia) The provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances:”.

The latter paragraph was inserted in the constitution after being accepted by the electors at a referendum on 28th September, 1946. The enabling Act was assented to on 19th December, 1946.

Before 1947, each social service benefit was paid under a separate Act. On 1st July, 1947, with the passage of the Social Services Consolidation Act 1947, all Acts providing social service benefits were amalgamated. This Act eliminated certain anomalies and obsolete provisions and changed the title “old-age pension” to “age pension”. The word “Consolidation” was dropped from the short title of the Act in 1954. The Act is at present styled the Social Services Act 1947–1959.

The social service benefits provided by the Commonwealth Government, and the date on which each came into operation, are:—

Age pension	1st July, 1909
Child endowment (for other than first child)	1st July, 1941
Child endowment (for first child)	20th June, 1950
Commonwealth Rehabilitation Service	10th December, 1948
Funeral benefit	1st July, 1943
Invalid pension	15th December, 1910
Maternity allowance	10th October, 1912
Sickness benefit	1st July, 1945
Special benefit	1st July, 1945
Unemployment benefit	1st July, 1945
Widows' pension	30th June, 1942

Information concerning these benefits appears in later sections of this chapter, pages 687–700. Particulars of benefits provided under the National Health Service appear in Chapter XVII.—Public Health, pages 660–666.

§ 2. Commonwealth Expenditure on Social and Health Services.

1. **National Welfare Fund.**—The National Welfare Fund was established by the National Welfare Fund Act 1943 to finance a scheme of national welfare. In introducing this measure to Parliament, the Prime Minister said that part of the scheme was to be introduced immediately, and part was to be deferred until after the end of the war. A certain balance, which would therefore accrue to the fund, would be invested in Commonwealth securities, and would thus provide finance for the war effort.

The fund operated from 1st July, 1943. At its commencement, it was used to finance funeral benefits and maternity allowances. Other social and health benefits were made a charge on the fund from time to time. At present, expenditure on all benefits except repatriation and a few minor social and health benefits is met from the fund. The fund is used only to finance the benefits themselves; it is not used to finance the cost of administering the benefits, nor on capital works associated with the benefits.

For particulars of the income of the fund, *see* Chapter XXI, Public Finance, Part A, § 2, III., para. 6. The following table sets out expenditure from the fund during 1958–59.

(a) Includes special benefits to migrants in reception and training centres. (b) Paid to the State Governments as a contribution towards the maintenance of institutions for the treatment of tuberculosis. (c) This item covers the cost of district laboratory services, the free supply of prophylactic materials and biological products (e.g., insulin, poliomyelitis and diphtheria prophylactics), the supply and maintenance of hearing aids for children, subsidies to voluntary organizations conducting home-nursing services, and certain costs associated with the blood transfusion services of the Australian Red Cross Society. (d) Includes an amount of £403,911 for the production of poliomyelitis vaccine. (e) Contribution to rental rebates under 1945 Commonwealth and State Housing Agreement.

Expenditure from the fund during each of the years 1954-55 to 1958-59 is shown in the following table. A graph showing expenditure from the fund from 1942-43 to 1958-59 is to be found on page 691.

(a) See footnote to table on p. 693.

2. **Capital Expenditure.**—Particulars of Commonwealth capital expenditure on mental hospitals and the Anti-Tuberculosis campaign are given in Chapter XVII., Public Health, *see* pages 661 and 664. Grants are made to private organizations for the construction of homes for elderly people (*see* para. 4, p. 701).

3. **Administrative Expenditure.**—Information concerning the cost of administering each benefit separately is not compiled. Particulars of the cost of administering the Department of Health and the Department of Social Services may be found in Chapter XXI., Public Finance, Division A, Section 2, III., para. 5.

§ 3. Age and Invalid Pensions.

Age pensions are payable to men, 65 years of age and over, and women, 60 years of age and over, who have resided in Australia continuously for at least 20 years, which need not be immediately prior to the date of claim for a pension. Absence in a Territory of the Commonwealth, any periods of absence during which a person's home remained in Australia, and absences in certain other circumstances including, in the case of a claimant who has had at least 18 years' residence, occasional absences aggregating up to 2 years plus 6 months for every year of residence in excess of 18 years, are counted as residence.

Invalid pensions are payable to persons, 16 years of age and over, who have resided in Australia for a continuous period of five years (including certain absences), and who are permanently incapacitated for work to the extent of at least 85 per cent. or permanently blind. If the incapacity or blindness first occurred outside Australia, except during a temporary absence, a total of 20 years' residence is necessary. Certain absences count as residence.

Aboriginal natives, other than those who are nomadic or primitive, are eligible for age and invalid pensions on the same conditions as other members of the community.

A pension is not payable to:—an alien (except a woman who, before marriage, was a British subject); a person who has deprived himself of property or income in order to qualify for a pension; a person in receipt of income of £429 per annum (£858 per annum for a married couple); or a person who owns property, apart from his permanent home and other exempt property, to the net value of more than £2,250 (£4,500 for a married couple). Pensioners with children may, in certain circumstances, have additional income of 10s. a week for each child under 16 years of age.

Since 8th October, 1959, the maximum rate of pension has been £247 per annum (£4 15s. a week). The wife of an invalid pensioner (or an age pensioner who is permanently incapacitated for work or permanently blind) may be granted a wife's allowance of not more than £91 per annum (£1 15s. a week). A child's allowance of £29 18s. per annum (11s. 6d. a week) is also paid to an invalid pensioner who is maintaining a child under 16 years of age. If a pensioner is maintaining more than one child, his pension is increased, subject to the means test, by £26 per annum (10s. a week) for each additional child. Supplementary assistance of £26 per annum (10s. a week) is payable to single pensioners and to married pensioners whose spouses do not receive pension or allowance, if the pensioner pays rent and is considered to be entirely dependent on his pension. At 30th June, 1959, 395,540 age pensioners (77 per cent. of all age pensioners) and 73,018 invalid pensioners (87.1 per cent. of all invalid pensioners) were receiving an annual pension of £227 10s. or more.

If a pensioner is an inmate of a benevolent home, £1 13s. a week of his pension is paid to him. The rest is paid to the home for his maintenance, except where he is a patient in an infirmary ward.

Age and invalid pensions (other than invalid pensions paid to blind persons) and allowances paid to wives of invalid pensioners (but not the child's allowance of 11s. 6d. a week) are subject to a means test. They are reduced by the amount by which a pensioner's other income exceeds £182 per annum (£3 10s. a week). Certain types of income are excepted. The main exceptions are:—Income from property; gifts or allowances from children, parents, brothers or sisters; benefits from friendly societies; child endowment or other payments for children; Commonwealth health benefits and amounts received from registered benefit organizations.

The value of free board and lodging received by a pensioner is assessed as income of 12s. 6d. a week.

The annual rate of pension or allowance is further reduced by £1 for every complete £10 by which the value of property owned by a pensioner exceeds £200, and no pension is

payable if the value of the property exceeds £2,250. Certain types of property are disregarded. They include the permanent home of the pensioner, his furniture and personal effects, the surrender value (up to £750) of life insurance policies, the capital value of annuities or contingent interest, and the present value of any reversionary interests.

For the purposes of the mean test, the income and property of a married person are considered to be half the total income and property of the husband and wife (unless they are legally separated or in other special circumstances). This means that the pension of a married pensioner, whether or not his spouse is a pensioner, will not be reduced because of his other income unless that income exceeds £364 per annum (£7 a week), nor will his pension be reduced because of his property unless the value of that property exceeds £400.

The following statement shows the rates of pension at 1st July, 1909, and the rates as they have been varied since that date, subject in all cases to income and property qualifications:—

(a) Excludes amounts payable for wives and children of invalid pensioners and supplementary assistance.

(b) Additional pension of £6 10s. per annum (2s. 6d. a week) was payable to a pensioner with no income. Pensioners with income of less than 2s. 6d. a week were paid additional pension of 2s. 6d. less the amount of income.

(c) Variation according to change in retail price index number.

(d) Increase paid on 9th July, 1942, retrospective to 2nd April, 1942.

(e) Rate restored to £70 4s. per annum under National Security (Supplementary) Regulations 112A—Statutory Rule 315 of 1943.

NOTE.—Provision for variations according to retail price index numbers was repealed on 6th April, 1944.

During 1958–59, 54,683 age pension claims were granted, 1,114 pensioners were transferred from the invalid pension list, and 39,201 pensions expired through cancellations and deaths. The number of age pensioners at 30th June, 1959, was 513,789, of whom 165,375 (or 32 per cent.) were males, and 348,414 (or 68 per cent.) were females.

The recorded ages of the 54,683 persons (21,229 males and 33,454 females) to whom age pensions were granted during the year 1958–59 varied considerably, ranging from 8,845 at age 60 to four who were over 97; 39,626 were in the 60–69 age-group. The conjugal condition of these new pensioners was as follows:—Males—single, 2,281; married, 15,543; and widowed and divorced, 3,405; Females—single, 4,181; married, 18,418; and widowed and divorced, 10,855.

During 1958–59, 13,903 invalid pension claims were granted, 5,870 pensions ceased through cancellation or death, and 1,114 invalid pensioners were transferred to the age pension list. The number of invalid pensioners at 30th June, 1959 was 83,853, of whom 46,014 (or 55 per cent.) were males and 37,839 (or 45 per cent.) were females. Pensioners in benevolent homes have been included.

The recorded ages of the 13,903 persons (8,111 males and 5,792 females) to whom invalid pensions were granted during 1958-59 varied widely, 1,152 (8 per cent.) were in the 16-19 years age-group, 2,321 (17 per cent.) were in the 20-44 years age-group; 7,057 (51 per cent.) were in the 45-59 years age-group, 2,567 (18 per cent.) were in the 60-64 years age-group, and 806 (6 per cent.) were over 65 years of age.

The conjugal condition of persons to whom invalid pensions were granted during the year was as follows:—Males—single, 2,597; married, 4,928; and widowed and divorced, 586: Females—single, 2,010; married, 2,804; and widowed and divorced, 978.

AGE AND INVALID PENSIONS, 30th JUNE, 1959.

(a) Number of pensioners per 1,000 persons of pensionable age (males aged 65 years and over and females aged 60 years and over). (b) Includes age and invalid pensioners in benevolent homes. (c) Includes allowances and supplementary assistance. (d) Excludes age pensioners in benevolent homes. (e) Excludes invalid pensioners in benevolent homes. (f) On 30th June, 1958, 15,205 invalid pensioners in New South Wales were transferred to their correct designation of age pensioners.

§ 4. Child Endowment.

A person who is resident in Australia and has the custody, care and control of one or more children under the age of 16 years, or an approved institution of which children are inmates, shall be qualified to receive an endowment in respect of each child under 16. There are provisions to meet cases of families divided because of divorce, separation, unemployment or death of a parent. There is no means test.

Twelve months' residence in Australia is required if the mother and the child were not born here, but this requirement is waived if the Department of Social Services is satisfied that they are likely to remain in Australia permanently. Where the child's father is not a British subject, endowment is payable if the child was born in Australia, if the mother is a British subject, or if the Department is satisfied that the child is likely to remain permanently in Australia.

Under certain conditions, endowment may be paid to Australians who are temporarily absent overseas. Endowment is payable to aboriginal natives unless they are nomadic or primitive.

From 1st July, 1941, the rate of endowment was 5s. a week for each child in excess of one in a family, and for each child under 16 in an approved institution. The rate was increased to 7s. 6d. a week in June, 1945, and to 10s. a week in November, 1948. Since June, 1950, the rates of endowment have been 5s. a week for the first child in a family, 10s. a week for each other child in a family, and 10s. a week for each child in an institution.

The number of families receiving child endowment at 30th June, 1959, was 1,451,516, an increase of 36,138 or 2.5 per cent. during the year. The following table shows, for each State and Territory, the number of claims for child endowment in force and the number of endowed children at 30th June, 1959.

CHILD ENDOWMENT: CLAIMS AND ENDOWED CHILDREN, 30th JUNE, 1959.

The following table shows, for Australia, the number of claims, the number of endowed children and the annual liability at 30th June for each of the years from 1955 to 1959 and the actual expenditure for the years 1954-55 to 1958-59.

CHILD ENDOWMENT SUMMARY: AUSTRALIA.

At 30th June—	Family Group Claims.	Institutions.	Endowed Children.	Annual Liability for Endowment. (a)	Total Payments. (a) (b)
				£	£
1955	1,304,227	392	2,788,561	55,547,635	52,529,902
1956	1,339,807	392	2,875,664	57,349,773	60,380,685
1957	1,378,169	397	2,978,191	59,516,769	57,036,962
1958	1,415,378	415	3,073,945	61,522,656	58,733,561
1959	1,451,516	421	3,171,823	63,597,690	67,539,615

(a) A number of endowments are paid every twelve weeks. During two years out of every three, there are four such payments, but every third year there are five. Since the size of the amount causes considerable fluctuations in the figures for expenditure from year to year, figures for annual liability reflect trends in expenditure on child endowment more accurately than do figures for expenditure.

(b) Year ended 30th June.

§ 5. Commonwealth Rehabilitation Service.

The Commonwealth Rehabilitation Service has been set up to help persons who are too disabled to work or who have had to give up their employment because of sickness or injury. It aims at restoring disabled persons so they can earn a living and lead useful lives. They are given suitable treatment and training, the cases selected being those in which the person's disability is remediable and there are reasonable prospects of his engaging in a suitable vocation within three years after the commencement of treatment or training.

The benefits are available to invalid and widow pensioners, persons receiving unemployment, sickness or special benefits, persons receiving tuberculosis allowances and persons aged 14 or 15 who, without treatment and training, would be likely to qualify for

an invalid pension on reaching the age of 16 years. Other persons may participate in the scheme upon reimbursement of the cost of treatment and training. During treatment, payment of pension or benefit continues. When vocational training begins, the pension or benefit is suspended and a rehabilitation allowance, together with a training allowance of £1 10s. a week, is paid instead. With an invalid pensioner, or a sickness, unemployment or special beneficiary, this is equivalent to and calculated in the same manner as an invalid pension. In the case of a widow pensioner, the rate is the same as that of the widows' pension.

Living-away-from-home allowances are paid where necessary. Fares and living expenses (including those of an attendant where required) incurred in connexion with treatment, training or attendance for an interview or for medical examination may also be paid. A person receiving treatment or training may be provided, free of charge, with necessary artificial replacements, surgical aids and appliances. He may also be provided with books, equipment and tools of trade, costing not more than £40. If these are retained by him, he is required to pay the cost, but payments may be made by small instalments after he has commenced in employment.

If the treatment or vocational training does not result in the trainee being able to engage in employment, he receives the pension or benefit to which he is entitled.

The numbers of persons receiving benefits who were examined, accepted, trained and placed in employment during the year 1958–59 are shown in the following table:—

COMMONWEALTH REHABILITATION SERVICE: AUSTRALIA, 1958–59.

Type.	Examined.	Accepted.	Completed Training.	Placed in Employment.	
				After Training.	Without Training.
Invalid pensioners	12,348	258	89	79	50
Widow pensioners	6	1	1
Unemployment and sickness beneficiaries	8,037	828	169	155	484
Recipients of Tuberculosis allowance	469	100	55	74	35
Persons aged 14–15 years ..	155	82	27	31	29
Persons provided with rehabilitation on payment of the cost ..	112	75	1	1	71
Total	21,127	1,344	341	340	670

§ 6. Funeral Benefits.

A funeral benefit of up to £10 is payable to the person who has paid, or is liable to pay, the cost of the funeral of an age or invalid pensioner or of a claimant who, but for his death, would have been granted an age or invalid pension, or of a person who at the time of his death was receiving, or was a claimant for, a tuberculosis allowance, if he would otherwise have been qualified to receive an age or invalid pension. Where the cost of the funeral has been partly met by payment from a contributory funeral benefit fund of an organization other than a friendly society, funeral benefit is payable to the extent of the amount (not above £10) by which the cost of the funeral exceeded the amount paid from the fund. A funeral benefit is not payable to a person administering a contributory funeral benefit fund.

The following table shows the number of funeral benefits which were paid in each State and Territory for the years 1954–55 to 1958–59.

FUNERAL BENEFITS GRANTED, AUSTRALIA.

Australia	31,408	32,019	34,391	32,496	34,961

§ 7. Maternity Allowances.

Maternity allowances are paid to provide financial assistance towards the expenses associated with the birth of children and are additional to the benefits provided under the Commonwealth hospital benefits scheme. They are not subject to a means test.

The allowance is £15 if the mother has no other children, £16 if she has one or two other children and £17 10s. if she has three or more other children under the age of 16 years. The amount is increased by £5 for each additional child born at a birth. An advance payment of £10 on account of a maternity allowance may be made four weeks before the expected date of birth. The balance is payable immediately after the birth. Payment may be made in respect of the birth of a still-born child, or a child which lives for less than twelve hours, if the period of intra-uterine life of the child was at least 5½ months.

A maternity allowance is payable to a woman who, at the date of giving birth to a child, is residing in Australia, is temporarily abroad or who is on board a ship proceeding from a port in Australia or an Australian Territory to another port in Australia, or another Australian Territory, or on board a ship proceeding to Australia, provided she receives no maternity benefit from the country from which she came. An alien mother may receive the allowance if she was a British subject prior to her marriage, or if she or her husband resided in Australia for at least twelve months immediately prior to the birth of the child, or if she is likely to remain in Australia. Aboriginal natives, other than those who are nomadic or primitive, are eligible for maternity allowances on the same conditions as other members of the community.

The following table gives details of the amount paid in each State for the years 1954-55 to 1958-59:—

MATERNITY ALLOWANCES: AMOUNT PAID IN EACH STATE.

(£'000.)

§ 8. Unemployment, Sickness and Special Benefits.

Unemployment and Sickness benefits are paid to men over 16 and under 65 years of age, and women over 16 and under 60 years of age who, through unemployment, sickness or accident, suffer temporary loss of regular earnings. They must have been living in Australia during the preceding twelve months or be likely to remain permanently in Australia. A person receiving an age, invalid or widow's pension, or a service pension (as distinct from a war pension) under the Repatriation Act, or a tuberculosis allowance is ineligible to receive a benefit.

To qualify for an unemployment benefit, a person must establish that he is unemployed and that his unemployment is not due to his being a direct participant in a strike, that he is capable and willing to undertake suitable work, and that he has taken reasonable steps to obtain such work. Registration with the local Commonwealth District Employment Office is necessary.

To qualify for a sickness benefit, a person must establish that he is temporarily incapacitated for work because of sickness or accident and that he has thereby suffered a loss of salary, wages or other income.

A married woman is not eligible to receive a sickness benefit if it is reasonably possible for her husband to maintain her. Where her husband is able to maintain her only partially, a benefit may be paid at such rate as is considered reasonable in the circumstances. In exceptional cases, a married woman may qualify for an unemployment benefit in her own right.

Aboriginal natives, other than those who are nomadic or primitive, are eligible for these benefits on the same conditions as other members of the community.

The maximum weekly rates of benefit payable and permissible income since the 17th October, 1957, have been as follows:—

Age and Marital Status of Claimant.	Maximum Weekly Rates.			Permissible Weekly Income.		
	£	s.	d.	£	s.	d.
Unmarried person under 18 years of age	1	15	0	1	0	0
Unmarried person 18–20 years of age	2	7	6	1	0	0
All others	3	5	0	2	0	0

An additional benefit of £2 7s. 6d. a week may be paid for a dependent spouse and 10s. for one dependent child under 16 years of age. If no allowance is paid for a dependent spouse, a similar benefit may be paid for a claimant's housekeeper, provided there are one or more children under 16 years of age in the home and the woman is substantially dependent on the claimant but is not employed by him.

The weekly rate of benefit is reduced by the amount by which a beneficiary's other income exceeds the amount shown in the final column of the relevant line in the above table. For unemployment benefit purposes, the incomes of the claimant and his spouse are taken into account, unless they are permanently separated. For sickness benefit purposes, the income of the claimant only is taken into account, while any payment received from an approved friendly society or other similar approved body in respect of the incapacity for which sickness benefit is payable is disregarded. "Income" does not include child endowment, or other payments for children, Commonwealth hospital and pharmaceutical benefits, or a tuberculosis allowance or an amount paid in reimbursement of medical, dental or similar expenses paid. There is no means test on property.

The amount of compensation, damages or similar payment, or war pension, if paid in respect of the same incapacity as that for which sickness benefit is claimed, is deducted from the sickness benefit. If not paid in respect of the same incapacity, compensation is regarded as income and war pension is ignored.

There is a waiting period of seven days for which unemployment or sickness benefit is not payable. Unemployment and sickness beneficiaries are eligible to participate in the Commonwealth Rehabilitation Service under the same conditions as invalid pensioners.

A special benefit may be granted to a person not qualified for unemployment or sickness benefit who is not receiving an age, invalid or widow's pension or a service pension, if because of age, physical or mental disability or domestic circumstances, or for any other reason, he is unable to earn a sufficient livelihood for himself and his dependants. Special benefits are also paid to migrants who are in reception centres and are awaiting their first placement in employment in Australia. During this time, they receive a short instruction in English and in Australian conditions to facilitate their assimilation into the community and employment.

During the year 1958–59, special benefits were granted to 9,642 migrants at a cost of £76,975.

The following table shows the number admitted to benefit during 1958–59, the number of persons on benefit at 30th June, 1959, and the amount paid for each benefit during 1958–59.

UNEMPLOYMENT, SICKNESS AND SPECIAL BENEFITS, 1958-59.

(a) Includes migrants in reception and training centres. (b) Includes payments to migrants in reception and training centres. (c) Does not include special variations of advances for payments in regional areas, made at the end of the year.

§ 9. Widows' Pensions.

Widows' pensions are payable to the following classes of women. The rates shown have been in operation since 13th October, 1959.

Class "A"—A widow who has the custody, care and control of one or more children under the age of 16 years—£260 per annum (£5 a week) plus £26 per annum (10s. a week) for each child after the first in her custody, care and control.

Class "B"—A widow who has no children under 16 years of age in her custody, care and control, and who is not less than 50 years of age or who, after having attained the age of 45 years, ceased to receive a Class "A" widow's pension because she no longer had the custody, care and control of a child—£214 10s. per annum (£4 2s. 6d. a week).

Class "C"—A widow who is under 50 years of age and has no children under the age of 16 years in her custody, care and control, but is in necessitous circumstances within 26 weeks after the death of her husband—£4 2s. 6d. a week for not more than 26 weeks. If at the time of her husband's death the widow is pregnant, this period will be extended until the child's birth. She may then become eligible for a class "A" widow's pension.

Class "D"—A woman whose husband has been in prison for at least six months, if she has the custody, care and control of one or more children under the age of 16 years or is not less than 50 years of age—£214 10s. per annum (£4 2s. 6d. a week).

Widow pensioners may receive supplementary assistance of £26 per annum (10s. a week) if they pay rent and are considered to be dependent entirely on their pensions.

For classes "A" and "B", the term "widow" includes a deserted wife, a divorcee and a woman whose husband is in a mental hospital. Certain "dependent females" may qualify for "A", "B" or "C" Class pensions.

The residential qualification is five years' continuous residence in Australia immediately prior to the date of lodgment of the claim, but this period may be reduced to one year if the widow and her husband were living permanently in Australia when he died. Certain absences count as residence.

A widow's pension is not payable to an alien, unless she was a British subject before her marriage, a woman receiving an age or invalid pension, a tuberculosis allowance, or a war widow's pension, a woman who has deprived herself of property or income in order to qualify for a pension, or a deserted wife or a divorcee who has not taken reasonable action to obtain maintenance from her husband or former husband. Aboriginal natives, other than those who are nomadic or primitive, are eligible for widows' pensions on the same conditions as other members of the community.

Widows' pensions are subject to a means test on income and property. They are reduced by the amount by which a pensioner's income from other sources exceeds £182 per annum (£3 10s. a week). In determining the amount of income, the income of a Class "A" widow is reduced by £26 per annum (10s. a week) less the amount of any payment other than child endowment received by her in respect of her child. If a woman in Class "A" owns property worth more than £2,250, she is disqualified from receiving pension. Property valued at less than this amount does not affect the rate of her pension. With Class "B" and Class "D" widows, the annual rate of pension is reduced by £1 for every £12 of property owned by the pensioner above £200 up to £1,750 and by £1 for every £10 of property above £1,750 up to £2,250. No pension is paid if the net value of property is more than £2,250. There is no specific means test for Class "C" pension which is paid where it is evident that a widow has insufficient means of support. The types of income and property disregarded for means test purposes are the same as for age and invalid pensions.

The pension payable to a Class "A" widow may be continued until her child reaches the age of 18 years if the child continues with full-time education at a school or university, is still dependent on the widow and is not in employment.

The number of widows' pensions by class, current at 30th June, 1959, was as follows: Class "A", 22,296; Class "B", 27,020; Class "C", 131; Class "D", 259; total, 49,706.

The amount paid in pensions during 1958–59 was £10,777,127. The following table shows details of widows' pensions paid in each State and Territory in the year 1958–59:—

WIDOWS' PENSIONS AT 30th JUNE, 1959.

(a) Included in figures for State in which pensioner is permanently domiciled.

§ 10. Reciprocal Agreements with Other Countries.

1. **New Zealand.**—An agreement between the governments of Australia and New Zealand for reciprocity in social services came into operation on 1st July, 1949.

The reciprocal arrangements cover age and invalid pensions, widows' pensions, child endowment and unemployment and sickness benefits, and apply to both permanent and temporary changes of residence.

Residence in one country counts as residence in the other country in relation to entitlement to benefits in which a residential qualification applies.

Persons from one country taking up permanent residence in the other country become eligible for any of the specified benefits of the new country under the same conditions (with one or two exceptions) as apply to citizens of that country.

Persons in receipt of any of the specified benefits in one country may continue to receive those benefits while temporarily absent in the other country.

2. **United Kingdom.**—A new reciprocal agreement on social services between the United Kingdom and Australia came into operation on 1st April, 1958, replacing the original agreement which operated from 7th January, 1954.

Under this agreement, residence in one country now counts as residence in the other country as the basis for entitlement to benefits in which a residential qualification applies.

Australians going to the United Kingdom for permanent residence are treated in the United Kingdom as if they had been insured under the National Insurance Scheme while in Australia, so that they can qualify for various National Insurance benefits.

There is also provision for the safeguard of social service rights for persons going from one country to the other for temporary residence.

B. OTHER SERVICES.

§ 1. Benevolent Homes.

1. **General.**—Numerous establishments exist for the housing and protection of persons no longer able to provide for themselves. These homes are supported by government and municipal aid, public subscriptions, bequests, etc. In many cases, relatives of poor and afflicted persons contribute to their maintenance.

An entirely satisfactory statistical tabulation of all forms of charitable aid provided by benevolent institutions is difficult because these services differ considerably.

2. **Principal Institutions.**—Particulars respecting the accommodation and the number of inmates of the principal institutions were published in earlier issues of the Official Year Book (*see* No. 22, p. 485).

3. **Revenue and Expenditure.**—Details regarding revenue and expenditure for the year 1957–58 are given in the following table.

BENEVOLENT HOMES: REVENUE AND EXPENDITURE, 1957–58.
(£.)

Particulars.	N.S.W.(a)	Vic.	Q'land.	S.Aust.	W.Aust.	Tas.	Australia.

Capital (c) ..	148,569	715,292	22,163	2,286	15,752	..	904,062
<i>Total</i> ..	<i>1,147,180</i>	<i>1,719,725</i>	<i>729,885</i>	<i>143,885</i>	<i>404,923</i>	<i>333,019</i>	<i>4,478,617</i>

(a) These figures relate to the three State hospitals and homes only. (b) Includes Commonwealth hospital benefits and age and invalid pension receipts. (c) Includes such items as purchase of land, cost of new buildings and additions to buildings.

4. **The Aged Persons Homes Act.**—The Aged Persons Homes Act which operated from 16th December, 1954, was amended in October, 1957. The purpose of the Act is to encourage the provision of homes at which aged persons may reside in conditions approaching normal domestic life.

To be eligible for assistance under this Act an organization must be—

- (a) carried on otherwise than for purposes of profit or gain to the individual members; and
- (b) a religious organization, an organization the principal objects or purposes of which are charitable or benevolent, an organization of former members of the defence forces established in every State or a State branch of such an organization, or an organization approved by the Governor-General for the purposes of this Act.

An organization conducted or controlled by, or by persons appointed by, the Government of the Commonwealth or of a State or a local governing body established under the law of a State, is not eligible for assistance under this Act.

The Director-General of Social Services may make a grant of money to an organization as assistance towards meeting the cost of the construction or purchase of a home, including land, to be used permanently for the accommodation of aged persons. The grant is made on a £2 for £1 basis with money raised by the organization, not counting money which the organization received from a governmental body or borrowed. Before a grant is made, the Director-General must be satisfied that the sum of the money expended and the money presently available for expenditure by the organization towards the capital cost of the home, together with the amount of the grant, will be not less than the capital cost of the home. Expenditure by the Commonwealth Government was £436,236 in 1954-55, £397,994 in 1955-56, £751,136 in 1956-57, £837,895 in 1957-58 and £1,767,470 in 1958-59.

§ 2. Orphanages, Industrial Schools, etc.

1. **General.**—The methods of caring for orphans and neglected children differ extensively, some being placed in orphanages and industrial schools, while others are boarded out with their mothers or female relatives or with approved foster-mothers. The children in orphanages and similar institutions may receive, in addition to primary education, some craft training. In all cases, employment is found for the children on their discharge from the institution, and they remain for some time under the supervision of the proper authorities. The conditions under which orphans, neglected children and children boarded out live are subject to frequent departmental inspections.

2. **Principal Institutions.**—Particulars concerning the principal institutions in each State were published in earlier issues of the Official Year Book (*see* No. 22, p. 486).

3. **Children under Government Authority.**—The following table shows the expenditure by State Departments during 1957-58 in connexion with children under their control or supervision. In addition to neglected children, the figures refer to uncontrollable and convicted children who are wards of a government authority, as well as poor children whose parents obtain assistance from the government without giving up the legal right of custody.

CHILDREN UNDER GOVERNMENT AUTHORITY: COST OF MAINTENANCE, 1957-58.

Particulars.	N.S.W.	Vic.(a)	Q'land.	S.Aust.	W.Aust.	Tas.	Aust.
	£	£	£	£	£	£	£
Gross cost of children's relief	1,926,585	1,031,208	485,625	272,783	240,106	43,429	3,999,736
Receipts from parents' contributions, etc. . .	99,773	51,774	27,584	39,423	27,413	6,371	252,338
<i>Net Cost to State</i>	<i>1,826,812</i>	<i>979,434</i>	<i>458,041</i>	<i>233,360</i>	<i>212,693</i>	<i>37,058</i>	<i>3,747,398</i>

(a) Year ended 31st December, 1958.

The total expenditure on children's relief in the foregoing table shows considerable variation amongst the States owing to the different methods of treating assistance to mothers with dependent children. In South Australia, Western Australia and Tasmania, large amounts have been excluded from the total expenditure on this account owing to the difficulty of obtaining separate particulars for allowances made in respect of the dependent children only.

§ 3. Protection of Aborigines.

For the protection of the aboriginal Australian race, there are institutions, under the supervision of Aborigines Boards, where these people are housed and encouraged to work, the children receiving elementary education. The work is usually carried on at mission stations, but many of the natives are nomadic, and receive food and clothing when they call, while others only rarely come near the stations. The aboriginal race is extinct in Tasmania. The expenditure from Consolidated Revenue in 1958-59 was as follows (figures in brackets are for the year 1957-58:—New South Wales, £204,576 (£205,028); Victoria, £25,000 (£24,999); Queensland, £726,693 (£672,798); South Australia, £365,561 (£262,657); Western Australia, £591,020 (£529,144); Northern Territory, £719,695 (£684,308); Australian Capital Territory, £4,687 (£4,166); Australia, £2,637,232 (£2,383,100).

§ 4. Lifesaving.

There are two life saving organizations in Australia, the Royal Life Saving Society—Australia, and the Surf Life Saving Association of Australia.

The objects of these organizations are the prevention of death from drowning and other forms of asphyxiation; the education of the general public in methods of life saving and resuscitation of the apparently drowned or asphyxiated; technical education in water safety; the encouragement of swimming and life saving in schools and other organizations; the encouragement of all aspects of swimming and aquatics which would assist in saving lives; and the initiation of research within the field of water safety and lifesaving.

The Royal Life Saving Society operates at lakes, rivers, bay and harbour beaches, and the Surf Life Saving Association patrols surf beaches.

Numerous certificates and medallions of proficiency in various grades are awarded.

§ 5. Royal Humane Society.

The Royal Humane Society of Australia has as its main object the granting of awards to all who with bravery, skill and perseverance risk their own lives in saving or attempting to save those of their fellow creatures. The classes of awards are (a) Gold Medal; (b) Silver Medal; (c) Bronze Medal; and (d) Certificate of Merit. The Clarke Medal is awarded for the outstanding case of the year, and the Rupert Wilks Trophy is awarded for the most outstanding bravery by a child under 13 years of age. About 50 awards are made annually.

§ 6. The Order of St. John.

The Priory in Australia of the Most Venerable Order of the Hospital of St. John of Jerusalem is the governing body of the various activities of the Order which comprises the St. John Ambulance Association, the St. John Ambulance Brigade and the Hospitaliers' Clubs in all States and Commonwealth Territories.

Members of the St. John Ambulance Association teach first aid to the injured, home nursing, hygiene and child welfare.

Members of the St. John Ambulance Brigade provide first aid at public functions.

The Hospitaliers' Clubs in each State undertake the collection of funds for the St. John Ophthalmic Hospital in Jerusalem, and other duties which tend to bring together all persons interested in the work of the order.

The Order of St. John maintains ambulance transport services in some States, acts as an ancillary to such services in other States, and provides technical reserves for the medical services of the Crown.

The Lifesaving Medal is awarded by the Order as warranted.

§ 7. Other Charitable Institutions.

Owing to the variety of names and functions of other charitable institutions it has been found impracticable to give detailed particulars. The aid given in kind—food, clothing, tools of trade, etc.—is considerable, whilst the shelter and treatment afforded range from a bed for a night for casual callers in establishments ministering minor charity to indoor treatment over long periods in those that exist for the relief of the aged and the infirm. The institutions not particularized include homes for the deaf, dumb and blind, infant homes, homes for the destitute and aged poor, industrial colonies, night shelters, crèches, rescue homes for females, free kindergartens, auxiliary medical charities, free dispensaries, benevolent societies and nursing systems, ambulance and health societies, boys' brigades, humane and animals' protection societies, prisoners' aid associations, shipwreck relief societies, bushfire, flood and mining accident relief funds.

CHAPTER XIX.

LOCAL GOVERNMENT.

§ 1. Introduction.

1. Local Government Authorities.—In each State of the Commonwealth, there exists a system of local government whose powers and responsibilities are in general similar and cover such matters as the construction and maintenance of roads, streets and bridges, water, sewerage and drainage systems, and health and sanitary services, the supervision of building, and the administration of regulations relating to items such as weights and measures, slaughtering, the registration of dogs, etc. In addition to these obligatory functions, there are also many which may be performed by a local government authority either with or without the consent of the ratepayers or the Governor-in-Council. These include transport facilities, electricity, gas, and other business undertakings, hospitals, charitable institutions, recreation grounds, parks, baths, libraries, museums, etc.

The system is based on the principle of a grant of specific powers by the State legislatures to the local authorities, their autonomy, however, being more or less limited by the provision for general supervision by a department of the central government or by the Governor-in-Council. Otherwise, within the scope of the Acts under which they are constituted or which they have to administer, they are responsible only to the ratepayers.

While the broad pattern of local government throughout the States of Australia is similar, the range of activities, election of officers, methods of valuation and rating powers, etc., differ considerably.

The areas over which local government bodies exercise general control, numbering 907, are known in New South Wales as cities, municipalities and shires; in Victoria as cities, towns, boroughs and shires; in Queensland as cities, towns and shires; in South Australia as cities, corporate towns and district council areas; in Western Australia as cities, municipalities and road districts; and in Tasmania as cities and municipalities. In New South Wales, some local government authorities in an area have combined to provide services such as electricity, water, sewerage and drainage—e.g., the county councils. Within shires, there are also some municipal units known as urban areas. Apart from the more thinly populated parts of New South Wales and South Australia, and the Commonwealth Territories, practically the whole of Australia comes within local government jurisdiction.

The financial statistics in § 2 following are classified under the headings of Ordinary Services and Business Undertakings. The former covers the obligatory and general functions referred to above. Business Undertakings include public utilities such as water supply, sewerage, electricity, gas, transport and hydraulic power undertakings, and other miscellaneous works such as abattoirs, quarries, ice works, cinemas, etc.

2. Semi-Governmental Authorities.—In addition to local government authorities, a large number of authorities have been set up to control specific activities, which are often identical with some of those performed by either, or both, of the other classes of public authority—central government and local government—and a complete picture of any field of activity for a State or Australia as a whole cannot be obtained without reference to each class operating in that particular field. These semi-governmental authorities differ primarily from local government authorities in that their operations are restricted to the specific activity for which they were constituted—e.g., roads and bridges, water and sewerage, electricity and irrigation, harbours, or tramways, etc.—i.e. each dispenses a specific service throughout an area as distinct from the general services of the local authority.

In §§ 3 to 7, which deal with debt, roads and bridges, water supply and sewerage, harbours, and fire brigades, particulars are included of the more important of these authorities which operate within the range covered by this chapter.

3. Roads, Bridges, etc.—The construction and maintenance of roads, bridges and ferries are generally part of the functions of local authorities, but in each State there exists a central road authority or a government department whose duties relate to the construction, reconstruction and maintenance of “main” and “developmental” roads, the distribution of funds to local bodies, and the supervision and co-ordination of road construction and policy throughout the State. Although roads and bridges constructed and maintained directly by the government or by the central road authority do not properly come under the heading of “Local Government”, they have been included in this chapter for the sake of convenience. Owing to difficulty in obtaining complete particulars of receipts and expenditure by the various local governing bodies in respect of roads under their control,

the details of receipts and expenditure given in § 4 are those of central governments only, relating either to the supervisory board or commission in the State or to direct activities of a department. In § 2, some information is given of the revenue and expenditure of local government authorities in respect of roads.

4. **Water Supply and Sewerage.**—In the cities of Sydney and Melbourne, the control of water supply and sewerage is in the hands of special boards, while in Adelaide and Perth these services are under the direct supervision of government departments. In most of the other cities and towns, the municipal councils or, in some cases, water trusts, are the controlling bodies which either construct the works out of their own resources or take them over after they have been constructed by the government.

5. **Harbours.**—The majority of the harbours in Australia are managed by boards, the members of which are either elected by persons interested, or appointed by the government. In some instances, however, they are directly controlled by the government.

6. **Fire Brigades.**—In all the States, the management of fire brigades is undertaken by boards. These boards usually comprise members elected by the councils of municipalities and insurance companies within the districts placed under their jurisdiction, and one or more members appointed by the government. Occasionally, volunteer or country fire brigades are represented.

7. **Other Local or Semi-Governmental Activity.**—The activities referred to above are not the only forms of local or semi-governmental undertakings. There are others, the most important being tramways and omnibus services, and electricity and gas undertakings, which are not dealt with in this chapter except to the extent that they are represented in the finances as shown in the following section. Chapter XIV., Transport and Communication, contains information on municipal transport services, and Chapter VII., Electric Power Generation and Distribution, deals with the various types of electricity undertakings in each State. In addition, particulars of municipal electricity and gas undertakings, although not shown separately, are included in the relevant sections in Chapter VI., Manufacturing Industry.

§ 2. Local Government Authorities.

1. **New South Wales.**—For purposes of local government, the whole of the Eastern and Central land divisions and a small portion of the sparsely populated Western division have been divided into cities, municipalities (most principal towns) and shires (mainly large rural areas, some of which embrace important towns). At the end of 1957, the area incorporated was 230,000 square miles, or nearly three-fifths of the total area of the State.

All local government authorities in the State are subject to the general provisions of the Local Government Act.

Municipalities and shires may combine to form county councils for the establishment and conduct of services of joint benefit, e.g., electricity, water, sewerage. At 31st December, 1957, there were 49 county councils including the Sydney County Council. The Grafton and South Grafton Water Board was abolished on 1st January, 1957, and its undertaking transferred to the City of Grafton.

2. **Victoria.** Local government is established throughout the State, the various divisions being termed cities, towns, boroughs or shires. The only unincorporated areas are French Island (42,000 acres) in Westernport Bay, Julia Percy Island (650 acres), off Port Fairy, and Tower Hill (1,460 acres), adjacent to the Borough of Kororoit. Melbourne and Geelong were incorporated under special statutes prior to the establishment of a general system of local government, but are now subject to several provisions of the Local Government Act.

3. **Queensland.**—The whole of the State (except certain islands along the coast, the Dawson Valley Irrigation Area and the Somerset Dam Area) is incorporated into cities, towns and shires under the Local Authorities Act 1902 and its amendments.

4. **South Australia.**—The settled portion of South Australia is incorporated, being mostly under municipal corporations in the larger cities and towns, and district councils in the agricultural areas.

5. **Western Australia.**—In this State, local government is carried on by means of municipalities and district road boards, the whole of the State being so incorporated.

6. **Tasmania.**—The whole State is divided into municipal districts, Hobart and Launceston being incorporated as cities under separate Acts.

7. **Area, Population, Dwellings and Value of Ratable Property.**—The area, population, dwellings and value of ratable property in the incorporated areas of each State are shown for the years 1956–57 and 1957–58 in the following tables. The valuations relate to ratable property only and exclude Government and other non-ratable property, whose value in the aggregate is considerable. In this table, particulars of dwellings are in accordance with the definition used in the 1954 Census, and are compiled from information collected on the Census Schedules. For the purpose of the Census, a dwelling was defined as any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or only part of a building. The term has, therefore, a very wide meaning and includes, in addition to houses and flats, a great variety of dwellings ranging from a single-roomed shack to a multi-roomed hotel or institution. Unoccupied dwellings include “week-end” and holiday dwellings and other dwellings temporarily unoccupied on the night of the Census. Dwellings being built are not included.

8. **Finances.**—(i) *General.* The following tables show the latest available financial statistics for local government authorities. The figures relate to the years 1956-57 and 1957-58, except for New South Wales, where they relate to the years 1956 and 1957.

(ii) *Ordinary Services.* In the returns of revenue and expenditure for 1956-57 and 1957-58 in the following tables, the proceeds from loans and expenditure thereof have been

excluded. The financial operations of business undertakings controlled by the various local government authorities are given in the next paragraph. The profits resulting from the working of these undertakings, where taken into general revenue, have been included.

§ 3. Local and Semi-Governmental Authorities' Debt.

1. **General.**—Statistics of local and semi-governmental debt for the years 1938–39 and 1954–55 to 1957–58 are given in the following paragraph. The information covers all local government authorities and those semi-governmental authorities responsible for the provision of the following services:—

New South Wales. Water Supply, Sewerage and Drainage, Electricity Supply, Fire Brigades, and Banking. County Councils are included among these authorities.

Victoria. Water Supply and Sewerage, Irrigation and Drainage, Harbours, Tramways, Electricity and Gas Supply, Fire Brigades, Marketing (Buying and Selling), Industry Assistance, Grain Elevators, Housing, and Miscellaneous.

Queensland. Water Supply and Sewerage, Irrigation and Drainage, Harbours, Electricity Supply, Fire Brigades, University, Hospitals and Ambulances, Marketing (Buying and Selling and Agency), and Industry Assistance.

South Australia. Irrigation and Drainage, Tramways, Electricity Supply, Fire Brigades, Hospitals and Ambulances, Marketing (Agency), Industry Assistance, Banking, Housing, and Miscellaneous.

Western Australia. Water Supply and Sewerage, Irrigation and Drainage, Harbours, Tramways, Electricity Supply, Fire Brigades, Hospitals and Ambulances, Marketing (Agency), Housing and University of Western Australia.

Tasmania. Harbours, Electricity Supply, Fire Brigades, Transport, and Housing.

A detailed list of the authorities included is shown in *Finance, Part I.—Public and Private Finance*, Bulletin No. 50, 1958–59.

2. **Local and Semi-Governmental Authorities' Debt.**—The following table provides a summary of new money loan raisings, provisions for debt redemption, debt outstanding and interest payable by local and semi-governmental authorities for the year ended 30th June, 1958. For greater detail, see *Finance, Part I.—Public and Private Finance*, Bulletin No. 50, 1958–59.

Annual Interest Payable(a)	(c)	22,075	3,555	5,139	2,380	3,490	(c)

(a) Includes debt or interest payable in London and New York. The former is expressed in United Kingdom currency, the latter is payable in dollars which have been converted at the rate of \$4.8665 to 1£.
(b) Included in debt figures above. (c) Not available.

In this and the following tables, debt includes all liabilities for which arrangements have been made for repayment over a period of one year or more, and net overdrafts. Interest capitalized and amounts due for the capital cost of assets or for services rendered which are to be repaid over a period of one year or more are included. Current liabilities, such as interest accrued (but not capitalized), trade creditors, amounts held in trust and other debts which are to be repaid in less than one year are not included. Net overdraft is the gross overdraft of all funds less all bank credit balances (including fixed deposits) which do not form part of a sinking fund to repay a loan. New loans raised during the year include new loan liabilities incurred during the year, loans raised from the public to repay indebtedness to the Government, and interest capitalized. Loans raised and redeemed within the year, increases in overdrafts and loans raised for conversion or redemption of existing debt are excluded. Funds provided for redemption include instalments of principal repaid and amounts credited to sinking funds established for the purpose of repaying the debt on maturity. Amounts provided for redemption from loans raised for that purpose are excluded.

In the following table, a summary is given of new money loan raisings, provisions for the redemption of debt and debt outstanding of local and semi-governmental authorities for the years 1938-39 and 1954-55 to 1957-58.

§ 4. Roads and Bridges.

1. **Commonwealth Government Grants.**—The following table shows the allocation to the States, under the several Commonwealth Aid Roads Acts for road construction, maintenance, repair and other works connected with transport for each of the years 1938-39 and 1954-55 to 1958-59, and to the Commonwealth for expenditure on the construction and maintenance of strategic roads and for the promotion of road safety practices for each of the years 1954-55 to 1958-59. See also Chapter XXI.—Public Finance, and *Finance* bulletins.

ROAD CONSTRUCTION, MAINTENANCE, ETC.: GRANTS UNDER THE COMMONWEALTH AID ROAD ACTS.

(£'000.)

Year ended 30th June—	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	C'wealth. (a)	Total.
1939 ..	1,199	747	815	474	819	213	..	4,267
1955 ..	5,893	3,771	4,125	2,409	4,190	1,073	900	22,361

1959 ..	9,930	6,543	6,890	4,056	6,967	1,813	1,000	37,199

(a) Allocation for expenditure on the construction and maintenance of strategic roads and the promotion of road safety practices.

2. New South Wales.—(i) *General.* A central road authority, known as the Main Roads Board, was created by legislation in 1925 for the purpose of providing improved and uniform standards of construction, reconstruction and maintenance of the principal roads of the State and to administer government subsidies for works on those roads. Subsequently, the Main Roads administration was reorganized as a separate department under the control of a Commissioner. The activities of the Department of Main Roads embrace works on main and developmental roads throughout the State, all roads in the unincorporated portion of the Western Division, and certain associated works, principally bridges and vehicular ferries, constructed from government funds. The Department of Main Roads co-operates with the municipal and shire councils in the work of constructing and maintaining the main roads system.

Public roads, except those within the City of Sydney, may be proclaimed as main roads on the recommendation of the Commissioner for Main Roads, who takes into consideration the representations made by the councils concerned, availability of funds for construction and maintenance purposes, and the value of the roads as connecting links between centres of population or business. The classes of main roads are (i) the State Highways which form the principal avenues of road communication throughout the State and connect with similar avenues in other States; (ii) Trunk Roads, which, with the State Highways, form the framework of a general system of intercommunication throughout the State; (iii) Ordinary Main Roads, which provide a network of roads connecting towns and important centres of population with the State Highways and Trunk Roads and with each other. In addition to the Main Roads, there are also (i) Secondary Roads (in the County of Cumberland), which carry a substantial volume of through traffic and thereby relieve neighbouring main roads of traffic and (ii) Developmental Roads, which help to develop country districts.

In the County of Cumberland, which for the purposes of the Main Roads Act is deemed to include the City of Blue Mountains and small sections of other councils' areas on the boundary of the County of Cumberland, the full cost of road and bridge construction is paid from the funds of the Department of Main Roads. The Councils contribute towards the cost at the rate of $\frac{1}{4}$ d. in the £ on the unimproved value of ratable property. The rate payable in respect of lands used principally for primary production is one-half the rate levied on other lands. In country districts, the Department meets the full cost of road and bridge works on state highways, the full cost of bridge works and three-quarters of the cost of road works on trunk roads, and three-quarters of the cost of bridge works and two-thirds of the cost of road works on main roads. The cost of constructing developmental roads and works is borne in full by the Department of Main Roads, but local Councils are required to maintain them in a satisfactory condition. The Department of Main Roads meets half the cost of works on secondary roads.

(ii) *Length of Roads.* (a) *Proclaimed Roads.* The total length of proclaimed roads in New South Wales at 30th June, 1959, was 25,296 miles classified as:—State highways, 6,504 miles; trunk roads, 4,180 miles; ordinary main roads, 11,739 miles; secondary roads, 86 miles; and developmental roads, 2,787 miles.

During 1958–59, 118 miles of new developmental roads were proclaimed and 29 miles were removed from the list of proclaimed developmental roads. 21 miles of proclaimed main roads were removed from the list during 1958–59.

The length of main and secondary roads maintained by the Department of Main Roads at 30th June, 1959, was 5,469 miles (24 per cent.), while the length maintained by councils was 17,040 miles (76 per cent.). The proportions of main roads maintained by the Department and councils respectively were:—State highways, 58 per cent., 42 per cent; trunk and ordinary main roads, 11 per cent., 89 per cent. Secondary roads were maintained wholly by councils. In the County of Cumberland (the metropolis and adjoining areas), the Department maintained 56 per cent. of the roads (524 miles).

(b) *Composition of Roads.* In 1957, the total length of all roads in New South Wales was estimated at 127,097 miles. The lengths of roads, according to their composition or nature, were as follows:—cement concrete, 412 miles; asphaltic concrete, 223 miles; tar or bituminous macadam, 5,698 miles; surface water-bound macadam, 7,949 miles; water-bound macadam, 1,458 miles; gravel or crushed rock, 42,522 miles; formed only, 27,604 miles; cleared or natural surface only, 41,231 miles.

(iii) *Main Roads Department.* (a) *General.* Progress has continued with the implementation of the Department's plan for main roads development in the County of Cumberland. Most of the Department's proposals have been incorporated in the County of Cumberland Planning Scheme approved by Parliament under the Local Government (Amendment) Act 1951.

The Department's proposals for the development of the main roads system in Newcastle and the surrounding districts have been largely incorporated in the Northumberland County District Planning Scheme and some sections of the system have been constructed.

With some modifications, the Department's proposals for the planning of the main roads in the Wollongong-Port Kembla district have been incorporated in the planning scheme prepared by the Illawarra Planning Authority.

During 1958–59, 44 new bridges were constructed. In addition, 54 concrete box culverts having a waterway width of 20 feet or more were completed. Major bridge works under construction include steel and/or concrete bridges over Double Creek on the Prince's Highway (length 450 feet); over the Cook's River at Tempe on the Prince's Highway (length 300 feet); over the Murray River at Albury on the Hume Highway (length 300 feet); over the Hastings River near Blackman's Point on the Pacific Highway (length 1,500 feet); over the Mehi River at Moree on the Gwydir Highway (length 374 feet); over the Parramatta River at Gladesville (2,000 feet); over the Murray River at Jingellic (length 514 feet); over the Goulburn River at Sandy Hollow (length 576 feet); over the Murray River at Tintaldra (length 420 feet); and over the Mann River at Jackadgery (length 939 feet).

(b) *Revenue and Expenditure.* The funds of the Department of Main Roads are derived principally from (1) motor vehicle taxation; (2) charges on heavy commercial goods vehicles under the Road Maintenance (Contribution) Act 1958; (3) grants under Commonwealth Aid Roads Acts (see Chapter XXI.—Public Finance); (4) other grants from the State or Commonwealth Governments and (5) proceeds of a levy on municipal and shire councils in the County of Cumberland in accordance with the Main Roads Act 1924–58. The State Government also makes repayable advances for Main Roads Department works.

Revenue and expenditure for the four years 1955–56 to 1958–59 compared with the year 1938–39 are shown below.

**DEPARTMENT OF MAIN ROADS, NEW SOUTH WALES:

Total	3,510,793	13,937,614	14,848,944	16,561,304	17,526,187

(a) Excludes repayable advances by the State Government (£302,643 in 1938-39, £150,000 in 1955-56, £448,073 in 1956-57 and £150,000 in 1957-58) and transfer from Sydney Harbour Bridge Reserve Account for Expressway construction (£100,000 in 1958-59). Expenditure from these amounts is fully reflected in Expenditure. (b) Excludes debt redemption (£200,591 in 1938-39, £36,299 in 1955-56, £38,677 in 1956-57, £39,966 in 1957-58 and £340,790 in 1958-59). (c) Mainly purchase of assets not subject to annual depreciation charge. The purchase of other assets is omitted here because of the depreciation charge for them is reflected each year in "Roads and Bridges".

The figures shown above represent the aggregate revenue and expenditure of five funds—the County of Cumberland Main Roads General and Special Purposes Funds, the Country Main Roads General and Special Purposes Funds, and the Developmental Roads Fund.

The total expenditure on roads, streets and bridges in the State by all authorities during the years 1938-39 and 1954-55 to 1958-59 was, respectively, £8,891,000, £26,878,000, £29,851,000, £33,773,000, £37,100,000 and £39,554,000. These figures are approximate and they include expenditure on construction, maintenance and direct administration, but not on debt charges. Expenditure on the Sydney Harbour Bridge is not included.

(c) *Sydney Harbour Bridge.* The Sydney Harbour Bridge was opened for traffic on 19th March, 1932. The main span is 1,650 feet and the clearance for shipping 170 feet from high water level. The deck, 160 feet wide, carries a roadway and two railway tracks and there is also a footway on each side. The capital cost of the bridge to 30th June, 1959, was £9,578,006, but this amount will be reduced slightly on completion of the disposal of the remaining surplus resumed property. The portion met from repayable loan funds, over £7,900,000, is repayable from toll income. The accumulated balance of the Bridge Account at 30th June, 1959, showed a deficiency of £94,421, after the transfer of sums totalling £1,895,000 to a reserve account. Annual income, after a decline to less than £300,000 during the 1939-45 War, has risen from about £400,000 in 1938-39 to over £1,081,000 in 1958-59, while expenditure over the same period has varied between £424,000 and £750,000. In 1958-59, income included road tolls, £891,985, railway passenger tolls, £147,825, and tram and omnibus passenger tolls, £15,840. Expenditure amounted to £750,312, including interest, exchange, flotation expenses, etc., £313,820, sinking fund, £106,600, maintenance £140,057, and major improvements (including conversion of tram tracks to roadway), £55,550. In addition to the amount of £55,550 charged to the Harbour Bridge Revenue Account in 1958-59, £898,602 was spent from accumulated surpluses (including £260,000 from the Harbour Bridge Reserve Account). During 1958-59, 25,705,000 rail travellers, 15,344,000 tram and omnibus travellers, and 39,012,000 road travellers in 25,002,000 road vehicles crossed the bridge, contributing, respectively, 14 per cent., 2 per cent. and 84 per cent. of the total toll revenue.

3. *Victoria.*—(i) *General.* With the object of improving the main roads of the State, the Country Roads Board was established by legislation passed in 1912. The principal duties of the Board are to determine the main roads, State highways, tourists' roads, etc., to inquire into the State's resources in road materials and the most effective methods of road construction and maintenance, and to recommend deviations in existing roads or the construction of new roads in order to facilitate communication or to improve the conditions of traffic.

(ii) *Length of Roads.* (a) *Declared Roads.* The total length of declared roads in Victoria at 30th June, 1959, was 14,392 miles, classified as follows:—State highways, 3,845 miles; main roads, 9,754 miles; tourist roads, 415 miles; forest roads, 378 miles. The length of the surface treated (black) or higher type of pavements included in the foregoing mileage was 9,770 miles or 68 per cent. of the total.

(b) *Composition of Roads.* It is estimated that, in addition to the 14,392 miles of classified roads as above, there were approximately 87,000 miles of unclassified roads at 30th June, 1959. The latest detailed estimate of the length of roads and streets in Victoria (as at 30th September, 1957) provides the following information:—Wood or stone, 55 miles; portland cement concrete, 158 miles; asphaltic concrete and sheet asphalt, 420 miles; tar or bitumen surface seal, 15,114 miles; water-bound macadam, gravel, sand and hard loam pavements, 31,954 miles; formed only, 23,873 miles; not formed, 29,778 miles; total, 101,352 miles.

(iii) *Country Roads Board.* (a) *General.* During 1958–59, 1,536 miles of declared roads under the Board's control were treated with bitumen. In addition, 669 miles of undeclared roads, for which the Board contributed funds, were similarly treated. The total length of bitumen treatment carried out in 1958–59 was 2,298 miles (including 93 miles for other authorities). Of the work on the roads under the Board's control in 1958–59, 510 miles related to State highways.

During 1958–59, 235 bridge projects with the total value of £1,460,000 were initiated. Of these, 191, costing £880,000, were under municipal supervision.

(b) *Receipts and Payments.* The funds of the Country Roads Board are derived principally from motor registration fees, two thirds of all money received by way of owners' certificates, one half of drivers' licence fees, fines, payments by the Commonwealth Government under the Commonwealth Aid Roads Acts, road charges under the Commercial Goods Vehicles Act and repayments by municipalities. In addition, loans have been authorized from time to time under the Country Roads Acts for permanent works on main and developmental roads, State highways, tourists' and forest roads, while the State Government has provided, free of repayment, loan moneys for restoration of flood and bush fire damage. During the year ended 30th June, 1959, loan receipts and payments each amounted to £75,834, and expenditure included £53,171 for restoration of flood and bush fire damage. The total loan expenditure to 30th June, 1959, was £14,221,093. This figure does not include loan expenditure from the Developmental Roads Loan Account, a fund which was created for the purpose of constructing and maintaining subsidiary or developmental roads. Loan money raised on this account was exhausted at 30th June, 1937, the total expenditure at that date being £6,425,758.

Total receipts and payments during each of the years 1938–39 and 1955–56 to 1958–59 are shown below:—

				17,579,615	17,746,472

(a) Figures for 1938-39 are not directly comparable with those of succeeding years owing to a change in the method of compilation adopted by the Country Roads Board. (b) After costs of collection. Since 1950, one half of the drivers' licence fees has been credited to the funds of the Country Roads Board while the remaining half has been credited to the Municipalities Assistance Fund. (c) Excludes portion of Commonwealth Aid Roads Acts advances drawn by the Public Works Department for expenditure on wharfs, jetties, etc. (d) Includes £54,662 expenditure on unemployment relief works.

(iv) *Level Crossings.* In 1954-55, the Level Crossings Fund was created under the Country Roads and Level Crossings Funds' Act 1954 to finance (a) the elimination of level crossings or the provision of alternative routes to enable road traffic to avoid level crossings, (b) the provision of lights, signs, and lighting at, and the improvement of approaches to, level crossings and (c) generally, the reduction of danger at level crossings. The Act provides for the payment into the Fund of one third of all moneys received by way of additional motor registration fees (owner's certificates) and money provided under any other Act. The amount available for expenditure in 1958-59 was £677,877 comprising receipts from owners' certificates, £268,815, and the balance brought forward from 1957-58, £409,062. Expenditure from the Fund amounted to £327,768 of which £260,798 was incurred by the Railways Department and the balance by the Country Roads Board.

4. *Queensland.*—(i) *General.* Under the Main Roads Act 1920, a Main Roads Board was constituted, consisting of three members appointed by the Governor-in-Council. In 1925, the Board was abolished and its powers conferred upon a single Commissioner. The Main Roads Commission was constituted a Department under the name of the Department of Main Roads in February, 1951, with the Commissioner of Main Roads as its permanent head. The duties of the Commissioner are to carry out surveys and investigations necessary to determine State highways, main, developmental, secondary, mining access, farmers' and tourist roads and tourist tracks, and the responsibility for building and maintaining these declared roads is largely that of the Commissioner. Roads of purely local importance are constructed and maintained by local authorities. In many cases, construction is financed by the State Government by means of Treasury loans. Other roads may be built by the Public Estate Improvement Branch of the Lands Department in order to open up areas of previously inaccessible or undeveloped country.

(ii) *Length of Roads.* (a) *Declared Roads.* The total length of declared roads in Queensland at 30th June, 1958, was 20,900 miles, comprising State highways, 8,254 miles; main roads, 10,553 miles; developmental roads, 235 miles; secondary roads, 646 miles; mining access roads, 606 miles; farmers' roads, 308 miles; tourist roads, 297 miles; tourist tracks, one mile. The length of roads improved in Queensland from the date of commencement of work under the Main Roads Acts 1920-1952 to 30th June, 1958, was 14,369 miles (69 per cent). At that date also, 525 miles of new road construction and 426 miles of stage construction work were proceeding.

(b) *Composition of Roads.* The total length of roads and streets in Queensland at 30th June, 1958, was:—Concrete or other high standard, 231 miles; paved-sealed, 7,678 miles; paved unsealed, 18,569 miles; formed only, 34,957 miles; cleared only, 14,226 miles; natural state, 44,663 miles; total, 120,324 miles.

(iii) *Department of Main Roads. (a) General.* During 1957–58, the Department completed 1,355 miles of roads including new construction and stage construction. Bridges of all types to a length of 6,698 linear feet were constructed, bringing the total constructed by the Department at 30th June, 1958, to 196,732 feet. In addition, at 30th June, 1958, 4,299 feet were under construction.

(b) *Receipts and Payments.* The funds of the Department of Main Roads are obtained chiefly from motor vehicle registration and collections, fees, etc., under the Transport Acts, contributions under the Commonwealth Aid Roads Acts and loans, grants and advances from the State Government. The total receipts and payments, including amounts for defence works, during each of the years 1938–39 and 1954–55 to 1957–58 are shown below:—

5. *South Australia.*—(i) *General.* The Highways and Local Government Department is administered by the Commissioner of Highways, who is empowered, subject to the approval of the Minister of Roads, to undertake the construction, maintenance and protection of the principal roads of the State. In addition, the Commissioner—

(a) allocates grants to councils for roadworks and supervises the expenditure.

(b) assists Councils to purchase road-making plant and to defray the cost of roadworks.

(c) advises Councils on any question concerning the construction, maintenance or repair of roads.

(ii) *Source of Funds.* Funds of the Department are derived mainly from—

(a) *State Government.* The Highways Fund, into which are paid the proceeds from motor vehicle registrations and drivers' licences (less cost of collection), appropriations from loan funds, repayments of advances made to Councils and contributions by the Municipal Tramways Trust.

(b) *Commonwealth Government.* Contributions under the Commonwealth Aid Roads Acts.

(iii) *Length of Roads.* In South Australia, there are only two classifications of roads. These are Main Roads proclaimed under the provisions of the Highways Act and all other roads, commonly designated District Roads. At 30th June, 1959, there were 8,188 miles of proclaimed Main Roads and 54,012 miles of District Roads, totalling 62,200 miles. Of these, 28,980 miles are unformed and carry little or no traffic and a further 15,504 miles, which have been formed only, are open to traffic during most of the year. Of the remainder, there are 12,962 miles of road constructed with gravel or crushed rock and 4,754 miles of a higher standard constructed with either bitumen or concrete.

(iv) *State Highways and Local Government Department, Receipts and Payments.* The following table shows particulars of receipts and payments, during the years 1938-39 and 1954-55 to 1958-59 of funds controlled by the Highways and Local Government Department.

(a) Figures for 1938-39 are not completely comparable with those for following years. (b) Roads, plant, etc. (c) Interest and sinking fund payments. (d) Not available separately; included elsewhere. (e) Administrative Expenses amounting to £596,876 have been charged to "Construction and Reconstruction of Roads and Bridges" and to "Maintenance".

The total expenditure, both revenue and loan, by State and local governments on roads, streets and bridges in South Australia during the years 1938-39 and 1954-55 to 1957-58 was, respectively, £1,966,000, £7,539,000, £8,812,000, £9,228,000 and £9,889,000.

6. *Western Australia.*—(i) *General.* Under the Main Roads Act 1930-1954, the Main Roads Board, established in 1926, was abolished and a Commissioner of Main Roads was appointed. His duties relate to the determination of main roads after consideration of the funds available and the services to be rendered by the roads, the declaration and provision of developmental roads, construction of and maintenance of main roads and the carrying out of surveys, investigations and experiments in connexion with roads and road materials.

(ii) *Length and Composition of Roads.* The total length of roads for which financial provision is made by the Main Roads Department at 30th June, 1958, was:—Declared Main Roads, 3,487 miles; Important Secondary Roads, 7,149 miles; and Developmental Roads, 14,360 miles. Important Secondary Roads are roads which were formerly included as

developmental. However, by virtue of their consistent use by through traffic a special provision of funds by the Main Roads Department was warranted. The classification of "important secondary roads" has no legal significance as the care and control of these roads remains the responsibility of the Local Authorities.

The total length of roads and streets in Western Australia at the 30th June, 1958, was made up as follows:—Bituminous, 7,137 miles; gravel, waterbound, 16,158 miles; other constructed surfaces, 2,000 miles; formed only, 39,320 miles; unprepared, 25,057 miles; total, 89,672 miles.

(iii) *Main Roads Department.* During the year 1957–58, the activities of the Department included—Clearing, 1,704 miles; forming, 2,394 miles; gravelling, 1,374 miles; reconditioning, 4,740 miles; and stabilizing, 562 miles. In addition, 1,003 miles were primed or sealed (including widening) and 17 bridges constructed. Steady progress is being made on the construction of a bridge over the Swan River at the Narrows. The estimated cost of the project is £1,600,000. The principal source of income of the Main Roads Department is derived from the Commonwealth Aid Roads Act 1954–1956 and the Commonwealth Aid Roads (Special Assistance) Act. Other sources of income include a portion of the Traffic Fees collected in the Metropolitan Traffic Fee area and Transport Board funds. Outside the Metropolitan Area motor vehicle licence fees are collected and retained by the Local Authorities, i.e. Municipalities and Road Boards.

(iv) *Receipts and Payments—Combined Road Funds.* The following table shows the combined transactions of the Main Roads Trust Account, the Main Roads Contributions Trust Account, the Metropolitan Traffic Trust Account, and the Commonwealth Aid Roads and Works Trust Accounts during the years ended 30th June, 1939 and 1955 to 1959. Figures for the years ended 30th June, 1939, and 30th June, 1955, to 30th June, 1957, have been revised since publication of Year Book No. 45.

(a) Figures not completely comparable with those for following years. (b) Net of Police Collection and Administration fees. (c) Administrative Expenses have been included in Expenditure on (i) Construction and Reconstruction of Roads and Bridges, (ii) Maintenance of Roads and Bridges and (iii) Other. (d) Expenditure on hire and maintenance of road construction plant, etc. and on purchase of material has been included in expenditure on (i) Construction and Reconstruction of Roads and Bridges, (ii) Maintenance of Roads and Bridges and (iii) Other.

7. *Tasmania.*—(i) *General.* Under the Road Construction (Transfer of Functions) Act 1951, which came into operation on 1st July, 1951, the control of the construction and maintenance of roads and certain road making plant was vested in the Minister for Lands

and Works. Works authorized by the Minister in respect of roads classified as State highways, tourist, and developmental roads are constructed by the Department of Public Works and financed from the State Highways Trust Fund into which are paid the proceeds from Commonwealth Aid Roads grants, motor vehicle registration fees and taxes, licence fees for drivers and public transport, and other moneys made available by Parliament. In addition, provision was made under the Road Construction (Transfer of Functions) Act for certain works authorized by the Transport Commission to be carried out and constructed by the Department. The expenditure by the Public Works Department during 1957-58 on the construction of roads, tracks and bridges amounted to £3,055,009 of which £2,474,810 was charged to road funds, £17,295 to revenue, £485,191 to loan and £77,713 to other funds. Except in special cases, municipal councils bear the cost of maintaining country roads and a proportion of the cost of main and secondary roads.

(ii) *Length of Roads.* (a) *Classified Roads.* The mileages of classified roads in Tasmania at 30th June, 1959, were as follows:—State highways, 1,158 miles; main roads, 669 miles; secondary roads, 187 miles; tourist roads, 45 miles; developmental roads, 10 miles; subsidized roads, 131 miles; total, 2,200 miles. Country roads totalled nearly 10,000 miles. The mileages of sealed roads, and their proportions to the respective totals, were:—State highways, 612 miles (53 per cent.); main roads, 263 miles (40 per cent.); secondary and other roads, 25 miles (7 per cent.); total, 900 miles (41 per cent. of all classified roads, and 8 per cent. of all roads, in Tasmania).

(b) *Composition of Roads.* The length of all roads in Tasmania, including those with surfaces of lower grade, at 30th June, 1959, was as follows:—Bituminous, 1,294 miles; concrete, 24 miles; granite, limestone, etc., water-bound, 8,494 miles; surfaces of lower grade, 2,089 miles; total, 11,901 miles.

(iii) *Receipts and Payments—Combined Road Funds.* The table hereunder shows particulars of the receipts and payments of the combined Road Funds for the years 1939-40 and 1955-56 to 1958-59:—

(a) First year of operation of Transport Commission. Figures not completely comparable with those for following years. (b) Administration costs have been distributed over other items. (c) Not available, included with other.

8. **Summary of Roads used for General Traffic.**—(i) *Proclaimed or Declared Roads.* The table hereunder is a summary of the roads proclaimed or declared under the Acts of the several States relative to the operations of the central road authorities, and shows the lengths of various classes proclaimed or declared as at 30th June, 1959. These proclaimed or declared roads are those for which the central road authority assumes responsibility under the Act for the whole, or a proportion, of the cost of construction and/or maintenance, the extent varying from State to State and with the class and locality of the roads. Before proclamation of a main road, consideration is given, in general, to the following points:—availability of funds; whether the road is, or will be, within one of several classes of main trunk routes; whether the district is, or will be, sufficiently served by railways. Provision is also made in some States for the declaration of roads other than main roads. The absence of a particular class in any State does not necessarily imply that there are no roads within that State that might be so classified; the classes are restricted only to roads proclaimed or declared under the Acts. A further point to make is that, through various causes, e.g., insufficiency of funds, man-power or materials, etc., construction or maintenance may not keep pace with gazettals of mileages, and, therefore, the condition of a road may not match its status.

PROCLAIMED OR DECLARED ROADS: LENGTHS, 30th JUNE, 1959.
(Miles.)

Class of Road.	N.S.W.	Vic.	Q'land. (a)	S. Aust.	W. Aust. (a)	Tas.	Total.				
State highways	6,504	3,845	8,254	} 8,188	3,487 {	1,158 669	} 68,331				
Trunk roads	4,180	} 9,754	10,553								
Ordinary main roads	11,739										
<i>Total Main Roads</i>	22,423	13,599	18,807	8,188	3,487	1,827	68,331				
Secondary roads	(b) 86	..	646	..	(c) 7,149	187	8,068

Grand Total	25,296	14,392	20,900	8,188	24,996	2,200	95,972				

(a) As at 30th June, 1958. (b) Metropolitan only. (c) Though financed by the Main Roads Department, these roads are under the control of Local Authorities. (d) Forest roads. (e) Includes mining access roads, 606 miles; farmers' roads, 308 miles; and tourist tracks, 1 mile. (f) Subsidized roads.

(ii) *Composition of Roads.* The following table represents an attempt to classify all the roads used for general traffic in Australia, at the latest dates available, according to States and Territories and to certain broad composition groups. The results are not entirely satisfactory, because (i) it is doubtful whether the whole of Australia is covered, (ii) the dates of reference differ, and (iii) the figures constituting each group are not wholly comparable for the States and Territories. It is hoped, however, that despite these defects the table will provide an approximate and general idea of the main types of roads in Australia.

The figures in the table for the States are obtained from the State Government Statisticians, and are derived mainly from local government sources. Unincorporated areas in some States are probably excluded and the figures on the returns supplied by the local government authorities are in some cases of doubtful accuracy. Details of the composition of roads, as far as they are available, vary to such an extent that it is considered preferable to show here only major divisions.

Groups 1-4 as shown in the table include, respectively, the following types of composition:—

1. *Wood or Stone.* Wood blocks; stone paved.
2. *Concrete.* Cement concrete; asphaltic concrete; bituminous concrete; sheet asphalt on concrete base.

3. *Bituminous.* Tar or bituminous macadam; tar and bituminous surface seal; surfaced water-bound macadam or gravel; bituminous or cement penetration.
4. *Macadam and Other.* Water-bound macadam; granite, limestone, and blast-furnace slag, water-bound; water-bound gravel; gravel or crushed rock; metallised (gravel or rubble); gravel, sand and hard loam pavements.

Groups 5 and 6 include roads so-called mainly because they are used for general traffic, irrespective of their surfaces, prepared or otherwise.

It will be noticed that some of the terms used above are practically synonymous. Such terms are, of course, not used by any one State, but are the classifications adopted by different States.

For details of any particular State, *see* the respective paragraphs in the preceding pages.

(a) Municipalities, 31st October; Road Districts, 30th June.

9. *Summary of Expenditure on Roads and Bridges.*—(i) *General.* In most States, there are three classes of authorities—the State Government, the central road authority, and numerous local government bodies. Most of these authorities may expend money either directly on road construction or indirectly by means of grants and miscellaneous payments to other authorities. Insufficient information is given in the accounts of many authorities to permit the exclusion of these indirect payments which would, if included in the aggregate, duplicate the expenditure. In addition, a number of authorities are not able to supply separate information concerning their expenditure on roads. For these reasons, it has not been possible, up to the present, to compile statistics of the aggregate expenditure on roads.

The two paragraphs following, therefore, represent only: (a) aggregate expenditure from the various State road funds referred to in the foregoing pages, and (b) loan fund expenditure by State Governments. Expenditure by local government bodies is not included. Paragraph 8, *Finances*, of § 2. *Local Government Authorities*, contains some particulars of local government revenue and expenditure on roads, streets and bridges (*see pp.* 709, 710, 714 and 715).

(ii) *Aggregate Expenditure from State Road Funds.* The following table shows expenditure on the construction and maintenance of roads, including payments to local government bodies, by each State during the years 1938–39 and 1954–55 to 1958–59, as summarized from the foregoing tables dealing with the receipts and payments of the various State road authorities. Expenditure on plant and materials not charged to construction and maintenance of roads and bridges and identifiable expenditure on debt charges and payments to State consolidated revenues are not included. In some instances, expenditure on works other than roads and bridges is included. Because of differing accounting methods, figures are not completely comparable as between States, nor, in some States, as from year to year.

ROADS AND BRIDGES: AGGREGATE EXPENDITURE FROM ROAD FUNDS.
(£'000.)

Year ended 30th June—	N.S.W. (a)	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Total.
1939.. ..	3,358	2,569	2,557	1,150	1,214	(b) 319	11,167
1955.. ..	12,953	9,131	8,975	5,256	4,064	2,752	43,131
1956.. ..	13,786	10,659	9,772	6,145	5,659	2,832	48,853
1957.. ..	14,678	12,442	11,349	6,109	6,126	3,204	53,908
1958.. ..	16,377	15,696	11,646	6,626	7,521	3,076	60,942
1959.. ..	17,335	16,170	(c)	7,526	8,178	3,848	(c)

(a) Excludes Sydney Harbour Bridge.

(b) Year 1939–40.

(c) Not available.

The foregoing particulars do not represent the total expenditure on roads and bridges in each State. To obtain this information, additions must be made on account of (a) State Government expenditure from revenue and loan through Departments or authorities other than the central road authority and (b) local government expenditure from revenue and loan, while on the other hand, allowances must be made for grants and miscellaneous payments to other authorities (*see* (i) above).

(iii) *State Net Loan Expenditure.* In recent years, expenditure from State loan funds on roads and bridges has not been large, and it would appear also, that a considerable proportion passes through the funds of the central road authorities and is therefore included in the figures of their financial operations in the foregoing sections. Gross loan expenditure by all State Governments during the two years 1957–58 and 1958–59 amounted to approximately £2,500,000, while net expenditure was about £1,500,000. Aggregate net loan expenditure on roads and bridges in each State to 30th June, 1959, amounted to the following approximate sums:—New South Wales, £22,000,000; Victoria, £23,000,000; Queensland, £8,000,000; South Australia, £5,000,000; Western Australia, £3,000,000; Tasmania, £11,000,000; total, £72,000,000.

§ 5. Water Supply, Sewerage and Drainage.

NOTE.—*See also* Chapter VIII.—Water Conservation and Irrigation.

1. **New South Wales.**—(i) *General.* The two largest domestic water supply and sewerage systems are controlled by statutory boards each consisting of a president and a vice-president appointed by the State Government and five members elected by local councils. These are (a) the Metropolitan Water, Sewerage and Drainage Board, which administers the systems in the County of Cumberland, i.e., in Sydney and in the surrounding districts, and, in addition, has jurisdiction over territory extending along the South Coast beyond Wollongong to Lake Illawarra, and (b) the Hunter District Water Board, serving the Newcastle area. At Broken Hill, a similar board includes a representative of the mining companies. Other systems, apart from irrigation projects and water storage systems administered by the State Government, are controlled by county, municipal or shire councils.

(ii) *Water Supply—to 30th June, 1958.* (a) *Metropolitan.* The storage reservoirs of the metropolitan system, with a combined available capacity of 147,730 million gallons, drain catchment areas of 376 square miles (Upper Nepean, 347 square miles and Woronora, 29 square miles). Water is drawn also from the Warragamba River, with a catchment of 3,383 square miles. This system is being developed, and building is in progress of a dam to have an overall height of 415 feet (greatest depth of water 340 feet) having a storage capacity of 460,000 million gallons and giving a net safe draught estimated at 263 million gallons a day in addition to 11 million gallons a day for riparian purposes. The existing temporary storage is supplied by a weir 50 feet high with a maximum storage of 579 million gallons. At 30th June, 1958, there were 123 service reservoirs in use with a combined capacity of 570 million gallons. Rating for water for 1957–58 was 10d. in the £1 of assessed annual value and the charge for water measured by meters 2s. 3d. per 1,000 gallons.

(b) *Newcastle.* The water supply is drawn from two sources (1) the Chichester Reservoir, with a storage capacity of about 5,000 million gallons and draining a catchment of 76 square miles, and (2) the Tomago Sandbeds, which extend northerly along the coast towards Port Stephens. Service reservoirs and tanks distributed throughout the Water Supply District have a total storage capacity of 113 million gallons. Water rating for 1957-58 was 1s. 6½d. in the £1 on assessed annual value for occupied properties and 1s. 3½d. in the £1 for unoccupied properties. The price of water to domestic and industrial consumers is 2s. 6d. per 1,000 gallons.

(c) *Water Supplied, etc.* The following tables show, for the Sydney and Newcastle systems, the number of properties, the estimated population supplied, and other details for the years 1938-39 and 1953-54 to 1957-58:—

WATER SUPPLY, SYDNEY(a): SERVICES.

1957-58 ..	78,954	315,816	29.5	10,753	373	93.3	1,410

(iii) *Sewerage and Drainage—to 30th June, 1958.* (a) *Metropolitan.* Sydney and suburbs are served by three major sewerage systems and six minor systems consisting of six outfalls discharging directly into the Pacific Ocean and three treatment works. In addition, four centres outside the metropolitan area (Camden, Campbelltown, Liverpool and Wollongong) are served by local treatment works.

Stormwater drainage channels under the control of the Metropolitan Water, Sewerage and Drainage Board at 30th June, 1958, were 180 miles long. Sewerage rating for 1957-58, was 9d. in the £1 of assessed annual value and drainage rating 1½d. in the £1.

(b) *Newcastle.* The main sewerage system of the Newcastle area discharges into the Pacific Ocean at Merewether Gulf. In some of the outlying districts, treatment works have been installed.

Sewerage rates for 1957-58 were 1s. 1½d. in the £1 of assessed annual value of occupied lands and 10½d. in the £1 for unoccupied lands and drainage rates (on certain areas served) 1½d. in the £1.

(c) *Particulars of Services.* The following table gives, for the Metropolitan system, details of sewerage services and stormwater drains as at 30th June, 1939 and 1954 to 1958.

SEWERAGE AND DRAINAGE, METROPOLITAN(a): SERVICES.

At 30th June—				Improved Properties for which Sewerage Available.	Estimated Population Served.	Lengths of Sewers.	Length of Stormwater Channels.
						Miles.	Miles.
1939..	254,632	1,066,000	2,561	87
1954..	324,737	1,354,000	3,163	175

1958..	364,712	1,483,000	3,628	180

(a) Includes part of South Coast.

At 30th June, 1958, 52,311 premises had been connected to the Hunter District Water Board's sewerage system (Newcastle area). The total length of sewers under the Board's control was 714 miles, and the length of drains was 49 miles.

(iv) *Finances, Sydney and Newcastle Systems.* The following table shows the debt, revenue and expenditure of the Metropolitan Water, Sewerage and Drainage Board and the Hunter District Water Board for each of the services of water supply, sewerage and drainage during 1957–58 and for the three services combined during the years 1938–39 and 1953–54 to 1957–58.

(a) Includes provision for renewals, long service leave, loss on exchange, etc. (b) Includes part of South Coast. (c) Excludes non-interest bearing capital in respect of stormwater drains transferred from Public Works Department—£2,219,823 at 30th June, 1958.

(v) *Country Water Supply and Sewerage Systems.* (a) *Local Government.* At 31st December, 1957, country water supply services were conducted or under construction by 58 municipalities, 74 shires and 5 county councils, and country sewerage services by 55 municipalities and 25 shires. The capital indebtedness of these schemes was £23,530,112 at 31st December, 1957, namely, £16,288,740 for water and £7,241,372 for sewerage. Debt of the municipalities amounted to £13,177,234, shires to £6,295,282 and county councils to £4,057,596. Government advances amounting to £440,605 are included in these figures. Aggregate income and expenditure amounted to £4,007,716 and £3,084,997, respectively, in 1957.

(b) *Other.* The water supply and sewerage services for Broken Hill are operated by a statutory board, the Broken Hill Water Board. Its capital indebtedness at 31st December, 1957, was £3,138,507. In 1957, income (excluding subsidies, State Government £114,059 and Mining Companies £328,901) amounted to £238,235 and expenditure (excluding debt redemption £175,223) amounted to £503,341.

The following country water supply systems—South-West Tablelands, Junee and Fish River—are administered by the Department of Public Works. These supply water in bulk to municipalities and shires, the Railways Department, and other large consumers. Only a small quantity is sold direct to private consumers. The capital indebtedness of these systems was £4,711,162 at 31st December, 1957.

The Mulwala Water Supply and Sewerage Service was constructed as an urgent war-time work for the Commonwealth, and the Bethungra Water Supply System is administered by the Department of Public Works in conjunction with the Junee supply.

2. *Victoria.*—(i) *Melbourne and Metropolitan Board of Works.* (a) *General.* The Board was established by Act of Parliament on 20th December, 1890. Since August, 1955, the Board has consisted of a Chairman and 50 Commissioners elected to represent the municipalities which lie wholly or partly within the metropolitan area. The Chairman is elected by the Commissioners for a four-year term. The principal functions of the Board until 1954 were to control and manage the metropolitan water supply system; to provide the metropolitan area with an efficient main and general sewerage system; to deal with main drains and main drainage works; and to control and manage the rivers, creeks and watercourses within the metropolitan area. The Board has carried out since December, 1954, the additional functions of a permanent planning authority and in June, 1956, it became the authority directly responsible for metropolitan main highways, bridges, parks and foreshores.

(b) *Water Supply.* There are six storage reservoirs serving the metropolitan area—Yan Yean, 7,233 million gallons (available for consumption, 6,649 million gallons); Toorourrong, 60 million gallons; Maroondah, 6,289 million gallons (4,870 million gallons); O'Shannassy, 931 million gallons; Silvan, 8,853 million gallons (8,823 million gallons); and Upper Yarra, 45,400 million gallons (44,120 million gallons); total 68,766 million gallons (65,453 million gallons). Service reservoirs number 29, with a total capacity of 317 million gallons.

The water rate levied by the Board in 1957–58 was 8d. in the £1 on the net annual value of the properties served. The charge for water consumed in excess of the quantity which at 1s. per 1,000 gallons would equal the water rates payable on each property was 1s. 6d. per 1,000 gallons. The following table shows particulars of Melbourne metropolitan water supply services for the years 1938–39 and 1953–54 to 1957–58.

WATER SUPPLY, MELBOURNE: SERVICES.

The metropolitan sewerage system consists of the Main system (serving an area of 74,919 acres) and three subsidiary systems—the Sunshine system (serving an area of 1,689 acres), the Kew system (serving an area of 103 acres) and the South-eastern system (serving an area of 2,697 acres in Cheltenham, Parkdale, Mentone and Mordialloc). The Metropolitan Sewage Farm, 26,854 acres in extent and situated about 24 miles south-west of Melbourne beyond the township of Werribee, serves to purify and dispose of approximately 95 per cent. of the sewage flow of the metropolis before its discharge into Port Philip Bay. The total capital cost (less depreciation) of the Farm to 30th June, 1958, was £3,432,021. Revenue during 1957-58 amounted to £178,348, cost of sewage disposal to £207,559, trading expenses to £109,366, interest to £148,877, and net cost of sewerage purification to £287,454. These financial particulars are included in the sewerage items of the summary below.

(d) *Finances.* The following table provides for the year 1957-58 a summary of the financial operations of the three services conducted by the Melbourne and Metropolitan Board of Works.

MELBOURNE AND METROPOLITAN BOARD OF WORKS: FINANCES, 1957-58.

(ii) *State Rivers and Water Supply Commission.* (a) *General.* Water supply and conservation throughout Victoria (except for the area controlled by the Melbourne and Metropolitan Board of Works) is the responsibility of the State Rivers and Water Supply Commission. The events leading to the establishment of the Commission and its works in the spheres of irrigation, domestic and stock water supply to farms, drainage, flood protection and river improvement, have already been described in Chapter VIII.; this section is therefore confined to the Commission's functions in connexion with urban water supply and sewerage.

(b) *Water Supply.* At 30th June, 1959, the Commission provided a reticulated water supply from its own works to 130 cities and towns having a combined population of 200,000 persons.

The principal systems operated by the Commission serve part of the Mornington Peninsula—Dandenong area (about 100,000 people supplied); Bendigo, Castlemaine, etc. (58,000) and about 7,000 people in the Western District. In addition, 9,000 persons in a number of towns in the Bellarine Peninsula receive supply through a Commission-operated distributary system from headworks controlled by the Geelong Waterworks and Sewerage Trust.

Outside these areas the Commission supplies mainly small towns in the north of the State, usually in areas where it also supplies farms with water for irrigation or domestic and stock purposes.

Capital expenditure at 30th June, 1959, has been divided up as follows:—

System.	Amount. £
Mornington Peninsula	6,500,000
Bendigo, Castlemaine	3,100,000
Bellarine Peninsula	700,000
Otway System (Western-District)	600,000
Other	800,000
Total	11,700,000

In addition to the supply which it gives directly, there are more than 500,000 people in 175 cities and towns throughout the State who get a reticulated water supply from works operated by local authorities, usually termed Waterworks Trusts.

All these authorities operate under the supervision of the State Rivers and Water Supply Commission, largely because the Government subsidizes interest on their capital expenditure. Most new works are financed from Government loan funds, but in recent years some local authorities have been able to borrow money privately. In most cases, the local authority controls both headworks and distribution system, but a few large towns—serving about 50,000 people—draw their water from the State Rivers and Water Supply Commission and are concerned only with reticulation of the water. Together, therefore, the Commission and local authorities supply more than 300 urban centres containing more than 700,000 people. Very few towns of any importance are now without a reticulated water supply.

(c) *Sewerage.* The State Rivers and Water Supply Commission directly controls the sewerage system of the town of Eildon. With that exception, the construction and management of sewerage works in Victoria's country cities and towns are the responsibility of local authorities supervised by the Commission. Except for the Geelong Waterworks and Sewerage Trust and the Latrobe Valley Water and Sewerage Board which have special Acts dealing with their activities, all sewerage authorities operate under the Sewerage Districts Act.

At 30th June, 1959, there were 36 cities and towns with sewerage systems in operation. These contained about 325,000 persons, approximately a third of the total number of residents outside the metropolitan area.

A summary of the financial operations of the State Rivers and Water Supply Commission, covering all phases of the Commission's activities, for each of the years 1938–39 and 1954–55 to 1958–59 are given in the following table:—

STATE RIVERS AND WATER SUPPLY COMMISSION, VICTORIA: FINANCES.(a)

Year.	Total Loan Capital Expenditure to 30th June.	Receipts.	Payments.				
			Operating Expenses.	Interest on Capital allotted.	Deprecia- tion.	Debt Redemp- tion.	Total.
1938–39	£ 24,223,037	£ 560,680	£ 476,085	£ 145,105	£ 27,553	£ 4,922	£ 653,665
1954–55	73,456,588	2,532,946	2,781,621	95,335	120,475	2,465	2,999,896
1955–56	79,847,923	2,810,391	2,940,637	118,379	127,774	5,491	3,192,281
1956–57	85,705,533	2,874,904	3,194,160	130,621	134,101	3,750	3,462,632
1957–58	91,163,842	3,487,775	3,444,673	139,807	148,272	23,850	3,756,602
1958–59	97,370,229	3,589,984	3,613,194	145,692	153,272	3,900	3,916,058

(a) Excludes waterworks and river improvement trusts and local governing bodies under the general supervision of the Commission.

The total loan capital expenditure of waterworks and river improvement trusts and local governing bodies to 30th June, 1958, and 30th June, 1959, was £13,535,974 and £15,329,821, respectively, making a grand total of £104,699,816 and £112,700,050, respectively, when added to the figure of works under the control of the Commission. The net loan capital after redemption payments of £4,238,546 and £5,090,790, respectively, was £100,461,269 and £107,609,260, respectively.

The financial operations of the Commission form part of the Consolidated Revenue Fund, but are included in this section for convenience. The major proportion of the interest payable is borne by the State and is additional to that shown above. The net expenditure borne by the State was £3,863,583 during 1957-58 and £4,317,575 during 1958-59.

(iii) *Geelong Waterworks and Sewerage Trust.* (a) *General.* The Geelong Waterworks and Sewerage Trust was constituted in 1908 and reconstituted under the Geelong Waterworks and Sewerage Act in 1910. It was further reconstituted in September, 1950, to include a Government nominee (Chairman) and provision was made for a commissioner to be elected by the ratepayers of the Shire of Corio, making a total of seven commissioners instead of five as formerly. The amount of loan money which may be raised is limited to £6,500,000 for water supply undertakings, and £1,250,000 for sewerage undertakings. The population supplied is estimated by the Trust at 93,076 persons. This and other general information relates to 30th June, 1958.

(b) *Water Supply.* The catchment area is about 35,000 acres. There are seven storage reservoirs and eleven service basins whose total storage capacity is 8,640 million gallons. The length of water mains and reticulation is 426 miles. The total expenditure on water supply to 30th June, 1958, was £3,210,389. Expenditure for 1957-58 comprised £121,821 for working expenses and £176,227 for interest, redemption and reserves, while revenue amounted to £301,342. The sinking fund appropriations at June, 1958, amounted to £194,858. The replacement and contingencies reserve amounted to £276,570. There is a water rate of 1s. 5d. in the £1 (with minima of 10s. for vacant land and £1 for tenements) on the net annual value of ratable properties.

(c) *Sewerage Works.* The sewerage scheme consists of a main outfall sewer to the ocean at Black Rock, about 9 miles from Geelong, and 205 miles of main and reticulation sewers. The sewerage area is 10,559 acres, and the number of buildings within the sewered areas is 18,454, of which 18,370 have been connected. The total expenditure on sewerage works to 30th June, 1958, was £1,282,155. The revenue in 1957-58 amounted to £162,794 and the expenditure comprised £82,340 on working expenses and £71,953 on interest, redemption and reserves. Sinking fund appropriations at June, 1958, were £147,115. Replacement and contingencies reserve amounted to £274,442. A general rate of 1s. 4d. in the £1 is levied on the net annual value of ratable properties.

(iv) *The Ballarat Water Commission and the Ballarat Sewerage Authority.* (a) *General.* The Ballarat Water Commission was constituted on 1st July, 1880, and the Ballarat Sewerage Authority on 30th November, 1920. The members of the Water Commission constitute the Sewerage Authority. The Commissioners number nine, three (one of whom is chairman) being appointed by the Government, four being elected by the Council of the City of Ballarat, one being elected by the Councils of the Borough of Sebastopol and the Shires of Buninyong and Grenville and one being elected by the Councils of the Shires of Bungaree and Ballarat. General and financial information given herein relates to the year ended 31st December, 1958.

(b) *Water Supply.* The Water Supply District embraces an area of about 65 square miles, containing a population of about 55,000. The total storage capacity of the seven reservoirs is 5,606 million gallons and the catchment area is 23,872 acres.

The capital cost of construction of the waterworks was £2,251,946 to 31st December, 1958. The liabilities amounted to £1,321,419 at 31st December, 1958, including loans due to the Government totalling £1,183,571. The revenue for the year 1958 was £150,665. Working expenses during 1958 amounted to £68,777 and interest and other charges to £79,679. A rate of 1s. 1d. in the £1 is levied on the net annual value of all ratable properties, with a minimum of £1 10s. per annum for land on which there is a building and £1 per annum for land on which there is no building.

(c) *Sewerage.* The Ballarat sewerage district embraces the City of Ballarat and parts of the Shires of Ballarat, Bungaree and Grenville and the Borough of Sebastopol. Work was commenced in 1922 and up to 31st December, 1958, the Authority had constructed a disposals works, a nightsoil depot, an ejector station and more than 115 miles of sewers. The capital cost of sewerage construction works to 31st December, 1958, was £881,098. The method of sewage disposal is by sedimentation, oxidation and sludge digestion. One hundred and seventy-one sewered areas had been declared as at 31st December, 1958. Assessments in the sewerage district numbered 17,096, while those in sewered areas numbered 12,811. There were 11,325 buildings connected.

The scheme is financed by debenture-issue loans from various financial institutions. The liabilities on account of loans secured for construction at 31st December, 1958, amounted to £702,522; redemption payments at that date totalled £264,052. An expenditure of £157,122 was incurred for house connexions, the whole of which has been redeemed. Revenue during 1958 amounted to £92,762 and expenditure, which included £44,654 on interest and redemption, was £90,594.

A sewerage rate of 1s. 4d. in the £1 is levied, with a minimum charge of £3, on the net annual value of any ratable sewered property on which there is a building and £1 on any ratable sewered property on which there is no building.

(v) *Other Sewerage Authorities.* At 30th June, 1958, 62 sewerage authorities had been constituted under the provisions of the Sewerage Districts Acts in districts outside the areas under the control of the Melbourne and Metropolitan Board of Works, the Geelong Waterworks and Sewerage Trust, and the Ballarat Sewerage Authority, and systems were in operation in 34 districts. In addition, the State Rivers and Water Supply Commission operates a system in the township of Eildon. The population served by these systems is estimated at 300,000 persons.

The operations of the other 28 districts constituted at this date had been either suspended or not commenced.

3. *Queensland.*—(i) *Brisbane City Council—to 30th June, 1958.* (a) *General.* This organization conducts the water supply and sewerage systems of the City of Brisbane. Prior to 1928, water and sewerage activities had been controlled by the Metropolitan Water and Sewerage Board, but were then absorbed by the Brisbane City Council, which also supplies, in bulk, the whole of the water used by the City of Ipswich and the Town of Redcliffe.

(b) *Water Supply.* Water storage facilities comprise the following (available capacities are shown in parentheses):—Somerset Reservoir, 200,000 million gallons (55,000 million gallons); Lake Manchester, 5,806 million gallons (5,725 million gallons); Brisbane River, 543 million gallons (484 million gallons); Pure Water Reservoir, Holt's Hill, 8.3 million gallons (8.3 million gallons); Enoggera Reservoir, 1,000 million gallons (600 million gallons); Gold Creek Reservoir, 407 million gallons (400 million gallons). There are 16 service reservoirs with a capacity of approximately 41 million gallons. The Somerset reservoir is under the control of Stanley River Works Board and is a dual purpose project with a designed total holding capacity of 200,000 million gallons, 55,000 million gallons to be for water storage and 145,000 million gallons for flood mitigation. Water rating at 30th June, 1958, was 3½d. in the £1 of unimproved capital value for improved properties, and 2½d. in the £1 for vacant lands, with a minimum charge of £5 9s. and £4 5s. respectively. The following table is a summary of operations of the complete Brisbane City Council system (metropolitan area, Ipswich and Redcliffe) for the years 1938–39 and 1953–54 to 1957–58:—

WATER SUPPLY, BRISBANE(a): SERVICES.

Year.	Services Connected.	Estimated Population Supplied.	Average Daily Consumption.	Total Consumption for the Year.	Average Daily Consumption.		Length of Trunk and Reticulation Mains.	Number of Meters.
					Per Service.	Per Head of Estimated Population.		
			Mill. gals.	Mill. gals.	Gallons.	Gallons.	Miles.	
1938–39 ..	81,389	345,903	15.9	5,791	195	45.9	1,169	(b)
1953–54 ..	139,172	520,000	33.9	12,379	244	62.3	1,817	51,976
1954–55 ..	144,459	530,000	34.1	12,458	236	64.3	1,870	51,138
1955–56 ..	148,632	543,000	36.4	13,283	245	67.0	1,929	49,588
1956–57 ..	153,035	560,000	41.1	15,012	269	73.5	1,959	(b)
1957–58 ..	157,750	575,212	41.0	14,970	260	71.3	1,995	(b)

(a) Includes Ipswich and Redcliffe.

(b) Not available.

(c) *Sewerage.* The sewage treatment works is situated at Luggage Point at the entrance to the Brisbane River. An activated sludge system of treatment was originally planned but since the commencement of pumping operations a sedimentation plant only has been used. Sewerage rating at 30th June, 1958, was 2½d. in the £1 of unimproved capital value for improved properties, and 2½d. in the £1 for vacant lands, with a minimum charge of £6 6s. and £5 6s. respectively. The following table is a summary of operations of the Brisbane sewerage scheme for the years 1938–39 and 1953–54 to 1957–58:—

SEWERAGE, BRISBANE: SERVICES.

Year.					Premises Connected.	Estimated Population Served.	Total Sewage Pumped for the Year.	Length of Main, Branch, Reticulation etc., Sewers.
							Mill. Galls.	Miles.
1938–39	33,200	150,000	(a)	484
1953–54	48,700	183,000	4,868	647
1954–55	50,400	187,000	4,944	665
1955–56	53,100	196,000	6,222	696
1956–57	54,300	201,000	4,837	712
1957–58	55,846	206,630	5,316	731

(a) Not available.

(d) *Finances.* The following table shows particulars of the finances of the water supply and sewerage undertakings of the Brisbane City Council for the years 1938–39 and 1953–54 to 1957–58:—

WATER SUPPLY AND SEWERAGE, BRISBANE: FINANCES.

(£.)

Service and Year.		Gross Capital Cost to 30th June.	Revenue.	Expenditure.			Surplus(+) or Deficit(–).

1957–58	..	13,874,524	773,337	244,774	421,004	761,118	+ 12,219

(a) Total including other expenditure.

(ii) *Country Towns.* (a) *Water Supply.* In addition to the City of Brisbane, there were, at 30th June, 1958, 142 cities and towns in Queensland provided with water supply systems controlled by municipal and shire councils.

(b) *Sewerage Systems.* At 30th June, 1958, there were 18 cities and towns outside the Metropolitan Area—Barcaldine, Blackall, Bundaberg, Charleville, Cunnamulla, Goondiwindi, Hughenden, Ipswich, Kingaroy, Mackay, Maryborough, Mt. Isa, Quilpie, Rockhampton, Surat, Toowoomba, Townsville and Warwick—with sewerage systems.

Sewerage schemes were in course of construction at Bowen, Longreach, Redcliffe and Roma.

(c) *Finances.* The receipts (other than loan and loan subsidy) of water undertakings controlled by the cities and towns referred to above amounted to £1,775,708 in 1957–58. Expenditure amounted to £1,822,771, including £683,345 for debt charges. In addition, expenditure from loans and loan subsidy amounted to £1,916,363.

Finances of sewerage undertakings are incorporated in council general funds and are not available separately.

4. *South Australia.*—(i) *General.* The water supply and sewerage systems in this State were constructed and are maintained by the Engineering and Water Supply Department under the control of the Minister of Works. The works controlled comprise the Adelaide, Barossa, Baroota Creek, Beetaloo, Bundaleer, Tod River, Warren and other country water districts systems, the Morgan-Whyalla water supply system, the Adelaide metropolitan sewerage system, the Murray River Weirs water conservation, and the Metropolitan Flood Waters Scheme. In 1955–56, construction commenced on the Salisbury-Elizabeth Sewerage Scheme and early in 1959 sewerage of the town of Naracoorte and further extensions to the Port Lincoln sewerage scheme were commenced.

(ii) *South Australian Waterworks.* (a) *Services.* The table hereunder shows particulars of the area, capacity, etc., of combined metropolitan and country waterworks for the years 1938–39 and 1954–55 to 1958–59:—

WATERWORKS, SOUTH AUSTRALIA: SERVICES.

Year.	Assessments.(a)		Area of Districts Supplied. (a)	Capacity of Reservoirs, Tanks, etc.	Length of Mains.	Number of Meters.

1958–59 ..	54,301,234	3,106,348	2,768,406	1,933,850	4,702,256	1,595,908

(iii) *Adelaide Waterworks.* At 30th June, 1959, the Adelaide waterworks supplied a district of 185,826 acres. The capacity of its five reservoirs and storage tanks was 14,469 million gallons and there were 2,188 miles of mains.

The Mannum-Adelaide pipeline conveys water from the River Murray to the River Torrens and the River Onkaparinga and supplements the Metropolitan and Warren systems, serving country areas en route. Another major project, the construction of a large reservoir on the South Para River, is now completed. This reservoir provides additional storage to serve the lower northern areas of the State and makes some additional provision for the metropolitan area. The capacity of the new reservoir is about 10,000 million gallons.

Particulars of finances for the years 1938-39 and 1954-55 to 1958-59 are shown below:—

ADELAIDE WATERWORKS: FINANCES.

(£.)

Year.	Invested Capital to 30th June.	Revenue.	Expenditure.			Surplus (+) or Deficit (—).
			Working Expenses. (a)	Interest.	Total.	
1938-39.. ..	4,676,110	446,273	111,161	202,279	313,440	+ 132,833
1954-55.. ..	17,922,472	1,062,519	923,222	511,127	1,434,349	— 371,830
1955-56.. ..	20,434,323	1,358,896	930,138	646,720	1,576,858	— 217,962
1956-57.. ..	23,115,689	1,492,610	1,218,285	759,012	1,977,297	— 484,687
1957-58.. ..	25,900,153	2,045,625	1,632,326	895,679	2,528,005	— 482,380
1958-59.. ..	28,719,570	2,101,768	1,450,994	1,019,331	2,470,325	— 368,557

(a) Includes debt redemption.

(iv) *Adelaide Metropolitan Sewerage.* The Adelaide metropolitan sewerage system, comprising the Adelaide, Glenelg and Port Adelaide areas, with drainage areas of 112 square miles in all, includes a sewage farm, and treatment works at Glenelg and Port Adelaide. The total quantity of sewage pumped by the various stations was 6,760 million gallons during 1958-59. Other particulars for 1938-39 and 1954-55 to 1958-59 are shown hereunder:—

ADELAIDE METROPOLITAN SEWERAGE: SUMMARY.

Year.	Length of Sewers.	Number of Connexions.	Invested Capital to 30th June.	Revenue.	Expenditure.			Surplus (+) or Deficit (—)
					Working Expenses. (a)	Interest.	Total.	
	Miles.		£	£	£	£	£	£
1938-39 ..	923	80,745	3,361,034	268,880	77,023	150,273	227,296	+ 41,584
1954-55 ..	1,292	131,932	6,974,042	641,194	468,969	205,594	674,563	— 33,369
1955-56 ..	1,335	137,995	7,602,416	866,754	577,872	238,748	816,620	+ 50,134

1958-59 ..	1,444	154,636	10,437,696	1,471,067	685,104	349,312	1,034,416	+ 436,651

(a) Includes debt redemption.

(v) *Country Sewerage Schemes.* In 1958-59, the total length of the Salisbury sewerage scheme was 62 miles and the number of its connexions 5,294. The Port Lincoln scheme, which is one mile in length, had 40 connexions in 1958-59. The Naracoorte Sewerage scheme was proclaimed in January, 1959, the area being 2.43 square miles.

(vi) *Country Water Supply.* Water district systems outside Adelaide at 30th June, 1959, comprised an area of 12,817,479 acres, and the capacity of the reservoirs was 19,441 million gallons. These figures exclude the Morgan-Whyalla supply system, which obtains its water from the River Murray. The storage tanks of this system have a capacity of 44 million gallons.

The Uley-Wanilla sub-artesian basin has been utilized to augment the Tod River District supplies. Pumping began in 1947. In 1958-59, nine bores were in operation and 483 million gallons were pumped from the basin.

Construction work is proceeding on the scheme to reticulate water to Yorke Peninsula. The trunk main from Bundaleer Reservoir has been extended to Edithburgh and country lands are fully reticulated to about the latitude of Pine Point.

The following table gives financial information on country waterworks for 1938-39 and 1954-55 to 1958-59:—

COUNTRY WATERWORKS, SOUTH AUSTRALIA: FINANCES.

(£.)

Year.	Invested Capital to 30th June.	Revenue.	Expenditure.			Deficit.
			Working Expenses. (a)	Interest.	Total.	
1938-39.. ..	10,015,613	207,569	130,523	449,691	580,214	372,645
1954-55.. ..	19,430,759	662,498	931,804	584,787	1,516,591	854,093
1955-56.. ..	21,066,810	723,798	990,528	681,348	1,671,876	948,078
1956-57.. ..	22,123,508	825,462	1,077,159	726,474	1,803,633	978,171
1957-58.. ..	23,260,873	982,568	1,312,322	844,478	2,156,800	1,174,232
1958-59.. ..	25,581,664	1,004,580	1,317,412	914,519	2,231,931	1,227,351

(a) Includes debt redemption.

(vii) *Morgan-Whyalla Water Supply Scheme.* This scheme, which involved the laying of 223 miles of main, was officially opened on 31st March, 1944, the capital invested to 30th June, 1959, being £2,603,449. Particulars of this scheme, where applicable, are included in the tables of the combined waterworks in (ii) above. During 1958-59, the water used from the system between Morgan and Whyalla amounted to 2,341 million gallons. Revenue for the year 1958-59 was £291,647, working expenses, etc., £273,254, interest charges, £84,425, and deficit, £66,032.

5. *Western Australia.*—(i) *General.* The water supply, sewerage and drainage systems of Western Australia are principally under the management of two State Government Departments, namely, the Metropolitan Water Supply, Sewerage and Drainage Department, having as its territory the metropolitan area centred on Perth and extending to Kwinana and Serpentine in the South, Marmion in the north and Greenmount on the east, and the Public Works and Country Water Supply Department, which controls the Comprehensive Water Supply Scheme (covering the Goldfields and Agricultural Areas Water Supply and the Great Southern Towns Water Supply) as well as supplies, from local sources, to fifty-five country towns not included in the scheme. Both Departments are administered under the portfolio of Minister for Works and Water Supplies.

(ii) *Metropolitan Water Supply, Sewerage and Drainage.* (a) *General.* The sources of the metropolitan water supply are the Canning Dam, the Churchman Brook Reservoir, the Victoria Reservoir, the Wungong Brook Diversion Weir and, since November, 1957, a pipehead dam (capacity 850 million gallons) on the Serpentine River. The supply from these sources is supplemented as necessary from a number of artesian bores and from a

pipeline link with Mundaring Weir. The largest reservoir, the Canning Dam, has a capacity of 20,550 million gallons. Since the opening of the Serpentine pipehead dam, work has proceeded on the main Serpentine Reservoir designed to have an ultimate capacity of 39,000 million gallons, the estimated cost of the whole project being £9 million.

The sewage treatment works of Perth and suburbs consist of primary sedimentation with separate sludge digestion and discharge of all effluent directly to the ocean. Plant for secondary treatment at Subiaco is now being provided. Fremantle treatment works consist of septic tanks with ocean outfall for effluent. There are three treatment works, situated at West Subiaco, Swanbourne and Fremantle.

(b) *Water Supply.* The following table shows particulars of water supply services for 1938-39 and 1954-55 to 1958-59.

METROPOLITAN WATER SUPPLY, WESTERN AUSTRALIA: SERVICES.

Year.	Number of Services.	Estimated Population Supplied.	Average Daily Consumption.	Total Consumption for Year.	Average Daily Consumption.		Length of Mains.	Number of Meters.
					Per Service.	Per Head of Estimated Population.		
			Mill. gals.	Mill. gals.	Gallons.	Gallons.	Miles.	
1938-39 ..	61,467	248,248	14.1	5,147	229	56.8	953	40,014
1954-55 ..	108,755	367,429	38.2	13,948	351	104.0	1,597	78,194
1955-56 ..	113,437	380,294	39.4	14,408	348	103.5	1,709	82,636
1956-57 ..	118,230	393,596	41.0	14,982	355	106.2	1,792	83,151
1957-58 ..	122,159	407,376	47.5	17,337	394	118.4	1,891	85,896
1958-59 ..	125,761	410,000	49.5	18,061	399	122.5	1,991	92,495

Water rating for 1958-59 was 1s. 6d. in the £1 on annual valuation.

(c) *Sewerage and Main Drainage.* Some particulars of the metropolitan sewerage and main drainage services for 1938-39 and 1954-55 to 1958-59 are shown below:—

METROPOLITAN SEWERAGE AND MAIN DRAINAGE, WESTERN AUSTRALIA: SERVICES.

Year.				Houses Connected.	Estimated Population Served.	Length of Sewers.	Length of Main Drains.
						Miles.	Miles.
1938-39	36,652	162,457	444	31
1954-55	58,543	232,000	675	34
1955-56	60,702	240,860	692	34
1956-57	62,282	246,900	709	37
1957-58	63,969	253,800	713	66
1958-59	64,944	257,500	714	67

Sewerage rating for 1958-59 was 1s. 9d. in the £1 on annual valuation, while metropolitan main drainage rating was 4d.

(d) *Finances.* The following table shows particulars of the finances of the Western Australian Metropolitan Water Supply, Sewerage and Drainage Department for the years 1938-39 and 1954-55 to 1958-59:

**METROPOLITAN WATER SUPPLY, SEWERAGE AND MAIN DRAINAGE,
WESTERN AUSTRALIA: FINANCES.**

(£.)

1958-59 ..	1,350,083	88,846	40,684	55,090	95,774	— 6,928

(iii) *Country Water Supplies Controlled by Public Works Department.* Full information concerning country water supplies controlled by the Public Works Department may be found in Chapter VIII., Water Conservation and Irrigation, of this Year Book (see pp. 278-9).

6. *Tasmania.*—(i) *Waterworks.* At the end of 1958-59, there were 85 municipally operated waterworks in Tasmania. The capacity of the reservoirs was 1,750 million gallons, the estimated population served was 250,000 and the number of tenements served was 63,000. In addition, two regional schemes operated by the State Government were serving an estimated population of 35,000 in 9,000 tenements.

(ii) *Sewerage.* At the end of 1958-59, there were 11 municipal sewerage schemes in operation in Tasmania. They served an estimated population of 162,000 and the number of tenements served was 41,000.

§ 6. Harbour Boards and Trusts.

NOTE.—The number and net tonnage of all vessels which entered the major ports in each State during the years 1956-57 and 1957-58 are shown in Chapter XIV.—Transport and Communication, (see p. 519). Particulars of overseas and interstate cargo discharged and shipped during 1957-58 are shown on page 520 of the same chapter.

1. *New South Wales.*—(i) *Maritime Services Board of New South Wales.* (a) *General.* The Maritime Services Board of New South Wales is a corporate body of five Commissioners comprising three full-time members and two part-time members representing shipping and other interests. The Board was constituted on 1st February, 1936, under the Maritime Services Act 1935, to co-ordinate the port and navigation services of the State, which had previously been administered by the Sydney Harbour Trust and by the State Department of Navigation.

The Board exercises general control over intra-state shipping, including the survey and certification of vessels, the licensing of harbour craft, and the examination and issue of

certificates to officers. It is responsible for the provision of pilotage services, lights, beacons, buoys and other port facilities, imposes and collects rates and charges on goods and vessels, and is vested with the general control and management of the navigable waters and ports within the State.

At the Port of Sydney, the Board is also responsible for the provision of adequate wharfage and channels, and carries out all construction, maintenance and dredging work. At other ports of New South Wales, such work is undertaken by the Department of Public Works.

(b) *Port of Sydney.* The entrance to Sydney Harbour, the principal port of New South Wales, is nearly a mile wide, and the depth of its navigable channel is not less than 80 feet. Between the entrance, known as "The Heads", and the Harbour proper, a distance of 4 miles, there are two separate channels, each 700 feet wide, the Western Channel not less than 42 feet deep (low water ordinary spring tide) and the Eastern Channel 41 feet deep. The foreshores, which have been reduced by reclamations, are 152 miles in length and the total area of the port is 13,600 acres, or 21 square miles, of which about one-half has a depth of 30 feet or more at low water ordinary spring tide. The mean range of tides is 3 feet 6 inches.

The wharves are situated in close proximity to the business centre of the city, about four or five miles from the Heads. At present, there are 6 dolphin berths each 550 feet long, and 103 effective commercial cargo berths with a total length of 47,838 feet controlled by the Board. Accommodation for harbour craft amounts to 4,640 feet while the length of other berths including oil and private wharves totals 29,211 feet. Depth of water at wharves is up to 40 feet. Special facilities for the storage and handling of staple products such as wheat, wool, etc., are provided and modern plant has been installed for replenishing ships' bunkers with oil or coal.

Docking facilities are available for the largest vessel afloat. The Captain Cook Graving Dock, opened in March, 1945, ranks amongst the largest graving docks in the world being 1,139 feet by 147 feet 7½ inches with a depth of 45 feet 2 inches over the sill at high water. There are also several smaller dry docks and floating docks in the port.

The following table shows particulars of the finances of the Board in respect of the Port of Sydney for 1938-39 and 1953-54 to 1957-58:—

MARITIME SERVICES BOARD: FINANCES OF THE PORT OF SYDNEY.

(£.)

Year.	Total Capital Debt at 30th June.	Revenue.			Expenditure.			Surplus(+) or Deficit(-).
		Wharfage and Transhipment Rates.	Tonnage Rates and Berthing Charges.	Total.	Administration and Maintenance.	Interest, Debt Redemption, Exchange, etc.	Total. (a)	
1938-39	11,276,399	773,501	38,180	1,155,627	380,120	536,781	916,901	+ 238,726
1953-54	12,799,104	1,482,492	333,320	2,471,540	1,517,811	550,654	2,318,465	+ 153,075
1954-55	13,408,326	1,814,226	515,480	3,093,315	1,735,504	593,478	2,978,982	+ 114,333
1955-56	13,775,278	1,688,743	459,783	3,042,924	1,740,698	644,783	2,910,481	+ 132,443
1956-57	14,041,252	1,725,590	385,006	2,887,506	1,857,539	722,373	2,869,912	+ 17,594
1957-58	14,546,035	1,822,587	378,284	2,899,795	1,964,830	789,230	2,999,060	- 99,265

(a) Excludes capital expenditure but includes transfers to the Renewals Fund Reserve Account 1953-54, £250,000; 1954-55, £650,000; 1955-56, £525,000; 1956-57, £290,000; and 1957-58, £245,000.

Capital expenditure for each of the years 1938-39 and 1953-54 to 1957-58 was £468,026, £473,516, £599,752, £553,329, £716,597 and £706,931, respectively. Expenditure on renewals and replacements from the Renewals Fund Reserve Account was: 1953-54, £317,493; 1954-55, £306,542; 1955-56, £630,537; 1956-57, £684,210 and 1957-58, £568,301.

(c) *Port of Newcastle.* The Maritime Services Board of New South Wales is the port authority but other government bodies are responsible for certain functions and activities of a maritime character at Newcastle. These include—

- (i) The Department of Public Works, which is the constructing, dredging and maintenance authority at Newcastle as well as at other New South Wales ports except Sydney;

- (ii) The Department of Railways, which is responsible for the control of wharfage and shipping arrangements in connexion with the coal industry and the provision and maintenance of appliances necessary for the transport and shipment of coal.

An Advisory Committee consisting of eight members, appointed by the Governor, assists the Board in matters associated with the operation of the port. It is primarily a coal-loading port, and the proximity to the coal fields has led to the establishment of important industries, including iron and steel works, in the district. Facilities are available for the shipment of wool, wheat and frozen meat, and a wharf is available for timber.

The area used by shipping is about 570 acres, excluding the entrance to the harbour and the inner basin, which together cover an area of 162 acres. The width of the harbour at the entrance is 1,500 feet, and the navigable channel, with a depth of 25 feet 6 inches at low water, is 350 feet wide. Wharfage accommodation amounts to 16,240 feet, the Maritime Services Board controlling 7,230 feet and the Railways Department 5,810 feet while 3,200 feet is privately owned. There are also several dolphin berths available for tie-up purposes. A floating dock of 15,000 tons capacity is available at the port.

(d) *Port Kembla.* As from 3rd May, 1948, the Maritime Services Board assumed the administration and navigational control of Port Kembla, which had previously been administered by the New South Wales Department of Public Works. The Department, however, continues to be the constructing authority in respect of works, dredging and maintenance. An Advisory Committee consisting of eight members appointed by the Governor has been formed to assist the Board in the operation of the port. It has an area of approximately 330 acres, with depths ranging from 20 to 50 feet (low water ordinary spring tide), and wharfage accommodation totalling 6,800 feet has been provided for large ocean-going vessels. No cargo sheds are available as the nature of trade at the port does not call for the provision of sheltered storage accommodation at the berths. It is the port of the southern coalfields and for the expanding industrial area in and about Wollongong. The developmental programme for Port Kembla includes the construction of an inner harbour to provide wharfage for the steelworks in addition to general cargo berths.

(e) *Botany Bay.* The Maritime Services Board of New South Wales is the administrative and controlling authority. The port is primarily a discharging centre for the oil refinery at Kurnell and two berths are available as well as tanker mooring buoys. The entrance to the Bay is approximately $1\frac{1}{2}$ miles wide, with a minimum depth of about 36 feet in the dredged swinging basin.

(f) *Other Ports.* In addition to the ports of Sydney, Newcastle, Port Kembla and Botany Bay, the Board controls 28 outports along the coastline of 609 miles. The shipping trade of these outports is relatively small.

(ii) *Port Charges.* The port charges payable in respect of shipping and ships' cargoes in New South Wales are imposed by the Commonwealth Government in terms of the Light-houses Act and the Navigation Act, and by the State authorities under the Navigation Act of New South Wales, the Harbour and Tonnage Rates Act, and the Sydney Harbour Trust Act. Since 1st February, 1936, the State enactments have been administered by the Maritime Services Board. The gross collections by the State authorities amounted to £5,429,413 in 1957-58. This figure includes the Port of Sydney revenue (see table on p. 745) and State navigation service collections (£2,529,618 in 1957-58). Commonwealth Government revenue from light dues and navigation receipts, for the whole of Australia, amounted to £518,883 in 1957-58.

2. *Victoria.*—(i) *Melbourne Harbor Trust.* (a) *General.* Information regarding the origin and constitution of this Trust, which controls the Port of Melbourne, appears in Official Year Book No. 12, pages 970-2. The membership of the Board of the Melbourne Harbor Trust Commissioners was increased to five during 1954 by the appointment of a further part-time Commissioner to represent waterside workers' interests. At 31st December, 1958, the sheds available for wharfage accommodation had a length of 22,063 feet, covering an area of 1,633,762 square feet. The area of water in Port Philip Bay and the River Yarra under the control of the Trust is approximately 5,327 acres and the total length of wharves, piers and jetties in the port is 63,327 feet, giving an area of over 58 acres of wharfage,

and 56,148 feet of effective berthing space. During 1958, work was continued on the new berths at Appleton Dock (ultimately to have eighteen berths), Victoria Docks, South Wharf, Port Melbourne and Williamstown. A new dock in the river entrance area has been constructed for the use of the ferry service operating between Melbourne and Devonport, Tasmania, which commenced operations in September, 1959. The depth of water (low water ordinary spring tide) from the main channels to the principal wharves is 31 to 37 feet.

(b) *Finances.* The following table shows particulars of the financial operations of the Trust during the years 1939 and 1954 to 1958.

MELBOURNE HARBOR TRUST: FINANCES.
(£.)

Year.	Gross Loan Indebtedness at 31st December.	Revenue.		Expenditure.				Surplus (+) or Deficit (-)
		Wharfage and Tonnage Rates.	Total.	Administration and Maintenance.	Interest, Debt Redemption, Exchange, etc.	Depreciation, Renewals and Insurance Account.	Total. (a)	
1939 ..	4,018,527	689,100	843,899	282,533	270,650	129,160	837,577	+ 6,322
1954 ..	9,641,361	1,800,811	2,593,347	1,232,574	418,818	479,393	2,509,947	+ 83,400
1955 ..	9,978,842	2,120,780	3,019,048	1,475,467	446,348	532,372	2,906,406	+ 112,642
1956 ..	11,296,811	1,841,176	2,676,698	1,649,047	483,905	145,825	2,662,047	+ 14,651

1958 ..	12,907,279	2,043,848	3,020,913	1,310,119	603,899	631,988	2,958,686	+ 62,227

(a) Includes statutory payments to Consolidated Revenue and Geelong Harbour Trust:—1939, £155,234; 1954, £379,162; 1955, £452,219; 1956, £383,270; 1957, £389,065; 1958, £412,680; Excludes capital expenditure:—1939, £128,567; 1954, £1,255,625; 1955, £1,509,665; 1956, £1,609,928; 1957, £1,054,236; 1958, £1,658,589.

(ii) *Geelong Harbor Trust.* The Geelong Harbor Trust, constituted in 1905, is under the control of three Commissioners appointed from time to time by the Governor-in-Council. One of these, the chairman, is on a full time basis.

At the end of 1959, there were 17 effective berths in the port while two berths at Refinery Pier were under construction and a further berth for general cargo is in the course of planning. Three berths have a depth of 36 feet low water and all others (except Yarra Pier 29 feet) have a depth of 32 feet low water.

During the year 1958, total trade of the port aggregated 4,548,501 tons which was carried in 487 vessels of a total gross tonnage of 3,820,848.

Revenue for the year 1958 was £996,594 and expenditure from revenue totalled £575,701. At 31st December, 1958, the value of the Trust's fixed assets was £7,434,017 and loans outstanding amounted to £2,886,248.

(iii) *Portland Harbor Trust.* Construction of an all weather deep-sea port of three berths with a low water depth of 36 feet was commenced following the proclamation of the Portland Harbor Trust Act on 18th May, 1951. Capital expenditure up to £5,000,000 was authorized.

Operating revenue for the year ended 30th June, 1958, was £45,041 and revenue expenditure was £35,429. The value of the Trust's fixed assets, less depreciation, was £3,500,109 at 30th June, 1958, and loans and advances outstanding amounted to £3,647,836.

(iv) *Other Victorian Ports.* There are no other Victorian ports of more than minor importance.

3. *Queensland.*—(i) *General.* The ports of Queensland, except Brisbane and certain minor ports, are administered by Harbour Boards with members representing the towns and districts served by the ports. Brisbane and the minor ports are controlled by the State Treasury through the Department of Harbours and Marine, which supervises the engineering activities of the other ports.

(ii) *Brisbane.* Brisbane accommodates comfortably, in its dredged and improved river, the largest vessels in the Australian trade. The main centres for shipping, although further downstream than formerly, because of the increasing size of vessels, are still within easy access of the city. Adequate dry-docking facilities are available. The finances of Brisbane Harbour for the years 1938-39 and 1953-54 to 1957-58 are shown below:—

BRISBANE HARBOUR: FINANCES.
(£'000.)

Year.	Loan Indebtedness at 30th June.	Receipts.		Payments.	
		Harbour Dues.	Total.	Working Expenses.(a)	Total.
1938-39	1,179	165	173	36	112
1953-54	2,528	603	753	460	611
1954-55	2,633	688	853	522	693
1955-56	2,899	701	817	582	772
1956-57	3,011	671	918	843	1,048
1957-58	3,042	696	938	731	944

(a) Excludes Interest and Redemption.

In addition to Brisbane Harbour, the Department of Harbours and Marine also controls the Brisbane Dry Dock, the Cairncross Dock, the Brisbane River, and ten smaller harbours not administered by harbour boards.

(iii) *Harbour Boards.* Harbour boards control the ports of Bowen, Bundaberg, Cairns, Gladstone, Mackay, Rockhampton and Townsville. From 1st January, 1953, the harbour boards adopted the financial year ended 30th June for accounting purposes instead of the calendar year as previously. Finances for each port for the year ended 30th June, 1958, are shown below, together with a summary for the year 1939, for the period of eighteen months ended 30th June, 1954 and for the years ended 30th June, 1955, 1956 and 1957.

HARBOUR BOARDS, QUEENSLAND: FINANCES.
(£.)

Harbour Board.	Loan Indebted- ness at 30th June. (a)	Revenue.		Expenditure (excluding Loan).		Surplus(+) or Deficit(-).
		Wharf- age and Harbour Dues.	Total.	Working Expenses.	Total (including Interest and Redemption). (b)	
Bowen	397,428	44,648	53,201	34,753	60,461	— 7,260
Bundaberg	1,368,800	4,905	99,414	9,837	105,388	— 5,974
Cairns	238,281	188,693	246,948	206,681	256,315	— 9,367

1939	1,548,144	249,510	401,439	139,752	343,083	+ 58,356

(a) 1939 at 31st December. (b) Includes expenditure on capital works from accumulated revenue.
(c) Eighteen months ended 30th June, 1954.

4. *South Australia.*—*The South Australian Harbors Board.* All South Australian harbours are controlled by the South Australian Harbors Board, which consists of three Commissioners appointed by the Governor for a period of five years and eligible for re-appointment. The Board is responsible to the Minister of Marine for the discharge of its duties and functions. The most important ports are the five deep sea ports of Port Adelaide, Port Pirie, Wallaroo, Port Lincoln and Thevenard. At a few ports, the wharves or jetties are privately controlled, the principal of these being at Whyalla, Ardrossan and Rapid Bay, all of which are controlled by the Broken Hill Pty. Co. Ltd. Port Augusta is controlled by the Commonwealth Railways on behalf of the Commonwealth Government. Maximum depths of water (low water ordinary spring tide) at the wharves of the main ports range from 20 to 24 feet at Port Pirie to 35 feet at Port Adelaide (Outer Harbour). The following table shows the finances of the Board for 1938–39 and 1954–55 to 1958–59:—

THE SOUTH AUSTRALIAN HARBORS BOARD: FINANCES.

(£.)

Year.	Capital at 30th June. (a)	Revenue.	Expenditure from Revenue.				Surplus (+) or Deficit (—)
			Working Expenses.	Interest.	Debt Redemption.	Total.	
1938–39 ..	8,026,441	664,915	205,848	326,719	50,000	582,567	+ 82,348
1954–55 ..	11,604,213	1,842,796	1,315,349	352,005	..	1,667,354	+ 175,442
1955–56 ..	12,366,653	1,920,340	1,451,296	404,188	..	1,855,484	+ 64,856
1956–57 ..	13,232,185	2,112,718	1,427,882	434,042	..	1,861,924	+ 250,794

(a) State Treasurer's Funds and Reserve employed.

5. *Western Australia.*—(i) *Fremantle Harbour Trust.* The Port of Fremantle is operated and controlled by the Fremantle Harbour Trust, a body corporate administered by a Board of five Commissioners appointed triennially by the Governor. The port covers an extensive water area of some 180 square miles and comprises an Inner and an Outer Harbour. The Inner Harbour includes 18 deep water land-backed berths, providing more than 650,000 sq. ft. of covered storage space and 11,148 feet of wharf berth accommodation. All Inner Harbour berths are dredged to a depth of 36 feet. The Outer Harbour includes three main anchorages, Gage Roads, Owen Anchorage and Cockburn Sound. Deep water jetties are available in the Outer Harbour including the Oil Refinery Jetties in Cockburn Sound. Ocean going deep draft ships enter the Sound by means of channels dredged through Success and Parmelia Banks to a low water depth of 38 feet and a bottom width of 500 feet. The depth of water at the Refinery Jetties is a minimum of 44 feet.

Gross earnings for the years 1957–58 and 1958–59 amounted to £2,577,755 and £2,510,022 respectively, working expenses to £2,017,798 and £2,052,424, interest charges to £216,839 and £234,839, debt redemption to £59,414 and £64,384 and renewals fund to £2,000 each year. Special loan redemptions were £246,002 and £275,131 and net capital totalled £6,813,243 and £7,024,892.

(ii) *Albany Harbour Board.* The Albany Harbour is controlled by a board of five members appointed by the Government. The depth of water in the entrance channel is 33 feet, at one arm of the jetty 31 feet and at the other arm 34 feet. On approaches to wharf berths the depth is 30 feet and dredging to accomplish a depth of 34 feet is being carried out. Wharf accommodation consists of 1,115 feet and in addition the Deepwater Jetty has 2,500 feet of accommodation. Gross earnings for the years 1957–58 and 1958–59 amounted to £103,573 and £132,460 respectively, working expenses £50,196 and £60,802, interest and sinking fund charges, £81,648 and £85,592, and amounts debited to loan capital account, £1,687,144 and £1,694,303.

(iii) *Bunbury Harbour Board.* The Bunbury Harbour is controlled by a board of five members appointed by the Government. The depth of water in the harbour is 30 feet and berthing accommodation is 3,700 feet. Gross earnings for the years 1957–58 and 1958–59 amounted to £73,811 and £84,576 respectively, working expenses £60,239 and £83,379, interest and sinking fund charges £35,440 and £71,693, and amounts debited to loan capital account, £1,593,176 and £1,702,799.

(iv) *Other Ports.* The following ports are controlled by the State Government Harbour and Lights Department:—Geraldton, Yampi, Port Hedland, Carnarvon, Wyndham, Derby, Point Samson, Busselton, Onslow and Broome. The Port of Esperance is under the control of the Railways Commission.

6. *Tasmania.*—There are eight marine boards and two harbour trusts in Tasmania. The marine boards control the ports of Hobart, Launceston, Stanley (Circular Head), Burnie and Wynyard (Table Cape), Devonport, Strahan, Currie (King Island), and White-mark (Flinders Island) and the harbour trusts those of Smithton and Leven. Aggregate receipts of revenue accounts of all these authorities during the year 1957–58 were £1,212,794, and expenditures £1,004,255 including loan charges £204,060. The total receipts of the Hobart Marine Board during 1957–58 were £530,900, loan charges amounted to £72,068 and total expenditure to £424,819. Launceston Marine Board receipts during 1957–58 amounted to £298,877, loan charges to £24,907 and total expenditure to £248,811. Loan indebtedness of all marine boards and trusts at 30th June, 1958, was £2,937,164, of which £1,027,526 was in respect of Hobart (including Port Huon Wharf) and £309,003 in respect of Launceston.

Hobart, Launceston, Burnie and Devonport are the principal ports of Tasmania. In addition to their interstate and intra-state traffic, there is also considerable oversea shipping. Depths of water at wharves vary, in general, between 16 and 34 feet (low water ordinary spring tide), but at Hobart there is a depth of water of from 30 to 52 feet.

§ 7. Fire Brigades.

1. *New South Wales.*—A Board of Fire Commissioners, consisting of five members, one appointed by the State Government (President) and one each representing insurance companies, local government authorities, volunteer firemen, and permanent firemen, operates under the Fire Brigades Act 1909–1958, and 158 fire districts had been constituted at the end of 1958. Up to the end of 1949, the cost of maintenance of fire brigades was borne in proportions of one quarter, one quarter, and one half respectively by the Government, the municipalities, and the insurance companies concerned, and the expenditure was so regulated that the proportion payable by the councils in a fire district should not, except in special circumstances, exceed the amount obtainable from 4d. in the £1 rate on the unimproved capital value of rateable land in the fire district. In June, 1949, legislation was introduced (i) increasing the limit of the Board's borrowing power from £250,000 to £500,000, (ii) providing for the varying of the maximum rate that may be levied by councils and (iii) altering the basis of contributions so that from 1st January, 1950, local councils and the Government will each pay one-eighth and the insurance companies three-quarters. Legislation assented to on 31st March, 1958, increased the limit of the Board's borrowing power to £1,000,000, provided for the contributions payable by insurance companies to be assessed on premiums received in the State as a whole, and provided for appeals by insurance companies against assessments in certain cases.

At 31st December, 1958, the authorized strength of the Fire Brigade throughout the fire districts of New South Wales was 368 officers and 1,103 permanent and 2,632 volunteer firemen. Corresponding figures for the Sydney Fire District were 299, 1,012 and 359. The revenue for the year 1958 was £2,773,122, made up as follows:—From the Government, £344,745, municipalities and shires, £344,745; fire insurance companies and firms, £2,068,470; and from other sources, £15,162. The disbursements for the year were £2,728,222.

Other legislation, introduced in September, 1949, to improve and modernize the law dealing with the prevention of bush fires and to build up the organization of the bush fire-fighting services, provided for the establishment of Fire Regions and a Bush Fire Fighting Fund to be financed from contributions by the Government, councils and insurance companies in the proportion of one-quarter, one-quarter and one-half, respectively. The contribution of any council shall not exceed one-twentieth of a penny in the £1 on the unimproved capital value of rateable land in the area of the council not being land within a fire district constituted under the Fire Brigades Act 1908–1958. At 30th June, 1959, Volunteer Brigades numbered 2,500 with an active membership in excess of 60,000 persons. Up to 30th June, 1959, expenditure from the Fund for equipment amounted to £1,112,806.

2. *Victoria.*—(i) *General.* The Fire Brigades Act of 1928 provided for a Metropolitan Fire Brigades Board and a Country Fire Brigades Board each consisting of nine members. In December, 1944, the latter Board was superseded by the Country Fire Authority under an Act of that title, and the number of members was increased to ten. In December, 1954, the number of members of the Metropolitan Fire Brigades Board was increased from nine to ten to include an employees' representative.

(ii) *Metropolitan Fire Brigades Board.* Since 1st October, 1952, the Metropolitan Fire Brigades Board has received contributions from the municipalities and the insurance companies in the proportion of one-third and two-thirds respectively. Prior to 1st October, 1952, the Board received contributions in equal proportions from the Treasury, the municipalities and the insurance companies. On 30th June, 1958, the Board had under its control 43 stations, 824 permanent staff, 184 special service and clerical, etc., staff, and 14 part-time firemen. The total receipts for 1957–58 were £1,294,699 comprising contributions, £1,033,956, receipts for services, £141,122 and interest and sundries, £119,621. The expenditure was £1,468,696.

(iii) *Country Fire Authority.* This authority, constituted in 1944, is responsible for the prevention and suppression of fires in the "country area of Victoria", which embraces the whole of the State outside the metropolitan fire district, excluding State forests and certain crown lands. The country area has been divided into 24 fire control regions, three of which (Ballarat, Bendigo and Geelong) are wholly urban and the remainder mixed urban and rural. The Country Fire Authority has received contributions in the proportion of two-thirds from insurance companies and one-third from the Treasury as from 1st January, 1954. Prior to that date the Treasury contributed two-thirds while the insurance companies contributed one-third. At 30th June, 1958, the Act applied to 189 insurance companies, 203 urban and 1,028 rural fire brigades. The effective registered strength of the brigades was 98,307 members.

Income for the year 1957–58 amounted to £525,226. Total expenditure other than loan amounted to £472,244.

3. *Queensland.*—(i) *General.* Fire Districts are constituted under the Acts of 1920–1956. For each district, there must be a Fire Brigades Board consisting of seven members, and the cost of maintenance of each brigade, following the 1956 amendment of the Act which increased the share of the insurance companies, is proportioned as follows:—The Treasury one-seventh insurance companies five-sevenths, and local authorities one-seventh. The insurance companies' contribution is paid to the State Government and thence to Fire Brigades.

(ii) *Fire Brigade Boards.* At 30th June, 1958, there were 75 Fire Brigade Boards. The total number of stations was 134 and full-time staff numbered 741, including 17 administrative, 152 officers and 572 firemen. Volunteers numbered 265. Part-time staff numbered 781 including 73 administrative, 105 officers and 603 firemen. The total revenue for the year 1957–58 was £972,830, received mainly from the following sources:—Government £131,246, local authorities £131,025, insurance companies £656,094. Loan receipts (Government and other) were £166,863. The total expenditure for the year was £995,283, the chief items being salaries and wages £737,016 and interest and redemption of loans £63,653.

4. *South Australia.*—The Fire Brigades Act 1936–1958 provides for a board of five members, and the expenses and maintenance of brigades are defrayed in the proportion of two-ninths by the Treasury (subject to certain limits when the contribution exceeds £10,000), five-ninths by insurance companies, and two-ninths by the municipalities concerned. At 30th June, 1959, there were altogether 35 fire brigade stations, of which 12 were metropolitan and 23 country.

The authorized strength of the permanent staff was 386, including 267 officers and men, 89 country auxiliary firemen and 30 other employees (including maintenance workers). The total revenue for the year 1958–59 was £409,875, including contributions of £349,551 made up as follows:—insurance companies £210,495, Treasury £54,858 and municipalities £84,198. The Treasury contribution includes an additional grant of £42,664.

5. *Western Australia.*—In 1942, certain municipal and road board districts were constituted fire districts under the control of the Western Australian Fire Brigades Board. There were 36 fire districts at 30th September, 1958. The contribution to the Board is made in the proportion of two-ninths from the Government, two-ninths from local government

authorities, and five-ninths from insurance companies. The number of local government authorities and insurance companies who contributed numbered 57 and 145 respectively. The brigades, throughout the State, controlled by the Western Australian Fire Brigades Board at 30th September, 1958, numbered 53, with a staff of 1,590 including 264 permanent officers and firemen and 1,326 volunteer brigade officers and firemen. The revenue for the year ended 30th September, 1958, was £443,709 and the expenditure £450,926.

Under the Bush Fires Act, a Bush Fires Board (appointed April 1955 and superseding the Rural Fires Prevention Advisory Committee) consisting of ten members, five of whom are nominated by the Road Board Association, was set up to advise the Minister for Lands on bush fire control. The Act also provides for the registration of bush fire control officers, who numbered 1,356 at 30th June, 1958, and the establishment of bush fire brigades, the number of which was 636 at 30th June, 1958. Many individual brigades are large organizations with numerous self-contained sections.

6. *Tasmania.*—The Fire Brigades Act 1945 provided for the creation of the Fire Brigades Commission of Tasmania to co-ordinate the activities of existing fire brigades boards, while leaving the responsibility for individual control and management with the boards. The Commission consists of two persons nominated by the Minister, one person elected by the City or Municipal Councils representatives and three persons elected by the Insurance representatives of the Fire Brigades Boards. Contributions towards the cost of operations are on the basis of one-third each from the Treasury, the municipalities, and the insurance companies concerned. The cost for the year 1957–58 amounted to £150,000. There were, at 30th June, 1958, 24 brigades controlling 36 stations and their aggregate staffs numbered 526, including 87 permanent officers and 439 part-time firemen, including officers.

CHAPTER XX.

PRIVATE FINANCE.

A. CURRENCY.

§ 1. General.

The Australian monetary system is based on the British system, of which the unit is the pound (£) divided into 20 shillings (s.) each of 12 pence (d.). When the Australian currency was introduced in 1909 the Australian pound was specified as equivalent to 123.27447 grains of gold $11\frac{1}{12}$ ths fine or 113.002 grains of fine gold and, until the depression in 1930, was identical with the pound sterling. There was a gradual depreciation of the Australian pound in terms of sterling from the beginning of 1930 until 3rd December, 1931, when it was stabilized at the rate of £125 Australian = £100 sterling. This relationship has been maintained until the present time. Following the depreciation, no action was taken to define the value of the Australian pound in terms of gold until 5th August, 1947, when the Australian Government advised the International Monetary Fund, in terms of the membership agreement, that the par value of the Australian pound was 2.86507 grammes (44.2148 grains) of fine gold. From 18th September, 1949, this was reduced to 1.99062 grammes (30.720 grains) of fine gold.

When the Commonwealth was established in 1901, the currency in Australia consisted of United Kingdom gold, silver and bronze coins, notes issued by the banks, and Queensland Treasury notes. Queensland Treasury notes were in circulation in Queensland only, having superseded bank notes in that State after the 1893 crisis. Under the Commonwealth Constitution, the control of currency, coinage and legal tender and the issue of paper money was vested in the Commonwealth. The Commonwealth assumed these powers by enacting the Coinage Act 1909 and the Australian Notes Act 1910.

Australian notes are legal tender in Australia for any amount. Australian silver coins are legal tender for any amount not exceeding forty shillings and Australian bronze coins are legal tender for any amount not exceeding one shilling.

§ 2. Coinage.

1. Coins in Circulation.—Brief historical notes relating to the Australian Coinage are given in Official Year Book No. 37, pages 557 and 558. For weight, metal, composition, etc., of Australian coins in circulation *see* Official Year Book No. 39, page 697.

The silver coins issued prior to July, 1947, have a millesimal fineness of 925 (thirty-seven fortieths silver and three fortieths copper) and those issued since 1st July, 1947, (dated 1946 and later) have a millesimal fineness of 500 (one-half silver and one-half other metals).

From 1910 to 1916, Australian coins were minted in England by the Royal Mint, London, and the Mint, Birmingham Ltd., and in 1916 and 1917 by the Indian Mints. The minting of Australian coins was undertaken by the Australian Mints in 1916 and coins have been minted at the Melbourne branch of the Royal Mint from 1916 to the present time, at the Sydney branch from 1919 until that Mint closed in 1926, and at the Perth branch in 1922 and from 1940 to the present time.

During the 1939–45 War, the two Australian Mints were unable to meet the demand for Australian coins and some coins were minted in the United States of America and India. In 1951–52 and 1952–53, some coins were minted at the Royal Mint, London, to meet the heavy demand for coins. Details of Australian coins obtained from each mint to 30th June, 1959, are as follows:—Melbourne, £44,890,000; Perth, £1,465,000; Sydney, £488,000; United Kingdom Mints, £3,016,000; United States Mints, £6,000,000; Indian Mints, £169,000; Total, £56,028,000.

2. Issues of Australian Coins.—The net issues of Australian silver and bronze coin from 1910 to 30th June, 1959, were:—Crown (5s.), £276,000; Florin (2s.), £18,795,000; Shilling (1s.) £7,456,000; Sixpence (6d.), £5,201,000; Threepence (3d.), £5,843,000;

Total silver coin, £37,513,000; Penny (1d.), £2,371,000; Half-penny ($\frac{1}{2}$ d.), £709,000; Total bronze coin, £3,080,000. Except in the total, no allowance has been made for £58,000 worth of damaged silver coin, for which denominations are not available, withdrawn since 1910.

3. **Profits on Coinage of Silver and Bronze.**—Australian silver and bronze coins are token coins and, as the face value of the coins is greater than the value of the bullion they contain, a profit is made from their issue. This profit forms part of the Commonwealth Consolidated Revenue. In the following table, details are given of the value of coins issued, the cost of bullion, the cost of minting and sundry expenses connected with the issue, and the profits made on the issue of coins during the years 1938–39 and 1954–55 to 1958–59.

(a) Includes selected and proof pieces.

NOTE.—Minus sign (—) denotes a loss.

4. **Australian Mints.**—(i) *General.* Soon after the discovery of gold in Australia, a branch of the Royal Mint was established in Sydney. The formal opening took place on 14th May, 1855. The Melbourne branch was opened on 12th June, 1872, and the Perth Branch on 20th June, 1899. The States of New South Wales, Victoria and Western Australia provided an annual endowment in return for which the mint receipts were paid to the respective State Treasuries. Owing to losses incurred in its operations, the Sydney branch was closed at the end of 1926.

Since their establishment, the Australian branches of the Royal Mint have been primarily concerned with the refining of gold, minting of Imperial gold coins and the production of bars and ingots of gold bullion for export. The minting of Imperial gold

coins was discontinued in September, 1931. In 1916, the Melbourne branch took over the minting of Australian silver and bronze coins from the Royal Mint, London. Australian coins were also minted at the Sydney Mint from 1919 to 1926 and at the Perth Mint in 1922 and from 1940 to the present time. The Melbourne branch has also minted token coins for the Territory of New Guinea and for New Zealand.

(ii) *Gold Receipts and Issues.* (a) *Receipts.* The receipts of gold at Australian mints during 1958 amounted to 1,003,758 fine ounces (Melbourne, 162,465 fine ounces; Perth, 841,293 fine ounces).

(b) *Issues.* The Australian mints issue gold bullion for the use of local manufacturers (jewellers, dentists, etc.) and for export. Since September, 1931, when the United Kingdom departed from the gold standard, the minting and issue of gold coins by Australian mints has ceased. Australian exports of gold are mainly in the form of 400-oz. ingots, but in earlier years a considerable amount of gold was shipped to India in 10-oz. bars. Since early in the 1939-45 War, all gold has been acquired by the Reserve Bank and the export and use of gold has been subject to regulation by the Commonwealth Government. From December, 1951, export of a proportion of newly-mined gold for sale on premium markets overseas was permitted. The issues from Australian mints during 1958 amounted to 1,004,519 fine ounces (Melbourne, 162,515 fine ounces; Perth, 842,004 fine ounces).

5. *Price of Gold.*—The following table shows the average prices of gold and the average value of the sovereign in London and Australia for the years 1938-39 and 1954-55 to 1958-59. The average price of gold in Australia is based on the Reserve Bank's buying price for gold lodged with the mints.

PRICE OF GOLD: LONDON AND AUSTRALIA.

Period.	London.		Australia.			
	Average price per fine oz.	Average value of Sovereign.	Average price per fine oz.	Sovereign.		Equivalent to a premium of—
				Average value.		
	£stg. s. d.	£stg. s. d.	£A. s. d.	£A. s. d.		%
1938-39.. ..	7 6 9	1 14 7	9 2 9	2 3 0		115.0
1954-55.. ..	12 10 9	2 18 10	15 12 6	3 12 6		267.8
1955-56.. ..	12 9 11	2 18 10	15 12 6	3 12 6		267.8
1956-57.. ..	12 10 9	2 18 10	15 12 6	3 12 6		267.8
1957-58.. ..	12 9 10	2 18 10	15 12 6	3 12 6		267.8
1958-59.. ..	12 9 11	2 18 10	15 12 6	3 12 6		267.8

In December, 1951, arrangements were made whereby producers could sell a proportion of newly-mined gold for industrial purposes on overseas premium markets. Under these arrangements, gold is acquired by the Reserve Bank in the usual manner and sold, at the Bank's buying price, to an association representing gold producers participating in the scheme. The association pays the Bank's handling charges and the costs of preparation of the gold and makes arrangements for export and sale. The gold can be sold only against payment in United States dollars. Profits earned by the association after meeting administrative expenses are distributed to members in proportion to the quantity of gold delivered to the Reserve Bank. Until August, 1952, when permission was given for the export of fine gold, gold exported under this arrangement was not to exceed a fineness of 22 carats ($\frac{11}{12}$ ths.).

The average prices per fine ounce in Australian currency (f.o.b.) obtained for gold exported under this scheme for each of the months during 1958-59 for which there were sales were:—July, £15 13s. 10d.; August, £15 13s. 8d.; September, £15 13s. 9d.

§ 3. Notes.

1. *General.*—Brief historical notes relating to the circulation and issue of notes in Australia are given in Official Year Book No. 37, pages 561 and 562. The issue of notes intended for circulation as money other than by the Reserve Bank is prohibited.

2. **The Australian Note Issue.**—(i) *General.* Notes in circulation in Australia are issued by the Reserve Bank through the Note Issue Department. The Bank is authorized to issue Australian notes in denominations of 5s., 10s., £1, £5, £10 and any multiple of £10. The Reserve Bank is not required to hold a specific reserve in gold against the note issue but the assets of the Note Issue Department must be held or invested in gold, on deposit with any bank, or in securities of the Government of the United Kingdom, the Commonwealth, or a State. Under the Reserve Bank Act 1959, the profits of the Note Issue Department are paid to the Commonwealth.

Australian notes are legal tender to any amount within Australia and have been issued in denominations of 10s., £1, £5, £10, £20, £50, £100 and £1,000. Notes of denominations higher than £10, however, have not been issued to the public since 1945.

(ii) *Australian Notes in Circulation.* Particulars of the average values of notes in circulation for the years 1938–39 and 1954–55 to 1958–59 are given in the following table:—

AUSTRALIAN NOTE ISSUE.

(£'000.)

Denomination.	Average of monthly statements for year—(a)

(a) Last Monday in month for 1938–39, last Wednesday in month for other years.

(iii) *Reserve Bank (formerly the Commonwealth Bank)—Note Issue Department.* The following statement shows particulars of liabilities and assets of the Note Issue Department of the then Commonwealth Bank as at 30th June, 1958 and 1959:—

NOTE ISSUE DEPARTMENT: LIABILITIES AND ASSETS, 30th JUNE.

(£'000.)

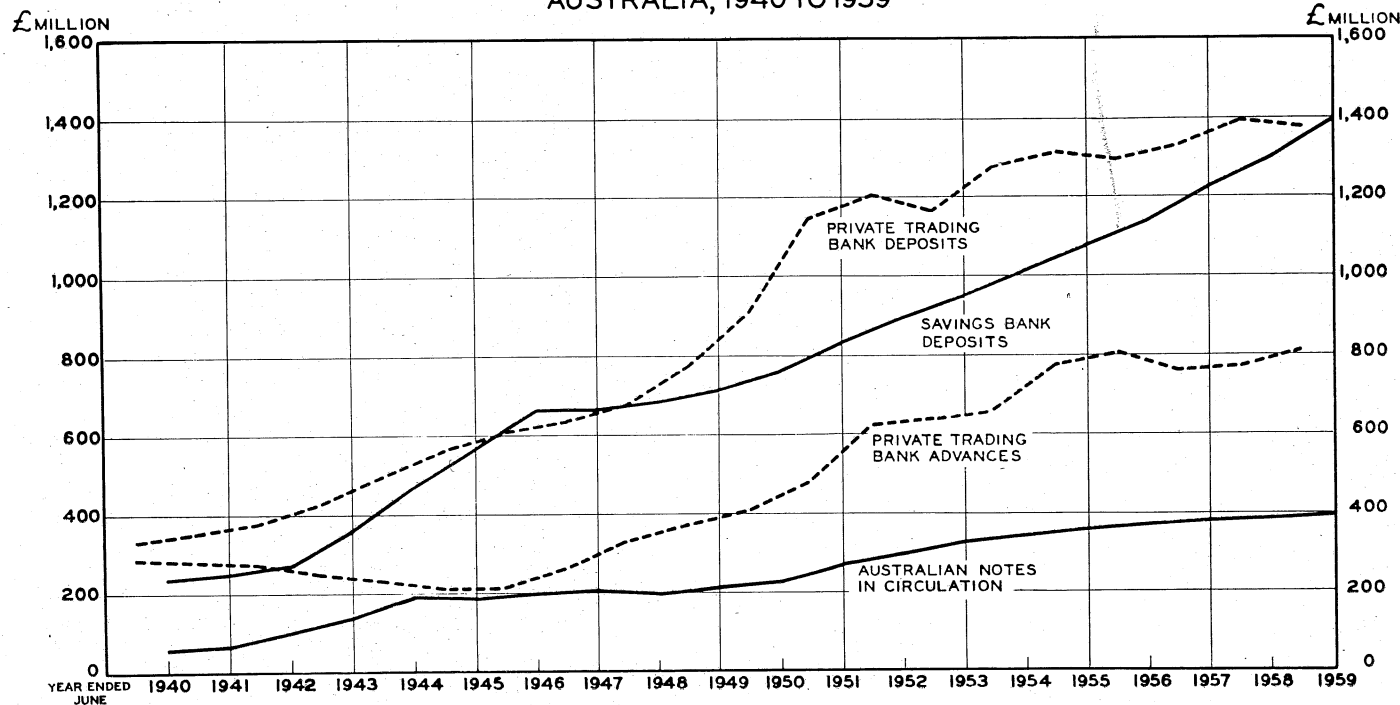

Liabilities.	1958.	1959.	Assets.	1958.	1959.
Notes on Issue(a) ..	384,549	391,457	Gold and Balances held abroad (including money at short call)	133,382	125,416
Special Reserve—Premium on gold sold	4,755	4,755	Government Securities (including Commonwealth Treasury Bills)	265,506	280,456
Other Liabilities(a) ..	9,640	9,717	Other Assets ..	56	57
Total Liabilities ..	398,944	405,929	Total Assets ..	398,944	405,929

(a) Notes of a denomination not exceeding one pound which have been on issue for more than twenty years, and notes of a denomination exceeding one pound which have been on issue for more than 40 years are not included in the item "Notes on Issue" but are included in the item "Other Liabilities".

In 1958–59, the net profits of the Note Issue Department amounted to £10,935,095 and were paid to the Commonwealth Consolidated Revenue Fund.

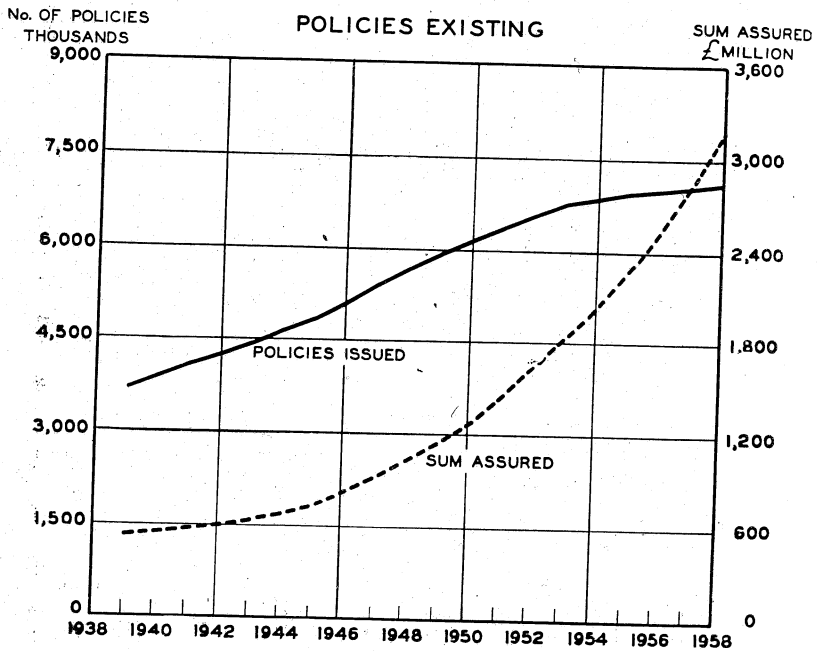

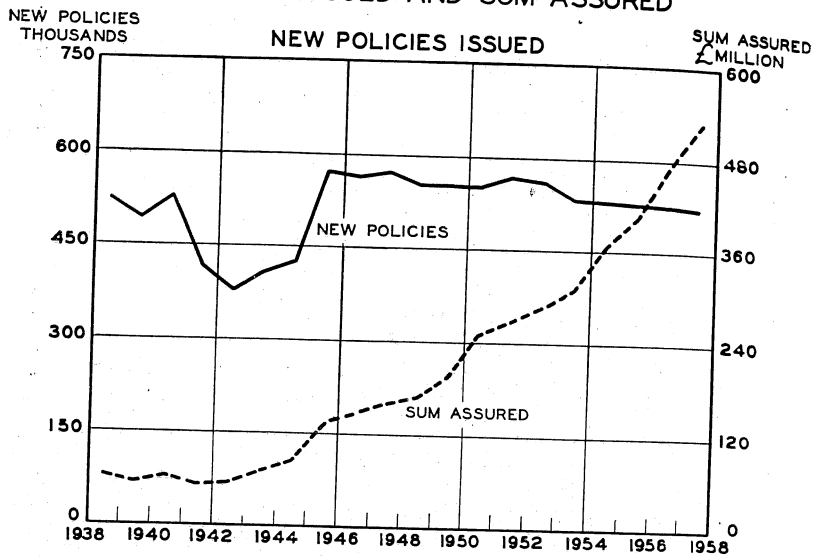

BANK DEPOSITS AND ADVANCES AND NOTES IN CIRCULATION

AUSTRALIA, 1940 TO 1959

LIFE ASSURANCE: AUSTRALIA 1939 TO 1958

POLICIES ISSUED AND SUM ASSURED

B. BANKING.

§ 1. Cheque-Paying Banks.

1. **Banking Legislation.**—(i) *Commonwealth Legislation.* Under Section 51 of the Commonwealth Constitution, the Commonwealth Parliament has power to legislate with respect to "Banking, other than State banking; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money". The principal Commonwealth Acts at present in force relating to Banking are—

- (a) *The Banking Act 1959*, which provides for the regulation of banking and for the protection of the currency and the public credit of the Commonwealth;
- (b) *The Reserve Bank Act 1959*, which provides for the constitution and management of the Reserve Bank of Australia and the management of the Australian note issue; and
- (c) *The Commonwealth Banks Act 1959*, which provides for the constitution and management of the Commonwealth Banking Corporation, Commonwealth Trading Bank of Australia, Commonwealth Savings Bank of Australia and Commonwealth Development Bank of Australia.

The Banking Act 1959, which replaced the Banking Act 1945–1953, was assented to on 23rd April, 1959, and came into operation on 14th January, 1960. It applies to all banks, except State banks trading in their own State, operating in Australia or the Territories of the Commonwealth. Apart from the replacement of the Special Accounts provisions of the previous Act with a system of Statutory Reserve Deposits and a recasting of the relevant parts of the Act to make provision for the regulation of savings bank business, the provisions of the Act, which are summarized below, are essentially the same as those contained in the previous Act. The main provisions of the Act are as follows:—

- (a) *Authority to Carry on Banking Business.* Banking business can only be carried on by a body corporate in possession of an authority in writing granted by the Governor-General. A company which is not a bank but which conducts some banking business may be granted an exemption from some or all of the provisions of the Act.
- (b) *Protection of Depositors.* Provision is made for the banks to supply to the Reserve Bank such information relating to their financial position as required. If it appears that a bank may be unable to meet its obligations or is about to suspend payments the Reserve Bank may assume control of and carry on the business of that bank.
- (c) *Statutory Reserve Deposits.* Each trading bank is required to maintain a Statutory Reserve Deposit Account with the Reserve Bank and to have on deposit in that account such percentage of its Australian deposits (known as the statutory reserve deposit ratio) as is determined from time to time by the Reserve Bank. On giving one day's notice, the Reserve Bank may vary this ratio provided it is not increased above 25 per cent. and on giving 45 days' notice the Reserve Bank may increase the ratio above 25 per cent. A ratio remains in force until it is replaced by another ratio, provided that any ratio above 25 per cent. cannot remain in force for longer than a period of six months and for succeeding periods of three months unless the Reserve Bank gives notice of an extension at least 45 days before the end of each period. The same ratio is to apply to all banks except certain prescribed banks. Interest is to be paid on Statutory Reserve Deposit Accounts at a rate determined from time to time by the Reserve Bank with the approval of the Treasurer. The Reserve Bank is required to inform the trading banks at least once in every quarter of its expected policy with respect to statutory reserve deposit ratios.
- (d) *Mobilization of Foreign Currency.* All banks may be required to transfer to the Reserve Bank a proportion (determined by the Reserve Bank) of their excess receipts of foreign currency in respect of their Australian business during any period.

- (e) *Advances.* The Reserve Bank may determine a general policy to be followed by banks in making advances.
- (f) *Special Provisions with Respect to Savings Banks.* A savings bank shall at all times maintain in prescribed investments an amount that together with cash on hand in Australia is not less than the amount on deposit in Australia with the savings bank. The prescribed investments are: deposits with the Reserve Bank, deposits with or loans to other banks, Commonwealth or State securities, securities issued or guaranteed by a Commonwealth or State authority, loans guaranteed by the Commonwealth or a State, loans for housing or other purposes on the security of land, and loans to authorized dealers in the short-term money market on the security of securities issued by the Commonwealth. A savings bank must hold at least 70 per cent. of its depositors' funds in cash, deposits with the Reserve Bank, Commonwealth or State securities and securities issued by or guaranteed by a Commonwealth or State authority and must hold at least 10 per cent. in deposits with the Reserve Bank, in Treasury Bills and Seasonal Securities. A savings bank may not accept deposits from a profit-making body unless that body is acting in a trustee capacity for a non-profit-making beneficiary, nor allow cheques to be drawn on savings bank accounts other than by local government authorities, friendly societies, etc., and companies acting in the above capacity.
- (g) *Foreign Exchange.* The Governor-General may make regulations for the control of foreign exchange including the fixing of rates of exchange.
- (h) *Gold.* Provision is made for the mobilization and control of gold if it is necessary for the protection of the currency or the public credit of the Commonwealth.
- (i) *Interest Rates.* The Reserve Bank may, with the approval of the Treasurer, make regulations for the control of rates of interest payable to or by the banks or other persons in the course of banking business carried on by them.
- (j) *Other.* Other provisions of the Act relate to the supply of statistics and other information by banks, the settlement of clearing balances between banks, investigations of the accounts of banks by the Commonwealth Auditor-General and restrictions on the use of the words "bank" or "savings bank" in relation to a business. Although a bank may be required to supply information relating to its financial stability and information needed for the determination of banking policy, it cannot be required to disclose details relating to the account of an individual customer.

The Reserve Bank Act 1959 (which repealed the Commonwealth Bank Act 1945-1953) and the Commonwealth Banks Act 1959 were assented to on 23rd April, 1959, and came into operation on 14th January, 1960. Under the Commonwealth Bank Act 1945-1953, the Commonwealth group of banking institutions comprising the Commonwealth Bank, Commonwealth Trading Bank and Commonwealth Savings Bank were under the control of the Commonwealth Bank Board. Under the legislation mentioned above, the central banking elements of the Commonwealth Bank, together with the Note Issue Department and Rural Credits Department, were reconstituted as the Reserve Bank of Australia and the Commonwealth Banking Corporation, an organization entirely separate from the Reserve Bank, was established with responsibilities for the Commonwealth Trading Bank, Commonwealth Savings Bank and a new institution, the Commonwealth Development Bank, formed basically from an amalgamation of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank. The Commonwealth Trading Bank, Commonwealth Savings Bank and Commonwealth Development Bank are corporate bodies each with its own statutory functions and responsibilities and its separate identity within the general framework of the Commonwealth Banking Corporation. Commensurate with these changes the legislation also provided for the constitution of separate staff services for the Reserve Bank and the Commonwealth Banking

Corporation and that the head offices of the Reserve Bank and the Corporation shall not, after a reasonable period, be in the same building. Under the Banking Act 1959, the Commonwealth Banking Corporation and its constituent banks are subject to the same central banking controls as apply to other banks.

(ii) *State Legislation.* State banking legislation relates to the incorporation of banks and the constitution and management of State banks. The Acts under which the various banks are incorporated differ. While some of the older banks were incorporated by special Act or Charter, e.g., the Bank of New South Wales by Act of Council 1817, The Bank of Adelaide by Act of the South Australian Parliament, and the Bank of New Zealand by Act of the General Assembly of New Zealand, most of the banks are incorporated under a Companies Act of the States or the United Kingdom. This is also the case with those banks which were reconstructed after the crisis of 1893. State banks, constituted under State Acts, transacting general banking business are The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia.

2. *Royal Commission on Monetary and Banking Systems.*—A Royal Commission was appointed by the Commonwealth Government in November, 1935, to inquire into the monetary and banking systems in operation in Australia and to report whether any, and if so what, alterations were desirable in the interests of the people of Australia as a whole, and the manner in which any such alterations should be effected. The Commission presented its report on 15th July, 1937, and a summary of the recommendations appears in Official Year Book No. 31, page 1010.

3. *Presentation of Banking Statistics.*—Because of the different purposes they serve in the Australian financial system, Australian banks have been divided for statistical purposes into five groups and a separate series is presented for each. These groups are—

- (a) *The Reserve Bank of Australia.* Formerly the Commonwealth Bank, this bank is the Central Bank. It also provides special banking facilities through the Rural Credits Department. Statistics of the Central Banking Business (including the Note Issue Department) and of the Rural Credits Department are presented in separate series.
- (b) *The Commonwealth Development Bank of Australia.* This bank, which commenced operations on 14th January, 1960, under the control of the Commonwealth Banking Corporation, an organization entirely separate from the Reserve Bank, was formed basically from an amalgamation of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank. Its prime purpose is to assist in the development of worth-while enterprises in the field of both primary and secondary industries which would otherwise be unable to obtain the necessary finance on reasonable and suitable terms and conditions.
- (c) *The Commonwealth Trading Bank of Australia.* This bank commenced operations on 3rd December, 1953. On that date, under the provisions of the Commonwealth Bank Act 1953, it took over the business of the General Banking Division of the Commonwealth Bank. On 14th January, 1960, under the provisions of the Commonwealth Banks Act 1959, it came under the control of the Commonwealth Banking Corporation.
- (d) *Private Trading Banks.* This group was formerly known as the Nine Trading Banks but the number of banks included has been reduced to seven by amalgamations. With the Commonwealth Trading Bank, these banks provide the major part of the general banking facilities in Australia. The banks included in this group are—the Australia and New Zealand Bank Ltd. (an amalgamation of the Bank of Australasia Ltd. and the Union Bank of Australia Ltd.), The Bank of Adelaide, the Bank of New South Wales, The Commercial Bank of Australia Ltd., The Commercial Banking Com-

pany of Sydney Ltd., The English, Scottish and Australian Bank Ltd. and The National Bank of Australasia Ltd. (which has absorbed The Queensland National Bank Ltd. and The Ballarat Banking Co. Ltd.).

- (e) *Other Banks.* This group consists of (i) three State Government Banks—The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia, which, in their general banking business, specialize mainly in financing rural industries, (ii) one joint stock bank—The Brisbane Permanent Building and Banking Co. Ltd., which has specialized business in one district only, and (iii) branches of three overseas banks—the Bank of New Zealand, Comptoir National d'Escompte de Paris and the Bank of China, which transact limited business in Australia and are mainly concerned with financing trade, etc., between Australia and overseas countries.

In addition to the series mentioned above, a series for all cheque-paying banks is presented. This series covers the Commonwealth Trading Bank, the Private Trading Banks and the other cheque-paying banks included in the fifth group.

Unless otherwise stated, the statistics presented are averages of weekly returns. Averages of liabilities and assets are the averages of the liabilities and assets of the banks on the several weekly balance days during the period concerned. Averages of bank clearings and debits to customers' accounts are the averages of transactions for weeks ended on the balance days during the period.

4. **Banks Transacting Business in Australia.**—(i) *Number of Branches.* At 30th June, 1959, the 15 banks operating in Australia transacted all classes of banking business at 3,671 branches and 1,475 agencies. The Commonwealth Trading Bank and the Private Trading Banks have branches throughout the Commonwealth. The Rural Bank of New South Wales, the State Bank of South Australia and The Rural and Industries Bank of Western Australia, being State Government banks specializing mainly in financing rural industries, have branches only in their respective States. The Brisbane Permanent Building and Banking Co. Ltd. transacts business in Brisbane only. The remaining three banks are branches of overseas banks.

(a) At various balance sheet dates during 1958. (b) For the Commonwealth Trading Bank, the amount shown in this column is the amount specified as capital in the Commonwealth Bank Act 1945-1953. For the State Bank of South Australia and The Rural and Industries Bank of Western Australia, the amounts shown in this column are capital funds provided by the respective State Governments. Capital of The Rural Bank of New South Wales consists of Inscribed Stock and Debentures issued by the Bank for capital purposes. (c) Includes dividends declared but not paid at date of balance-sheet. (d) For the Commonwealth Trading Bank and the State Banks, the amount shown in this column is total capital and reserves. (See footnote (b).) (e) Includes uncalled capital. (f) For the State Government Banks, the net profit is the profit after writing off bank premises and payment of interest on capital. For the other Banks, the net profit is the profit before writing off bank premises. (g) Dividends paid and payable out of profits earned during 1957-58. (h) Includes special Centenary bonus of £201,780. (i) These banks are in process of liquidation consequent upon the amalgamation of their business with the National Bank of Australasia Ltd. (j) For period eighteen months ended 31st March, 1959.

5. **The Reserve Bank of Australia.**—(i) *General.* The Reserve Bank of Australia, established under the Reserve Bank Act 1959, which came into operation on 14th January 1960, continued in existence the body corporate known as the Commonwealth Bank of Australia. An account of the progress and development of that Bank is given in earlier issues of the Official Year Book (see No. 37, pp. 570 to 573, and No. 45 pp. 735 to 737).

The general functions of the Reserve Bank are set out in Section 10 of the Reserve Bank Act 1959 which states:—

“It is the duty of the Board, within the limits of its powers, to ensure that the monetary and banking policy of the Bank is directed to the greatest advantage of

the people of Australia and that the powers of the Bank under this Act, the Banking Act 1959, and regulations under that Act are exercised in such a manner as, in the opinion of the Board, will best contribute to,

- (a) the stability of the currency of Australia;
- (b) the maintenance of full employment in Australia; and
- (c) the economic prosperity and welfare of the people of Australia".

In addition to its functions as a Central Bank, the Bank controls the Australian note issue through a Note Issue Department, provides special banking facilities through the Rural Credits Department and acts as banker to the Commonwealth and some of the States.

Prior to its reconstitution as the Reserve Bank, the Commonwealth Bank also provided general banking facilities through a General Banking Division up to the 3rd December, 1953, when that business was taken over by the Commonwealth Trading Bank and special banking facilities through the Mortgage Bank and Industrial Finance Departments. In addition, the Board of the Commonwealth Bank was responsible for the policy and administration of the Commonwealth Trading Bank and Commonwealth Savings Bank. On 14th January, 1960, on its reconstitution as the Reserve Bank, the Mortgage Bank and Industrial Finance Departments were amalgamated to form the Commonwealth Development Bank and that institution together with the Commonwealth Trading Bank and the Commonwealth Savings Bank were placed under the control of the Commonwealth Banking Corporation, an organization established under the Commonwealth Banks Act 1959 and entirely separate from the Reserve Bank.

(ii) *Management.* Under the Commonwealth Bank Act 1911, the Commonwealth Bank was managed by a Governor. From 1924 to August, 1945, it was controlled by a Board of Directors. Under the Commonwealth Bank Act 1945, control was vested in a Governor, assisted by an Advisory Council. From August, 1951, under the Commonwealth Bank Act 1951, it was controlled by a Board of Directors.

Under the provisions of the Reserve Bank Act 1959, the policy of the Reserve Bank is determined by a Board consisting of the Governor (Chairman), the Deputy Governor, the Secretary to the Treasury, and seven other members appointed by the Governor-General. The bank is managed by the Governor who acts in accordance with the policy of the Board and with any directions of the Board. The Bank is required to inform the Government of the monetary and banking policy of the Board. In the event of a disagreement between the Government and the Board as to whether the monetary and banking policy of the Bank is directed to the greatest advantage of the people of Australia, the Governor-General, acting with the advice of the Executive Council, may determine the policy to be adopted by the Bank.

(iii) *Central Banking Business.* Under the powers it possessed under the Commonwealth Bank Act 1911–1943 and under its war-time powers under the National Security Regulations, the Commonwealth Bank gradually assumed the functions of a Central Bank. Part III. of the Commonwealth Bank Act 1945 formally constituted the Bank as a Central Bank and granted the necessary powers to carry on the business of a Central Bank and these powers were carried through into the present Act constituting the Reserve Bank. Under the provisions of the Reserve Bank Act 1959, the capital for the Central Banking Business is the capital of the Commonwealth Bank for Central Banking purposes immediately prior to 14th January, 1960, and such other sums as are transferred from the Reserve Bank Reserve Fund. The profits of the Bank are distributed as follows: (a) such sums as the Treasurer, after consultation with the Bank, determines shall be placed to the credit of the Reserve Bank Reserve Fund and (b) the remainder shall be paid to the Commonwealth.

(iv) *Note Issue Department.* The Note Issue Department, established in 1920 when the control of the Australian note issue was transferred from the Commonwealth Treasury to the Commonwealth Bank, was maintained in the same form under the Reserve Bank Act 1959. The Reserve Bank may, through this Department, issue, re-issue and cancel Australian notes. Under the Reserve Bank Act 1959, the profits of the Note Issue Department are paid to the Commonwealth.

(v) *Rural Credits Department.* The Rural Credits Department, established in 1925 for the purpose of making short-term credit available for the orderly marketing of primary produce, was continued in the same form under the Reserve Bank Act 1959. The Reserve Bank may, through this Department, make advances upon the security of primary produce placed under the legal control of the bank, or other security associated with the production or marketing of primary produce, to co-operative associations or marketing boards formed

under the laws of the Commonwealth or a State or Territory of the Commonwealth or other bodies specified by proclamation. The period of the advance shall not exceed one year. Under the provisions of the Reserve Bank Act 1959, the capital of the Rural Credits Department is the capital of the Rural Credits Department of the Commonwealth Bank immediately prior to 14th January, 1960, and £2,000,000 provided by the Reserve Bank. The profits of the Rural Credits Department are dealt with as follows: (a) one half shall be placed to the credit of the Rural Credits Department Reserve Fund and (b) one half shall be placed to the credit of the Rural Credits Development Fund.

The statistics presented in the tables which follow relate to the Commonwealth Bank before its reconstitution as the Reserve Bank and, unless specified, cover all Departments of the Bank including the Mortgage Bank and Industrial Finance Departments which on 14th January, 1960, were amalgamated to form the Commonwealth Development Bank.

(vi) *Liabilities and Assets—All Departments.* Liabilities and assets of each Department of the Commonwealth Bank at 30th June, 1959, are shown in the following table. The Commonwealth Trading Bank and the Commonwealth Savings Bank, which are operated as separate institutions, are not included (*see* para. 8 (ii), p. 768, and para. 10 (ii), p. 783).

6. **The Commonwealth Banking Corporation.**—(i) *General.* The Commonwealth Banking Corporation was established under the Commonwealth Banks Act 1959 and came into being on the 14th January, 1960. The Corporation is entirely separate from the Reserve Bank and is the controlling body for the Commonwealth Trading Bank, Commonwealth Savings Bank and Commonwealth Development Bank. The general functions of the corporation are set out in Section 9 of the Commonwealth Banks Act 1959 which states:

“It is the duty of the Board, within the limits of its powers, to ensure that the policy of the Trading Bank, of the Savings Bank and of the Development Bank are directed to the greatest advantage of the people of Australia and have due regard to the stability and balanced development of the Australian economy.”

Under the Banking Act 1959, the Corporation and its constituent banks are subject to the same central banking controls as are the private trading banks.

(ii) *Management.* The Board of the Corporation consists of the Managing Director of the Corporation, the Deputy Managing Director, the Secretary to the Treasury and eight other members appointed by the Governor-General of whom one is Chairman and another Deputy Chairman. In addition, there is an Executive Committee of the Board for each of the three separate banks. These Executive Committees are appointed by the Treasurer, after consultation with the Board, and are charged with taking such action as is necessary to ensure that effect is given by the respective banks to the policies laid down for them and to any directions given by the Board in relation to their affairs. Under the Board, the Corporation is managed by the Managing Director and the Deputy Managing Director. Each of the three constituent banks of the Corporation has its own statutory functions and responsibilities and its separate identity within the framework of the Corporation. Each bank is managed by a General Manager under the Managing Director of the Corporation.

7. **Commonwealth Development Bank of Australia.**—The Commonwealth Development Bank of Australia was established by the Commonwealth Banks Act 1959 and commenced operations on 14th January, 1960. It was formed basically from an amalgamation of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank. Under the Act, the Bank is authorized to provide assistance for the development of worthwhile enterprises in the fields of primary and secondary industries which would otherwise be unable to obtain the necessary finance on reasonable and suitable terms and conditions. The Commonwealth Development Bank is managed by a General Manager under the Managing Director of the Commonwealth Banking Corporation and its policy is determined by the Board of that Corporation. The capital of the Development Bank consists of the capital of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank immediately prior to 14th January, 1960, £5,000,000 provided by the Reserve Bank, and such other sums as are provided from the Commonwealth Development Bank Reserve Fund. The net profits of the Bank are paid to the Commonwealth Development Bank Reserve Fund.

8. **The Commonwealth Trading Bank of Australia.**—(i) *General.* The Commonwealth Trading Bank of Australia was established by the Commonwealth Bank Act 1953 and on 3rd December, 1953, took over the business of the General Banking Division of the Commonwealth Bank. It was managed by a General Manager under the Governor of the Commonwealth Bank and its policy was determined by the Board of that Bank. Under the provisions of the Commonwealth Banks Act 1959 which came into operation on 14th January, 1960, the Commonwealth Trading Bank was maintained in the same form but was placed under the control of the Commonwealth Banking Corporation. The Commonwealth Trading Bank is managed by a General Manager under the Managing Director of the Commonwealth Banking Corporation. The capital of the Commonwealth Trading Bank is the capital of the Commonwealth Trading Bank immediately prior to 14th January, 1960, £2,000,000 provided by the Reserve Bank, and such other sums as are transferred from the Commonwealth Trading Bank Reserve Fund. Under the Act, the Bank is liable for income taxes. The net profits of the Bank, after provision for taxation, are divided as follows:—
(a) one-half shall be placed to the credit of the Commonwealth Trading Bank Reserve Fund and (b) one-half shall be paid to the Commonwealth.

(ii) *Liabilities and Assets.* The liabilities and assets of the Commonwealth Trading Bank at 30th June, 1958 and 1959, are shown in the following table:—

COMMONWEALTH TRADING BANK OF AUSTRALIA: LIABILITIES AND ASSETS, 30th JUNE, 1958 AND 1959.

(a) Includes Territories of Papua and New Guinea.
for the years shown.

(b) Based on averages of assets and liabilities with Commonwealth Bank on current account.

13. Classification of Advances within Australia—Commonwealth Trading Bank of Australia and Private Trading Banks (Major Trading Banks).—(i) *States, June, 1959.* A classification of bank advances of the Commonwealth and Private Trading Banks outstanding at the end of June, 1959, is shown in the following table.

Resident borrowers cover institutions (including branches of overseas institutions) engaged in business in Australia and persons permanently residing in Australia. Non-resident borrowers cover all other persons and institutions incorporated abroad, which, though represented, do not carry on business in Australia. Advances to resident borrowers have been classified as business advances, advances to public authorities, personal advances and advances to non-profit organizations. Business advances have been further classified to the main industry of the borrower and include advances to partnerships, companies and other institutions engaged in business in Australia, advances to persons actively engaged in business on their own behalf if the advance is mainly for business purposes, advances to mutual, co-operative and benefit societies which distribute their profits or surpluses (if any) to members by way of dividends, rebates on charges for goods and services or increased benefits. Advances to public authorities cover advances to local and semi-governmental authorities including separately constituted government business undertakings but not the Commonwealth or State Governments. Personal advances cover advances to persons for purposes other than carrying on a business. Advances to non-profit organizations cover advances to organizations which are not carried on for the purpose of making a profit or gain to individual members, any income of the organization being used for the purposes of the organization or for the benefit of the community.

Commencing with the June, 1957, survey, the classification used in previous surveys was revised and because of changes in definition and regrouping of some classes, a complete review of the classification of all accounts was necessary. The main changes made in the classification were (a) the provision of separate classes for advances to non-residents and non-profit organizations and (b) changes in the definition of and grouping of several industrial classes. The main changes under (b) were:—

Manufacturing.—This class now includes motor repairs previously included in the class, Transport, Storage and Communication.

Finance.—This class was previously Finance and Property. The previous sub-class (i), Builders and Contractors, has been transferred to a new class 6, Building and Construction. The sub-class (ii), Building Investment Companies and Housing Societies, has been restricted to Building and Housing Societies (Building Investment Companies are included in class 7, Other Businesses) and the sub-class (iii), Other (Banking and Insurance, etc.), has been restricted to financial institutions only. Business services (e.g., Stock Brokers, Estate Agencies, etc.) previously included in this sub-class have been transferred to class 7, Other Businesses. Holding companies also previously included are now classified to the main industry of their subsidiary companies.

Commerce.—The sub-class, Retail Trade, now includes motor garages and service stations previously included in the class, Transport, Storage and Communication.

These revisions should be noted when comparing the figures for June, 1957, and subsequent periods with those for earlier periods.

1958 ..	124,172	114,854	25,835	24,099	15,598	4,427	308,985
1959 ..	135,387	128,870	27,227	25,299	15,786	4,893	337,462

(a) Excludes transactions connected with the issue and redemption of Treasury Bills.

17. Debits to Customers' Accounts—Cheque-paying Banks.—Statistics of debits to customers' accounts have been collected since September, 1945. Generally they represent the total of all cheques drawn by the customers of the banks. In the following table, the average weekly debits to customers' accounts of all cheque-paying banks (including the special departments of the Commonwealth Bank—Rural Credits, Mortgage Bank and Industrial Finance Departments) are shown for each State for the years ended June, 1955 to 1959. In this table, debits to accounts of Australian Governments in capital cities are excluded, as they are subject to abnormal influences and are not uniform for each State.

CHEQUE-PAYING BANKS: AVERAGE WEEKLY DEBITS TO CUSTOMERS' ACCOUNTS.

(Excluding Debits to Australian Government Accounts in Capital Cities.)

(£'000.)

Year ended June—	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	N.T.	Total.

Australian Capital Territory ..	2 0	2 0	2 6	5 0	7 6	5 0	..

(a) Unchanged since 1st January, 1940.

There is no charge for transfers within a city or a town. In all States excepting Queensland and Western Australia, the exchange for transfers between towns in the same State is 2s. per £100. Queensland and Western Australia are divided into zones. The exchange rate for transfers between towns in the same zone is 2s. per £100, with higher rates for inter-zone transfers.

The exchange rate between the Territories of Papua and New Guinea and the mainland is 10s. per £100 for all points.

§ 2. Savings Banks.

1. **General.**—The inauguration of savings banks in Australia dates from 1819, when a private savings bank was opened in Sydney. In 1832, the legislature created "The Savings Bank of New South Wales" under the control of trustees, and shortly after its establishment the funds of the private savings bank were transferred to the new institution. In the other States, provision for placing deposits with savings banks dates from 1841 in Victoria; 1854 in Queensland; 1841 in South Australia; 1863 in Western Australia (a savings bank was opened in 1856 but was closed a year later); 1835 in Launceston; and 1845 in Hobart. These early banks functioned as trustee savings banks, but, with the exception of the Hobart and Launceston institutions, were later absorbed by, or amalgamated with, State government savings banks. The Commonwealth Savings Bank, established as a branch of the Commonwealth Bank in 1912 and separately constituted in 1928, absorbed the Tasmanian State Savings Bank in 1913, the Queensland State Savings Bank in 1920 and the New South Wales and Western Australian State Savings Banks in 1931.

Post Office savings banks were established in all States from 1864 onwards. These were separate government institutions except in South Australia, where the Post Office acted as agent for the savings bank. Since the federation of the Australian States in 1901, post offices have been controlled by the Commonwealth Government, but they continued to act as savings bank agencies for the State institutions until the establishment of the Commonwealth Bank in 1912. They now act as agents for the Commonwealth Savings Bank.

During 1956, four new savings banks, the Bank of New South Wales Savings Bank Ltd., the Australia and New Zealand Savings Bank Ltd., the C.B.C. Savings Bank Ltd., and The Rural and Industries Bank of Western Australia, were established. Three of these are associated with and operate from the same premises as existing private trading banks and the other is a division of a State bank—The Rural and Industries Bank of Western Australia. Savings banks operating at the end of 1959 were—the Commonwealth Savings Bank and the Australian and New Zealand Savings Bank Ltd. (in all States and Territories), the Bank of New South Wales Savings Bank Ltd. (in all States and Territories except South Australia and Tasmania) the C.B.C. Savings Bank Ltd. (in all States except South Australia and Tasmania, and in the Australian Capital Territory), The State Savings Bank of Victoria, The Savings Bank of South Australia, The Rural and Industries Bank of Western Australia, and the two trustee banks, The Launceston Bank for Savings and The Hobart Savings Bank.

The prime object of the foundation of savings banks in Australia was the encouragement of thrift, deposits of one shilling and upwards being accepted. Although depositors may not operate on their savings bank accounts by means of cheques, they have practically all the other advantages of a current account and in addition receive interest on their minimum monthly balances. No charge is made by the banks for keeping the accounts.

Cheque accounts are available at most savings banks to non-profit organizations such as friendly, co-operative and charitable societies. As with savings bank accounts, interest is allowed and no charge is made for keeping these accounts. Since March, 1958, similar facilities have been available at the State Savings Bank of Victoria to other depositors. However, the cheque accounts of these depositors do not bear interest. The statistics relating to deposits, etc., which follow include these cheque accounts. Separate details are also given in para. 6, page 781.

All savings banks, including trustee savings banks but not State savings banks, are subject to the Banking Act 1959. Details of this Act and the special provisions applying to savings banks are given on pages (759–60.)

2. **Branches and Agencies.**—The number of branches and agencies in Australia of the various savings banks at 30th June, 1959, are given in the following table.

ALL SAVINGS BANKS: NUMBER OF BRANCHES AND AGENCIES AT 30th JUNE, 1959.

Bank.	Branches.	Agencies.
Commonwealth Savings Bank	639	6,384
Australia and New Zealand Savings Bank Ltd.	434	393
Bank of New South Wales Savings Bank Ltd.	645	222
C.B.C. Savings Bank Ltd.	361	82
The State Savings Bank of Victoria	347	602
The Savings Bank of South Australia	95	574
The Rural and Industries Bank of Western Australia	40	26
The Launceston Bank for Savings	19	34
The Hobart Savings Bank	21	14
Total	2,601	8,331

3. **Number of Operative Accounts.**—The following table shows the number of operative savings bank accounts in existence at the end of June, 1958 and 1959. It should be noted that these figures relate to the number of accounts and not necessarily to the number of depositors.

ALL SAVINGS BANKS: NUMBER OF OPERATIVE ACCOUNTS.(a)

State or Territory.	At end of June.	
	1958.	1959.
New South Wales	2,740,364	2,878,656
Victoria	2,437,639	2,565,242
Queensland	1,014,008	1,080,229
South Australia	863,022	888,614
Western Australia	497,690	527,079
Tasmania	295,050	299,328
Northern Territory	12,767	13,965
Australian Capital Territory	25,917	29,278
Total	7,886,457	8,282,391

(a) Excludes school bank accounts and inoperative accounts i.e., accounts of less than £1 which have not been operated on for more than two years.

4. **Business Transacted.**—The following table shows details of the business transacted in Australia by savings banks during the years ended 30th June, 1958 and 1959:—

**ALL SAVINGS BANKS: BUSINESS TRANSACTED IN AUSTRALIA.
(£'000.)**

6. **Cheque Accounts.**—At most savings banks, cheque accounts are available to non-profit organizations such as friendly, co-operative and charitable societies. Similar facilities are also available to other depositors at the State Savings Bank of Victoria. Details of the transactions on these accounts during the year ended June, 1959 (excluding the Savings Bank of South Australia), together with the number of operative accounts and the amount on deposit at the end of June, 1959, were as follows:—Deposits during the year, £260,635,969; withdrawals during the year, £255,763,933; interest added during the year, £606,889; number of operative accounts at the end of year, 127,168; amount on deposit at end of year, £35,996,396. These figures are included in the statistics in previous paragraphs.

7. **School Banking.**—With the object of encouraging principles of thrift among children, agencies of the savings banks have been established at most of the schools throughout Australia. Particulars of operative accounts for the Commonwealth at the end of June 1939 and 1955 to 1959, appear below:—

SCHOOL SAVINGS BANKS: AUSTRALIA.

At end of June—				Number of School Agencies.	Number of Operative Accounts.	Deposits.	Deposits per Operative Account.
1939..	9,535	560,116	£ 1,090,703	£ s. d. 1 18 11
1955..	8,210	761,974	5,280,808	6 18 7
1956..	8,591	825,692	5,785,495	7 0 2
1957..	8,294	895,139	6,429,490	7 3 8

1959..	8,856	1,050,742	7,479,254	7 2 4

8. **Assets.**—The assets within Australia of all Savings Banks as at the end of June 1958 and 1959, are given in the following table:—

ALL SAVINGS BANKS: ASSETS WITHIN AUSTRALIA.(a)
(£'000.)

Item.	At end of June.	
	1958.	1959.
Coin, Bullion and Australian Notes	2,812	3,253
Deposits with Commonwealth Bank	104,633	121,979
Deposits with Other Banks	54,644	53,693
Notes, Bills, Cheques, &c., of Other Banks	83	142
Australian Public Securities (including Treasury Bills)—		
Commonwealth and States	719,354	740,128
Local and Semi-governmental Authorities	224,502	248,938
Other Securities
Loans, Advances and Bills Discounted	228,144	260,982
Bank Premises, Furniture and Sites	12,911	15,761
Bills Receivable and all Other Assets	11,101	12,220
Total Assets	1,358,184	1,457,096

(a) Includes assets in Territories of Papua, New Guinea and Norfolk Island.

9. **War Savings and Savings Certificates.**—Sales of savings certificates and stamps under the War Savings and Savings Certificate schemes, particulars of which were given in earlier issues of the Official Year Book (*see* No. 37, page 586), were discontinued after 31st January, 1949, except for some sales made to wind up savings groups, etc. This method of saving was replaced by special savings schemes to operate through the savings banks. Employers were asked to co-operate by forming employee savings groups and by making regular deductions from wages and salaries for payment into group savings bank accounts, and thence, at the end of each quarter, to individual accounts. The total value of savings certificates outstanding at 30th June in each of the last five years was:—1955, £26,615,000; 1956, £23,365,000; 1957, £20,043,000; 1958, £16,004,000; 1959, £10,633,000.

10. **Commonwealth Savings Bank of Australia.**—(i) *General.* The Savings Bank Department of the Commonwealth Bank opened for business in Victoria on 15th July, 1912; in Queensland on 16th September, 1912; in the Northern Territory on 21st October, 1912; in Tasmania on 1st January, 1913, and in New South Wales, South Australia and Western Australia on 13th January, 1913. The Tasmanian State Savings Bank was absorbed by the Commonwealth Bank on 1st January, 1913, the Queensland State Savings Bank was taken over in 1920 and the New South Wales and Western Australian State Savings Banks in 1931. The Savings Bank Department was separated from the General Bank on 9th June,

1928, and established as a separate institution known as the "Commonwealth Savings Bank of Australia". It has since then operated independently, publishing its own balance-sheets and profit and loss accounts. The Commonwealth Bank Act 1927, which provided for the establishment of the Commonwealth Savings Bank as a separate institution, provided for a Commission of three members to manage the savings bank. This Commission was never appointed and the Commonwealth Bank Act 1945 placed the control of the Commonwealth Savings Bank under the Governor of the Commonwealth Bank. Under the provisions of the Commonwealth Banks Act 1959, which came into operation on 14th January, 1960, the Commonwealth Savings Bank was maintained in the same form but was placed under the control of the Commonwealth Banking Corporation (*see also* para. 6, p. 767, Commonwealth Banking Corporation). Under the Banking Act 1959, the Commonwealth Savings Bank is subject to the same conditions as apply to the private savings banks.

(ii) *Balance-sheet, 30th June, 1958 and 1959.* Particulars of the liabilities and assets of the Commonwealth Savings Bank as at 30th June, 1958 and 1959, were as follows:—

COMMONWEALTH SAVINGS BANK(a): LIABILITIES AND ASSETS, 30th JUNE.
(£'000.)

Liabilities.	1958.	1959.	Assets.	1958.	1959.

(a) Includes branches in London, in the Territories of Papua, New Guinea, and Norfolk Island, and in the British Solomon Islands.

(iii) *Profits.* Under the terms of the Savings Bank Amalgamation Agreements, the profits of the Commonwealth Savings Bank in New South Wales, Queensland, Western Australia and Tasmania are equally divided between the Bank and the former controlling authorities in those States. Net profits for the years ended 30th June, 1939 and 1955 to 1959, and the distribution of those profits, are shown in the following table.

COMMONWEALTH SAVINGS BANK: DISTRIBUTION OF PROFITS.
(£.)

Year ended 30th June—	Total Profit.	Payments to State Authorities under Savings Bank Amalgamation Agreements.					Published Profit.	Distribution of Published Profit.	
		New South Wales. (a)	Queensland. (b)	Western Australia. (b)	Tasmania. (b)	Total.		National Debt Sinking Fund.	Savings Bank Reserve Fund.

(a) At 30th September. (b) At 30th June. (c) Separate details were:—The Australia and New Zealand Savings Bank Ltd., £50,970,000; the Bank of New South Wales Savings Bank Ltd., £96,246,000; C.B.C. Savings Bank Ltd., £26,715,000.

(iii) *Profit and Loss.* Details of the profit and loss accounts of the private savings banks included in the above table are given below for the years 1958 and 1959.

PRIVATE SAVINGS BANKS: PROFIT AND LOSS.(a)

(£.)

Year.	The Australia and New Zealand Savings Bank Ltd.(b)	The Bank of New South Wales Savings Bank Ltd.(b)	C.B.C. Savings Bank Ltd.(c)	Total.
1958	161,486	198,483	69,992	429,961
1959	240,510	270,203	112,121	622,834

(a) Net profit after allowing for all expenses and providing for reserves and contingencies, etc.
(b) Year ended 30th September. (c) Year ended 30th June.

14. *Classification of Depositors' Balances.*—The classification of deposits published by savings banks does not permit a fully detailed analysis with respect to Australia as a whole but information supplied to the Royal Commission on Monetary and Banking Systems for all savings banks except the Hobart trustee savings bank shows that at 30th June, 1936, the amount on deposit in accounts with balances of less than £100 represented 21 per cent. of the total deposits; balances of over £100 but under £250, 21 per cent.; over £250 but under £500, 23 per cent.; over £500 but under £1,000, 25 per cent.; while those of over £1,000 accounted for 10 per cent. School, penny bank and small inoperative accounts were excluded in determining these percentages.

A similar classification as at 30th June, 1936, 1939 and 1955 to 1959, but relating only to the combined State Savings Banks of Victoria and South Australia, is shown below.

STATE SAVINGS BANKS: CLASSIFICATION OF DEPOSITS.

(Per cent.)

At 30th June—	£100 and under.	£101-£300.	£301-£500.	Total under £501.	£501-£1,000.	Over £1,000.

(a) Commenced Savings Bank business on 19th January, 1956. (b) Commenced Savings Bank business on 16th July, 1956. (c) Commenced Savings Bank business on 5th April, 1956. (d) No interest is payable on amounts in excess of the maximum amount shown. (e) State Savings Bank of Victoria only. (f) Prior to the 1st March, 1957, the maximum amount on which interest was payable was £450.

C. REGISTERED BUILDING AND CO-OPERATIVE SOCIETIES.

§ 1. Registered Building Societies.

1. **Summary.**—During 1957, returns were received from 1,261 societies, but the information was not exhaustive, as particulars regarding a number of organizations were not included. In the following table, general information is given relating to the societies for the year 1956-57.

REGISTERED BUILDING SOCIETIES: SUMMARY, 1956-57.

(d) Incomplete, see note (b).

3. **Co-operative Housing Societies, Victoria.**—In addition to the information shown above, the following details of co-operative housing societies in Victoria have been extracted from the 12th Annual Report of the Registrar of Co-operative Housing Societies. At 30th June, 1957, 400 co-operative housing societies were registered in Victoria with 31,687 members who had subscribed for 1,210,271 shares, giving a nominal share capital subscribed of £62,488,439. For the twelve months ended 30th April, 1957, returns were submitted by 386 societies, the total income of those societies being £273,430 and total expenditure £245,422. The liabilities at 30th April, 1957, of the societies submitting returns were:—bank or other loans, £36,594,356; subscriptions, £5,750,239; surplus interest and management expenses, £474,956; other liabilities, £1,157,749, total liabilities, £43,977,300. Assets at the same date consisted of:—advances, £43,557,951; other assets, £419,349; total assets, £43,977,300.

§ 2. Co-operative Societies.

Co-operative societies are divided into three classes—(i) those engaged in the manufacture and marketing of primary products and trade requirements; (ii) those engaged in retailing general household requirements; and (iii) those engaged in activities covered by both classes (i) and (ii). The first class may be described briefly as Producers' Co-operative Societies and the second as Consumers' Co-operative Societies. The particulars given for New South Wales relate to societies registered under the Co-operative Act 1923-1950. A summary of the business of all co-operative societies for the years 1956-57 or 1957 for all States except Western Australia is given in the following tables. Separate particulars for each of the three types of Co-operative Societies are given in the annual bulletin *Finance, Part I.—Public and Private Finance* (see No. 49, pp. 175 and 176).

D. INSURANCE.

§ 1. Introductory.

1. **Legislation.**—Section 51 of the Commonwealth Constitution confers the necessary powers on the Commonwealth Parliament to legislate with respect to “insurance other than State insurance; also State insurance extending beyond the limits of the State concerned”. Commonwealth legislation includes the Marine Insurance Act 1909 defining the limits of marine insurance and regulating the terms of contracts, etc., the Insurance Act 1932-1937 requiring the lodgment of deposits by insurance companies, and the Life Insurance Act 1945-1953 generally regulating life assurance business in Australia. The Marine Insurance Act 1909 and the Insurance Act 1932-1937 have limited application, and, except for life assurance business, which is regulated by the Life Insurance Act 1945-1953, insurance business is conducted almost entirely under State laws.

2. **Insurance Act 1932-1937.**—Companies, persons or associations of persons carrying on insurance business in Australia or in any Territory of Australia are required to lodge a deposit with the Commonwealth Treasurer.

Money deposited is invested by the Treasurer in prescribed securities selected by the depositor, and all interest is paid to depositors. Deposits remain as security against liability to policy holders, and are available to satisfy judgments obtained in respect of policies.

Deposits held by States on 1st February, 1932, could, however, remain with the States subject to the conditions embodied in the laws of the States, and depositors to the extent of the value of these deposits were exempt from liability to make deposits under the Commonwealth Act.

The following are not regarded as insurance business under the Act:—

Staff superannuation schemes; schemes of religious organizations solely for insurance of their property; and friendly society, union and association schemes involving superannuation or insurance benefits to employees.

This Act does not apply to State insurance within the limits of the State concerned, and, under the Life Insurance Act 1945–1953, ceased to apply to life assurance business.

3. Life Insurance Act 1945–1953.—The objects of this Act are:—(a) To replace all State legislation on the subject of life assurance, except that relating to the life assurance operations of State insurance offices within the State concerned, and to provide uniform legislation for the whole of Australia; (b) to appoint an Insurance Commissioner to exercise active supervision of the activities of life assurance companies, with a view to securing the greatest possible protection for policy holders; (c) to set up adequate machinery for dealing with any company that fails to maintain a required minimum standard of solvency.

The Act was assented to on 16th August, 1945, and came into operation on 20th June, 1946. A summary of the provisions of the Act is given in Official Year Book No. 37, pages 595 to 597.

The main amendment made by the Life Insurance Act, No. 94 of 1953 was the repeal of Part VI. of the principal Act, which provided for the establishment of a Commonwealth Government Insurance Office.

4. Export Payments Insurance Corporation Act 1956.—Details of the operations of the Export Payments Insurance Corporation set up under this Act may be found in § 5 of Chapter XIII., Trade (see p. 478).

5. Deposits under Insurance Acts.—Deposits lodged under the Insurance Acts at 30th June, 1959, totalled £7,562,354, comprising £1,423,180 held by the Commonwealth in respect of Life Assurance and £5,916,884 held by the Commonwealth and £222,290 held by the States in respect of other forms of insurance. The deposits consisted of government, local, and semi-governmental securities £5,241,704, fixed deposits £1,000, bank guarantees and undertakings £1,750,000, Corporation Debentures and Stock £84,500, cash £5,000 and titles and mortgages £480,150.

§ 2. Life Assurance.

1. General.—Statistical returns have been collected from life assurance institutions since 1907. Until 1946, these returns were collected under the Census and Statistics Act. Since 1947, returns lodged under the Life Insurance Act 1945–1953 have been used to compile life assurance statistics. This change in method of collection has resulted in some slight changes in definition and, as a result, the statistics for 1947 and later years are not in all cases strictly comparable with those for earlier years. In earlier years, statistics of revenue and expenditure and of assets and liabilities, although generally related only to the life assurance business of the offices making the returns, included, in some cases, a small amount of other classes of business. Under the Life Insurance Act 1945–1953, companies transacting life assurance business are required to set up separate statutory funds for their life assurance business. As a result of this, it has been possible to separate life assurance business from other classes of business. Except where otherwise indicated the figures in the succeeding paragraphs refer to Australian business only. Business in the Territories of Papua and New Guinea is, however, included in the Australian figures.

2. **Offices Transacting Business.**—The number of offices which transacted life assurance business in Australia during 1958 was 29, including nine oversea companies. Of the twenty Australian offices, six are purely mutual, including one which transacts general business in respect of which share capital is used, twelve are public companies, and two are State Government institutions. Of the total offices, sixteen transacted ordinary business only and the remainder both ordinary and industrial business. Where possible, ordinary and industrial business have been kept separate.

3. **Australian Business—Policies in Existence.**—In the following table, details of policies on the registers in each State and in the Australian Capital Territory are given for the year 1958—

LIFE ASSURANCE : POLICIES EXISTING IN AUSTRALIA, 1958.

Policies matured or otherwise discontinued in Australia during each of the years 1939 and 1954 to 1958 were as shown in the following table.

LIFE ASSURANCE: POLICIES MATURED OR OTHERWISE DISCONTINUED IN AUSTRALIA.

IN AUSTRALIA.									
Year.				Assurance and Endowment Policies.			Annuity Policies.		
				Number of Policies.	Sum Assured. (£'000.)	Annual Prem-iums. (£'000.)	Number of Policies.	Annuities per Annum. (£'000.)	Annual Prem-iums. (£'000.)
ORDINARY DEPARTMENT.									
1939	80,912	24,786	(a)	275	17	(a)
1954(b)	157,060	90,050	3,366	1,395	647	137
1955	164,151	105,883	4,045	1,449	668	228
1956	180,858	119,928	4,534	1,436	878	227
1957	191,520	135,344	4,852	5,498	857	(c)—308
1958	190,970	159,702	5,627	2,217	543	197
INDUSTRIAL DEPARTMENT.									
1939	262,096	12,132	(a)
1954(b)	290,959	22,007	1,190
1955(b)	277,790	22,799	1,214
1956	275,722	24,907	1,327
1957	296,002	26,383	1,378
1958	285,399	26,960	1,393

(a) Not available. (b) Includes policies in existence at beginning of year which were discontinued as a result of the winding up of two companies. (c) The negative amount shown is due to an adjustment to the annual premiums on certain annuities which in previous years were treated as single premiums.

The number of policies and sums assured, excluding annuities, discontinued during the years 1939 and 1954 to 1958 and the causes for discontinuance are given in the following table:—

LIFE ASSURANCE: POLICIES(a) MATURED OR OTHERWISE DISCONTINUED IN AUSTRALIA—CAUSE OF DISCONTINUANCE.

(a) Gross, includes taxes thereon and rates.

(ii) *Total Expenditure.* The next table supplies details of the total expenditure, both within and beyond Australia, of life assurance offices during each of the years 1939 and 1954 to 1958:—

ORDINARY AND INDUSTRIAL LIFE ASSURANCE: TOTAL EXPENDITURE.
(£'000.)

Year.				Claims and Annuities paid.	Surrenders.	Cash Bonuses paid to Policy-holders.	Commission.	Transfers to Profit and Loss Account including Share-holders' Dividends.	All other Expenditure.	Total Expenditure.
ORDINARY BUSINESS.										
1939	12,320	2,668	380	1,483	125	(a) 3,867	20,843
1954	28,772	6,739	178	6,724	132	10,206	52,751
1955	30,398	8,187	280	7,419	173	10,843	57,300
1956	33,233	9,506	267	7,968	165	10,838	61,977
1957	35,944	11,463	238	9,160	223	12,741	69,769
1958	39,693	13,708	306	9,900	212	14,251	78,070
INDUSTRIAL BUSINESS.										
1939	3,763	576	..	1,619	72	(a) 1,278	7,308
1954	9,124	1,096	..	2,399	88	3,226	15,933
1955	9,994	1,185	..	2,406	28	3,066	16,679
1956	10,490	1,417	..	2,515	65	3,067	17,554
1957	11,218	1,648	..	2,538	78	3,436	18,918
1958	10,556	1,830	..	2,549	61	3,670	18,666

(a) Includes other expenses of management, licence fees, rates and taxes, etc.

8. **Liabilities and Assets.**—(i) *General.* The liabilities of the Australian offices consist mainly of their assurance funds, but in the case of public companies there is a further liability on account of the shareholders' capital. The assets consist chiefly of government and municipal securities, mortgages, loans on policies, landed and house property, etc. Loans on personal security are granted by very few of the Australian offices. Separate details of liabilities and assets in respect of Australian business are not available.

(ii) *Total Liabilities and Assets.* In the two tables which follow, the details of liabilities and assets relate to all business (Australian and overseas) of Australian companies, the life assurance of the two State Government offices, all business of the Provident Life Assurance Co. Ltd. (incorporated in New Zealand) and the Australian business only of the other eight overseas companies operating in Australia. For various reasons, several offices do not attempt the dissection of liabilities and assets between the industrial and ordinary branches, and, therefore, the figures in the following tables relate to the ordinary and industrial branches combined. Details of the total liabilities of life assurance offices for the year 1958 are given in the following table:—

ORDINARY AND INDUSTRIAL LIFE ASSURANCE: TOTAL LIABILITIES, 1958
(£'000.)

Item.	Life Assurance Business.	Other Classes of Business.	Total Liabilities.
<i>Shareholders' Capital—</i>			
Authorized	5,778	5,778

(a) State or Territory of location of mortgage, registration of policy, or residence of borrower.
 (b) Includes Territories of Papua and New Guinea. (c) Includes Northern Territory.

§ 3. Fire, Marine and General Insurance.

1. **General.**—The following statistics, which are in respect of the Australian business of companies operating in Australia and State Government insurance offices, conform to the following definitions and should be interpreted in accordance therewith.

(a) Premiums represent the full amount receivable in respect of policies issued and renewed in the year, less returns, rebates and bonuses paid or credited to policy-holders during the year. They are not adjusted to provide for premiums unearned at the end of the year and consequently the amounts differ from "earned premium income" appropriate to the year. When business is increasing, as in recent years, premiums receivable (as shown in the statistics) are greater than "earned premium income" appropriate to the year. The converse applies when business is declining.

(b) Claims or losses include provision for outstanding claims and represent claims or losses incurred in the year. Salvage and other amounts recoverable have been deducted.

(c) Contributions to Fire Brigades, Commission and Agents' Charges, and Expenses of Management represent mainly charges paid during the year.

(d) Taxation represents mainly payments made during the year, and includes income tax, pay-roll tax, licence fees, stamp duty (where paid by the company), etc. Income tax paid during the year is based on the income of earlier years.

The tables contain selected items of statistics and the information shown is not suitable for the construction of a "profit and loss" statement or "revenue" account.

In cases where the business is underwritten in one State and the risk is situated in another, the business is included in the State in which the policy was issued.

During 1958–59, revenue from premiums amounted to £165,245,000 and that from net interest on investments, etc., to £6,799,000, a total of £172,044,000. Expenditure on claims amounted to £97,139,000, contributions to fire brigades £4,437,000, commission and agents' charges £16,501,000, expenses of management £27,135,000, and taxation £6,450,000, a total of £151,662,000.

2. **States.**—The following table shows, for each State, the aggregate premium income less reinsurances and returns, and claims or losses less amounts recoverable for all classes of insurance other than life for the years 1938–39 and 1954–55 to 1958–59.

FIRE, MARINE AND GENERAL INSURANCE: PREMIUMS AND CLAIMS—STATES.
(£'000.)

State.	1938-39.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.

(a) From 1947-48 excludes Workers' Compensation in coal-mining industry in New South Wales.

E. RETAIL HIRE PURCHASE OPERATIONS OF FINANCE BUSINESSES.

1. **General.**—Information relating to hire purchase operations in Australia is given in the following tables. Information in more detail may be found in the annual bulletin—*Finance, Part I.—Public and Private Finance* and in monthly bulletins relating to hire purchase operations.

The statistics relate to businesses which finance the retail sale of goods, but do not retail goods themselves. These businesses cover public and private companies, partnerships, and other types of finance businesses. Businesses which finance hire purchase exclusively for their own employees are not included. All types of goods sold to final purchasers are included whether producer goods (such as plant and machinery) or consumer goods.

2. **New Retail Agreements 1958-59.**—Details of new retail agreements made during the year ended 30th June, 1959, are given in the following table.

HIRE PURCHASE FINANCE COMPANIES: NEW RETAIL AGREEMENTS—STATES.**YEAR ENDED 30th JUNE, 1959.**

State.	Number of Agreements.				Value of Goods. (£'000.)(a)				Amount Financed. (£'000.)(b)

1959	141,028	100,193	49,451	32,802	20,779	10,696	354,949

(a) Includes the Australian Capital Territory.

(b) Includes the Northern Territory.

F. CAPITAL RAISINGS BY AUSTRALIAN COMPANIES.

1. **General.**—Information relating to capital raised by companies in Australia is given in the following tables. More detailed information may be found in the annual bulletin—*Finance Part I.—Public and Private Finance* and in quarterly bulletins dealing with capital raisings.

The statistics (the collection of which commenced in July, 1954) relate to capital raised by companies through issues of shares, and in the case of listed companies through the issue of debentures, notes and similar securities and the acceptance of deposits, and in the case of unlisted companies, by way of loans secured over the entire assets of the company. Capital obtained by way of bank overdraft, trade credit, temporary advances, and loans secured over part only of the assets of the company is not included, and, in the case of unlisted companies, capital raised through loans not secured over any of the assets of the company is excluded.

Separate statistics are given for listed and unlisted companies. Listed companies are companies incorporated in Australia or the Australian territories and listed on one or more of the Australian stock exchanges. All other companies incorporated in Australia, including subsidiaries of listed companies, are classified as unlisted companies. Companies incorporated overseas, whether listed on an Australian stock exchange or not, are excluded from the statistics of share issues. However, subsidiaries of overseas companies, if incorporated in Australia, are included. The statistics of new capital raised through issues of debentures, notes, etc., and the acceptance of deposits includes, in addition to capital raised by Australian companies, capital raised in this way from Australian sources by overseas public companies through their Australian offices.

The following are explanatory notes relating to some of the items shown in the tables:—
New Money. This is the net amount of cash transferred from the investing public to the companies. For this purpose, the investing public includes banks and life insurance companies (except when subscribing to issues by associated companies) and government and private superannuation funds, but excludes other Government agencies. Subscriptions by associated companies, whether local or overseas, are excluded. In the tables which follow, the amount of new money is obtained by deducting from the total cash raised the "amount not involving a net transfer of funds from the investing public."

Amounts not involving new money. These amounts include cash subscriptions received by issuing companies from associated companies. Such subscriptions represent inter-company transfers only, and do not involve a receipt of funds from the "investing public". Also included are amounts which, although subscribed by the "investing public" (i.e. subscribers other than "associated companies"), are not retained by the issuing company or its associates, but are used to redeem shares, debentures or unsecured notes, etc., or are used to purchase from individuals existing shares, debentures, etc., in other companies, including existing shares, etc., in associated and subsidiary companies. The funds used in this way are thus returned to another section of the "investing public", and do not represent a net transfer of cash from the "investing public" to the companies. (Besides these purchases of existing shares, etc., from individuals, purchases of existing shares, etc., from companies other than associates of the issuing company might also be included in this item, but the amounts involved are small and separate details have not been collected.)

2. Listed Companies (a).—Details of New Capital raised through issues of shares, debentures, or registered notes, or accepting deposits are given in the following table for each of the years 1954–55 to 1958–59:—

LISTED AUSTRALIAN COMPANIES(a): NEW CAPITAL RAISED THROUGH ISSUES OF SHARES, DEBENTURES, OR REGISTERED NOTES, ETC.(b), OR ACCEPTING DEPOSITS(c).

(£ million.)

Year.	Share Capital.						Debentures, Registered Notes and Deposits.		
	Value of Issues Commenced.	Non-Cash Issues Commenced. (d)	Cash Issues Commenced	Cash Raised During Period. (e)	Amounts Not Involving New Money.	New Money.	Total Amount Raised. (f)	Amounts Not Involving New Money. (f)	New Money.
1954–55 ..	113.5	40.1	73.4	68.1	8.4	59.7	63.9	36.4	27.5

1958-59 ..	175.1	94.6	80.5	70.0	51.9	18.1	18.8	6.3	12.5

(a) Excludes companies incorporated in the Northern Territory and Australian External Territories.

(b) Includes bonus issues, conversion issues, issues in exchange for existing shares, etc. (c) Amounts paid up on issues commenced during year plus calls on issues commenced in previous years.

(d) Includes conversions, renewals, etc.

4. **Listed and Unlisted Companies.**—A summary of new money raised by listed and unlisted companies during each of the years 1954-55 to 1958-59 as shown in the preceding tables is given below.

LISTED AND UNLISTED COMPANIES: NEW MONEY RAISED.

(£ million.)

Year.	Listed Companies.			Unlisted Companies.			Grand Total.
	Share Capital.	Debentures, Registered Notes and Deposits, etc.	Total.	Share Capital.	Loans Secured by Charges over the Companies' Entire Assets.	Total.	
1954-55 ..	59.7	27.5	87.2	31.8	4.5	36.3	123.5
1955-56 ..	59.2	50.0	109.2	30.3	5.8	36.1	145.3
1956-57 ..	43.7	51.0	94.7	27.6	4.7	32.3	127.0
1957-58 ..	35.2	78.7	113.9	21.1	4.3	25.4	139.3
1958-59 ..	48.7	140.1	188.8	18.1	12.5	30.6	219.4

G. SHORT TERM MONEY MARKET.

1. **General.**—For some years prior to 1959, leading stockbrokers had been actively engaged in the acceptance of short term funds against the security of Government securities but their operations were limited by the absence of suitable short term securities and their liquidity requirements.

In February, 1959, the Commonwealth Bank (now the Reserve Bank) gave official status to the market by announcing that under certain conditions it would act as lender of last resort to authorized dealers in the short term money market.

The form of organization so far developed consists of several companies authorized to act as dealers in the market. These dealers accept loans overnight, at call or for fixed periods in amounts of at least £25,000 and invest the funds in "money market securities" which have been defined as Commonwealth Government securities with currencies not exceeding three years.

Dealers are required to provide for a minimum capitalization and, in addition, to lodge with the Bank part of their capital in the form of money market securities as general backing for their operations. These lodgments which are referred to as "margins" are required to be equivalent on market values to at least:—

- (a) One per cent. of the total holdings by the dealer of securities maturing in one year;
- (b) Two per cent. of the total holding by the dealer of securities maturing within one to two years; and
- (c) Four per cent. of the total holding by the dealer of securities maturing within two to three years.

The Bank approves for each dealer the maximum portfolio of money market securities which may be carried and establishes a line of credit in favour of the dealer to the extent of that approved maximum portfolio. Under the line of credit, which is subject to renewal from time to time, the dealer may borrow in the last resort from the Bank against lodgment of security.

2. **Selected Assets and Liabilities of Authorized Dealers and Rates of Interest on Loans Accepted.**—In the following table, details of selected assets and liabilities of authorized dealers and the interest rates on loans accepted by dealers are given for each month March to December, 1959:—

SHORT TERM MONEY MARKET.

SELECTED ASSETS AND LIABILITIES OF AUTHORIZED DEALERS.

Period.	Liabilities to Clients.			Holdings of Common- wealth Government Securities (at face value).	Interest Rates on Loans accepted during Month.	
	Cheque- paying Banks.	Other Clients.	Total.		Minimum Per cent. Per annum.	Maximum Per cent. Per annum.
Average of weekly Figures—£ million.						
1959—						
March ..	21.2	12.3	33.5	34.3	2.75	3.75
April ..	28.1	15.3	43.4	44.3	2.75	3.39

October ..	34.2	38.3	72.5	73.9	2.63	3.19
November ..	32.9	42.4	75.3	76.9	2.50	3.19
December ..	31.2	43.4	74.6	76.9	2.50	3.25

H. FRIENDLY SOCIETIES.

1. **General.**—The total membership of friendly societies in Australia is just under 460,000 but as certain benefits, such as medical attendance and free medicines, and in many cases funeral expenses, are granted to members' families as well as to members themselves, this figure must be more than doubled to arrive at an estimate of the number of persons who receive some direct benefit from these societies, even when due allowance is made for young and unmarried members. Legislation has conferred certain privileges on friendly societies, but, on the other hand, it insists on their registration, and it is the duty of the Registrars in the various States, prior to registering a new society, to see that its proposed rules conform to the law, and that the scale of contribution is sufficient to provide the promised benefits. Societies are obliged to forward to the Registrar annual returns about their membership and their finances, and reports are published in most of the States dealing with the returns received.

2. **Societies, Members and Revenue.**—The following table sets out the number of societies, members, etc., revenue and expenditure, and funds of registered societies for the year 1956-57. More detailed information is available in *Finance, Part I.—Public and Private Finance*, Bulletin No. 49.

FRIENDLY SOCIETIES(a): 1956-57.

J. LOTTERIES AND BETTING.

§ 1. Lotteries.

State Governments operate lotteries in New South Wales, Queensland and Western Australia. Tattersall Lotteries and Tasmanian Lotteries are operated under Government licences in Victoria and Tasmania respectively.

New South Wales State Lotteries are conducted in accordance with the New South Wales State Lotteries Act, 1930, and the first drawing took place on 20th August, 1931. Net profits of the lotteries, with the exception of the net profits of the Opera House lotteries introduced in November, 1957, are paid to the Consolidated Revenue Fund from which grants are made to hospitals. The net profits of the Opera House lotteries are paid to the Opera House Account.

Tattersall Lotteries, which were previously conducted in Tasmania, were transferred to Victoria in 1954 and the first drawing in Melbourne took place on 8th July, 1954. The Tattersall Consultations Act, 1953, provides that prizes in each consultation shall be not less than sixty per cent. of total subscriptions to that consultation, and that a duty equal to thirty-one per cent of subscriptions shall be paid into the Consolidated Revenue Fund from which an equivalent amount will be paid out into the Hospitals and Charities Fund and the Mental Hospitals Fund in such proportions as the Treasurer determines from time to time.

In Queensland, the Golden Casket Art Union commenced in 1916 with the specific object of augmenting the funds of the Queensland War Council. Subsequently, Anzac Cottages and Nurses Quarters Funds benefited until 1920 but since then net profits have been paid to the Department of Health and Home Affairs (Hospitals, Motherhood and Child Welfare Trust Fund) and used for the maintenance of hospitals, grants to institutions, and for motherhood and child welfare purposes. A stamp duty is imposed on tickets sold. The proceeds of this are paid to Consolidated Revenue Fund.

In Western Australia, lotteries are conducted by the Lotteries Commission under the Lotteries Control Act of 1932. Profits are paid by the Commission to hospitals and other charities.

In Tasmania, lotteries are subject to the provisions of the Racing and Gaming Act 1950-1952. With the transfer of Tattersall Lotteries from Hobart to Melbourne, Tasmanian Lotteries commenced operations under Government licence and the first drawing took place on 30th June, 1954. The stamp duty on tickets sold and the tax on prize money are paid into Consolidated Revenue.

Details of ticket sales, prizes allotted, and taxes paid and other net contributions to State Government revenues, relating to lotteries drawn during each of the years ended 30th June, 1955 to 1959, are given in the following table.

K. GOVERNMENT, SEMI-GOVERNMENTAL AND PARLIAMENTARY PENSION AND SUPERANNUATION SCHEMES.

§ 1. Government and Semi-Governmental Pension and Superannuation Schemes.

The Commonwealth and all State Governments have established pension or superannuation schemes for their employees. These schemes are operated through funds to which both the Government and the employees make contributions. Employees of semi-governmental authorities are in some cases covered by the Commonwealth or State Government scheme and in other cases by a separate scheme of the authority.

In the following tables, aggregate details are given, for the years 1957-58 and 1958-59, of the receipts, expenditure, accumulated funds and number of contributors and pensioners of the Commonwealth and State Government and main semi-governmental schemes. The funds included are:—

- (a) *Commonwealth*.—The Superannuation Fund and Defence Forces Retirement Benefits Fund.
- (b) *New South Wales*.—State Superannuation Fund, Government Railways Superannuation Fund and Police Superannuation and Reward Fund.
- (c) *Victoria*.—The State Superannuation Fund, Police Superannuation Fund, Police Pensions Fund, Melbourne Harbour Trust Superannuation Account, Geelong Harbor Trust Superannuation Fund, Melbourne and Metropolitan Board of Works Superannuation Fund, State Electricity Commission Provident Fund, Gas and Fuel Corporation Superannuation Fund, Metropolitan Fire Brigades Board Superannuation Fund, Country Fire Authority Superannuation Fund, Port Phillip Pilots' Sick and Superannuation Fund, and Married Women Teachers' Pension Fund.
- (d) *Queensland*.—Public Service Superannuation Fund and Police Superannuation Fund.
- (e) *South Australia*.—South Australia Superannuation Fund, Police Pensions Fund and Public Service Superannuation Fund.
- (f) *Western Australia*.—The Superannuation Fund.
- (g) *Tasmania*.—Public Service Superannuation Fund (Old and New Funds), Police Provident Fund and State Teachers' Superannuation Fund.

§ 2. Parliamentary Pension and Superannuation Schemes.

Pension and superannuation schemes have been established for members of the Commonwealth and State Parliaments. Details of these schemes, except for Tasmania, are given in pages 91 to 99 of Official Year Book No. 38. Details of the Tasmanian scheme, are given on page 72 of Official Year Book No. 44. All the schemes are operated through funds to which the members of Parliament and the Commonwealth or States contribute. Details of the receipts, expenditure, funds and number of contributors and pensioners for the years 1957-58 and 1958-59 are given in the following table:—

CHAPTER XXI.

PUBLIC FINANCE.

NOTE.—The subject of “Public Finance” is dealt with in this chapter under the two major divisions of Commonwealth Finance and State Finance. The close financial relations between the Commonwealth and States, however, particularly since the Financial Agreement has been in operation, demand also a combination of these two divisions under the heading of Commonwealth and State Finance. Under the Financial Agreement, the Commonwealth assumed the liability to bondholders for the States’ Debts existing at the date of the Agreement and now arranges for all borrowings for and on behalf of the Commonwealth or any State and for all conversions, renewals, redemptions and consolidations of the Public Debts of the Commonwealth and the States. In view of this, it has been found convenient to deal with the Commonwealth and State Public Debt in a separate division.

The subject of income taxes is also dealt with in a separate division.

A. COMMONWEALTH FINANCE.

§ 1. General.

1. Financial Provisions of the Constitution.—The main provisions of the Constitution relating to the initiation and development of the financial system of the Commonwealth are contained in Sections 81 to 105A of the Commonwealth Constitution (*see* pp. 17–20 of this Year Book). Two other sections which have a most important bearing on questions of Commonwealth finance are Sections 69 and 51.

Section 69 provides for the transfer from the States to the Commonwealth of certain specified departments, and Section 51, in outlining the powers of the Commonwealth Parliament, implies the transfer or creation of other departments. Section 87 deals with the financial relations between the Commonwealth and the States. These matters have been treated in previous issues of the Official Year Book and on pages 835–40 of this issue a summary is given of the present provisions for Commonwealth financial assistance to the States.

The majority of the tables relating to Commonwealth Finance have been compiled from the annual Budget Papers as presented to Parliament by the Treasurer of the Commonwealth.

2. Accounts of the Commonwealth Government.—The Commonwealth Government bases its accounts upon three funds, the Consolidated Revenue Fund, the Trust Fund and the Loan Fund.

§ 2. Commonwealth Consolidated Revenue Fund.

I. Nature of Fund.

1. Provisions of the Constitution.—The provisions made for the establishment of a Commonwealth Consolidated Revenue Fund, and the means to be adopted for operating on the fund, are contained in Sections 81 to 83 of the Constitution (*see* p. 17 of this Year Book).

2. Annual Results of Transactions.—In the early 1920’s, receipts and expenditure of the Consolidated Revenue Fund each ranged between £60 million and £70 million. After allowing for special appropriations amounting to one or two million pounds each year utilized for a variety of purposes, e.g., for debt redemption, naval construction, main roads, science and industry investigations, prospecting for oil and precious metals, civil aviation, etc., the receipts and expenditure of the Fund were balanced. In the later twenties and early thirties, when receipts and expenditure were each about £70 million or £80 million a year, there were annual deficits, which had accumulated to more than £17 million by the end of 1930–31.

In the years 1931–32 to 1938–39, receipts and expenditure each ranged from £70 million to £95 million and were in balance after allowing for special appropriations of up to £3.5 million a year for reduction of the accumulated deficit, non-recurring grants to the States, post office works and the provision of defence equipment. The amount applied towards reduction of the accumulated deficit was approximately £1.5 million and the balance of the deficit (approximately £15.7 million) was funded in 1937–38.

For most of the 1939–45 War years and thereafter, the Consolidated Revenue Fund was balanced, all available revenue after charging expenditure on ordinary services being used for defence, war and repatriation purposes.

During the years 1954–55 to 1958–59, the Fund was balanced after special payments of £70.1 million to the Debt Redemption Reserve Trust Account, and £61.6 million, £194.8 million, £104.4 million and £27.9 million to the Loan Consolidation and Investment Reserve Trust Account. The amounts so transferred were subsequently invested wholly or partly in special loans for State works requirements.

Receipts and expenditure increased from £95 million in 1938–39 to £377 million in 1944–45. By 1950–51, they had risen to £842 million and by 1954–55 to £1,067 million. Receipts and expenditure for 1958–59 were £1,296 million.

II.—Revenue.

1. **General.**—The following table shows details of the revenue from each source and the amount per head of population under each of the main headings during the years 1938–39 and 1954–55 to 1958–59. Taxation constitutes the main source of Commonwealth revenue, accounting for 87.4 per cent. in 1958–59.

COMMONWEALTH CONSOLIDATED REVENUE FUND: SOURCES OF REVENUE. (£'000.)

(a) See note (a) to previous table.

(b) See note (b) to previous table.

(ii) *Customs Revenue.* The classification of customs receipts by Tariff Divisions published in earlier issues of the Official Year Book was discontinued in 1955–56. In the following tables, customs duty receipts have been dissected according to the classification used for oversea trade statistics. For years prior to 1955–56, refunds and drawbacks were not classified by statistical classes and consequently details of gross receipts only are available for those years. The following table shows gross receipts for the years 1938–39 and 1954–55 to 1958–59 according to statistical classes.

COMMONWEALTH CUSTOMS REVENUE: CLASSIFICATION OF GROSS RECEIPTS.

(£'000.)

Classes.	1938-39.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.

(iii) *Excise Revenue.* Net excise receipts for the years 1938-39 and 1954-55 to 1958-59 were as follows:—

COMMONWEALTH EXCISE REVENUE: CLASSIFICATION OF NET RECEIPTS.
(£'000.)

Particulars.	1938-39.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
Beer	7,289	76,362	85,315	103,516	105,997	105,286
Spirits	1,604	6,496	7,325	8,138	8,047	8,692
Tobacco	3,868	15,141	14,849	17,270	16,633	15,207
Cigars and cigarettes	2,419	29,030	36,516	47,916	51,366	55,824
Cigarette papers	531	1,007	896	910	862	811
Petrol	582	12,898	21,190	37,183	41,711	44,253
Diesel Fuel	(a) 2,770	(a) 1,475
Matches	82	1,096	1,061	1,074	1,084	1,092
Playing cards	11	51	47	48	47	48
Coal	600	566	599	590	578
Miscellaneous	86	468	499	786	2,227	2,988
Total	16,472	143,149	168,264	217,440	231,334	236,254

(a) Refunds of Diesel Fuel Taxation 1957-58, £1,314,000 and 1958-59, £989,000.

(iv) *Other Taxation.* (a) *General.* Taxes other than customs and excise and the various export charges are, in general, assessed and collected by the Commissioner of Taxation. The organization comprises a Head Office in Canberra, an office in each State assessing the returns of taxpayers whose interests are restricted to that State only, and a Central Office assessing taxpayers whose interests are in more than one State.

(b) *Sales Tax.* The sales tax was first imposed in August, 1930. The operation of the tax is controlled chiefly by a system of registration of taxpayers whereby all manufacturers and wholesale merchants, who are the taxpayers under the Act in respect of goods sold in Australia, must be registered with the Department. The tax on imports subject to sales tax is collected by the Customs Department at ports of entry.

Since the inception of the tax, certain exemptions have been allowed. These exemptions, which have been extended from time to time, relate mainly to goods of an essential nature or those for use in primary production. The most recent exemptions were those granted from 4th September, 1957.

A general rate of tax is levied on all goods other than those specified in the schedules to the Sales Tax (Exemptions and Classifications) Act 1935-1959. These schedules set out details of goods exempt from sales tax and those subject to special rates. The general and special rates which operated from 8th September, 1949, were:—

Period.	General Rate.	Special Rates.
8th September, 1949, to 12th October, 1950	8½ per cent. ..	25 per cent.
13th October, 1950, to 26th September, 1951	8½ per cent. ..	10, 25 and 33½ per cent.
27th September, 1951, to 6th August, 1952	12½ per cent. ..	20, 25, 33½, 50 and 66⅔ per cent.
7th August, 1952, to 9th September, 1953	12½ per cent. ..	20, 33½ and 50 per cent.
10th September, 1953, to 18th August, 1954	12½ per cent. ..	16⅔ per cent.
19th August, 1954, to 14th March, 1956	12½ per cent. ..	10 and 16⅔ per cent.
15th March, 1956, to 3rd September, 1957	12½ per cent. ..	10, 16⅔, 25 and 30 per cent.
From 4th September, 1957	12½ per cent. ..	8½, 16⅔, 25 and 30 per cent.

For particulars of rates applicable from the inception of Sales Tax in August, 1930, to 7th September, 1949, see Official Year Book No. 37, page 617.

Particulars of the net amount of sales tax payable, and the sales of taxable and exempt goods in each State for 1958-59, are given in the following table. The figures relate to sales during the period 1st July to 30th June. The figures for sales tax payable differ from those for net collections shown on page 815 because the latter include some adjustments in respect of earlier tax years and include only tax payable on returns lodged during the year, which in general cover sales for the period June to May.

SALES TAX AND AMOUNT OF SALES, 1958-59.

(£'000.)

Particulars.	N.S.W. (a)	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N. Terr.	Aust- ralia.

Sales Tax Payable ..	57,862	45,119	17,460	12,697	7,841	2,264	53	143,296

(a) Includes the Australian Capital Territory.

Sales of taxable and exempt goods and sales tax payable for Australia as a whole, are shown in the following table for the years 1938-39 and 1954-55 to 1958-59:—

SALES TAX AND AMOUNT OF SALES.

(£'000.)

Year.	Net Sales on which Sales Tax was Payable.	Sales of Exempt Goods by Registered Persons.	Total Sales of Taxable and Exempt Goods.	Sales Tax Payable.
1938-39	196,491	280,656	477,147	9,363
1954-55	766,940	1,699,342	2,466,282	101,427
1955-56	798,774	1,856,865	2,655,639	111,469
1956-57	781,250	2,016,828	2,798,078	127,649
1957-58	849,347	2,105,688	2,955,035	138,259
1958-59	890,292	2,152,027	3,042,319	143,296

In the foregoing tables, sales include goods transferred to stock for sale by retail, goods imported by persons other than registered taxpayers, and goods used in the business of the taxpayer. Exempt sales relate to goods exempted from sales tax under the Sales Tax (Exemptions and Classifications) Act 1935-1957. The figures shown do not represent the total sales of all commodities, as vendors trading in exempt goods only are not required to be registered and consequently the volume of their sales is not included in the statistics above. In addition, non-taxable sales (i.e., goods sold by one registered taxpayer to another registered taxpayer) are excluded.

(c) *Land Tax.* Commonwealth Land Tax was levied annually from 1910-11 to 1951-52 on the unimproved value of land. It was abolished from 1st July, 1952. For rates of tax payable from 1942-43 to 1951-52, see Official Year Book No. 40, 1954, page 669.

(d) *Pay-roll Tax.* The Pay-roll Tax Act 1941 and the Pay-roll Tax Assessment Act 1941-1942 imposed a pay-roll tax of 2½ per cent. on all wages and salaries in excess of £20 a week paid by an employer after 30th June, 1941. Employers who are liable for tax are required to register and to furnish a monthly return of all wages paid. These measures formed part of the Commonwealth scheme of child endowment, the revenue from the tax

being designed to provide part of the money required. The exemption was increased to £80 a week (£4,160 per annum) from 1st October, 1953, to £120 a week (£6,240 per annum) from 1st September, 1954, and to £200 a week (£10,400 per annum) from 1st September, 1957.

Receipts from pay-roll tax for the years 1954-55 to 1958-59 were, 1954-55, £41,455,000; 1955-56, £45,543,000; 1956-57, £48,675,000; 1957-58, £48,552,000; 1958-59, £49,619,000.

(e) *Income Taxes.* Details of taxes on income are given in division E of this chapter.

(f) *Wool Sales Deduction.* The Wool Sales Deduction Act 1950 and the Wool Sales Deduction (Administration) Act 1950 came into operation on 2nd December, 1950, and required that a deduction be made from the sale value of wool sold or exported, the amount deducted being set off against the Income Tax and Social Services Contribution assessed in respect of the income of the year 1950-51. These Acts were repealed by the Wool Sales Deduction Legislation Repeal Act 1951 which came into operation on 17th November, 1951, and provided for the refund to producers, etc., of amounts paid on the value of wool sold or otherwise disposed of after 30th June, 1951. The amount of deduction collected in 1951-52 was £5,963,000. In 1952-53 and 1953-54, refunds amounted to £2,223,000 and £239,000 respectively.

(g) *Estate Duty.* The Commonwealth Estate Duty was first levied in 1914. Particulars of exemptions allowed and the rates imposed prior to November, 1957, are given in earlier issues of the Year Book (see No. 43, p. 758).

Under the Estate Duty Assessment Act 1914-1957, Estate Duty is assessed on the net value of the estate less a statutory exemption determined in accordance with the following formula:—(a) where the whole of the estate passes to the widow, children (including adopted children, step-children and ex-nuptial children), or grand-children of the deceased, the sum of £5,000 decreasing by £1 for every £3 by which the value exceeds £5,000 and ceasing to apply at £20,000; (b) where no part of the estate passes to the widow, children or grand-children, the sum of £2,500 decreasing by £1 for every £3 by which the value exceeds £2,500 and ceasing to apply at £10,000; and (c) where part only of the estate passes to the widow, children or grand-children, the statutory exemption is to be calculated proportionately under (a) and (b).

An amendment to this Act, assented to on 20th November, 1957, provided for rebates of duty on estates which become liable for duty on two or more occasions within a period of five years.

The rates of duty levied under the Estate Duty Act 1914-1941 increase as the value of the estate increases as follows:—£1 to £10,000, 3 per cent.; £10,001 to £20,000, 3 per cent. to 6 per cent.; £20,001 to £120,000, 6 per cent. to 26 per cent.; £120,001 to £500,000, 26 per cent. to 27.9 per cent.; over £500,000, 27.9 per cent.

Total collections for the years 1938-39 and 1954-55 to 1958-59 were as follows:—1938-39, £1,915,000; 1954-55, £9,614,000; 1955-56, £10,120,000; 1956-57, £12,712,000; 1957-58, £13,774,000; 1958-59, £13,309,000.

Particulars of the number and value of estates and duty assessed, for each of the assessment years 1938-39 and 1953-54 to 1957-58, are given in the following table:—

ESTATE DUTY ASSESSMENTS.

Particulars.	1938-39.	1953-54.	1954-55.	1955-56.	1956-57.	1957-58.
Number of Estates ..	9,681	19,621	12,878	11,069	12,784	13,599
Gross Value Assessed £'000	65,699	187,905	176,853	178,361	213,253	227,310

Duty Payable .. £'000	2,002	10,089	10,310	10,882	13,580	13,967
Average dutiable value £	5,482	6,825	9,584	11,137	11,516	11,553
Average duty per estate £	207	514	801	983	1,062	1,027

(h) *Gift Duty.* The Gift Duty Act 1941-1947 and the Gift Duty Assessment Act 1941-1957 impose a gift duty on all gifts made after the 29th October, 1941. A gift has been defined as any disposition of property which is made otherwise than by will without adequate consideration in money or money's worth. There is a liability on both the donor and the donee to furnish a return, and both are jointly and severally liable for payment of the duty.

The following rates of duty are levied under the Gift Duty Act 1941–1947 and relate to the value of all gifts made by the donor within a period of eighteen months:—Not exceeding £2,000, nil; £2,001 to £10,000, 3 per cent.; £10,001 to £20,000, 3 per cent. to 6 per cent.; £20,001 to £120,000, 6 per cent. to 26 per cent.; £120,001 to £500,000, 26 per cent. to 27.9 per cent.; £500,001 and over, 27.9 per cent.

An amendment which operated from 3rd June, 1947, provides that gift duty shall not exceed one-half of the amount by which the value of the gift exceeds £2,000.

Total receipts from gift duty for the years 1954–55 to 1958–59 were as follows:—1954–55, £1,618,000; 1955–56, £1,820,000; 1956–57, £1,940,000; 1957–58, £2,205,000; 1958–59, £2,000,000.

(i) *Entertainments Tax.* The Commonwealth levied an Entertainments Tax from 1st October, 1942, to 30th September, 1953. Details of rates are given in earlier issues of the Official Year Book (*see* No. 40, pp. 672 and 673).

(j) *Flour Tax.* Particulars of the rates of flour tax which operated from 4th December, 1933, to 21st December, 1947, are given in Official Year Book No. 37, pages 618 and 619. Because of the rise in wheat prices, the rate was declared to be nil as from 22nd December, 1947.

(k) *Wool Levy.* The Wool Tax Act 1936 and Wool Tax Assessment Act 1936 provided for a levy on all wool grown in Australia and shorn on or after 1st July, 1936. Details of this levy are given in earlier issues of the Official Year Book. This levy was suspended from 1st July, 1946, until 30th June, 1952, while the Wool Contributory Charge was imposed.

With the repeal of the Wool Contributory Charge, however, a levy on wool produced in Australia was re-introduced from 1st July, 1952. The Wool Tax Acts (Nos. 1 and 2) of 1952 provided for the payment of a levy of four shillings a bale until 30th June, 1953, after which date the rate of tax could be varied within prescribed limits. There was no variation until 1st July, 1957, when the rate was increased to six shillings a bale. The purpose of the tax is to provide funds for publicity and research previously provided by the Wool Contributory Charge. Collections during 1954–55, 1955–56, 1956–57, 1957–58 and 1958–59 were £784,000, £851,000, £979,000, £1,328,000 and £1,389,000 respectively.

(l) *Wool Contributory Charge.* The Wool (Contributory Charge) Act 1945 and the Wool (Contributory Charge) Assessment Act 1945 imposed a charge on all wool produced in Australia and sold, manufactured or exported. Wool sold by the Australian Wool Realization Commission was not liable to the charge. Details of the rate of the charge and collections made were given in earlier issues of the Official Year Book (*see* No. 40, p. 675).

The various Wool (Contributory Charge) Acts were repealed by the Wool Tax Assessment Act of 1952 and the charge superseded by the wool levy.

(m) *Wheat Export Charge and Wheat Tax.* A summary of the provisions of the Wheat Export Charge Acts 1946, 1948 and 1952 is contained in previous issues of the Official Year Book (*see* No. 40, p. 676 and No. 41, p. 604).

The Wheat Export Charge Act 1954 repealed previous Acts and provided for an export charge on wheat and wheat products for the seasons 1953–54 to 1958–59 inclusive. The charge levied is based on the difference between the cost of production and the export price with a maximum levy of 1s. 6d. a bushel. Under the Wheat Industry Stabilization Act 1954, to which the Wheat Export Charge Act is complementary, the Commonwealth Government guarantees a return to wheat-growers of the ascertained cost of production in respect of up to 100 million bushels of wheat exported from Australia during each of the six seasons. Collections from the wheat export charge are paid into the Wheat Prices Stabilization Fund, out of which payments will be made to the Australian Wheat Board, when required, for the purpose of building up the average export price for any season to the guaranteed price. If the fund is exhausted, additional payments will be made from the Consolidated Revenue Fund.

Collections of the wheat export charge amounted to £5,063,000 in 1954–55, £4,294,000 in 1955–56, nil in 1956–57, £443,000 in 1957–58 and £1,211,000 in 1958–59.

The Wheat Tax Act of 1957 imposed a tax of ¼d. for each bushel of wheat—

- (a) which has been delivered to the Wheat Board on or after the first day of October, 1956, and before the date of commencement of the Act; or
- (b) which is delivered to the Wheat Board on or after that date.

The Act also provided that where, before the commencement of the Act, a person delivering to the Board wheat upon which tax is imposed by the Act authorized the Board to deduct an amount from the moneys payable to him and to pay the amount so deducted to a person, authority or association for the purposes of soil fertility research or other research likely to benefit the wheat industry and the Board did so, the tax otherwise payable upon that wheat is to be reduced by the amount so deducted.

The Wheat Research Act of 1957 provided for the establishment of a Wheat Research Trust Account to receive moneys payable under the Wheat Tax Act 1957 and for the setting up of a Wheat Industry Research Council to direct the expenditure of moneys from that Trust Account for research, etc., to benefit the Wheat Industry.

Collections of Wheat Tax in 1958-59 amounted to £207,000, which was paid to the Wheat Research Trust Account.

(n) *Miscellaneous Export Charges.* These consist of charges levied on exports of apples and pears (Apple and Pear Export Charges Act 1938-1947), canned fruits (Canned Fruits Export Charges Act 1926-1952), dairy produce (Dairy Produce Export Charges Act 1924-1937), dried fruits (Dried Fruits Export Charges Act 1924-1929), eggs (Egg Export Charges Act 1947) and meat (Meat Export Charges Act 1935-1954) and on grapes used in the manufacture of wine (Wine Grapes Charges Act 1929-1954). The collections are paid into special funds to be applied for the purposes of Export Boards established under various Acts, in controlling the quantity and quality of produce exported.

Collections for the last five years were as follows:—1954-55, £300,000; 1955-56, £414,000; 1956-57, £375,000; 1957-58, £390,000 and 1958-59, £566,000.

(o) *Stevedoring Industry Charge.* The Stevedoring Industry Charge Act 1947 and the Stevedoring Industry Charge Assessment Act 1947 imposed a charge of 4½d. a man-hour on the employer of a waterside worker after 22nd December, 1947.

The amounts received are paid to the Stevedoring Industry Board for the payment of attendance money to waterside workers and for other expenses of the Board.

Since 1947, the charge has been amended as follows:—11th October, 1949, a reduction to 2½d. a man-hour; 11th December, 1951, an increase to 4d. a man-hour; 28th October, 1952, an increase to 11d. a man-hour; 4th May, 1954, a reduction to 6d. a man-hour; 30th October, 1956, an increase to 1s. 7d. a man-hour; and from 21st May, 1957, an increase to 2s. a man-hour.

A further amendment under the Stevedoring Industry Charge Act 1958 which came into operation on 1st April, 1958, provided for an increase of the charge to 3s. a man-hour until 1st July, 1959, and a reduction to 2s. 6d. a man-hour on or after 1st July, 1959.

Collections during the years 1954-55 to 1958-59 were as follows:—1954-55, £998,000; 1955-56, £973,000; 1956-57, £1,926,000; 1957-58, £3,337,000; and 1958-59, £4,572,000.

(p) *Gold Tax.* Particulars of the Gold Tax which operated from 15th September, 1939, to 20th September, 1947, are given in Official Year Book No. 39, page 767.

(q) *Tobacco Industry Charge.* The Tobacco Charge Acts (Nos. 1, 2 and 3) 1955 and the Tobacco Charges Assessment Act 1955, which came into operation on 1st January, 1956, provided for charges on tobacco leaf grown in Australia.

The Tobacco Charge Act (No. 1) 1955 imposed a maximum charge of ¼d. a pound on all Australian tobacco leaf sold to a manufacturer.

The Tobacco Charge Act (No. 2) 1955 imposed a charge at twice the rate to be levied under the Tobacco Charge Act (No. 1) on all Australian tobacco leaf purchased by a manufacturer.

The Tobacco Charge Act (No. 3) 1955 imposed a charge on all Australian tobacco leaf grown by a manufacturer and appropriated by him for manufacturing purposes. Where the manufacturer grew, in Australia, not less than nine-tenths of the tobacco leaf used by him in manufacturing, the charge was at the rate imposed by the Tobacco Charge Act (No. 1). In other cases, the charge was at twice that rate.

The charges collected under the Tobacco Charges Assessment Act 1955 were paid into the Tobacco Industry Trust Account which was established by the Tobacco Industry Act, 1955. Moneys in this account are used for the promotion of the tobacco industry.

Collections in 1955-56, 1956-57, 1957-58 and 1958-59 amounted to £5,000, £41,000, £61,000 and £72,000 respectively.

(r) *Dairy Produce Levy.* The Dairy Produce Levy Act 1958 imposed a levy on the manufacture of butter and cheese for the purpose of financing a research and sales promotion scheme for the dairy industry. The maximum rates of the levy are fixed at three-sixteenths of a penny a pound on butter and three-thirty-seconds of a penny on cheese. In 1958-59, collections amounted to £151,000.

3. *Business Undertakings.*—(i) *Postmaster General's Department.* Particulars of net receipts for each of the financial years 1938-39 and 1954-55 to 1958-59 are given in the following table:—

POSTMASTER-GENERAL'S DEPARTMENT: NET RECEIPTS.
(£'000.)

Particulars.	1938-39.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.

COMMONWEALTH CONSOLIDATED REVENUE FUND, YEAR ENDED 30TH JUNE, 1959

STATE CONSOLIDATED REVENUE FUNDS, YEAR ENDED 30TH. JUNE, 1959

Further particulars to 1958-59 are given in Chapter XIV.—Transport and Communication (*see pp. 532 and 538*).

4. Other Sources of Revenue.—Revenue derived by the Consolidated Revenue Fund from the Territories of the Commonwealth during 1958-59 amounted to £3,189,000 (Australian Capital Territory £1,947,000; Northern Territory £1,227,000; Cocos (Keeling) Islands £15,000). Of other sources of revenue, amounting to £42,667,000, the following are noteworthy:—Interest, £11,572,000; Defence £6,185,000, Net Profit on Australian Note Issue £10,935,000; and Surplus Balances of Trust Accounts, £5,722,000.

III.—Expenditure.

1. Details of Expenditure from Consolidated Revenue.—The following table shows details of expenditure from the Consolidated Revenue Fund during the years 1938-39 and 1954-55 to 1958-59.

COMMONWEALTH CONSOLIDATED REVENUE FUND: EXPENDITURE. (£'000.)

(a) Excludes debt charges, Audit charges, Pension and Superannuation payments and Defence Division of the Department of the Treasury. (b) Excludes Audit Charges and Government contributions under Superannuation Act. (c) Includes Audit charges relating to Defence and War and Repatriation Services and excludes payments to the States for Cattle Tick Control, Dairy Industry Extension, Agricultural Advisory Services and Tobacco Industry Assistance. (d) Invalid and Age Pensions and Maternity Allowances. (e) Provided in part from Postmaster-General's Department votes and balance from Broadcasting Trust Account. (f) Excludes expenditure from Capital Works votes on Grants for Railway Standardization included as payments to the States. (g) Includes payments to States from Departmental votes. See footnotes (c) and (f). (h) Includes assistance to Primary Producers.

Further details of the expenditure in each section are given in paragraphs 2 to 14 following.

A graphical representation of the revenue and expenditure of the Commonwealth Consolidated Revenue Fund appears on page 823. In this diagram, Public Debt Charges (interest and debt redemption, etc.) are shown as a separate item, whereas in the table above these charges are included in the section to which they relate.

Details of Commonwealth expenditure on public debt charges for 1938–39 and 1954–55 to 1958–59 are shown in the following table:—

(a) Excludes payments to or for the States under the Financial Agreement. See pages 835-38.
 (b) Includes repatriation debt. (c) Redemption, conversion and loan management, etc., expenses.

2. Defence Services.—Details of the expenditure on defence services by the Departments of Defence, Navy, Army, Air, Supply and Defence Production are shown in the following table. The expenditure shown under Department of Supply includes the former Departments of Shipping and Fuel, Supply and Development, Supply and Shipping, and Munitions. This table covers expenditure by the service and associated departments only, and includes the cost of maintaining forces in Korea and at other overseas posts.

The figures represent the combined expenditures from revenue, trust and loan funds for the years 1938-39 and 1954-55 to 1958-59.

DEFENCE SERVICES(a): COMMONWEALTH EXPENDITURE FROM REVENUE, TRUST AND LOAN FUNDS.

Grand Total	19,393	154,289	162,351	150,482	171,833	169,170

(a) Excludes Interest and Redemption on War (1914-18) Debt due to the United Kingdom Government, payment of which was suspended in 1931. (b) In addition, £13,400,000 was spent from balance of War Pensions Trust Fund. (c) Revised to exclude Audit Charges. (d) From Service Departments and Australian Soldiers' Repatriation Trust Account. (e) Excludes International Monetary Fund charges. (f) Munitions, stores, etc., supplied to the Government of United Kingdom and other administrations. Includes repayments and waiver of war-time indebtedness of other administrations.

NOTE.—Minus sign (–) indicates excess of credits or repayments over expenditure.

4. **Subsidies and Bounties.**—The following table shows details of Commonwealth expenditure from revenue on subsidies, bounties and assistance to primary producers for the years 1938-39 and 1954-55 to 1958-59. Expenditure on special relief such as drought, frost, flood and bush fire, etc. (*see* table, p. 831, for more important items), is not included, nor is expenditure from the proceeds of certain taxes on primary products and profits from marketing schemes, which have been paid to trust funds for the purpose of price or other stabilization schemes or for distribution to producers (*see* paragraph 13, p. 840). Further information relating to these schemes and other assistance to primary producers is given in Chapter XXII.—Agricultural Production.

Details of price stabilization subsidies and of various forms of assistance to primary producers for earlier years may be found on pages 414 and 1014-15, respectively, of Official Year Book No. 38.

SUBSIDIES AND BOUNTIES: COMMONWEALTH EXPENDITURE.
(£'000.)

Item.	1938-39.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.

(a) Dairy products.

(b) Includes Raw Cotton Bounty, £115,000 and Sulphur Bounty, £88,000.

5. **Total Cost of Departments.**—Expenditure under this heading covers expenditure by departments, other than the Defence and Repatriation Departments and business undertakings, on administrative services and other activities. Expenditure on defence (other than interest and debt redemption in respect of the defence departments, which is included in the expenditure of the Department of the Treasury), war and repatriation services, subsidies and bounties, social services paid from the National Welfare Fund, business undertakings, Commonwealth territories, and capital works and services is excluded.

Information on the functions of departments and the Acts administered by the Ministers of departments was published in Official Year Book No. 37, pages 76-86, and particulars of subsequent changes in departmental structure were given in later issues (see No. 43, p. 81).

In the following table, details are given of that expenditure on the branches of each department which might be termed running expenses. Miscellaneous expenditure and debt charges, etc., are not included in this table but are in the one following.

(a) Includes rent, repairs and maintenance. Pension and superannuation contributions and interest and debt redemption in respect of the various departments are included under the Department of the Treasury. Payments to States from Departmental Miscellaneous Expenditure—Cattle Tick Control, Dairy Industry Efficiency Grant, Agricultural Advisory Services and Tobacco Industry Assistance—have been excluded. (b) League of Nations. (c) Unallocated debt charges, in respect of all departments, including defence departments. (d) Includes pensions and superannuation contributions in respect of all departments, including defence departments. (e) Included with Department of the Interior. (f) Department of Trade and Customs. (g) See Department of Commerce and Agriculture. (h) See Departments of Trade and Primary Industry. (i) Provided under Capital Works and Services votes. (j) Included with Prime Minister's Department.

6. **National Welfare Fund.**—The National Welfare Fund was established for the purpose of providing a fund for the payment of Commonwealth social services benefits. During the year 1949-50, an amount equivalent to the total collections of pay-roll tax and social services contribution was paid to the fund from Consolidated Revenue. During 1950-51, the social services contribution was amalgamated with the normal income tax and it became necessary to base the contributions on another formula. For the year 1950-51, the amount paid to the fund was the total of collections of pay-roll tax and social services contribution plus £30,000,000. In 1951-52, the amount paid to the fund was the amount paid in 1950-51 increased in the same proportion as collections of pay-roll tax increased over the collections of pay-roll tax in 1950-51. By an amendment to the National Welfare Fund Act 1943-1950, the amount to be paid to the fund in 1952-53 and subsequent years was changed to the amount of moneys paid out of the fund. In addition to these payments from Consolidated Revenue, the fund received a small amount of interest from investments.

In the following table, details are given of the income and expenditure of the National Welfare Fund and the balance in the fund at the end of each year for the years 1954-55 to 1958-59. A dissection of expenditure into the various types of benefits is given in Chapter XVIII.—Welfare Services (*see* p. 686).

NATIONAL WELFARE FUND: RECEIPTS, EXPENDITURE AND BALANCES.
(£'000.)

Year.	Income.			Expenditure.	Balance in Fund at end of Year.
	Contribution from Consolidated Revenue.	Interest on Investments.	Total.		
1954-55	189,319	2,108	191,427	189,319	191,038
1955-56	214,866	2,086	216,952	214,866	193,124
1956-57	223,923	1,938	225,861	223,923	195,062
1957-58	247,485	1,958	249,443	247,485	197,020
1958-59	278,227	1,977	280,204	278,227	198,997

7. **Debt Redemption Reserve Trust Account.**—Section 4 of the Appropriation Act (No. 2), 1953-1954 provided for payments from the Consolidated Revenue Fund of such sums as the Treasurer may determine. These sums are appropriated to the Debt Redemption Reserve Trust Account for the purpose of expenditure in redeeming any securities forming part of the National Debt of the Commonwealth.

The following payments were made to the Trust Account from the Consolidated Revenue Fund.—1953-54, £56,271,000; 1954-55, £70,151,000. There was no expenditure from the Trust Account until November, 1955, when the total balance of £126,422,000 was paid to the credit of the Loan Consolidation and Investment Reserve. The balance of the Trust Account at 30th June, 1954 and 1955, formed part of General Trust Funds which were invested in special loans to finance Commonwealth and State works programmes.

8. **Loan Consolidation and Investment Reserve Trust Account.**—The Loan Consolidation and Investment Reserve Act 1955 established the Loan Consolidation and Investment Reserve Trust Account for the purpose of repurchase or redemption of securities representing portion of the public debt of the Commonwealth.

In 1955-56, the Account was credited with a transfer from the Debt Redemption Reserve Trust Account of £126,422,000. Payments from the Consolidated Revenue Fund were made as follows:—1955-56, £61,613,000; 1956-57, £194,793,000; 1957-58, £104,378,000, and 1958-59, £27,947,000. Expenditure from the Trust Account on repurchase of securities was £28,701,000 in 1955-56; £43,443,000 in 1956-57; £132,767,000 in 1957-58 and £100,046,000 in 1958-59. The major portion of the balance of the Trust Account at 30th June, 1959, was invested in Commonwealth securities in special loans to finance Commonwealth and State works programmes.

9. **Business Undertakings.**—(1) *Postmaster-General's Department.* From the beginning of 1949-50, Broadcasting Services have been separated from the Postmaster-General's Department. Prior to 1949-50, part of the expenditure on these services was included with that of the Postmaster-General's Department. Details of the expenditure of this Department for the years 1938-39 and 1954-55 to 1958-59 are given in the following table:—

POSTMASTER-GENERAL'S DEPARTMENT: EXPENDITURE.
(£'000.)

Item.	1938-39.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.

Capital Works and Services ..	3,851	25,839	28,970	30,721	34,811	36,353
Grand Total ..	18,729	102,085	114,597	121,918	131,763	136,833

Further details of expenditure for 1958–59 on account of the Postmaster-General's Department appear in Chapter XIV.—Transport and Communication, of this Year Book (*see p. 561*).

(ii) *Broadcasting Services.* Since 1949–50, all expenditure on broadcasting services has been brought together in one section. Previously these services had been financed partly by the Postmaster-General's Department and partly from the Wireless Broadcasting Trust Account. Details of expenditure for the years 1954–1955 to 1958–1959 are shown in the following table.

COMMONWEALTH BROADCASTING SERVICES : EXPENDITURE.
(£'000.)

(a) Includes loan redemption and conversion expenses, £19,000.

Additional details of the financial operations of the Commonwealth Railways to 1958–59 are given in Chapter XIV.—Transport and Communication (*see pp. 533–5*).

10. *Territories.*—The following table shows the expenditure on account of Commonwealth Territories for the years 1938–39 and 1954–55 to 1958–59. The Australian Capital Territory is administered by the Department of the Interior, and the Department of Territories controls the Northern Territory and the external territories. The expenditure has been grouped in one table for convenience. Information in greater detail will be found in the annual bulletin, *Finance, Part I.—Public and Private Finance*

COMMONWEALTH TERRITORIES : EXPENDITURE.

(a) Excludes Commonwealth New Guinea Timbers Ltd. included under Territories. (b) Excludes Overseas Telecommunications Commission included under Postmaster-General's Department. (c) Revised to exclude Grants to States for Railway Standardization. (d) From National Defence Contributions Trust Account and other trust funds.

NOTE.—Minus sign (–) indicates excess of credits or repayments over expenditure.

12. **Payments to or for the States.**—(i) *General.* An outline of the provisions of the Constitution requiring the Commonwealth to make payments to the States, and of the systems which followed, is given in earlier issues of the Official Year Book (see No. 37, pp. 633 to 638). In the following paragraphs, reference is made to the arrangements at present in operation.

(ii) *Amounts Paid.* (a) *Year 1958-59.* The table below shows particulars of the amounts paid to each of the States as grants for the several purposes referred to in subsequent paragraphs:—

COMMONWEALTH PAYMENTS TO OR FOR THE STATES, 1958-59.(a)

(a) Excludes relief to primary producers and other payments for medical research, etc. (b) Paid to National Debt Sinking Fund. (c) Paid to Trust Fund. (d) Grants only—excludes repayable advances.

Particulars of special Commonwealth grants for the relief of primary producers are not included in the foregoing tables. For details *see* Chapter XXII.—Agricultural Production. *See also* para. 4, Subsidies and Bounties, p. 828 and para. 13, Other Expenditure, p. 840.

(iii) *Financial Agreement.* Details of the Financial Agreement between the Commonwealth and the States are given in Official Year Book No. 37, pages 685 to 690. Under this Agreement, the Commonwealth undertook to contribute £7,584,912 per annum towards interest payable on the State Debts for a period of 58 years from 1st July, 1927. This amount is to be distributed among the States as follows:—New South Wales, £2,917,411; Victoria, £2,127,159; Queensland, £1,096,235; South Australia, £703,816; Western Australia, £473,432; Tasmania, £266,859.

These amounts are equal to the sums paid by the Commonwealth to each State in the year 1926–27 at the rate of 25s. per head of population, the rate at which the Commonwealth had contributed annually to the States since 1st July, 1910, as compensation for the States relinquishing, after Federation, the right to levy Customs and Excise Duties.

In addition, under the Financial Agreement, the Commonwealth agreed to make certain contributions to the National Debt Sinking Fund for redemption of State Debts. Details of these payments are given in Division D of this Chapter, § 2, page 857.

(iv) *Special Grants.* The Constitution provides in Section 96 for the granting of special financial assistance to the States. Prior to 1933, financial assistance of varying amounts was granted by the Commonwealth to South Australia, Western Australia and Tasmania. Details of this may be found in earlier issues of the Official Year Book (*see* No. 40, p. 695).

In 1933, the Commonwealth Government appointed the Commonwealth Grants Commission of three members to inquire into and report upon claims made by any State for a grant of financial assistance and any matters relevant thereto.

Applications have been received from South Australia, Western Australia and Tasmania each year from 1933 onwards and the recommendations of the Commission in respect of the years 1938–39 and 1955–56 to 1959–60 are shown in the following table. Commencing with 1949–50, the Commission has divided the grants recommended into two parts. One part is the Commission's estimate of the indispensable need of the claimant State for the year in which the payment is to be made after allowing a sufficient margin for safety. The other part is an adjustment of this estimate for an earlier year after an examination of the audited accounts for that year. Thus the grants for 1959–60 include an estimate of the indispensable need of the claimant State for 1959–60 and an adjustment to the estimated grant for 1957–58.

COMMONWEALTH GRANTS COMMISSION: GRANTS RECOMMENDED.
(£'000.)

(a) Adjustment to estimated grant paid two years previously.

(v) *Tax Reimbursement Grants.* Details of the States Grants (Income Tax Reimbursement) Act 1942 and the States Grants (Entertainments Tax Reimbursement) Act 1942 are given in earlier issues of the Official Year Book (*see* No. 37, pp. 635 to 637). These Acts provided for grants to the States as compensation for vacating the fields of Income Tax and Entertainments Tax. Grants under these Acts ceased after 1945–46 and were replaced by grants under the States Grants (Tax Reimbursement) Act 1946–1948.

This Act provided for reimbursement grants of certain specified amounts to be paid to the States during 1946–47 and 1947–48. For 1948–49 and subsequent years, the grants

were assessed on the aggregate paid in 1947–48 (£45,000,000) increased in accordance with a formula based on increases in population and average wages. Details of the formula and of the treatment of arrears of State income taxes were given in earlier issues of the Official Year Book (see No. 40, p. 696).

In 1950–51, an amount of £5,000,000 was paid to the States under the States Grants (Additional Tax Reimbursement) Act 1950. As this was considered a non-recurring grant, the formula mentioned above was not amended.

(vi) *Special Financial Assistance Grants.* During the years 1954–55 to 1958–59, there were heavy additions to the financial needs of the States and special assistance grants amounting to £21,915,000, £19,902,000, £15,348,000, £19,405,000, £24,145,000 and £30,437,000 respectively were made. For details of amounts paid to each State during 1958–59 see page 836 and for other years see earlier issues of the Official Year Book or the annual bulletin *Finance, Part I, Public and Private Finance*.

(vii) *Additional Financial Assistance.* The States Grants (Additional Assistance) Act 1958 provided for the payment of £5,000,000 from the Consolidated Revenue Fund for financial assistance to the States.

(viii) *Grants for Road Construction.* (a) *Main Roads Development Act 1923–25, Federal Aid Roads Acts 1926, 1931 and 1936, Federal Aid Roads and Works Act 1937, Commonwealth Aid Roads and Works Act 1947–1949 and Commonwealth Aid Roads Act 1950.* Details of these Acts are given in earlier issues of the Official Year Book (see No. 38, pp. 787–8 and No. 41, p. 62) and in the annual bulletin *Finance, Part I, Public and Private Finance*.

(b) *The Commonwealth Aid Roads Act 1954* repealed the Commonwealth Aid Roads Act 1950 and provided for payment to the States, for a period of five years from 1st July, 1954, of an amount equivalent to 7d. a gallon on all petrol, except aviation spirit, which is entered for home consumption and which is subject to Customs and Excise duties as specified in Customs Tariff Items 229c and 229d(2) and Excise Tariff Item 11. Out of this amount, the following grants are to be made to the States for construction and maintenance of roads and the purchase of roadmaking plant:—

(a) Sixty per cent. of the amount, less £900,000 per annum, for expenditure on roads, and

(b) Forty per cent. of the amount for expenditure on roads in rural areas other than highways, trunk or main roads.

The States may spend up to £1,000,000 per annum from the Commonwealth road grants on works connected with transport by road or water. Five per cent. of the grants is payable to Tasmania and the remainder is to be divided among the other five States, three-fifths according to population and two-fifths according to area. In addition, the Commonwealth may spend each year £800,000 on strategic roads and £100,000 on the promotion of road safety practices.

An amendment to the Commonwealth Aid Roads Act 1954 increased the allocation for road safety purposes from £100,000 to £150,000 a year as from 1st July, 1955, and the allocation to the States from 7d. to 8d. a gallon of petrol as from 1st July, 1956.

(c) *The Commonwealth Aid Roads (Special Assistance) Act 1957.* Under the Commonwealth Aid Roads (Special Assistance) Act 1957, a sum of £3,000,000 has been appropriated for each of the years 1957–58 and 1958–59. Of this amount, £2,950,000 is apportioned as assistance to the States:—

(i) for the construction, reconstruction, maintenance and repair of roads or on the purchase of road-making plant; or

(ii) for making payments to local authorities for the construction, reconstruction, maintenance and repair of roads or for the purchase of road-making plant; and £50,000 to the Commonwealth for the construction, reconstruction, maintenance and repair of roads serving Commonwealth purposes or on the purchase of road-making plant.

(ix) *Tuberculosis Act 1948.* Reimbursement of Capital Expenditure. The Tuberculosis Act 1948 provided for the reimbursement by the Commonwealth of capital expenditure incurred by the States in the provision of facilities for the diagnosis, treatment and control of tuberculosis, as from 1st July, 1948.

(x) *States Grants (Mental Institutions) Act 1955.* This Act provides for financial assistance to the States for capital expenditure on mental institutions to a maximum amount of £10,000,000. Each State is entitled to one-third of expenditure on buildings or equipment of a mental institution made on or after 1st July, 1955.

(xi) *Other Payments.* (a) *Western Australian Waterworks.* The Western Australia Grant (Water Supply) Act, 1948, provides for grants to Western Australia not exceeding an aggregate of £2,150,000 for the development of the Agricultural Areas, Great Southern Towns and Goldfields Water Supply schemes. The amount provided by the Commonwealth is not to exceed half the total expenditure on the scheme.

(b) *Coal Mining Industry—Long Service Leave.* To provide funds for the payment for long service leave in the coal mining industry, the Commonwealth imposed an excise duty of 6d. a ton on coal produced from 1st November, 1949. The rate of duty was raised to 7½d. a ton from 26th August, 1951, and to 8d. a ton from 30th May, 1952. The proceeds of this excise duty are paid to a trust fund out of which the States are reimbursed for expenditure incurred in granting long service leave to employees in the coal mining industry.

(c) *Imported Houses.* A subsidy is paid to the States for houses imported by a State or a housing authority of a State after 12th October, 1949. The amount of the subsidy is the amount by which the cost of imported houses exceeds the cost of building comparable houses from local materials. The subsidy is limited to £300 a house and in aggregate to 30,000 houses or £9,000,000.

(d) *Contribution to South Australia—Port Augusta to Port Pirie Railway.* The Port Augusta to Port Pirie Railway Act 1935–1950 approved an agreement between the Commonwealth and South Australia to provide for the extension of the Trans-Australian Railway by the construction of a railway in South Australia from Port Augusta to Port Pirie. As a contribution towards reimbursing South Australia for the cost of the section to be constructed by the State, and for any additional expense incurred by the State in carrying out the Agreement, the Act provided for a payment by the Commonwealth to the State of South Australia of £20,000 per annum for twenty years, the first payment being made in 1937–38 after the opening of the Railway and the final payment in 1956–57.

(e) *Encouragement of Meat Production.* To develop meat production in Queensland and Western Australia, grants are made to these States for the provision and improvement of roads and other facilities for the movement of live-stock. Provision is made for the Commonwealth to meet the cost of the construction and improvement of certain specified roads in both States and the construction of eight cattle loading and unloading points in Queensland. Provision is also made for the Commonwealth to meet half the cost of improving watering facilities on specified stock routes in both States. The amount of the grants for improving watering facilities on stock routes is limited to £75,000 in Queensland and £31,500 in Western Australia. These limits were extended as from 20th April, 1954, to £150,000 in Queensland and £50,000 in Western Australia.

(f) *Grants to Universities.* Payments to the States for universities were first introduced in 1951–52 under the States Grants (Universities) Act 1951, and were continued under similar legislation passed in 1953, 1955, 1956 and 1957. Following on the Government's acceptance of the main recommendations of the Committee on Australian Universities, the provisions of the 1957 Act relating to financial assistance for 1958 were superseded by the States Grants (Universities) Act 1958, which operated from 1st January, 1958.

This new legislation authorized the Commonwealth to make payments to the States for universities of up to £21,400,000 over the three calendar years 1958 to 1960, inclusive, where certain conditions have been satisfied. These payments include increased contributions towards the running expenses of universities, new grants for capital works and equipment and new emergency grants.

(g) *Cattle Tick Control.* Since 1926–27, the Commonwealth has subsidized the cost of eradication and control of cattle tick in New South Wales. From 1950–51, the subsidy was increased on a £1 for £1 basis up to an agreed maximum. The payments are charged to the departmental expenditure of the Department of Health.

(h) *Tobacco Industry Assistance.* The Commonwealth makes a grant for tobacco research of up to £15,000 per annum, paid to the tobacco producing States on a £1 for £1 basis.

(i) *Dairy Industry Extension Grant.* The Commonwealth provides financial assistance, with a maximum annual limit of £250,000, to promote improved farm practices in the dairy industry. The grants are charged to the departmental expenditure of the Department of Primary Industry.

(j) *Expansion of Agricultural Advisory Services.* These payments were introduced in 1952–53 to encourage expansion of agricultural advisory services by the State Departments of Agriculture and to promote increased farm efficiency. The payments are charged to the departmental expenditure of the Department of Primary Industry.

(k) *Grants for Railway Standardization.* (i) *South Australia.* Under the Railway Standardization (South Australia) Agreement Act 1949, the Commonwealth is providing funds for the conversion of lines in the south-eastern division of the State as an initial step towards eventual standardization of 4' 8½" gauge. The State is to repay three-tenths of the cost of this work over a period of 50 years and is to bear the full cost of subsequent conversion from broad to standard gauge.

(ii) *Albury to Melbourne.* Under the Railway Standardization (New South Wales and Victoria) Agreement Act 1958 the Commonwealth has agreed to provide funds for the construction of a standard gauge rail link between Albury and Melbourne on the basis that the States of Victoria and New South Wales will each bear 15 per cent. of the cost by instalments over a period of 50 years.

The total expenditure on Railway Standardization (the 30 per cent. advances to the States and the 70 per cent. grants to the States), is charged to the Capital Works and Services vote of the Department of Shipping and Transport.

13. *Other Expenditure.*—Expenditure under this item represents the proceeds of special industry taxes and profits from marketing schemes which are paid to trust funds or other authorities for the purposes of the industries concerned. Advance payments in respect of sales of uranium paid to the Atomic Energy Commission are also included.

Information relating to the taxes levied is given in sub-section II.—Revenue, of this section (*see p. 820*). Details of expenditure from the trust funds are given in § 3, Commonwealth Trust Funds. Details of the price stabilization and other assistance schemes for primary industries may be found in Chapter XXII.—Agricultural Production. Details of expenditure from the Consolidated Revenue Fund during the last five years are given in the following table.

§ 4. Commonwealth Loan Fund.

Brief historical notes relating to the Commonwealth Loan Fund are given in earlier issues of the Official Year Book (*see* No. 37, p. 640). In the following table, details are given of the net expenditure from the Commonwealth Loan Fund for the years 1938–39 and 1954–55 to 1958–59 and of the aggregate expenditure to 30th June, 1959. The figures shown represent “net” loan expenditure, i.e., after adjustments have been made for refunds of amounts expended in earlier years.

NOTE.—Minus sign (—) indicates excess of repayments to Loan Fund.

Information relating to the Public Debt of the Commonwealth is given in Division D Commonwealth and State Public Debt, of this chapter.

B. STATE FINANCE.

§ 1. General.

1. **Functions of State Governments.**—In comparing the financial returns of the States, allowances must be made for the various functions discharged by the respective Governments, and for local conditions in each case. Direct comparisons of the revenue, expenditure, and debt of the individual States are difficult, owing to the fact that functions which in

one State are assumed by the Central Government are in another relegated to municipal or semi-governmental bodies which are vested with certain defined borrowing powers and whose financial transactions are not included with those of the Central Government. Care, therefore, is needed in making comparisons, and the particulars contained in this Chapter should be read with those contained in Chapter XIX.—Local Government. In many respects, moreover, the budgets of the Australian Governments differ materially from those of most European countries, owing to the inclusion therein of the revenue and expenditure of departments concerned with rendering public services, such as railways, tramways, water supply, etc., which in other countries are often left to private enterprise.

2. Accounts of State Governments.—The various financial transactions of the States are in each case mainly concerned with one or other of three Funds—the Consolidated Revenue Fund, the Trust Fund, and the Loan Fund. All revenue (except certain items paid into special funds) collected by a State is paid into its Consolidated Revenue Fund, from which payments are made under authority of an annual Appropriation Act passed by the Legislature, or by a permanent appropriation under a special act.

Figures in § 2 below relating to New South Wales represent the transactions of the Consolidated Revenue Fund and the business undertakings included in the annual budget papers. These latter are as follows:—Railways, Tramways and Omnibuses, and Sydney Harbour Trust Section of the Maritime Services Board. Adjustments have been made to the Budget figures, however, in order to eliminate duplications caused by inter-fund payments. Particulars for all other States relate to the transactions of the Consolidated Revenue Fund.

The Trust Fund comprises all moneys held in trust by the Government, and includes such items as superannuation funds, road funds, insurance companies' deposits, etc.

The Loan Fund is debited with all loan moneys raised by the State, and credited with the expenditure therefrom on public works or other purposes.

3. Inter-relation of Commonwealth and State Finances.—A statement in some detail, covering the inter-relation of Commonwealth and State Finances during the period from the inception of Federation to the passing of the Financial Agreement Act 1928, was published in Official Year Book No. 22, pages 379–380. Changes in the financial relations between the Commonwealth and States since the passing of the Financial Agreement Act have been described in issues of the Official Year Book from year to year (*see also* pp. 857–58).

§ 2. State Consolidated Revenue Funds.

I.—Revenue.

1. General.—The principal sources of State revenue are:—

(a) Taxation; (b) The business undertakings controlled by the State Governments; (c) Sale of and rental from crown lands; (d) Payments by Commonwealth Government under the Financial Agreement, Special Grants and Tax Reimbursement Acts, etc.; (e) Interest on advances; and (f) Miscellaneous sources, comprising fines, fees, etc.

Of these sources, that yielding the largest revenue for the States as a whole is the group of business undertakings, the principal contributors being the government railways and tramways. Next in magnitude are Commonwealth payments under the Tax Reimbursement Acts, followed in order by taxation receipts, Commonwealth special financial assistance and special grants, and lands receipts. With the introduction of uniform taxation by the Commonwealth in 1942–43, the States vacated the fields of income and entertainment taxation, and payments by the Commonwealth under the Income and Entertainments Tax Reimbursements Acts and, from 1946–47, under the Tax Reimbursement Act, replaced revenue previously received from those sources. The Commonwealth, however, ceased to impose Entertainments Tax in 1953–54 and in the same year Victoria, Western Australia and Tasmania re-imposed an Entertainments Tax.

2. **Revenue Received.**—The following table shows particulars of the total amounts, and the amounts per head of population, of consolidated revenue received by the several States during the years 1938-39 and 1954-55 to 1958-59.

STATE CONSOLIDATED REVENUE.

Year.	N.S.W.(a)	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Total

(a) See § 1, para. 2, p. 843. (b) In all States certain taxation collections are not paid into Consolidated Revenue Fund. For total collections see next page. (c) Includes payments under Financial Agreement, Special Grants, Special Financial Assistance, Grants to Universities, etc. (d) Consolidated Revenue Fund receipts only. Excludes payments to Trust Funds.

(ii) *Revenue from Taxation. (a) General.* The following tables show, for the year 1958-59, particulars of all State taxation collections irrespective of whether such moneys have been paid into the Consolidated Revenue Funds or not. For this reason, the particulars hereunder differ from those shown in the tables relating to the Consolidated Revenue Funds and represent a comprehensive statement of all taxation collections by the Government in each State. In this and the succeeding statements of taxation, the collections have been grouped according to the nature of the tax rather than the method of collection. For example, stamp duties on betting tickets and bookmakers' licences have been included under "Racing Tax" instead of under "Stamp Duties" and "Licences" respectively. Commonwealth payments under the State Grants (Tax Reimbursement) Act are not included.

STATE REVENUE FROM TAXATION: TOTAL NET COLLECTIONS(a) 1958-59.

(£'000.)

(b) 1938–39 and 1954–55 to 1958–59. Prior to federation, customs and excise duties were the principal source of revenue from taxation. Thereafter, until the introduction of the uniform income tax scheme in 1942–43, the most productive State taxes were the various income taxes which, in 1941–42, included unemployment relief, State development and hospital taxes. Since 1941–42, the States have been reimbursed by the Commonwealth for the revenue lost by the discontinuance of these taxes. Details of the reimbursement grants are given on pages 836 and 844. Information relating to the State income taxes which were levied prior to 1942–43 may be found in earlier issues of the Official Year Book.

The total amounts and the amounts per head raised from all sources of taxation by the several State Governments, including amounts not paid into the Consolidated Revenue Fund, during the years 1938–39 and 1954–55 to 1958–59 are shown in the following table:—

(iii) *Business Undertakings.* (a) 1958-59. A very large proportion of State gross revenue is made up of receipts from business undertakings under the control of the Governments. The most important of these are railways and tramways, harbour works, water supply and sewerage, and electricity supply and, in addition, State batteries for the treatment of auriferous ores in Western Australia and various minor revenue-producing services rendered by the Governments of all States are included. For the year 1958-59, the revenue from these sources was £212,496,000 or 33.2 per cent. of the revenue from all sources. Details of revenue are as follows:—

STATE REVENUE FROM BUSINESS UNDERTAKINGS, 1958-59.

Total	55,048	197,257	199,900	214,353	207,592	212,496

(iv) *Lands.* The revenue from the sale and rental of Crown lands has, with few exceptions, been treated from the earliest times as forming part of the Consolidated Revenue Funds, and has been applied to meet ordinary expenses. The following table shows the revenue from sales and rentals of Crown lands for the year 1958–59.

STATE LAND REVENUE, 1958–59. (£'000.)

Total ..	4,332	2,800	3,276	559	1,392	531	12,890

(a) Includes mining royalties, rents, etc.

The total land revenue for all States for the years 1938-39 and 1954-55 to 1958-59 respectively was:—£4,144,000, £12,787,000, £13,937,000, £15,489,000, £15,050,000 and £12,890,000.

(v) *Commonwealth Grants.* Commonwealth grants to the States represent a considerable proportion of the States' Revenue. In 1958-59, the total amount (excluding sundry minor items) paid to the Consolidated Revenue Funds of the States was £234,985,000 (36.7 per cent.). Details for 1958-59 were as follows:—Contribution towards interest on States' debts under the Financial Agreement, £7,585,000, special grants to the States of South Australia, Western Australia and Tasmania, £20,750,000, tax reimbursements, £174,547,000, special financial assistance, £30,437,000, grants to universities, £1,029,000 and other grants, £637,000.

In addition to these, the States receive a number of other grants which are paid to trust funds. The main items in this class are the contribution to the sinking fund on States' debts (£5,386,000 in 1958-59) paid to the National Debt Sinking Fund, grants for Commonwealth Aid Roads (£36,199,000 in 1958-59) and grants for Universities (£5,890,000 in 1958-59) paid to State trust funds.

More detailed information concerning Commonwealth grants to the States is given on pages 835-40.

(vi) *Commonwealth National Welfare Fund Payments.* The States also receive payments from the Commonwealth in respect of Hospital and Pharmaceutical Benefits, Nutrition of Children and reimbursement of maintenance expenditure on Tuberculosis Sanatoria. These receipts are paid into Consolidated Revenue Funds or Trust Funds according to the varying accounting procedures in the States. In 1958-59, the total amount paid to State Consolidated Revenue Funds was £11,025,000 (1.7 per cent.). This amount was made up of Hospital Benefits, £3,896,000; Pharmaceutical Benefits, £1,103,000; Nutrition of Children, £1,192,000; and Tuberculosis—Reimbursement of maintenance expenditure, £4,834,000.

(vii) *Interest and Miscellaneous.* In addition to the foregoing, there are in each State several miscellaneous sources of revenue, including such items as interest, fines, fees, etc. Interest, mainly from loans to local governing bodies, on public account balances, and for soldier land settlement amounted to £23,075,000 in 1958-59, while "Miscellaneous" revenue, which includes fines of the courts and fees for services, amounted to £46,991,000 in 1958-59.

II.—Expenditure.

1. *General.*—The principal heads of State expenditure from Consolidated Revenue Funds are:—

(a) Interest, exchange and debt redemption charges in connexion with public debt; (b) Working expenses of business undertakings; (c) Education; (d) Health and charitable expenditure; (e) Justice; (f) Police; (g) Penal establishments; and (h) All other expenditure, under which heading are included public works, lands and surveys, agriculture and forestry, legislative and general administration, pensions and miscellaneous.

The working expenses of railways and tramways are the most important item of State Government expenditure. In 1958-59, the working expenses of the railways, tramways and omnibuses were 28.3 per cent. of the total expenditure from the State Consolidated Revenue Funds; next in importance were education, 18.0 per cent.; public debt charges, 16.2 per cent.; charitable, public health and hospitals, 14.2 per cent.; and law, order and public safety, 5.7 per cent respectively.

2. *Total Expenditure.*—The total expenditure from the Consolidated Revenue Funds of the several States and the expenditure per head of population during each of the years 1938-39 and 1954-55 to 1958-59 are shown in the following table.

STATE EXPENDITURE : CONSOLIDATED REVENUE FUNDS.

Total ..	239,727	153,796	100,198	69,057	61,753	22,745	647,276

(a) See § 1, para. 2, page 843. (b) Tasmanian transport services are under the separate control of the Transport Commission. (c) Balance of Special Grant, 1956-57. The Special Grant for 1958-59 taken into Tasmanian Consolidated Revenue Fund was £4,414,000 although the Commonwealth payment was £4,400,000. The difference was offset in the Tasmanian accounts against the adjusted surplus for 1956-57.

(a) See § 1, para. 2, page 843.

NOTE.—Minus sign (–) indicates deficit.

§ 3. State Trust Funds.

In addition to the moneys received as revenue and paid to the credit of the Consolidated Revenue Funds, considerable sums are held in trust for various purposes by the State Governments. The balances of trust funds held at 30th June for each of the years 1939 and 1955 to 1959 were as follows:—

STATE TRUST FUND BALANCES.

(£'000.)

At 30th June—	N.S.W.(a)	Vic.	Q'land.	S. Aust.	W.Aust.	Tas.	Total.
1939	15,684	8,189	3,062	1,448	3,744	530	32,657
1955	39,335	30,649	50,549	4,127	11,686	739	137,085
1956	40,442	29,850	47,165	4,517	13,535	838	136,347

(a) Special Deposits Account and Special Accounts.

§ 4. State Loan Funds.

1. **General.**—As far back as 1842, revenue collections were supplemented by borrowed moneys, the earliest loan being raised by New South Wales for the purpose of assisting immigration, at rates of interest varying from 2½d. to 5½d. per £100 per diem, or approximately from 4½ per cent. to 8 per cent. per annum. State public borrowing, however, is mainly due to the fact that the State Governments, in addition to ordinary administrative duties, undertake functions which in other countries are usually entrusted to local authorities or left to private enterprise. Foremost amongst these are the construction and operation of the railway systems. Loan moneys have also been largely used for improvements to harbours and rivers, and for the construction of roads, water supply and sewerage works. The State loan expenditure and public debt thus differ very materially from those of most European countries, and from those of the Commonwealth, where such expenditure was very largely incurred for defence or war purposes, as the State debts consist chiefly of moneys raised and expended with the object of assisting the development of the resources of the country, and are to a very large extent represented by tangible assets.

Statements relating to "gross" loan expenditure are shown below. The gross expenditure represents the amounts disbursed during each year. Details of "net" loan expenditure, i.e., gross expenditure less any credits to the Loan Fund during the year on account of repayments of advances to local governing bodies, settlers, etc., the sale of assets, and transfers from other funds may be found in *Finance, Part I, Public and Private Finance*, Bulletin No. 50, 1958–59. Such moneys are credited to the Loan Fund in the year of repayment irrespective of when the advance was made.

2. **Gross Loan Expenditure.**—(i) 1958–59. Particulars of gross loan expenditure on works, services, etc., are shown in the following table:—

STATE GROSS LOAN EXPENDITURE ON WORKS, SERVICES, ETC., 1958–59.

(a) Includes exchange, discounts and flotation expenses, revenue and general cash deficits.

(b) From Consolidated Revenue Fund.

NOTE.—Minus sign (—) indicates excess of repayments to loan fund.

Information relating to the State Public Debt is given in division D. Commonwealth and State Public Debt (pp. 859-67).

C. COMMONWEALTH AND STATE FINANCE.

1. **Revenue and Expenditure.**—(i) *Consolidated Revenue Funds.* The following tables show the aggregate revenue and expenditure of the Consolidated Revenue Funds of the Commonwealth and States for each of the years 1938-39 and 1954-55 to 1958-59. In these tables, the combined Commonwealth and State totals have been adjusted to exclude major duplications, but the separate Commonwealth and State figures are as shown in other divisions of this chapter. The items excluded from the total figures are :—payments made by the Commonwealth to the States and included in the State Consolidated Revenue Funds on account of tax reimbursements, interest under the Financial Agreement, special grants, special financial assistance, coal strike emergency grants, price control reimbursements, grants to universities, cattle tick control, tuberculosis capital expenditure, National Welfare Fund payments, and estimated payments of pay-roll tax by the States to the Commonwealth. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated.

COMMONWEALTH AND STATES : REVENUE AND EXPENDITURE.

Year ended 30th June—	Revenue.			Expenditure.		
	Commonwealth.	States.	Total.	Commonwealth.	States.	Total.

D. COMMONWEALTH AND STATE PUBLIC DEBT.

§ 1. General.

Under the Financial Agreement between the Commonwealth and the States in 1927, the Commonwealth and State public debts were amalgamated and the Commonwealth Government accepted responsibility for the State public debts. The Commonwealth is reimbursed by the States for interest, exchange, etc., paid on their behalf and the debt is redeemed from the National Debt Sinking Fund to which both the Commonwealth and the States make contributions. Under the agreement, the Commonwealth arranges for all borrowings on behalf of the Commonwealth and the States, and Commonwealth securities are issued for all money borrowed.

In the statistical tables relating to public debt, the units of currency for debt outstanding and interest payable, except in § 3, para. 5, are:—Debt in Australia—£ Australian; Debt in London—£ Sterling; Debt in New York—£ (converted from dollars at the rate of \$4.8665 to £1); Debt in Canada—£ (converted from dollars at the rate of \$4.8665 to £1); Debt in Switzerland—£ (converted from Swiss francs at the rate of 1,000 Swiss francs = £A.102 1s. 10d.).

The totals shown represent the total “face” or “book” value of the debt without adjustment on account of the difference in currency mentioned above.

In § 3, para. 5 only, details of the debt for the Commonwealth and each State are given in Australian currency.

§ 2. The Financial Agreement between the Commonwealth and the States.

1. *General.*—Full details of the Financial Agreement between the Commonwealth and the States are given in earlier issues of the Official Year Book (*see* No. 37, pp. 685–690). In this issue, a summary of the main provisions only is given.

2. *Australian Loan Council.*—The Australian Loan Council was set up to co-ordinate the public borrowings of the Commonwealth and the States. It consists of the Prime Minister of the Commonwealth, or another Minister nominated by him in writing, as Chairman, and the State Premiers, or Ministers nominated by them in writing. Each year the Loan Council examines the loan programmes of the Commonwealth and the States and determines the total amount to be borrowed during the year. Borrowings by the Commonwealth for defence purposes are not subject to decisions of the Loan Council.

3. *Loan Raisings for the Commonwealth and States.*—Subject to the decisions of the Loan Council, the Commonwealth arranges for all borrowings for or on behalf of the Commonwealth or any State, and for all conversions, renewals, redemptions, and consolidations of the public debts of the Commonwealth and of the States.

If the Loan Council unanimously decides, however, a State may borrow outside Australia in its own name, and may issue securities for the amount so borrowed. The Commonwealth then guarantees that the State will fulfil all its obligations to bond-holders in respect of the money so borrowed and the money is deemed to be borrowed by the Commonwealth for and on behalf of the State.

Subject to any maximum limits decided upon by the Loan Council for interest, brokerage, discount and other charges, the Commonwealth or any State may—

- (i) borrow within its own territory, for any purpose, money from any authorities, bodies, funds or institutions (including Savings Banks) constituted or established under Commonwealth or State law or practice;
- (ii) borrow from the public by means of counter sales of securities; and
- (iii) use any available public moneys.

However, any securities issued for money so borrowed or used must be Commonwealth securities on terms approved by the Loan Council.

4. *Taking over of State Public Debts.*—The Commonwealth took over on 1st July, 1929—

- (a) the balance then unpaid of the gross public debt of each State existing on 30th June, 1927; and
- (b) all other debts of each State existing on 1st July, 1929, for money borrowed by that State deemed by the Agreement to be money borrowed by the Commonwealth for and on behalf of the State,

and in respect of these debts assumed, as between the Commonwealth and the States, the liabilities of the States to bond holders.

5. **Transferred Properties.**—In relation to State properties transferred to the Commonwealth under Section 85 of the Constitution, the States as from 1st July, 1929, were discharged from any liability in respect of principal, interest or debt redemption on so much of the debts bearing interest at 5 per cent. per annum, taken over by the Commonwealth as amounted to the agreed value of these properties, namely £10,924,323.

6. **Payment of Interest.**—For a period of 58 years from 1st July, 1927, the Commonwealth agreed to contribute the sum of £7,584,912 each year towards the interest payable on the State debts. The balance of the interest payable on the State debts is paid to the Commonwealth by the States.

7. **Sinking Fund.**—(i) *State Public Debt existing at 30th June, 1927.* A sinking fund at the rate of 7s. 6d. per annum for each £100 of the net public debts of the States existing on 30th June, 1927, and conversions thereof, was established under the terms of the Agreement. The Commonwealth contributes annually from revenue 2s. 6d. per £100 on the net public debts of the States existing at 30th June, 1927, and each State contributes annually 5s. per £100 on the net public debt of such State at 30th June, 1927. The payments of the Commonwealth and of all States except New South Wales will continue for a period of 58 years from 1st July, 1927, and those of New South Wales for a similar period from 1st July, 1928.

(ii) *New Borrowings.* On new borrowings after 1st July, 1927, (except those for redemptions or conversions, or funding a State deficit) a sinking fund at the rate of 10s. per £100 per annum was established and the State and the Commonwealth contribute from revenue equal shares for a period of 53 years from the date of raising. (New South Wales did not commence sinking fund contributions in respect of new loans raised in the financial year 1927–28 until 1st July, 1928.)

(iii) *Loans raised to meet a Revenue Deficit.* In respect of any loan (except any of the loans referred to in para. (iv) below) raised by a State after 30th June, 1927, to meet a revenue deficit accruing after that date, no sinking fund contribution is made by the Commonwealth, but the State makes a sinking fund contribution at the rate of not less than 4 per cent. per annum of the loan for a period sufficient to provide for the redemption of the loan, the contributions being deemed to accumulate at the rate of 4½ per cent. per annum compound interest.

(iv) *Loans raised to meet Revenue Deficits between 30th June, 1927, and 1st July, 1935.* Special contributions are payable in respect of loans raised by a State or by the Commonwealth on behalf of a State, on the security of Commonwealth Treasury Bills, to meet a revenue deficit which accrued after 30th June, 1927, and before 1st July, 1935. Details of these contributions are given in Official Year Book No. 37, pages 688 and 689.

(v) *National Debt Commission.* The sinking funds established are controlled by the National Debt Commission, which may arrange with any State to act as its agent in connexion with payments due to bond holders. Except where the conditions relating to sinking funds, redemption funds, and funds of a like nature held by a State on 30th June, 1929 precluded such transfer, all such funds were transferred to the National Debt Commission.

(vi) *Operation of Sinking Fund.* Sinking fund contributions made in respect of the debts of a State, and funds of that State transferred to the National Debt Commission, are not accumulated but must be applied, whenever expedient, to the redemption and repurchase of loan securities. When such a loan security is repurchased or redeemed by the National Debt Commission, it is cancelled, and the State, in addition to sinking fund contributions otherwise payable, pays a further annual sinking fund contribution at the rate of 4½ per cent. on the face value of the cancelled security for the balance of the period during which the original contribution is payable in respect of that debt.

(vii) *Oversea Debt.* Sinking fund contributions in respect of oversea debt shall be calculated at the mint par of exchange prevailing on 1st July, 1927.

8. **Borrowing by Semi-Governmental Authorities.**—It was realized from the inception of the Loan Council that, in the interests of co-ordinated borrowing, the Council should be advised of the borrowing of large amounts by semi-governmental authorities. In May, 1936, all resolutions passed by the Loan Council in connexion with semi-governmental borrowings were consolidated into one set of rules, which superseded all previous resolutions. This set of rules provides, *inter alia*, for the submission of annual loan programmes in respect of semi-governmental authorities proposing to raise £100,000 or more in a year, for the consideration of such programmes in conjunction with the loan programme of the Government concerned, and for the fixing of the terms of individual semi-governmental loans coming within the scope of the annual programme.

§ 3. Commonwealth and State Public Debt Outstanding.

1. Public Debt, Annual Interest Payable and Average Rate of Interest at 30th June, 1959.—In the following table, details are given of the Commonwealth and State Public Debt, annual interest payable and average rate of interest at 30th June, 1959.

(a) See § 1, p. 857.

In some States, certain public utilities such as tramways, water supply and sewerage, harbour services, etc., are controlled by boards or trusts, which, in addition to receiving advances from the central Government, raise loans by public borrowing on their own behalf, while in other States these services are controlled by the central Government. Comparison of the debts of the States is therefore difficult, but on page 867 figures showing the aggregate debts of the States, including these local and semi-governmental authorities, are shown for the years 1938–39 and 1953–54 to 1957–58.

5. Public Debt and Interest Payable in Australian Currency.—In the foregoing tables relating to Commonwealth and State public debt, the debt outstanding in London is expressed in sterling, debt outstanding in New York and Canada is expressed in pounds converted from dollars at the rate of \$4.8665 to £1 and debt outstanding in Switzerland is expressed in pounds converted from Swiss francs at the rate of 1,000 Swiss francs = £A.102 1s. 10d. This method of showing the debt does not indicate the amount that the Australian Government would have to find to repay the debt at current rates of exchange. In the following tables, the public debt and the interest payable are shown in terms of Australian currency throughout. Debt in London, New York, Canada and Switzerland has been converted to Australian currency at the selling rate of exchange on 30th June, 1959.

30th June, 1959 ..	171,000	..	171,000

(a) Excludes Overdrafts and Internal Treasury Bills.

(ii) *Interest Rates.* (a) *London.* The rates of interest payable on Treasury Bills and Debentures in London during the following periods were: 1938-39—minimum rate, 2 per cent., maximum rate, 2½ per cent.; 1949-50 to 1950-51—minimum rate, 2 per cent., maximum rate, 2½ per cent. On 8th November, 1951, the rates were increased to—minimum rate, 2½ per cent., maximum rate, 2¾ per cent.

(b) *Australia.* The Treasury Bill rates in Australia were as follows:—1½ per cent. from 1st January, 1935; 1½ per cent. from 1st May, 1940; 1½ per cent. from 1st May, 1943; 1 per cent. from 1st March, 1945; ¾ per cent. from 1st May, 1949; 1 per cent. from 1st August, 1952.

9. *State and Municipal and Semi-governmental Authority Public Debt.*—For the reasons indicated on page 863, direct comparisons of the debts of the several States should be made with caution. The table following shows, for 1938-39 and 1953-54 to 1957-58, particulars of the debts of the States and the debts due to the public by municipal and semi-governmental authorities in each State.

STATE AND MUNICIPAL AND SEMI-GOVERNMENTAL AUTHORITY PUBLIC DEBT.

(a) Due to the public and excludes amounts due to the Central Government. Includes bank overdrafts.
(b) See § 1, p. 857.

§ 4. Commonwealth Loan Raisings.

1. **General.**—Under the Financial Agreement between the Commonwealth and the States, the Commonwealth is responsible for raising all loan moneys required either by the Commonwealth or by the State Governments. Details of loan transactions given in this section relate therefore, to all loans raised for the Commonwealth and the States.

2. **New Loans Raised, 1956-57 to 1958-59.**—(i) *Australia.* The following table shows details of new loans raised in Australia by the Commonwealth during the three years 1956-57 to 1958-59.

(a) Includes loans raised for redemption of Treasury Bills, but excludes conversion loans, loans for redemption of debt maturing in London, short-term debt and certain miscellaneous debt (see below).
(b) Special issue. For details see following paragraph.

The loans of £99,000,000, £92,000,000 and £10,000,000 raised in June, 1957, 1958 and 1959 respectively were for the purpose of fulfilling an undertaking given by the Commonwealth that the States would have access to loan funds for their works programmes up to the approved Loan Council borrowing programmes. These programmes totalled £192,000,000 in 1956-57, £200,000,000 in 1957-58 and £210,000,000 in 1958-59. Subscriptions to these special loans came from the following sources:—

SPECIAL LOANS: SOURCE OF FINANCE.

	1956-57.	1957-58.	1958-59.
	£	£	£
National Debt Commission—			
Investment of Australian currency proceeds of

Total	99,000,000	92,000,000	10,000,000

Finance for the approved Loan Council programmes from 1956-57 to 1958-59 was provided from the following sources—

LOAN COUNCIL PROGRAMME(a): SOURCE OF FINANCE.

	1956-57.	1957-58.	1958-59.
	£	£	£
Public Loans, domestic raisings, etc.	98,822,000	105,900,000	177,300,000
Oversea Loans and Special Commonwealth			
Assistance.. .. .	93,178,000	94,100,000	32,700,000
Total	192,000,000	200,000,000	210,000,000

(a) Excludes amounts provided for War Service Land Settlement; 1956-57, £7,115,000; 1957-58, £8,262,000 and for Emergency Wheat Storage, 1958-59, £6,547,000.

In addition to the new loans raised as shown in the foregoing tables and the redemption and conversion loans shown in the following section, there were other miscellaneous debt operations during 1958-59 namely:—Savings Certificates and War Savings Certificates (Five and Seven Years' Series) a decrease of £5,371,000; War Savings and Savings Stamps, a decrease of £1,000; National Savings Bonds and Stamps, a decrease of £1,000; and "Over the Counter Sales" (small amounts borrowed by the States by virtue of certain statutory rights) £3,008,000. Advance loan subscriptions in hand increased from £1,443,000 at the end of 1957-58 to £1,663,000 at the end of 1958-59.

(ii) *Special Bonds.* In October, 1958, in addition to loan No. 112, subscriptions were invited to special bonds open for continuous subscription and the cash proceeds to the 24th April, 1959, totalled £22,037,000. These bonds are redeemable at any time after 1st July, 1959, at prices commencing at par and increasing to a premium of £3 per cent. if the bonds are held to maturity at 1st January, 1966. Interest is 4 per cent. for approximately the first two years, 4½ per cent. for the next two years and 5 per cent. for the next three years. As from 25th April, 1959, continuous subscriptions were invited to Special Bonds Series "B" and subscriptions up to the end of September, 1959, totalled £12,966,000. The terms of issue of the two series of special bonds are similar except that interest for Series "B" bonds for the third year is 4 per cent. instead of 4½ per cent. Series "B" bonds are redeemable at any time after 1st April, 1960, and mature on 1st October, 1966. The maximum combined holding for each person in Series "A" and "B" bonds is £5,000.

(iii) *London.* The following table gives details of the cash loan raised in London in October, 1958:—

COMMONWEALTH NEW LOAN RAISED IN LONDON.

(a) No account has been taken of the cost of issuing the conversion loans at a discount. Exchange calculated at £A. 125.375 = £Stg. 100. (b) Debentures. (c) Treasury Bills.

(iii) *New York.* During 1946-47, four loans totalling \$128,000,000 were raised in New York to redeem loans which became due for redemption or which the Commonwealth had the option of redeeming. No further loans were raised in New York for this purpose until December, 1954. The following table shows particulars of the redemption loan raised in 1956-57. There were no loans raised for this purpose in 1957-58 and 1958-59.

COMMONWEALTH LOAN RAISED IN NEW YORK FOR REDEMPTION OF EXISTING LOANS.

(a) Converted at selling rate of exchange on 30th June, 1957, \$2.2208 = £A1.

4. *International Bank for Reconstruction and Development Loans.*—To provide dollar funds for the purchase of certain types of capital equipment and plant which were indispensable to the furtherance of development in Australia and which could be obtained only in the United States of America or Canada, the Commonwealth Government has arranged loans from the International Bank for Reconstruction and Development since August, 1950, as shown in the following table—

LOANS FROM THE INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT.

Month of Raising.	Amount.	Date Loan Fully Drawn.	Term.	Rate of Interest. (a)	Repayment—Half-Yearly Instalments.	
					From.	To.
1950—August ..	\$'000. 100,000	31.12.53	years. 25	4½	Sept., 1955	Sept., 1975

1954—March ..	54,000	30.9.55	15	4½	March, 1957	March, 1969
1955—March ..	54,500	31.12.56	15	4½	March, 1958	March, 1970
1956—November ..	(b) 9,230	31.12.58	10	4½	June, 1964	Dec., 1966
1956—December ..	50,000	31.3.59	15	4½	July, 1959	Jan., 1972

(a) There is also a commitment charge of ½ per cent. per annum on the amount of the loan not withdrawn from time to time. (b) The proceeds of this loan were advanced to Qantas Empire Airways.

The capital equipment and plant purchased from the proceeds of these loans are made available to Commonwealth and State Government departments and agencies and private firms and individuals for use in the development of Australian resources. Subject to a special import licence being obtained, the goods are imported and distributed through normal channels and payment made through the Australian banking system. Periodically, schedules of dollar payments for goods imported against loan licences are submitted to the International Bank for Reconstruction and Development. These schedules form the basis for periodical drawings by the Commonwealth against the loan. The amounts drawn are paid to the Commonwealth Bank to replace the dollar funds used in making the purchases. In return, the Commonwealth Government receives Australian currency from the Commonwealth Bank. This is paid to the Commonwealth National Debt Sinking Fund out of which the loans will subsequently be redeemed.

5. Swiss Loan.—To foster industrial development in Australia and to stimulate trade relations between the two countries, the Commonwealth Government arranged for the issue in Switzerland in November, 1953, and February, 1955, of two public loans each of 60,000,000 Swiss francs. The loans were underwritten by a Swiss banking group headed by the Swiss Bank Corporation, the Crédit Suisse and the Union Bank of Switzerland. Certain Swiss taxes connected with the issue and servicing of the loan were paid on an agreed basis by the Australian Government.

The first loan was for a period of 15 years with an option on the part of the Australian Government to repay the loan in full or in part after 12 years. The rate of interest was 4 per cent. and the issue price £99. Bondholders have the option of requiring payment either in Australian pounds or in the foreign currency equivalent of Australian pounds.

The second Swiss loan was for a period of 15 years with an option to redeem after 10 years. The rate of interest was $3\frac{1}{2}$ per cent. and the issue price £99 10s. Bonds and interest are payable only in Swiss francs.

The loans were both fully subscribed and Swiss franc proceeds, after deducting borrowing expenses, were sold by the Commonwealth Government to the Commonwealth Bank in return for an equivalent amount of Australian currency. A trust account, named the Swiss Loan Trust Account, was opened and the proceeds from the two loans were transferred to this account and were used in assisting the Loan Council borrowing programmes for the 1953–54 and 1954–55 financial years. The Swiss Loan Trust Account will also be used as a sinking fund for the loans, and, when the time comes for repayment, the trust account investments will be realized. The provisions of the National Debt Sinking Fund Act do not apply to the loans.

6. Canadian Loan.—In October, 1955, the Commonwealth Government arranged for the issue in Canada of a public loan of 15,000,000 Canadian dollars raised to assist Australia's development programme. The loan was underwritten by Wood, Gundy & Company Limited of Toronto, Canada.

The loan was for a period of 15 years with an option on the part of the Australian Government to repay the loan in full or in part at any time prior to 1st November, 1970. The rate of interest was 4 per cent. payable half-yearly and the issue price \$98.50. Bonds and interest are payable in Canadian dollars.

The loan was fully subscribed and the net Canadian dollar proceeds were sold to the Commonwealth Bank for Australian currency. A trust account, named the Canadian Loan Trust Account, was opened and the Australian currency proceeds of the loan were transferred to this account and used in assisting the Loan Council borrowing programme in 1955–56.

The Canadian Loan Trust Account will provide the necessary sinking fund payments and, when the time comes for repayment, the Trust Account investments will be realized to provide funds for that purpose. The provisions of the National Debt Sinking Fund Act do not apply to this loan.

7. Summary of Loan Transactions, 1954–55 to 1958–59.—The following table contains a summary of loan transactions on behalf of the Commonwealth and State Governments during the five years 1954–55 to 1958–59.

COMMONWEALTH LOAN TRANSACTIONS: SUMMARY.

E. TAXES ON INCOME.

NOTE.—The following section contains details of taxes on individuals and companies for the 1958-59 financial year.

1. *General.*—A description of the development of income taxes in Australia appeared in Official Year Book No. 35, page 926. Since July, 1942, the Commonwealth, under the uniform tax arrangement, has been the only authority imposing taxes on income. Taxes on income are assessed and imposed under the Income Tax and Social Services Contribution Assessment Act 1936-1959 and the Income Tax and Social Services Contribution Act 1959. The latter Act is an annual measure and its primary purpose is to declare the rates of tax and contribution payable for the financial year. The rates for the financial year are levied, in the case of individuals, on the income of that year and, in the case of companies, on the income of the preceding year. Thus tax for the financial year 1959-60 is levied on the income of individuals in 1959-60 and on the income of companies in 1958-59.

2. Present Taxes.—For individuals, a single tax known as the Income Tax and Social Services Contribution is levied. All companies are liable for primary income tax and, in addition, private companies are subject to tax on undistributed income.

3. Assessable Income.—Income taxes in Australia are levied, primarily, on all income derived from Australian sources by any person, rather than on income derived from all sources by Australian residents. Thus a non-resident is taxed on income derived in Australia, while a resident is, in general, not taxed on income other than dividends derived from overseas, if the income is taxed in the country in which it is derived.

Certain types of Australian income are exempt from tax in Australia, the more important being (i) pensions, child endowment and other payments under the Social Services Act 1947–1958 and the Tuberculosis Act 1948, (ii) income from gold-mining and uranium mining, (iii) twenty per cent. of certain mining profits, (iv) dividends paid out of exempt mining profits, and (v) income received from a scholarship, bursary or other education allowance.

No amount is included in assessable income on account of a house occupied by its owner. Profits derived from the sale of property are not assessable income if such property was not purchased with a view to resale at a profit.

Expenses incurred in earning income, certain subscriptions to business associations, and trade union dues, are allowable deductions. Losses incurred in previous years may be carried forward as a deduction.

Because of uncongenial climatic conditions, isolation, and high cost of living, taxpayers living in certain areas are allowed an additional deduction. Two zones have been prescribed, and the allowances are:—Zone A, £270 plus an amount equal to one half of the total deductions allowable to the taxpayer for the maintenance of dependants; and Zone B, £45 plus an amount equal to one twelfth of the deductions allowable to the taxpayer for the maintenance of dependants. A deduction equal to the deduction allowed to residents of Zone A is also allowed to members of the defence forces serving for more than one half of the year of income at declared localities outside Australia.

Income Tax and Social Services Contribution is levied on the taxable income remaining after making these deductions and the concessional deductions to which reference is made in the following paragraph.

4. Concessional Deductions.—Concessional allowances for dependants, medical expenses, life assurance and superannuation contributions, etc., are made by way of a deduction from income. The maximum deduction allowed for each dependant, for a parent or parent-in-law, or for a housekeeper employed by the taxpayer for the financial year 1959–60 is shown in the following table.

CONCESSIONAL DEDUCTIONS FOR DEPENDANTS, ETC.(a)

(£.)

Dependant, etc. (Resident).	Maximum Deduction.
Spouse	143
Daughter-housekeeper (b)	143
Housekeeper (b) having care of taxpayer's children under 16 years of age	143
Parent or Parent-in-law	143
One child under 16 years of age	91
Other children under 16 years of age	65
Invalid relative(c)	91
Child 16 to 21 years receiving full-time education (d)	91

(a) These deductions are allowed only if the dependant, parent or parent-in-law is a resident of Australia. If the dependant is maintained for part only of the year a partial deduction is allowed. (b) Of a widower or widow. (c) Child, step-child, brother or sister over 16 years of age. The amount of the deduction is reduced by any invalid pension received. (d) The amount of the deduction is reduced by the value of any assistance provided by the Commonwealth or a State.

When the dependant or person maintained derives separate income, the amount of the concessional deduction allowable is reduced as follows:—

In the case of a spouse or daughter-housekeeper, by £2 for every £1 by which the separate net income exceeds £65; for each parent or parent-in-law maintained, by £1 for each £1 of separate income; and for each dependent child or invalid relative, by £2 for every £1 by which the separate net income exceeds £52.

For the 1959–60 financial year, medical expenses paid by a taxpayer who is a resident, in respect of himself or dependants, including children under 21 years of age, up to £150 for each person, are allowed as a concessional deduction. Medical expenses include payments made to a legally qualified medical practitioner, nurse or chemist, or to a hospital, in respect of an illness or operation, payments for dental services not exceeding £30 for any one person, payment for therapeutic treatment and eye tests, expenditure on medical or surgical appliances, artificial limbs or eyes, hearing aids and spectacles, and the remuneration of an attendant of a person who is blind or confined to bed or invalid chair.

Other concessional deductions allowed to resident taxpayers include, (i) payments of life, etc., insurance premiums and contributions to superannuation funds and friendly societies, not exceeding an aggregate of £400, (ii) payments to medical or hospital benefits funds, (iii) funeral expenses of a dependant not exceeding £30 and (iv) expenditure incurred for the full-time education of children or dependants who are less than 21 years of age (maximum £100 per child or dependant).

In addition to concessional deductions, all taxpayers (residents and non-residents) are allowed a deduction from income of rates and taxes on land which are annually assessed, gifts to charitable, benevolent or patriotic funds and one-third of amounts paid as calls to certain mining, forestry and oil-prospecting companies. Resident taxpayers only are allowed a deduction from income of the full amount paid as calls and as application and allotment moneys to certain companies engaged in the search for oil in Australia and New Guinea.

5. Effective Exemption from Tax.—For the financial years 1950–51 to 1959–60, resident taxpayers without dependants were exempt from Income Tax and Social Services Contribution if their income did not exceed £104. The effect of the deductions for dependants was to exempt taxpayers up to the incomes shown hereunder.

RESIDENT TAXPAYERS: EFFECTIVE EXEMPTIONS FROM TAX.
(£.)

Taxpayer with—	Income Tax and Social Services Contribution— Financial Years 1950–51 to 1952–53.	Income Tax and Social Services Contribution— Financial Years 1953–54 to 1956–57.	Income Tax and Social Services Contribution— Financial Years 1957–58 to 1959–60.
No dependants	104	104	104
Wife	208	234	247
Wife and one child	286	312	338
„ „ two children	338	364	403
„ „ three children	390	416	468
„ „ four children	442	468	533

For the 1959–60 financial year, an aged person (i.e., a man who has attained the age of 65 years or a woman who has attained the age of 60 years) is exempt from Income Tax and Social Services Contribution if his net income (i.e., gross income less expenses of earning that income) does not exceed £429. A married couple both of whom qualify by age for the concession, are exempt from tax if their combined net incomes do not exceed £858.

6. Rates of Income Tax and Social Services Contribution on Individuals.—The following table shows the rates of income tax and social services contribution for the financial years 1953–54 to 1959–60.

(a) For the 1959-60 financial year, provision was made for a rebate to reduce by 5 per cent. the income tax and social services contribution otherwise payable.

For primary producers, the rate of Income Tax and Social Services Contribution for the current year is determined by the average of the taxable incomes for the five years up to and including the current year. A taxpayer may elect not to have these averaging provisions applied to his assessment, but the election once made, is irrevocable. The application of the averaging provisions is limited to that part of the taxable income which does not exceed £4,000, and when the taxable income exceeds £4,000, the balance is taxed at the ordinary rates applicable to that part. When the taxable income is less than £4,000, the rate of tax for averaging purposes is limited to the rate on a taxable income of £4,000.

Commencing with 1953-54, the taxable income, including any abnormal receipts, of actors, artists, composers and inventors, is taxed at the rate appropriate to the normal taxable income plus one-third of the abnormal receipts.

Interest on Commonwealth Loans issued prior to 1st January, 1940, is subject to the condition that it shall not be taxed at rates higher than those for 1930-31. Interest on Commonwealth Loans issued after 1st January, 1940, and interest on certain State semi-governmental loans issued free of State income tax are subject to a rebate of 2s. for each £1 included in the taxable income.

The minimum amount of Income Tax and Social Services Contribution payable is 10s. and the amounts payable and rebates are calculated to the nearest shilling.

7. **The Income Tax (International Agreements) Act 1953.**—This Act provided for relief from double taxation of incomes flowing between Australia and the United States of America. It also provided similar relief in respect of the United Kingdom, which had been covered by the Income Tax Assessment Act since 1947.

8. **Taxes on Specified Incomes.**—The following table shows the Income Tax and Social Services Contribution payable by taxpayers, with various incomes and numbers of dependants, on income derived in each year from 1952–53 to 1959–60:—

9. Pay-as-you-earn.—(a) *Salary and Wage Earners.* Salary and wage earners are subject to instalment deductions for payment of tax at current rates out of weekly (or fortnightly) earnings. Employers are required to deduct tax and contribution from each payment of wages or salary to an employee at the appropriate rate, in accordance with a prescribed instalment scale. This scale shows the amount to be deducted according to the income and number of dependants of the employee.

Under the group scheme of deduction, which covers most employers of more than ten persons, the amount deducted is remitted to the Taxation Department, and after 30th June each year each employee is given a group certificate by his employer showing the amount of deductions made during the year. This certificate is forwarded to the Taxation Department with the employee's return of income for the year. If the tax assessed on the basis of this return is less than the amount shown on the group certificate, a refund is forwarded to the employee with his assessment. If the tax assessed is greater than the amount shown on the group certificate, the employee is required to pay the balance.

Under the stamp scheme used by small employers, a stamp deduction sheet in two parts is used. Each four weeks, the employer purchases stamps (also in two parts) for the amount of the deductions made each pay day and sticks one part on each half of the sheet. At the end of the year, the employer gives the employee one half of the sheet and sends the other half to the Taxation Department. The employee's half is then used in the same way as a group certificate.

(b) *Taxpayers with Income other than Salary and Wages.* These taxpayers pay provisional tax in respect of income other than salary and wages. Collection of tax and contribution for the current year is made at the same time as collection and assessment for the previous year is adjusted. The notice of assessment shows an amount of provisional tax and contribution for the current year. This provisional amount is an approximation to the tax and contribution which will be payable after the return of income for the current year has been lodged. It is ascertained by assuming that the income of the current year will be the same as that for the previous year (for which a return has already been lodged) but the rates for the current year are applied to the income and not the rates for the year in which it was derived. The assessment notice shows the provisional tax and contribution paid in the previous year as a credit against the tax and contribution assessed on the basis of the return for that year. On receipt of his assessment, the taxpayer may elect to substitute his own estimate of income for the current year and pay tax on the basis of this estimate. To protect the revenue, a penalty is imposed if the taxpayer elects to pay provisional tax on an estimate of income more than 20 per cent. lower than the income of the previous year and he underestimates his income by more than 20 per cent.

An employee with income of £100 or more from sources other than salaries or wages is required to pay provisional tax in respect of that income.

10. Lodgment of Returns and Assessment of Tax.—All persons with assessable income in excess of £104 are required to lodge returns by the 31st July each year (31st August for business incomes). The Income Tax and Social Services Contribution payable is assessed, and assessment notices showing the amounts payable are issued, during the year following the year of income (in most cases from September to June following the lodgment of the return). The approximate amount payable, however, has already been collected during the income year—from employees by deductions from wages and from non-employees by a provisional tax. The amount shown on the assessment notice is therefore adjusted against the amount already paid and any difference either collected or refunded.

11. Company Income Taxes.—(i) *General.* For taxation purposes, companies are divided into two main groups—public and private. A private company is defined as a company in which all the issued shares are held by not more than twenty persons or which is capable of being controlled by not more than seven persons; and which is not a company in which the public is substantially interested or a subsidiary of a public company. All other companies are regarded as public companies. Both public and private companies pay primary Income Tax and Social Services Contribution assessed on a taxable income ascertained on the same principles as for individuals.

Dividends received are assessable income, but resident companies receive a rebate at the average rate on the amount of dividends included in the taxable income. This rebate is not allowed to non-resident companies.

(ii) *Rates of Tax.* The rates of Primary Tax, in the case of public companies, and Primary and Additional Tax for private companies, for the financial years 1953-54 to 1959-60 are shown in the table below.

Super Tax and Undistributed Income Tax ceased to be levied on public companies in the 1951-52 financial year and Additional Income Tax and Social Services Contribution ceased in the 1953-54 financial year. For details, *see* Official Year Book No. 39, page 846 and No. 40, page 743.

RATES OF TAX: COMPANIES, 1953-54 TO 1959-60 FINANCIAL YEARS.
(Pence per £.)

Type of Company.	Rate of Income Tax and Social Services Contribution—						Rate of Additional Tax on Undistributed Income.
	1953-54 to 1955-56.		1956-57.		1957-58 to 1959-60.		1953-54 to 1959-60.
	Up to £5,000.	On Remainder of Taxable Income.	Up to £5,000.	On Remainder of Taxable Income.	Up to £5,000.	On Remainder of Taxable Income.	Undistributed Amount—Additional Tax.

Interest paid to a Non-Resident(e)	84	84	96	96	90	90	..

(a) Incomes not exceeding £104 are exempt from tax. (b) Where the taxable income does not exceed £208 (1953-54 to 1955-56), £228 (1956-57) or £231 (1957-58 to 1959-60) the tax may not exceed one half (1953-54 to 1955-56, 1957-58 to 1959-60) or eleven-twentieths (1956-57) of the amount by which the taxable income exceeds £104. (c) The rate of 72d. (1953-54 to 1955-56), 84d. (1956-57) or 78d. (1957-58 to 1959-60) is levied on the amount by which the £5,000 exceeds the mutual income. (d) For non-resident companies dividends included in this part of the taxable income are taxed at 60d. (1953-54 to 1955-56), 72d. (1956-57) and 66d. per £1 (1957-58 to 1959-60). (A resident company is allowed a rebate of tax in respect of dividends received.) (e) If the non-resident is not a company, tax is paid only on income in excess of £104.

A private company incurs liability for additional tax on its undistributed income if it fails to make a sufficient distribution of income within a specified period after the close of the year of income. The tax is levied on the undistributed amount which, for practical purposes, is the taxable income less—

- (a) Primary income tax and social services contribution payable;
- (b) Retention allowance (i.e., the proportion of the reduced distributable income which a company may retain without incurring liability for undistributed income tax); and
- (c) Certain dividends paid by the company.

For the financial years 1953-54 to 1958-59, the retention allowance is the following proportion of the reduced distributable income:—

- On the first £1,000 or part, 50 per cent.
- On the next £1,000 or part, 40 per cent.
- On the next £1,000 or part, 35 per cent.
- On the next £1,000 or part, 30 per cent.
- On the balance, 25 per cent., and
- Ten per cent. of distributable income from property, except dividends from other private companies.

For 1959-60, the minimum retention allowance in relation to business profits has been increased to 35 per cent. The new rates are as follows:—

- On the first £1,000 or part, 50 per cent.
- On the next £1,000 or part, 40 per cent.
- On the balance, 35 per cent.

The retention allowance in respect of distributable income from property, except dividends from other private companies, is unchanged at 10 per cent.

For the financial years 1953-54 to 1959-60, the reduced distributable income is calculated by deducting from the taxable income the primary tax payable and the amount of all property income included in taxable income. The additional tax on undistributed income was imposed at a flat rate of 10s. in the £1 on the undistributed amount.

12. Yield of Income Taxes.—(i) *Collections from Income Taxes.* The following table shows the collections of taxes imposed on income for the years 1938-39 and 1954-55 to 1958-59:—

INCOME TAX COLLECTIONS.

(£'000.)

Year.	Total.		
	Commonwealth.(a)	State.(b)	Total.
1938-39	11,883	29,796	41,679
1954-55	532,916	52	532,968
1955-56	573,988	74	574,062
1956-57	620,298	23	620,321
1957-58	650,419	33	650,452
1958-59	608,660	15	608,675

(a) Includes Social Services Contribution, War Time (Company) Tax, Super Tax, Undistributed Profits Tax and Wool Deduction. (b) Amounts shown for years other than 1938-39 are arrears of State Income Taxes.

(ii) *Commonwealth Income Tax Assessed.* The amounts of Commonwealth Taxes assessed on the income of recent years are shown in the following table. The amounts are shown under the year in which most of the assessments were made, i.e., the year following the income year. Income taxes assessed on income for past years and for the years shown after the close of the normal assessing period, are not included.

COMMONWEALTH INCOME TAXES ASSESSED.

(a) Assessments in respect of 1956-57 incomes issued to 31st December, 1958. Assessments issued after that date are not included. (b) Taxable income is the income remaining after deducting from assessable income all allowable deductions. (c) Excludes additional tax levied on the undistributed income of Private Companies £2,512,000.

(iv) *Commonwealth Income Tax on Residents—Grades of Income.* Individual income taxes assessed on residents are distributed according to grades of actual income in the following table. The year shown in each case refers to the year in which assessment was made, i.e., the year following the income year. The figures relate only to assessments made on the income of the previous year during the normal assessing period. Assessments issued after the normal assessing period are not included.

(a) Actual income is defined briefly as "Gross Income including exempt income less expenses incurred in gaining that income". (b) For the years prior to 1956-57 the grades of actual income were £105-200, 201-300, 301-400, etc. (c) Grades for year 1954-55 were £1,001-£1,250 and £1,251-£1,500.

CHAPTER XXII.

AGRICULTURAL PRODUCTION.

NOTE.—Values of Australian oversea trade shown throughout this chapter are expressed as £A. f.o.b. port of shipment, except where otherwise indicated.

§ 1. Introductory.

In general, statistics in this chapter relating to agricultural production are derived from "census" returns supplied by approximately 250,000 farmers who utilize one acre or more of land for agricultural or pastoral purposes and the latest figures available are those for the year 1958–59. The returns are collected on a substantially uniform basis in all States at 31st March, each year, and relate to areas sown and crops produced in the previous twelve months. Where harvests are not completed by March (e.g. potatoes), provision is made in some States for a special collection after the harvest is completed and in others for the inclusion of the total estimated yield expected from the complete harvest. In cases where additional data are available from marketing authorities or other sources, these are used in conjunction with the "census" returns. The statistics published in this chapter are therefore shown in "agricultural" years. For most purposes, there will be little error involved in considering them as applying to years ending on 30th June.

§ 2. Progress of Agriculture.

1. *Early Records.*—In an "*Account of Live Stock and Ground under Crop in New South Wales, 19th August, 1797*", Governor Hunter gives the acreage of crops as follows:—Wheat, 3,361 acres; maize, 1,527 acres; barley, 26 acres; potatoes, 11 acres; and vines, 8 acres.

The following details of crops were collected in 1808:—Wheat, 6,874 acres; maize, 3,389 acres; barley, 544 acres; oats, 92 acres; peas and beans, 100 acres; potatoes, 301 acres; turnips, 13 acres; orchards, 546 acres; and flax and hemp, 37 acres.

A brief reference to the attempts at cultivation by the first settlers in New South Wales and to the discovery of suitable agricultural land on the Parramatta and Hawkesbury Rivers prior to the year 1813 and west of the Blue Mountains thereafter is contained in early issues of the Official Year Book. (*See No. 22, p. 670.*)

By the year 1850, the area of crops had increased to 491,000 acres, of which 198,000 acres were cultivated in what is now the State of New South Wales, and 169,000 acres in Tasmania. At the end of 1850, the area under cultivation in Victoria, which was then the Port Phillip District of New South Wales, was 52,190 acres.

The gold discoveries of 1851 and subsequent years had at first a very disturbing effect on agricultural progress, the area of crops declining from 491,000 acres in 1850 to 458,000 acres in 1854. The demand for agricultural products occasioned by the large influx of population was, however, soon reflected in the increased area cultivated, for at the end of 1858 the land under crop in Australia exceeded a million acres.

2. *Progress of Cultivation.*—The following table shows the area of crops in each of the States and Territories of Australia at decennial intervals since 1860–61 and during each of the eleven seasons 1948–49 to 1958–59. On page 889 there is a graph showing the area of crops in Australia from 1900–01 onward.

1958-59	6,820	4,791	2,852	4,147	6,135	339	1	8	25,093

(a) Not available.

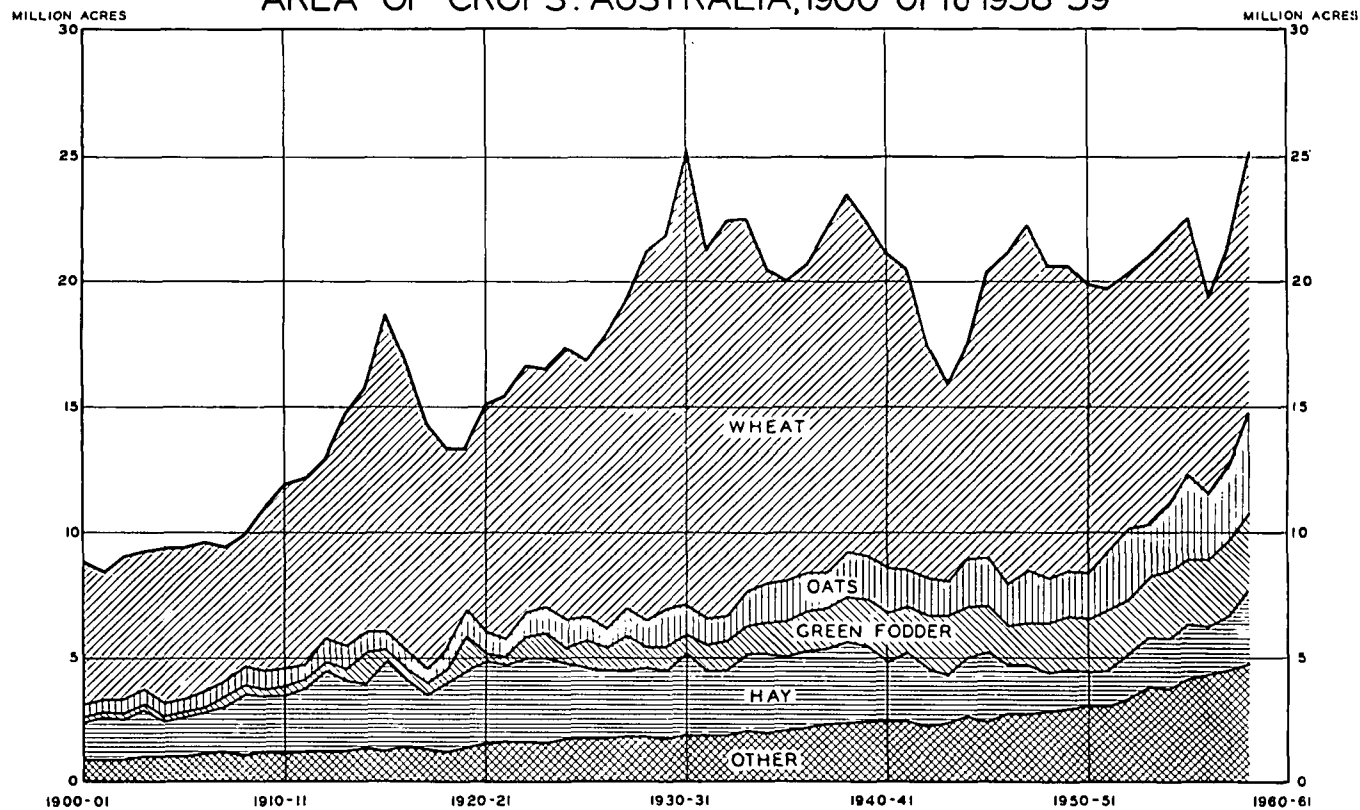

The progress of agriculture was practically uninterrupted from 1860-61 to 1915-16, when, as the result of a special effort to raise wheat during the 1914-18 War, 18.5 million acres were cultivated in Australia. There was a temporary set back in later war years but after the termination of hostilities the area continued to expand and rose steadily to the record area of 25.2 million acres in 1930-31. Thereafter, the slump in wheat prices seriously depressed the agricultural industry and the area of crops receded to just under 20 million acres in 1935-36.

By 1938-39, the industry had recovered from the depression and the total area under cultivation reached the high level of 23.5 million acres. Thereafter, as a result of war-time man-power shortages and shipping difficulties, the area declined to less than 16 million acres in 1943-44. After 1943-44, production gradually increased again until, in 1947-48, 22.3 million acres were sown to crops. This upward trend was reversed after 1948-49, largely because, as a result of the high prices of wool, many primary producers transferred from agricultural to pastoral production. In recent years, the area sown increased from 19.7 million acres in 1951-52 to 22.5 million acres in 1955-56, but in 1956-57, due largely to excessively wet conditions in the eastern States the area sown dropped to 19.4 million acres. By 1958-59, the area had increased again to 25.1 million acres, an acreage exceeded only once previously, in 1930-31. As the area under wheat in Australia constitutes a large proportion of the total area cropped (49 per cent. during the ten years ended 1958-59), fluctuations in the latter follow broadly the same pattern as changes in wheat areas.

3. **Area under Sown Pastures.**—In all the States, there are considerable areas of grasses, mainly sown on land from which scrub has been cleared or on land which it is desired to rest from cultivation. These areas, which are not included in "area of crops", have expanded from about 5.3 million acres in 1929-30 to about 34.1 million acres in 1958-59.

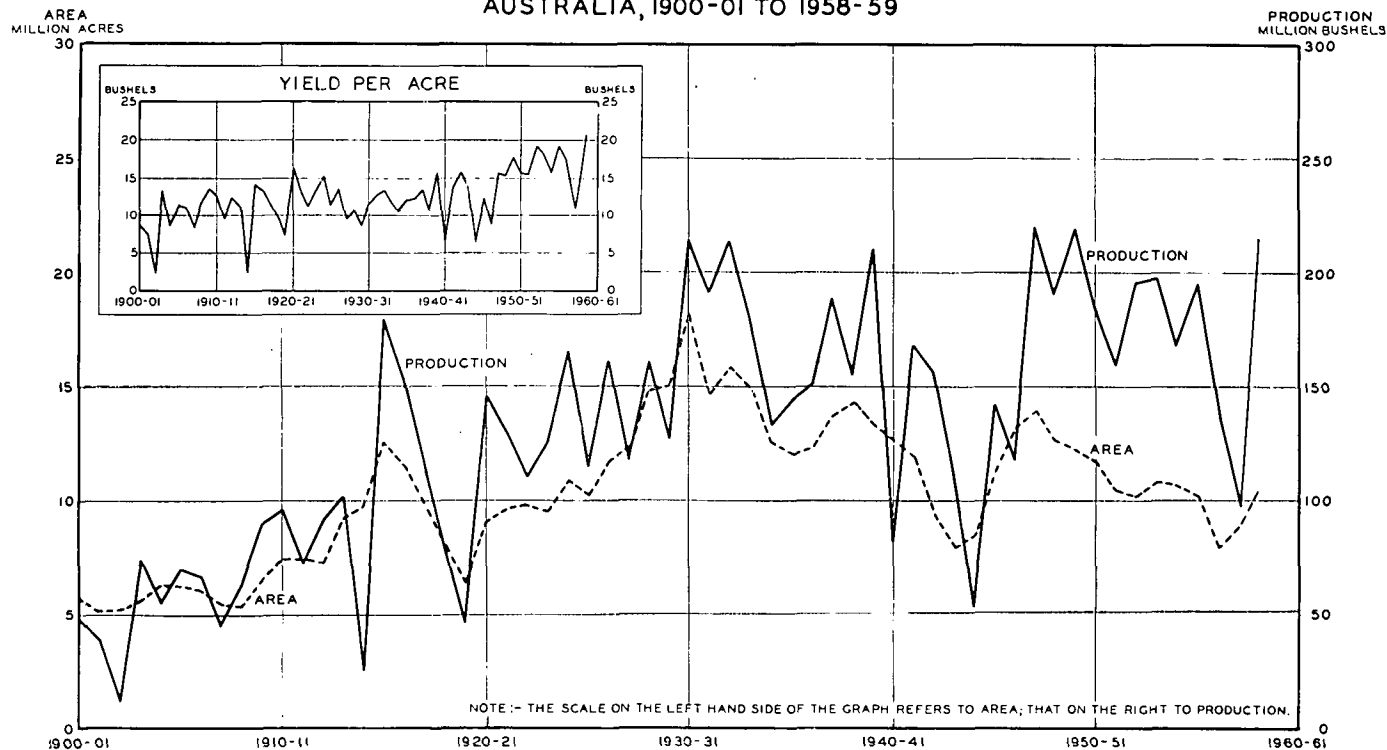

4. **Australian Agricultural Council.**—Arising out of a conference of Commonwealth and State Ministers on agricultural and marketing matters, held at Canberra in December, 1934, a permanent organization known as the Australian Agricultural Council was formed. The Council consists of the Commonwealth Ministers for Primary Industry and for Territories and the State Ministers of Agriculture, with power to co-opt the services of other Commonwealth and State Ministers as required. The principal functions of the Council are:—(i) the promotion of the welfare and development of agricultural industries generally; (ii) exchange of information on agricultural production and marketing; (iii) the improvement

of the quality of agricultural products and the maintenance of high grade standards; (iv) to ensure, as far as possible, balance between production and available markets; and (v) organized marketing, etc.

In addition, a permanent Standing Committee on Agriculture was formed to advise the Council, to secure co-operation and co-ordination in agricultural research, to advise State and Commonwealth Governments on the initiation and development of agricultural research, and to secure co-operation between all Governments in respect of quarantine measures against pests and diseases of plants and animals.

§ 3. Distribution, Production and Value of Crops.

1. Area of Crops in States and Territories.—The following table shows the areas in the several States, the Northern Territory and the Australian Capital Territory of each of the crops for the season 1958–59.

(a) Not available for publication. Included in "All other Crops", except in respect of rice in the Northern Territory which is excluded from "Total Area". (b) Incomplete. See footnotes to individual States. (c) Excludes lucerne and oats for grazing. (d) Excludes lucerne for grazing.

2. **Relative Areas of Crops in States and Territories.**—The proportion of each of the major crops cultivated in the various States and Territories to the total area of crops for the season 1958–59 is shown in the next table. In three of the States, namely New South Wales, Victoria and Western Australia, wheat-growing for grain is by far the most extensive crop. In Queensland and South Australia it is also the main crop but in the former State it is closely followed by green fodder and in the latter State by barley for grain. In Tasmania, hay and green fodder crops predominate.

As pointed out previously, wheat is the main crop in Australia, the area thereof, for grain only, representing 41 per cent. of the total area of crops in 1958–59.

RELATIVE AREAS OF CROPS, 1958-59.
(Per cent.)

4. **Size Classification of Principal Crops.**—A special series of tabulations relating to rural holdings in Australia was compiled for 1955–56 and published in full detail in a series of mimeographed bulletins, *Size Classification of Rural Holdings, 1955–56*. Condensed tables also appear in the bulletin *Primary Industries—Part I.—Rural Industries, No. 51*. The tables show a classification by size (area) of holding and size (area) of crop for wheat, oats, barley, sugar-cane, tobacco, potatoes, other vegetables for human consumption, vineyards, and orchard and non-orchard fruit.

5. **Weights and Measures.**—Details of the weights and measures used in recording production of agricultural commodities appear in the introduction to the bulletin *Primary Industries—Part I.—Rural Industries*.

6. **Production of Crops in States and Territories.**—The following table shows production of crops in the various States and Territories for the season 1958–59.

Total Gross Value	339,635	384,937	352,148	340,846	459,857

(a) Includes amounts paid as bounty, relief, etc.

(b) Incomplete, excludes Northern Territory.

(c) Incomplete, excludes Western Australia.

10. Value of Production and Indexes of Price and Quantum of Production.—(i) *Gross and Net Values*, 1958-59. Values of agricultural production for each State are shown for 1958-59 in the following table. A more detailed reference to the value of production of agriculture and other industries in Australia as well as a brief explanation of the terms used will be found in Chapter XXX.—Miscellaneous.

In computing the net value of production, no deduction has been made for the cost of maintenance of farm buildings and fences, nor for the depreciation of farm plant; consequently, the figures are overstated to that extent.

GROSS, FARM AND NET VALUES OF AGRICULTURAL PRODUCTION, 1958-59.

(£'000.)

State.	Gross Production valued at Principal Markets.	Marketing Costs.	Gross Production valued at Farm.	Value of Materials Used in Process of Production.		Net value of Production. (a)
				Seed used and Fodder for Farm Stock.	Value of other Materials used.	
New South Wales	114,599	24,795	89,804	3,824	(b) 3,508	82,472
Victoria	101,058	15,607	85,451	5,349	6,441	73,661
Queensland	95,655	11,577	84,078	3,246	12,116	68,716

(a) No deduction has been made for depreciation and maintenance.

(iii) *Indexes of Quantum and Price of Agricultural Production.* Indexes of quantum and price of agricultural production are shown in the following table. The quantum indexes relate to gross output of farm products valued at constant prices. The quantities of each farm product produced each year have been re-valued at the unit gross value for the period 1936-37 to 1938-39. The price indexes relate to average "prices" of farm products realized at the principal markets of Australia. Average quantities of each product marketed in the period 1946-47 to 1950-51 have been used as fixed weights. Further details on weights used, etc., are to be found in Chapter XXX.—Miscellaneous.

INDEXES OF QUANTUM(a) AND PRICE OF AGRICULTURAL PRODUCTION (Base : Average 3 years ended June, 1939 = 100.)

Particulars.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59
Quantum Produced—					
Wheat	102	119	82	59	131
Other Crops	131	144	144	141	187
<i>Total, All Crops</i>	<i>120</i>	<i>134</i>	<i>120</i>	<i>109</i>	<i>165</i>
Total per Head of Population	91	99	86	77	114
Price—					
Wheat	319	319	347	339	337
Other Crops	314	339	327	333	310
<i>Total, All Crops</i>	<i>316</i>	<i>330</i>	<i>336</i>	<i>336</i>	<i>322</i>

(a) Indexes of value at constant prices, i.e. quantities revalued at average unit values of the base years (1936-37 to 1938-39).

§ 4. Wheat.

1. *Royal Commission on the Wheat Industry.*—A Royal Commission was appointed in January, 1934, to inquire into and report upon the economic condition of the industries of growing, handling and marketing wheat, and the manufacturing, distributing and selling of flour and bread. A searching inquiry was made by the Commission and the results of its investigations were submitted in a series of five reports. The first and second reports covered the wheat-growing industry, the third that of baking, the fourth the flour-milling industry, while the fifth, completed in February, 1936, dealt with the history of the Commission's investigations and traversed the principal recommendations submitted.

2. **Licensing of Areas Sown to Wheat, and Acreages Sown.**—Details of the operations of the Wheat Stabilization Board in licensing wheat growing during the seasons 1941–42 to 1948–49 will be found in Official Year Book No. 38, pages 940–41. The Board ceased to function on 31st December, 1948.

3. **Legislation relating to Wheat Industry.**—(i) *Stabilized Marketing.* A detailed survey of legislation relating to stabilization of the wheat industry, including controls exercised during the 1914–18 and 1939–45 Wars and legislation establishing the Wheat Stabilization Plan in 1948, is given in the Appendix to Official Year Book No. 37, pages 1295–99.

(ii) *The Australian Wheat Board.* The Australian Wheat Board was constituted in September, 1939, under National Security (Wheat Acquisition) Regulations to purchase, sell, or dispose of, wheat or wheat products, manage and control all matters connected with the handling, storage, protection, shipment, etc. of wheat acquired, and such other matters as were necessary to give effect to the regulations.

The Board was reconstituted for five years, with similar powers, under the Commonwealth Wheat Stabilization Act 1948, to administer the stabilization plan. The new Board commenced to function on 18th December, 1948. The Board has been continued in existence by the Commonwealth Wheat Industry Stabilization Acts of 1954 and 1958 for the purpose of administering the second and third five-year stabilization plans.

(iii) *Wheat Stabilization Plans (a) 1947–48 to 1952–53.* Details of the Wheat Stabilization Plan which operated during the seasons 1947–48 to 1952–53 inclusive were published in Official Year Book No. 40, pages 841 and 842, and previous issues.

(b) *1953–54 to 1957–58.* Details of the plan which operated during the seasons 1953–54 to 1957–58 inclusive were published in Official Year Book No. 44, page 861, and previous issues.

(c) *1958–59 to 1962–63.* Following negotiations during 1958, a new wheat industry stabilization plan was enacted by the Commonwealth and the States towards the end of that year. The new plan follows the lines of the two earlier ones. Details of the plan are as follows:—

- (i) *Period of the Plan.* The plan will operate for five years. It will commence with the 1958–59 wheat crop and will end with the marketing of the 1962–63 crop.
- (ii) *Commonwealth Guarantee.* The Commonwealth will guarantee a return of 14s. 6d. a bushel to growers on up to 100 million bushels of wheat exported from the crop in the first year of the plan. The guaranteed return of 14s. 6d. is based on the findings of the recent survey of the economic structure of the wheat industry conducted by the Bureau of Agricultural Economics. It will be adjusted in each of the following years of the plan on up to 100 million bushels in accordance with the movements in costs based on a cost index established from the survey. The first two five-year Wheat Stabilization Plans each guaranteed a similar quantity of 100 million bushels exported.
- (iii) *Australian Wheat Board.* The Australian Wheat Board will be maintained as the sole constituted authority for the marketing of wheat within Australia and for the marketing of wheat and flour for export from Australia for the period of the plan.
- (iv) *Stabilization Fund*—
 - (a) *Export Tax.* A tax will be collected on wheat exported which will be equivalent to the excess of the returns from export sales over the guaranteed return. However, the maximum rate of export tax will be 1s. 6d. a bushel.
 - (b) *Size of Fund.* The ceiling of the Stabilization Fund is established at £20 million; any excess beyond this figure will be returned to growers on the “first-in-first-out” principle.
 - (c) *Balance in Present Wheat Stabilization Fund.* The balance remaining in the Fund at the termination of the present plan will be carried forward to the new plan as the nucleus of a new stabilization fund.
 - (d) *Use of the Stabilization Fund.* When the average export realizations fall below the guaranteed return, the deficiency will be made up first by drawing upon the stabilization fund in respect of up to 100 million bushels of wheat from each crop. When the fund is exhausted, the Commonwealth will meet its obligations under the guarantee.

- (v) *Home Consumption Price.* The home consumption base price for 1958–59, the first year of the plan, has been established as 14s. 6d. a bushel, bulk basis, f.o.r. ports plus 2d. a bushel loading to cover the cost of transporting wheat to Tasmania as outlined in (vi) below. There is provision in the plan for annual adjustments in the following years in accordance with the guaranteed price as outlined in (ii) above.
- (vi) *Freight on Wheat to Tasmania.* Provision is made for a loading on the price of all wheat sold for consumption in Australia to the extent necessary to cover the cost of transporting wheat from the mainland to Tasmania in each season of the plan.
- (vii) *Premium on Western Australian Wheat.* A premium will be paid from export realizations on wheat grown in Western Australia and exported from that State in recognition of the natural freight advantage enjoyed by Western Australia owing to its proximity to the principal overseas markets for wheat. The premium will be 3d. a bushel.

By agreement between the parties concerned, the Australian Wheat Growers' Federation, the States and the Commonwealth, a poll of growers as to acceptance of the plan was not considered necessary. The earlier plans had been approved by polls of growers.

The cost of production of wheat, which for the first season of the plan, 1958–59, was fixed at 14s. 6d. a bushel by the legislation, rose to 14s. 10d. a bushel for the 1959–60 season. The guaranteed price for the 1959–60 season was, therefore, also 14s. 10d. a bushel, while the home consumption price, including a loading of 2d. a bushel to cover costs of shipment of wheat to Tasmania, became 15s. 0d. a bushel.

(iv) *Wheat Industry Research.* In 1957, the Commonwealth Parliament passed legislation providing for a levy of a farthing a bushel on wheat handled by the Australian Wheat Board. This money, contributed by the growers, is to be spent by the Wheat Research Committees set up in the wheat growing States. These Committees, which consist of representatives of wheatgrowers, universities and State Departments of Agriculture, also received a total of £284,000 under the provisions of the Wheat Acquisition (Undistributed Moneys) Act 1958.

The Commonwealth Government has undertaken to supply additional funds for research (with a maximum of £1 for £1 against the growers' contribution) and has set up the Wheat Industry Research Council to make recommendations on the appropriate expenditure of the Commonwealth contribution.

The Council at its inaugural meeting in February, 1958, considered that possible avenues of research would include the breeding of better varieties, cereal chemistry, soil fertility, mechanization, the industry's cost structure and marketing problems.

The Council and the State Committees have incurred an estimated expenditure of £398,064 up to the end of June, 1959, including grants to the Commonwealth Scientific and Industrial Research Organization, State Departments of Agriculture, Universities and Agricultural Colleges.

4. *Marketing of Wheat.*—(i) *Wheat Acquired and Disposed of.* (a) *Wheat Acquired.* Particulars of wheat acquired by the Australian Wheat Board from the 1954–55 to 1958–59 harvests are shown in the following table:—

AUSTRALIAN WHEAT BOARD : WHEAT ACQUIRED, 1954-55 TO 1958-59.
(⁰⁰⁰ Bushels.)

Pool.	Harvest.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	Australia.
18 1954–55	32,385	46,431	14,605	28,636	30,628	65	152,750
19 1955–56	51,789	39,079	14,098	26,107	49,649	39	180,761
20 1956–57	24,014	32,931	5,837	29,154	28,171	22	120,129
21 1957–58	4,617	29,547	5,247	12,535	29,306	74	81,326
22 1958–59	60,001	41,216	15,206	29,548	53,348	82	199,401

(b) *Wheat Disposal.* Details relating to the disposal of wheat during the years ended 31 November, 1955 to 1959, are shown in the following table.

AUSTRALIAN WHEAT BOARD : DISPOSAL OF WHEAT, 1955 TO 1959.(a)
(^{'000 Bushels.})

Particulars.	1955.	1956.	1957.	1958.	1959.
Sold for export as wheat	63,171	95,399	66,972	34,399	70,940
Sold for export as flour (b)	34,024	34,950	32,334	16,868	25,258
Sold for local consumption as flour	38,012	39,832	41,162	39,213	40,174
Sold for other purposes	18,560	17,090	21,459	16,894	13,484

(a) Years ended 30th November.
exported.

(b) Includes wheat equivalent of manufactured wheat products

(ii) *Finance.* The Wheat Acquisition Regulations empowered the Minister to arrange with the Commonwealth Bank for advances to the Board, the advances being guaranteed by the Commonwealth Government. The Wheat Industry Stabilization Act 1948 included similar provisions for advances to the reconstituted Board established under that Act and these provisions have been continued in the subsequent legislation.

AUSTRALIAN WHEAT BOARD : FINANCIAL OPERATIONS, POOLS Nos. 18 to 22.
(£'000.)

(e) Includes £1,589,000 paid to Wheat Prices Stabilization Fund and £125,000 to Wheat Industry Research Fund. (f) Subject to additional £398,000 withdrawn from Wheat Prices Stabilization Fund and payment of £85,000 to Wheat Industry Research Fund. (g) Subject to additional £7,203,000 withdrawn from Wheat Prices Stabilization Fund and payment of £206,000 to Wheat Industry Research Fund.

NOTE.—Details of earlier pools will be found in previous issues of the Year Book.

(iii) *Advances to Growers.* Each year the size of the first advance to growers is announced by the Minister for Primary Industry before the commencement of the season. Additional payments are made as sufficient funds become available to the Board from sales realizations. Details of advances made to wheat growers in respect of the various pools are published in *Statistical Bulletin: The Wheat Industry, Australia*, last issued in March, 1960.

(iv) *Stabilization Fund.* Particulars of the most recent legislative provisions for this fund are given in para. 3 (iv) on page 899.

Amounts of £9,160,433 (equivalent to 1s. 5.4d. a bushel on all wheat exported) were paid into the Stabilization Fund from the Export Charge on exports from the 1953-54 harvest and £1,588,868 (equivalent to 6.716d. a bushel) from the 1956-57 crop. There were withdrawals from the Fund in respect of both the 1954-55 and 1955-56 harvests—£188,525 (equivalent to 0.296d. a bushel on all wheat exported) and £1,009,583 (1.975d. a bushel) respectively—to raise export realizations in accordance with guarantee. The balance of the Fund, plus interest from its investment, will first meet any payment needed for the 1957-58 wheat crop, estimated to be £398,000 (equivalent to 1.174d. a bushel)—the only Pool of the second Stabilization Plan not complete—and then the balance will form the nucleus of the Fund for the latest Plan.

5. *International Wheat Agreements.*—Details of the first and second International Wheat Agreements operative from 1st August, 1949, to 31st July, 1953, and from 1st August, 1953, to 31st July, 1956, respectively, were published in Official Year Book No. 42 (see pp. 840-1) and previous issues.

A third International Wheat Agreement covering a period of three years from 1st August, 1956, to 31st July, 1959, came into force on 1st August, 1956. The 1956 Agreement was substantially the same in form as the 1949 and 1953 Agreements, although amendments were made to many of the more important provisions.

The annual quota of 395 million bushels determined by the 1953 International Wheat Agreement was reduced in the 1956 Agreement by almost a quarter to 303 million bushels. The quotas were varied slightly during the course of the Agreement and in 1958–59 the total quota was 295.3 million bushels of which Australia's share was fixed at 29.5 million bushels.

Particulars of guaranteed sales and purchases and transactions actually recorded during 1958–59 are shown in the following table.

INTERNATIONAL WHEAT AGREEMENT : GUARANTEED SALES AND PURCHASES AND TRANSACTIONS RECORDED FOR 1958-59.(a)
(Million Bushels.)

Exporting Countries.			Importing Countries.

(a) Wheat and wheat flour as wheat. (b) Quantities which exporting countries must sell if required by importing countries to do so at the maximum price. (c) Quantities which importing countries must buy if required to do so at the relevant minimum price.

A fourth International Wheat Agreement came into force on 1st August, 1959, covering a further period of three years from that date to 31st July, 1962. The 1959 Agreement, with some important variations, continues the arrangements covered by the earlier Agreements. The text of the new Agreement was negotiated at an international conference convened by the United Nations. The new Agreement was subject to ratification by a sufficient number of wheat exporting and importing countries by 1st December, 1959.

The agreement seeks to obtain an element of stability in world wheat marketing by providing that a significant proportion of wheat entering international trade will be bought and sold at prices within a prescribed range. The member exporting countries would compete to supply at prices within the agreed price range, which is 190 cents (Canadian currency), about 17s. Australian, to 150 cents, about 13s. 6d., a bushel. These prices are on the basis of Canada's No. 1 Manitoba Northern Wheat in bulk in store Fort William—Port Arthur.

Under the new Agreement, the member importing countries undertook to buy each year from the member exporting countries a stated percentage of their total commercial import requirements instead of a fixed quota as under previous agreements.

The United Kingdom, the world's largest importer of wheat, has decided to rejoin the agreement. On the basis of the recent level of commercial imports, it now appears that over 400 million bushels will be covered by the Agreement as compared with 295 million bushels in the last year of the previous Agreement.

Under the new agreement, the International Wheat Council is empowered to make an annual review of the world wheat situation, including the international implication of national policies in respect of wheat production, stocks, and marketing, and the disposal of wheat surpluses on non-commercial terms.

The proposed agreement does not retain the provision in the third agreement by which individual exporting countries had separate guaranteed quantities that they could call upon the member importing countries to buy at the minimum price.

There is provision for a right of appeal against excessive discounts from the minimum price on the basis of differences in quality between the basic wheat—Canada's No. 1 Manitoba Northern Wheat—and the wheat supplied by the other member exporting countries.

6. Wheat Farms.—(i) Number. Particulars of the number of farms growing 20 acres and upwards of wheat for grain during each of the years 1954–55 to 1958–59, are shown in the following table. It should be noted that a farm worked on the share system or as a partnership is included as one holding only.

NUMBER OF FARMS GROWING 20 ACRES AND UPWARDS OF WHEAT FOR GRAIN.

State.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
New South Wales	13,784	14,086	10,197	12,111	15,313
Victoria	10,547	9,714	7,674	8,856	9,074

Tasmania	114	78	45	95	104
Australian Capital Territory	10	9	4	10	19
Australia	45,896	44,606	36,846	40,209	45,135

(ii) *Size Classifications of Wheat Holdings.*—A special series of tabulations relating to rural holdings in Australia was compiled for 1955-56 and published in full detail in a series of mimeographed bulletins, *Size Classification of Rural Holdings, 1955-56*. Condensed tables also appear in *Primary Industries, Part I.—Rural Industries*, Bulletin No. 51. The tables relating to wheat holdings show area under wheat for grain (classified by size), and the number of such holdings also growing oats and barley and the number with sheep, beef cattle and pigs.

7. Area, Production and Yield per Acre.—(i) *Area.* Wheat is the principal crop grown in Australia, and its progress since 1860-61 has been almost continuous. Prominent features in its early development were the increase in population following the discovery of gold and the redistribution of labour after the surface gold had been won. The economic depression of 1893 interrupted its progress, but its subsequent recovery was assisted by the invention of mechanical appliances, the use of superphosphates as an aid to production, and the introduction of new and more suitable varieties of wheat for Australian conditions. The establishment of closer settlement schemes and the settling of returned soldiers and others on the land were additional factors in its expansion.

The area, production and yield per acre of wheat for grain in each State are shown below for the years 1954-55 to 1958-59 in comparison with the averages for the ten-year period ended 1957-58:—

WHEAT FOR GRAIN : AREA, PRODUCTION AND YIELD PER ACRE.

(a) 60 lb. per bushel.

A graph showing the expansion of the area sown to wheat for grain in Australia since 1900-01 appears on page 890 while a map showing the distribution of areas growing wheat for grain throughout Australia in 1954-55 appeared on page 833 of Official Year Book No. 43. Similar maps showing the distribution of wheat areas in 1924-25, 1938-39 and 1947-48 appeared respectively in Official Year Books No. 22, page 695, No. 34, page 451 and No. 39, pages 977-8.

(ii) *Production.* Apart from the variations in the area sown, the size of the wheat harvest in Australia is largely determined by the nature of the season, resulting in considerable year to year fluctuations in production.

The main wheat-producing States of Australia are New South Wales, Victoria, South Australia and Western Australia. Queensland production normally approaches local demands, but Tasmania imports wheat from the mainland to satisfy its needs, though it exports flour made from local wheat which is particularly suitable for biscuits. Normally the production of wheat greatly exceeds Australian requirements, and from half to two-thirds of the crop is exported.

Australia's wheat production in 1958-59 was 215.1 million bushels, representing a record average yield of 20.7 bushels per acre. Production has been exceeded on only two other occasions, namely 220.1 million bushels in 1947-48 and 218.2 million bushels in 1949-50.

(iii) *Yield per Acre.* Short-term variations in yield per acre are due chiefly to seasonal influences. The best yields per acre for single seasons since 1901 were obtained in 1920-21, 16.1 bushels; in 1942-43, 16.8 bushels; in 1949-50, 17.8 bushels; in 1952-53, 19.1 bushels; in 1953-54, 18.4 bushels; in 1955-56, 19.2 bushels and in 1958-59, 20.7 bushels (a record).

(iv) *Decennial Averages, 1861-70 to 1950-59.* The following table shows the average area, production and yield per acre for decennial periods since 1861.

WHEAT FOR GRAIN: AVERAGE AREA AND PRODUCTION, AUSTRALIA.

Period.				Area.	Production.	Yield per Acre.
				'000 Acres.	'000 Bushels.	Bushels.
1861-70	831	10,622	12.8
1871-80	1,646	17,711	10.8
1881-90	3,258	26,992	8.3
1891-1900	4,087	29,934	7.3
1901-10	5,711	56,058	9.8
1911-20	8,928	95,480	10.7
1921-30	11,291	135,400	12.0
1931-40	14,176	177,758	12.5
1941-50	11,358	145,599	12.8
1950-59	10,321	176,656	17.1

It should be noted that with improved farming methods, including the proper tillage of the soil, rotation of crops, the growing of suitable varieties and the application of fertilizers, the average yield per acre has shown a continued improvement in each decade since 1901.

8. *Varieties of Wheat Sown.*—(i) *General.* The breeding of wheat suitable to local conditions has long been established in Australia. Farrer (1845-1905) did invaluable work in pioneering this field and the results of his labour and the continued efforts of those who have followed him have proved of immense benefit to the industry. Their efforts have resulted in better average yields, a greater uniformity of sample with which have accrued certain marketing advantages, as well as an improvement in the quality of wheat grown. More than 1,000 different varieties of Australian wheats have been catalogued by the Commonwealth Scientific and Industrial Research Organization, but the number of principal varieties grown during each season is restricted to about 45.

(ii) *States*.—1958–59. The principal varieties of wheat sown and the percentage of each to the total area sown in the five main producing States during 1958–59 were as follows:—New South Wales, Gabo (20.0), Glen Wari (16.0), Bencubbin (15.2); Victoria, Insignia (47.3), Pinnacle (22.7), Sherpa (8.9); Queensland, Festival (27.3), Gabo (17.3), Charter (13.1), Spica (12.5); South Australia, Gabo (23.0), Insignia (17.7), Dirk (16.7); Western Australia, Gabo (33.9), Bungulla (15.7), Bencubbin (10.8). A detailed table of wheat varieties sown in these five States appears in the annual bulletin *Primary Industries—Part 1.—Rural Industries*.

9. *F.A.Q. Standard of Wheat*.—Until the 1957–58 season, the Chambers of Commerce in each of the four main wheat-producing States determined the “f.a.q.” (fair average quality) standard for each season’s crop. This standard is used as a basis for sales of each crop and it varies from year to year and from State to State.

Samples of wheat are obtained each year by the Chambers of Commerce from the different wheat districts and mixed to give a representative sample of the whole crop. From this representative sample the f.a.q. weight is determined by the use of the Schopper 1-litre scale chondrometer. Commencing with the 1958–59 season, the f.a.q. standard has been determined by State committees comprising representatives of the Australian Wheat Board, the silo authorities, the growers and the State Departments of Agriculture. “F.a.q.” is an Australian term, and the method of selling differs from that of other countries which sell according to sample, or (as in Canada) according to grades which are fixed and do not vary from year to year.

The f.a.q. weight of a bushel of wheat in each of the four main wheat-producing States for the 1959–60 season’s crop was as follows:—New South Wales, North, 64 lb.; South and West, 64½ lb.; Victoria, 62½ lb.; South Australia, semi-hard, 63 lb., soft, 63½ lb.; and Western Australia, 64½ lb.

10. *Price of Wheat*.—(i) *Home Consumption*. The price charged by the Australian Wheat Board for wheat sold to millers for gristing into flour for consumption in Australia and for wheat sold as stock feed was as follows:—Year ended 30th November, 1955, 14s. 1½d.; 1956, 13s. 5½d.; 1957, 13s. 9½d.; 1958, 14s. 4d.; 1959, 14s. 8d.; 1960, 15s. 0d. These prices include an amount used to meet freight charges incurred on wheat shipped to Tasmania (1½d. from 1955 to 1957; 2d. in subsequent years). The figure quoted for 1958 does not apply to New South Wales and Queensland where, because of the necessity of meeting the extra cost of importing wheat from Canada and Western Australia, the prices, during the greater part of the year, were 18s. 4½d. and 16s. 9½d. respectively.

(ii) *Export Wheat Prices—Australian Wheat Board’s Basic Selling Price*. The monthly average of the Wheat Board’s basic export selling prices for f.a.q. bulk wheat f.o.b. basis was 13s. 5½d. for the season ended 31st July, 1957, 14s. 6d. for the season ended 31st July, 1958, and 13s. 10d. for the season ended 31st July, 1959, both for wheat sold under the International Wheat Agreement and for “free” wheat sold on the open market. Actual selling prices have been lower than the basic prices in some cases, particularly where other exporting countries enjoy a geographical freight advantage.

The maximum and minimum prices fixed under the 1956 International Wheat Agreement are expressed in terms of “Canadian currency per bushel, at the parity of the Canadian dollar determined for the purposes of the International Monetary Fund for No. 1 Manitoba Northern wheat in bulk in store Fort William—Port Arthur.” The maximum price was set at 200 cents a bushel and the minimum at 150 cents for f.a.q. wheat. Under the current 1959 Agreement operative from 1st August, 1959 (see paragraph 5, page 901), the agreed price range is between 190 cents and 150 cents. Directly converted into Australian currency these limits are approximately 17s. and 13s. 6d. a bushel respectively.

Details of export wheat prices in previous years, including those received for wheat sold under the terms of the 1949–1953 International Wheat Agreement, are given in Official Year Book No. 40, pages 849–50, and Statistical Bulletin: *The Wheat Industry, Australia*, No. 95 of April, 1959, and in previous issues of these publications.

11. *Value of the Wheat Crop*.—The estimated gross value of the wheat crop in each State and in Australia during the season 1958–59 and the value per acre are shown below.

WHEAT FOR GRAIN: VALUE OF CROPS (a), 1958–59.

Particulars.	N.S.W.	Victoria.	Q’land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £’000	43,994	28,275	10,972	21,896	38,820	105	25	144,087
Value per Acre £	13.8	15.6	15.5	15.6	11.8	16.3	17.4	13.9

(a) Gross value of total crop, including wheat used for seed and for stock feed on farms.

12. **Production and Disposal of Wheat in Australia.**—In the following table, details are given of the production of wheat and its disposal during each of the years ended 30th November, 1955 to 1959. The particulars respecting local consumption refer to sales actually executed by the Australian Wheat Board, whilst those respecting exports represent actual shipments. (For particulars of production and yield from 1900–01 *see* graph, p. 890.)

WHEAT : PRODUCTION AND DISPOSAL, AUSTRALIA.

(a) Includes wheatmeal and sharps. (b) In terms of wheat.
unrecorded movements in stocks, gain or loss in out-turn, etc.

(c) Includes allowance for

13. **Imports of Wheat.**—Due to drought conditions in 1957–58, wheat supplies, particularly in New South Wales, were insufficient for local requirements. As a result, 1,136,000 bushels were imported from Canada during March, April and May, 1958, and a further 349,000 bushels in July, 1958.

Wheat and flour have been imported in substantial quantities on only two previous occasions since 1900; in 1902–3 the wheat harvest was only 12,378,000 bushels, and wheat and flour representing 12,468,000 bushels of wheat were imported while an equivalent of 7,279,000 bushels was imported in 1914–15 to supplement the yield of 25 million bushels produced in that season.

14. **Exports of Wheat and Flour.**—(NOTE: Statistics in this paragraph relate to years ended 30th June). (i) *Quantities.* The following table shows particulars of the exports of wheat and flour and total of both in terms of wheat for each of the years 1954–55 to 1958–59. For the sake of convenience, flour has been expressed at its equivalent in wheat, 1 ton of flour being taken as equal to 46.3 bushels of grain.

WHEAT AND FLOUR : EXPORTS FROM AUSTRALIA.

15. **Stocks of Wheat and Flour.**—Stocks of wheat (including flour in terms of wheat) held by each State at 30th November for the years 1955 to 1959 are shown in the following table. These data relate to stocks held at mills, sidings, ports and depots as recorded by the Australian Wheat Board.

**WHEAT (INCLUDING FLOUR IN TERMS OF WHEAT): STOCKS AT
30th NOVEMBER.(a)**

('000 Bushels.)

30th November—	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
1955	17,483	28,434	4,049	18,470	26,278	256	94,970
1956	21,365	22,821	1,973	15,223	22,534	265	84,181
1957	8,982	13,304	203	13,732	5,056	215	41,492
1958	4,420	6,172	116	3,262	2,260	222	16,452
1959	19,934	16,390	987	5,950	21,657	447	65,365

(a) One ton of flour is taken as equivalent to 46.3 bushels of wheat.

16. **Bulk Handling and Storage of Wheat in Australia.**—(i) *Description and Development of the Bulk Handling System.* A detailed description of the bulk handling system, including its advantages and disadvantages compared with other methods of handling, appears on pages 954–8 of Official Year Book No. 39.

New South Wales, Victoria and Western Australia have operated bulk handling systems for a number of years, and, in more recent years, other States have also introduced bulk systems.

(ii) *Bulk Handling and Storage in the States.* Particulars of the operation of the bulk handling and storage systems and projected extensions in the States concerned are set out below:—

(a) *New South Wales.* Bulk handling facilities are operated by the Grain Elevators Board of New South Wales. The capacity of storages in the country for the 1959–60 season totalled 61,720,000 bushels and comprised 182 elevators (26,390,000 bushels), 13 horizontal type concrete and steel storages (3,200,000 bushels), 4 sub-terminals (16,500,000 bushels), 69 bulkheads (6,930,000 bushels) and 12 bulk depots (8,700,000 bushels). In addition, port terminal facilities provided storage for 4,200,000 bushels at Newcastle and 7,500,000 bushels at Sydney, making a total capacity of 73,420,000 bushels for the State.

(b) *Victoria.* The Victorian Grain Elevators Board operates 193 elevators with a storage capacity of 27,424,000 bushels and a terminal elevator at Geelong with a capacity of 4,100,000 bushels. Storages for 18,000,000 bushels, adjacent to the permanent terminal, have been constructed at Geelong.

Temporary measures for extending bulk handling facilities have been adopted and sub-terminals constructed or acquired at Dunolly, Murtoa and Warracknabeal with a capacity of 22,000,000 bushels. Temporary bulkheads have also been used and in the 1959–60 season there were 35 available for use with a total capacity of 2,525,000 bushels.

(c) *Queensland.*—Bulk storages in this State are controlled and operated by the State Wheat Board. The capacity in the country for the 1959–60 season totalled about 4,500,000 bushels. In addition to the silos and bulkheads, approximately 420,000 bushels will be stored in temporary steel-mesh bins.

The new terminal bulk storage at Pinkenba commenced receiving wheat in July, 1959, and the storage capacity is 1,300,000 bushels.

(d) *South Australia.* Since the formation of the South Australian Co-operative Bulk Handling Ltd. in 1955, steady progress has been maintained in the expansion of the system.

The present capacity of bulk storages is 12,950,000 bushels comprising 1,000,000 bushels at Ardrossan; 1,510,000 at Wallaroo; 1,250,000 at Port Lincoln and 9,190,000 in country areas.

For the 1959-60 season, wheat was received in bulk at 22 installations in country areas in addition to the terminals at Ardrossan, Wallaroo and Port Lincoln.

For the 1960-61 season, the completion of a further five country silos will increase the capacity by 1,440,000 bushels which will give the South Australian Co-operative Bulk Handling Ltd. capacity to handle 14,390,000 bushels of wheat in bulk.

(e) *Western Australia.* The bulk handling system is operated by Co-operative Bulk Handling Ltd., which is a company controlled by growers. In 1959-60, there were 283 sidings equipped with bulk handling facilities and the whole of the marketable harvest was received in bulk.

The system of storage at country stations in Western Australia comprises fixed installations of galvanized iron bins and iron and timber horizontal bulkheads. In addition, a type of temporary roofed bulkhead consisting of timber and iron is used. This latter type of storage can be transferred to suit operational requirements, and therefore lends flexibility to the system. Terminal installations comprise concrete silos and timber and iron horizontal bulkheads with the exception that one port is equipped with iron silos instead of concrete. Plans are in hand to increase the number of vertical concrete cell type storages at the main ports.

(f) *Tasmania.* In order to meet the change to bulk handling of wheat in the mainland exporting States, the Tasmanian Government has constructed grain elevators at Hobart, Launceston and Devonport, each with a capacity of 300,000 bushels, for storage of bulk wheat shipments from the mainland.

17. *World Area and Production of Wheat.*—The details in the following table of the world area and production of wheat by principal countries and by continents have been compiled from official records of the countries concerned so far as they are available, but more particularly from the statistics published by the Food and Agriculture Organization of the United Nations, and the Foreign Agricultural Service of the United States Department of Agriculture. The harvests shown for countries in the Northern Hemisphere are those reaped during the period March to October whilst those for the Southern Hemisphere cover the period November to February following.

(a) Figures for countries other than Australia refer to harvested areas as far as possible. For Australia area sown is shown. (b) Preliminary. (c) Totals (estimates) include allowances for any missing data for countries shown and for producing countries not shown. (d) Not available. See footnote (c).

18. Exports—Principal Countries.—The following table shows the quantities of wheat exported from the chief exporting countries for the years 1956 to 1958 based on statistics recently published by the Food and Agriculture Organization of the United Nations.

While Australia's production of wheat averages less than 3 per cent. of the world's total, its exports account for a much higher proportion of the total quantities shipped. In 1957, Australia's share of world wheat exports was 7.4 per cent. but in 1958 this fell, as a result of the poor 1957 harvest, to 4.5 per cent.

(a) Includes flour expressed in terms of wheat.

§ 5. Oats.

1. **Area, Production and Yield per Acre.**—Oats is usually next in importance to wheat among the grain crops cultivated in Australia, but while wheat grown for grain in 1958–59 accounted for 41.4 per cent., oats grown for grain represented only 15.8 per cent. of the area of all crops. The area, production and yield per acre of oats for the years 1954–55 to 1958–59 and the averages for the ten-year period ended 1957–58 are shown in the following table:—

OATS FOR GRAIN : AREA, PRODUCTION AND YIELD PER ACRE.

(a) Less than 500 acres.

(b) 40 lb. per bushel.

(c) Less than 500 bushels.

A graph showing the production of oats appears on page 891.

In 1958–59, extremely favourable seasonal conditions for all cereal crops were experienced and production of oats reached an all-time high at 86,905,000 bushels. This followed the small crop of 31,426,000 bushels produced in the previous year when drought conditions considerably reduced yields in some States. The previous highest production was recorded in 1955–56 when 56,487,000 bushels were produced.

During the five seasons ending 1957–58, on an average, 5.7 million bushels were exported; 1.8 million bushels were used in factories for oatmeal; and 7.9 million bushels were used for seed purposes; leaving a balance of 22.5 million bushels for stock feed (principally unprocessed) and carry-over.

The average yield for the 1958–59 season of 21.9 bushels an acre is the highest yet recorded. The previous highest yield in recent years was 19.3 bushels an acre in the 1947–48 season which was the highest since 1920–21. The yield per acre recorded in the abnormally dry season 1944–45, namely 4.4 bushels, was the lowest ever recorded for Australia.

2. **Price of Oats.**—The average wholesale price in the Melbourne market for oats of good milling quality was 6s. 11d. a bushel in 1958–59. This represents a decrease of approximately 37 per cent. on the price in 1957–58 (10s. 11½d.).

3. **Value of Oat Crop.**—The estimated gross value of the oat crop in each State for the 1958–59 season and the value per acre were as follows:—

OATS : VALUE OF CROP, 1958-59.

Particulars.		N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value	£'000	11,977	6,820	416	3,497	8,028	219	7	30,964
Value per acre..	£	10.6	7.0	10.6	7.3	6.0	9.9	6.8	12.8

4. **Exports.**—The production of oats in Australia is sufficient to allow for a regular export trade. The quantities and values of oats exported from Australia during the years 1954–55 to 1958–59 are shown hereunder:—

OATS : EXPORTS, AUSTRALIA.

Particulars.		1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
Quantity '000 bus.	2,872	9,608	8,165	2,296	17,557
Value £'000	1,376	3,578	2,972	1,064	6,512

In 1958–59, the principal countries of destination of the exports were the Federal Republic of Germany, the United Kingdom, the Netherlands and Italy. Imports of oats into Australia are not recorded separately.

5. **Oatmeal, etc.**—In 1957–58, the production of oatmeal was 13,763 tons for porridge and 7,781 tons for other purposes. This was equivalent to about 2,400,000 bushels of oats. In 1958–59, 14,446 tons of oatmeal for porridge was produced.

6. **World Production.**—The world's production of oats for the year 1959, according to preliminary details released by the United States Department of Agriculture, amounted to 3,685 million bushels, harvested from 112.9 million acres, representing an average yield of 32.6 bushels per acre. This compared with an estimated production in the previous year of 4,235 million bushels from an area of 116.5 million acres and an average yield of 36.3 bushels an acre.

§ 6. Maize.

1. **States Growing Maize.**—Maize is grown for grain chiefly in Queensland and New South Wales, the area so cropped in these States during the 1958–59 season being 175,651 acres, or 98 per cent. of the total for Australia. In all States except South Australia, the crop is grown to some extent for green fodder, particularly in connexion with the dairying industry.

2. **Area, Production and Yield per Acre.**—Although maize for grain is grown extensively in other countries, the area sown to maize for grain in Australia has averaged only 177,025 acres during the ten years ended 1957–58. The area in 1958–59 was 179,542 acres, a slight decrease on the previous year, and considerably less than the comparatively large areas of 414,914 and 400,544 acres sown in 1910–11 and 1927–28 respectively.

There has been a considerable increase in recent years in the growing of maize from hybrid strains of seed. Varieties have been developed which are capable of producing yields per acre considerably in excess of the older open pollinated types. The expansion in areas sown to hybrid maize has led to a parallel development in the specialized industry of growing hybrid strains for seed.

The area, production and yield per acre of maize for grain in each State for the years 1954–55 to 1958–59 and the averages for the ten-year period ended 1957–58 are given in the following table. Separate details for hybrid and other varieties are shown for New South Wales, Victoria and Queensland for 1958–59.

(a) Includes 3 acres in the Northern Territory.
per bushel.

(b) Not available for publication.

(c) 56 lb.

The average yield for Australia for the ten-year period ended 1957-58 was 28.8 bushels per acre. Among principal producing countries during 1958, the United States of America averaged 51.7 bushels per acre and Italy 44.4 bushels.

3. **Price of Maize.**—The average wholesale price of maize in the Melbourne market in 1958-59 was 15s. 4½d. a bushel compared with 21s. 2½d. in 1957-58.

4. **Value of Crop.**—The estimated gross value of the crop in each State for the 1958-59 season and the value per acre were as follows:—

MAIZE FOR GRAIN : VALUE OF CROP—1958-59.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
Aggregate value .. £'000	2,204	137	2,288	4,629
Value per acre .. £	35.4	35.3	20.2	25.8

5. **Exports of Maize and Maize Products.**—Details of exports of maize for the five years ended 1958-59 are shown below.

MAIZE : EXPORTS, AUSTRALIA.

Particulars.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
Quantity .. '000 bus.	458	185	32	48	15
Value £'000	301	119	26	30	10

Imports of Maize into Australia are not recorded separately.

Exports of cornflour, which prior to the 1939-45 War were very small, increased considerably during the war years, the principal country of destination being New Zealand. In 1958-59, 682,700 lb., valued at £16,427, were exported. It should be noted that these figures include some quantities of "cornflour" made from wheat. Imports of cornflour into Australia are not recorded separately.

6. **World Production.**—According to preliminary details released by the United States Department of Agriculture, world production of maize in the year 1958 amounted to 7,335 million bushels, harvested from 243 million acres, giving an average yield per acre of 30.2 bushels. This compared with production in the previous year of 6,575 million bushels from 233 million acres, and an average per acre of 28.3 bushels.

The United States of America is the most important maize-producing country in the world and during the three years ended 1958 the area sown to maize in that country averaged 74 million acres or 31 per cent. of the world total. During the same period, production averaged 3,556 million bushels or about 52 per cent. of the world total. These figures are not strictly comparable with those for other countries included in the above-mentioned world totals, as the area and an estimate of grain equivalent of maize used as green fodder are included.

A graph showing the production of maize in Australia appears on page 891.

§ 7. Barley.

1. **Area, Production and Yield per Acre.**—The area sown to barley for grain expanded considerably during the ten years preceding the 1939-45 War—from 383,000 acres in 1930-31 to 836,000 acres in 1939-40. This increase was followed by a decline to 443,000 acres in 1943-44 but the area sown has increased in succeeding years and in 1958-59 reached the record level of 2,381,000 acres. Victoria was originally the principal barley-growing State but since 1913-14 its place has been taken by South Australia which accounted for 56 per cent. of the Australian acreage in 1958-59. There has been a substantial increase in the acreage sown in most States in recent years particularly in Western Australia and Queensland. Small areas of barley are sown for hay, and larger quantities are sown for green forage but these are not included in this section. The production of barley for grain in Australia in 1958-59 was a record at 62,976,000 bushels. The previous highest recorded production occurred in 1956-57 when 49,279,000 bushels were produced. The area, production and yield per acre of barley for grain in the several States for the years 1954-55 to 1958-59 and the averages for the ten-year period ended 1957-58 are shown in the following table:—

(a) 50 lb. per bushel.

For Australia as a whole, 83 per cent. of the area of barley for grain in 1958-59 was sown with malting or 2-row barley while the remainder consisted of 6-row, or feed, varieties. The proportion, however, varied considerably in the several States. The utilization of barley during the season 1957-58 was as follows:—exports, 13,198,000 bushels; malting and distilling, 8,506,000 bushels; pearl barley, 147,000 bushels; seed and stock feed, 10,069,000 bushels.

The following table sets out the acreage and production of malting and other barley in Australia during the seasons 1954-55 to 1958-59 and the averages for the ten-year period ended 1957-58.

BARLEY, MALTING AND OTHER: AREA AND PRODUCTION, AUSTRALIA.

Season.	Area. ('000 Acres.)			Production. ('000 Bushels.) (a)			Yield per Acre. (Bushels.) (a)		
	Malting (2-row).	Other (6-row).	Total.	Malting (2-row).	Other (6-row).	Total.	Malting (2-row).	Other (6-row).	Total.
1954-55 ..	1,391	300	1,691	25,622	3,778	29,400	18.4	12.6	17.4
1955-56 ..	1,510	384	1,894	35,470	6,185	41,655	23.5	16.1	22.0
1956-57 ..	1,705	388	2,093	43,870	5,408	49,278	25.7	13.9	23.5
1957-58 ..	1,758	363	2,121	26,404	4,062	30,466	15.0	11.2	14.4
Average, 1948-49 to 1957-58 ..	1,273	250	1,523	27,070	3,852	30,922	21.3	15.4	20.3
1958-59 ..	1,965	416	2,381	54,624	8,352	62,976	27.8	20.1	26.5

(a) 50 lb. per bushel.

A graph showing the production of barley appears on page 891.

During the ten-year period shown, the average area of barley of the malting, or 2-row, class was over five times the corresponding figure for barley of the 6-row, or feed, class. The yield per acre for malting barley was 38 per cent. higher than that for 6-row barley.

2. **Australian Barley Board.**—Following the outbreak of war in 1939, the Australian Barley Board, representative of the whole industry, was formed, and the Commonwealth Government acceded to its request to acquire the entire 1939-40 barley crop, which was placed under the control of the Board. A pool was established from which proceeds were

distributed with appropriate margins for different grades of barley. The Board was responsible for the marketing and storage of barley, and, like the Australian Wheat Board, appointed licensed receivers to receive grain on its behalf and to act as agents for all local and overseas sales.

Following the decision of the Commonwealth Government not to acquire barley in the smaller producing States after 1941-42, the pooling of barley in Queensland reverted to the control of the Queensland Barley Board (originally established in 1930) and in Western Australia a State Barley Board was established to control marketing.

The Commonwealth Government ceased to acquire barley altogether after the 1947-48 crop, and the Victorian and South Australian Governments formed a joint board under the same name as the former Commonwealth board to market the 1948-49 and subsequent crops of the two States. Details for the seasons from 1953-54 to 1958-59 are shown in the table below.

AUSTRALIAN BARLEY BOARD : BARLEY RECEIVED, SOLD, ETC.

Pool.			Quantity Received.	Quantity Sold.(a)	Total Advances made per Bushel on 2-row No. 1 Grade less freight.	Total Net Payments to Growers.
			'000 bushels.	'000 bushels.	s. d.	£
No. 15 (1953-54 Crop)	34,430	34,586	10 4. 101	15,417,374
" 16 (1954-55 ")	..	20,679	20,709	12 10. 92	11,953,430
" 17 (1955-56 ")	..	29,357	29,454	10 3. 441	12,990,173
" 18 (1956-57 ")	..	39,029	39,102	10 2. 541	16,965,609
" 19 (1957-58 ")	..	18,023	18,195	11 9. 61	9,151,748
" 20 (1958-59 ")	..	42,550	42,550	(b) 10 0	17,826,223

(a) Includes surplus in out-turn except for No. 20 Pool for which this surplus has not yet been determined. (b) As at 31st December, 1959. At that date, it was estimated that the amount still to be paid to growers was 9.497d. per bushel.

3. Prices.—The average wholesale price for 2-row English malting barley in the Melbourne market during 1958-59 was 13s. 9d. compared with 13s. 7½d. in 1957-58.

4. Value of Barley Crop. The estimated gross value of the barley crop in each State for the 1958-59 season and the value per acre are shown in the following table:—

BARLEY FOR GRAIN : VALUE OF CROP, 1958-59.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
Aggregate value £'000	2,092	4,165	4,106	19,944	2,781	216	33,304
Value per acre .. £	19.7	11.5	16.5	15.0	8.6	24.0	14.0

5. Exports.—Exports of barley during the five years ended 1958-59 averaged 23,572,000 bushels. South Australia was the principal exporting State and Japan, the Federal Republic of Germany, the Netherlands and the United Kingdom were the principal countries to which barley was shipped. Particulars of Australian exports for the years 1954-55 to 1958-59 are shown in the following table:—

BARLEY : EXPORTS, AUSTRALIA.

Particulars.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
Quantity '000 bus.	18,867	21,065	26,501	21,501	29,924
Value £'000	10,357	10,471	12,745	9,474	16,898

Imports of barley into Australia are not recorded separately.

In addition to exports of barley grain, there are also exports of Australian pearl and Scotch barley, the total for 1958-59 amounting to 232,531 lb., valued at £10,101, consigned mainly to Malaya.

6. *Malt.*—(i) *Production.* Details of the quantity of grain used and the production of barley malt are given in the following table:—

BARLEY MALT : GRAIN USED AND MALT PRODUCED, AUSTRALIA.

Particulars.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
Grain used .. '000 bus. <i>a</i>	7,629	7,803	7,855	8,494	8,206
Malt produced .. '000 bus. <i>b</i>	7,517	7,782	7,895	8,197	8,108

(a) 50 lb. per bushel.

(b) 40 lb. per bushel.

(ii) *Exports.* Since 1952-53, the production of malt in Australia has been sufficient to meet local requirements and to provide a margin for export. Exports amounting to 988,549 bushels (value £947,845) and 1,225,139 bushels (value £1,167,631) were recorded in 1957-58 and 1958-59 respectively.

7. *World Production.*—In comparison with the barley production of other countries, that of Australia is extremely small. The main producers in 1959 were the United States of America, France and Canada. China is also normally a major producer, but details for 1959 are not available. Australian production in that year was slightly less than one per cent. of the world total.

According to preliminary estimates made by the United States Department of Agriculture, world production of barley in the year 1959 amounted to 3,240 million bushels harvested from 136.8 million acres, equivalent to a yield per acre of 23.7 bushels. This compared with the production of 3,305 million bushels in the previous year from 135.5 million acres, and a yield per acre of 24.4 bushels.

§ 8. Rice.

The principal rice-growing areas of the world are confined almost entirely to Asia although limited quantities are grown in other countries. In Australia, rice was first cultivated at the Yanco Experimental Farm in New South Wales, but it was not grown commercially until 1924-25, when 16,240 bushels were produced from 153 acres. Favoured by high average yields and protected by tariff, rice culture made rapid progress in the Murrumbidgee Irrigation Area until local requirements were met and a surplus became available for export. The acreage sown in this area is controlled, as the quantity of water available is limited.

The area sown in New South Wales in 1958-59 was 47,054 acres, compared with the record of 50,477 acres in 1956-57. Production was 6,618,933 bushels in 1958-59, the highest ever recorded.

A graph showing the production of rice appears on page 891.

The bulk of Australia's exports of rice in 1958-59 was shipped to Papua and New Guinea, the Pacific Islands, the United Kingdom and New Zealand.

Details relating to area, production and exports for the years 1954-55 to 1958-59, are shown in the following table:—

RICE : AREA, PRODUCTION AND EXPORTS, AUSTRALIA.(a)

Season.	No. of Holdings Growing Rice.(b)	Area.	Production (Paddy Rice).		Average Yield (Paddy) per Acre.	Exports.(d)	
			Quantity.	Gross Value. (c)		Un-cleaned.	Cleaned.
		Acres.	'000 Bushels. (e)	£'000.		Cwt.	Cwt.
1954-55	573	38,690	5,080	3,430	131.3	55,867	552,065
1955-56	620	41,182	4,725	3,406	114.7	179,297	678,929
1956-57	652	50,477	4,262	3,069	84.4	177,123	408,634
1957-58	743	46,774	5,658	4,045	121.0	211,426	430,928
1958-59	775	47,054	6,619	4,731	140.7	183,083	704,381

(a) Until recently rice-growing in Australia has been practically confined to New South Wales with very small acreages only being sown in Queensland and Western Australia. Production commenced in the Northern Territory in 1956-57 but details, which are confidential, are not included in the table.
 (b) Twenty acres or more in area. (c) Excludes the value of straw. (d) Imports into Australia are not recorded separately. (e) 42 lb. per bushel.

In 1956, the Commonwealth Government entered into an agreement for the development of large scale rice-growing in the Northern Territory. The agreement, which was made with a company financed by American and Australian interests, granted a 30 year lease over 750,000 acres of sub-coastal plains east of Darwin and provided for the development of 500,000 acres of land for rice-growing within 15 years. Production of rice has commenced, but, as only one company is involved, details of area and production are confidential and not available for publication.

§ 9. Sorghum for Grain.

The growing of sorghum for grain on an extensive scale is a recent development in Australia. No details of the area and production of this cereal are available prior to 1939-40, but the output was of little importance. The climatic conditions of Queensland and northern New South Wales are particularly suited to the growing of sorghum and so far, development has been restricted mainly to these areas, and more particularly to Queensland which accounts for the greater portion of the area sown. The grain produced is fed to livestock and has become an important source for supplementing other coarse grains for the feeding of livestock. Other sorghums are grown in Australia mainly as green fodder, hay and silage (sweet sorghums and Sudan grass) and for the production of brush for broom manufacture (broom millet). Particulars of the area and production of sorghum grown for grain are given in the following table.

GRAIN SORGHUM : AREA, PRODUCTION AND YIELD PER ACRE, AUSTRALIA.

Season.	Area.			Production.(a)			Yield per Acre.(a)		
	N.S.W.	Q'land.	Total.	N.S.W.	Q'land.	Total.	N.S.W.	Q'land.	Total.
	Acres.	Acres.	(b)	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	(b)
1954-55	13,069	202,532	215,688	272,604	5,082,762	5,356,335	20.9	25.1	24.8

1958-59	41,899	210,371	252,419	943,359	6,365,880	7,309,645	22.5	30.3	29.0

(a) 60 lb. per bushel.

(b) Includes small areas sown and quantities produced in other States.

§ 10. Potatoes.

1. **Area, Production and Yield per Acre.**—Victoria possesses particular advantages for the growing of potatoes, as the rainfall is generally satisfactory and the climate is unfavourable to the spread of Irish blight; consequently, the crop is widely grown. The principal areas of that State are the central highlands and the south-western and Gippsland districts. Until 1958–59, Tasmania came next in order of acreage sown, although the production exceeded that of Victoria in some of the war years. In 1958–59, New South Wales, which had previously occupied third position, supplanted Tasmania as the second most important State in area sown. Tasmanian production, however, was still slightly larger than that in New South Wales. The areas sown in these three States accounted for 76 per cent. of the total for Australia in 1958–59.

The area sown, production and yield per acre of potatoes in each State during the years 1954–55 to 1958–59 and the averages for the ten-year period ended 1957–58 are shown hereunder:—

POTATOES : AREA, PRODUCTION AND YIELD PER ACRE.

(a) Not available.

After the outbreak of war in the Pacific in December, 1941, the area sown to potatoes increased rapidly and reached a maximum of 241,803 acres in 1944–45. Areas sown in subsequent seasons were considerably less, however, and the figure for 1958–59 was 104,713 acres.

The average yield in Australia for 1958–59 was a record of 5.49 tons per acre compared with the previous highest yield of 5.14 tons in 1956–57.

2. **Gross Value of Potato Crop.**—The estimated gross value of the potato crop of each State for the 1958–59 season and the value per acre are shown in the following table:—

POTATOES : VALUE OF CROP, 1958–59.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	2,222	5,040	1,198	1,201	1,565	1,880	3	13,109
Value per acre £	127	109	103	195	222	116	33	125

3. **Consumption.**—The annual consumption of potatoes in Australia during each of the three years 1956–57 to 1958–59 amounted to 458,600 tons, 514,400 tons and 516,100 tons respectively, or 107.7 lb., 118.2 lb. and 116.2 lb. respectively per head of population. These figures exclude the quantities used for seed, which averaged about 54,000 tons annually over this period. New South Wales, Queensland and, in some seasons, South Australia do not produce the quantities necessary for their requirements and must import from Tasmania and Victoria, which have a surplus.

4. **Marketing.**—Commonwealth control of potato marketing under war-time legislation ceased at the end of 1948 with the completion of sales of the 1947–48 crop.

Potato Marketing Boards were subsequently established in all States under separate State legislation. The life of the Queensland Board was not extended when its term ended in 1954, and the New South Wales Board was voted out by growers in 1956. As the Victorian Board does not acquire the State crop, potato marketing is now conducted chiefly on an open marketing system.

5. **Exports.**—Prior to the 1939–45 War, small quantities of potatoes were exported, principally to the Pacific Islands and Papua. After the war, the export trade expanded considerably. It reached a peak of 37,570 tons in 1952–53 but then fell sharply. Details showing exports for the years 1954–55 to 1958–59 are given in the following table:—

POTATOES : EXPORTS, AUSTRALIA.

Particulars.	1954–55.	1955–56.	1956–57.	1957–58.	1958–59.
Quantity tons	3,473	3,478	3,958	7,410	4,489
Value £'000	109	225	263	227	152

Imports of potatoes into Australia are not recorded separately.

§ 11. Onions.

1. **Area, Production and Yield per Acre.**—Australia's supply of onions comes chiefly from Victoria, which accounted for 45 per cent. of the total area and 52 per cent. of the quantity produced in 1958–59. Queensland was next with 39 per cent. of the area and 25 per cent. of the production, leaving a balance of 16 per cent. of area and 23 per cent. of production distributed among the remaining four States. The Victorian crop consists almost entirely of brown onions of good keeping qualities, and the bulk of the crop is grown in a small section of the Western Division of the State, where soil conditions have been found to be particularly suitable for onion growing on a commercial scale. Details of the area, production and yield per acre are given in the following table for the years 1954–55 to 1958–59 together with averages for the ten-year period ended 1957–58.

ONIONS : AREA, PRODUCTION AND AVERAGE YIELD.

1958-59	5.58	7.17	3.98	8.83	12.70	4.62	8.15	6.22

2. **Gross Value of Onion Crop.**—The estimated gross value of the onion crop and the value per acre are shown in the following table for the 1958-59 season:—

ONIONS : VALUE OF CROP, 1958-59.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	84	1,063	387	215	163	4	4	1,920
Value per acre £	189	268	113	357	411	190	307	217

3. **Consumption.**—The annual consumption of onions in Australia averaged 60,300 tons or 13.8 lb. per head of population during the three years ended 1958-59. These figures exclude an estimated wastage which averaged 3,000 tons per annum.

4. **Exports.**—Onions are the only root crop, other than potatoes, in which any considerable overseas trade is carried on by Australia. In 1958-59, exports amounted to

1,998 tons, valued at £61,793, and were shipped mainly to Singapore, New Caledonia, and Australian Territories. The quantity of exports in 1957-58 was 4,562 tons, valued at £134,517. Imports of onions into Australia are not recorded separately.

§ 12. Hay.

1. *General.*—(i) *Area and Production.* As already stated, the chief crop in Australia in terms of area, is wheat grown for grain. Up to and including 1946-47, hay was next, but in recent years it has dropped in relative importance. In 1958-59, the areas sown to green fodder and oats for grain were larger than that sown to hay.

In 1958-59, the hay area represented 12.0 per cent. of the total area cropped. A graph showing the area sown to hay crops since 1900-01 appears on page 889. In most European countries, the hay consists almost entirely of meadow and other grasses, but in Australia a very large proportion consists of oats, lucerne and wheat. The area, production and yield per acre of hay of all kinds in the several States during the years 1954-55 to 1958-59 and the averages for the ten-year period ended 1957-58 are shown below:—

HAY : AREA, PRODUCTION AND YIELD PER ACRE.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
AREA ('000 ACRES).

PRODUCTION ('000 TONS).								
1954-55 ..	680	1,208	171	330	305	158	4	2,856
1955-56 ..	846	1,526	137	461	384	261	10	3,625
1956-57 ..	538	1,423	96	453	289	238	6	3,043
1957-58 ..	535	1,413	122	304	386	205	4	2,969
Average, 1948-49 to 1957-58 ..	557	1,205	122	367	293	194	5	2,743
1958-59 ..	1,183	2,299	169	672	455	302	10	5,090
YIELD PER ACRE (TONS).								
1954-55 ..	1.30	1.63	2.25	1.28	1.05	1.64	1.33	1.44
1955-56 ..	1.51	1.74	2.17	1.41	1.42	1.91	2.08	1.62
1956-57 ..	1.47	1.82	2.12	1.52	1.19	1.94	1.81	1.63
1957-58 ..	0.96	1.62	1.77	1.05	1.14	1.86	1.39	1.33
Average, 1948-49 to 1957-58 ..	1.35	1.67	2.05	1.36	1.23	1.80	1.66	1.51
1958-59 ..	1.58	1.79	2.17	1.60	1.37	1.96	1.98	1.69

For a number of reasons, particularly the variations in the relative prices of grain and hay and the favourableness or otherwise of the season for a grain crop, the area of hay is apt to fluctuate considerably. The area under hay in Australia during the season 1915-16, 3,598,000 acres, was the largest on record, while the area recorded in 1958-59, 3,018,000 acres, was the largest since 1938-39.

A graph showing the production of hay appears on page 891.

(ii) *Varieties Grown.* Information regarding areas cut for hay in 1958-59 is given in the following table.

HAY : AREA UNDER VARIOUS KINDS GROWN, 1958-59.
(Acres.)

State.	Wheaten.	Oaten.	Lucerne.	Other.	Total.
New South Wales	102,173	117,298	230,912	296,482	746,865
Victoria	32,584	261,853	74,109	913,594	1,282,140
Queensland	9,080	4,337	57,914	6,491	77,822
South Australia	50,283	162,762	31,877	174,644	419,566
Western Australia	47,314	187,730	818	96,751	332,613
Tasmania	2,011	15,689	1,236	134,886	153,822
Northern Territory	121	121
Australian Capital Territory ..	158	1,942	1,464	1,564	5,128
Australia	243,603	751,611	398,330	1,624,533	3,018,077

For all States and the Territories combined, the proportions of the areas sown to the principal kinds of hay in 1958-59 were 25 per cent. for oaten, 13 per cent. for lucerne, 8 per cent. for wheaten, and 54 per cent. for other hay. In that year, oaten hay predominated in Western Australia, lucerne in Queensland, and meadow and grass hay in the remaining States.

2. **Value of Hay Crop.**—The following table shows the estimated gross value, and the value per acre, of the hay crop of the several States for the 1958-59 season:—

HAY : VALUE OF CROP, 1958-59.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Aust.
Aggregate value £'000	11,599	19,360	2,803	5,792	4,424	2,362	162	(a)46,503
Value per acre £	15.5	15.1	35.9	13.8	13.2	15.3	32.4	15.4

(a) Includes £1,000 in the Northern Territory.

3. **Farm Stocks of Hay.**—Details of stocks of hay held on farms are now collected at the annual census of farm production. Particulars of stocks so held at 31st March in each year 1955 to 1959 are given in the table below.

STOCKS OF HAY HELD ON FARMS.
(Tons.)

31st March—	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Australia.
1955 ..	809,263	1,553,289	156,115	447,102	207,664	145,112	3,269	3,321,814
1956 ..	830,619	1,870,214	149,187	474,456	306,586	270,138	7,778	3,908,978
1957 ..	775,464	2,008,678	156,599	555,681	222,941	296,257	7,617	4,023,237
1958 ..	553,691	1,643,876	89,897	384,143	211,069	256,199	3,492	3,142,367
1959 ..	1,463,334	2,464,050	166,657	679,003	290,988	311,825	9,323	5,385,180

4. **Exports.**—Under normal conditions, hay, whether whole or in the form of chaff, is somewhat bulky for overseas trade, and consequently does not figure largely amongst the exports of Australia. During 1958-59, exports amounted to 14,711 tons, valued at £282,549. Imports of hay into Australia are not recorded separately.

§ 13. Green Fodder.

1. **Nature and Extent.**—Considerable areas are devoted to the growing of green fodder, mainly in connexion with the dairying industry. In the 1958-59 season, green fodder ranked third after wheat and oats in area of crops throughout Australia. The areas recorded in respect of green fodder include areas of crops cut for feeding to live-stock as green fodder, or ensilage, together with areas fed off to stock as green forage. Included with the latter

are areas which may have been sown with the intention of harvesting for grain, but which, due to adverse seasonal conditions, showed no promise of producing grain or even hay and were fed off to live-stock. The principal crops cut for green fodder are oats, wheat and lucerne, while small quantities of barley, sorghum, maize, rye and sugar-cane are also used in this way. In 1958-59, the area under green fodder (3,040,544 acres) consisted of oats (1,572,197 acres), lucerne (764,797 acres), wheat (117,019 acres), sorghum (98,283 acres), barley (128,571 acres), maize (37,988 acres), rye (23,100 acres), sugar-cane (1,294 acres) and other crops (297,295 acres). Particulars concerning the area of green fodder in the several States during each of the years 1954-55 to 1958-59 are given in the following table.

GREEN FODDER : AREA.
(Acres.)

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
1954-55 ..	934,395	77,135	649,607	360,359	639,086	70,945	32	988	2,732,547
1955-56 ..	826,789	75,815	689,469	334,957	666,398	54,401	..	970	2,648,799
1956-57 ..	813,642	66,490	640,316	363,562	752,072	48,435	2	772	2,685,291
1957-58 ..	993,039	85,095	714,048	421,242	770,739	54,094	4	1,032	3,039,293
1958-59 ..	1,238,314	70,289	638,667	261,813	769,199	61,322	273	667	3,040,544

2. Value of Green Fodder Crops.—The value of these crops is variously estimated in the several States, but the Australian total, excluding Western Australia, may be taken as approximately £8,600,000 for the 1957-58 season and £6,800,000 for the 1958-59 season.

§ 14. Sugar-cane.

1. Area.—Sugar-cane growing appears to have commenced in Australia in or about 1862, and is confined to New South Wales and Queensland. A brief outline of the development of the industry was included in earlier issues of the Official Year Book (see No. 38, page 985). The area of sugar-cane in Australia for the seasons 1954-55 to 1958-59 and the averages for the ten-year period ended 1957-58 are shown in the following table. In 1958-59, the total area of sugar-cane (excluding areas cut for green fodder) was 510,512 acres, the highest ever recorded.

SUGAR-CANE : AREA.(a)
(Acres.)

Season.	New South Wales.			Queensland.			Australia.			
	Area crushed.	Area of stand-over and newly-planted cane.	Area cut for plants.	Area crushed.	Area of stand-over and newly-planted cane.	Area cut for plants.	Area crushed.	Area of stand-over and newly-planted cane.	Area cut for plants.	Total.
1954-55 ..	6,566	8,078	474	367,640	107,512	11,589	374,206	115,590	12,063	501,859
1955-56 ..	7,522	8,728	670	365,252	104,782	12,111	372,774	113,510	12,781	499,065
1956-57 ..	9,182	9,419	522	360,932	106,734	12,450	370,114	116,153	12,972	499,239
1957-58 ..	10,734	9,241	720	364,985	107,424	12,946	375,719	116,665	13,666	506,050
Average, 1948-49 to 1957-58 ..	8,046	8,087	417	313,406	108,305	12,082	321,452	116,392	12,499	450,343
1958-59 ..	13,368	9,727	616	356,210	118,200	12,391	369,578	127,927	13,007	510,512

(a) Excludes areas cut for green fodder.

2. Productive and Unproductive Cane.—The areas shown in the preceding table do not include the small acreage cut for green fodder, which in 1958-59 amounted to 1,294 acres. The whole area planted is not cut for crushing during any one season, there being always a considerable amount of young and "stand-over" cane as well as a small quantity required for plants. Thus the season in which the highest acreage is recorded may not show the greatest area of productive cane cut for crushing.

3. Production of Cane and Sugar.—For Queensland, statistics of the production of sugar-cane are not available for seasons prior to 1897-98. In that season, the total for Australia was 1,073,883 tons, compared with the record of 10,212,593 tons in the 1958-59 season. The previous highest production was 10,086,517 tons in 1954-55.

The average production during the ten seasons ended 1957-58 was 7,942,408 tons of cane and 1,075,012 tons of raw sugar. Particulars of the total production of cane and sugar for the years 1954-55 to 1958-59 and the averages for the ten-year period ended 1957-58 are as follows:—

SUGAR-CANE : PRODUCTION OF CANE AND SUGAR.
(Tons.)

Season.	New South Wales.		Queensland.		Australia.	
	Cane.	Sugar.(a)	Cane.	Sugar.(a)	Cane.	Sugar.(a)

1957-58	277,884	33,940	7,664,524	1,041,072	7,942,408	1,075,012
1958-59	471,798	58,870	9,740,795	1,353,543	10,212,593	1,412,413

(a) Raw sugar at 94 net titre.

The production of raw sugar in Australia in 1958-59 amounted to 1,412,413 tons (a record) manufactured from 10,212,593 tons of cane, compared with the previous highest production of 1,327,546 tons in 1954-55.

Official annual data are not available regarding the total number of persons engaged in the sugar industry in New South Wales and Queensland. The number of separate holdings growing 5 acres or more of cane was 7,375 in 1958-59.

According to data obtained from the population census of 30th June, 1954, the number of persons engaged in the sugar-cane industry in New South Wales and Queensland comprised 20,185 males and 431 females, a total of 20,616 persons, of whom 4,245 were employers and 5,118 were self-employed.

4. Average Production of Cane Sugar.—Owing to climatic variations, comparison between the average yields of cane per productive acre in Queensland and New South Wales cannot be made accurately except on an annual basis. In New South Wales, the crop matures in from 20 to 24 months, whereas in Queensland a period of from 12 to 14 months is sufficient. Allowing for the disparity in maturing periods the average annual yields of cane per productive acre during the ten years ended 1957-58 were 34.54 tons for New South Wales, and 24.45 tons for Queensland. Similarly, the yields of sugar per acre crushed for the same period were estimated at 5.33 tons and 3.32 tons respectively. The average yields of cane and sugar per acre crushed for Australia for the ten years ended 1957-58 were 24.71 tons and 3.34 tons respectively.

SUGAR-CANE AND SUGAR : YIELD PER ACRE.
(Tons.)

1958-59	35.29	4.40	8.01	27.35	3.80	7.20	27.63	3.82	7.23

5. **Quality of Cane.**—The quantity of cane required to produce a ton of sugar varies with the variety planted, the district, and the season. For the ten years ended 1957–58, it required on the average 7.39 tons of cane to produce one ton of sugar, or 13.5 per cent. of its total weight. As the result of the systematic study of cane culture in Queensland and improvements in field and mill methods, the sugar content of the cane has been increased considerably since the turn of the century, when over 9 tons of cane were required to produce 1 ton of sugar. It is believed that the sugar content obtained in Australia is the highest anywhere in the world.

The Bureau of Sugar Experiment Stations in Queensland is rendering useful service to the sugar industry by advocating and demonstrating better methods of cultivation and the more scientific use of fertilizers, lime, etc., and by producing and distributing improved varieties of cane.

6. **Production and Utilization.**—Details of the production and utilization of raw sugar for the years 1954–55 to 1958–59 are shown below. It should be noted that the details of sugar production refer to the annual periods shown, without regard to the season in which the sugar was produced. Consumption is shown in terms of refined sugar, including that consumed in manufactured products.

RAW SUGAR : PRODUCTION AND UTILIZATION, AUSTRALIA.

Year.	Changes in Stocks.	Pro- duction.	Exports. (a)	Miscel- laneous Uses.(b)	Consumption in Australia.(a)	
					Total.(c)	Per Head. (c)

(a) Includes sugar content of manufactured products.
in refining.

(c) In terms of refined sugar.

(b) Includes industrial uses and losses

7. **Consumption in Factories.**—The quantity of sugar used in factories in 1957–58 amounted to 278,764 tons compared with 271,688 tons in 1956–57 and 266,065 tons in 1955–56. Particulars of sugar used in establishments not classified as factories are not available, and consequently these quantities are deficient to that extent. In 1957–58, consumption by factories engaged in the production of jams, jellies and preserved fruit (including condiments, pickles, etc.) amounted to 77,052 tons, by those producing confectionery, ice cream, etc. to 55,207 tons, by breweries to 43,738 tons and by factories producing aerated waters, cordials, etc. to 42,323 tons.

8. **Control of Cane Production in Queensland.**—Agreements between the Commonwealth and Queensland Governments have fixed the wholesale price of sugar and sugar products from time to time. Details of prices are shown in para. 14 of this section (see page 929).

The Queensland Government acquires the whole of the sugar production of that State and of New South Wales by legislation and private agreement respectively. The net proceeds of all sugar sold are pooled and a uniform price paid to mills.

Sugar production barely met local requirements in 1923 but increased rapidly until 1925 when approximately 44 per cent. of the production was exported. Steps were taken by the Government to restrict planting of new areas and production was fairly stable until 1929. In that year, the pool was reorganized and mills received the full pool price for sugar up to the amount of their previous maximum production, further output being acquired at export prices.

Between 1929 and 1939, production rose by more than 70 per cent. despite the restrictions above-mentioned and the fact that export prices were generally less than half the pool price.

In 1939, following the International Sugar Agreement, which limited exports, the Queensland Government limited the pool (mill peaks) to 737,000 tons in respect of Queensland production. Mill quotas were allotted on the understanding that mills would allot

quotas to individual growers. Mill peaks have been raised since 1939, following the negotiation of the Commonwealth Countries Sugar Marketing Agreement of 1949, which allowed the Queensland Government to initiate a planned expansion of the industry. In 1958, they were 1,207,400 tons and in 1959, 1,213,000 tons.

9. **Sugar Agreement in Australia—Embargo on Imports, etc.**—Reference was made in Official Year Book No. 37, pages 940–41, to the agreement operating between the Commonwealth and Queensland Governments in respect of the sugar industry in Australia. Briefly, the agreement places an embargo on sugar importations and fixes the price of sugar consumed in Australia. The current agreement operates for a five year period from 1st September, 1956, to 31st August, 1961.

10. **International Sugar Agreement.**—The International Sugar Agreement of 1937 was superseded by the International Sugar Agreement of 1953 which came into force on 1st January, 1954. Details of the 1937 Agreement were given in Official Year Book No. 40, pages 881 and 882, and previous issues.

The 1953 agreement, which was amended by protocol from 1st January, 1957, was for the five year period ended 31st December, 1958.

In October, 1958, a new agreement was negotiated at a conference held in Geneva under the auspices of the United Nations. The new agreement, which follows the lines of the 1953 agreement, is for five years commencing 1st January, 1959, with provision for a review during the third year. It is designed to assure supplies of sugar to importing countries and markets for sugar to exporting countries at equitable and stable prices, to facilitate a steady increase in the consumption of sugar and a corresponding increase in the supply of sugar, and, in general, to further international co-operation in connexion with world sugar problems. Basic export quotas of exporting countries are established and provision is made for adjustment of quotas according to fluctuations in the world sugar price. A number of price levels are stipulated at which the International Sugar Council may or must take action. The Council has considerable discretion to adjust quotas during the quota year.

Under the 1953 agreement, the British Commonwealth, as a whole, was granted an export quota of 2,375,000 tons rising to 2,500,000 tons in 1958. Under the 1958 agreement, the quota remains at 2,500,000 tons for 1959 but is increased by 75,000 tons to 2,575,000 tons in 1960 and 1961. This quota is not subject to the fluctuations mentioned above. The allocation of the total quota among exporting members of the British Commonwealth is a matter for internal arrangement by those countries and territories themselves. Australia's quota for 1959 was approximately 631,000 tons and will increase to about 650,000 tons in 1960 and 1961.

Details of the marketing arrangements for Australian sugar are given in paragraph 15 below.

11. **Net Return for Sugar Crop.**—Details of the disposal of the crop, net value of exports and the average price realized during each of the years 1954–55 to 1958–59 are shown in the following table:—

RAW SUGAR(a): NET RETURNS, AUSTRALIA.

Year.			Proportion Exported. (b)	Net Value of Exports per Ton. (b)	Average Price per Ton for Whole Crop.	Estimated Value of Crop.
			Per cent.	£ s. d.	£ s. d.	£'000.
1954–55	59.11	37 8 0	41 6 11	53,984
1955–56	53.46	38 11 4	42 9 0	53,244
1956–57	56.01	41 6 5	46 14 3	57,686
1957–58	57.44	45 16 8	49 7 6	64,194
1958–59	60.53	39 8 2	45 9 11	64,849

(a) 94 net titre.

(b) As supplied by the Queensland Sugar Board.

The estimated value of the raw sugar produced has been based upon details taken from the audited accounts of the Queensland Sugar Board. The values stated represent the gross receipts from sales in Australia and overseas, less refining costs, freight, administrative charges, etc., and export charges, but including concessions to the fruit industry and other rebates which in 1958-59 amounted to £615,833. The value thus obtained represents the net market value of all raw sugar sold, which, less the rebates, is divided between the growers and millers in the approximate proportions of 70 per cent. and 30 per cent. respectively.

12. **Exports of Sugar.**—Particulars of the exports of cane sugar (raw and refined) for each year from 1954-55 to 1958-59 are as follows:—

SUGAR : EXPORTS, AUSTRALIA.

Particulars.			1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
Quantity	tons		737,184	592,229	675,282	707,806	802,971
Value	£'000		31,148	24,723	28,780	34,996	32,163

13. **Sugar By-products.**—Large quantities of molasses are produced as a by-product in the sugar mills. Details for a series of years of the quantities produced and the amounts used for distilling, fuel, manure and other purposes will be found in Chapter VI.—Manufacturing Industry.

Other by-products include industrial chemicals and building boards. These boards are made from the residue of crushed fibre after removal of the sugar content from sugar-cane and possess high insulating and sound-absorbing properties which make them particularly suitable for use in walls and ceilings.

14. **Sugar Prices.**—The prices of sugar in Australia from 1952 to 1958 in the case of raw sugar; and from 1952 to 1961 in the case of refined sugar (as determined under the Sugar Agreement in Australia—see para. 9 above) are shown in the following table:—

SUGAR : PRICES IN AUSTRALIA.

Year.	Raw Sugar, 94 Net Titre.			Refined Sugar.		
	Average Return per Ton Received by Millers and Growers for—			Date of Determination.	Wholesale Price per Ton.	Retail Price per lb.
	Home Consumption.	Exports.(a)	Whole Crop. (a)			
	£ s. d.	£ s. d.	£ s. d.		£ s. d.	d.
1952 ..	44 3 0	41 2 0	42 12 9	24.3.52 to 12.10.52	65 12 10	8
1953 ..	47 18 6	38 13 9	42 10 8	13.10.52 to 13.5.56	73 16 11	9
1954 ..	47 1 0	37 8 0	41 6 11	14.5.56 to 31.8.61	82 1 0	10
1955 ..	46 18 0	38 11 6	42 9 0			
1956 ..	53 11 6	41 6 5	46 14 3			
1957 ..	54 3 0	45 16 8	49 7 6			
1958 ..	54 15 0	39 8 2	45 9 11			

(a) Including "Excess" Sugar.

15. **Marketing Arrangements.**—From 1939 to 1952, the British Ministry of Food purchased Australia's surplus raw sugar at prices negotiated annually and varying from £stg.11 5s. in 1939 to £stg.38 10s. a ton in 1952 including tariff preference (for prices in other years see earlier issues of the Year Book).

On 1st January, 1953, the British Commonwealth Sugar Agreement became effective. This agreement, which has been extended to 1965, provides for Australia to export a maximum of 600,000 tons per annum, subject to annual review. For 1959, the Australian quota was approximately 631,000 tons. The United Kingdom agrees to take 300,000 tons at an annually negotiated price, the balance being sold at world prices, plus tariff preferences. The negotiated prices for 1958 and 1959 were £stg.43 16s. 8d. and £stg.45 2s. per ton respectively.

The Sugar Bill introduced into the House of Commons on 5th July, 1955, provided for the reversion of dealings in sugar in the United Kingdom to a trader to trader basis as

from 1st January, 1957. However, under the Bill, a Sugar Board was created which is responsible for the purchase of the negotiated price sugar which the United Kingdom Government has contracted to take under the British Commonwealth Sugar Agreement.

16. Fruit Industry Sugar Concession Committee and Sugar Rebates.—The Fruit Industry Sugar Concession Committee was established by agreement between the Commonwealth and Queensland Governments and administers a fund contributed by the Queensland Government on behalf of the sugar industry.

A rebate of £2 4s. per ton of refined sugar used in processing approved fruit products is paid to Australian manufacturers provided they buy the fresh fruit at prices not lower than those declared by the Committee as reasonable.

An export sugar rebate is also paid by the Committee to exporters of approved fruit products to ensure that manufacturers do not pay higher prices for Australian sugar than the price for which the cheapest imported sugar could be landed duty free in Australia.

Under the Sugar Agreement 1956–1961, the Queensland Government contributes to the fund £120,000 annually and also reimburses the Committee for the actual expenditure on export sugar rebates. Any money remaining in the fund after the payment of rebates and administrative expenses may be used by the Committee for the promotion of the use and sale of fruit products, or for scientific research for the purpose of increasing the yield per acre of Australian fruit.

17. Bulk Handling of Sugar.—The conversion of the Australian sugar industry to bulk handling and mechanized loading and unloading of raw sugar is well advanced. Within the next few years, 80 per cent. of raw sugar in Australia will be handled in bulk without being bagged at any stage.

Terminals for the bulk loading of sugar were opened at Mackay in 1957, at Lucinda and Bundaberg in 1958 and at Townsville in 1959; a terminal is also in the course of construction at Mourilyan.

Bulk unloading facilities are in operation, or in the course of construction, at all Australian refineries.

§ 15. Vineyards.

1. Progress of Cultivation.—(i) *Area of Vineyards.* Since the early days of Australian settlement, the expansion of the cultivation of vines has been most rapid in Victoria and South Australia, the area under vineyards in the 1958–59 season in these two States comprising 78 per cent. of the total area. The purposes for which grapes are grown in Australia are (a) for wine-making, (b) for table use and (c) for drying. The total area of vines in the several States during each of the years 1954–55 to 1958–59 and the averages for the ten-year period ended 1957–58 are shown in the following table:—

VINEYARDS : AREA.
(Acres.)

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Aust.(a)
1954–55	18,205	45,757	2,896	60,612	9,015	136,485
1955–56	18,099	44,817	2,916	59,862	9,107	134,801
1956–57	17,394	44,902	2,916	57,409	8,996	131,617
1957–58	16,984	44,767	2,821	57,439	9,023	131,034
Average, 1948–49 to 1957–58	17,428	45,356	2,951	60,129	9,288	135,152
1958–59—						
Wine	7,128	4,164	319	42,892	3,112	57,615
Table	2,572	2,212	2,722	235	1,499	9,240
Drying	7,552	38,425	..	13,622	4,270	63,869
Total	17,252	44,801	3,041	56,749	8,881	130,724

(a) Excludes particulars for Australian Capital Territory and Northern Territory.

NOTE.—There are no vineyards in Tasmania.

(ii) *Wine Production, Bounties, etc.* The total production of wine (beverage and distillation) in Australia has shown a marked increase in recent years, rising from 14.3 million gallons in 1938-39 to 32.5 million gallons in 1958-59. In the same period, consumption of beverage wine in Australia has increased from 4.5 million gallons (0.7 gallons per head of population) to 11.1 million gallons (1.14 gallons per head of population). For many years prior to the 1939-45 War, a bounty was paid on wine shipped overseas under the provisions of the Wine Export Bounty Act 1930, as amended from time to time. Details of the bounty, payment of which was discontinued in 1947, may be found in Official Year Book No. 39, page 992.

The quantity of wine produced in the several States during the 1954-55 to 1958-59 seasons, together with the averages for the ten-year period ended 1957-58, are shown in the following table:—

WINE : PRODUCTION.(a)
(’000 Gallons.)

Season.	N.S.W.	Victoria.	Queensland.	S. Aust.	W. Aust.	Australia.
1954-55.. ..	2,271	1,612	61	19,208	812	23,964
1955-56.. ..	2,327	1,342	37	18,403	786	22,895
1956-57.. ..	3,412	2,369	38	24,038	886	30,743
1957-58.. ..	4,150	2,583	21	26,400	700	33,854
Average, 1948-49 to 1957-58 ..	4,062	2,464	42	21,704	721	28,993
1958-59.. ..	4,360	2,354	49	25,131	644	32,538

(a) Net factory and farm production of beverage and distillation wine excluding the liquid gallanage of spirits added in wine fortifying.

2. **Imports and Exports of Wine.**—(i) *Imports.* Imports for 1958-59 amounted to 51,812 gallons valued at £121,599 compared with 51,225 gallons valued at £115,519 in the previous year.

During 1958-59, Italy supplied 20,038 gallons valued at £25,404, France supplied 18,368 gallons valued at £64,612, and the Federal Republic of Germany supplied 5,268 gallons valued at £13,513. The bulk of the sparkling wines were obtained from France.

(ii) *Exports.* Exports in 1958-59 totalled 1,747,249 gallons, of which the United Kingdom received 1,332,848 gallons, New Zealand 40,095 gallons, Canada 280,655 gallons, and other countries 93,651 gallons.

Exports for the five years ended 1958-59 are shown in the following table:—

WINE : EXPORTS FROM AUSTRALIA.

Year.	Quantity (Gallons).			Value (£).		
	Sparkling.	Other.	Total.	Sparkling.	Other.	Total.
1954-55.. ..	5,570	1,258,503	1,264,073	19,670	797,767	817,437
1955-56.. ..	5,997	1,197,995	1,203,992	19,833	714,235	734,068
1956-57.. ..	6,701	1,743,648	1,750,349	23,737	1,108,314	1,132,051
1957-58.. ..	4,872	1,484,656	1,489,528	18,194	978,616	996,810
1958-59.. ..	5,203	1,742,046	1,747,249	10,989	1,141,036	1,152,025

3. **Oversea Marketing of Wine.**—(i) *The Wine Overseas Marketing Act 1929–1954.* This Act was introduced to place the oversea marketing of surplus wine on an orderly basis. The Australian Wine Board (formerly The Wine Overseas Marketing Board), consisting of representatives from wineries and distilleries, grape-growers and the Commonwealth Government, supervises the sale and distribution of Australian wine exported and recommends conditions under which export licences should be issued. The Board has a London agency which advises on marketing conditions.

During 1954, the Act was amended to enable the Board to engage in the sales promotion of wine in Australia in addition to overseas.

(ii) *The Wine Grapes Charges Act 1929–1957.* This Act provides for the imposition of a levy on all grapes used in Australia for the manufacture of wines or spirit used for fortifying wine. The proceeds of the levy are used to defray the administrative and other expenses of the Board, and provision is made for such exemptions from the levy as the Board may recommend.

4. **Other Viticultural Products.**—(i) *Table Grapes.* Grapes for table use are grown in all States except Tasmania, but the area of this type is only about 7 per cent. of the productive area of vines. The quantities of table grapes produced during the season 1958–59 in each State are shown in § 3 of this chapter. (See p. 895.)

(ii) *Raisins and Currants.* The quantities of raisins (including sultanas and lexias) and currants dried during each of the seasons 1954–55 to 1958–59 and the averages for the ten-year period ended 1957–58 are shown in the following table. Production in 1958–59 was 87,256 tons, compared with 90,554 tons in 1957–58.

RAISINS(a) AND CURRANTS : PRODUCTION.

(a) Including sultanas and lexias.

5. **Production and Disposal of Dried Vine Fruit.**—As the production of dried vine fruit is far in excess of Australia's requirements, considerable quantities are available for export. Total production during the 1958–59 season amounted to 87,256 tons, while exports for the 12 months ended December, 1959, were 74,884 tons, leaving an estimated 12,372 tons available for Australian consumption. Australian consumption includes amounts delivered to biscuit manufacturers, bakeries, etc., as well as retail sales for household consumption.

The following table shows the oversea exports of raisins and currants during each of the years 1954-55 to 1958-59:—

RAISINS AND CURRANTS(a) : EXPORTS, AUSTRALIA.

Year.	Raisins.		Currants.		Total Raisins and Currants.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Tons.	£'000.	Tons.	£'000.	Tons.	£'000.
1954-55.. ..	59,934	6,720	8,373	917	68,307	7,637
1955-56.. ..	51,734	6,224	9,561	1,151	61,295	7,375
1956-57.. ..	38,496	5,377	6,521	831	45,017	6,208
1957-58.. ..	52,297	8,019	7,398	938	59,695	8,957
1958-59.. ..	68,245	11,215	7,585	1,051	75,830	12,266

(a) Excludes quantities exported as mincemeat.

The chief countries importing Australian raisins and currants are the United Kingdom, Canada and New Zealand, the quantities exported thereto in 1958-59 being 38,956 tons, 18,861 tons and 6,092 tons respectively.

6. **Post-war Contracts.**—Agreements were negotiated between the Governments of the United Kingdom and Australia for the purchase of Australian dried vine fruits during the period 1946-1953. Up to and including 1951, the quantity of fruit to be purchased was limited but in 1952 and 1953 there was no restriction. In April, 1953, it was agreed to extend the contract for one year but in August, 1953, the United Kingdom Government abolished all controls and on 1st December of that year exports reverted to a trader to trader basis. The British Ministry of Food agreed, however, to subsidize returns from sales of fruit of the 1954 crop sold in the United Kingdom up to 31st May, 1955, if average returns were less than the level of prices agreed upon.

7. **Overseas Marketing of Dried Fruits.**—(i) *The Dried Fruits Export Control Act 1924-1953.* This Act was passed to organize overseas marketing of Australian dried vine fruits. The Dried Fruits Control Board, consisting of growers representatives, members with commercial experience and experience in marketing dried fruits and a Government representative, controls the sale and distribution of dried fruit exports and recommends the conditions under which export licences are issued.

In conjunction with its London agency, the Board has improved dried fruit marketing overseas by its system of appraisalment, regulation of shipments and advertising.

(ii) *Dried Fruits Export Charges Act 1924-1929.* This Act provides for a levy on exports of dried fruits to defray costs and expenses incurred by the Board. Provision is made for exemption from the levy upon recommendation by the Board.

§ 16. Orchards and Fruit Gardens.

1. **Area.**—The largest area of orchards and fruit-gardens prior to the 1939-45 War was 281,899 acres which was attained in 1933-34. Since then, the acreage has varied but has not fallen below 260,000 acres. It reached 290,000 acres in 1947-48 but declined somewhat in subsequent years, rising again to the record level of 287,000 acres in 1958-59.

ORCHARDS AND FRUIT-GARDENS : AREA.

(Acres.)

2. **Varieties of Crops.**—The varieties of fruit grown differ in various parts of the States, ranging from pineapples, papaws and mangoes in the tropics, to strawberries, raspberries and currants in the colder parts of the temperate zone. In New South Wales, citrus fruits (oranges, lemons, etc.) and bananas are the principal crops, although apples, peaches, plums, pears and cherries are grown extensively. The principal varieties grown in Victoria are apples, peaches, pears, oranges, plums and apricots. In Queensland, pineapples, apples, bananas, oranges, mandarins, peaches and plums are the varieties most largely cultivated. In South Australia, in addition to apples, oranges, apricots, plums, peaches and pears, almonds and olives are grown extensively. In Western Australia, apples, oranges, pears, plums, peaches, lemons, apricots and figs are the chief varieties. In Tasmania, apples occupy over three-quarters of the fruit-growing area, but small fruits, such as currants, raspberries and gooseberries are grown extensively while the balance of the area is mainly taken up with pears, apricots and plums. The following table shows the acreage—bearing and non-bearing—of the principal kinds of fruit, and the quantities produced.

ORCHARDS AND FRUIT-GARDENS, 1958-59.

4. **Production of Jams and Jellies and Preserved Fruit.**—In Australia, considerable quantities of fruit are used in the production of jams and jellies and for preserving. During 1958-59, output of jams, conserves, fruit spreads, etc. amounted to 75,040,000 lb. while output of preserved fruit amounted to 317,055,000 lb. Of the latter figure, pears accounted for 92,588,000 lb., peaches 78,523,000 lb. and pineapples 67,822,000 lb.

The recorded consumption of fruit in factories for all purposes, including that used for juice and cordial manufacture and for drying, was 238,713 tons in 1957-58.

5. **Consumption of Fruit and Fruit Products.**—Details of the estimated consumption of fruit and fruit products per head of population for a series of years ending 1958-59 are shown in Chapter XXX.—Miscellaneous, of this Year Book.

6. **Imports and Exports of Fruit.**—(i) *General.* The imports of fresh fruit into Australia are negligible, while those of dried fruit consist mainly of dates.

A considerable export trade in both fresh and dried fruit is carried on by Australia with overseas countries. The values of the shipments in 1958-59 amounted to £9,412,592 and £12,747,780 respectively. Apples constitute the bulk of the fresh fruit exported, although exports of pears and citrus fruit are considerable.

(ii) *Fresh Fruit.* Particulars of the Australian export trade in fresh and frozen fruit for each of the years 1954-55 to 1958-59 are shown in the following table:—

FRESH AND FROZEN FRUIT : EXPORTS, AUSTRALIA.

Year.	Apples.		Pears.		Citrus.		Total.(a)	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	'000 bus.	£'000.	'000 bus.	£'000.	'000 bus.	£'000.	'000 bus.	£'000.
1954-55 ..	4,265	5,444	1,407	2,183	525	783	6,283	8,771
1955-56 ..	5,023	6,513	1,012	1,470	585	869	6,689	9,138
1956-57 ..	3,969	5,582	1,020	1,731	613	926	5,670	8,585
1957-58 ..	5,892	9,076	1,448	2,755	572	882	7,961	13,062
1958-59 ..	4,948	6,625	1,100	1,783	415	664	6,559	9,413

(a) Total, including exports of all other fresh and frozen fruit.

(iii) *Dried Tree Fruit.* The quantity and value of oversea imports and exports of dried fruit, other than raisins and currants, for the years 1954–55 to 1958–59 are shown below. Normally, the bulk of the imports consists of dates obtained almost entirely from Iraq.

DRIED TREE FRUIT(a): IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.(b)		Exports.	
	Quantity.	Value.	Quantity.	Value.
	'000 lb.	£'000.	'000 lb.	£'000.
1954–55	13,176	373	6,576	804
1955–56	8,627	204	3,681	428
1956–57	7,052	158	2,887	378
1957–58	8,683	209	1,366	186
1958–59	8,411	203	3,352	482

(a) Excludes raisins and currants referred to separately under Vineyards (see p. 932).
of dates and figs only.

(b) Imports

(iv) *Jams and Jellies.* Exports of jams and jellies reached large proportions immediately following the 1939–45 War and in 1946–47 amounted to 65,434,000 lb., compared with the average for the five years ended 1938–39 of 7,118,000 lb. Since 1949–50, when exports totalled 65,229,000 lb., there has been a marked decline and in 1958–59 exports amounted to only 7,748,450 lb., valued at £541,865. Imports of jams and jellies are negligible.

(v) *Preserved Fruit.* The total quantity of fruit preserved in liquid, or partly preserved in liquid or pulped, imported into Australia during 1958–59 was 1,032,196 lb. valued at £188,663. Large quantities of fruit preserved in liquid are normally exported from Australia, the quantity recorded in 1958–59 being 196,025,186 lb. valued at £12,950,271. Exports in 1958–59 were principally made up of pears (77,704,652 lb.), peaches (45,439,793 lb.), apricots (15,028,831 lb.) and pineapples (48,027,987 lb.). In addition the exports of pulped fruits during 1958–59 amounted to 2,146,777 lb. valued at £173,739.

7. Marketing of Apples and Pears.—(i) *Apple and Pear Organization Act 1938–1953.* This Act, which was passed by the Commonwealth Parliament at the request of the apple and pear industry, provides for the establishment of an Australian Apple and Pear Board comprising representatives of growers, exporters, employees and the Commonwealth Government. Oversea representatives may also be appointed by the Board.

The function of the Board is the organization and control of exports of fresh apples and pears and it has the power to regulate shipments, determine export quotas and allocate consignments from each State.

(ii) *Apple and Pear Export Charges Act 1938–1957.* This Act provides for an export levy to meet the expenses of the Board.

(iii) *Apple and Pear Acquisition.* Exports of apples and pears were seriously curtailed during the war and the 1940 to 1948 crops were acquired and marketed under National Security and Defence Regulations. Details of the acquisition scheme will be found on pages 1003 and 1004 of Official Year Book No. 38 and in earlier issues.

8. Oversea Marketing of Canned Fruit.—(i) *The Canned Fruits Export Control Act 1926–1959.* This legislation was introduced with the object of organizing the oversea marketing of canned fruit. The Australian Canned Fruits Board, comprising members representing the Commonwealth Government, canners of apricots, peaches, pears, pineapples and fruit salad, and a representative of the growers of canning apricots, peaches and pears, was appointed to organize the oversea marketing of canned fruit and also to recommend conditions under which export licences are issued.

The system of marketing adopted by the Board has resulted in the satisfactory disposal of the exportable surplus of canned fruits.

(ii) *The Canned Fruits Export Charges Act 1926–1956.* This Act provides for a levy on exports to meet the Board's expenses. Provision has been made for certain exemptions when recommended by the Board.

§ 17. Vegetables for Human Consumption.

1. **Area and Production of Fresh Vegetables.**—Details of the areas planted and production of individual kinds of vegetables, excluding potatoes and onions referred to in §§ 10 and 11 of this chapter, are shown below for the seasons 1956–57 to 1958–59.

FRESH VEGETABLES(a) FOR HUMAN CONSUMPTION: AUSTRALIA.†

Total	171,800	..	163,551	..	152,774	..

(a) Excludes potatoes and onions.

(b) Incomplete, excludes New South Wales.

2. **Production of Canned and Dehydrated Vegetables.**—Total production of canned vegetables in 1958–59 amounted to 66,600,000 lb., which was considerably higher than pre-war production, but only about 56 per cent. of the peak war-time production of 119,149,000 lb. recorded in 1944–45. The principal canned vegetables produced in 1958–59 were green peas (including mint-pro peas), 24,517,000 lb., green beans 1,245,000 lb., baked beans (including pork and beans) 18,685,000 lb., tomatoes 779,000 lb., and asparagus 7,689,000 lb.

The production of dehydrated vegetables, which was initiated by the Commonwealth Government during the 1939–45 War, rose to a maximum of 22,000,000 lb. in 1945–46, but in 1957–58 it was only approximately 751,000 lb. Production of potato crisps, chips and flakes, which has increased substantially in recent years, amounted to 5,711,000 lb. in 1957–58.

3. **Imports and Exports of Vegetables.**—The quantity and value of oversea exports of pulse and fresh vegetables during 1958–59 were respectively:—pulse, 14,970 tons, £751,295; onions, 1,998 tons, £61,793; potatoes, 4,489 tons, £152,358; other vegetables, 1,640 tons, £194,974. Imports of pulse amounted to 2,489 tons, valued at £215,179, while imports of fresh vegetables in total were 500 tons, valued at £77,138.

In 1958–59, exports of vegetables preserved in liquid consisted of:—Asparagus, 547,353 lb. (£84,848); Beans (including baked), 67,563 lb. (£4,623); Peas, 346,832 lb. (£18,628); Tomatoes, 123,475 lb. (£6,120); Other Vegetables, 258,861 lb. (£33,134).

4. **Consumption of Vegetables.**—Details of the estimated consumption of vegetables for a series of years ending 1958–59 are shown in Chapter XXX.—Miscellaneous, of this Year Book.

§ 18. Tobacco.

1. **States, Area and Production.**—Tobacco has been grown in Australia for a considerable number of years. As early as the season 1888–89, the area of this crop amounted to 6,641 acres, of which 4,833 were in New South Wales, 1,685 in Victoria and 123 in Queensland. Thereafter, the industry fluctuated for many years reaching a peak in 1932–33 when 26,272

acres were planted. After the 1939-45 War the area fell to below 4,000 acres, but it has increased again largely as a result of the beneficial effect of improved varieties and techniques on average yields and of the protection to Australian growers given by the tariff (*see also* (vii) Tobacco Factories on page 939).

In 1958-59, the area planted was 15,151 acres which was 77 per cent. more than the average for the ten years ended 1957-58. The production of dried leaf in 1958-59 at 13,970,000 lb. was 110 per cent. more than the average for the ten years ended 1957-58.

In the following table, particulars of the area and production of tobacco are given by States for each of the seasons 1954-55 to 1958-59, together with averages for the ten-year period ended 1957-58:—

TOBACCO : AREA AND PRODUCTION.

Season.	N.S.W.	Vic.	Q'land.	W. Aust.	N.T.	Aust.
AREA (ACRES).

1958-59	1,158	4,885	6,729	1,198	..	13,970

2. **The Tobacco Industry.**—(i) *Marketing.* In the early days, purchase of the leaf at the farms was the usual practice but towards the end of the 1930's the auction system was introduced by arrangement between the growers' associations and the manufacturers.

On 9th May, 1941, the Australian Tobacco Board was constituted under the National Security (Australian Tobacco Leaf) Regulations for the purpose of facilitating and regulating the marketing of Australian grown tobacco leaf. All leaf was under the control of the Board, the growers being paid on the valuation as appraised by the Board. The Board ceased to function on 24th September, 1948, and subsequent crops have been marketed at open auction in the respective States. Queensland has had its own Tobacco Leaf Marketing Board since 1948. Growers in New South Wales voluntarily submit their leaf to the Queensland Board for sale at auction. Leaf from Victoria is sold at auction in Melbourne for the Victoria Tobacco Growers' Association. In Western Australia, the leaf is sold in Perth for the Western Australian Tobacco Growers' Association (Inc.).

(ii) *Central Tobacco Advisory Committee.* The Australian Agricultural Council formed the Standing Advisory Committee on Tobacco during 1950. This Committee consisted of representatives of tobacco growers, tobacco manufacturers and the Commonwealth and State Governments. Its main functions were to review the industry and make recommendations on its problems.

The Committee was reconstituted by the Agricultural Council during 1952-53 and its terms of reference are as follows:—

“To report annually to the Agricultural Council, through the Standing Committee on Agriculture and also to the Commonwealth Minister for Customs and Excise, through the Chairman of the Council, on the following:—

- (i) The percentage of Australian tobacco which should be incorporated in locally manufactured tobacco under Customs regulations, having regard to the anticipated volume of Australian production of usable leaf available for absorption by the manufacturing industry;
- (ii) The progress of the industry during the year with particular reference to—
 - (a) marketing problems encountered,
 - (b) a review of prices being paid to farmers in relation to quality of leaf,
 - (c) such other problems as may be retarding the progressive development of the industry, such as the volume of importation of manufactured tobacco and cigarettes.”

(iii) *Industry Inquiries.* The tobacco industry has been the subject of a number of investigations during the past 30 years. The Tariff Board inquired into the industry in 1923, 1926, 1931 and 1940 and reports were issued in respect of the last three inquiries.

(iv) *Commonwealth Grants.* Details of the recommendations by the Tobacco Inquiry Committee and grants periodically approved by the Commonwealth Government up to 30th June, 1953, are given in Official Year Book No. 40, pages 895, 896 and in previous issues.

(v) *Research and Investigations.* The Commonwealth Scientific and Industrial Research Organization has been investigating many fundamental problems connected with tobacco culture. One of the major achievements of this organization was the development in the mid-1930's of a technique to control blue mould in the seed bed. Investigations are now being made into the control of this disease in the field. State Departments of Agriculture are also carrying out investigations over a wide range of problems, being concerned mainly with variety trials, irrigation, disease and pest control, crop rotation and cultural practices. The New South Wales Department of Agriculture has recently developed a commercial blue mould resistant hybrid.

In 1955, the Central Tobacco Advisory Committee formulated a programme for increased research and advisory activities. The capital costs of establishing this programme were estimated at £168,000 of which the Commonwealth Government and tobacco manufacturers each agreed to contribute half. It was estimated that to maintain the programme would cost approximately £63,000 per annum, of which the Commonwealth Government contributes £21,000, tobacco growers £14,000 and tobacco manufacturers £28,000 per annum. A Tobacco Industry Trust Account was established to receive these contributions. This programme commenced in 1956.

During the first three years of the operation of the Trust Account, £464,689 was allocated to State and Commonwealth departments. The allocation for 1959-60 is £161,000.

(vi) *War Service Land Settlement.* Due to technical difficulties, tobacco growing under War Service Land Settlement has been considerably curtailed. Farms designed for tobacco growing in Western Australia have been converted to an alternative use or sold outside the scheme. Farms at Clare, Queensland, while still growing tobacco, are not proving as successful as anticipated. It appears that crops alternative to tobacco may play an increasingly important part in the future.

(vii) *Tobacco Factories.* Manufacturers of Australian cigarettes and tobacco are granted a lower rate of duty on imported tobacco leaf, provided it is blended with a prescribed minimum percentage of Australian leaf. These percentages rose from 3 per cent. for cigarettes and 5 per cent. for tobacco in November, 1946, to 22 per cent. and 23½ per cent. respectively from 1st July, 1959. The percentages to apply from 1st July, 1960, when most of the 1959 tobacco crop will be used in manufacture, are 28½ per cent. and 24½ per cent. respectively. In 1958-59, the quantity of cured leaf used in tobacco factories in Australia amounted to 49.0 million lb. of which 8.8 million lb. was of local origin. The balance was imported, chiefly from the United States of America.

3. *Oversea Trade.*—Imports of tobacco and manufactures thereof into Australia during 1958-59 were valued at £14.5 million, including 38.7 million lb. of unmanufactured tobacco valued at £13.7 million. Exports of tobacco and manufactures thereof during 1958-59 were valued at £461,497.

§ 19. Hops.

Hop-growing in Australia is practically confined to Tasmania and some of the cooler districts of Victoria, the total area for 1958-59 being 1,883 acres, of which 1,443 acres were in Tasmania, and 440 acres in Victoria. A small area was also under hops in Western Australia, but the details are not available for publication. The Tasmanian area, though still small, has increased during the present century, the total for 1901-2 being 599 acres. The cultivation of hops was much more extensive in Victoria some 70 years ago than at present, the area in 1883-84 being 1,758 acres.

The production of hops in Australia is insufficient to meet local requirements, and additional supplies are imported to meet the needs of the brewing industry. In the following table, details of the production and imports of hops and the quantity of hops used in breweries are shown for each of the years 1954-55 to 1958-59. Exports of hops are not recorded separately, but are negligible.

HOPS : PRODUCTION AND DISPOSAL, AUSTRALIA.

Year.	Production.		Imports.	Net Available Supplies. (a)	Quantity used in Breweries
	Quantity.	Gross Value.			
	Cwt.	£'000.	Cwt.	Cwt.	Cwt.
1954-55	34,075	1,106	10,311	44,386	42,976
1955-56	34,374	1,102	16,880	51,254	43,638
1956-57	25,230	857	3,074	28,978	40,250
1957-58	32,710	1,137	4,502	37,212	39,370
1958-59	36,499	1,273	8,471	44,970	38,664

(a) Disregards movements in stocks.

The Tariff Board conducted an inquiry into the hop-growing industry and issued report on 12th June, 1945.

§ 20. Flax.

1. **Flax for Fibre.**—During the 1914-18 and 1939-45 Wars, there was an acute shortage of flax fibre and the expansion of production was encouraged by the Commonwealth Government, the area sown reaching a maximum of more than 61,000 acres in 1944-45.

In recent years the growing of flax for fibre has been confined to Victoria, South Australia and Western Australia. In Victoria and South Australia, production has been directed and controlled by the Flax Commission, which took over the Commonwealth flax undertakings from the Flax Production Committee on 1st November, 1954. In Western Australia, the industry is carried on by a Co-operative Company.

In November, 1957, the Government approved a three-year extension of bounty assistance to flax producers and decided that the Commonwealth should withdraw from flax fibre production.

One important factor which influenced the Government in making this decision was the view expressed by the defence authorities that the industry no longer has the same defence significance as it had when the Flax Commission was first established.

In accordance with the decision, growing of flax under contract to the Flax Commission did not take place in 1959, and all of the Commonwealth mills finished operating before the end of the year. As a result, Western Australia became the only producing State, and its mill at Boyup Brook was the only flax mill left in production.

It appears that many former growers of flax for fibre in Victoria have now switched to growing flax for linseed.

Details of the area under flax and the production of straw are given in the following table:—

FLAX FOR FIBRE : AREA AND PRODUCTION.

Season.	Victoria.	S. Aust.	W. Aust.	Australia.
AREA (ACRES).				
1954-55	5,878	1,314	464	7,656
1955-56	2,550	526	1,594	4,670
1956-57	2,196	1,864	1,757	5,817
1957-58	5,550	1,410	1,002	7,962
1958-59	2,015	2,015
PRODUCTION (TONS OF STRAW).				
1954-55	7,799	1,888	500	10,187
1955-56	4,637	1,150	1,875	7,662
1956-57	4,013	4,606	2,051	10,670
1957-58	9,923	3,077	1,246	14,246
1958-59	3,665	3,665

2. **Flax for Linseed.**—Prior to 1948–49, the growing of flax for linseed oil had not been developed extensively in Australia. Since then, however, action has been taken to develop this industry, the ultimate objective being the production of sufficient linseed to meet Australia's total oil requirements. Development of the industry proceeded rapidly until 1951–52 when 53,741 acres were sown. In 1952–53, there was a decline in the acreage and a further decline in 1953–54 when 6,343 acres only were sown. Since then, an increase to £70 per ton, f.o.r. ports, in the guaranteed price, which is notified to growers by the crushers early in each season, has led to an increase in the area sown to 19,403 acres in 1954–55, 90,102 acres in 1956–57 and 96,465 acres in 1957–58. In 1958–59, the area sown declined to 37,225 acres.

The question of assistance to the industry was investigated by the Commonwealth Tariff Board in 1953 and their conclusions are contained in their Report on *Linseed and Linseed Products* dated 23rd October, 1953.

Details of the area and production of flax for linseed are shown in the following table for the seasons 1954–55 to 1958–59.

FLAX FOR LINSEED : AREA AND PRODUCTION.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
AREA (ACRES).							
1954–55	1,826	1,829	15,569	171	..	8	19,403
1955–56	1,817	580	45,202	128	47,727
1956–57	2,404	1,143	86,265	290	90,102
1957–58	2,251	4,091	90,255	221	549	..	97,367

1957–58	36	1,149	7,279	49	68	..	8,581
1958–59	1,196	2,769	6,510	151	42	..	10,668

§ 21. Peanuts.

The production in Australia of peanuts, or groundnuts, is mainly confined to Queensland, although small quantities are grown in New South Wales, Western Australia and the Northern Territory. Details of the area and production are given in the table below.

PEANUTS : AREA AND PRODUCTION, AUSTRALIA.

Season.	Area (Acres).				Production (Tons).			
	N.S.W.	Q'land.	N.T.	Aust.(a)	N.S.W.	Q'land.	N.T.	Aust.(a)
1954–55	769	37,971	780	39,520	346	14,001	135	14,482
1955–56	414	31,493	544	32,451	174	8,633	40	8,847
1956–57	419	25,017	208	25,644	234	8,676	17	8,927
1957–58	686	34,739	156	35,581	401	18,326	15	18,742
1958–59	867	59,279	211	60,357	581	31,084	121	31,786

(a) Excludes Western Australia for which details are not available for publication.

The gross value of the 1958–59 crop (excluding the small crop in Western Australia) was £3,520,000 which was approximately £1,276,000 more than in 1957–58.

Formerly, considerable quantities of peanut kernels were imported, chiefly from India, for the extraction of oil. These imports were suspended from 1946 to 1949, but have since been resumed on an increasing scale. Total supplies available for consumption in Australia in 1958–59 were 27,435 tons (shell equivalent), after allowing for an increase in stocks held by the Peanut Marketing Board of 9,350 tons. Supplies were made up of 33,721 tons from Australian production received into store by the Board and 3,064 tons imported.

§ 22. Cotton.

1. **General.**—The production of cotton in Australia has been, until recently, restricted to Queensland, where cultivation began in 1860. Cotton has been grown experimentally in some other States in recent years and the first commercial crop outside Queensland has been grown in Victoria in the 1959–60 season. Details of areas sown for years prior to 1930 and of Government financial assistance to growers up to 1940 appear in Official Year Book No. 39 and earlier issues.

Australia produces only a small part of its requirements of raw cotton, the balance in 1958–59 being obtained chiefly from the United States of America and Mexico. Efforts have been directed towards increasing production by an extension of area, the introduction of irrigation methods, and payment of bounties, but so far they have not met with much success. Production increased very considerably during the early years of the 1939–45 War, reaching a peak of 17,550,000 lb. unginned cotton in 1939–40, but has since fallen away. The expansion of the industries connected with the spinning and weaving of cotton is referred to in Chapter VI.—Manufacturing Industry.

The Raw Cotton Bounty Act 1940 provided an extension, until 31st December, 1946, of assistance previously granted by way of bounty. The Act was amended in August, 1946, to provide a guaranteed net average return to cotton-growers of 15d. per lb. of raw cotton for five years from 1st January, 1947. It was superseded by the Cotton Bounty Act 1951, which guaranteed a net average return of 9½d. per lb. of seed cotton for five years from 1st January, 1951. The 1951 Act was amended in 1952 to provide for a guaranteed return of 14d. per lb. of seed cotton for the 1953 crop, and for variation by regulation of the guaranteed return, in succeeding seasons, with a minimum of 9½d. per lb. The Act, as amended in 1952 and 1957, was extended in 1958 to cover production up to 31st December, 1963. The guaranteed return has remained at 14d. per lb. of seed cotton since the 1953 season.

2. **Area and Production.**—The area under cultivation and the production in Queensland for the years 1954 to 1958 are shown hereunder. Details of the production of ginned cotton are derived from published statistics of the Queensland Cotton Marketing Board.

COTTON: AREA AND PRODUCTION IN QUEENSLAND.

Season ended December—	Area Sown.	Production of Cotton.				Average Yield per Acre Sown.	
		Unginned.		Ginned.	Ginned— Equivalent in Bales. (a)	Unginned.	Ginned.
		Quantity.	Gross Value.				
		'000 lb.	£'000.	'000 lb.	Bales.	lb.	lb.
1954	8,377	3,597	208	1,365	2,819	429	163
1955	13,290	5,359	307	2,164	4,386	403	163
1956	11,338	3,809	224	1,460	3,046	336	129
1957	10,364	3,390	213	1,341	2,845	327	129
1958	10,493	4,004	249	1,536	3,073	382	146

(a) Bales of approximately 500 lb.

3. **Consumption of Raw Cotton.**—The following table shows details of the availability and actual consumption of raw cotton in Australian factories, during the last five years:—

RAW COTTON: PRODUCTION, IMPORTS AND CONSUMPTION, AUSTRALIA.
(^{'000} lb.)

Year.	Production.	Imports.	Total.	Consumption of Raw Cotton.
1954–55	1,365	43,218	44,583	47,098
1955–56	2,164	37,614	39,778	45,262
1956–57	1,460	47,805	49,265	46,699
1957–58	1,341	42,578	43,919	49,054
1958–59	1,536	43,984	45,520	47,323

§ 23. Financial Assistance to Primary Producers.

NOTE.—See also Chapter XXI.—Public Finance, page 328.

Direct financial assistance to primary producers by the Commonwealth Government takes the form of bounties, subsidies and other financial assistance. Brief details of some of the more important payments are given below:—

(i) *Cotton Bounty.* The Cotton Bounty Act provides for payment of a bounty on seed cotton delivered by growers to processors. The present rate of bounty is designed to give growers an average return of 14d. per lb. The total payment in 1957–58 was £64,702 and in 1958–59 it was £139,455.

(ii) *Dairy Products Bounty.* Under the provisions of the Dairy Industry Act 1952, a subsidy was paid to dairymen to ensure them a return equal to the average cost of production for a specified quantity equal to local consumption plus twenty per cent. The Dairy Industry Act 1957 provided for continuation of the scheme for a further five years. A new feature, however, was that any subsidy made available under the scheme would be determined before the commencement of each season and would be on the basis of a fixed amount in any dairying year. In 1958–59, total payments amounted to £13,500,000, the same as in 1957–58.

(iii) *Flax Fibre Bounty.* From 1954 to 1958, a bounty was paid on scutched flax fibre produced from flax grown in Australia. In 1957, the Act was amended to provide for the calculation of the bounty payable on the basis of fibre sold, in lieu of fibre produced. In 1957–58, payments amounted to £62,348. Expenditure in 1958–59 was £93,167.

Other forms of financial assistance to primary producers include payments for Cattle Tick Control, the Dairy Industry Extension Grant, Flood, Drought and Bush Fire Relief, Food Production, Expansion of Agricultural Advisory Services and Assistance to the Tobacco Industry.

§ 24. Fertilizers.

1. *General.*—In the early days of settlement in Australia, scientific cultivation was little understood. It was common, as in other new countries, for the land to be cropped continuously to a degree of exhaustion. This practice is very much less in evidence now than in the early days of Australian agricultural development. Under the guidance of the State Departments of Agriculture and the relevant Commonwealth authorities, such as the Bureau of Agricultural Economics and the Commonwealth Scientific and Industrial Research Organization, scientific farming is now much more widely practised. The importance of fallowing, crop rotation, and the application of suitable fertilizers in adequate quantities is now appreciated by farmers. The introduction of the modern seed-drill, acting also as a fertilizer-distributor, has greatly facilitated the use of artificial manures and much land formerly regarded as useless for cultivation has now been made productive. During the last few years, the application of fertilizers from aircraft, particularly to pastures, has become a feature of modern farm technique, and has enabled the artificial fertilization of some areas which would not be readily accessible to ground machinery. Details of the area treated and quantity of fertilizer used by both aerial and ground methods of application in total are shown in para. 3, below, while further details on aerial top-dressing are given in § 25.

In order to protect the users of artificial fertilizers, legislation has been passed in each of the States regulating the sale and prohibiting the adulteration of fertilizers. A list of these Acts and their main features are given in Official Year Book No. 12, page 378.

2. *Imports and Exports.*—The Australian output of prepared fertilizers is derived chiefly from imported rock phosphate and is sufficient for local requirements.

The chief sources of Australia's supplies of rock phosphate are Nauru, Christmas Island (Indian Ocean) and the Gilbert and Ellice Islands. Sodium nitrate is obtained chiefly from Chile.

The imports of artificial fertilizers during the five years ended 1958–59 are shown in the following table:—

ARTIFICIAL FERTILIZERS : IMPORTS INTO AUSTRALIA.

Fertilizer.		1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
Ammonium Sulphate	tons	35,056	9,466	28,251	20,945	19,979
	£'000	764	228	624	522	497
Potash Salts ..	tons	27,403	39,099	38,246	53,570	43,912
	£'000	489	652	638	882	710
Rock Phosphate ..	tons	1,086,884	1,418,527	1,321,607	1,273,766	1,353,739
	£'000	2,166	2,828	2,804	3,325	3,750
Sodium Nitrate ..	tons	11,714	14,102	11,219	14,430	7,505
	£'000	250	323	252	354	152
Other	tons	399	506	785	4,619	16,951
	£'000	14	16	20	125	497
Total	tons	1,161,456	1,481,700	1,400,108	1,367,330	1,442,086
	£'000	3,683	4,047	4,338	5,208	5,606

Export of fertilizers (practically all of which were manufactured locally) amounted to 14,059 tons valued at £442,000 in 1958-59 compared with 2,646 tons valued at £58,000 in 1957-58.

3. **Quantities Used Locally.**—Information regarding the area treated with artificial fertilizers and the quantity of artificial fertilizers (superphosphate, bonedust, nitrates, etc.) used in each State during the 1958-59 season is given in the following table. Details of the area fertilized with natural manure (stableyard, etc.) are no longer collected.

AREA FERTILIZED AND QUANTITY OF ARTIFICIAL FERTILIZERS USED, 1958-59.

State or Territory.	Area Fertilized ('000 Acres).			Fertilizers Used (Tons).

1958-59 ..	344,490	730,863	111,741	410,896	560,091	102,280	144	2,724	2,263,229

4. **Local Production.**—Complete information regarding local production of fertilizers is not available. The number of firms engaged in the manufacture of chemical fertilizers in Australia for the year 1958–59 was 48, made up as follows:—New South Wales, 12; Victoria, 7; Queensland, 8; South Australia, 8; Western Australia, 6; and Tasmania, 7. The production of superphosphate in Australia during 1958–59 amounted to 2,124,000 tons.

§ 25. Aerial Agriculture.

During recent years, aircraft have been used for top dressing and seeding (principally of pastures) and for spraying and dusting of crops and pastures. During the year ended 31st March, 1959, the total area treated by aircraft was 2,268,392 acres—1,335,575 acres were topdressed and/or seeded, 835,957 acres were sprayed or dusted with insecticides, fungicides or herbicides, of which 800 acres were dusted in conjunction with top-dressing operations, and 97,660 acres were baited for rabbit destruction. For 1956–57 (the first year for which data are available), the total area treated was 1,465,959 acres, and in 1957–58 it was 2,011,715 acres. The following table shows details of area treated and materials used for each State for the year ended 31st March, 1959. The information was collected by the Department of Civil Aviation.

AERIAL AGRICULTURE : OPERATIONS DURING 1958–59.

in one operation are counted once only.

(b) Areas treated with more than one type of material
(c) Includes 97,660 acres baited for rabbit destruction.

§ 26. Ensilage.

1. **Government Assistance.**—The several State Governments devote a considerable amount of attention to the education of the farming community with regard to the value of ensilage. Monetary aid is afforded in the erection of silos, and expert advice is supplied in connexion with the design of the silos and the cutting and packing of the ensilage.

2. **Quantity Made and Stocks Held on Farms.**—Information regarding production and farm stocks of ensilage for the years ended 31st March, 1957, 1958 and 1959, are given in the following table.

ENSILAGE : PRODUCTION AND FARM STOCKS.
(Tons.)

(a) Not available.

The drought of 1902-3 drew increased attention to the value of stocks of ensilage, and in the following seasons there was an increase both in the number of holdings on which ensilage was made and in the quantity produced. The accumulated stocks proved of great value during the 1914 drought. The quantities of ensilage made since 1914 have fluctuated considerably, but increased up to 1939-40 in which year it was 303,495 tons. During subsequent seasons, production declined to the extremely low level of 94,744 tons during the drought year 1944-45, rising to 180,622 tons in 1947-48 but decreasing again in succeeding years to 110,474 tons in 1951-52. Since then, production has increased substantially. In 1957-58, 431,104 tons were made and in 1958-59 a record production of 829,563 tons was recorded.

§ 27. Agricultural Colleges and Experimental Farms.

Agricultural colleges have been established in all States except Tasmania. The primary function of these colleges is the training of students in the various phases of agricultural work and livestock husbandry. Students are required to undertake a considerable amount of practical work in addition to lectures and theory. A secondary function of the colleges is agricultural research and experimentation. To a lesser degree, they carry out extension work in the form of public field days. Upon graduation, students receive diplomas in agriculture, dairying, etc., according to the course undertaken.

Experimental farms have been set up by State Departments of Agriculture in all States. They are primarily concerned with agricultural research and experimentation, each farm concentrating on problems specific to the district in which it is located. The results of the work undertaken are passed on to farmers at field days, which are held at regular intervals, through publication in various agricultural or scientific journals and through the agricultural extension officers of the State Departments of Agriculture.

The Commonwealth Scientific and Industrial Research Organization has field stations throughout Australia, and sometimes undertakes research jointly with the appropriate State authorities. It also has a number of regional laboratories throughout the country. These laboratories conduct research into agronomic problems as they occur in each particular region. The most recently established laboratory which is concerned with all aspects of the culture and production of tobacco is at Mareeba, Northern Queensland. The State Departments of Agriculture study problems of particular significance within their own boundaries. The universities also carry out valuable research work on their own experimental farms.

§ 28. Tractors on Rural Holdings.

The growth of mechanization in agriculture is indicated by the increase in the number of tractors on rural holdings from 41,943 in 1939 to 232,819 in 1959. The annual increase in numbers reached its peak in 1951-52 when over 20,000 additional tractors were enumerated on holdings. The rate of increase has declined in more recent years and over the last five years averaged only about 12,000 per annum.

The table below sets out the number of wheeled and crawler type tractors by States for the five years ended 1959.

TRACTORS ON RURAL HOLDINGS.

§ 29. Number and Area of Rural Holdings and Employment Thereon.

NOTE.—In New South Wales, in 1955–56, the lists of rural holdings used in the collection of agricultural and pastoral statistics were reconciled with lists of ratable land of one acre or more in extent recorded by country shires for rating purposes. This reconciliation led to the addition of a number of holdings to the annual collection.

The only items of agricultural and pastoral statistics which were materially affected by the inclusion of the additional land holdings were:—number of holdings, area of holdings, persons engaged on rural holdings and wages and salaries paid. To permit continuity of comparison of the relevant statistics, the effects of the additions to the collection are set out in detail in Official Year Book No. 44, pages 911–912.

1. Number and Area.—A holding in Australia has been defined by statisticians on a more or less uniform basis and discrepancies which exist are not of sufficient importance to vitiate comparisons. For the purpose of these statistics, a holding may be defined as land of one acre or more in extent, used in the production of agricultural produce, the raising of livestock or the products of livestock.

There are considerable fluctuations from time to time in the numbers of very small holdings and it is very difficult to determine in some cases whether or not they are rural holdings within the definition.

In addition, in the very dry parts, such as the far west of New South Wales and Queensland and the remoter parts of South Australia and Western Australia, there are large areas of marginal lands sporadically occupied under short-term lease or other arrangement and the areas so occupied tend to fluctuate with the seasons. Similarly, there are rugged areas in the mountain country of some States which are also occasionally occupied.

The following table shows the recorded number and area of the holdings in each State for the seasons 1954–55 to 1958–59.

RURAL HOLDINGS : NUMBER AND AREA.

(c) New series. See NOTE at

2. **Special Tabulation Relating to Rural Holdings.**—(i) *Classification by Size.* Some of the information obtained from the 1955-56 Agricultural and Pastoral Census was classified by size and the results of these tabulations are shown in detail in *Primary Industries Part I—Rural Industries*, Bulletin No. 51, and in summarized form in *Official Year Book No. 44*, page 913.

(ii) *Classification by Type.* An experimental classification of holdings by type was carried out for New South Wales for 1955-56 in conjunction with the classification by size referred to above. An outline of the methods used and the results obtained are shown on page 914 of *Official Year Book No. 44*. This was the first attempt at a detailed classification of this kind in Australia although a very simple classification into the three categories—agricultural, pastoral or dairying (on the basis of main activity)—had been made in some earlier years. The methods used in the 1955-56 experimental classification are being used as the basis for an Australia-wide classification of holdings by type to be carried out for the 1959-60 season in conjunction with the classification of certain characteristics by size for that year.

3. **Employment on Rural Holdings.**—The following table shows, for each State, the recorded number of males working on rural holdings as at 31st March, 1959. Additional particulars relating to the number of males employed in agriculture are available up to 1941-42 in *Official Year Book No. 36*, page 852, and previous issues. Similar details for later years are not available.

CHAPTER XXIII.

PASTORAL PRODUCTION.

NOTE.—Except where otherwise indicated, values of Australian oversea trade shown throughout this chapter are expressed as f.o.b., Australian currency, port of shipment.

§ 1. Initiation and Growth of the Pastoral Industry.

1. **Livestock Numbers.**—A detailed account of the various enumerations of livestock in Australia made prior to 1860 was given in previous issues of the Year Book. Since 1860, annual enumerations have been made, based, with few exceptions, on actual collections made through the agency of the State police or by post. Particulars concerning the numbers of each of the principal kinds of livestock in Australia at decennial intervals from 1860 to 1950, and from 1955 onwards in single years, are given in the following table, and are shown continuously on the graph on page 957.

LIVESTOCK : AUSTRALIA.
(‘000.)

Year.	Horses.	Cattle.	Sheep.	Pigs.	Year.	Horses.	Cattle.	Sheep.	Pigs.
1860 ..	432	3,958	20,135	351	1940 ..	1,699	13,080	119,305	1,455
1870 ..	717	4,276	41,594	543	1950 ..	1,057	14,640	112,891	1,123
1880 ..	1,069	7,527	62,184	816					
1890 ..	1,522	10,300	97,881	891	1955 ..	803	15,836	130,849	1,297
1900 ..	1,610	8,640	70,603	950	1956 ..	770	16,457	139,124	1,166
1910 ..	2,166	11,745	98,066	1,026	1957 ..	737	17,257	149,802	1,325
1920 ..	2,416	13,500	81,796	764	1958 ..	694	16,892	149,315	1,423
1930 ..	1,793	11,721	110,568	1,072	1959 ..	671	16,257	152,685	1,289

While livestock numbers (particularly sheep) have increased substantially since 1860, marked fluctuations have taken place during the period, mainly on account of droughts which have from time to time left their impress on the pastoral history of Australia. These occurred in 1868, 1877, 1883–4, 1892, 1893, 1895, 1901–2, 1912, 1914, 1918, 1919, 1922–23, 1925–26, 1927–28, 1929–30, 1940–41 and 1944–45 to 1946–47.

The years in which the numbers of livestock attained their maxima are as follows:—Horses, 1918 (2,527,000); cattle, 1957 (17,257,000); sheep, 1959 (152,685,000); and pigs, 1941 (1,797,000).

The distribution throughout Australia of beef cattle, dairy cattle, sheep and pigs as at 31st March, 1955, is shown in the maps on pages 909–12 of Official Year Book No. 43.

The numbers of horses, beef cattle and sheep in each State and Territory are shown later in this chapter; similar information for dairy cattle and pigs appears in Chapter XXIV.—*Farmyard, Dairy and Bee Products.*

2. **Minor Classes of Livestock.**—Statistics of the minor classes of livestock (goats, camels, mules, donkeys, etc.) have not been collected in recent years. The last year in which all States, other than Victoria, collected this information was 1941, when total numbers were as follows:—Goats, 80,366; camels, 2,267; and mules and donkeys, 10,881. Of these, goats were most numerous in Queensland, and camels, mules and donkeys in Western Australia. Further details have been published in earlier issues of the Official Year Book.

3. **Carrying Capacity of Pastoral Holdings.**—The carrying capacity of pastoral holdings has been increased in recent years, due in some measure to the succession of good seasons experienced since 1946 (with the exception of the 1957–58 season, when prevailing dry conditions caused a slight decline in cattle and sheep numbers). Other important factors contributing to the progressive increase over this period have been the increased attention to pasture improvement and the reduction of rabbit infestation.

There was a considerable decline in the rabbit population following the introduction of myxomatosis in 1950. This disease spread rapidly and the number of rabbits has been kept at a low level in recent years by the use also of poison baits, etc.

Statistics of the area under sown grasses and clovers which have been collected on a uniform basis in all States since 1952–53 reveal that the area sown has been considerably increased. In 1958–59, the area under sown grasses and clovers (excluding native grasses) totalled 34.1 million acres, an increase of 0.4 million acres (1 per cent.) over 1957–58 and 13.0 million acres (61 per cent.) over 1952–53. In recent years, the sowing and top-dressing of pastures has been facilitated by the increasing use of aircraft in these operations, an area of 1.3 million acres being sown and/or top-dressed in the year ended March, 1959.

4. **Value of Pastoral Production.**—(i) *Gross, Local and Net Values, 1958–59.* Values of pastoral production for each State are shown for 1958–59 in the following table. Further details of the source of the information and an explanation of the terms used in this compilation will be found in Chapter XXX.—Miscellaneous. Maintenance costs have not been computed in all States and depreciation has not been deducted; consequently the net values are inflated to the extent of these costs.

GROSS, LOCAL AND NET VALUES OF PASTORAL PRODUCTION, 1958–59.

(£'000.)

State.	Gross Production Valued at Principal Markets.	Marketing Costs.	Gross Production Valued at Farm.	Farm Costs.		Net Value of Production. (a)

(a) No deduction has been made for depreciation and maintenance. Excludes payments to wool-growers of profits from the war-time wool disposal plan. (b) No allowance has been made for costs of power, power kerosene, petrol and other oils. (c) Includes Northern Territory and Australian Capital Territory.

5. Indexes of Quantum and Price of Pastoral Production, 1954-55 to 1958-59.—The quantum indexes relate to gross output of farm products valued at constant prices. The quantities of each farm product produced each year have been re-valued at the unit gross value for the period 1936-37 to 1938-39. The price indexes relate to average "prices" of farm products realized in the principal markets of Australia. Average quantities of each product marketed in the period 1946-47 to 1950-51 have been used as fixed weights. For further details of the methods of calculating these indexes and of the weights used, see Chapter XXX.—Miscellaneous.

INDEXES OF QUANTUM(a) AND PRICE OF PASTORAL PRODUCTION:
AUSTRALIA.

(Base: Average 3 years ended June, 1939 = 100.)

Particulars.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
<i>Quantum(a) produced—</i>					
Wool	132	146	164	148	164
Other products	120	123	128	134	152
<i>Total Pastoral</i> ..	127	136	148	142	159
Total per Head of Population ..	96	100	106	100	109
<i>Price—</i>					
Wool	540	468	607	473	370
Other products	409	424	427	377	435
<i>Total Pastoral</i> ..	489	451	536	435	396

(a) Index of value at constant prices, i.e., quantities revalued at average unit values of base years (1936-37 to 1938-39).

6. **Consumption of Meats.**—The quantity of meat (including cured and canned meat) in terms of carcass weight and edible offal available for consumption in Australia in 1958–59 was 1,087,581 tons. This is equivalent to 244.8 lb. per head of population compared with 244.6 lb. per head in 1957–58, and an average of 253.0 lb. during the years 1936–37 to 1938–39.

Although it is not easy to obtain strictly comparable particulars for other countries, it appears from data published by the Food and Agricultural Organization of the United Nations in its *Food Balance Sheets* that in recent years consumption of meat per head in Australia has been at approximately one and a half times the level of that in Canada and the United States of America.

7. **Marketing of Meat.**—(i) *General.* The Australian Meat Board, consisting of representatives of producers, processors, exporters and the Commonwealth Government, is responsible for the control of all exports of Australian meat and meat products. Further information on the powers, etc., conferred on the Board under the Meat Export Control Act 1935–1953 is given on page 801 of Official Year Book No. 40.

(ii) *United Kingdom Long-term Purchase Agreements.* Details of the long-term meat contracts with the United Kingdom Government from the outbreak of the 1939–45 War up to 30th June, 1952, and of the Fifteen Year Meat Agreement (1952–67) are given on page 710 of Official Year Book No. 41 and in earlier issues.

The Fifteen Year Meat Agreement (1952–67) between the United Kingdom and Australian Governments has as its objectives the promotion of meat production in Australia enabling increased exports to be made to the United Kingdom and the provision of a satisfactory market in the United Kingdom for such meat. It covers beef and veal, and mutton and lamb.

(iii) *Cessation of Bulk Purchasing.* Following the announcement in September, 1953, that the United Kingdom Ministry of Food would cease bulk purchasing of meat, arrangements were made between the Australian Meat Board and the Ministry for the reversion to private trading in the United Kingdom. The main features of the arrangements are:—

- (a) Mutton and lamb exported after 1st July, 1954, and beef, veal and pigmeat exported after 1st October, 1954, direct to United Kingdom importers are to be sold on the open market under methods similar to those which applied pre-war.
- (b) The following minimum prices (f.o.b. port of shipment), to operate until 30th September, 1955, were agreed upon:—Beef and veal, 13.18d. stg. per lb.; lamb, 13.61d. stg. per lb.; and mutton, 6.05d. stg. per lb. The minimum prices are to be reviewed for subsequent years.
- (c) In the event of market prices for the various classifications of meat averaging below the minimum, the Ministry is to make a payment to the Australian Government corresponding to the amount of the deficiency. So as to determine the extent of any deficiency, a procedure designed to measure as accurately as possible the weighted average level of wholesale prices of Australian meat on the United Kingdom market has been agreed upon.

(iv) *Private Trading.* After eight months of open trading, the Board estimated that a deficiency payment would be received in respect of beef for the first year. In order to make arrangements for this anticipated deficiency to be passed on to the producer, the Meat Agreement (Deficiency Payments) Act was passed by the Commonwealth Government in May, 1955. Payments were to be made on the understanding that they were, or would be, reflected in the price paid to producers.

To make provision for recoupment by the Board of any overpayment, the Meat Export (Additional Charge) Act was also passed in May, 1955.

Negotiations were made in Australia during August and September, 1955, to review minimum prices and the working of the Agreement generally. The following minimum prices were fixed for the three years ended 30th September, 1958:—For beef and veal and lamb the same as for the year ended 30th September, 1955, and for mutton the average prices realized to the end of April, 1955 (approximately 5.8d. stg. per lb.). In addition, minimum beef and veal prices were fixed for the three years 1958–61 at 5 per cent. below those for the 1955–58 period. Australia was entitled to export a free quota of 10,000 tons of beef, veal, lamb and mutton to destinations other than the United Kingdom and the

Colonies. Under the terms of the Agreement, provision was made for additional free quotas to be requested should depressed prices or other circumstances justify an approach of this kind. Under this arrangement, for the year ended 30th September, 1956, an additional 5,000 tons of beef for export to any destination was agreed upon.

In July and August, 1956, the annual review of the operation of the Agreement took place in London. It was agreed that Australia should be entitled to export 15,000 tons of beef, veal, mutton and lamb to destinations other than the United Kingdom and Colonies during each of the meat years 1956-57 and 1957-58.

Because of a rise in beef prices in the United Kingdom, the deficiency payments made by the Board during the year ended 30th September, 1955, exceeded the sum received from the United Kingdom for the same period. In an endeavour to recoup some of this overpayment, under the terms of the Meat Export (Additional Charge) Act, a levy of one-eighth of a penny per lb. was imposed on certain classes of beef exported to the United Kingdom out of stocks placed into store from 1st February to 16th April, 1956.

From 1st October, 1955, until April, 1958, beef prices in the United Kingdom were consistently below the level of the guarantee and consequently Australia "earned" deficiency payments as follows:—

Year.	Amount.
1954-55	£150,000
1955-56	£3,250,000
1956-57	£5,930,000

No deficiency payments were received in 1957-58 or 1958-59.

The receipt of these moneys enabled the Australian Meat Board to make substantial bounty payments on beef exported to the United Kingdom. The rates of payment made during the 1954-55 and 1955-56 seasons are given on pages 888-9 of Official Year Book No. 43 and on pages 920-1 of Official Year Book No. 44 for 1956-57.

For 1958, a new "chiller" grade of export beef was introduced. Beef of the new grade, whether exported in the chilled or frozen form, received a bounty of 5d. per lb. The bounty on bone-out piece beef was increased from 4d. to 5d. per lb., and on certain classes of bone-in piece beef from 3d. to 5d. per lb. The basic rate of 3d. per lb. was maintained for other 1st and 2nd quality quarter beef. The bounty payments were discontinued on 27th December, 1958, on account of the relatively high prices being obtained in the United Kingdom.

Negotiations which commenced in June, 1958, with the United Kingdom Government resulted in agreement on the following points:—

- (1) Beef minimum prices for the seasons 1961-62 to 1963-64 will be the 1957-58 to 1960-61 level less 9 per cent.
- (2) Lamb minimum prices for the seasons 1957-58 to 1959-60 will be the 1954-55 to 1957-58 level less 5 per cent.
- (3) Minimum prices for mutton for the seasons 1957-58 to 1959-60 will be the 1954-55 to 1957-58 level less 15 per cent.
- (4) Beef export free quota for the seasons 1957-58 to 1960-61 will be a maximum of 7,500 tons a year of 1st and 2nd quality beef with no restriction as to the quantity of the lower grades that may be exported.

During the 1958-59 season, as in previous years, the heaviest volume of beef exported went to the United Kingdom. However, with the new free quota arrangements which operated from 1st October, 1958, Australian exporters were able to take advantage of the market for boneless manufacturing meat in the United States, and a substantial quantity of lower-grade beef, including drought-stricken stock, etc., which otherwise might not have been marketed at all, was disposed of to American manufacturers.

§ 2. Horses.

1. **Distribution throughout Australia.**—About 80 per cent. of the total number of horses in Australia are in the States of New South Wales, Queensland and Victoria. In the following table, figures are shown for each State and Territory for the years 1955 to 1959.

HORSES: NUMBER.
(^{'000.})

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
1955 ..	258	132	267	49	47	16	33	1	803
1956 ..	247	119	261	44	46	15	37	1	770
1957 ..	235	108	255	41	45	14	38	1	737
1958 ..	221	98	243	35	44	13	39	1	694
1959 ..	214	91	240	33	41	12	39	1	671

The number of horses in Australia reached its maximum during 1918, when a total of 2,527,149 was recorded. The United States of America recorded its highest number in the same year and Canada in 1921. The number in Australia has declined considerably since 1918 owing to the mechanization of transport and farming. During the period 1918 to 1959, the decrease in numbers has averaged 45,000 per annum.

A graph showing the number of horses in Australia from 1860 onwards appears on page 957.

The percentage distribution of the number of horses in each State and Territory for 1959 was:—New South Wales, 32; Victoria, 14; Queensland, 35; South Australia, 5; Western Australia, 6; Tasmania, 2; and Northern Territory, 6.

2. Oversea Trade in Horses.—(i) *Exports.* The export of horses from Australia during the early years of this century was fairly considerable, averaging about 15,000 head per annum between 1901 and 1920, exclusive of those used for war purposes during the 1914–18 War. Since then, exports have gradually declined and in 1958–59 amounted to only 349, valued at £222,223.

(ii) *Imports.* The few horses imported into Australia are mainly valuable stud animals from the United Kingdom and racehorses from New Zealand. The total number imported in 1958–59 was 391 valued at £432,207.

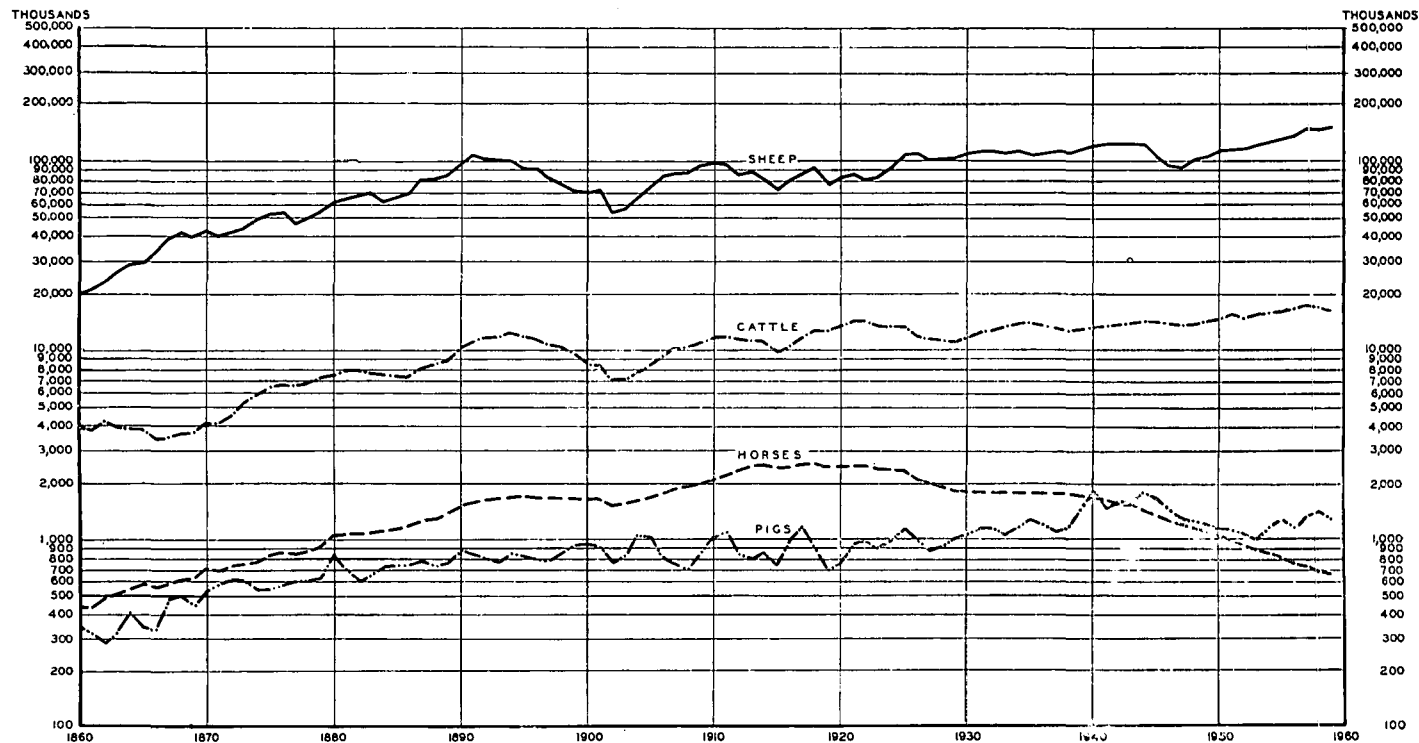

§ 3. Cattle.

1. Purposes for which Raised.—Cattle-raising is carried out in all the States, the main object in certain districts being the production of stock suitable for slaughtering purposes, and in others the raising of profitable dairy herds. The great impetus which the development of the export trade in Australian butter gave to the dairying industry led to a considerable increase in numbers and an improvement in quality of the dairy herds in the coastal districts of Victoria, New South Wales and southern Queensland in particular, the portion of Australia in the temperate zone which is best adapted to this industry. On the other hand, beef cattle are more widely distributed, particularly in the eastern States, and are raised in areas unsuitable for dairy cattle, such as the tropical area of northern Queensland, the Northern Territory, and the Kimberley district in the north of Western Australia.

2. Distribution throughout Australia.—Until 1880, New South Wales was the principal cattle-raising State, but in that year Queensland took the leading position, which it has since maintained. There was a very rapid increase in the number of cattle in Australia up to the year 1894, when 12,312,000 head were depastured. From 1895 onwards, however, the effects of droughts and the ravages of tick fever reduced the number to 7,063,000 in 1902. Following the disastrous drought which terminated in the latter year, the herds were gradually built up, and, despite recurring droughts, they continued to increase up to 14,441,000 in 1921. Numbers fluctuated in succeeding years, but from 1947 to 1957 there was a general upward movement to a record level of 17,257,000 in the latter year. With the onset of very dry conditions in 1958, numbers declined slightly to 16,892,000 and continuing drought over large areas of Queensland and the Northern Territory was largely responsible for a further reduction to 16,257,000 in 1959. A graph showing the number of cattle in Australia from 1860 onwards appears on page. 957.

LIVESTOCK : AUSTRALIA, 1860 to 1959

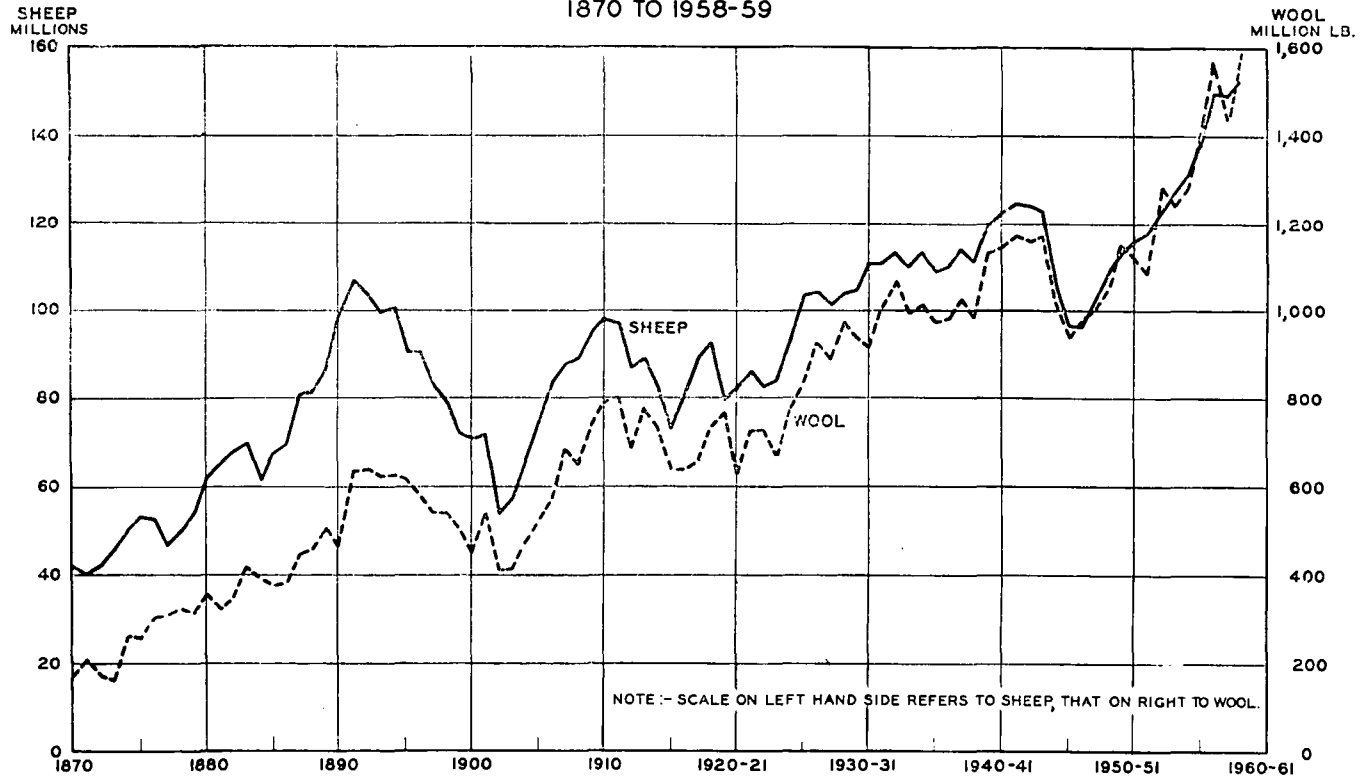

RATIO GRAPH

NOTE:- VERTICAL SCALE IS LOGARITHMIC, AND THE CURVES RISE AND FALL ACCORDING TO RATE OF INCREASE OR DECREASE, ACTUAL NUMBERS ARE INDICATED BY SCALE.

SHEEP NUMBERS AND WOOL PRODUCTION: AUSTRALIA

1870 TO 1958-59

The numbers of cattle (beef and dairy) in the several States and Territories in each year 1955 to 1959 are shown below.

CATTLE: NUMBER.
(^{'000.})

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Terr.	Aust. Cap. Terr.	Aust.
1955 ..	3,461	2,456	7,238	524	861	319	969	8	15,836
1956 ..	3,678	2,616	7,331	566	897	332	1,028	9	16,457
1957 ..	3,911	2,765	7,462	621	957	354	1,176	11	17,257
1958 ..	3,736	2,750	7,187	597	997	371	1,244	10	16,892
1959 ..	3,664	2,651	6,884	576	1,000	374	1,099	9	16,257

Although the proportion was not as high as it has been in some previous years, Queensland was carrying 42 per cent. of the cattle in Australia in 1959. The percentage in each State and Territory during that year was:—New South Wales, 23; Victoria, 16; Queensland, 42; South Australia, 4; Western Australia, 6; Tasmania, 2; and Northern Territory, 7.

Maps showing the distribution of beef and dairy cattle in Australia have been published in previous issues of the Official Year Book (*see* No. 43, pp. 909–10 for 1955; No. 39, pp. 905–6, for 1948; No. 34, pp. 453–4, for 1938–39; and No. 22, p. 660, for 1924–25).

3. **Classification of Cattle According to Purpose.**—Of the total number of cattle in Australia in 1959, 11,411,061 or 70 per cent. were classified as beef cattle. The numbers classified as beef cattle in the several States and Territories, during the years 1955 to 1959, were as follows:—

BEEF CATTLE: NUMBER.
(^{'000.})

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Terr.	Aust. Cap. Terr.	Aust.
1955 ..	2,196	856	5,861	255	633	129	969	5	10,904
1956 ..	2,341	954	5,946	302	673	148	1,028	6	11,398
1957 ..	2,577	1,044	6,087	356	733	158	1,176	8	12,139
1958 ..	2,429	1,026	5,917	338	771	167	1,244	6	11,898
1959 ..	2,382	998	5,643	328	784	171	1,099	6	11,411

Particulars relating to dairy cattle numbers will be found in Chapter XXIV.—Farm-yard, Dairy and Bee Products.

4. **Size Classification of Cattle Herds.**—A special series of tabulations relating to rural holdings in Australia was compiled for 1955–56 and published in full detail in a series of mimeographed bulletins, *Size Classification of Rural Holdings*, 1955–56. Condensed tables also appear in *Primary Industries, Part I*, Bulletin No. 51. The tables relating to beef and dairy cattle show classifications according to size of herd, area of holding, area of wheat for grain and area of sown pastures.

5. **Comparison with other Countries.**—The following table shows the number of cattle in Australia and in some of the principal cattle-raising countries of the world for the years 1936–40 and at the latest available date. The figures, which, in general, have been compiled by the United States Department of Agriculture for publication in *Foreign Crops and Markets* and *Foreign Agriculture Circular*, and by the Food and Agriculture Organization of the United Nations for publication in *Yearbook of Food and Agricultural Statistics: Production*, relate to areas embraced by post-war boundaries, but do not cover identical areas for the two periods in all cases.

CATTLE: NUMBER IN VARIOUS COUNTRIES.
(^{'000.})

Country.	Average, 1936-40.(a)	Year and Month.	Number.
India(b)	180,000	1956 (May) ..	203,629
United States of America	66,706	1959 (January) ..	96,851
Brazil	40,807	1959 (December) ..	72,000
U.S.S.R.	59,800	1959 (January) ..	70,800
China	25,600	1956 (May) ..	45,300
Argentina	33,762	1958 (June) ..	41,100
Pakistan(b)	33,000	1956 (December) ..	37,569
Ethiopia	18,000	1958 (January) ..	23,000
Mexico	11,716	1959 (December) ..	19,400
France	15,504	1959 (October) ..	18,404
Australia	13,285	1959 (March) ..	16,400
Colombia	8,010	1959 (October) ..	14,490
Turkey(b)	8,611	1959 (December) ..	13,088
Germany, Federal Republic of	12,114	1959 (December) ..	12,071
Union of South Africa	11,636	1955 (August) ..	12,000

(a) In some cases census for a single year, and in others an average for two to four years.
(b) Includes buffaloes.

6. **Imports and Exports of Cattle.**—The products of the cattle-raising industry figure largely in the export trade of Australia although until recently the export of live cattle has never been large. In 1958-59, exports of cattle, mainly to the Philippines for slaughter, amounted to 13,900 valued at £493,000. The number of cattle imported is small, and as in the case of horses, consists mainly of valuable animals for stud purposes. Details for the years 1954-55 to 1958-59 are as follows:—

CATTLE: IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.	
	No.	Value. (£'000.)	No.	Value. (£'000.)
1954-55	1,679	155	6,786	346
1955-56	304	229	8,025	475
1956-57	145	123	18,360	754
1957-58	272	174	23,941	933
1958-59	37	62	13,900	493

The average value per head of the cattle imported during the last five years was £305 while the average value per head of the cattle exported during the same period was £42.

7. **Cattle Slaughtered.**—The numbers of cattle slaughtered during each of the years ended June, 1955 to 1959, are shown in the following table:—

CATTLE (INCLUDING CALVES) SLAUGHTERED.
(^{'000.})

Year ended June—	Slaughterings passed for Human Consumption.									Total Slaughtering including Boiled Down.
	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.	
1955	1,518	1,024	1,430	233	181	75	16	8	4,485	4,550
1956	1,547	1,023	1,502	227	191	88	25	9	4,612	4,675
1957	1,591	1,139	1,641	252	192	102	25	10	4,952	5,017
1958	1,742	1,404	1,541	282	216	118	24	12	5,339	5,411
1959	1,894	1,397	1,883	287	249	128	24	10	5,872	5,960

8. **Production of Beef and Veal.**—Details of the production of beef and veal in each State and Territory are shown in the following table for the years indicated:—

PRODUCTION OF BEEF AND VEAL (BONE-IN WEIGHT): AUSTRALIA.

('000 tons.)

Year ended June—	N.S.W.	Vic.	Qld.	S. Aust.	W.A.	Tas.	N.T.	A.C.T.	Aust.
1955 ..	215	143	272	34	37	14	3	2	720
1956 ..	222	139	292	38	38	15	5	2	751
1957 ..	236	159	317	40	38	18	5	2	815
1958 ..	233	181	270	41	39	20	5	2	791
1959 ..	275	189	328	42	45	20	5	2	906

9. **Consumption of Beef and Veal.**—For the three years 1936–37 to 1938–39, the average annual production of beef and veal in Australia was 569,000 tons of which 127,000 tons were exported, leaving a balance of 442,000 tons (or the carcass equivalent of 144 lb. per head of population per annum) available for consumption as fresh and canned meat. Since the 1939–45 War, consumption per head of beef and veal has been at a somewhat lower level. For the three years 1946–47 to 1948–49, the average annual consumption per head was 112.5 lb. or 13 per cent. below the immediate pre-war level. In 1958–59 it amounted to 121.9 lb. per head, consisting of 118.1 lb. of carcass meat and 3.8 lb. (carcass equivalent) of canned meat.

In the following table, details of the production and disposal of beef and veal are shown for the years 1954–55 to 1958–59, compared with the averages for the three years 1936–37 to 1938–39 and 1946–47 to 1948–49.

PRODUCTION AND DISPOSAL OF BEEF AND VEAL (BONE-IN WEIGHT): AUSTRALIA.

('000 tons.)

Year.			Net Change. in Stocks.	Production.	Exports.	For Canning.	Consumption in Aus- tralia as Human Food.	
							Total.	Per Head per Annum.

1958-59 ..	+	9	906	295	77	525	118.1	

(a) Not available.

10. **Exports of Frozen Beef and Veal.**—The export of frozen meat from Australia dates from about 1881, and since that year the trade has grown considerably. The quantity and value of frozen beef and veal exported in each year 1954–55 to 1958–59 are shown in the following table.

EXPORTS OF FROZEN BEEF AND VEAL: AUSTRALIA.

Year.	Exports of Frozen and Chilled Beef.		Exports of Frozen Veal.	
	Quantity.	Value.	Quantity.	Value.
	'000 lb.	£'000.	'000 lb.	£'000.
1954-55	271,772	21,408	4,626	491
1955-56	318,059	22,936	4,689	495
1956-57	331,255	22,863	3,391	408
1957-58	276,607	20,961	5,397	609
1958-59	499,396	54,157	10,924	1,337

The largest purchaser of Australian beef and veal is the United Kingdom. In 1958-59, shipments to that country were valued at £30,918,000 or 56 per cent. of the total value of beef and veal exports, while exports to the United States of America amounted to £18,365,000 or 33 per cent. of the total.

Because of the preference overseas for chilled beef, the Australian beef industry was at a serious disadvantage until investigations proved that beef could be successfully transported from Australia to the United Kingdom in a chilled condition. Trial shipments began in 1932-33 and exports in subsequent years increased to a maximum of 58,963,000 lb. in 1938-39. However, the 1939-45 War seriously affected the export trade in chilled beef, which declined to a negligible amount after 1939-40. In 1958-59, chilled beef exports were 13,358,000 lb. valued at £1,185,000, whilst frozen beef exports amounted to 486,038,000 lb. valued at £52,972,000.

Both quantity and value of exports of beef, in particular, reached a record level during 1958-59. The value of exports to the United Kingdom was approximately double that of the previous year and the new marketing arrangements mentioned on page 954 permitted the substantial increase in exports to the United States.

§ 4. Sheep.

1. **Introduction of Sheep.**—The suitability of the Australian climate and general conditions for the production of a high class of wool were recognized at an early date by Captain Macarthur, one of the pioneer sheep-breeders of New South Wales. While it would appear that the introduction of the merino sheep into Australia was not due to Macarthur, a great deal of the credit for having successfully established the sheep industry in Australia is certainly his.

2. **Movement in Sheep Numbers in Australia.**—Fluctuations in the number of sheep recorded in Australia for each year from 1860 onwards may be seen from the graph on page 958. Up to 1945, there were five marked periods of decline, but the losses were made up rapidly. In each of the years 1925 to 1945, the sheep flocks exceeded 100 million, reaching 125.2 million in 1942. During the three years ended 1947, however, a sharp decline to 95.7 million occurred. This was largely attributable to the severe drought conditions

experienced during 1944, 1945 and 1946. The passing of the drought and consequent re-stocking resulted in a steady increase in sheep numbers, and although dry seasonal conditions were responsible for a slight decline at 31st March, 1958, a record level of 152.7 million was reached at 31st March, 1959.

The following table shows the approximate movement in sheep numbers in Australia in each year 1954-55 to 1958-59.

SHEEP AND LAMBS : ANALYSIS OF MOVEMENT IN NUMBERS, AUSTRALIA.
(‘000.)

Season.	Lambs Marked.	Excess of Exports.	Sheep and Lambs Slaughtered.	Estimated Number of Deaths from Disease, Drought, etc.(a)	Number at 31st March.	Annual Net Increase (+) or Decrease(-)
1954-55..	32,804	97	22,454	6,348	130,849	+ 3,905
1955-56..	36,914	97	21,180	7,362	139,124	+ 8,275
1956-57..	39,902	122	19,503	9,599	149,802	+ 10,678
1957-58..	36,398	120	24,417	12,348	149,315	- 487
1958-59..	38,748	136	26,775	8,467	152,685	+ 3,370

(a) Balance figure.

3. **Distribution throughout Australia.**—With the exception of a short period in the early eighteen-sixties, when the flocks of Victoria outnumbered those of New South Wales, the latter State has occupied the premier position in sheep-raising, depasturing nearly one-half of the sheep of Australia.

Maps showing the distribution of sheep in Australia have been published in previous issues of the Official Year Book (*see* No. 43, p. 911, for 1955; No. 39, p. 907, for 1948; No. 34, p. 432, for 1938-39; and No. 22, p. 659, for 1924-25).

The numbers of sheep in the several States and Territories at 31st March of each year 1955 to 1959, are shown in the following table:—

SHEEP : NUMBER.

(‘000.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Terr.	Aust. Cap. Terr.	Australia.
1955 ..	59,200	22,330	20,222	12,817	13,411	2,595	29	245	130,849
1956 ..	62,988	23,343	22,116	13,585	14,128	2,673	33	258	139,124
1957 ..	67,670	25,831	23,190	14,984	14,887	2,943	30	267	149,802
1958 ..	65,410	27,090	22,274	15,236	15,724	3,298	27	256	149,315
1959 ..	67,936	26,925	22,148	15,634	16,215	3,536	19	272	152,685

Except when affected by drought, the relative numbers of sheep in the different States in recent years have remained fairly constant.

The percentage distribution in 1959 was:—New South Wales, 44; Victoria, 18; Queensland, 15; South Australia, 10; Western Australia, 11; and Tasmania, 2.

4. **Classification of Sheep According to Age, Sex and Breed.**—In the following table, numbers of sheep in Australia are classified according to age and sex at 31st March of the years 1955 to 1959.

SHEEP : AGE AND SEX, AUSTRALIA.

('000.)

Description.	31st March—				
	1955.	1956.	1957.	1958.	1959.
Rams, 1 year and over ..	1,647	1,721	1,830	1,883	1,919
Breeding ewes (including ewes intended for mating) ..	58,614	62,483	66,844	66,059	69,470
Other ewes, 1 year and over ..	7,847	7,553	8,447	9,795	8,295
Wethers, 1 year and over ..	37,645	39,142	41,573	43,688	43,578
Lambs and hoggets, under 1 year	25,096	28,225	31,108	27,890	29,423
Total, Sheep and Lambs	130,849	139,124	149,802	149,315	152,685

Particulars relating to the principal breeds of sheep at 31st March, 1959, are shown in the following table:—

SHEEP : PRINCIPAL BREEDS, 31st MARCH, 1959.

('000.)

Breed.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
Merino ..	52,467	11,410	21,725	13,112	14,921	325	19	245	114,224
Other recognized breeds ..	6,037	6,118	72	1,061	542	1,841	..	12	15,683
Merino come-backs(a) ..	3,408	3,422	70	312	146	466	..	2	7,826
Crossbreds (b) ..	6,024	5,975	281	1,149	606	904	..	13	14,952
Total ..	67,936	26,925	22,148	15,634	16,215	3,536	19	272	152,685

(a) Merino comeback is the progeny of a crossbred merino ewe and a merino ram, i.e., finer than half-bred. (b) Half-bred and coarser.

5. **Numbers of Sheep on Rural Holdings.**—A special series of tabulations relating to rural holdings in Australia was compiled for 1955–56 and published in full detail in a series of mimeographed bulletins—*Size Classification of Rural Holdings 1955–56*. Condensed tables also appear in *Primary Industries, Part I*. Bulletin No. 51. The tables relating to sheep farming show classifications according to size of flock, area of holding, area of wheat for grain and area of sown pasture.

6. **Comparison with other Countries.**—Australia has long occupied the leading position amongst the sheep raising countries of the world in respect of the size of its flocks and the quantity and quality of wool produced. In 1957–58, Australian flocks numbered 149 million sheep, compared with an estimate of 205 million for the U.S.S.R., China, and Eastern Europe, about 46 million in Argentina and about 46 million in New Zealand. The total world sheep population was estimated at about 919 million in 1957–58. Further details of sheep numbers in the principal wool producing countries of the world for 1956–57 and 1957–58 are given in the table on page 969.

7. **Oversea Imports and Exports of Sheep.**—As in the case of cattle, the oversea exports of live sheep from Australia are of comparatively little importance. On 27th November, 1929, the export of stud merino sheep was prohibited, except with the approval of the Minister for Primary Industry. Exports of sheep are now principally for slaughter overseas. Consignments for this purpose in recent years were made chiefly to Singapore from Western Australia. The following table shows the imports and exports of all sheep for the years 1954–55 to 1958–59.

SHEEP : IMPORTS AND EXPORTS, AUSTRALIA.

Year.	Imports.		Exports.	
	No.	Value.	No.	Value.
		£'000.		£'000.
1954-55	232	13	97,146	340
1955-56	4,437	89	101,837	332
1956-57	7,445	212	129,480	482
1957-58	2,256	90	122,628	466
1958-59	5	1	135,720	393

8. **Sheep Slaughtered.**—The following table shows the numbers of sheep slaughtered in the several States during each of the years ended June, 1955 to 1959 :—

SHEEP (INCLUDING LAMBS) SLAUGHTERED.
(‘000.)

Year.	Slaughterings Passed for Human Consumption.									Total Slaughterings including Boiled Down.

9. **Production of Mutton and Lamb.**—Details of the production of mutton and lamb in each State and Territory are shown below :—

PRODUCTION OF MUTTON AND LAMB.
(Tons.)

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
1954-55	122,499	155,611	18,550	49,853	28,413	11,901	78	1,259	388,164
1955-56	120,615	146,228	23,020	44,339	32,759	11,778	59	1,333	380,131
1956-57	121,947	131,253	23,866	42,563	33,303	12,607	49	1,198	366,786
1957-58	127,800	169,107	24,381	53,681	31,942	13,221	90	1,254	421,476
1958-59	156,020	193,379	29,286	55,001	40,875	16,403	93	1,269	492,326

10. **Consumption of Mutton and Lamb.**—For the three years 1936-37 to 1938-39, the annual production of mutton and lamb averaged 319,000 tons of which 88,900 tons were exported leaving a balance of 230,100 tons (or the carcass equivalent of 74.8 lb. per head of population per annum) available for consumption.

Civilian consumption of mutton and lamb (in carcass equivalent weight including that used for canning) rose substantially during the 1939-45 War, but fell again in 1946-47 and up to 1951-52 was lower than in pre-war years. It rose during succeeding years to 78 lb. per head in 1952-53, and except for slight drops in 1955-56 and 1956-57 this level was maintained up to 1957-58. There was a further sharp rise in 1958-59 to 87 lb. per head.

In the following table, details of the production and disposal of mutton and lamb are shown for the periods stated.

**PRODUCTION AND DISPOSAL OF MUTTON AND LAMB (BONE-IN WEIGHT):
AUSTRALIA.

1958-59	182	40	..	142	31.9

11. **Exports of Frozen Mutton and Lamb.**—The export trade in mutton and lamb preserved by cold process expanded rapidly up to 1913 when 205 million lb. were shipped. It declined in subsequent years and it was not until 1942-43 that it almost reached this level again. In earlier years, shipments consisted mainly of frozen mutton, but in 1923-24 lamb supplanted mutton and the exports of lamb were largely responsible for the increase in total shipments during the ten years to 1942-43. Exports, however, fell again after 1942-43 and in 1956-57 amounted to only 76,274,000 lb. but in 1958-59 recovered to 165,841,000 lb., consisting of 91,191,000 lb. lamb and 74,650,000 lb. mutton.

The quantities and values of exports of frozen mutton and lamb in each year 1954-55 to 1958-59 are shown in the following table.

EXPORTS OF FROZEN MUTTON AND LAMB: AUSTRALIA.

Year.	Exports of Frozen Mutton.		Exports of Frozen Lamb.		Exports of Frozen Mutton and Lamb.

As with beef, the principal customer in this trade has normally been the United Kingdom. In 1958-59, exports of mutton and lamb to that country represented 39 per cent. and 83 per cent., respectively, of the total quantities exported. Forty-seven per cent. of the mutton exported went to the United States of America, although the proportion of lamb exported to that country was only three per cent.

§ 5. Wool.

1. **General.**—Australia is the leading wool-growing country in the world. With less than one-sixth of the world's sheep, Australia produces more than one-quarter of the world's wool (30 per cent. in 1958–59) and about half of the total fine-quality merino wool. The bulk of the production is exported, mainly as greasy wool, although substantial amounts of scoured and carbonized wool, wool on sheep skins and small quantities of semi-manufactured wool are also shipped. The remainder, which is used by Australian manufacturers, has amounted to only five per cent. of the total production (greasy basis) in recent years.

The important position held by Australia among the principal sheep and wool producing countries of the world is shown in the table on page 969.

2. **Greasy and Scoured Wool.**—Whether the weight of the wool clip should be stated as “in the grease” or as “clean” is a matter which seriously affects comparisons between the clips of different seasons and of different countries. The quantity of grease and other matter in a fleece differs, not only between countries, but between districts in the same country. It fluctuates with the vagaries of the season, and with the breed and the condition of the sheep.

From 1946–47 to 1952–53, the Australian Wool Realization Commission, and from 1953–54, the Wool Statistical Service, has assessed annually the clean yield of the Australian wool clip. Apart from a fall in 1953–54 when the yield fell to 55.7 per cent. from 57.5 per cent. in the previous year, a steady increase in the yield of clean from greasy wool was maintained from 1946–47 to 1956–57, when it reached 57.7 per cent. In 1957–58 and 1958–59, the yield fell again to 56.7 per cent. and 56.6 per cent. respectively. A standard factor of 93 per cent. is taken as the clean yield of Australian scoured wools.

Wool scoured, washed and carbonized in Australia before export, however, has a clean yield somewhat lower than for the whole clip, because the grade of greasy wool treated locally for export as scoured, washed or carbonized includes a large proportion of dirty and low-grade wool. In recent years, it has approximated 53 per cent. The quantity of this wool exported during 1958–59 was approximately 12 per cent. of the total raw wool exports (excluding wool exported on skins) in terms of greasy.

3. **Production.**—The bulk of the Australian wool production is shorn from live sheep. In recent years, approximately 3 per cent. was obtained by fellmongering and about 5 per cent. was on skins exported. Statistics of wool production are compiled from data received from growers, fellmongers, etc. The following table shows the production for the five years 1954–55 to 1958–59. Particulars of the gross value of wool produced are based, for shorn wool, upon the average price realized for greasy wool sold at auction, and for skin wools, on prices recorded by fellmongers and skin exporters.

WOOL: TOTAL PRODUCTION (IN TERMS OF GREASY).

(a) Estimated prior to 1957–58.

4. **Care Needed in Comparing Clips.**—In comparing successive clips, allowance must be made for the circumstance that, owing to climatic or other conditions, the time of shearing may be so far delayed in some areas that one clip may include almost thirteen months' growth of wool, while the succeeding one may include little more than eleven months' growth.

5. **Average Weights of Fleeces Shorn.**—The average weights of sheep and lamb fleeces shorn in each of the States of Australia and in the Australian Capital Territory are shown in the following table for each season 1954–55 to 1958–59.

AVERAGE WEIGHT OF SHEEP AND LAMB FLEECES SHORN.

(a) Excludes Northern Territory.

6. **Wool classified according to Quality.**—Under control exercised during the 1939–45 War, records were kept of the classification of each lot of wool appraised according to quality, degree of fault and combing or carding type for each of the years 1940–41 to 1945–46. From the resumption of auctions in 1946–47 to 23rd October, 1953, this analysis was continued by the Australian Wool Realization Commission and from 23rd October, 1953, by the Wool Statistical Service, but the basis of the data has been changed to the catalogues of auction sales, and not upon appraisal as previously. The following table provides a detailed analysis of wool sold at auction according to quality, for the years 1954–55 to 1958–59. "Quality" ("64's, 60's, 58's," etc.) is a measure of the fineness and texture of wool for spinning purposes. Broadly, it means the maximum number of hanks of yarn, each of 560 yards length, which can be spun from 1 lb. of combed wool. For instance, wool of 64's quality is of a fineness and texture which will produce 64 hanks, each of 560 yards, from 1 lb. of tops (combed wool) of that particular wool.

CLASSIFICATION OF GREASY WOOL SOLD AT AUCTION(a): AUSTRALIA.
(Bales of approximately 300 lb.)

(a) All greasy wool sold at auction except "wool re-offered account buyer".

7. **World Sheep Population and Wool Production.**—The following table shows particulars of the sheep population and total production of wool, in terms of greasy, in the principal wool-producing countries of the world, together with estimates of world production of merino, crossbred and carpet type wool for the latest available years. The data have been taken from reports published by the Commonwealth Economic Committee compiled from questionnaires prepared by the Committee and the International Wool Textile Organization and from other official sources.

In 1958–59, Australia produced 30 per cent. of the world total of all types of wool, the share of all British Commonwealth countries combined representing approximately 50 per cent. The principal wool producers, other than Australia, are New Zealand with 10 per cent. of the world total, Argentina, 8 per cent., United States of America, 6 per cent., and Union of South Africa, 6 per cent. Production in the U.S.S.R., China, and Eastern European countries together amounted to 18 per cent. World production of wool (all types) in 1958–59 exceeded the average for 1934–38 by approximately 1,500 million lb. or 40 per cent.

Australia's wool clip is predominantly merino. New Zealand and Argentina produce mainly crossbred wool, while the clip of the U.S.S.R. is largely of the carpet type. World production of merino wool in 1958–59 was 40 per cent. above the average for 1934–38, and the production of crossbred types has risen by about 53 per cent. Carpet wool production has risen by about 26 per cent.

8. **War-time Contracts.**—(i) *Wool.* Details of the contract entered into between the Governments of Australia and the United Kingdom for the purchase of the surplus wool clip of Australia for the duration of the war and one full clip thereafter (1939–40 to 1945–46) will be found in Official Year Book No. 36, page 1106.

(ii) *Sheepskins.* Details of the war-time contract arrangements for the period April, 1940, to June, 1946, between the Australian and United Kingdom Governments for the purchase of Australia's exportable surplus of woolled sheepskins will be found in Official Year Book No. 37, page 875.

9. **Australian Wool Realization Commission.**—The Australian Wool Realization Commission was the Australian subsidiary of a Joint Organization (commonly referred to as "J.O.") set up by the Governments of the United Kingdom, the Commonwealth of Australia, the Dominion of New Zealand and the Union of South Africa, under the title of "U.K.—

Dominion Wool Disposals Limited " to dispose of accumulated war-time stocks of Dominion wool held by the United Kingdom Government at the end of the war. Details of the functions and operations of these organizations appear in earlier issues of the Year Book, particularly No. 38, pages 919-923.

By the end of 1951, the Joint Organization had disposed of all stocks of wool held and shortly afterwards it went into voluntary liquidation. Liquidation proceedings were completed on 15th February, 1954.

Australia's share of the profits arising from the operations of J.O. amounted to approximately £93 million (including interest). The task of distributing the profits to growers was entrusted to the Australian Wool Realization Commission. Due to some protracted litigation, known as the "Poulton Case" (see Official Year Book No. 45, p. 947), final distribution was not effected until 1959.

A residue of £2.4 million, representing unclaimed moneys, was paid to the Wool Research Trust Fund, under the terms of the Wool Realization (Distribution of Profits) Act, 1957.

10. Australian Wool Bureau.—(i) *General.* The Australian Wool Bureau was constituted under the Wool Use Promotion Act 1953 and replaced the Australian Wool Board which was established in 1936. The Bureau's main function is to promote the use of wool by publicity and other means in Australia and overseas.

The Bureau consists of seven members appointed by the Governor-General for a term of three years. Of the seven members, three represent the Australian Wool and Meat Producers' Federation, three the Australian Woolgrowers' Council and the other member is nominated by the Commonwealth Government.

Particulars of the activities of the Bureau are given in para. 12, Wool Publicity and Research.

(ii) *Wool Statistical Service.* The Wool Statistical Service, formerly conducted by the Australian Wool Realization Commission, was taken over by the Australian Wool Bureau on 23rd October, 1953. The Statistical Service is responsible for the preparation and publication of statistical material relating to the Australian wool market and the composition of the Australian clip and other special statistical work which may be assigned to it.

It is financed out of the income received by the Australian Wool Bureau from wool stores under its control and from an annual contribution by the Commonwealth Government.

A Statistical Service Committee, consisting of representatives of the Australian Wool Bureau, the Commonwealth Government, wool buyers, wool growers and wool selling brokers' organizations, acts in an advisory capacity to the Australian Wool Bureau.

(iii) *Wool Stores.* Some three hundred wool stores, formerly the property of the Joint Organization and purchased from it by the Commonwealth Government, were transferred to the ownership of the Australian Wool Bureau by virtue of the Wool Stores Act 1953. The Bureau formally assumed control of these stores on 11th January, 1954, and at the same time received a substantial sum of money representing accumulated rentals and receipts from sales which had come to hand while the stores were held by the Commonwealth Government. Under the Act, the Bureau may dispose of these stores only with the permission of the Minister for Primary Industry and, in the event of war, may be required to return the stores without compensation to the Commonwealth Government. The stores are let by the Wool Bureau as a commercial proposition. The rental income is used to meet the expenses of maintaining, managing and insuring the stores, to defray the cost of operating the Wool Statistical Service and to help finance the wool promotion activities of the Bureau.

(iv) *The Contributory Charge.*—Associated legislation, namely, the Wool (Contributory Charge) Act 1945 (subsequently replaced by the Wool (Contributory Charge) Act (No. 1) 1950-1951 and the Wool (Contributory Charge) Act (No. 2) 1950-1951) and the Wool (Contributory Charge) Assessment Act 1945-1951 provided for a contributory charge to be imposed on woolgrowers on all shorn wool produced in Australia and sold after a date fixed by proclamation. The passage of amending Wool Tax legislation in June, 1952, made it possible to cease collection of the contributory charge at 30th June, 1952, and the legislation under which it was imposed was repealed. Further particulars of the Wool Contributory Charge and the amounts collected appear in Year Book No. 40, pages 675 and 819.

(v) *The Wool Levy.* While the contributory charge legislation, mentioned above, was in force, the Wool Levy, which was imposed by the Wool Tax Act 1936-1945 and the Wool Tax Assessment Act 1936, was temporarily suspended. When the Wool Levy was first imposed in 1936, the rate of tax on woolgrowers was 6d. a bale on all shorn wool produced in Australia and sold. The proceeds were paid into the Wool Publicity and Research Fund administered by the Australian Wool Board.

When collection of the contributory charge ceased (i.e., from 1st July, 1952), the Wool levy again became operative but at a higher rate. This rate was provided for in the Wool Tax Acts (Nos. 1 and 2) of 1952 under which a rate was prescribed between limits of 2s. and 5s. a bale on shorn wool produced in Australia and sold.

From 1952-53, the rate prescribed was 4s. a bale. The Wool Tax Acts (Nos. 1 and 2) of 1952 were repealed in May, 1957, and replaced by the Wool Tax Acts (Nos. 1 and 2) of 1957. The 1957 Acts maintained the levy on woolgrowers for wool promotion within the limits of 2s. to 5s. a bale on shorn wool produced in Australia and sold. In addition, provision was made under the 1957 Acts for woolgrowers to be levied at a maximum rate of 2s. a bale for wool research. The operative rates prescribed are 4s. a bale for wool promotion purposes and 2s. a bale for wool research.

11. *Marketing of Wool.*—(i) *Minimum Reserve Price Plan.* Details of the minimum reserve price plan which was completed by the Governments of Australia, New Zealand, South Africa and the United Kingdom in May, 1951, and which was rejected at a referendum of woolgrowers in Australia in September, 1951, will be found in Official Year Book No. 39, page 925.

(ii) *Subsidy on Woollen Goods, 1950-51.* Details of the subsidy paid on woollen goods manufactured for consumption in Australia from wool sold during the 1950-51 season will be found in Official Year Book No. 41, page 727.

12. *Wool Publicity and Research.*—(i) *Wool Use Promotion.* The Wool Use Promotion Act 1953-1957, defines the powers and functions of the Australian Wool Bureau as including measures for promoting, by publicity or other means, the use of wool in Australia or in other countries.

The Bureau is authorized also to take measures for improving the production of wool in Australia and encouraging research directed to the promotion of the use of wool.

The Bureau is associated with the New Zealand Wool Board and the South African Wool Board in maintaining the International Wool Secretariat, which was established in 1937 with head-quarters in London and with branches in fourteen countries. The function of the Secretariat is to promote the use of wool through a broad programme of publicity, education and research.

The activities of the Australian Wool Bureau are financed from the Wool Use Promotion Fund into which are paid the proceeds of the Wool Levy, and contributions from the rental income of the wool stores as mentioned in 10 (iii) above.

(ii) *Research.* Until 1945, the Australian Wool Board was responsible for the supervision of economic and scientific research but in that year the Commonwealth Scientific and Industrial Research Organization was made responsible for scientific, technical and biological research into sheep raising and wool production, as well as wool textile research. Economic wool research is the responsibility of the Bureau of Agricultural Economics, a division of the Commonwealth Department of Primary Industry. The economic research work falls into two main categories, namely, farm production economics dealing with economics of wool growing and sheep-station management generally, and commodity research dealing with the economic aspects of the wool industry in Australia and of wool as a commodity in world trade.

To finance the research programme, the Wool Research Trust Account was established under the Wool Use Promotion Act in 1945. Originally, a sum equal to the amount raised by the Wool Levy was paid annually by the Commonwealth Government into this account from Consolidated Revenue. The Wool Use Promotion Act 1953 fixed the rate of contribution at 2s. for each bale of shorn wool produced in Australia as from 1st July, 1952.

In addition, finance was available for research from the Wool Industry Fund. This Fund was established in 1946 from various moneys accumulated by the Central Wool Committee in war-time.

Under the Wool Research Act 1957, these sources of income together with an increased Government contribution totalling 4s. a bale, effective from 1st July, 1957, and a contribution of 2s. a bale from woolgrowers, effective from 1st July, 1957, collected under the Wool Tax Acts 1957, were combined into one fund known as the Wool Research Trust Fund. The use of this Fund is limited to sheep and wool research and expenditure therefrom is based on the recommendations of the Wool Research Committee. This committee comprises representatives of the C.S.I.R.O., the Universities, the Department of Primary Industry, Wool-growers' Organizations, the Australian Wool Bureau, and Textile Manufacturers.

Opportunity is afforded for co-operation with State Departments of Agriculture and other organizations in research and extension activities by the inclusion on the Committee of a representative of the Australian Agricultural Council in the capacity of an observer.

(iii) *The Australian Wool Testing Authority.*—The Australian Wool Testing Authority Act 1957 assented to on 12th September, 1957, constituted the Australian Wool Testing Authority, comprised of representatives of wool buyers, wool selling brokers, wool processors, the Australian Wool Bureau, the C.S.I.R.O. and the Commonwealth Government. It is intended that ultimately the Authority should be self-financing, but during the preliminary stages, the Commonwealth Government is providing the initial capital by way of a loan.

The function of the Authority is to provide a service in Australia for carrying out various tests on wool and wool products, particularly with regard to the moisture content of scoured and carbonized wool. Testing on a commercial basis commenced in September, 1958.

In February, 1959, the Authority was notified by the International Wool Textile Organization that it would be included in the organization's list of official wool testing establishments. This is the standard of international recognition for wool testing houses and gives the Australian Wool Testing Authority the same standing as similar organizations in other countries.

13. *Consumption of Wool.*—(i) *Consumption of Raw Wool.* Statistics of raw wool consumption published in recent years for the purposes of broad international comparisons are based on the quantities of scoured or carbonized wool used on the woollen and worsted systems (mill consumption) plus quantities used in such processes as felting. Consumption estimates compiled on this basis have obvious defects as they disregard oversea trade in semi-processed wool (e.g., tops and yarns) as well as woollen goods. They are, however, comparatively simple to calculate and are useful in providing an approximate indication of trends in wool consumption. Estimates of raw wool used on the woollen and worsted systems and by felt manufacturers in Australia, are shown below for the years 1954–55 to 1958–59.

ESTIMATED CONSUMPTION OF RAW WOOL IN AUSTRALIA.

('000 lb.)

Year.	Greasy Basis.			Clean Basis.		
	Used on Woollen and Worsted Systems.	Used for Felt Manu- facture (including Hats).	Total.	Used on Woollen and Worsted Systems.	Used for Felt Manu- facture (including Hats).	Total.
1954–55	82,923	7,552	90,475	48,930	3,587	52,517
1955–56	92,374	7,586	99,960	54,847	3,603	58,450
1956–57	108,255	5,218	113,473	65,504	2,479	67,983
1957–58	103,704	4,480	108,184	63,153	2,128	65,281
1958–59	103,180	3,192	106,372	62,834	1,516	64,350

(ii) *Consumption of Locally Processed Wool.* As considerable quantities of tops, noils and yarn are exported from Australia, the series on raw wool consumption shown above is over-stated to this extent. The series entitled "Consumption of Locally Processed Wool" provides a more reliable indication of wool consumption in Australia, as allowance has been made for exports of wool in semi-processed form. This series is shown below

for the years 1954-55 to 1958-59. Briefly, the series measures consumption of wool in terms of yarn used in Australian mills and other factories to produce woollen cloth and other woollen goods, yarn used for hand knitting purposes, and scoured wool used for felt manufacture. No allowance has been made for oversea trade in woollen piece goods, clothing, etc., because of the obvious difficulties of estimating accurately the wool content of these products.

ESTIMATED CONSUMPTION OF LOCALLY PROCESSED WOOL IN AUSTRALIA

(b) Includes wool content of yarns containing a mixture

14. Exports of Wool.—(i) *Greasy—Quantities.* Prior to the 1939-45 War, Australian greasy wool exported overseas was sent principally to the United Kingdom and other European countries. In 1938-39, 42 per cent. of total shipments were sent to the United Kingdom, other important consignees being France, 20 per cent., Belgium, 13 per cent., and Japan, 9 per cent. During the 1939-45 War, exports to the United States of America showed great expansion but have since dwindled to about 2 per cent. Of the total shipments in 1958-59, 26 per cent. went to the United Kingdom, 23 per cent. to Japan, 13 per cent. to France, 10 per cent. to Italy and 9 per cent. to Belgium-Luxembourg. The following table shows the quantities of greasy wool exported, and the principal countries of recorded destination.

EXPORTS OF GREASY AND SLIPE WOOL.

('000 lb. actual weight.)

(v) *Total Value of Exports.* The value of wool (other than wool on sheepskins) exported from Australia during the five years ended 1958–59 averaged 46 per cent. of the total value of exports of merchandise of Australian origin, and during 1958–59 the proportion was 38 per cent. The value for the five years ended 1958–59 together with the principal countries to which wool was exported, is shown in the following table.

VALUE OF WOOL EXPORTS(a).
(£'000.)

Country to which Exported.	1954–55.	1955–56.	1956–57.	1957–58.	1958–59.
United Kingdom	107,917	83,096	117,372	79,582	73,101
Other Commonwealth Countries ..	6,839	8,060	9,920	8,026	7,771

Germany, Fed. Rep. of	22,926	23,603	32,987	24,592	15,417
United States of America	29,801	21,636	20,705	12,864	11,270
Other Foreign Countries	31,076	32,335	47,964	57,368	46,939
Total	353,108	337,529	483,725	373,397	302,243

(a) Excludes wool exported on sheepskins.

15. *Local Sales of Wool.*—Auction sales are conducted at Sydney, Goulburn, Newcastle, Albury, Melbourne, Geelong, Ballarat, Brisbane, Adelaide, Perth, Albany, Hobart and Launceston, and are attended by buyers representing manufacturers and merchants in the United Kingdom, France, the United States of America, Japan, U.S.S.R. and many other countries. More than 95 per cent. of the Australian wool clip is now disposed of at auction in Australia.

16. *Stocks of Wool.*—Stocks of raw wool held in Australia at 30th June, 1959, amounted to 269.5 million lb. (as in the grease) of which 73.0 million lb. (51.5 million lb. as greasy and 21.5 million lb. as scoured and carbonized) were held by woollen mills, wool scourers and fellmongers, and 196.5 million lb., assumed to be all greasy, were held by brokers. Of the wool held by brokers, 33.9 million lb. were unsold wool and 162.6 million lb. were sold wool held awaiting shipment. These stocks exclude wool on skins, since this wool is not recorded as production until fellmongered in Australia or exported on skins.

17. *Price.*—Wool is the chief factor in the pastoral wealth of Australia and the nation's prosperity is largely dependent upon its satisfactory sale. During the five years ended 1958–59, the price of greasy wool sold in the selling centres of Australia averaged 64.5d. per lb. compared with the average selling price of 11.5d. per lb. during the ten years ended 1938–39. The average for the nine years ended 1928–29 was 18d. per lb., and for the seven years ended 1913–14, 9d. per lb.

As indicated in para. 8 above, the price of wool during the 1939–45 War was determined by the British Government wool contract. With the return to auction sales since 1945–46, the average price of greasy wool sold rose rapidly from the contract price of 15.45d. per lb. applicable in 1945–46 to the unprecedented level of 144.19d. per lb. in 1950–51. This was followed by a sharp fall and prices, in the years 1951–52 to 1957–58, fluctuated in the range 61d. to 82d. while in 1958–59 they fell to 48.6d., the lowest for ten years.

The prices quoted above, except for United Kingdom contract prices, are as compiled by the National Council of Wool Selling Brokers and represent the average price realized for all greasy wool, of whatever type or quality, marketed during the years indicated.

18. *Value.*—Fluctuation in Australian wool prices has a marked effect on the nation's rural income. In 1945–46, the gross value of wool production was £58,597,000 representing 17.4 per cent. of the gross value of all rural industries, while in 1950–51, when prices reached a peak, wool was valued at £651,902,000 or 55.6 per cent. of the total for all rural industries. The value of wool production fell in subsequent years and in 1958–59 was £311,415,000.

Details of the value of wool production for the years 1954-55 to 1958-59 are shown below.

WOOL—ESTIMATED GROSS VALUE OF TOTAL PRODUCTION.(a)
PRODUCTION.(a)

(a) Includes shorn, dead and fellmongered wool and wool exported on skins. Excludes distribution of profits under the Wool Disposal Plan. (b) Estimated.

19. **United Kingdom Importation of Wool.**—The important position which Australia occupies in the supply of wool to the United Kingdom is indicated in the following statement of the quantities of wool imported into that country from the principal wool-producing countries during each year 1955 to 1959.

WOOL(a): IMPORTS INTO UNITED KINGDOM.
(‘000 lb.)

Country of Origin.	1955.	1956.	1957.	1958.	1959.
Australia	336,800	310,585	315,310	292,407	334,124

India and Pakistan	30,505	25,912	29,889	22,717	25,450
Other Commonwealth Countries	9,785	9,583	11,410	9,671	10,455
Argentina	31,553	32,740	32,484	29,088	55,035
France	18,092	22,228	16,657	18,727	23,568
Uruguay	18,855	34,373	17,448	23,353	15,067
Other Foreign Countries	25,977	39,156	40,536	41,791	52,631
<i>Total Quantity</i> ..	<i>721,322</i>	<i>699,321</i>	<i>675,347</i>	<i>658,589</i>	<i>752,362</i>
Total Value (£'000 sterling) ..	176,995	167,927	188,754	134,001	147,257

(a) Greasy and Scoured.

Australian wool represented 44 per cent. of the total quantity imported into the United Kingdom during 1959. New Zealand supplied 23 per cent. and South Africa 9 per cent., while the total quantity received from British Commonwealth countries constituted 80 per cent. of all United Kingdom imports of wool.

20. **Principal Importing Countries and Sources of Supply.**—The following table, prepared from information published by the Commonwealth Economic Committee, furnishes, in respect of the principal importing countries, details of their production and imports of wool for 1958 together with the chief sources of supply. The quantities imported refer to the actual weight of wool without distinguishing between greasy and scoured except in the case of the United States of America where estimated clean content of raw wool is quoted.

WOOL: PRINCIPAL IMPORTING COUNTRIES AND SOURCES OF SUPPLY, 1958.
(Million lb.)

Importing Country.	Pro- duction of Importing Country. (a)	Quantity Imported from— (b)					Total Imports.
		Australia.	New Zealand.	Union of South Africa.	Argen- tina.	Other Countries.	
United Kingdom ..	114	292.4	168.7	52.6	29.2	116.3	659.2
Belgium	(c)	107.0	24.7	8.5	6.7	13.7	160.6
France	56	168.6	88.6	39.1	20.4	21.3	338.0
Germany (Federal Republic) ..	(c)	74.4	27.1	26.3	8.3	46.7	182.8
Italy	32	121.7	20.3	22.1	5.9	43.5	213.5
Japan	(c)	222.8	16.0	7.6	17.8	9.5	273.7
United States of America(d) ..	293	25.5	44.8	14.0	52.2	53.1	189.6

(a) As in the grease, 1957-58. (b) Actual weight of greasy and scoured wool. (c) Not available. (d) Imports are in terms of estimated clean content of greasy and scoured wool. Actual weight of total United States of America imports was 273.6 million lb.

As a considerable transit trade exists between continental countries, it must not be assumed that the whole of the imports recorded by these countries are retained for their own consumption. The countries chiefly concerned with the transit trade are the United Kingdom (12 per cent. of total imports re-exported in 1958) and Belgium.

§ 6. Trade in Hides and Skins.

1. **Extent of Trade.**—In addition to the hides and skins treated locally, considerable quantities are exported. The value of cattle and horse hides, sheep and other skins, and skin pieces, sent overseas during 1958-59 amounted to £23,572,000 compared with a total of £25,393,000 in 1957-58 and £24,269,000 in 1956-57.

2. **Sheepskins with Wool.**—The exports of sheepskins with wool constitute the most important item in the values referred to in the preceding paragraph. Of the total exports of £14,768,000 during 1958-59, France obtained 76 per cent. and the United Kingdom nine per cent. The exports of sheepskins with wool during each of the years 1954-55 to 1958-59 were as follows:—

EXPORTS OF SHEEPSKINS WITH WOOL: AUSTRALIA.

Particulars.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
Number '000	14,841	14,891	14,239	19,441	20,180
Value £'000	15,569	15,268	19,438	20,219	14,768

3. **Sheepskins without Wool.**—Up to 1943-44, sheepskins without wool were exported chiefly to the United States of America. During 1943-44, that country accounted for 97 per cent. of the total shipments. In subsequent years, however, there has been a decline in shipments to the United States of America and an increase in the quantities shipped to other countries. Of the total value of £432,000 of sheepskins without wool exported in

1958-59 the United States of America received 66 per cent., France received nine per cent. and the United Kingdom 16 per cent. Quantities and values for the five years 1954-55 to 1958-59 are shown in the table hereunder:—

EXPORTS OF SHEEPSKINS WITHOUT WOOL: AUSTRALIA.

Particulars.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
Number '000	2,147	1,771	1,353	813	2,082
Value £'000	372	424	479	232	432

4. *Hides.*—(i) *Exports.* The export trade in cattle hides and calfskins during 1958-59 was distributed as follows:—Japan, £2,948,000; Federal Republic of Germany, £901,000; United States of America, £847,000; The Netherlands, £684,000; Italy, £353,000; United Kingdom, £255,000; Sweden, £154,000 and other countries, £348,000.

The exports during each of the five years 1954-55 to 1958-59 are shown in the table below:—

EXPORTS OF CATTLE HIDES AND CALFSKINS: AUSTRALIA.

Particulars.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
Quantity '000 lb.	33,817	45,981	45,111	50,557	85,324
Value £'000	1,874	2,722	2,524	3,240	6,490

Horse hides exported during 1958-59 weighed 1,595,326 lb. and were valued at £99,091.

(ii) *Imports.* The imports of cattle hides and calfskins are fairly large, the chief sources of supply being New Zealand and the Pacific Islands. The quantities and values of cattle hides including calfskins, imported into Australia during the years 1954-55 to 1958-59, were as follows:—

IMPORTS OF CATTLE HIDES AND CALFSKINS: AUSTRALIA.

Particulars.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
Quantity cwt.	12,391	10,537	11,064	9,366	8,301
Value £'000	108	58	66	67	58

5. *Furred Skins.*—The exports of furred skins were valued as follows:—

**EXPORTS OF FURRED SKINS: AUSTRALIA.
(£'000.)**

Description.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
Rabbit and Hare	1,100	1,711	975	913	1,291
Opossum	42	15	53	91	..
Kangaroo and Wallaby ..	281	285	279	350	188
Other	7	2	6	11	1
Total	1,430	2,013	1,313	1,365	1,480

These skins were shipped principally to the United States of America, the United Kingdom, and Belgium and Luxemburg, the values shipped to each in 1958-59, with 1957-58 values in parentheses, being:—United States of America, £1,181,000 (£1,047,000); United Kingdom, £220,000 (£203,000) and Belgium-Luxemburg, £40,000 (£33,000).

6. **Marketing of Hides and Skins.**—(i) *Sheepskins with Wool.* Details of the agreement between the United Kingdom and Commonwealth Governments for the purchase by acquisition of the "exportable surplus" of woolled sheepskins in Australia during the 1939-45 War were given in Official Year Book No. 37, page 886. The contract expired on 30th June, 1946, and sheepskins have since been marketed mostly at open auction.

(ii) *Sheep and Lamb Pelts.* Details of the marketing control of sheep and lamb pelts were given in Official Year Book No. 38, page 930. Pelts have reverted to open marketing without export restrictions.

(iii) *Hides and Leather.* A hide acquisition and marketing scheme operated from November, 1939 to August, 1954. The Australian Hide and Leather Industries Board, which administered the scheme, acquired all cattle hides and yearling and calf skins produced in Australia at set prices and allocated them to tanners at these prices. Further details of the war-time operations of the scheme will be found in Official Year Book No. 37, page 887 and Official Year Book No. 38, pages 930-1.

Pre-war, about 40 to 45 per cent. of Australian production of cattle hides and calf skins was exported but, with the development of the local tanning industry, the proportion is now approximately 30 per cent.

(iv) *Rabbit Skins.* A marketing control scheme for rabbit skins was introduced under the National Security (Rabbit Skins) Regulations on 10th June, 1940, and terminated in April, 1949. Details of the scheme will be found in Official Year Book, No. 38, page 931..

§ 7. Tallow and Lard.

1. **Consumption of Tallow in Factories.**—Details of consumption are collected from the principal factories using tallow.

Consumption of inedible tallow in factories (soap and candle, chemical and woolscouring works) are shown in the following table. These figures are, however, deficient to the extent that no allowance has been made for small unrecorded amounts used in other types of establishments. Details of edible tallow consumed in factories are not available.

INEDIBLE TALLOW : CONSUMPTION IN FACTORIES, AUSTRALIA.

(cwt.)

Year.	Quantity Used.	Year.	Quantity Used.
1954-55	1,193,368	1957-58	1,280,984
1955-56	1,210,694	1958-59	1,216,668
1956-57	1,207,578		

2. **Exports of Tallow and Lard.**—Particulars of exports of edible (including lard) and inedible tallow are shown in the following table for the five years 1954-55 to 1958-59:—

TALLOW AND LARD: EXPORTS, AUSTRALIA.

(cwt.)

Particulars.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
Edible(a)	74,401	142,498	128,649	130,817	104,646
Inedible	365,985	829,403	936,951	878,060	1,022,844
Total	440,386	971,901	1,065,600	1,008,877	1,127,490

(a) Including lard and sweetened fats.

3. **Marketing of Tallow.**—Until 30th September, 1952, the bulk of Australia's exportable surplus tallow, other than collar white mutton tallow was sold to the United Kingdom Ministry of Food under a series of annual contracts. The 1951–52 contract was not renewed and on 9th November, 1952, tallow export control was removed following termination of the industry's equalization pool arrangement and price de-control in most States.

§ 8. Exports of Principal Pastoral Products.

The quantities and values of the principal pastoral products of Australia exported for the years 1956–57 to 1958–59 were as follows:—

EXPORTS OF PASTORAL PRODUCTS: AUSTRALIA.

Product.	Unit of Quantity.	Quantity.			Value (£'000.)		
		1956–57.	1957–58.	1958–59.	1956–57.	1957–58.	1958–59.

(a) Includes chilled beef.

CHAPTER XXIV.

FARMYARD, DAIRY AND BEE PRODUCTS.

NOTE.—Values of Australian oversea trade shown throughout this chapter are expressed as £A f.o.b. port of shipment, except where otherwise indicated.

§ 1. Introduction.

1. **General.**—The introduction of cattle into Australia and the early history of the dairying industry are referred to in some detail in earlier issues of this publication. It may be noted here that an increased and improved milk supply has resulted from the crossing of imported stud cattle with the original stock and from the further judicious crossing of strains. In Australia, dairy cattle thrive in the open throughout the year, local climatic conditions demanding no protection other than tree plantations for shelter and, in certain districts, rugging in the coldest weather. Indigenous and imported grasses furnish food during the greater part of the year, and winter fodder, when necessary, is given to the cattle in the fields. With the wider application of scientific methods in the treatment of animals and pastures and in the processes of manufacture, coupled with herd testing and effective State supervision, the dairying industry has shown rapid expansion. It has been demonstrated that Australian production and marketing methods do not adversely affect the vitamin content of the butter and that the loss during cold storage even for as long as two years is insignificant.

2. **Mixed Farming.**—Apart from specialized dairy farms, dairying is carried on fairly extensively on mixed farms. Originally, dairying on mixed farms was conducted mainly in conjunction with agriculture, but in more recent times it has been carried on also in conjunction with various types of grazing. In non-coastal regions, it is generally carried on in conjunction with agriculture and sheep-raising, sufficient fodder being grown to carry the cattle through the winter months. The extent to which dairy cattle were run in conjunction with beef cattle, sheep, and pigs in 1955–56 is shown in the relevant tables published in a series of mimeographed bulletins *Size Classification of Rural Holdings 1955–56*, and also in summarized form in *Primary Industries, Part I.—Rural Industries, 1956–57*, Bulletin No. 51.

3. **Employment.**—The numbers of persons employed in rural industries are ascertained at the annual census of rural production. The particulars collected are in respect of those persons who were permanently engaged in the actual work of the farm and include owners, lessees, tenants or sharefarmers, relatives over 14 years of age not receiving wages, and other permanent employees, including managers and relatives, working for wages or salary. For some earlier years, and uniformly from March, 1950, particulars have been collected also of the numbers of temporary employees at 31st March of each year. Details of the numbers so engaged are given in Chapter XXII.—Agricultural Production, § 29.

Persons who described themselves at the population census as being engaged in dairy farming comprised 96,508 males and 10,018 females, a total of 106,526 persons at the Census of 30th June, 1947, and 100,553 males and 11,004 females, a total of 111,557 persons at the Census of 30th June, 1954.

4. **Growth of the Dairying Industry.**—The following table gives some indication of the growth of the dairying industry since 1918–19.

DAIRYING INDUSTRY: AUSTRALIA.

Year.	Number of Dairy Cows at 31st March.			Production of—			Milking Machines (No. of Stands). (a)
	In Milk.	Dry.	Total.	Milk for all Purposes.	Butter (Factory and Farm).	Cheese (Factory and Farm).	
				Million Gallons.	Tons.	Tons.	
1918-19 ..	1,319,588	582,448	1,902,036	529.6	81,162	10,621	(b)
1928-29 ..	1,744,728	600,342	2,345,070	815.4	129,817	13,490	(b)
1938-39 ..	2,600,707	608,812	3,209,519	1,189.9	203,500	29,304	(b)
1948-49 ..	2,339,885	818,725	3,158,610	1,208.9	165,830	43,202	144,916
1954-55 ..	2,338,658	943,485	3,282,143	1,325.8	191,078	45,193	196,877
1955-56 ..	2,393,870	1,009,637	3,403,507	1,402.0	208,911	38,700	204,298
1956-57 ..	2,354,301	1,097,149	3,451,450	1,357.9	192,854	45,216	210,664
1957-58 ..	2,393,870	1,080,003	3,361,574	1,264.4	175,757	35,976	213,716
1958-59 ..	2,363,569	919,578	3,283,147	1,371.2	193,568	43,503	216,287

(a) "Number of Stands" indicates the number of cows that can be milked simultaneously—i.e., the cow capacity of installed milking machines. (b) Not available.

5. **Official Supervision of Dairying Industry.**—Dairy experts of the various State Agricultural Departments give instruction in approved methods of production, and inspect animals, buildings and marketable produce. A high standard of cleanliness, both of personnel and *matériel*, prevails.

The export trade is regulated by the terms of the Commonwealth Customs Act 1901-1954 and the Commonwealth Commerce (Trade Descriptions) Act 1905-1950, and regulations thereunder. It will be sufficient to state here that the true trade description, etc., must be marked on all produce intended for export, while official inspection ensures the maintenance of purity and quality. Upon request of the exporter, the goods are given a certificate by the inspector.

6. **Australian Agricultural Council.**—General information on the constitution and functions of the Australian Agricultural Council is given on page 888 of Chapter XXII.—Agricultural Production.

§ 2. Value of Farmyard, Dairy and Bee Production and Indexes of Price and Quantum of Production.

1. **Gross Value of Farmyard, Dairy and Bee Production, 1954-55 to 1958-59.**—The following table shows the gross value of recorded farmyard and dairy production at the principal markets in Australia:—

GROSS VALUE OF FARMYARD, DAIRY AND BEE PRODUCTION: AUSTRALIA. (£'000.)

Particulars.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
Whole Milk used for—					
Butter(a)	67,801	78,559	66,991	61,252	66,328
Cheese(a)	9,218	8,585	9,398	7,399	10,120
Condensing, Concentrating, etc. . .	7,537	8,908	8,901	9,540	9,230
Other purposes	50,377	52,465	55,393	58,179	59,887
Subsidy Paid on Whole Milk for Butter and Cheese	16,081	14,499	13,500	13,500	13,500
<i>Total Whole Milk (including Subsidy)</i>	<i>151,014</i>	<i>163,016</i>	<i>154,183</i>	<i>149,870</i>	<i>159,065</i>
Pigs Slaughtered	21,263	25,543	25,948	25,032	25,553
Dairy Cattle Slaughtered	9,652	9,625	8,721	10,907	15,721
Eggs	40,650	42,137	43,567	42,320	40,397
Poultry	10,835	11,666	11,432	13,150	14,380
Honey	1,465	1,801	2,371	1,794	1,803
Beeswax	133	132	157	115	105
Total	235,012	253,920	246,379	243,188	257,024

(a) Excludes Commonwealth subsidy which is shown separately below.

2. Gross and New Values, 1958-59.—The values of dairy, poultry and bee farming production on gross, local and net bases are shown in the following table. Further information on values, including definitions of the terms used, is given in Chapter XXX.—Miscellaneous.

GROSS, LOCAL AND NET VALUE OF FARMYARD, DAIRY AND BEE PRODUCTION 1958-59.

(£'000.)

State.	Gross Production Valued at Principal Markets.	Marketing Costs.	Gross Production Valued at Farm.	Farm Costs.		Net Value of Production. (b)
				Fodder Fed to Farm Stock.	Value of Other Materials Used in Process of Production. (a)	
New South Wales ..	90,421	12,391	78,030	12,567	(c) 386	65,077
Victoria ..	87,527	4,383	83,144	22,166	3,616	57,362
Queensland ..	36,537	1,870	34,667	7,074	1,480	26,113
South Australia ..	20,006	803	19,203	6,091	1,761	11,351
Western Australia ..	11,418	894	10,524	5,034	1,941	3,549
Tasmania ..	10,630	581	10,049	2,085	(c) 856	7,108
Northern Territory ..	99	4	95	16	..	79
Australian Capital Territory ..	386	19	367	95	2	270
Total ..	257,024	20,945	236,079	55,128	10,042	170,909

(a) No allowance has been made for costs of materials used in the process of production in the Poultry (for States other than Queensland) and Bee-farming Industries. (b) No deduction has been made for depreciation and maintenance. (c) No allowance has been made for costs of power, power kerosene, petrol and other oils.

3. Net Value of Production, 1954-55 to 1958-59.—In the following table, the net values of farmyard, dairy and bee production (total and per head of population) are shown by States.

NET VALUE OF FARMYARD, DAIRY AND BEE PRODUCTION.(a)

Year.	N.S.W. (b)	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.(b)	Australia. (c)
NET VALUE. (£'000.)							
1954-55 ..	58,323	58,577	26,237	12,498	4,686	6,406	166,983
1955-56 ..	63,000	67,329	28,630	15,320	4,885	7,333	186,841
1956-57 ..	57,852	60,945	25,836	14,496	4,610	7,372	171,448
1957-58 ..	55,511	60,463	19,150	9,572	4,203	7,342	156,516
1958-59 ..	65,077	57,362	26,113	11,351	3,549	7,108	170,909

NET VALUE PER HEAD OF POPULATION. (£ s. d.)

1954-55 ..	16 17 2	23 10 10	19 16 0	15 9 6	7 4 5	20 9 4	18 7 4
1955-56 ..	17 17 7	26 5 1	21 3 4	18 7 2	7 6 0	22 19 6	20 1 3
1956-57 ..	16 2 6	23 1 8	18 14 4	16 16 7	6 14 8	22 12 0	17 19 8
1957-58 ..	15 3 5	22 6 8	13 12 11	10 16 0	6 0 4	21 19 6	16 1 3
1958-59 ..	17 9 4	20 13 4	18 6 3	12 10 3	4 19 1	20 16 7	17 3 6

(a) No deduction has been made for depreciation and maintenance or for costs of materials used in the process of production in the poultry (for States other than Queensland) and Bee-farming Industries. (b) No deduction has been made for costs of power, power kerosene, petrol and other oils. (c) Includes Northern Territory and Australian Capital Territory.

4. Indexes of Quantum and Price of Farmyard, Dairy and Bee Production, 1954-55 to 1958-59.—For details of the methods of calculating these indexes and of the weights used. *see* Chapter XXX.—Miscellaneous.

INDEXES OF QUANTUM^(a) AND PRICE OF FARMYARD, DAIRY AND BEE PRODUCTION: AUSTRALIA:

(Base: Average 3 years ended June, 1939 = 100.)

Particulars.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
<i>Quantum(a) of Production—</i>					
Milk	116	123	119	111	120
Other Products	117	115	114	120	118
<i>Total Farmyard and Dairy ..</i>	<i>117</i>	<i>120</i>	<i>117</i>	<i>114</i>	<i>119</i>
Total per Head of Population	88	89	84	80	82
<i>Price—</i>					
Milk	370	380	365	375	372
Other Products	375	423	438	399	421
<i>Total Farmyard and Dairy ..</i>	<i>371</i>	<i>392</i>	<i>386</i>	<i>382</i>	<i>386</i>

^(a) Indexes of value at constant prices, i.e., quantities revalued at average unit values of base year (1936-37 to 1938-39).

§ 3. Dairy Cattle and Dairy Products.

1. **Dairy Herds.**—Lack of uniformity in the schedules used by the various States in the collection of livestock statistics makes it impossible to measure with complete accuracy the growth of dairy herds prior to 1943. Statistics of dairy cows—which form the largest part of herds—are, however, available on a comparable basis for a series of years. These statistics show that in 1918-19 there were 1,902,036 dairy cows (in milk and dry), compared with 2,345,070 in 1928-29 and 3,209,519 in 1938-39. The numbers remained at this level until March, 1944, but declined in succeeding years and did not regain the level of 1944 until 31st March, 1954, when the number recorded was 3,258,674. Since then numbers have increased to a record level of 3,451,450 in March, 1957, and then fallen to 3,283,147 at 31st March, 1959. There is a preponderance of dairy cattle in Victoria and Tasmania while in New South Wales and South Australia the proportion of dairy to all cattle is high. In Queensland, the Northern Territory, and Western Australia, other cattle predominate, the main object in these areas being the production of beef. In South Australia, the proportion of dairy cattle has fallen in recent years. The numbers of dairy cows and other dairy cattle recorded in each of the States and the Australian Capital Territory for the years 1955 to 1959 are shown in the following table.

NUMBER OF DAIRY CATTLE.

State.		At 31st March.	Dairy Cows (in milk and dry).	Dairy Heifers 1 year and over.	Dairy Calves under 1 year.	Dairy Bulls.	Total Dairy Cattle.
New South Wales	..	1955	906,774	203,583	130,437	23,840	1,264,634
		1956	976,089	194,397	143,385	23,944	1,337,815
		1957	971,868	191,476	147,398	23,468	1,334,210

Maps showing the distribution of dairy cattle in Australia at 31st March, 1955 and 1948, appear on page 910 of Official Year Book No. 43 and page 906 of Official Year Book No. 39, respectively.

2. Size of Dairy Herds.—A series of special tabulations relating to rural holdings undertaken for all States for the year 1955–56, covered, *inter alia*, a classification of holdings by size of dairy cattle herd and by area of holding, area of sown grasses and clovers, size of sheep flock, size of beef cattle herd, size of pig herd and number of milking machine stands. The tabulations have been published in full detail in a series of mimeographed bulletins *Size Classification of Rural Holdings*, 1955–56, and also appear in summarized form in *Primary Industries, Part I.—Rural Industries*, 1956–57, Bulletin No. 51.

3. Total Dairy Production.—The dairy production for each State in 1958–59 is shown below:—

DAIRY PRODUCTION, 1958-59.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Australia.
MILK ('000 GALLONS).

(a) Includes milk, the produce of New South Wales, sent as cream to factories in Victoria and Queensland. (b) Includes milk, the produce of Victoria, sent as cream to New South Wales. (c) Includes milk, the produce of Queensland, sent as cream to New South Wales. (d) Includes butter made from cream, the produce of Victoria and Queensland. (e) Includes butter made from cream, the produce of New South Wales. (f) Includes cheese made in establishments not classified as factories.

4. Whole Milk.—(i) *Production and Utilization.* During the five years ended 1938–39, approximately 80 per cent. of Australia's milk supply was used for making butter, 4 per cent. for cheese manufacture, 2 per cent. for condensery products and 14 per cent. for fluid consumption and other purposes. There has since been a considerable decline in the proportion of milk used for butter-making, with corresponding increases in the quantities used for other purposes. In 1958–59, 65 per cent. of the total milk supply was used for butter, 7 per cent. for cheese, 6 per cent. for condensery products and 22 per cent. for other purposes.

Details of the production of whole milk for various purposes are shown in the following table for each of the years 1954–55 to 1958–59:—

PRODUCTION AND UTILIZATION OF WHOLE MILK: AUSTRALIA.
(‘000 Gallons.)

Year.	Total. Production.	Quantity used for—			
		Butter (Factory and Farm).	Cheese (Factory and Farm).	Condensery Products.	Other purposes.
1954–55	1,325,799	886,652	98,569	64,365	276,213
1955–56	1,402,012	962,397	84,021	71,324	284,270
1956–57	1,357,942	890,833	98,233	78,123	290,753
1957–58	1,264,421	811,583	78,550	79,864	294,424
1958–59	1,371,164	893,626	94,900	81,074	301,564

In the following table, particulars of production of whole milk in the several States are shown for the years 1954-55 to 1958-59. Victoria is the principal milk-producing State and in 1958-59 the output from that State, 582.9 million gallons, represented 42 per cent. of total production. Output from New South Wales was 327.7 million gallons, or 24 per cent. of the total, and that of Queensland 258.2 million gallons (19 per cent.). Production in the remaining States accounted for 15 per cent. of the total Australian output.

TOTAL PRODUCTION OF WHOLE MILK.
(^{'000 Gallons.})

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Australia.

(ii) *Production per Cow.* The quantity of milk produced by a dairy cow can be as high as 1,000 gallons a year, varying greatly with breed, locality and season. For the whole of Australia, for all dairy cows and for all seasons prior to 1916, production averaged considerably less than 300 gallons per annum. In later years, not only has there been an improvement in the quality of the cattle, but the application of scientific methods has been continually extended, the 300-gallon average has been exceeded in each year since 1924 and more than 400-gallons per cow has been obtained in three of the last five years. In 1958-59, the average yield was 412 gallons. The annual average yields per cow shown in the following table are based on the approximate number of dairy cows which were in milk during any part of the year. The average shown is, therefore, less than that for cows which were yielding during the greater part of the year. It should be noted that there are many difficulties attending the collection of particulars of the total quantity of milk obtained during any year. In addition, there is the problem of ascertaining with reasonable accuracy the average number of cows in milk during the same period. The average yield per cow shown hereunder may be accepted as sufficiently reliable to show the general trend:—

AVERAGE MILK PRODUCTION PER DAIRY COW.
(Gallons.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Australia.
1954-55 ..	345	533	294	543	403	485	314	405
1955-56 ..	355	551	301	538	414	554	391	419
1956-57 ..	314	538	267	541	424	560	424	396
1957-58 ..	302	505	233	488	398	529	383	371
1958-59 ..	352	523	302	509	395	524	453	412

5. *Factory System.*—(i) *General.* Cream separation and butter-making are often carried on together under the co-operative system. The establishment of large central butter factories either on the co-operative system or on an independent basis has resulted in a considerable reduction in the cost of manufacture. The product is also of a more uniform quality and, whereas formerly the average quantity of milk used per pound of hand-made butter was about 3 gallons, factory butter requires less than 2½ gallons. In addition, subsidy payments by the Commonwealth Government are made only on factory produced butter. As a result, the production of farm made butter has declined substantially and in 1958-59, represented only about 1.4 per cent. of all butter made. A similar position exists in the cheese-making industry where a negligible amount is now made on farms.

(ii) *Number of Factories.* In 1958-59, the factories in Australia for the manufacture of butter, cheese and condensed milk numbered 363 and were distributed among the States as follows:—New South Wales, 77, Victoria, 127, Queensland, 78, South Australia, 41; Western Australia, 19; and Tasmania, 21. More details regarding numbers of factories, output, etc., are given in Chapter VI.—Manufacturing Industry.

6. *Butter Production.*—There was a steady increase in the annual output of butter for many years prior to the 1939-45 War. The average annual production rose from 126,000 tons for the five years ended 1928-29 to 195,000 tons for the five years ended 1938-39.

Following the record output of 211,987 tons in 1939-40, the general trend of butter production declined until 1946-47, when 143,308 tons were produced. Output increased again in subsequent years and in 1955-56 was 208,911 tons, the highest figure recorded in post-war years. Production declined in the two following years but in 1958-59 had increased again to 193,568 tons. The foregoing figures include butter produced on farms which has shown a decline from 8,714 tons in 1938-39 to 2,645 tons in 1958-59.

The following table shows production of butter in factories in each State for the years 1954-55 to 1958-59:—

BUTTER PRODUCTION IN FACTORIES.
(Tons.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia. (a)

(a) Year ended June.

(b) Year ended March.

7. Cheese Production.—Until 1916, the annual production of cheese in factories and on farms had not reached 10,000 tons. From 1916 to 1932-33, it ranged between about 10,000 and 16,000 tons, rising in subsequent years with some reversals of trend to an output of 44,796 tons in 1949-50. Production decreased in 1950-51 and 1951-52 but by 1953-54 had risen to a record output of 49,057 tons. Production has fluctuated in succeeding years between 35,000 and 45,000 tons, 43,503 tons being recorded in 1958-59.

The following table shows production of cheese in factories in each State in the years 1954-55 to 1958-59:—

CHEESE PRODUCTION IN FACTORIES.

(Tons.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia. (a)

8. **Condensed, Concentrated and Powdered, etc., Milk Production.**—The manufacture of these products has expanded greatly since 1938-39 to meet the needs of the Services during the 1939-45 War and for export purposes since the war. The output of condensed, concentrated and evaporated full cream milk (sweetened and unsweetened) in 1958-59 was more than three times as high as the average for the three years ended 1938-39, while that of powdered milk (full cream and skim) was more than five times as high. Over the same period, the quantity of whole milk used in the manufacture of the products shown below increased from 33.2 million gallons to 81.1 million gallons or by 135 per cent. These products are manufactured mainly in Victoria, which produced 66 per cent. of the total (in terms of whole milk equivalent) in 1958-59. New South Wales accounted for 18 per cent. and the remaining States for 16 per cent.

The following table shows details of the output of condensed, concentrated, powdered, etc., milk during the years 1954-55 to 1958-59.

PRODUCTION OF CONDENSED, CONCENTRATED AND POWDERED, ETC., MILK: AUSTRALIA.

Year.	Full Cream Milk Products.				Total Whole Milk Equivalent of Full Cream Milk Products.	Milk By-products.		
	Condensed, Concentrated and Evaporated Full Cream Milk.(a)		Powdered Full Cream Milk.	Infants' and Invalids' Foods.(c)		Condensed, Concentrated and Evaporated Skim and Buttermilk.	Powdered Skim Milk.	Powdered Buttermilk and Whey. (d)
	Sweetened. (b)	Un-sweetened.						
	Tons.	Tons.	Tons.	Tons.	'000 gals.	Tons.	Tons.	Tons.

1958-59	31,627	29,776	19,183	13,993	81,074	4,943	34,128	6,024

(a) Includes mixtures of full cream and skim milk and mixtures of full cream, skim and buttermilk.
 (b) Includes Coffee and Milk. (c) Includes malted milk and milk sugar (lactose). (d) Includes powdered mixed skim and buttermilk.

9. **Local Consumption of Butter and Cheese.**—A system of butter rationing introduced as a war-time measure and retained until 16th June, 1950, had the effect of considerably reducing civilian consumption. In the last year of rationing, 1949-50, consumption was 25.3 lb. per head per annum compared with an average of 32.9 lb during the years 1936-37 to 1938-39. Following the cessation of rationing, consumption rose sharply to 31.2 lb. in 1951-52, and until 1955-56, fluctuated between 29 lb. and 31 lb. per head per annum. In the next three years, however, consumption fell to 28.0 lb., 27.8 lb. and 25.9 lb. per head.

Cheese consumption rose considerably during the period of butter rationing, from 4.4 lb. per head pre-war to 6.3 lb. per head in 1947-48. Consumption has fluctuated considerably since then between a minimum of 5.2 lb. (in 1948-49) and a maximum of 6.8 lb. (in 1957-58). In 1958-59, 5.4 lb. per head were consumed.

The following table shows details of the production and disposal of butter and cheese for each of the years 1954-55 to 1958-59 compared with the averages for the years 1946-47 to 1948-49:—

(a) Figures for butter include ghee expressed as butter as well as butter shipped as ships' stores. Figures for cheese include ships' stores after allowance for a small quantity of cheese imported.
 (b) Includes allowance for movements in stocks other than those held in main cold stores.

10. **Butter and Cheese—Equalization Schemes.**—(i) *Voluntary Plan* (1926–1934). During the period from January, 1926, to April, 1934, a voluntary scheme known as the “Paterson Plan” was in operation which had the effect of stabilizing the price of butter in Australia. Details of this scheme may be found on page 1028 of Official Year Book No. 38 and in earlier issues.

(ii) *Compulsory Plan* (1934–1936). On 1st May, 1934, the “Paterson Plan” was superseded by a compulsory price equalization plan, details of which are shown on page 1029 of Official Year Book No. 38 and earlier issues. This compulsory plan was invalidated in 1936 by the decision of the Privy Council which declared in the *James (Dried Fruits)* Case that the Commonwealth had no power under the Constitution to regulate trade between the States.

(iii) *Voluntary Plan* (1936 to date). Since the Privy Council decision, the butter price equalization scheme has continued to operate by voluntary action based on agreements between the manufacturers and the Commonwealth Dairy Produce Equalization Committee Limited. The Committee, which comprises members of the State Dairy Products Boards and other persons representing the industry, enters into agreements with manufacturers to secure to them equal rates from sales of butter and cheese, and for this purpose may fix basic prices at which these products sold in Australia or abroad are to be taken into account. The effect is that local and export trade are distributed in equitable proportions among the manufacturers by means of quotas. The Committee fixes basic prices and equalizes returns to factories through an Equalization Fund. The States originally participating in the scheme were New South Wales, Victoria, Queensland and Tasmania in respect of both butter and cheese, and South Australia in respect of cheese. South Australia and Western Australia entered the scheme in respect of butter on 1st April, 1946, and Western Australia extended its participation to include cheese in January, 1947.

Details are given in para. 15 on page 994 of the returns realized on local and oversea sales and of the average equalization rate for the years ended June, 1954 to 1959. Details are also given in para. 12 of the wholesale prices of butter and cheese for home consumption as fixed by State Prices Authorities or as determined by the Dairy Produce Equalization Committee.

11. **Casein Equalization Scheme.**—Following upon action taken in September, 1951, to include control of exports of casein in the powers of the Australian Dairy Produce Board, that body decided that the most equitable method of allocating permits for exports of casein was to ensure that the recipient was a party to an approved equalization scheme. Agreements were completed with all known manufacturers and the equalization of casein sales under this scheme commenced in January, 1952. The scheme is operated by the Commonwealth Dairy Produce Equalization Committee Ltd. A Casein Equalization Advisory Committee was appointed to consider matters relevant to the operation of the plan and to make recommendations to the operating company.

Average realizations under the scheme were 166s. 5.2d. per cwt. in 1954–55, 180s. 9.9d. per cwt. in 1955–56, 184s. 6.6d. per cwt. in 1956–57, and 185s. 3.6d. per cwt., in 1957–58. An interim equalization value of 167s. 0d. per cwt. has been fixed for 1958–59.

Prior to the operation of this scheme, another plan had been operated by the Casein Equalization Committee from July, 1946, to September, 1949.

12. **Wholesale Price of Butter and Cheese in Australia.**—Since 20th September, 1948, when the Commonwealth Government ceased to exercise price control, the fixation of the wholesale prices of butter and cheese has been a matter for State Prices Authorities. At present, however, the power to fix prices is being exercised in only two States, Queensland and South Australia, the prices in all other States being determined by the Commonwealth Dairy Produce Equalization Committee Ltd. Details of prices operating in each of the States since 1st July, 1952, are shown in the following table.

WHOLESALE PRICES OF BUTTER AND CHEESE, AUSTRALIA.(a)

(a) Maximum prices fixed by State Prices Authorities or as determined by the Commonwealth Dairy Produce Equalization Committee Ltd., for choicest grade bulk butter and cheese.

13. **Marketing of Dairy Products.**—(i) *The Dairy Produce Export Control Act 1924-1954.* Introduced at the request of the dairying industry, this Act was passed by the Commonwealth Parliament with the object of organizing the overseas marketing of Australian dairy produce. A Dairy Produce Control Board was appointed and was in existence from 1924 to 1935. In the course of its functions, the Board regulated shipments to ensure regularity of supply in the London market, controlled forward selling, obtained reductions in overseas freights and insurance rates, and participated in an advertising campaign in the United Kingdom.

Prior to the appointment of the Dairy Produce Control Board, a voluntary body—the Australian Dairy Council—was established to advise and make recommendations to the Governments on problems connected with the production, manufacture and quality of dairy produce, pasture improvements and diseases of dairy cattle.

Following a recommendation by the Australian Agricultural Council, the functions of these bodies were combined by an amending Act of 1935 under the Australian Dairy Produce Board and provision was made for the allocation of money from the Board's funds for research and investigation into pastures, diseases of dairy cattle and the quality of butter. The functions of the Board were later extended to enable it to advise the Government in connexion with the transport of dairy produce, the securing of new markets, the expansion of existing markets and other matters.

The Australian Dairy Produce Board was re-constituted in 1947 by an amendment to the Dairy Produce Export Control Act, its membership being reduced from seventeen to twelve. The functions of the Board were extended to enable it to purchase and sell, on behalf of the Commonwealth, dairy produce intended for export, and to control all matters concerning the handling, storage, protection, treatment, transfer and shipment of the produce so purchased or sold. In 1953, the direct dairy farmer representation on the Board was increased from two to three members, thus raising the total membership from twelve to thirteen.

In April, 1954, the Act was further amended to prepare for the implementation of an export marketing plan to follow the expiration of the United Kingdom-Australia Butter and Cheese Contract. The amendment enabled the Board to purchase dairy produce intended for export to the United Kingdom and to sell such produce on behalf of the dairying industry in lieu of its previous function of selling on behalf of the Commonwealth Government. In the interests of the stability of the industry, the Act provides that the Board may be the sole Australian exporter of butter and cheese to the United Kingdom.

The Dairy Produce Export Control Act was again amended in 1958, principally to increase the membership of the Board by one to a total of 14 members. The additional member, designated the Administrative Member, is charged with the task of executing the Research and Sales Promotion campaign.

(ii) *The Dairy Produce Export Charges Act 1924-1937.* This Act provides for the imposition of a levy on all butter and cheese exported from Australia to cover the administrative expenses of the Board and for advertising and other purposes. The rate of the levy is fixed by regulation.

(iii) *Butter and Cheese Contracts.* Details of the war-time contracts arranged between the United Kingdom and Australian Governments, whereby the former undertook to purchase Australia's surplus butter and cheese, were shown on pages 985 and 986 of Official Year Book No. 37. The purchase of butter and cheese from 1944-45 to 1954-55 was covered by the Long-Term Purchase Agreement. Details of this Agreement and of the prices paid for various grades of butter and cheese each year under the Agreement were given in pages 943 and 944 of Official Year Book No. 42 and in earlier issues.

14. Commonwealth Subsidies and Stabilization Plans.—(i) *Butter, Cheese and Processed Milk Products.* Under the provisions of the various Dairy Industry Assistance Acts, the first of which was passed in 1942, the Commonwealth Government has provided subsidies on milk supplied for the manufacture of butter, cheese and processed milk products. Subsidies were paid on a seasonal basis prior to 1st April, 1946, but from that date have been on a flat rate basis. Subsidies are distributed by the Commonwealth Dairy Produce Equalization Committee Limited through factories to milk producers by payments on butter, cheese and processed milk products manufactured. Subsidy on milk supplied for the manufacture of processed milk products was discontinued from 1st July, 1948, to 30th June, 1949, and again from 1st July, 1952.

The first of the two five-year stabilization plans came into operation on 1st July, 1952. Under this plan, the Commonwealth Government, with the approval of the States, determined the ex-factory prices of butter and cheese, guaranteed to dairy farmers a return, based upon costs of efficient production, in respect of quantities of butter and cheese sold within the Commonwealth, plus an additional 20 per cent. (if produced), and agreed to make available an amount by way of subsidy to lift the return on that part of output covered by the guarantee, to the guaranteed level. The second five-year stabilization plan, which came into operation on 1st July, 1957, continued all the important features of the first plan. A new feature, however, was that any subsidy made available under the scheme should be on the basis of a fixed amount in any dairying year.

The actual amount of subsidy paid by the Commonwealth Government was in excess of its original commitment in 1955-56, when, to assist in offsetting a fall in export returns, the Government agreed to increase subsidy payments to a fixed figure of £14,500,000. In each of the years 1956-57 to 1959-60, a fixed amount of £13,500,000 was provided.

In 1958, following a period of low incomes due to drought and low export returns, the Government decided to give additional support to the dairy industry. This support took the form of underwriting a final equalization payment to factories on total production of butter and cheese for the 1958-59 season. The amount underwritten for butter was 40d. per lb. commercial butter basis. The Government also decided that it would consider applying the same principle of underwriting a final equalized return at levels determined by it each year, after an examination of all relevant factors for the remaining period of the 1957-62 five year stabilization plan. For the 1959-60 season, the underwriting of a final minimum return of 40d. per lb. commercial butter was again determined. The principal value underlying this guarantee is that it enables the Commonwealth Dairy Produce Equalization Committee Ltd. to strike a higher initial payment to factories than would otherwise be possible without risk of over payment.

Following representations by industry organizations, the Commonwealth Government established the Joint Dairy Industry Advisory Committee in November, 1946, comprising a chairman nominated by the Government, four representatives of Commonwealth Government Departments and four industry representatives from the several States. The Committee's functions, broadly, were to advise and assist in conducting cost and other surveys of dairy farm production and to act as an advisory body to the Government in these matters. From 1st April, 1947, to 30th June, 1952, the rates of overall return to milk producers determined by the Commonwealth Government for the purpose of subsidy payments were based on recommendations made by the Committee following surveys of production costs in the dairy industry.

Early in 1953, the Dairy Industry Investigation Committee, an independent body consisting of three members, was appointed to advise the Commonwealth Government on the guaranteed return to producers during 1953-54. The Committee was re-established in

March, 1954, to advise the Government on the guaranteed return for each year of the remaining three year period of the Stabilization Plan. For the current five year plan, the Committee has been re-appointed to determine the cost of efficient production of butter-fat only.

Amounts realized on exports of butter and cheese in excess of the f.o.b. equivalent of the guaranteed return have been credited to the Dairying Industry Stabilization Fund, which was established in July, 1948, for the purpose of stabilizing returns from exports. During 1951–52, the Stabilization Fund met the deficiency in respect of all exports which did not return sufficient to meet the basic return to the factory. From 1st July, 1952, to 30th June, 1957, it was available to the industry to be used, in whatever manner considered desirable by it, to make good any deficiency in respect of all exports other than the 20 per cent. provided for under the Commonwealth Government's Five-year Stabilization Plan. The Act was amended in 1957 to enable the Board to use the fund for such other purposes as are approved by the Minister for Primary Industry. After allowing for outstanding debits, the amount standing to the credit of the Dairying Industry Stabilization Fund at 30th June, 1959, totalled approximately £1,566,668.

(ii) *Whole Milk.* In addition to the subsidies referred to above, the Commonwealth Government subsidized the production of whole milk consumed directly from 1943–44 to 1948–49. Details of the amounts distributed during each year will be found in Official Year Book No. 38, page 1031.

15. Average Returns from Butter and Cheese Sold and Assessed Farm Production Costs.— The first of the two following tables shows in respect of butter and cheese, particulars of the rates realized on local, interstate and overseas sales and the average equalization and subsidy rates in operation for the years ended June, 1955 to 1959. The second table shows the distribution between factory and farm of the overall return to manufacturers for butter. The assessed farm production cost for commercial butter is also shown for comparison with the average returns to dairy farmers.

COMMERCIAL BUTTER: OVERALL RETURNS AND ASSESSED FARM PRODUCTION COSTS.

(Pence per lb.)

Year ended 30th June.	Average Overall Returns on Commercial Butter.			Assessed Farm Production Cost.(a)
	Rate of Overall Return to Manufacturer.	Manufacturing Cost.	Return to Dairy Farmer.	
1955.. .. .	50.878	4.253	46.625	49.29
1956.. .. .	49.924	4.626	45.298	49.29
1957.. .. .	49.093	4.626	44.467	51.00
1958.. .. .	48.474	4.626	43.848	51.00
1959.. .. .	(b) 49.347	4.826	(b) 44.521	53.00

(a) Up to 1956-57, the figures shown are the guaranteed returns as recommended by the Dairy Industry Investigation Committee and accepted by the Commonwealth Government: from 1957-58, they represent the cost of production as found by the Dairy Industry Investigation Committee. (b) Rates are of an interim nature and represent only payments made to date; further payments by the Dairy Produce Equalization Committee are expected.

16. Dairy Industry Extension Grant.—An annual grant of £250,000, to be expended by State Governments for the purpose of promoting improved farming practices in the dairying industry, was first made by the Commonwealth Government for the five years from 1st July, 1948. This assistance was continued by the Commonwealth Government for a further period of five years from 1st July, 1953, again by means of annual grants of £250,000, and similarly for a further five years from 1st July, 1958, at the same rate.

17. Dairy Industry Research and Sales Promotion.—At the request of the Australian Dairy Industry Council, legislation was enacted in 1958 to provide for a sales promotion campaign for butter and cheese in Australia and also for research into industry problems. The legislation provides for a statutory levy to be imposed on all butter and cheese manufactured in Australia. The maximum rates of levy are $\frac{3}{16}$ d. per lb. on butter and $\frac{3}{8}$ d. per lb. on cheese but the initial rates which commenced in November, 1958, were $\frac{1}{8}$ d. per lb. on butter and $\frac{1}{16}$ d. per lb. on cheese. The proceeds from the levy were divided equally between research and sales promotion. The rates of levy operative from November, 1959, were increased to the maximum provided under the Act, the increase being utilized solely for the purposes of intensifying the sales promotion campaign.

The Commonwealth Government agreed to contribute one half of the costs incurred on approved projects included in the programme of research, with a maximum contribution of £1 for £1 against funds raised by way of levy and allocated to research. The sales promotion programme is financed solely by the levy.

The scheme is administered by the Australian Dairy Produce Board, which, in respect of research, is advised by a statutory committee—the Dairy Produce Research Committee.

18. Oversea Trade in Butter, Cheese and Milk.—(i) *General.* The production of butter and cheese in Australia is considerably in excess of local requirements and consequently a substantial surplus is available for export overseas. In normal circumstances, the extent of this surplus is chiefly dependent upon seasonal conditions. Exports of butter, which averaged 90,000 tons in the three years prior to the 1939-45 War, were maintained to a certain extent during the war and post-war years by the restriction of supplies for local consumption, but because of lower production they nevertheless fell as low as 41,800 tons in 1944-45. In the last year of rationing, 1949-50, exports were 79,200 tons, but they fell to 11,300 tons by 1951-52. There was a substantial increase in exports in subsequent years and in 1958-59, 77,316 tons were shipped. In addition, small quantities of butter concentrate and ghee have been exported during the post-war period. Exports of cheese, which averaged 11,500 tons pre-war, rose to a maximum of 26,000 tons in 1948-49, but they subsequently fell and in 1958-59 amounted to only 14,411 tons.

During 1938-39, 96,900 tons of butter (95 per cent. of all butter exported) were shipped to the United Kingdom. With the decline in total exports, there was also a substantial reduction in the amount shipped to the United Kingdom up till 1954-55. This increased again to 72,400 tons (88 per cent.) in 1955-56, but fell once more in succeeding years and, in 1958-59, was 69,119 tons (89 per cent.).

In 1938–39, exports of cheese totalled 16,000 tons of which 15,500 tons or 97 per cent, were exported to the United Kingdom. Of the total of 14,411 tons exported in 1958–59, 11,574 tons or 80 per cent. were shipped to the United Kingdom.

Total quantities and values of exports of Australian origin of butter, cheese and condensed, concentrated, etc., milk and cream are shown on page 1003.

(ii) *Butter and Cheese Exports graded according to Quality.* All butter and cheese exported comes under the provisions of the Exports (Dairy Produce) Regulations and is subject to the supervision, inspection and examination of officers appointed for that purpose. These commodities are graded according to quality which has been fixed by regulation as follows:—Flavour and aroma, 50 points, texture, 30 points, and condition, 20 points. Butter and cheese graded at 93 to 100 points is of choicest quality, at 90 to 92 points, first quality, at 86 to 89 points, second quality, and at 80 to 85 points, pastry or cooking quality or, in the case of cheese, third quality.

In the following table, particulars are given of the relative proportions of butter and cheese graded for export according to quality. Further details, which include actual quantities by States, are to be found in *Primary Industries, Part I.—Rural Industries*. 1957–58, Bulletin No. 52.

BULK BUTTER AND CHEESE GRADED FOR EXPORT: AUSTRALIA.
(Per Cent.)

Grade.	Butter.			Cheese.		
	1956–57.	1957–58.	1958–59.	1956–57.	1957–58.	1958–59.

(b) Included with Second Quality.

§ 4. Pigs and Pig Products.

1. *Pigs.*—The number of pigs in Australia first reached a million in 1905. It fluctuated about this level up to 1940, when it reached 1,455,341, while in 1941 the record number of 1,797,340 was recorded. There was a decline in the two following years but the numbers rose again to 1,746,721 in 1944; thereafter, there was an almost continuous decline until 1953 when the number of pigs was only 992,532. Numbers increased in succeeding years to 1,422,565 in 1958 but fell again in 1959 to 1,288,742. Details of the number of pigs in each State and Territory for each of the five years 1955 to 1959 are given in the following table:—

NUMBER OF PIGS.

As at 31st March.	N.S.W.	Vic.	Qld.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Australia.
1955	375,019	263,666	406,879	84,502	107,039	58,382	911	104	1,296,502
1956	343,030	227,223	372,871	72,920	99,097	49,498	1,076	115	1,165,830
1957	386,789	258,336	394,518	92,180	139,982	52,358	755	139	1,325,057
1958	397,011	278,628	422,713	108,343	150,783	62,595	3,071	167	1,423,311
1959	348,730	253,125	399,875	98,374	115,446	69,215	3,802	175	1,288,742

Further details relating to pig numbers are given in Chapter XXIII.—Pastoral Production. Maps showing the distribution of pigs in Australia at 31st March, 1955 and 1948, appeared on page 912 of Official Year Book No. 43 and on page 908 of Official Year Book No. 39, respectively.

2. **Size of Pig Herds.**—A series of special tabulations relating to rural holdings undertaken for all States for the year 1955–56 covered, *inter alia*, a classification of holdings by size of pig herd and by area of holding, area of wheat grown for grain, and size of dairy cattle herd. The tabulations have been published in full detail in a series of mimeographed bulletins, *Size Classification of Rural Holdings*, 1955–56, and also appear in summarized form in *Primary Industries, Part I.—Rural Industries*, 1956–57, Bulletin No. 51.

3. **Pigs Slaughtered.**—The number of pigs slaughtered during each of the years 1954–55 to 1958–59 are shown in the following table:—

PIGS SLAUGHTERED.

('000.)

Year.	Slaughterings Passed for Human Consumption.							Total Slaughtering (including Boiled Down).
	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia. (a)	
1954–55 ..	615	422	499	136	182	79	1,939	1,951
1955–56 ..	576	395	459	132	160	88	1,817	1,828
1956–57 ..	541	382	438	124	157	82	1,730	1,740
1957–58 ..	638	473	462	175	219	91	2,066	2,077
1958–59 ..	604	462	521	179	197	108	2,077	2,087

(a) Including Australian Capital Territory and Northern Territory.

4. **Pigmeat.**—(i) *Production.* In the following table, details of the production of pigmeat in each State are shown for the years 1954–55 to 1958–59.

PRODUCTION OF PIGMEAT (BONE-IN WEIGHT).

(Tons.)

Year	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Australia.
1954–55 ..	33,031	22,058	23,645	8,115	8,873	3,429	65	192	99,408
1955–56 ..	30,543	21,492	21,921	8,124	7,922	3,635	67	204	93,908
1956–57 ..	28,879	21,178	20,200	7,367	7,475	3,341	59	200	88,699
1957–58 ..	28,683	24,343	23,131	9,516	11,405	4,216	82	239	101,615
1958–59 ..	27,253	23,770	26,210	9,451	9,991	4,911	113	187	101,886

(ii) *Consumption.* As in the case of most other meats, pork was subject to rationing during the 1939–45 War and immediate post-war years and consumption was at a much lower level than pre-war. In 1954–55, consumption of pigmeat (as pork or smallgoods) reached 10.2 lb., only slightly below the immediate pre-war average, but fell during each of the two following years to 8.7 lb. per head in 1956–57. Consumption in 1957–58 rose to 10.9 lb. per head, but declined slightly in 1958–59 to 10.7 lb. per head. In the following table, details of the production and disposal of pigmeat are shown for the years 1954–55 to 1958–59.

PRODUCTION AND DISPOSAL OF PIGMEAT (BONE-IN WEIGHT): AUSTRALIA.

Year.	Changes in Stock.	Production.	Exports.	Curing and Canning.	Consumption (as Pork or Smallgoods) in Australia.	
					Total.	Per Head per annum.
	'000 tons.	'000 tons.	'000 tons.	'000 tons.	'000 tons.	lb.
1954–55 ..	–0.5	99.4	2.9	55.6	41.4	10.2
1955–56 ..	–0.7	93.9	1.1	53.2	40.3	9.7
1956–57 ..	+0.9	88.7	0.6	50.3	36.9	8.7
1957–58 ..	+0.8	101.6	1.0	52.6	47.2	10.9
1958–59 ..	–1.9	101.9	0.9	55.3	47.6	10.7

5. **Bacon and Ham.**—(i) *Production.* As in the case of pork, the increased demand for bacon and ham during the 1939–45 War stimulated production to a level not previously attained. Production reached its peak in 1944–45 when 56,246 tons of bacon and ham were cured. This was followed by a decline in output in each succeeding year to 36,628 tons in 1951–52. Production has been maintained at about this level in subsequent years, 38,671 tons being recorded in 1958–59. Details of production are shown by States in the following table for each year 1954–55 to 1958–59.

PRODUCTION OF BACON AND HAM (CURED WEIGHT).(a)
(Tons.)

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
1954–55	11,769	8,074	10,807	3,378	3,316	1,027	38,371
1955–56	11,463	7,929	10,224	3,587	3,231	1,040	37,474
1956–57	10,322	7,721	9,901	3,415	3,054	917	35,330
1957–58	11,468	8,345	9,682	3,340	2,952	880	36,667
1958–59	11,606	8,832	11,299	3,069	2,955	910	38,671

(a) Pressed and canned bacon and ham have been converted to bone-in weight, except in pre-war years.

(ii) *Consumption.* Consumption per head declined in the early stages of the 1939–45 War from the pre-war average of 10.2 lb. per annum, but subsequently increased to 12.7 lb. in 1946–47. A decline to a relatively steady level of from 7 lb. to 8 lb. per head per annum followed. In 1958–59, consumption amounted to 7.1 lb. per head. Details of production and disposal of bacon and ham for the years 1954–55 to 1958–59 are shown in the following table.

PRODUCTION AND DISPOSAL OF BACON AND HAM (CURED WEIGHT)(a): AUSTRALIA.

Year.	Changes in Stock.	Production.	Exports.	Canning.	Consumption in Australia.	
					Total.	Per Head per annum.
	'000 tons.	'000 tons.	'000 tons.	'000 tons.	'000 tons.	lb.
1954–55	–0.2	38.4	1.0	5.4	32.2	7.9
1955–56	+0.4	37.5	0.7	5.1	31.3	7.5
1956–57	+0.3	35.3	0.5	5.6	28.9	6.8
1957–58	–0.2	36.7	0.5	6.1	30.3	7.0
1958–59	+0.2	38.7	0.3	6.4	31.8	7.1

(a) Pressed and canned bacon and ham have been converted to bone-in weight, except in pre-war years.

6. **United Kingdom Contracts.**—Details relating to the several war-time contracts and the more recent Long-term Purchase Agreement between the Governments of the Commonwealth and the United Kingdom for the sale of Australia's surplus production of meats (including pigmeats) are included in Chapter XXIII.—Pastoral Production.

7. **Oversea Trade in Pigs and Pig Products.**—Total quantities and values of exports of Australian origin of pigs and pig products (bacon and ham, lard and frozen pork) for the years 1956–57 to 1958–59 are shown on page 1003.

§ 5. Poultry-farming.

1. **General.**—Poultry-farming has been carried on in Australia for many years and the State Departments of Agriculture have encouraged its development by appointing experts to advise on the care and management of poultry and by conducting egg-laying competitions. Originally the industry was conducted in conjunction with other branches of rural activity,

mainly dairying, but it is now a specialized and distinct industry and it is from this source that the bulk of the commercial production is obtained. Practically all farms keep poultry for the purpose of supplying their own domestic requirements and in many cases some supplies from this source are also marketed. In addition, many private homes keep small numbers of fowls in backyard runs and this helps to maintain domestic needs, particularly when eggs are in short supply.

2. **Numbers of Poultry.**—In pre-war years, the numbers of the principal kinds of poultry were a normal feature of the annual census of livestock in all States except Victoria and Tasmania. These data were collected on a restricted scale by all States in 1942–43, the details obtained being confined to farms of one acre or more producing eggs or poultry for sale. The collection has since been discontinued in some States. Because of their incompleteness, details of poultry numbers are not published.

3. **Recorded Production and Disposal of Eggs.**—(i) *Shell Eggs.* Available statistics of the production and disposal of eggs in Australia are restricted to those recorded by the Egg Boards of the several States. Details of production in the respective States as recorded by these authorities for the years 1954–55 to 1958–59 are shown in the following table:—

SHELL EGGS: PRODUCTION(a) RECORDED BY EGG BOARDS.
(‘000 Dozen.)

State.	1954–55.	1955–56.	1956–57.	1957–58.	1958–59.
New South Wales	55,057	51,635	52,334	49,168	45,221
Victoria	26,377	24,985	24,874	25,956	23,447
Queensland	8,312	7,848	8,848	7,894	8,692
South Australia	12,359	11,820	11,375	11,219	9,692

Tasmania	889	943	912	(b)	(b)
Total	111,903	104,918	106,932	(c) 102,839	(c) 94,629

(a) Receipts from consignors and sales by producer agents. Tasmania.

(b) Not available.

(c) Excludes

(ii) *Egg Pulp.* Prior to the 1939–45 War, production of egg pulp was about 7 million lb. per annum. This was used almost entirely for the manufacture of cakes, pastry and biscuits, only negligible quantities being exported. Production was expanded greatly during the war years to meet the requirements of the Armed Services and was increased further in post-war years to supply a large export market and also a substantially increased home consumption. During recent years, however, production has fallen somewhat and, in 1958–59, was only 19.4 million lb. (compared with the post-war maximum of 45.2 million lb.), the lowest recorded since the end of the war.

Particulars of the production of whole egg pulp as recorded by the Egg Boards in the several States are shown in the following table.

LIQUID WHOLE EGG: PRODUCTION RECORDED BY EGG BOARDS.
(‘000 lb.)

State.	1954–55.	1955–56.	1956–57.	1957–58.	1958–59.
New South Wales	17,057	14,649	18,755	13,198	9,808
Victoria	6,564	6,879	6,245	6,591	3,473
Queensland	2,419	2,901	3,302	1,658	2,011
South Australia	6,516	5,991	4,501	4,461	2,495
Western Australia	1,924	1,532	2,024	2,855	1,600
Tasmania	246	236	133	(a)	(a)
Total	34,726	32,188	34,960	(b) 28,763	(b) 19,387

(a) Not available.

(b) Excludes Tasmania.

In addition to liquid whole egg, production was also recorded of liquid egg whites and liquid egg yolks. Output in 1958–59 amounted to 631,000 lb. and 337,000 lb. respectively, compared with 514,000 lb. and 355,000 lb. respectively in the previous year. These figures exclude small quantities produced in Tasmania for which details are not available.

(iii) *Egg Powder.* The production of dried egg powder was established in Australia in 1942, to treat Australia's surplus eggs so as to maintain exports to the United Kingdom under war-time conditions. Production was continued after the end of the war for export purposes, but since 1946-47 has declined to negligible proportions.

4. **Production and Consumption of Eggs.**—Statistics of total egg production must necessarily be accepted with some reserve. The production shown in the following table, together with details of exports and consumption, is based upon the records of Egg Boards of production from areas under their control plus estimates of production from uncontrolled areas and from "back-yard" poultry-keepers.

**ESTIMATED PRODUCTION AND DISPOSAL OF EGGS IN SHELL(a):
AUSTRALIA.**

Year.	Changes in Stock.	Estimated Total Production.	Exports.	For Drying and Pulping.(b)	Consumption in Australia as Human Food.

(a) In terms of weight of shell eggs. (b) The average weight of an egg in Australia is taken as 1.75 oz.

5. **Marketing of Eggs.**—(i) *United Kingdom Market.* Details of the annual contracts entered into between the United Kingdom and Australian Governments up to 1952-53 and of the results of trading under free market conditions in the four years following appear in earlier issues of the Official Year Book.

Because of the United Kingdom policy of expanding egg production, the United Kingdom's importance as a market for Australian shell eggs has been declining. In 1952-53, the United Kingdom took 86 per cent. of Australia's exports of shell eggs. In 1957-58, it took only 17 per cent. This proportion rose to 28 per cent. in 1958-59, though total exports were only 5 million dozen in 1958-59, as against nearly 21 million dozen in 1952-53.

The United Kingdom remains virtually the only export market for egg pulp. Australian exports of pulp thereto were approximately 7,000 tons in 1957-58 and 3,700 tons in 1958-59, the prices received on an f.o.b. basis averaging approximately £stg.197 a ton and £stg.201 10s. a ton respectively.

(ii) *Other Markets.* West Germany was the second largest export market for some years but her relative importance has declined. Other outlets for Australian eggs have been Singapore, Saudi Arabia, Italy, Malta, and New Guinea.

(iii) *Egg Export Control Act 1947.* Following the termination of Commonwealth control over the production and marketing of eggs on 31st December, 1947, functions relating to the local marketing of eggs reverted to State Egg Boards, which became responsible for stabilizing prices and marketing of eggs produced in the respective States. In order to assist in marketing Australia's surplus production of eggs under the Long-term Purchase Agreement with the United Kingdom, the Commonwealth established the Australian Egg Board under the Egg Export Control Act 1947. The Board, which commenced to operate on 1st January, 1948, was empowered to buy and sell, on behalf of the Commonwealth Government, eggs and egg products intended for export which comply with the provisions of the Export (Dairy Produce) Regulations. In addition, the Board was authorized to deal with all matters relating to the export of eggs and egg products from Australia, to make such experiments as are likely to lead to the improvement of the quality of Australian eggs and to promote their sale overseas. The Board consisted of ten members, including six representatives of egg producers and one representative of the Commonwealth Government.

Due to the discontinuance of inter-governmental trading in eggs and egg products, the Egg Export Control Act was amended in April, 1954, to provide for the reconstruction of the Australian Egg Board and the implementation of an egg export marketing scheme. The new Board, established on 17th June, 1954, comprises nine members including a representative of the Commonwealth Government and representatives from each State Egg Marketing Board (except Tasmania). The Board is empowered to act as a trading authority selling eggs and egg pulp as agent for State Egg Boards. However, any State Board desiring to export on its own account may do so, subject to general terms and conditions as laid down by the Australian Egg Board.

6. Oversea Trade in Poultry Products.—The Australian oversea export of poultry products has been confined in the past chiefly to eggs in shell and egg contents, which are consigned mainly to the United Kingdom. In 1949-50, exports of eggs in shell reached the record level of 23 million dozen. Shipments were at a lower level in subsequent years and, in 1958-59, 5.0 million dozen only were exported.

Prior to the 1939-45 War, exports of egg contents were small and in 1939-40 there was an excess of imports. During the war years, exports expanded greatly, mainly to meet Service requirements, and after the close of the war there was a further expansion to 37.9 million lb. of egg contents in 1953-54. There was a decline in subsequent years and in 1958-59 8.5 million lb. only were exported.

Since 1945, there has also been a considerable increase in the exports of frozen poultry. Exports, which amounted to 0.5 million lb. in 1958-59, were, however, much lower than in most preceding years.

Total quantities and values of exports of Australian origin of poultry products (live poultry, frozen poultry, eggs in shell, egg pulp and powder) for the years 1956-57 to 1958-59, are shown on page 1003.

§ 6. Bee-farming.

1. Production of Honey and Bees-wax.—Although practised as a separate industry, bee-farming is also carried on in conjunction with other branches of farming, but its place in Australia's rural economy is not very significant. The returns of honey from productive hives during 1958-59 showed an average of 103 lb. per hive and the average quantity of wax was 1.3 lb. per productive hive.

The number of hives and the production of honey and bees-wax during the year 1958–59 are shown in the following table.

BEEHIVES, HONEY AND BEES-WAX, 1958-59.

State or Territory.	Beehives.			Honey Produced.		Bees-wax Produced.	
	Pro- ductive.	Unpro- ductive.	Total.	Quantity.	Gross Value.	Quantity.	Gross Value.
	'000.	'000.	'000.	'000 lb.	£'000.	'000 lb.	£'000.
New South Wales ..	116	71	187	10,583	661	137	38
Victoria ..	74	27	101	7,624	532	86	24
Queensland ..	25	12	37	1,766	94	25	7
South Australia ..	56	17	73	5,453	266	80	18
Western Australia ..	38	7	45	6,680	221	84	16
Tasmania ..	5	2	7	342	26	4	2
Aust. Cap. Territory ..	1	..	1	39	3	1	..
Australia ..	315	136	451	32,487	1,803	417	105

The production of honey and bees-wax fluctuates considerably and is determined mainly by the flow of nectar from flora, particularly the eucalypts, which varies greatly from year to year. In recent years, there has been a pronounced upward trend in the output of honey, the 1948–49 figure, 53,200,000 lb., being an all-time record. Production in 1958–59 at 32,487,000 lb., although much lower than in 1948–49, was still higher than pre-war.

The table hereunder shows the production of honey and bees-wax for the five years ended 1958–59.

HONEY AND BEES-WAX PRODUCTION.

('000 lb.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aus- tralia.(a)

1958-59 ..	137	86	25	80	84	4	417

(a) Includes Australian Capital Territory and Northern Territory.

2. **Oversea Trade in Bee Products.**—Prior to the 1939–45 War, the production of honey exceeded Australian requirements and a small quantity was available for export. In 1948–49, the record quantity of 32.1 million lb., was exported. Exports amounted to 19.7 million lb. in 1957–58 and 11.2 million lb. in 1958–59.

The quantity of bees-wax imported generally exceeded that exported up to 1945–46, but since 1946–47, with the exception of 1951–52, production has been high on account of exceptionally good seasons, and exports have exceeded imports by substantial margins. In 1958–59, exports exceeded imports by an amount of 110,000 lb.

Total quantities and values of exports of honey and bees-wax for the years 1956–57 to 1958–59 are shown in § 7 below.

§ 7. Exports of Australian Farmyard, Dairy and Bee Products.

The quantities and values of Australian farmyard, dairy and bee products exported during the years 1956-57 to 1958-59 are shown below.

EXPORTS OF FARMYARD, DAIRY AND BEE PRODUCTS : AUSTRALIA.

§ 8. Imports of Dairy and Farmyard Products into the United Kingdom.

NOTE.—Values of imports in this section are expressed in £ sterling c.i.f. at the landed point.

1. Summary, Principal Products.—The following table shows the quantities and values of the principal dairy products imported into the United Kingdom during the years 1957, 1958 and 1959.

DAIRY PRODUCTS: IMPORTS INTO UNITED KINGDOM.

Product.	Unit of Quantity.	1957.		1958.		1959.	
		Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
			£'000.		£'000.		£'000.
Butter	'000 cwt.	7,306	99,483	8,454	97,397	8,017	134,368
Cheese	"	2,465	25,059	2,372	23,575	2,726	38,403
Milk, powdered and preserved	"	..	5,493	..	5,230	..	9,655
Bacon and ham	'000 cwt.	7,095	91,828	7,272	96,860	7,594	101,621
Pork(a)	"	497	4,642	370	3,401	280	3,212
Eggs in shell	'000 doz.	11,773	1,954	14,854	2,192	12,761	1,594
Eggs not in shell, liquid or frozen	'000 cwt.	417	5,806	473	5,445	253	3,555

(a) Excludes pork in airtight containers.

2. **Butter.**—Until 1950, Australia had regularly supplied between 20 and 30 per cent. of the butter imported into the United Kingdom. After 1950, when butter rationing was abolished in Australia, the quantity shipped was considerably lower, but in 1956 it again amounted to 1,515,000 cwt., or 21.4 per cent. of the total United Kingdom imports. Shipments fell away again in subsequent years. In 1959, Australia supplied 1,282,000 cwt. or 16.0 per cent. of the United Kingdom imports, New Zealand supplied 40.6 per cent. and Denmark 23.6 per cent.

In the following table, particulars of the quantity and value of butter imported into the United Kingdom are shown for the years 1957, 1958 and 1959 according to country of origin.

BUTTER: IMPORTS INTO UNITED KINGDOM.

Country from which Imported.	1957.		1958.		1959.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.

Total	7,306	99,483	8,454	97,397	8,017	134,368

3. **Cheese.**—The value of cheese imported into the United Kingdom in 1959 was £38,403,000. Of this, £21,950,000 was imported from New Zealand, £3,724,000 from Australia, £3,409,000 from the Netherlands, £2,721,000 from Canada and £2,610,000 from Denmark.

4. **Bacon.**—Of a total import, in 1959, of bacon (excluding bacon in airtight containers), valued at £87,146,000, the value of that supplied by Denmark was £62,799,000, Poland, £11,478,000, the Irish Republic, £5,354,000, and the Netherlands, £3,929,000.

5. **Pork.**—The value of the United Kingdom imports of pork (excluding pork in airtight containers) was £3,212,000 in 1959. Imports were mainly from New Zealand (£972,000) and the Argentine Republic (£881,000).

6. **Eggs.**—In 1959, the value of eggs imported into the United Kingdom was £5,149,000, comprising eggs in shell, £1,594,000, and liquid or frozen eggs, £3,555,000. Eggs in shell were supplied principally by Denmark and the Union of South Africa.

7. **Milk Products.**—In 1959, the value of preserved milk imported into the United Kingdom was £9,655,000. Of this total, imports from New Zealand amounted to £3,736,000, Australia, £2,068,000, and the Netherlands, £2,018,000.

8. **Other Dairy and Farmyard Products.**—The imports into the United Kingdom from Australia of poultry, bees-wax, lard and honey in 1959 were unimportant.

CHAPTER XXV.

FORESTRY.

§ 1. Introduction.

1. **Source of Statistics.**—Statistics relating to forestry are, in general, provided by the various authorities concerned with forestry administration. In each State, suitable areas of Crown Land have been reserved for forestry purposes, either as State forests or other reserves and the administration of these is the responsibility of the respective State Government forestry authorities. In addition, in some States, areas of forests on Crown Lands dedicated as National Parks and the like are administered by Government Departments other than the forestry authorities. There are timber resources on private land in each State but details concerning these areas and production therefrom are not complete for all States. Forestry activities in the Northern Territory and the Australian Capital Territory are administered by the Commonwealth Government.

Particulars of forested areas contained in this chapter have been collected by the Statisticians of the several States, mainly from information provided by the State Forestry authorities. The Commonwealth Forestry and Timber Bureau has provided figures for the Northern Territory and the Australian Capital Territory and in addition, has made available certain other data.

Statistics of timber by-products have been compiled from the annual factory collections undertaken by the Statisticians in the several States. Figures of production of eucalyptus oil, gums and resins, and tanning barks have been provided by the State Forestry Authorities.

Data of imports and exports of forest products and timber and timber products have been compiled in the Commonwealth Bureau of Census and Statistics as part of the overall statistics of overseas trade.

All figures shown are for the financial years ending 30th June.

Forested areas shown in this chapter relate to areas administered by the State or Commonwealth authorities or to those reserved by government legislation. They are not based on any inventory of forest resources using standard and uniform definitions throughout the Commonwealth. It should be noted therefore that the figures are not comparable between States owing to the lack of uniformity in the interpretation of the definition of what constitutes a forest.

2. **Objects of Forestry.**—The main object of forestry authorities is to manage the forests of the country in a manner that will provide the maximum benefits, both direct and indirect. Direct benefits include the provision of essential commercial commodities such as structural timber, pulpwood, plywood, veneers, firewood, bark products, tars, oils and resins. Indirect benefits include protection of soil and stock from wind and exposure, regulation of stream flow, and aesthetic effects. Forestry also aims at improving existing forests and woodlands and at providing a partial tree cover on denuded lands.

§ 2. The Forestry Industry.

1. **General Account of Forests and Timbers.**—The area of land in Australia suitable for the production of commercial timber as the primary crop is very small in comparison with the size of the continent. It is concentrated mainly around the wetter coastal belts and the eastern highlands and it includes the bulk of the land also suitable for intensive development by agricultural or pastoral undertakings.

The trees which make up the forests of Australia are mainly evergreen hardwoods. The characteristic genus is *Eucalyptus*. There are over six hundred different kinds of eucalypts and with few exceptions the natural occurrence of all of them is restricted to Australia. The genus includes species such as the mountain ash (*Eucalyptus regnans*) of Victoria and Tasmania, the world's tallest growing hardwood, and the karri (*E. diversicolor*) of Western Australia, another forest giant. At the other end of the scale, there are many eucalypts which do not grow to tall trees, including the species collectively known as the "mallees". The mallees develop a number of small stems from an underground structure called the "mallee root". Less than 100 species of eucalypts are used for sawmilling and not more than 40 are exploited extensively. The main commercial eucalypts are listed in Official Year Book No. 39 and earlier issues.

A large number of other genera represented in the Australian forest flora also produce commercial hardwoods. Among the outstanding furniture, cabinet and veneer timbers are red cedar (*Cedrela toona* var. *australis*), Queensland maple (*Flindersia brayleyana*), Southern and Northern silky oak (*Grevillea robusta* and *Cardwellia sublimis*, respectively), Queensland walnut (*Endiandra palmerstoni*), blackwood (*Acacia melanoxylon*), rose mahogany (*Dysoxylum fraserianum*), etc. Turpentine (*Syncarpia laurifolia*) ranks with the world's best as a harbour piling timber. Coachwood (*Ceratopetalum apetalum*) came into prominence for rifle furniture and for aircraft plywood during the 1939–45 War.

The most important indigenous softwood resources of Australia were in the forests of hoop pine (*Araucaria cunninghamii*) of Queensland and New South Wales. The greater part of the original hoop pine forest has gone but some of the areas have been replanted with this species in Queensland and, to a lesser extent, in New South Wales. There are still considerable areas of the useful white-ant-resisting cypress pine (*Callitris* spp.) in the inland areas of Queensland and New South Wales. They have been seriously overcut but are gradually being brought under management.

Other native softwoods which have played a useful but minor part in the Australian timber industry include bunya pine (*Araucaria bidwillii*) and kauri (*Agathis* spp.) of Queensland, and huon pine (*Dacrydium franklinii*), celerytop pine (*Phyllocladus rhomboidalis*) and King William pine (*Arthrotaxis selaginoides*) of Tasmania.

The savannah woodlands of the interior of Australia yield commercial commodities such as sandalwood, tan-barks and essential oils. They also have an important function in providing fuel and rough timbers for the development of agricultural and pastoral holdings.

2. **Extent of Forests.**—According to data assembled for the Seventh British Commonwealth Forestry Conference held in Australia and New Zealand in 1957, the total area of forest in Australia is estimated at 186,791 square miles, or about 6.3 per cent. of the total land area of the continent. The estimated forest area is distributed amongst the States as follows (the proportion of forest land to the total area of each State is shown in parentheses):—New South Wales and the Australian Capital Territory, 37,942 square miles (12 per cent.); Victoria, 26,222 (30 per cent.); Queensland, 28,000 (4 per cent.); South Australia, 36,000 (including 25,000 square miles of mallee suitable for firewood only) (10 per cent.); Western Australia, 41,826 (4 per cent.); Tasmania, 12,301 (47 per cent.) and the Northern Territory, 4,500 (1 per cent.). The areas given are rough estimates only and are considerably in excess of those which are both suitable for reservation and likely to be maintained for timber production. Included in the figures are considerable areas of low grade forest which, in many cases, are suitable for little more than the production of firewood. It is doubtful if the remaining prime native forest area of Australia exceeds 30,000 square miles. Further particulars are set out in the table hereunder.

CLASSIFICATION OF FOREST AREA(a): AUSTRALIA.

Class of Forest.	Area (Square Miles).				Proportion of Total Forest Area.
	State Forest.	Communal Forest.	Private Forest.	Total.	
Exploitable—					Per Cent.
Softwood	10,512	5	2,808	13,325	7.1
Mixed Wood	754	754	0.4
Hardwood	41,691	75	13,129	54,895	29.4
<i>Total</i>	<i>52,957</i>	<i>80</i>	<i>15,937</i>	<i>68,974</i>	<i>36.9</i>
Potentially Exploitable—					
Softwood	58	..	100	158	0.1
Mixed wood	100	100	0.1
Hardwood	13,002	..	12,200	25,202	13.5
<i>Total</i>	<i>13,160</i>	<i>..</i>	<i>12,300</i>	<i>25,460</i>	<i>13.7</i>
Other Lands Classed as Forest	81,023	450	10,884	92,357	49.4
Grand Total ..	147,140	530	39,121	186,791	100.0

(a) Based on the 1955 classification of forests.

State forests accounted for 78.8 per cent. of the total forest area, private forests for 20.9 per cent. and communal forests for 0.3 per cent.

The bulk of the softwood area of approximately 13,325 square miles is in Queensland and New South Wales and consists principally of slow-growing cypress pine (*Callitris spp.*) in low rainfall areas. The total area has been increased in comparison with previous estimates by the inclusion of a large area of crown land carrying scattered cypress pine. The volume of this species per acre is comparatively low.

Further particulars of forested areas are set out in § 3, page 1009.

3. **Persons Engaged.**—In the following table, which shows particulars collected in the Population Censuses of Australia at 30th June, 1947 and 1954, the numbers of persons whose "industry" was stated to be "forestry (excluding sawmilling)" are shown, together with the numbers engaged in all primary industries and the total work force.

PERSONS ENGAGED, AUSTRALIA.

Particulars.						At 30th June.	
						1947.	1954.
Persons engaged in—							
Forestry (excluding sawmilling)	No.			24,793	15,468
All Primary Industries	No.			563,607	560,100
Total Work Force	No.			3,196,431	3,702,022
Persons employed in Forestry (excluding sawmilling) as a proportion of—							
All Primary Industries	%			4.4	2.8
Total Work Force	%			0.8	0.4

The number of persons engaged in forestry operations, excluding those engaged in the sawmilling industry, represents about three or four per cent. of the total number of persons engaged in all primary industries and less than one per cent. of the total workforce of Australia.

Particulars of the number of persons employed by Forestry Departments and in Sawmills are included in § 5, page 1014.

4. Value of Production.—(i) *General.* Statistics of both the gross value (at principal market) and local value (at place of production) of the forestry industry are available. Particulars of the value of materials used in the process of production are not available for all States, so that values cannot be stated on a net basis, as has been done with most other industries.

In 1958–59, the local value of forestry production amounted to £52,273,000. The most important States were New South Wales, Victoria and Queensland with £15,574,000, £14,063,000 and £8,356,000 respectively.

(ii) *Gross and Local Values, 1957–58 and 1958–59.* Values of forestry production for each State are shown for 1957–58 and 1958–59 in the following table. A more detailed reference to the value of production of forestry and other industries in Australia, as well as a brief explanation of the terms used, will be found in Chapter XXX.—Miscellaneous.

GROSS AND LOCAL VALUE OF FORESTRY PRODUCTION.

(£'000.)

State or Territory.				Gross Value (Gross Production Valued at Principal Markets).	Marketing Costs.	Local Value (Gross Production Valued at Place of Production).
1957–58.						
New South Wales	15,766	425	15,341
Victoria	14,109	1,021	13,088
Queensland	10,335	921	9,414
South Australia	3,711	124	3,587
Western Australia	5,523	411	5,112
Tasmania	5,234	687	4,547
Northern Territory	38	(a)	38

Northern Territory	44	(a)	44
Australian Capital Territory	193	14	179
Australia	56,106	3,833	52,273

(a) Not available.

(iii) *Local Values, 1954-55 to 1958-59.* In the following table, the local value of forestry production and the local value per head of population are shown by States for the years 1954-55 to 1958-59.

LOCAL VALUE OF FORESTRY PRODUCTION.

Year.	N.S.W.	Vic.	Q'ld.	S.A.	W.A.	Tas.	Aust.(a)
LOCAL VALUE (£'000).							
1954-55	13,686	9,987	7,895	4,427	3,850	4,037	44,047
1955-56	15,343	11,823	8,660	4,596	4,877	4,591	50,059
1956-57	16,758	12,297	9,487	4,051	4,779	4,523	52,099
1957-58	15,341	13,088	9,414	3,587	5,112	4,547	51,306
1958-59	15,574	14,063	8,356	4,103	5,067	4,887	52,273

LOCAL VALUE PER HEAD OF POPULATION (£).

1954-55	4.0	4.0	6.0	5.5	5.9	12.9	4.8
1955-56	4.3	4.6	6.4	5.5	7.3	14.4	5.4
1956-57	4.7	4.7	6.9	4.7	7.0	13.9	5.5
1957-58	4.2	4.8	6.7	4.0	7.3	13.6	5.3
1958-59	4.2	5.0	5.9	4.5	7.1	14.3	5.3

(a) Includes Northern Territory and Australian Capital Territory.

§ 3. Forested Areas.

1. *Forest Reservations.*—The first attempt to determine the forest areas which should be reserved solely for purposes of timber production was made at an Interstate Forestry Conference held at Hobart in 1920. This Conference decided that an area of 24½ million acres of indigenous forest should be permanently reserved. According to statements furnished by State and Commonwealth authorities, reservations of forest areas in Australia as at 30th June, 1959, totalled 33,647,000 acres, of which 22,980,000 acres were Dedicated State Forests and 10,667,000 acres were Timber and Other Reserves. The distribution of those areas is shown by States in the following table:—

AREA OF FOREST RESERVATIONS, 30TH JUNE, 1959.

(Acres.)

State or Territory.	State Forests.	Timber Reserves (Forest Acts).	Other Reserves.	Total.
New South Wales	6,363,854	1,443,648	..	7,807,502
Victoria	4,845,415	710,541	(a) 169,302	5,725,258
Queensland	5,104,923	3,027,238	(b) 838,134	8,970,295
South Australia	267,858	981	222,000	490,839
Western Australia	4,323,902	1,772,610	(a) 883,950	6,980,462
Tasmania	2,073,567	137,028	(c) 972,147	3,182,742
Northern Territory	(d) 358,900	358,900
Australian Capital Territory	(e) 131,000	131,000
Australia	22,979,519	7,092,046	3,575,433	33,646,998

(a) Timber reserves under the Land Act. (b) National Parks. (c) Consists of 612,000 acres of pulp concessions over Crown land and 360,147 acres of exclusive forest permits not elsewhere included. (d) Gazetted areas with timber potential. (e) Forest land not specifically reserved.

If the permanently reserved areas were all of good quality, accessible, and fully productive forests supplying the class of timber required, they could be regarded as adequate for a much larger population than exists in Australia at the present time. Actually, however, a considerable proportion is in inaccessible mountainous country and many of the forests contain a mixture of species, only some of which are at present of commercial value; much of the area consists of inferior forest and a large proportion of the whole has been seriously degraded by recurrent fires. Also, the indigenous forest does not contain adequate supplies of softwoods producing commercial timbers and Australia's requirements of these have to be met largely by imports from other countries.

It is freely acknowledged by Australian forestry authorities that information on forest resources is very imperfect. It is not possible at present to give a reliable estimate of the forest areas needed to meet all future demands because of the number of unknown variables involved—in particular, the yield capacity per acre, future consumption of different classes of timber per head, and the future population. It appears, however, that all available potentially good forest country, including adequate areas for plantations of conifers, will need to be reserved, protected and systematically managed, if Australia is to approach the goal of self-sufficiency in timber supplies in the future. One of the most urgent requirements in this connexion is a comprehensive estimate of forest resources.

2. Plantations.—Reference has been made to the inadequacy of indigenous softwood supplies, but as a result of the planned policy of the forest services of the States and the Commonwealth and, to a lesser extent, of several private commercial organizations, the area of softwood plantations, mainly of exotic species, is steadily increasing. It was natural that this aspect of forestry received earliest attention in South Australia as it is the State most poorly endowed with natural forest. South Australia now has a larger area of planted softwoods than any other State in Australia, and for some years has been exploiting considerable quantities of timber from these plantations. The total production is now over 130,000,000 superficial feet per annum and is expected to be increased substantially during the next decade. Production is also increasing in the other States and first thinnings from their plantations are already supplying a significant portion of the requirements of the case-making industry.

The extent of existing softwood plantations as at 30th June, 1959, is set out in the following table:—

SOFTWOOD PLANTATIONS, 30TH JUNE, 1959.
(Acres.)

State or Territory.	Government.			Private (mainly <i>P. radiata</i>).	Total.
	<i>Pinus radiata</i> .	Other species.	Total.		
New South Wales	59,020	18,339	77,359	12,000	89,359
Victoria	34,113	10,985	45,098	48,693	93,791
Queensland	1,455	83,607	85,062	2,300	87,362
South Australia	99,106	7,779	106,885	35,133	142,018
Western Australia	7,544	19,501	27,045	300	27,345
Tasmania	12,738	827	13,565	4,528	18,093
Australian Capital Territory ..	20,059	2,084	22,143	100	22,243
Australia	234,035	143,122	377,157	103,054	480,211

A special article giving a detailed account of the history and development of softwood plantations and of the characteristics of individual species, prepared by the Commonwealth Forestry and Timber Bureau, is included in Official Year Book No. 45, pages 975 *et seq.*

Hardwood plantations (mainly *Eucalyptus spp.*) comprise a much smaller area and the total acreage is about 30,789 acres, nearly two-thirds of which is mallet (*Eucalyptus astringens*) which has been established in Western Australia for tan-bark production.

§ 4. Forestry Production.

1. **Timber.**—Particulars of logs treated and the production of sawn, peeled and sliced timber by sawmills and other woodworking establishments are shown in the following table, by States, for the year 1958-59. These figures have been compiled from the annual factory collections in each State which cover virtually all sawmills. The only omissions are some small portable mills operated by itinerants, e.g. sleeper cutters.

(NOTE.—The volumes of logs treated shown in the following tables are recorded in terms of hoppus measure which is approximately only three quarters of the true volume. The volume of a log in super. feet hoppus measure is calculated by squaring the girth (under bark at the centre of the log) and multiplying this by three quarters of the length of the log, all measurements being in feet. A cubic foot equals 12 super. feet.)

OUTPUT OF AUSTRALIAN GROWN TIMBER : ALL MILLS, 1958-59.

Particulars.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	Aust.(a)
LOGS TREATED ('000 SUPER. FEET HOPPUS MEASURE.)

(a) Excludes the Australian Capital Territory and the Northern Territory, details for which are not available.

The following table shows logs used, and sawn, peeled and sliced timber produced, in Australia for the years 1954-55 to 1958-59.

OUTPUT OF AUSTRALIAN GROWN TIMBER : ALL MILLS, AUSTRALIA.(a)

Particulars.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
LOGS TREATED ('000 SUPER. FEET HOPPUS MEASURE).					
Hardwood	2,101,306	2,139,337	2,107,781	2,062,360	2,142,776
Softwood	444,536	463,213	447,409	456,453	532,208
Total	2,545,842	2,602,550	2,555,190	2,518,813	2,674,984
SAWN, PEELED OR SLICED TIMBER PRODUCED FROM ABOVE LOGS ('000 SUPER. FEET).					
Hardwood	1,184,992	1,180,936	1,151,428	1,127,150	1,158,799
Softwood	264,296	268,786	267,431	264,027	301,175
Total	1,449,288	1,449,722	1,418,859	1,391,177	1,459,974

(a) Excludes the Australian Capital Territory and the Northern Territory, details for which are not available.

The next table shows the sawn, peeled and sliced output of Australian grown timber from sawmills and other wood-working establishments in each State for the years 1954–55 to 1958–59.

OUTPUT(a) OF AUSTRALIAN GROWN TIMBER : ALL MILLS.
(⁰000 super. feet.)

State.	1954–55.	1955–56.	1956–57.	1957–58.	1958–59.
New South Wales	372,920	362,709	365,548	359,737	373,515
Victoria	362,334	351,271	342,288	346,473	344,018
Queensland	264,914	261,730	275,936	268,200	262,033
South Australia	82,942	100,983	94,869	84,541	122,456
Western Australia	225,794	222,397	204,474	201,664	211,943
Tasmania	140,384	150,632	135,744	130,562	146,009
Australia(b)	1,449,288	1,449,722	1,418,859	1,391,177	1,459,974

(a) Total production of sawn, peeled and sliced timber. (b) Excludes the Australian Capital Territory and Northern Territory, details for which are not available.

In addition to the sawn timber shown in the preceding table, a large amount of hewn and round timber, e.g., sleepers, piles, poles, fencing material, timber used in mining, and fuel, is obtained from forest and other lands. Complete information in respect of the volume of this output is, however, not available.

2. **Veneers, Plywood, etc.**—Cutting of timber for the manufacture of veneers, plywood etc., has been carried out in most States for a number of years. In later years, however, this has been considerably extended, and much greater use has been made of locally-grown timbers, both hardwoods and softwoods. Special attention has also been paid to the selection of logs suitable for peeling.

The following table shows the production of plywood for each of the years 1954–55 to 1958–59.

PLYWOOD PRODUCED.
(⁰000 square feet— $\frac{3}{8}$ -in. basis.)

State.	1954–55.	1955–56.	1956–57.	1957–58.	1958–59.
New South Wales	35,039	39,256	41,921	45,647	56,378
Queensland	130,330	133,230	118,647	131,205	139,743
Other States	21,235	28,213	33,797	35,784	40,083
Australia	186,604	200,699	194,365	212,636	236,204

Of the total plywood produced in 1958–59, 180,144,000 square feet ($\frac{3}{8}$ -in. basis) was classed as "Commercial", 32,881,000 as "Waterproof", 2,668,000 as "Case" and 20,511,000 as "Sliced Fancy".

During 1958–59, 583.6 million square feet ($\frac{3}{8}$ -in. basis) of veneers were produced by the rotary process for the manufacture of plywood, and 204.0 million square feet ($\frac{3}{8}$ -in. basis) were sold or added to stock, the bulk of which would eventually be used in the production of plywood. In addition, 63.2 million square feet of sliced veneers were produced.

3. **Hardboard.**—The production of hardboard for building purposes from pulped wood has increased considerably in Australia in recent years. There were four factories producing hardboard during 1958–59 (two in New South Wales, one in South Australia and one in Tasmania) and during the three years ended 30th June, 1959, the following quantities were produced:—1956–57, 22,456,000 square yards; 1957–58, 24,504,000 square yards; and 1958–59, 29,067,000 square yards.

Most of this hardboard enters into usage in the condition in which it leaves the producing factories. The remainder is further treated and surfaced to a variety of finishes and in 1958-59 this production accounted for 1,592,000 square yards valued at £792,000.

4. Wood Pulp and Paper.—(i) *Wood Pulp.* The manufacture of wood pulp from Australian-grown timber was established in Australia in 1939, after years of experimentation with eucalypt hardwoods. During 1958-59, four wood pulp mills were operating in three States and production was 144,757 tons of chemical pulp and 62,069 tons of mechanical pulp, a total of 206,826 tons. During the previous year, production was 131,740 tons of chemical pulp and 75,855 tons of mechanical pulp.

- (a) *Victoria.* In Victoria, Australian Paper Manufacturers Limited produce wood pulp at Maryvale in Gippsland by a chemical process known as the kraft or sulphate process. The pulpwood used at this mill consists mainly of eucalypt timber below sawmilling quality together with a quantity of plantation pine thinnings.

During the year 1958-59, 300,578 tons of eucalypt and pine pulpwood and 19,382 tons of chipped sawmill waste were supplied to Maryvale Mill. Plantations of both pines and eucalypts are being established in Gippsland at the rate of approximately 2,500 acres a year by A.P.M. Forests Proprietary Limited.

- (b) *South Australia.* In South Australia, a paper board mill operates near Millicent, using raw material in the form of logs from the State Forests in the south east of South Australia. During 1958-59, a total quantity of 6,993,000 super. feet of pulpwood were supplied to this mill.

The forests of South Australia also supplied large quantities of pulpwood in log form to Australian Paper Manufacturers Ltd., Victoria, and during 1958-59 delivered 11,602,000 super. feet.

Continued progress has been made in establishing a new tissue paper mill near Millicent which commenced pilot operations early in 1960. An agreement has already been completed whereby this mill undertakes to purchase from 10 to 20 million super feet of pulpwood annually.

- (c) *Tasmania.* In Tasmania, two large mills are making pulpwood from indigenous hardwoods. At Burnie, on the north-west coast, Associated Pulp and Paper Mills Ltd. use a chemical method, the soda process, to produce wood pulp for fine writing parchment and printing papers from eucalypt hardwoods. This plant is of the most modern design and pulp and paper manufacture are combined with sawmilling and hardboard production. Offcuts and rejects from the company's and other firms' timber mills are used for pulping and the manufacture of hardboard. A continuous digester has been installed at the Burnie mill, making it the only one in Australia using a continuous pulping process. The company holds freehold and concession forest areas which are managed on a permanent yield basis with regeneration of the eucalypts in all suitable areas. Pine plantations are being established to provide softwoods for pulping.

Australian Newsprint Mills Ltd. at Boyer, 20 miles from Hobart, is the only producer of newsprint in Australia. Wood pulp is produced from hardwoods drawn from State timber concession areas. A mechanical process only was used until 1957 when additional plant was installed for the manufacture of semi-chemical pulp using the cold soda process which allows the utilization of additional species not suitable for ground wood pulp. Eucalypts provide about 80 per cent. of the mill's requirements for wood pulp, the remainder being imported long fibre softwood pulp. To secure more complete bush utilization, the company has established sawmills to convert understorey species, principally myrtle and sassafras, to sawn timber. The forests are managed on a sustained yield basis. Forest utilization and management are designed to obtain eucalypt regeneration. Experimental work into the problems involved is being carried out by the company and the Tasmanian Forestry Commission.

(ii) *Paper and Paper Board.* Paper and paper board are manufactured in all States but the industry is centred mainly in New South Wales, Victoria and Tasmania. During 1958-59, seventeen paper mills were operating, seven in Victoria, four in New South Wales, three in Tasmania and one each in Queensland, South Australia and Western Australia. A wide variety of papers and paper boards is produced in Australian mills, the quantity and value of paper produced in 1958-59 being as follows, with comparable figures for

1957–58 in brackets:—newsprint, 83,071 (81,085) tons valued at £6,304,189 (£6,227,529); blotting, 832 (537) tons, £145,224 (£94,571); duplicating, 4,870 (4,305) tons, £830,224 (£694,960); printing and writing, 63,200 (47,521) tons, £10,496,789 (£8,154,766); kraft wrapping, 57,668 (50,613) tons, £7,437,943 (£6,569,533); other wrapping, 12,362 (14,669) tons, £2,092,727 (£2,434,014); felt and carpet felt, 4,439 (4,553) tons, £448,339 (£464,406); and other paper, 35,043 (34,289) tons, £3,709,471 (£3,675,831). In addition, 200,339 (181,123) tons of paper boards valued at £17,437,412 (£16,471,576) were produced.

5. **Other.**—(i) *Eucalyptus Oil*. Oil may be distilled from the foliage of all varieties of *Eucalyptus*, and several of them furnish a product widely known for its commercial and medicinal uses. Complete information regarding Australian production and consumption of eucalyptus oil is not available, but considerable quantities are manufactured, particularly in New South Wales and Victoria. The value of oversea exports of eucalyptus oil distilled in Australia was £198,572 in 1956–57; £131,485 in 1957–58; and £77,083 in 1958–59. The quantities exported in the years 1956–57 to 1958–59 were 547,435 lb., 354,434 lb. and 209,541 lb. respectively.

(ii) *Gums and Resins*. Gums and resins are produced in most States of Australia, the main product being grass tree or yacca gum. This gum, which is used in the preparation of varnishes and lacquers, comes chiefly from South Australia, while small quantities are also produced in New South Wales and Western Australia. In 1958–59, the recorded production for Australia of gums and resins was 10,386 cwt. Exports of acaroid resin, grass-tree and yacca gum from Australia during the same period amounted to 7,014 cwt. valued at £14,914.

(iii) *Tanning Barks*. The forests of Australia are capable of yielding a wealth of tanning materials; many species of *Eucalyptus* and other genera contain varying proportions of tannin, chiefly in the bark, but also in the wood and twigs. Scattered distribution, however, has resulted in only the richest tan-bearing species being used in Australia. These are:—Golden wattle (*Acacia pycnantha*), green or black wattle (*Acacia decurrens* or *mollissima*), and mallet (*Eucalyptus astringens*). Mallet (*E. astringens*), of Western Australia, is not extensively used in Australian tanneries, but is exported to Europe and other countries. References to oversea trade in tanning substances are made in § 7, pages 1017 and 1018.

The production of extract from the bark of karri (*E. diversicolor*), of which very large quantities are available at karri sawmills, has passed the experimental stage, and private enterprise has started production on a commercial scale. The experimental work in kino impregnated karri (*E. calophylla*) bark is not yet complete. The total production of tanning bark in Australia approximated 25,000 tons per annum in the years prior to 1939, but since then production has declined and in 1958–59 was only 7,338 tons. However, this decrease is offset by the increased use of vegetable tanning extracts and synthetic tanning agents.

§ 5. Employment in Forestry.

1. **Persons Engaged in Forestry Activities.**—Particulars of the number of persons who, at the population censuses at 30th June, 1947 and 1954, stated that they were engaged in “forestry (excluding sawmills)” are shown in § 2, para. 3, page 1007.

2. **Employment by Forestry Departments.**—In the table below, details are shown of the number of persons employed by State Forestry Departments, and by the Forestry and Timber Bureau in the Australian Capital Territory and the Northern Territory, as at 30th June, 1959.

PERSONS EMPLOYED BY FORESTRY DEPARTMENTS, AS AT 30TH JUNE, 1959.

Occupational Group.	N.S.W.	Vic.	Q'ld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Professional Staff	185	189	81	79	52	30	2	7	625
Non-professional									
Field Staff ..	207	259	87	5	133	82	..	1	774

(a) Excludes Northern Territory and Australian Capital Territory, details for which are not available.

§ 6. Forest Administration, Protection and Research.

1. **Commonwealth Forestry and Timber Bureau.**—When the Commonwealth of Australia was established on 1st January, 1901, forestry was not included among the matters transferred from the States to the control of the Commonwealth. In 1925, the Commonwealth Forestry Bureau was instituted and under an Act of 1930 the Bureau received statutory powers. Its functions included the advising of the various Territorial Administrations on forestry matters, the management of forests placed under its control, the establishment of experimental forest stations, the training of students in forestry, etc. In 1946, the title of the Bureau was altered to Forestry and Timber Bureau. The powers and functions of the Bureau were extended to embrace the collection of statistics and information, and advising the Government of the Commonwealth and the States or other interested bodies on matters relating to the supply, production, imports and exports and distribution of timber in Australia.

The activities of the Bureau under its statutory functions are summarized below:—

(a) *Forestry Education.* The Australian Forestry School, located in Canberra, trains students as professional officers to manage the forests of Australia. Training at the School covers the third and fourth years of a four-year course. The first two years are spent at an Australian university in a study of prescribed science subjects. Courses at the School lead to Commonwealth Diplomas in Forestry and in Forest Technology and, in the case of the former, can lead further to a degree in forestry of an Australian university.

In addition to students nominated by State Governments and other Australian and overseas authorities and organizations, private students, including those from overseas, are accepted at the School. The normal capacity of the School is 40.

(b) *Silvicultural Research.* Research head-quarters and a Central Experimental Station have been established at Canberra. Other Forest Experimental Stations have been established at Mount Burr in the south-east of South Australia, in Tasmania, and at Dwellingup in Western Australia, on a co-operative basis with the Forest Services of those States. It is proposed to establish similar co-operative experimental stations in other States and Territories.

With its present limited staff, the research work of the Bureau has been concentrated largely upon studies of forest and climatic conditions, the genetic relationships and requirements of various species, forest nutrition and the improvement of forest yields. A considerable expansion in the research activities is planned for the next few years as suitable trained staff becomes available.

(c) *Forest Management Research.* A national forest stocktaking is being carried out by the Bureau in co-operation with the Forest Services of the States and, to assist in the work of forest assessment, special consideration is being given to the development of the use of aerial surveys.

Consideration is also being given, in co-operation with the State Forest Services, to the establishment of increased areas of plantations of exotic pines with a view to providing additional supplies of softwood timber.

The general economics of forest management are also being studied.

(d) *Timber Supply.* Advice is currently provided to government departments and "the trade" in matters pertaining to timber supply, including—(i) the availability of total quantities and quantities of particular grades and specifications required to meet Australia's needs; (ii) the quantity of timber that should be imported; (iii) the extent to which exports of timber and related products might be allowed without detriment to local needs; and (iv) distribution of timber within Australia.

(e) *Management of Forests.* The Bureau manages the forests of the Australian Capital Territory and maintains a forestry officer in the Northern Territory. In addition, it is responsible for advising the administrations of the Northern Territory and the External Territories on the management of the forests under their charge.

2. **Commonwealth Forest Products Research.**—Fundamental investigations connected with the properties and uses of timber and forest products generally are carried out by the Forest Products Division of the Commonwealth Scientific and Industrial Research Organization. These investigations cover a very wide field, e.g., pulp, paper, seasoning, structure and chemistry of wood, tans, etc.

3. **Forestry Activities of the States.** The powers and functions of State forest authorities are laid down under Forestry Acts and Regulations. In each State, there is a department or commission to control and manage the forests of the State. The functions of these administrations can be summarized as follows:—(a) the securing of an adequate reservation of forest lands; (b) the introduction of proper measures for scientific control and management of forest lands; (c) the protection of forests; (d) the conversion, marketing and economic utilization of forest products; and (e) the establishment and maintenance of coniferous forests to remedy the existing deficiency in softwoods. Annual reports are issued by each State forest authority. Victoria maintains a forestry school at which recruits are trained for the forestry service of that State.

In addition to the work of permanently reserving areas in each State, foresters are endeavouring to survey all timbered lands with a view to the elimination of those unsuitable for forestry. Considerable areas have been revoked in certain States, while dedications of new areas have resulted in gains to the permanent forest estate. The Forestry Departments or Commissions also usually control all timber on open Crown lands as well as over 10 million acres of timber reserves, national parks, etc., but, while these areas contain some land of high value for forestry purposes, the greater part does not fulfil these requirements.

4. **Fire Protection.**—Fire control measures in Australia are the responsibility of the individual State Governments, and the provision of adequate fire protection is one of the main problems facing forest authorities. The forest services are responsible for fire protection measures over an area of some 40 million acres of dedicated and reserved forest areas throughout Australia, including some 10 million acres of Crown land in Victoria.

The responsibility for the protection of private property outside urban areas rests with volunteer bush fire brigade organizations which are co-ordinated in each State by a committee or board carrying out functions of an advisory or educational nature and fostering the growth and organization of the bush fire brigade movement. Throughout the main agricultural and forest areas of Australia there are over 4,500 registered volunteer bush fire brigades with a membership approaching 200,000. Although both forest and rural fire organizations are entirely separate entities, a high degree of co-operation and liaison is maintained.

In addition to the forest service and rural organizations, various private and semi-Governmental bodies in each State maintain fire protection organizations, which are generally concerned with the protection of private forestry operations and hydro-electric and water catchment areas.

Over the five-year period 1955–59, the annual cost of protecting from fire the 40 million acres of forest land for which State Forest Services are directly responsible is estimated at £1,500,000 or about 8½d. an acre. The cost of rural fire control as a whole cannot be estimated with any degree of accuracy, owing to the fact that by far the greatest contribution comes from the personal efforts of volunteer brigade members.

The Australian fire season is very variable, with an average of a particularly bad fire season every seven years or so. Such years as 1926, 1939, 1944, 1952 and 1957 account for a large proportion of the average annual burn which, for the 3-year period 1957–59, amounted to 2,695,000 acres or 2.2 per cent. per annum of the forest area requiring protection. The variability of the Australian fire season is shown in the following table.

NUMBER OF FIRES AND FOREST AREAS BURNT: AUSTRALIA.

Season.				Number of Fires.	Forest Areas Burnt.	Burnt Areas as a Proportion of Total Forest Areas.
				No.	Acres.	Per cent.
1956-57	1,999	344,400	0.86
1957-58	2,908	2,078,340	5.11
1958-59	1,175	456,438	1.10

Source: Forestry and Timber Bureau.

Since the 1939-45 War, forest services have greatly expanded their fire detection facilities and big advances have been made in the use of power water-pumping equipment. Radio communication is now being used extensively by both forest services and rural organizations, and considerable progress has been made in the provision of legislative power for the rural bush fire movement, although the volunteer movement itself dates back to the turn of the century.

Intensive research work is being undertaken on fire problems and several governmental groups are working on such projects as the study of fire behaviour and associated fuel and meteorological conditions; the use of chemical aids in fire suppression; the development of protective clothing and devices to aid fire-fighters and of more efficient fire-fighting equipment. The fire weather service of the Bureau of Meteorology is being continually expanded to provide both the rural and forest fire-fighting authorities with improved fire weather forecasts.

Recognizing that fire prevention is one of the most important aspects of the problem, intensive campaigns have been conducted to reduce the incidence of man-caused fires. A study of fire causes in recent years reveals that human agencies account for 95 per cent. of all fires, and of this figure at least 80 per cent. are preventable. It is estimated that "burning-off" (much of which is started illegally) accounts for 35 per cent. of all fires; smokers, hunters, fishermen and travellers cause 13 per cent. of all fires; while only 5 per cent. of fires in Australia are caused by lightning.

§ 7. Oversea Trade in Forest Products, Timber and Timber Products.

1. Imports.—Quantities and values of timber, veneers and plywood imported into Australia during the years 1956-57 to 1958-59 are shown in the following table:—

IMPORTS OF FOREST PRODUCTS, TIMBER AND TIMBER PRODUCTS:
AUSTRALIA.

Particulars.	Unit of Quantity.	Quantity.			Value (£A.f.o.b. Port of Shipment).		
		1956-57.	1957-58.	1958-59.	1956-57.	1957-58.	1958-59.

Tanning substances ..	cwt.	154,742	162,238	137,847	536,237	471,349	383,020
Sandalwood oil ..	lb.	1,583	1,687	1,206	4,867	6,486	5,717

(a) Non-pored woods.

(b) Pored woods.

(c) Less than 500 super. feet.

Imports of softwood logs in recent years have come almost exclusively from British Borneo and the Solomon Islands, while 90 per cent. of the imports of hardwood logs have also come from British Borneo. Imports of undressed timber comprise mainly Douglas Fir (Oregon Pine) from Canada and the United States of America and Radiata Pine from New Zealand. Timbers from Scandinavian countries provide most of the dressed timber imports.

Imports of timber products are mainly of veneers and plywoods. The Australian Trust Territory of New Guinea provides most of the plywood imports and a substantial proportion of veneer imports.

Tanning substances are the only other forest products imported in significant quantities. The most important of these is wattle bark produced in the Union of South Africa.

2. **Exports.**—The quantities and values of timber, railway sleepers, veneers, plywood and other timber and forest products exported during the years 1956–57 to 1958–59 are shown in the following table:—

**EXPORTS OF FOREST PRODUCTS AND TIMBER AND TIMBER PRODUCTS
FROM AUSTRALIA.**

Particulars.	Unit of Quantity.	Quantity.			Value (£A.f.o.b. Port of Shipment.)		
		1956–57.	1957–58.	1958–59.	1956–57.	1957–58.	1958–59.

(a) Excludes stumps and the like.
woods.

(b) Excludes pole blocks in 1956–57.

(c) Non-pored

(d) Pored woods.

Sleepers make up the largest single item of forest products, timber and timber products exported from Australia. In 1958–59, India received more than half of Australia's sleeper exports while New Zealand, The Union of South Africa, Iraq and Pakistan each received quantities of more than a million superficial feet. Western Australia was the dominant exporting State.

Most of Australia's log and timber exports are of hardwoods. New Zealand received the greater part of exports of logs as well as of undressed timber. The United Kingdom received most of Australia's exports of plywood and veneers.

Exports of tanning substances in 1958–59 were mainly to the United States of America and that country also was the largest importer of eucalyptus oil. Exports of charcoal were all to New Zealand.

CHAPTER XXVI.

FISHERIES.

§ 1. Introduction.

1. **Source of Statistics.** Fisheries statistics in Australia are, in general, collected by the various authorities responsible for the administration of the industry. The fisheries within territorial waters (i.e. within three miles of the shore) are administered by State Departments while the Commonwealth Fisheries Office, a division of the Department of Primary Industry, develops and administers fisheries in extra-territorial waters and co-ordinates fisheries administration.

Statistics of production of fish, crustaceans, molluscs and pearl-shell and trochus-shell included in this chapter have been collected and supplied by State Fisheries Authorities through the Statisticians of the several States. Statistics have been provided on a year ended 30th June basis although figures for pearl-shell and trochus-shell refer to the season ended December or January of the fiscal year shown.

In interpreting fisheries production statistics, allowance should be made for incomplete coverage. Returns are collected in most States from licensed professional fishermen only, and as a result the published tables fall short of total fish production to the extent of the catch by amateur fishermen, the commercial catch by persons not licensed as professional fishermen and unrecorded catch by professional fishermen.

Particulars of whaling have been collected and supplied for publication by the Commonwealth Fisheries Office.

Data of imports and exports of fisheries and whaling products have been compiled in the Commonwealth Bureau of Census and Statistics as part of the overall statistics of overseas trade.

2. **Presentation of Fisheries Statistics.**—In the preparation of Australian fisheries production statistics, the quantities of individual products are, in the main, in terms of the form in which they are taken from the water. For example, the statistics of fish production published in this chapter are in terms of "estimated live weights" which are calculated from landed weights by using conversion factors for each species in each State. These conversion factors allow for the fact that the quantities of fish reported are frequently in a gutted, headed and gutted, or otherwise reduced condition. Crustaceans are reported on a "whole weight" basis and molluscs (edible) on a "gross (in-shell) weight basis". The figures of pearl-shell and trochus-shell refer to the actual quantities of dry shell for sale and exclude the weight of the fish.

The catch is generally shown according to the State in whose waters it was taken. However, a quantity of sharks and crayfish taken by Victorian-based fishermen in Tasmanian waters, but marketed in Victoria, has been included in the Victorian catch, since the economy of that State is most directly affected. Similarly, pearl-shell taken by Queensland luggers operating in Northern Territory waters has been included in the Queensland take. Pearl-shell taken by Japanese fishermen operating in Australian waters is excluded from Australian production figures although the quantities taken are shown as a footnote to the table on page 1028.

§ 2. The Fishing and Whaling Industries.

1. **Resources and Fishing Areas.**—(i) *Fish.* The waters surrounding the Australian continent contain a great variety of marine fauna. Despite this, the fish stocks in Australian waters, in common with most other countries of the Southern Hemisphere, are small by comparison with the stocks in the Northern Hemisphere, which supplies most of the world production. Nevertheless, the Australian catch is low even after making allowance for the smaller resources available and the consumption of fish in Australia per head of population is

small. Consequently, there is not the pressure on resources necessary to induce expansion in the fishing industry and to encourage the investment of large amounts of capital. On the other hand, even this somewhat restricted Australian demand for fish is not met from purely local sources of supply and quantities of fish are imported each year.

This apparent paradox is explained by the fact that the fisheries in the estuaries of the Australian coasts (the so-called estuarine fisheries) and those offshore for fish that dwell on the bottom of the sea (the demersal fisheries) have frequently been overfished with a consequent diminution of stocks while those species of fish which dwell near the surface of the sea (the pelagic species) have barely been exploited at all.

It can be anticipated that the greatest future development of the Australian fishing industry will take place in the pelagic fisheries. However, no great contribution to the supplies of fresh fish can be expected from this source since most of the pelagic species caught are canned or processed. An increase in the supply of fresh fish available to the Australian consumer will therefore require the development of new fishing areas and it appears that the trawling grounds of the Great Australian Bight are the most suitable for development in this regard.

The principal fishing areas at present are the coastal lakes, streams, estuaries and beaches which for the most part are associated with coastal streams. These offshore demersal grounds fall into two classes—(a) the reefs from which cod, snapper, etc., are taken and (b) the grounds from which flathead, morwong, etc., are taken. The reefs extend intermittently from northern Queensland around the southern part of the continent to Shark Bay in Western Australia. The flathead grounds lie on the continental shelf off south-east Australia, chiefly from Port Macquarie to south of Gabo Island and off the eastern Tasmanian coast.

The demersal shark grounds lie principally in Bass Strait and on the continental shelf off eastern South Australia. Other demersal grounds also exist in the Great Australian Bight and off the southern part of Western Australia. The grounds in the Great Australian Bight, however, would require large modern trawlers for commercial exploitation.

The grounds of existing pelagic fisheries include those for tuna which is taken in commercial quantities off the New South Wales and South Australian coasts. Barracouta is taken in Bass Strait and off eastern Tasmania. Spanish mackerel is found off the north-eastern coast from about Coff's Harbour to Cairns.

(ii) *Crustaceans*. Of the crustaceans exploited in Australia, crayfish are the most important and are taken on reefs of the continental shelf in the waters of all States. Considerable development has taken place in the crayfish fisheries, particularly in Western Australian and South Australian waters, owing to the opening up of markets in the United States of America for frozen crayfish tails. Crabs of various species are found in practically all coastal waters while prawns are taken in the temperate waters of Queensland and New South Wales. Lobsters are caught in the fresh-water streams of New South Wales.

(iii) *Molluscs (Edible)*. In the mollusc group, edible oysters of various species are distributed around the entire Australian coastline. Oysters are taken in all States, with the exception of South Australia, and in the Northern Territory but their commercial cultivation is restricted mainly to New South Wales. Until 1956, scallops were taken commercially in Tasmanian waters only, but since then they have been taken also in Queensland and Western Australia. Small quantities of other molluscs are also taken in some States.

(iv) *Pearl-shell and Trochus-shell*. Australia is the world's largest producer of pearl-shell which is fished from Cooktown in northern Queensland round the north coast of Australia to Exmouth Gulf in Western Australia. Trochus-shell is obtained from Mackay in Queensland to King Sound in Western Australia.

(v) *Whales*. Whales migrating from Antarctic waters to their breeding grounds in the warmer waters of low latitudes pass up both the western and eastern coasts of Australia, returning to the Antarctic in the spring. Two whaling stations operate in Western Australia, one in New South Wales, and one in Queensland. The company operating in New South Wales also operates a station at Norfolk Island.

2. *Persons Engaged*.—In the following table, which shows particulars collected in the Population Censuses of Australia at 30th June, 1947 and 1954, the numbers of persons whose "industry" was stated to be "fishing and whaling" are shown together with the numbers engaged in all primary industries and the total work force.

PERSONS ENGAGED: AUSTRALIA.

Particulars.	At Census of 30th June—	
	1947.	1954.
Persons Engaged in—		
Fishing and Whaling No.	10,656	8,637
All Primary Industries No.	563,607	560,100
Total Work Force No.	3,196,431	3,702,022
Persons Engaged in Fishing and Whaling as a Pro- portion of—		
All Primary Industries %	1.9	1.5
Total Work Force %	0.3	0.3

The number of persons engaged in the fishing and whaling industries represents less than two per cent. of the total number of persons engaged in all primary industries and less than half of one per cent. of the total work force of Australia.

Particulars of the number of persons engaged in the fishing industry, as shown in licensing records of the various States, are included in § 7, page 1030.

3. *Value of Production.*—(i) *General.* Although statistics of the value of production of the fishing industry have been on an established basis for some years, attention is drawn to the fact that the actual collection of statistics of the quantity of fish taken presents many difficulties and, consequently, any defects which may occur in the quantities must necessarily be reflected in the value of production. Statistics of both the gross value (at principal market) and local value (at place of production) of the fishing industry are available. Particulars of the value of materials used in the process of production are not available for all States, so that values cannot be stated on a net basis, as has been done with most other industries.

In 1958–59, the local value of fishing and whaling amounted to £11,243,000. The most important State was Western Australia with £3,867,000, followed by New South Wales with £2,947,000.

(ii) *Gross and Local Values, 1958–59.* Values of fishing and whaling production for each State are shown for 1958–59 in the following table. A more detailed reference to the value of production of fishing and whaling and other industries in Australia as well as a brief explanation of the terms used will be found in Chapter XXX.—Miscellaneous.

GROSS AND LOCAL VALUE OF PRODUCTION: FISHING AND WHALING, 1958-59.
(£'000.)

State or Territory.	Gross Value (Gross Production Valued at Principal Markets).	Marketing Costs.	Local Value (Gross Production Valued at Place of Production).
New South Wales	3,413	466	2,947
Victoria	1,433	168	1,265
Queensland	1,530	187	1,343
South Australia	1,230	159	1,071
Western Australia	3,909	42	3,867
Tasmania	664	(a)	664
Northern Territory	86	(a)	86
Australia	12,265	1,022	11,243

(a) Not available.

(iii) *Local Values, 1954-55 to 1958-59.* In the following table, the local value of fisheries production and the local value per head of population are shown by States for the years 1954-55 to 1958-59. Because the value of materials used in the course of production is not available for all States it is not possible to show a comparison of net values.

LOCAL VALUE OF FISHING AND WHALING PRODUCTION.

Year.	N.S.W.	Vic.	Q'ld.	S.A.	W.A.	Tas.	Total.(a)
LOCAL VALUE. (£'000.)							
1954-55	2,739	849	1,275	1,046	2,149	556	8,727
1955-56	2,684	734	1,471	995	2,406	505	8,884
1956-57	2,939	1,178	1,575	1,295	2,737	609	10,506
1957-58	2,792	1,104	1,542	1,074	3,226	508	10,402
1958-59	2,947	1,265	1,343	1,071	3,867	664	11,243

LOCAL VALUE PER HEAD OF POPULATION. (£.)

1954-55	0.8	0.3	1.0	1.3	3.3	1.8	1.0
1955-56	0.8	0.3	1.1	1.2	3.6	1.6	1.0

Weight	'000 lb.	2,784	2,114	1,911	1,229	916
Gross Value	£'000	350	346	357	184	106

(a) Excludes oyster and scallop production in Western Australia and oyster production in Northern Territory.

(b) Excludes pearl-shell taken by Japanese pearling fleet which operated in Australian waters. For quantities excluded see footnote to table on page 1028.

2. **Fish.**—The development of Australian fisheries proper has almost invariably followed the same sequence at each centre. The earliest fisheries were on-shore followed by demersal reef fishing using long lines. Trawling operations have followed line fishing in suitable areas and more recently the exploitation of pelagic fisheries has commenced.

The first major development of the demersal fishing industry came with the institution of trawling operations off the New South Wales coast in 1918, firstly by the New South Wales Government and later by private enterprise. The fleet of these vessels rapidly expanded. In recent years, the number of Danish seine vessels has continued to increase, particularly after the introduction of an improved multi-purpose type of vessel which can be used for tuna fishing as well as for seine trawling. At the same time, however, the number of steam trawlers based on Sydney has decreased to one. A large diesel-powered trawler, based on Adelaide, now operates in the Great Australian Bight.

Since 1930, fishing for school and gummy shark has rapidly extended its area of operations, particularly off the Victorian and Tasmanian coasts. A great impetus was given to this fishery during the war years by the demand for livers for fish oil production for medicinal purposes. This demand, however, eased with the return of cod-liver oil and availability of synthetic vitamin "A".

As far as pelagic fisheries are concerned, the growth of the Australian tuna fishing industry has been substantial in recent years. After the introduction of the pole fishing method in 1950, the catch of tuna increased considerably and amounted to 5.5 million pounds in 1958-59. Practically all this quantity was canned.

At the same time, the demand to justify an increased production of other pelagic fish, such as pilchards, sprats, jack mackerel and anchovies, has not been similarly encouraging. Pilchards caught in southern waters of Australia and sprats taken in Tasmanian waters, usually have some difficulty in finding a market. Considerable quantities of young jack mackerel, taken off the east coast of Tasmania and off Eden in New South Wales, are used as bait in tuna fishing. Anchovies caught by Victorian fishermen are used for manufacturing fish paste.

In the following table, total Australian recorded production of fish by the common names of groups of species is shown by States in terms of estimated live weight for the year 1958-59.

FISH: PRODUCTION BY SPECIES GROUPS, 1958-59.

('000 lb. Estimated Live Weight.)

Species Group.	N.S.W.	Vic.	Q'ld.	S.A.	W.A.	Tas.	N.T.	Aust.
Mullet	6,274	1,224	4,378	900	1,263	23	1	14,063

Leatherjacket	1,809	2,280	1,885	1,658	1,866
Ruff, Tommyruff, Sea Herring	1,460	1,068	1,918	1,563	1,860
Garfish	1,143	1,147	1,633	1,139	1,079
Other Fish	15,919	14,401	15,374	16,800	16,561
Total	70,422	63,298	75,403	72,016	74,416

Total production of fish by States for the years 1954-55 to 1958-59 is shown in the following table.

FISH: PRODUCTION BY STATES.

('000 lb. Estimated Live Weight.)

State or Territory.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
New South Wales	26,441	23,062	28,992	27,925	29,632
Victoria(a)	13,833	10,826	14,136	13,348	11,718
Queensland	9,368	9,668	9,447	9,034	9,930
South Australia	8,154	7,328	9,688	9,591	9,990
Western Australia	9,393	9,768	9,545	9,783	10,114
Tasmania(a)	3,115	2,545	3,416	2,175	2,797
Northern Territory	118	101	179	160	235
Australia	70,422	63,298	75,403	72,016	74,416

(a) Catch by Victorian fishermen in Tasmanian waters is included in Victoria.

3. **Crustaceans.**—Crayfish are taken, in pots and traps, in all States. Crayfish fisheries have developed greatly since the 1939-45 War to take advantage of the market in the United States of America for frozen crayfish tails, the total catch increasing from approximately 3,000,000 lb. in 1945-46 to 26,300,000 lb. in 1958-59. Of the total catch in 1958-59, Western Australia produced two-thirds or 17,500,000 lb.

Prawns are taken by otter trawl, mainly in New South Wales and Queensland waters. In 1958-59, Queensland accounted for 3,500,000 lb. and New South Wales for 3,100,000 lb.

Approximately two-thirds of Australia's production of crabs is taken from Queensland waters.

Lobster production is restricted to a single freshwater species, *Euastacus serratus*, from New South Wales streams.

Details of production of crustaceans are shown by States in the table below on a gross weight basis for the year 1958-59.

CRUSTACEANS: PRODUCTION BY TYPE, 1958-59.

('000 lb. gross weight.)

Type.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	Aust.
Crayfish ..	(a) 473	(b) 1,294	(c) 25	4,250	17,517	(b) 2,755	26,314
Prawns ..	3,148	17	3,500	..	86	..	6,751
Crabs ..	262	..	606	..	38	..	906
Total ..	3,883	(b) 1,311	4,131	4,250	17,641	(b) 2,755	33,971

(a) Includes take of freshwater lobster. Tasmanian waters is included in Victoria.

(b) Catch of crayfish by Victorian fishermen in
(c) Shovel-nosed lobster (*Thenus orientalis*).

The following table contains details of production of crustaceans in Australia for the years 1954-55 to 1958-59.

CRUSTACEANS: PRODUCTION BY TYPE, AUSTRALIA.

('000 lb. gross weight.)

Type.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59.
Crayfish(a)	20,207	18,456	18,905	21,991	26,314
Prawns	6,648	6,148	5,075	4,687	6,751
Crabs	813	870	835	826	906
Total	27,668	25,474	24,815	27,504	33,971

(a) Includes freshwater lobster.

4. **Molluscs (edible).**—Initially the Australian oyster fisheries depended solely upon the harvesting of naturally grown stock in littoral and submarine areas. However, the stocks soon deteriorated and attention was turned to methods of cultivation. This is carried on mainly in New South Wales where there has been constant improvement in methods and the present technique in certain areas is highly efficient. The Australian production (in shell) was 12,885,000 lb. in 1958-59, of which 12,390,000 lb. was produced in New South Wales and 407,000 lb. in Queensland. Particulars of the small quantities produced in Western Australia and Northern Territory are not available for publication.

Scallops are taken by dredge in Tasmanian waters and by trawl in Queensland waters. Tasmania was the dominant producer in 1958-59 with 4,735,000 lb. out of the total production of 4,786,000 lb. In addition, a small quantity was taken in Western Australia but particulars of this take are not available for publication.

Of the other molluscs taken, squid is the most important. Smaller quantities of cuttlefish, octopus, abalone and pipi have been taken from time to time.

Details of production of molluscs are shown by States in the table below on a gross (in shell) weight basis for the year 1958-59.

MOLLUSCS: PRODUCTION BY TYPE, 1958-59.

('000 lb. gross (in shell) weight.)

Type.	N.S.W.	Vic.	Qld.	W.A.	Tas.	N.T.	Aust.
Oysters	12,390	88	407	(a)	(b)	(a)	(c) 12,885

Squid	71	83	106	134	225
Cuttlefish	57
Octopus	2
Abalone	2	..
Total(c)	15,892	15,632	17,444	14,905	17,955

(a) Excludes Western Australia.

(b) Excludes Western Australia and Northern Territory.

(c) Incomplete; see notes to individual types.

5. **Pearl-shell and Trochus-shell.**—Pearl-shell and trochus-shell are taken from tropical waters of Australia, mostly during the period from April to January. In Western Australia, annual production is recorded for the year ended December, while in Queensland and Northern Territory the annual production is recorded for the year ended January. Statistics in this chapter are these annual production figures referred to the financial year ending 30th June following the close of the season.

Australia's pearling industry, which ceased operations on Japan's entry into the war in December, 1941, was faced at the end of hostilities, not only with a shortage of ships and gear, but also with the scarcity of expert labour, particularly divers. Before the war a large proportion of the key men were Japanese; the others were Malays, Chinese, Koepangers, Filipinos, Papuans and Torres Strait Islanders. The Commonwealth Government, with the view of overcoming this shortage, permitted in 1953 the employment of 35 Japanese divers, tenders and engine drivers in Australian luggers. By 31st January, 1959, the number of Japanese, employed mainly in Western Australia and in the Northern Territory, had grown to 161, out of a total number of 1,462 employed in the industry. Queensland with a more ready resource of labour from Torres Strait Islands was able to expand its fishing more rapidly and, in the 1949 season, achieved its highest post-war production of 1,191 tons. At 31st January, 1959, Queensland pearlers employed 746 Torres Strait Islanders in its total personnel of 964. Torres Strait Islanders represented more than half of the total number of 1,462 employed in the Australian pearl-fishing industry at that date.

Australia's pearl fishing takes place offshore to the 25 fathom line. In September, 1953, following the arrival of a Japanese pearl-fishing fleet in Australian waters, the Commonwealth Pearl Fisheries Act 1952-53 was brought into operation. This Act aims at the conservation of pearl-shell in accord with Australia's proclamation of sovereign rights over the natural resources of the sea bed and subsoil to the 100 fathom line. Japan disputed Australia's right to apply this legislation to foreign ships, and Australia agreed to refer the dispute to the International Court of Justice on condition that meantime Japanese pearling in Australian waters would be conducted in conformity with the Australian Government's policy of regulation and conservation, and that Japan would abide by the Court's decision. On these conditions, a Japanese pearling fleet has operated in prescribed waters since 1954.

In 1958-59, Australian production of pearl-shell and trochus-shell was 2,829,000 lb. and 916,000 lb. respectively. In addition, Japanese pearlers took 763,000 lb. of pearl-shell from Australian waters but as this was not landed in Australian ports it is not regarded as Australian production. The seasons of highest recorded production of pearl-shell have been—Queensland, 3,200,000 lb. in 1929; Western Australia, 4,480,000 lb. in 1917; and Northern Territory, 1,800,000 lb. in 1937.

In the following table, particulars of the quantity of pearl-shell and trochus-shell taken are shown for the years 1954–55 to 1958–59.

PEARL-SHELL AND TROCHUS-SHELL: QUANTITY TAKEN.

('000 lb.)

Particulars.	1954–55.	1955–56.	1956–57.	1957–58.	1958–59.
Pearl-shell(a)—					
Queensland(b)	896	1,142	1,127	1,131	889
Western Australia(c) ..	1,250	1,460	2,012	2,218	1,687
Northern Territory(b) ..	343	311	585	753	253
Australia	2,489	2,913	3,724	4,102	2,829
Trochus-shell—					
Queensland(b)	2,775	2,101	1,900	1,207	887
Western Australia(c) ..	9	13	11	22	29
Australia	2,784	2,114	1,911	1,229	916

(a) Excludes pearl-shell taken by the Japanese pearling fleet which operated in Australian waters, the quantities of which were as follows:—1954–55, 2,105,000 lb.; 1955–56, 1,657,000 lb.; 1956–57, 1,458,000 lb.; 1957–58, 1,572,000 lb.; 1958–59, 763,000 lb. (b) Season ended January of years shown. Shell taken by Queensland luggers operating in Northern Territory waters is included in Queensland. (c) Season ended December of years shown.

No complete particulars are available of production of natural pearls in Australia.

In 1956, the production of cultured pearls was introduced into Australia, with the establishment of a station at Augustus Island, off the northern coast of Western Australia. This station was later moved to a harbour, “Kuri Bay”, on Brecknock Island. This station, 130 miles north-east of Derby, produced its first crop of high quality pearls in 1958. Particulars of production of cultured pearls are not available for publication.

Exports of pearls (including cultured pearls) from Australia, were £62,000 in 1957–58 and £64,000 in 1958–59.

§ 4. Marketing and Distribution of Fish.

Most of the fish taken in Australian waters is sold in the metropolitan markets, although many of the fisheries are considerable distances from these centres. The arrangements for marketing of fresh fish vary from State to State and in some cases the State Government exercises a certain amount of control.

In New South Wales, marketing of fish is controlled by the Chief Secretary. The bulk of the State's catch is sold through the Sydney market, owned by municipal authorities but controlled by the Chief Secretary. A small branch market operates in Wollongong, and the eighteen fishermen's co-operatives also market fish in their own regions. By law, all fish for human consumption must be sold through a recognized market (i.e. Sydney, Wollongong or the co-operatives) unless ministerial consent for direct sale to consumers has been obtained.

In Victoria, there are no fish marketing regulations, and most of the catch, as well as considerable quantities of interstate fish, is sold at the main Melbourne market owned and controlled by the City of Melbourne. In addition, the eight fishermen's co-operatives engage in the wholesale and retail sale of fish within their own areas.

In Queensland, the Government Fish Board controls all marketing and in addition to the main Brisbane market, regulates the sale of fish through fifteen coastal markets and seven agencies extending along the coast from Southport to Port Douglas.

In South Australia, the Adelaide city fish market, the only one in the State, is owned and operated by the South Australian Fishermen's Co-operative. Of the total State catch, approximately 80 per cent. is handled by the co-operative, the balance being sold privately either to local or interstate fish agents.

In Western Australia, the Perth market is established as a government instrumentality but handles only a portion of the fish offered for sale in the main metropolitan area. Besides this, there are two other markets in Fremantle. One is conducted by the local fishermen's co-operative and the other by a private concern. Both are erected on land leased from the crown. Outside the main metropolitan area, marketing is conducted on a more or less private basis.

In Tasmania, there is no established market and the sale of fish is conducted on a private basis with fish agents playing a considerable part in the disposal of fish locally and to the mainland.

§ 5. Freezing, Processing and By-products.

1. **Freezing.**—Cold storage facilities, which were rather inadequate in the past, have, in most States, been improved and increased in recent years. In Queensland and New South Wales, particularly, most depots which have been established at fishing ports have now been equipped with cold storage space. In several States, there has been a development of establishments equipped for snap freezing of fish, in particular the freezing of crayfish tails, prawns and scallops for export. A number of vessels have also been equipped with freezing plants to process crayfish at sea.

2. **Processing.**—The attempt to establish the fish preserving industry at the commencement of this century met with little success although a bounty was paid to encourage production. The industry, however, continued to operate, but there was no marked development until about 1945–46 when the production of canned fish amounted to 1,700,000 lb. After that year, production increased considerably and reached a peak of 10,900,000 lb. in 1948–49, but gradually declined in subsequent years to 6,008,000 lb. in 1955–56. Production increased again in recent years and in 1958–59 was 7,687,000 lb.

In addition to the fish canned in 1958–59, 285,000 lb. of smoked fish, 1,699,000 lb. of fish paste, over 7,000,000 lb. of frozen crayfish tails for export, and a considerable quantity of quick-frozen fish for the local market were produced.

In 1939, New South Wales and Tasmania were the only States canning fish, but the industry has since been extended to Victoria, South Australia and Western Australia. Details of production are given in the following table for the years 1954–55 to 1958–59:—

FISH PROCESSING, AUSTRALIA.

('000 lb.)

Particulars.	1954–55.	1955–56.	1956–57.	1957–58.	1958–59.
Number of Factories	9	11	13	14	18
Fish Used (a)—					
Whole	3,081	3,528	8,072	9,293	10,603
Headed and/or Gutted	6,721	7,075	7,339	5,600	4,825
Estimated Live Weight Equivalent (b)	11,000	11,900	16,700	15,900	16,300
Production—					
Canned Fish (c)	6,645	6,008	8,257	7,856	7,782
Canned Oysters	8	..	(d)	(d)	(d)
Smoked Fish	66	123	487	439	286
Fish Paste	1,055	(d)	(d)	1,700	1,314
Fish Meal	270	(d)	(d)	(d)	(d)

(a) Fish used for canning (including fish loaf), smoking and the manufacture of fish paste, but excluding the weight of oysters used for canning. (b) The weight of headed and/or gutted fish is taken as 85 per cent. of live weight. (c) Includes fish loaf, fish cakes, etc. (d) Not available for publication.

The varieties canned in the several States differ according to the species caught, but separate details for each variety are not available. In New South Wales, Australian salmon and tuna are the principal varieties. Barracouta is of major importance in Victoria and Tasmania, and Australian salmon predominates in South Australia and Western Australia. Small quantities of sea herrings (or ruff) are also canned in the latter State.

3. **By-products.**—Processing of offal for fish-meal, etc., has been established in certain States. The processing of livers for vitamin-rich oils was undertaken in several States but, as mentioned previously, production has fallen to a low level in recent years.

§ 6. Consumption of Fish.

Particulars of the estimated supplies of fish, crustaceans and molluscs available for consumption per head of population, in terms of edible weight, are included in the table below for the years 1954–55 to 1958–59. For the purpose of compiling this table, the non-commercial fish catch has been estimated at ten per cent. of the recorded catch.

Fish is not a staple item in the diet of Australians and the consumption of fisheries' products remained at the comparatively low level of 9.7 lb. per head in 1958–59, more than half of this quantity being fresh or frozen fish.

ESTIMATED SUPPLIES OF FISH, ETC., AVAILABLE FOR CONSUMPTION, AUSTRALIA.

(lb. Edible Weight per Head per Annum.)

Particulars.	1954–55.	1955–56.	1956–57.	1957–58.	1958–59.
Fresh or Frozen—					
Fish—					
Australian Origin	3.4	3.0	3.3	3.1	3.1
Imported	1.8	1.9	1.8	2.1	2.2
Crustaceans and Molluscs ..	1.2	1.0	0.9	0.8	0.9
Cured (incl. Smoked and Salted) ..	1.0	1.1	0.5	1.3	0.8
Canned—					
Australian Origin	0.6	0.6	0.8	0.7	0.9
Imported	2.2	2.5	1.7	1.8	1.7
Total	10.2	10.1	9.0	9.9	9.7

§ 7. Boats and Equipment.

The boats for the on-shore fisheries are almost invariably small vessels fitted with low-powered petrol engines. The vessels working the reefs are larger (up to 50 feet) and have more power. The otter trawl vessels are steam trawlers, and the Danish seine vessels are 40 to 70 feet in length with diesel engines. The shark boats usually have diesel power and range from 35 to 50 feet in length.

The fishing equipment includes almost every possible type of gear, and appropriate boats are employed. The on-shore equipment includes mesh-nets, trawl-nets and traps

of various types. The demersal reef fishery is worked with traps, hand lines and long lines. The demersal flathead fishery is worked by both otter trawl (with Vigneron-Dahl gear) and Danish seine; in addition, some handlining is carried out. The demersal shark fishery is worked by long lines. The pelagic mackerel fishery employs trolling gear with lures of various types, while the pelagic barracouta fishery employs principally barbless jigs. Tuna is taken by trolling and, more recently, by pole fishing with live bait.

The following two tables show details of the number of boats, value of boats and equipment and persons employed in the taking of fish, crustaceans, molluscs (edible), pearl-shell and trochus-shell together with some other particulars of oyster fisheries.

It should be noted that because of variations in definitions and licensing procedures existing in the several States the data shown are not comparable between States. In some States, besides professional full-time fishermen, amateur part-time fishermen are licensed and the figures shown are overstated to this extent. These data should not be used as a guide to the relative effort applied in obtaining the recorded catch.

Figures of the numbers engaged full-time in fishing and whaling as recorded in recent population censuses are shown in § 2, page 1021.

(a) Excludes edible oyster fisheries except in Tasmania, but includes crustacean and other mollusc fisheries. (b) Excludes particulars for Western Australia, Tasmania and Northern Territory.

(c) Includes some equipment in New South Wales not previously valued. (d) Excludes Queensland. (e) Excludes Japanese pearling fleet which operated in Australian waters. (f) Excludes particulars for edible oyster fisheries in Western Australia and Northern Territory.

§ 8. Whaling.

The whaling industry was re-established in Australia in 1949, operations being carried out from shore-based stations. In that year, a station began operating at Point Cloates, Western Australia. The Australian Whaling Commission, established in 1949, built a station at Babbage Island near Carnarvon, Western Australia, and began operations towards the end of the 1950 season. In 1956, legislation was passed to dissolve the Commission and its assets were sold to the private company operating at Point Cloates. The operations of this company were transferred to Babbage Island and the Point Cloates station was closed in 1956. Other stations commenced operations in the following years: Cheynes Beach, near Albany (Western Australia) in 1952; Moreton Bay (Queensland) in 1952; Byron Bay (New South Wales) in 1954, and Norfolk Island in 1956.

Each of the stations operating is allowed a quota (in terms of humpback whales) imposed by the Minister for Primary Industry, acting on the advice of the Director of Fisheries who represents Australia on the International Whaling Commission. This catch quota was first introduced in Australia in 1951 and aims at conserving the stock of whales in order that the industry might continue on a stable basis.

Sperm whaling, which commenced in 1955 on an exploratory basis, is still being carried out on the Western Australian coast but the catch of this species is not subject to the quotas imposed.

The information summarized in the table below was supplied by the Commonwealth Fisheries Office. There is no prescribed season for sperm whaling but other details relate to seasons extending from 1st May to 31st October of each year.

WHALING STATISTICS: AUSTRALIA AND NORFOLK ISLAND.

Particulars.	Unit.	1955.	1956.	1957.	1958.	1959.
Seasonal Quota(a)	No.	1,840	1,990	1,960	1,960	2,080
Whales Taken(b)	"	1,840	1,990	1,961	1,812	1,673

Ashore	"	433	396	431	440	468
Whale Oil Produced—Quantity(b)	Barrel(c)	95,258	102,366	102,966	97,698	88,415
Whale Products—Value(b) ..	£'000	1,953	2,233	2,205	1,866	1,727

(a) In terms of humpback whales. For quota purposes, 2½ humpback whales are taken as equivalent to 1 blue whale, 2 fin whales, or 6 sei whales. (b) Excludes sperm whales. In 1959, 138 sperm whales were taken and processed, yielding 5,910 barrels of oil. (c) 6 barrels = 1 ton.

§ 9. Inquiries and Research.

1. **General.**—Research into the Australian fishing industry has been directed mainly towards seeking an explanation of the very slow rate of development and the conditions prevailing within the industry as well as the paucity of supplies available to the public. Details of the inquiries undertaken and the recommendations arising from them, will be found in Official Year Book No. 38, page 1082 whilst subsequent developments are outlined below.

2. **Commonwealth Scientific and Industrial Research Organization, Division of Fisheries and Oceanography.**—Details of the establishment, organization and functions of the Division of Fisheries of the Commonwealth Scientific and Industrial Research Organization will be found in Official Year Book No. 38, page 1083. The scientific basis on which the work of the Division is carried out has now been widened, and the name of the Division has been amended to "Division of Fisheries and Oceanography".

Research carried out by the Division has assisted greatly in the development and preservation of Australian fisheries. Details may be found in Official Year Book No. 41, page 848, and in previous issues.

3. **Commonwealth Fisheries Office.**—The Commonwealth Fisheries Office, a division of the Department of Primary Industry, arose out of a Tariff Board recommendation in 1941. Details of the establishment, organization and functions of the office will be found in Official Year Book No. 38, page 1084.

In accordance with the Tariff Board report, scientific research, as distinct from developmental and administrative functions, was left to the Commonwealth Scientific and Industrial Research Organization, which had established a Division of Fisheries for this purpose in 1937.

The Commonwealth is responsible for extra-territorial waters, whaling, pearling, rehabilitation of ex-servicemen in the fishing industry, fishery training schools, commercial development of fisheries, promotion of uniform conditions governing catches of various species of fish, economic research statistics, information and publications.

4. **Fisheries Development Trust Account.**—In early 1956, the assets of the Australian Whaling Commission, an authority set up by the Commonwealth Government in 1949, were disposed of to private interests. The finance derived from the sale, authorized by the Fishing Industry Act 1956, was paid into a fund, known as the Fisheries Development Trust Account. Provision was made in the Act for the moneys to be used for the purposes of developing the fishing industry through research, direct financial assistance, the development of particular fisheries, training schemes and the dissemination of information and advice through various publications and the press.

An Advisory Committee on fisheries development has been formed to advise the Minister on specific projects for fisheries development.

Projects which have so far been approved include:—

- (i) The purchase of a modern diesel trawler to investigate the commercial potentialities of trawling in the Great Australian Bight.

- (ii) A survey of the prawn resources off the east coast of Australia.
- (iii) A survey of the pilchard resources off the New South Wales coast.
- (iv) Barracouta survey in Bass Strait.
- (v) Crayfish survey off the south coast of Western Australia.

5. **North Australia Development Committee.**—In 1946, the North Australia Development Committee recommended that a hydrological and oceanographical survey should be made of North Australian waters. It also suggested that a biological survey should be made of the pearl oyster with particular reference to the possibility of instituting pearl culture.

Further reference to these and other recommendations may be found in Official Year Book No. 41, page 848.

The C.S.I.R.O. Division of Fisheries subsequently set up a biological research station on Thursday Island, mainly for the pearl and pearl-shell investigations. Since 1951, a research vessel has been based on Thursday Island and is used for diving, biological and hydrological work.

§ 10. Oversea Trade in Products of Fishing and Whaling.

1. **Imports of Fish.**—The value of edible fish and fish products imported in 1958–59 amounted to £6,140,000 compared with £6,146,000 in 1957–58.

In 1958–59, the live weight equivalent of fresh and processed fish imported was estimated to be equal to about 50–60 per cent. of the total Australian catch of fish, crustaceans and molluscs, the imports of canned fish being more than double the output of local factories. Of the total quantity of 24.6 million lb. of fresh fish imported in 1958–59, South Africa contributed 7.6 million lb., United Kingdom 5.4 million lb., New Zealand 5.1 million lb., and Denmark 3.2 million lb. A quantity of 16.8 million lb. of canned fish and fish products was imported in 1958–59 and of this, 6.9 million lb. originated in Japan, 3.6 million lb. in the United Kingdom and 2.6 million lb. in Norway. Particulars of the imports of fish and edible fisheries products are shown below for the years 1956–57 to 1958–59.

FISH, CRUSTACEANS AND MOLLUSCS: IMPORTS INTO AUSTRALIA.

Classification..	Quantity ('000 lb.)			Value (£A.'000 f.o.b. Port of Shipment).		
	1956–57.	1957–58.	1958–59.	1956–57.	1957–58.	1958–59.
Fresh or Frozen(a)	18,799	23,163	24,618	1,514	2,163	2,405
Smoked or Dried	3,482	9,698	6,284	215	649	491
Salted	910	2,231	1,465	76	198	148
Potted or Concentrated (including Extracts)	76	148	117	23	42	34
Canned—						
Herrings	4,984	4,581	4,008	507	480	443
Salmon	5,514	6,761	7,407	1,158	1,460	1,518
Sardines and Pilchards ..	4,584	4,381	4,456	833	826	829
Crustaceans	218	496	449	72	191	171
Other(b)	1,403	898	476	184	137	101
Total Canned	16,703	17,117	16,796	2,754	3,094	3,062

(a) Includes crustaceans and molluscs. which is included with "Smoked or Dried".

(b) Includes canned molluscs. Excludes frozen smoked

2. **Exports of Fish.**—The value of edible fish and fish products exported (including that produced in other countries) amounted to £3,675,000 in 1958–59 compared with £2,809,000 in 1957–58. Crayfish tails accounted for £3,202,000 and £2,489,000 of the total exports in 1958–59 and 1957–58 respectively.

In 1958–59, exports of items other than crayfish tails remained at the low levels of earlier years, but crayfish tails increased in importance, 7.3 million lb. being exported. Nearly all of this quantity was exported to the United States of America and the Hawaiian Islands.

The following table shows details of the Australian exports of edible fisheries products for the years 1956-57 to 1958-59:—

FISH, CRUSTACEANS AND MOLLUSCS: EXPORTS FROM AUSTRALIA.

Particulars.	Quantity ('000 lb.)			Value (£A.'000 f.o.b. Port of Shipment).		
	1956-57.	1957-58.	1958-59.	1956-57.	1957-58.	1958-59.
Fresh or Frozen(a)—						
Crayfish tails	4,775	5,802	7,281	2,310	2,489	3,202
Oysters in shell	75	13	8	1	2	1
Other	754	802	1,423	200	207	366
Potted or Concentrated (including extracts)	(b)	2	2	(c)	(c)	(c)
Smoked or Dried	8	1	10	1	(c)	2
Salted	14	2	18	1	(c)	(c)

Crustaceans and Molluscs ..	257	81	72	90	25	18
Total Canned	670	522	546	171	111	104

(a) Includes crustaceans and molluscs; excludes frozen smoked which is included with "smoked and dried". (b) Less than 500 lb. (c) Less than £500. (d) Includes exports of other than Australian produce amounting to:—136,000 lb. in 1956-57; 74,000 lb. in 1957-58; and 59,000 lb. in 1958-59.

3. Imports and Exports of Unmanufactured Shell.—In 1958-59, the unmanufactured shell imports were valued at £44,000 and exports at £832,000. Of the total value of exports, pearl-shell accounted for £612,000 and trochus-shell for £212,000

Imports of unmanufactured shell include quantities of pearl, trochus and green snail shell from New Guinea, Papua and the Pacific Islands which are subsequently re-exported from Australia.

The following table shows for Australia details of unmanufactured shell imported and exported during the years 1956-57 to 1958-59.

UNMANUFACTURED SHELL: IMPORTS AND EXPORTS, AUSTRALIA.

Particulars.	Quantity ('000 lb.)			Value (£A.'000 f.o.b. Port of Shipment).		
	1956-57.	1957-58.	1958-59.	1956-57.	1957-58.	1958-59.

Total unmanufactured shell ..	633	299	227	122	46	44
EXPORTS.						
Pearl	3,703	3,899	2,840	1,049	1,032	612
Trochus	2,149	1,628	1,405	504	254	212
Other (a)	153	100	67	35	14	8
Total	6,005	5,627	4,312	1,588	1,300	832

(a) Mainly green snail shell previously imported from other countries. Includes green snail and other shell taken in Australian waters for which production particulars are not available.

4. **Imports and Exports of Marine Animal Oils.**—In 1958–59, the value of imports of marine animal oils was £232,000, while exports of these products amounted to £1,156,000.

Of the total quantity of 318,000 gals. of whale oil imported in 1958–59, 257,000 gals. originated from Norfolk Island. Imports of other marine animal oils consisted of 59,000 gals. of cod liver oil, 87,000 gals. of unrefined fish oils and 30,000 gals. of other marine animal oils.

Of the total exports of whale oil of 3,373,000 gals., 1,917,000 gals. were shipped to the United Kingdom.

The table hereunder shows for Australia particulars of marine animal oils imported and exported during the years 1956–57 to 1958–59.

MARINE ANIMAL OILS: IMPORTS AND EXPORTS, AUSTRALIA.

(a) Principally from Norfolk Island.

CHAPTER XXVII.

MINERAL INDUSTRY.

§ 1. Introduction.

1. **Sources of Statistics.**—In the main, the data contained in this chapter consist of official statistics of the Mines Departments of the several States and of the Northern Territory Mines Branch. The particulars shown have been compiled as far as practicable on the standardized basis which has been used in Australia since 1950 and this presentation has involved some rearrangement of official statistics published by the Mines Departments in some States. These statistics have been supplemented, as necessary, by data obtained from the Statisticians of the several States, the Commonwealth Bureau of Mineral Resources, the Joint Coal Board, the Australian Mines and Metals Association (Inc.), the Mineral Resources Division of the United Kingdom Overseas Geological Surveys and from several other sources.

2. **Presentation of Mineral Statistics.**—(i) *Mineral Industry Data.* The mineral industry includes all mining and quarrying and the recovery of minerals from ore dumps, tailings, etc. Ore-dressing and elementary smelting of metallic minerals (e.g., in the case of gold) and miscellaneous treatment of non-metallic minerals, where these are carried out in an associated plant at or near the mine, are included in the mineral industry. However, establishments primarily engaged in smelting and/or refining (including the smelting and refining sections of the large plants operated at Mt. Morgan and Mt. Isa in Queensland and at Mt. Lyell in Tasmania) are omitted and classified to the manufacturing industry.

For mines and quarries which produce more than one product, it is not possible to apportion some particulars relating to the operations of the mine (employment, salaries and wages paid, and costs incurred in production) to the minerals produced. It is, therefore, the practice to record these data only as a total for each mine and then to classify each mine to the industry of the most important mineral produced. Thus a mine producing, say, both tin and tungsten minerals, would be classified as a tin mine if tin were the more important product by value, or vice versa if tungsten were the dominant product.

The mineral industries are classified into four major groups, namely, Metal Mining, Fuel Mining, Non-metal (excluding Fuel) Mining, and Construction Material Quarrying.

Mineral industry data are obtained annually from the Mining and Quarrying Census, which collection was first made in 1952. This census is carried out in collaboration with the several Mines Departments and involves the uniform collection of particulars from all establishments employing on the average four or more persons during the period worked by the mine. A representative specimen collection form is included in the Bulletin *Primary Industries, Part II.*, No. 52, 1957–58, pages 45 and 46. For smaller mines, either simplified Census returns covering number of persons employed and value of output are collected or these particulars are compiled from data made available by the Mines Departments.

Particulars of the uranium-mining industry are excluded, as are operations associated with the exploration for minerals, e.g. oil-search.

(ii) *Mineral Product Data.* In the preparation of Australian mineral production statistics, the quantities and values of individual minerals produced are reported in terms of the products in the form in which they are dispatched from the locality of each mine. For example, in the case of a metal mine, the output is recorded as ore when no treatment is undertaken at the mine, or as a concentrate where ore-dressing operations are carried out in associated works in the locality of the mine. In addition to the basic quantity data, the contents of metallic minerals and contents or average grade of selected non-metallic minerals are reported. Whenever practicable, contents (based on assay) of metallic minerals are shown for each metal which is a "pay metal" or a "refiners' prize" when present in the particular mineral. Other metallic contents which are not recovered are excluded.

Minerals are divided into four major groups, namely, Metals, Fuels, Non-metals (excluding Fuels) and Construction Materials. In this chapter, individual mineral products are arranged in these four groups.

Particulars relating to uranium-bearing minerals are excluded.

3. **Occurrences of Minerals.**—The greatest part of the area of outcropping rock on the Australian continent is Precambrian in age. These basement rocks form the western and central core of the continent and are flanked by younger Palaeozoic rocks which, along the eastern edge of the continent, form a belt several hundred miles wide extending from North Queensland to Tasmania. Smaller areas of Palaeozoic rocks occur in other States. Mesozoic sediments overlies large areas of the continent and reach their greatest development in central Queensland. Cainozoic rocks occur mainly in the southern parts of Victoria and South Australia and as residual basalt cappings over an extensive area of the Palaeozoic rocks of eastern Australia.

Minerals occur widely throughout the Precambrian and Palaeozoic rocks of the continent. Palaeozoic mineralization is perhaps more varied but the deposits now being worked are in general smaller than those found in Precambrian rocks. Most of the larger deposits of minerals now being mined in Australia are shown in the following table according to the geological era in which they were formed.

PRINCIPAL AUSTRALIAN MINERAL DEPOSITS.

Age of Geological Formation in which Located.	Metal or Mineral.	State or Territory.	Locality.
Precambrian (more than 520 million years old)	Copper ..	Queensland ..	Mt. Isa
	Gold ..	Northern Territory	Tennant Creek
		Western Australia	Kalgoorlie, and other localities
	Iron ..	South Australia ..	Middleback Ranges
		Western Australia	Yampi Sound
	Lead-Silver-Zinc	New South Wales	Broken Hill
Palaeozoic (between 200 and 520 million years old)		Queensland ..	Mt. Isa
	Uranium ..	Queensland ..	Mary Kathleen
		South Australia ..	Radium Hill
		Northern Territory	Rum Jungle and South Alligator River Area
	Black Coal ..	New South Wales	Hunter Valley, Lithgow, South Coast
		Queensland ..	Baralaba, Blair Athol, etc.
		Western Australia	Collie
	Copper-Gold ..	Queensland ..	Mt. Morgan
		Tasmania ..	Mt. Lyell
	Lead-Silver-Zinc	New South Wales	Captain's Flat
		Tasmania ..	Mt. Read and Rosebery
	Tin (lode) ..	Queensland ..	Herberton
Mesozoic (between 75 and 200 million years old)		Tasmania ..	North-east of State
		Tasmania ..	King Island and North-east of State
	Black Coal ..	Queensland ..	Ipswich
		South Australia ..	Leigh Creek
		Tasmania ..	St. Marys
Cainozoic (less than 75 million years old)	Mineral Sands(a)	New South Wales	North Coast
		Queensland ..	South Coast
	Brown Coal ..	Victoria ..	Gippsland
	Tin (alluvial) ..	New South Wales	Tingha
		Queensland ..	Herberton
		Tasmania ..	North-east of State

(a) The deposition of mineral sands, derived from Palaeozoic granites, continued throughout the Cainozoic Era.

The extensive bauxite (aluminium) deposits of Cape York Peninsula in Queensland are to be worked shortly. These were formed during the early part of the Cainozoic Era as a result of climatic conditions then prevailing.

Of the non-metallic minerals, many, such as clay, sand and silica, etc., are not restricted to the rocks of any particular era. However, Precambrian rocks do contain important deposits of asbestos in Western Australia, limestone and dolomite in South Australia, and mica in the Northern Territory. Crude salt is harvested in pans from which water has been evaporated.

4. Mineral Concentrates.—Concentration is a physical process involving the removal of mineral impurity from the ore. Most mines now dispatch ore in concentrate form as this considerably reduces the transport costs and produces a saleable product in the form required by smelters. Most concentrates are nearly pure mineral and the ore dressing processes (with the exception of that for uranium) involve no chemical change to the mineral being won. Various methods are used in concentration. Sulphide ores which now comprise the greatest tonnages treated are, in most instances, separated from the gangue by flotation. In this method of concentration, the ore is ground finely enough to liberate the individual mineral particles, aerated and agitated in tanks of water to which chemicals have been added. Under certain conditions, particles of one sulphide mineral adhere to the froth bubbles and are collected in the froth overflow, while gangue and even other sulphides are depressed. By treating the tailings of one flotation process with different chemicals and conditions it is often possible to separate a further concentrate, as is done at Broken Hill where the zinc sulphide is recovered from the tailings of the lead sulphide concentration process. Differential flotation is most extensively developed at Captain's Flat, in New South Wales, where successive concentrates of copper, lead, zinc and pyrite are obtained from a lead-silver-zinc-copper ore. Tailings from the lead flotation at Captain's Flat are passed over corduroy strakes to recover free gold in concentrate form.

Other methods of concentration used are gravity (alluvial tin, mineral sands, some lead-zinc ores), electromagnetic (wolfram, scheelite, glauconite and mineral sands) and electrostatic (mineral sands).

Particulars of an average Broken Hill ore mined during 1958, showing metal contents before and after differential flotation, are shown in the following table. It should be noted that in both the ore and the concentrate, lead and zinc are contained as the minerals lead sulphide and zinc sulphide respectively. Most of the silver is contained in minerals which are collected with the lead sulphide.

ORE TREATED AND CONCENTRATES PRODUCED BY DIFFERENTIAL FLOTATION AT BROKEN HILL (a): 1958.

Particulars.	Quantity.	Proportion of weight of ore mined.	Average Assays.			Proportion of Metal Distribution.		
			Lead.	Silver.	Zinc.	Lead.	Silver.	Zinc.
	tons.	%	%	f. oz.	%	%	%	%
Ore treated ..	1,895,566	100	12.7	4.7	11.5	100.0	100.0	100.0
Lead Concentrate	309,345	16.3	74.5	26.2	4.5	95.7	91.0	6.4
Zinc Concentrate	373,880	19.7	1.0	0.9	51.4	1.6	3.7	88.1
Residues(b) ..	1,212,341	64.0	0.5	0.4	1.0	2.7	5.3	5.5

(a) Average particulars for the five operating companies. (b) These are of no economic use at present and are either pumped as filling for underground workings or otherwise discarded.

§ 2. The Mineral Industry.

1. Persons Engaged.—In the following table, which shows particulars collected in the Population Censuses of Australia at 30th June, 1947 and 1954, the numbers of persons whose "industry" was stated to be "mining and quarrying" are shown together with the numbers engaged in all primary industries and the total work force.

PERSONS ENGAGED, AUSTRALIA.

Particulars.	At 30th June—	
	1947.	1954.
Persons Engaged in—		
Mining and Quarrying No.	57,574	62,107
All Primary Industries No.	563,697	560,100
Total Work force No.	3,196,431	3,702,022
Persons Engaged in Mining and Quarrying as a proportion of—		
All Primary Industries %	10.2	11.1
Total Work force %	1.8	1.7

The number of persons engaged in the mining and quarrying industries represents approximately ten per cent. of the total number of persons engaged in all primary industries and less than two per cent. of the total workforce of Australia.

Particulars of the numbers of persons engaged in the various mining and quarrying industries, as collected in the Annual Mining and Quarrying Census, are included in paras. 4 (ii), page 1043, and 4 (iii), page 1044.

2. **Size Classification of Mines and Quarries.**—Most of the mines and quarries worked during 1958 employed less than four persons, including working proprietors. However, more than half of the persons engaged in mining and quarrying were in the 60 mines each employing two hundred persons or more. The following table shows the total number of mines grouped according to sizes in accordance with the average number of persons employed during the period worked by each mine in 1958. The details of persons employed are not directly comparable with the Population Census figures shown in the preceding table. For particulars of the method of compiling these industry statistics, see para. 2 (i), page 1037.

MINING AND QUARRYING: SIZE CLASSIFICATION OF ESTABLISHMENTS, 1958.

Mines and Quarries employing on the average(a)—	N.S.W.	Vic. (b)	Qld.	S.A.	W.A.	Tas.	N.T.	Aust. (b) (c)
Less than 4 persons—								
Establishments ..	513	72	243	290	215	63	35	1,431
Persons ..	759	129	436	478	549	117	84	2,552
From 4 to 20 persons—								
Establishments ..	164	106	92	105	66	28	7	571
Persons ..	1,283	956	916	807	534	250	77	4,844
From 21 to 200 per- sons—								
Establishments ..	93	34	74	15	22	15	4	258
Persons ..	6,667	1,618	(d)	(d)	1,485	800	356	15,040
More than 200 per- sons—								
Establishments ..	38	3	4	2	10	3	..	60
Persons ..	16,564	1,673	(d)	(d)	5,093	1,536	..	29,267
Total—								
Establishments ..	808	215	413	412	313	109	46	2,320
Persons ..	25,273	4,376	8,563	2,565	7,661	2,703	517	51,703

(a) Includes working proprietors, particulars for which are not available, available for publication; included in totals.

(b) Excludes 13 salt producers in Victoria, employment

(c) Includes Australian Capital Territory.

(d) Not

3. **Value of Production.**—(i) *General.* In 1958, the local value of mining and quarrying in Australia (the value of output, or the selling value of mine and quarry products at the mine or quarry) was £155,955,000, or 11.7 per cent. of the production of all primary industries. The most important State was New South Wales with £71,414,000, followed by Queensland with £27,632,000 and Western Australia with £20,777,000.

(ii) *Local and Net Values of Production, 1958.* Local and net values of mining and quarrying production for each State are shown for 1958 in the following table. A more detailed reference to the value of production of mining and quarrying and other industries in Australia as well as a brief explanation of the terms used will be found in Chapter XXX.—Miscellaneous.

MINING AND QUARRYING: LOCAL AND NET VALUES OF PRODUCTION, 1958.
(£'000.)

State or Territory.	Local Value (Value of Output at Mine or Quarry.)	Costs of Power, Fuel and Light, and Materials and Stores Used.	Net Value. (a)
New South Wales	71,414	15,613	55,801
Victoria	13,694	2,707	10,987
Queensland	27,632	7,836	19,796
South Australia	12,308	2,309	9,999
Western Australia	20,777	6,323	14,454
Tasmania	7,358	2,190	5,168
Northern Territory	2,564	567	1,997
Australian Capital Territory ..	208	74	134
Australia	155,955	37,619	118,336

(a) Local value less costs of power, fuel, light and other materials and stores used; depreciation and maintenance costs have not been deducted.

(iii) *Local Values, 1954 to 1958.* In the following table, the local values of mining and quarrying production are shown by States and Territories for the years 1954 to 1958:—

MINING AND QUARRYING: LOCAL VALUE OF PRODUCTION.(a)
(£'000.)

Year.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
1954 ..	78,202	10,080	21,602	8,580	20,736	8,955	1,145	103	149,403
1955 ..	84,244	10,917	26,892	10,512	19,746	10,744	1,691	125	164,871
1956 ..	88,790	11,891	30,204	11,910	20,230	10,555	2,594	146	176,320
1957 ..	83,170	12,728	25,576	11,872	20,979	8,421	2,195	170	165,111
1958 ..	71,414	13,694	27,632	12,308	20,777	7,358	2,564	208	155,955

(a) Value of output or selling value of products at the mine or quarry.

(iv) *Net Values of Production, 1954 to 1958.* In the following table, the net value of production of mining and quarrying products and the value per head of population are shown by States and Territories for the years 1954 to 1958.

MINING AND QUARRYING: NET VALUE OF PRODUCTION.(a)

Year.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
NET VALUE OF PRODUCTION.(a) (£'000.)									
1954	63,965	8,146	15,934	7,101	14,776	7,057	1,028	80	118,087

NET VALUE OF PRODUCTION(a) PER HEAD OF POPULATION.
(£.)

Year.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
1954	18.5	3.3	12.0	8.8	22.8	22.6	62.2	2.6	13.0
1955	19.7	3.5	16.1	10.1	21.1	27.0	78.8	1.9	14.2
1956	20.1	3.6	17.5	11.0	21.0	25.4	113.6	2.9	14.7
1957	18.1	3.7	13.4	10.5	21.3	17.7	91.5	2.8	13.0
1958	15.0	3.9	13.9	11.0	20.3	15.1	101.5	3.2	11.9

(a) Local value, or value of output, less cost of power, fuel and light, and other materials and stores used; depreciation and maintenance costs have not been deducted.

4. Statistics of the Principal Mining and Quarrying Industries.—(i) *Summary, 1958.* In the next table, statistics of numbers of mines and quarries, persons employed, local and net value of production and other particulars are shown for the major industry groups for the year 1958. For particulars of the method of compiling these industry statistics, see para. 2 (i), page 1037.

MINING AND QUARRYING: SUMMARY OF INDUSTRY PARTICULARS,
AUSTRALIA, 1958.

Industry Group.	Mines and Quarries.	Persons Employed. (a)	Salaries and Wages Paid. (b)(c)	Local Value of Production. (d)	Total Fuel, Materials, etc., Used.	Net Value of Production. (e)	Value of Additions and Replacements to Fixed Assets.(b)
	No.	No.	£'000.	£'000.	£'000.	£'000.	£'000.
Metal Mining ..	708	20,495	25,488	70,190	20,770	49,420	7,159
Fuel Mining ..	234	22,335	26,195	57,076	11,148	45,928	10,221

Northern Territory ..	46	507	634	2,564	567	1,997	258
Aust. Cap. Territory ..	4	38	52	208	67	134	7
Australia ..	2,333	50,139	57,308	155,955	37,619	118,336	19,488

(a) Average number employed (including working proprietors) during whole year. (b) Excludes mines and quarries employing less than four persons. (c) Excludes drawings by working proprietors; the amounts are net after deducting value of explosives sold to employees. (d) Value of output or selling value of products at mine or quarry. (e) Local value less costs of power, fuel and light and other materials and stores used; depreciation and maintenance costs have not been deducted.

(ii) *Employment in Mining and Quarrying, 1958.* The following table shows the average numbers engaged in the various mining industries in each State in 1958.

MINING AND QUARRYING: EMPLOYMENT, (a) 1958.

Industry.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Metal Mining—									
Gold Mining ..	74	268	153	2	5,189	..	215	..	5,901

Construction Material Quarrying(f) ..	1,284	1,692	493	696	222	123	33	38	4,581
Total, All Mining and Quarrying ..	24,984	4,302	8,276	1,987	7,451	2,594	507	38	50,139

(a) Average employment during whole year, including working proprietors. (b) Not available for publication. (c) Includes persons engaged by one mine which has both underground and open-cut workings. (d) Incomplete for some industries outside the normal administrative control of State Mines Departments (e.g. clays and salt). (e) Not available for publication; included with "Construction Material Quarrying". (f) Incomplete owing to difficulties of coverage.

(iii) *Employment in Mining and Quarrying, 1954 to 1958.* The following table shows particulars of mining employment in Australia for the years 1954 to 1958. The figures show the average number of persons employed during the whole year.

MINING AND QUARRYING: EMPLOYMENT,(a) AUSTRALIA.

Industry.	1954.	1955.	1956.	1957.	1958.
<i>Metal Mining—</i>					
Gold Mining	7,192	6,753	6,488	6,205	5,901
Silver-Lead-Zinc Mining	9,397	10,076	10,627	10,354	9,461
Copper-Gold Mining	1,998	2,127	2,301	2,151	2,057
Tin Mining	969	937	938	856	944
Mineral Sands Mining	598	891	1,592	2,062	1,102
Other Metal Mining	1,253	1,273	1,407	1,300	1,030
<i>Total, Metal Mining</i>	<i>21,407</i>	<i>22,057</i>	<i>23,353</i>	<i>22,928</i>	<i>20,495</i>
<i>Fuel Mining—</i>					
Black Coal Mining	26,614	25,660	23,895	22,345	20,795
Brown Coal Mining	1,598	1,502	1,566	1,579	1,540
<i>Total, Fuel Mining</i>	<i>28,212</i>	<i>27,162</i>	<i>25,461</i>	<i>23,924</i>	<i>22,335</i>
<i>Non-metal (excluding Fuel) Mining(b)</i> ..	<i>2,722</i>	<i>2,678</i>	<i>2,708</i>	<i>2,749</i>	<i>2,728</i>
<i>Total, All Mining</i>	<i>52,341</i>	<i>51,897</i>	<i>51,522</i>	<i>49,601</i>	<i>45,558</i>
<i>Construction Material Quarrying(b)</i> ..	<i>4,121</i>	<i>4,197</i>	<i>4,329</i>	<i>4,640</i>	<i>4,581</i>
Total, All Mining and Quarrying ..	56,462	56,094	55,851	54,241	50,139

(a) Average employment during whole year, including working proprietors.

(b) Incomplete.

(iv) *Salaries and Wages Paid in Mining, 1954 to 1958.* Salaries and wages paid in the mining and quarrying industries in Australia during each year 1954 to 1958 are shown in the following table. Information regarding rates of wages paid in the mining industry is shown in Chapter XII.—Labour, Wages and Prices (p. 419) and also in the *Labour Report*.

MINING AND QUARRYING: SALARIES AND WAGES PAID,(a) AUSTRALIA.
(£'000.)

Industry.	1954.	1955.	1956.	1957.	1958.
<i>Metal Mining—</i>					
Gold Mining	6,450	6,344	6,551	6,422	6,492
Silver-Lead-Zinc Mining	12,761	15,154	17,299	16,241	13,462
Copper-Gold Mining	1,786	1,867	2,114	2,289	2,362

<i>Fuel Mining—</i>					
Black Coal Mining	25,988	26,065	25,862	25,105	24,501
Brown Coal Mining	1,557	1,761	1,649	1,640	1,694
<i>Total, Fuel Mining</i>	<i>27,545</i>	<i>27,826</i>	<i>27,511</i>	<i>26,745</i>	<i>26,195</i>
<i>Non-metal (excluding Fuel) Mining(b)</i> ..	<i>1,620</i>	<i>2,105</i>	<i>2,300</i>	<i>2,400</i>	<i>2,384</i>
<i>Total, All Mining</i>	<i>52,473</i>	<i>56,177</i>	<i>60,216</i>	<i>58,429</i>	<i>54,067</i>
<i>Construction Material Quarrying(b)</i> ..	<i>2,045</i>	<i>2,439</i>	<i>2,738</i>	<i>3,219</i>	<i>3,241</i>
Total, All Mining and Quarrying ..	54,518	58,616	62,394	61,648	57,308

(a) Excludes mines and quarries employing less than four persons.

(b) Incomplete.

(v) *Accidents in Mining.* Particulars of numbers of persons killed and injured in accidents in mines and associated treatment plants are recorded by State Mines Departments. Numbers injured are not reported on a uniform basis in all States as varying criteria are used in determining what constitutes injury for the purpose of these records. In 1958, 44 persons were recorded as having been killed and 1,553 as having been injured in mining (excluding quarrying) accidents. Of the total of 44 persons killed, 13 were in black coal mines, 12 in gold mines and 8 in silver-lead-zinc mines. Reported injuries were highest in black coal mines (442), gold mines (392), and silver-lead-zinc mines (411).

(vi) *Local and Net Values of Mining and Quarrying Production, 1958.* The following two tables show particulars of the local and net value of production of individual mining and quarrying industries and for all mining and quarrying for the year 1958. It should be noted that these statistics are on an industry basis and not by product. For particulars of the method of compiling these industry statistics see para. 2 (i), page 1037.

(a) Excludes Australian Capital Territory where production is confined to brick clay mining and construction material quarrying. (b) Bullion, alluvial, retorted gold, etc. (c) Gross weight not available. (d) Ore for metal extraction and fluxing only. (e) Incomplete; figures relate only to production reported by Mines Departments. (f) Incomplete owing to difficulties of coverage.

NOTE.—Particulars of uranium concentrate produced are not available for publication and have been excluded from the above table.

3. Contents of Metallic Minerals Produced in 1958.—The following table shows the contents of metallic minerals produced in 1958 which were "pay metals" or which were recovered as "refiners' prizes". Further particulars for earlier years are shown in the following paragraph and in the sections later in this chapter covering principal contents.

CONTENTS OF METALLIC MINERALS PRODUCED, 1958.

Total, All Minerals and Construction Materials (c)	149,403	164,871	176,320	165,111	155,955

(a) Prior to 1958, the value of lead-copper concentrate was included with "Copper Ore, Concentrate, etc." (b) Excludes Australian Capital Territory, details of which are included with construction materials. (c) Incomplete owing to difficulties of coverage.

NOTE.—Particulars of the value of uranium concentrate produced are not available for publication and have been excluded from the above table.

6. Local and Net Value of Mining and Quarrying Production by Industry, 1958.—Particulars of the local value (or value of output) and net value (or value of production) of production of the principal Mining and Quarrying industries for the year 1958 are shown in para. 4 (vi.), page 1045. Owing to the necessity of classifying individual mines according to the principal mineral produced, the values in the tables on pp. 1045-6 and for mining industry groups differ slightly in some cases from totals of the corresponding groups of mine products shown in the table in para. 5 above.

§ 4. Gold.

1. Historical.—The earliest definite record of the discovery of gold in Australia was made on 15th February, 1823, by James McBrien, a surveyor, whilst surveying the Fish River between Rydal and Bathurst, New South Wales, and there are records of gold having been identified in several places during the next 27 years. It is believed that the first authentic

discovery of gold from which actual mining operations resulted was made in January, 1846, about 10 miles east of Adelaide, South Australia. However, credit for the first discovery of payable gold is generally given to E. H. Hargraves, who notified the Government of New South Wales on 3rd April, 1851, of his find, located at the junction of the Summerhill and Lewis Pond Creeks in the Bathurst (N.S.W.) district. This caused a gold rush, and prospecting started in many localities.

The Colony of Victoria was separated from New South Wales on 1st July, 1851, and within a few days of its inception, the new government was notified of the discovery of gold in several places. It would appear that the Hon. W. Campbell discovered gold near Clunes (Victoria) in March, 1850, but temporarily concealed the fact, and his discovery was not disclosed until 8th July, 1851. The discovery of gold at Ballarat and Bendigo followed soon afterwards.

The early discoveries were of alluvial gold, and only crude equipment was required to work them. As a consequence, cities and towns were depleted of their population as large numbers rushed to the diggings. The Australian population growth from 438,000 at the end of 1851 to 1,168,000 at the end of 1861 can be said to be largely due to the discoveries of gold.

Discoveries continued to be made, including such important fields as Canoona (Queensland) in 1858, Forbes (New South Wales) in 1862, Gympie (Queensland) in 1868, and Charters Towers and Mount Morgan (both in Queensland) in 1882. With the discovery at Mt. Lyell (Tasmania) in 1886, the major discoveries in the Eastern States ceased.

Western Australia did not enter the field for a considerable time after gold mining had become well established in most of the other States. Although some specimens had been found between 1850 and 1870, it was not until 1886 that the Kimberley field was discovered, followed by Yilgarn in 1887. In 1892, Bayley and Ford discovered Coolgardie, and in May of the following year Hannan and Flannigan found Kalgoorlie. In the years since, there have been no further discoveries of major goldfields although many profitable deposits in other localities have been found and worked.

The amount of gold won in Australia in any one year attained its maximum in 1903, the year in which Western Australian production reached its highest level. For the other States, the years in which the greatest yields were obtained were as follows:—New South Wales, 1852; Victoria, 1856; Queensland, 1900; South Australia, 1904; and Tasmania, 1899. In recent years, output from the Northern Territory has expanded considerably and the highest annual production was recorded as recently as 1956.

Owing to the exhaustion of the more easily worked deposits and increased costs due to deep mining, the production of gold in Australia declined from 3,837,979 fine oz. in 1903 to 427,160 fine oz. in 1929, the lowest output since its discovery. Increased activity in prospecting due to prevailing economic conditions resulted in some improvement in 1930, but the marked development between that year and 1939 was caused by the heavy depreciation of Australian currency in terms of gold. Following the outbreak of the 1939–45 War, there was a sharp fall in gold production to 656,867 fine oz. in 1944 and 657,213 fine oz. in 1945, but with the release of man-power after the war, there has been a slight upward trend in mine production of gold, which in 1953 exceeded 1,000,000 fine oz. for the first time since 1942. The devaluation of Australian currency in September, 1949, gave an impetus to gold production, but this was offset in the following years by increasing costs which brought about the closing of several large producers in New South Wales, Victoria and Western Australia.

2. Present Methods of Mining and Treatment.—Gold ores can be divided into two types, namely, free-milling and refractory. Free-milling ores are those that, when finely ground, will yield their gold content to amalgamation and/or cyanidation and these are found in most of the gold deposits of Australia.

Some refractory ores, which are not amenable to amalgamation, allow their gold to be dissolved by cyanidation, from which solution the gold is then precipitated. However, on the Coolgardie field, where gold bearing sulphide and telluride minerals occur, it is necessary first to recover these from gangue by flotation. This concentrate is then roasted and the resulting calcine, an impure oxide containing free gold, is cyanided to yield gold. This is usually smelted as bullion, in which form it leaves the vicinity of the mine.

3. **Mine Production.**—The table hereunder shows the mine production of gold (gold content of minerals produced) during 1958 according to the mineral in which it was contained and the State or Territory of origin. It should be noted that the minerals shown below contain, in addition to gold, certain other metals.

GOLD : MINE PRODUCTION, 1958.

(Fine oz.)

Mineral in which contained.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	Aust.
Copper Ore, Concentrate, etc. ..	3,197	..	57,675	..	834	6,015	10,132	77,853
Gold Ore, Concentrate, etc. ..	4,997	41,476	16,893	48	873,985	151	62,484	1,000,034
Lead-Silver Ore ..	15	15
Lead Concentrate ..	8,571	3,019	..	11,590
Lead-Copper Concentrate	10,001	..	10,001
Zinc Concentrate ..	1,929	2,558	..	4,487
Total Gold ..	18,709	41,476	74,568	48	874,819	21,744	72,616	1,103,980

(a) Includes a small quantity of gold recovered from pyrite concentrate which was dispatched from Kalgoorlie for sulphuric acid manufacture.

The principal sources of production during 1958 were as follows:—

(i) *New South Wales.* There are now no mines employing four or more hands engaged solely in gold mining in New South Wales. Most of the gold produced during 1958 was contained in lead and zinc concentrates produced at Broken Hill and lead, zinc and copper concentrates milled at Captain's Flat.

(ii) *Victoria.* At Chewton, near Castlemaine, the Wattle Gully mine produced more than half of the State's production. Most of the remaining production was won from small gold mines in the north-east portion of the State.

(iii) *Queensland.* The copper concentrate produced at Mt. Morgan contained more than two-thirds of the State's output of gold. Nearly all of the remaining production was from the Golden Plateau N.L. mine at Cracow.

(iv) *South Australia.* The only gold produced was won by prospectors.

(v) *Western Australia.* More than half of the total production came from the Coolgardie goldfields, while most of the remaining production came from the Dundas, Murchison and Yilgarn goldfields. The Lake View and Star mine at Fimiston maintained its position as the largest gold producer in Australia, mining 170,888 fine oz. during 1958, and three other mines each produced over 100,000 fine oz. in the same period.

(vi) *Tasmania.* Copper concentrate produced at Mt. Lyell contained most of the gold produced in Tasmania during 1958, while most of the remaining production was included in lead and zinc concentrates milled at Rosebery. A small quantity of gold was recovered from alluvial tin-mining operations.

(vii) *Northern Territory.* Gold production in the Northern Territory is centred around Tennant Creek. At this centre, the main producer was the Nobles Nob mine, and the next largest producer was the Peko mine where gold was produced in copper concentrate.

The following table shows the recorded mine production of gold (i.e., gold content of minerals produced) in the several States and in Australia as a whole during each of the ten decennial periods from 1851 to 1950, and in single years from 1951 to 1958. Owing to defective information in the earlier years, it is likely that the recorded production falls considerably short of the actual totals.

(b) Less than 500 fine oz.

4. **Refinery Production.**—Amalgam and gold slimes from cyanide extraction are treated at the mines to produce gold bullion, which at some mines may be partly refined before dispatch to the Royal Mints, located in Melbourne and Perth. By-product gold from lead smelting is refined at Port Pirie in South Australia while the gold contained in copper refinery sludges, resulting from electrolytic copper refining at Mount Lyell and Port Kembla, is recovered at Port Kembla. Gold bullion and other gold-bearing materials are also refined in Sydney.

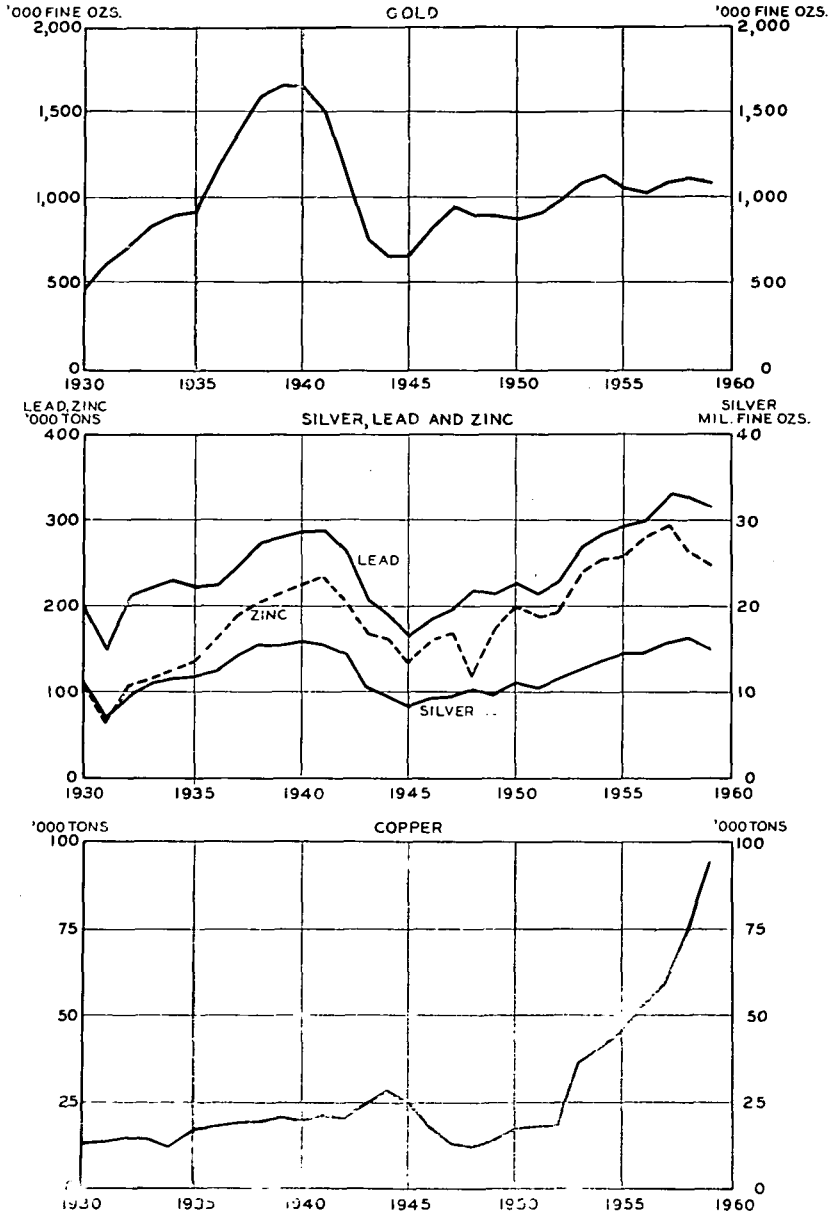

Details of the refinery production of gold in Australia and the value of refined newly-won gold of Australian origin are shown in the following table for each of the years 1954 to 1958. The value of the refined newly-won gold is based on the price fixed by the Commonwealth Bank, but allowance is made for premiums on sales of gold overseas and for industrial purposes in Australia.

(a) Excludes U.S.S.R. The United States Bureau of Mines has estimated U.S.S.R. production at 9–10 million ounces per annum in recent years.

7. **Prices of Gold.**—Under existing legislation, all gold produced in Australia is sold to the Commonwealth Bank. The official price of gold is fixed by the Commonwealth Bank, and on 1st May, 1954, it was raised from £15 9s. 10d. to £15 12s. 6d. per fine oz. The current price reflects the "parity" value of Australian currency established by the International Monetary Agreement Act 1947. Previously, the price of gold was based on the price for which gold could be sold abroad in official markets, less costs of movement.

Average prices of gold per fine oz. in Australia and in London, for the years 1954 to 1958, are shown in the following table. The London gold market was re-opened on 22nd March, 1954, and the prices quoted on this market have been used from that date. Previously the Bank of England official price was used.

PRICES OF GOLD: AUSTRALIA AND LONDON.

(per fine oz.)

At Mints in Australia £A. s. d.	15 11 7	15 12 6	15 12 6	15 12 6	15 12 6
London £stg. s. d.	12 9 4	12 10 11	12 10 2	12 10 3	12 9 9

8. **Sales of Gold on Oversea Premium markets.**—In November, 1951, the Commonwealth Government decided to allow Australian gold producers to benefit from the high prices being paid for gold on some overseas markets. To implement this decision, the Gold Producers' Association was incorporated in Victoria, but with its headquarters in Kalgoorlie, Western Australia, in December, 1951, and the first sales were made in that month. Under existing legislation, all gold produced in Australia must be sold to the Commonwealth Bank but the newly-formed Association was permitted to purchase from the Bank each month for resale on premium markets a maximum quantity of gold equal to the amount of new gold delivered to the Bank by members in the previous month, less the quantity required for industrial purposes in Australia. The net proceeds from premium sales are distributed to members in proportion to their production of gold. The actual volume of sales has been dependent largely on prices offering and, up to the end of 1953, premium sales of gold brought an additional return to the industry amounting to over £1,800,000. Towards the end of 1953, however, the price of gold on overseas premium markets fell sharply and subsequent sales have been made at prices very little above the official price.

The following table shows the quantity and value of gold sold on overseas premium markets and the average price realized for these sales during the years 1954 to 1958.

GOLD SOLD ON OVERSEA PREMIUM MARKETS.

9. **Assistance to the Gold-Mining Industry.**—After the collapse of high premium prices late in 1953, conditions in the gold-mining industry again became acute and many producers were faced with the prospect of closing down. To meet this situation, the Gold-Mining Industry Assistance Act was assented to on 18th November, 1954. The purpose of this Act was to assist the gold-mining industry by the payment of subsidy subject to certain conditions on the production and sales of gold. The subsidies paid under the original Act were increased under amendments enacted on 22nd October, 1957, and 22nd May, 1959. Under the Act as it now stands, the subsidy payable to small producers whose annual output does not exceed 500 fine oz. is £2 8s. 0d. per fine oz., irrespective of cost of production. For large producers, subsidy is paid at the rate of three quarters of the excess of the average cost of production over £13 10s. 0d. per fine oz. with a maximum amount of subsidy of £3 5s. 0d. per

fine oz. Where a producer receives an amount in excess of the official price of £15 12s. 6d. per fine oz. as a result of sales on oversea premium markets or otherwise, the subsidy payable shall be reduced by the amount of the excess. The subsidy is also limited to the extent that the annual net profit of a producer will not, with the addition of the subsidy, exceed 10 per cent. of the capital investment in the company. The maximum expenditure on development allowable in determining costs is £5 5s. 0d. per fine oz. A further condition of the Act is that the recovery rate of the mine shall be maintained at the level of the year previous to the Act. Payments under the Act are to continue until 30th June, 1962.

Payments under the Act commenced in March, 1955, and the amounts paid to gold producers in the various States and Territories of Australia in each of the years 1955 to 1959 are shown in the following table.

NET SUBSIDY PAYMENTS TO GOLD PRODUCERS.
(£.)

10. **Employment in Gold Mining.**—Particulars of the numbers of persons employed in gold mining are shown in paras. 4 (ii), page 1043 and 4 (iii), page 1044.

§ 5. Lead, Silver and Zinc.

1. **Historical.**—Prior to the discovery of the great Broken Hill lead-silver-zinc lode in 1883 by Charles Rasp, a boundary rider, the mining of lead-silver-zinc ores at other localities in New South Wales had been intermittent and only small quantities were produced. The Broken Hill lode has proved to be one of the biggest in the world and to date over 80 million tons of ore have been raised. The Broken Hill Proprietary Co. Ltd., now engaged in steel manufacture, was the company first formed to operate at Broken Hill and continued operations there until 1939 when the ore in its leases became exhausted. The first ores mined at Broken Hill were oxidized and required only simple smelting to produce a lead-silver bullion. No initial attempt was made to recover zinc and it was not until 1897 that the first commercial zinc concentrate was produced. The exhaustion of the oxidized ore early this century led to the mining of the deeper sulphide ores. The need to produce separate lead and zinc concentrates for smelting purposes, with economic metal recoveries, resulted in the perfection at Broken Hill of the differential ore flotation process. The preparation of sulphide concentrates by flotation methods is now used throughout the world. Mining operations at Broken Hill are now mainly carried on to the north and south of the original leases. In 1939, Lake George Mines Ltd. at Captain's Flat, near Queanbeyan, commenced large-scale mining of a lead-zinc-copper ore body which had been first worked in 1882.

Lead-silver-zinc ores have been mined in Queensland since 1870 but it was not until 1923 that the largest ore-body, at Mt. Isa, was discovered by John Miles. Mt. Isa Mines Ltd. commenced mining operations at this centre in 1931. Mt. Isa is now the second largest centre in Australia producing lead-silver-zinc ores and the largest producer of copper. During the 1939-45 War, mining of lead-silver-zinc ores at Mt. Isa was suspended in favour of copper production.

Lead-silver ores were first discovered in Western Australia in the Northampton District in 1848 and most of the subsequent production in that State has been from that District.

The first recorded production of lead in Tasmania was in 1888, and of zinc, in 1919. Production has been restricted to the West Coast.

2. **Present Methods of Mining and Treatment.**—Nearly all ores now mined are composed of deep-lying sulphide minerals and it is therefore necessary to mine these ores by underground methods. At all large mines, it is the practice to produce separate lead and zinc concentrates,

with the lead concentrate containing most of the silver. These concentrates are prepared by differential flotation except in cases where a satisfactory concentrate can be obtained by gravity methods. In flotation plants, the ore is finely ground and by differential flotation a lead concentrate is first produced, with the zinc concentrate subsequently separated from the tailings. At Captain's Flat, differential flotation methods are used to produce successive concentrates of copper, lead, zinc and pyrite.

Particulars of representative Broken Hill lead and zinc concentrates are shown in para. 4, page 1039.

3. **Mine Production.**—The following table shows for 1958 the mine production (metal content of ores and concentrates produced) of silver, lead and zinc in Australia, and the respective minerals in which these metals were contained.

LEAD, SILVER AND ZINC: CONTENT OF ORES AND CONCENTRATES PRODUCED, 1958.

The principal sources of production of lead, silver and zinc during 1958 were as follows:—

(i) *New South Wales.* Lead and zinc concentrates, produced only at Broken Hill and Captain's Flat, contained nearly all of the New South Wales production of lead and silver and all of the zinc. The five present Broken Hill mines listed in decreasing order of tonnage mined, are:—Zinc Corporation Ltd., New Broken Hill Consolidated Ltd., North Broken Hill Ltd., Broken Hill South Ltd., and Barrier Central Pty. Ltd. The mines operating at Broken Hill, during 1958, produced (in terms of the contents of all ores and concentrates produced) over 70 per cent. of Australia's lead and zinc and more than one half of the silver. Small quantities of lead-silver ore were produced, mainly in the Broken Hill district. In addition, the copper concentrate produced at Captain's Flat contained silver as did small quantities of copper ore produced in other parts of the State and gold bullion produced from gold mining operations.

(ii) *Victoria.* All of the silver produced was obtained from gold mining operations. No zinc bearing minerals are mined in Victoria and lead was last mined in 1957.

(iii) *Queensland.* Mt. Isa Mines Ltd. was the only producer of lead and zinc concentrates in Queensland and these contained most of the State's production of lead and silver and all of the zinc. Small quantities of silver-lead ore were mined mainly at Mt. Isa and

in the surrounding district. Copper concentrates containing silver were produced at Mount Morgan while some silver is also contained in gold bullion derived from gold ores, mainly at Cracow.

(iv) *South Australia.* Very small quantities of lead, silver and zinc ore were mined in South Australia during 1958.

(v) *Western Australia.* Most of the silver produced in Western Australia was obtained from gold bullion produced by the gold-mining industry. Lead-silver ores, mined chiefly in the Northampton mineral field, near Geraldton, contained lead and silver. The zinc production recorded for 1958 refers to dispatches from the Pilbara goldfield.

(vi) *Tasmania.* All of the lead, silver and zinc was produced from mines at Rosebery and Mt. Read on the West Coast. Ores from both mines were concentrated at the Rosebery mine and separate lead, zinc, and lead-copper concentrates were produced. Silver was also contained in copper concentrates milled at Mt. Lyell. A lead concentrate was milled from ore mined at Zeehan during 1958.

(vii) *Northern Territory.* No ores containing lead or zinc were mined during 1958. However, silver was produced in copper concentrates from the Peko mine at Tennant Creek and Rum Jungle and in small quantities of copper ore mined at various localities. Gold bullion produced, mainly at Tennant Creek, also contained silver.

The table hereunder shows the quantities of silver, lead and zinc contained in minerals won in the several States and the Northern Territory during the years 1954 to 1958:—

4. **Smelter and Refinery Production.**—(i) *Lead Concentrate.* Lead concentrate produced at Broken Hill is railed to Port Pirie, in South Australia, for smelting and refining. Lead-silver bullion is produced from initial smelting, and lead, silver and gold are then refined. Cadmium is obtained from smelter fumes and refined to produce rods of metal. The sulphur dioxide gas formed during pre-smelter sintering operations is used to manufacture sulphuric acid. The antimony contained in the concentrate is alloyed with lead to form marketable antimonial lead while the copper is processed to the matte and speiss stage and sent to copper refineries for copper extraction. Lead concentrates produced at Broken Hill are now in excess of Port Pirie smelter and refinery capacity and part of the Broken Hill production is exported.

Lead ore and concentrate produced at Mount Isa is smelted at the mine to derive a lead bullion which is rich in silver. All of this bullion is exported to the United Kingdom for refining. A lead-copper dross is produced as a by-product of lead smelting and this is also exported.

Lead and lead-copper concentrate produced in Tasmania, and lead concentrate produced at Captain's Flat in New South Wales and in Western Australia, are exported.

(ii) *Zinc concentrate.* About half of the zinc concentrate produced at Broken Hill is exported overseas, and the remainder is shipped from Port Pirie to Risdon, near Hobart, for refining. At Risdon, the Broken Hill concentrate, together with all zinc concentrate produced in Tasmania, is roasted to form zinc oxide, or calcine. Sulphur dioxide formed during this roasting process is used for the manufacture of sulphuric acid. The calcine is leached with a weak solution of sulphuric acid to form a zinc sulphate solution which, after purification, is electrolysed. Zinc of high purity is deposited on the cathodes and this zinc is melted and cast into ingots. Cadmium metal and cobalt oxide are also recovered. Lead-silver residues are recovered and forwarded to Port Pirie for smelting with lead concentrates. Copper residues are sent to Port Kembla for treatment.

Zinc concentrates produced at Mount Isa and Captain's Flat, and small quantities of lead-silver-zinc ore produced at various localities in Western Australia, are exported.

In the following table, details are given of the production and sales of refined primary silver, lead and zinc as recorded from data received from the Bureau of Mineral Resources and the Australian Mines and Metals Association. The figures shown for refined silver production include small quantities recovered from imported materials.

5. **Production in Principal Countries and World Total.**—The following table shows, for the years 1956 to 1958, particulars of silver, lead and zinc production (mine basis) in principal producing countries, together with the estimated world total, according to data published by the Mineral Resources Division of the United Kingdom Overseas Geological Surveys.

SILVER, LEAD AND ZINC: MINE PRODUCTION IN PRINCIPAL COUNTRIES.

Country.	1956.	1957.	1958.
LEAD (tons).			
U.S.S.R.	(a) 305,000	(a) 320,000	(a) 335,000
Australia	299,485	333,753	328,347
United States of America	315,023	301,979	238,729
Mexico	196,457	211,482	197,859
Canada	168,620	162,039	165,866
Peru	127,036	134,986	132,043
<i>Estimated World Total</i> ..	2,300,000	2,400,000	2,300,000

SILVER (fine oz.).			
Mexico	43,078,040	47,149,514	47,592,360
United States of America	38,948,121	38,164,915	34,111,027
Canada	28,431,847	28,823,298	31,311,378
Peru	22,972,766	24,845,258	25,918,353
U.S.S.R.	(b) 25,000,000	(b) 25,000,000	(b) 25,000,000
Australia	14,609,922	15,788,631	16,304,570
Japan	6,166,963	6,543,673	6,513,900
Bolivia	7,543,304	5,375,090	6,051,284
Germany, Eastern	(a) 4,500,000	(a) 4,500,000	(a) 4,500,000
Belgian Congo	3,794,000	3,044,900	3,794,000
<i>Estimated World Total</i> ..	226,000,000	230,000,000	235,000,000

ZINC (tons).			
Canada	377,350	369,411	382,712
United States of America	484,232	474,763	367,862
U.S.S.R.	(a) 270,000	(a) 300,000	(a) 325,000
Australia	278,082	291,582	263,044
Mexico	244,956	237,221	220,566
Poland	150,900	156,261	160,047
Japan	121,058	133,858	139,505
Peru	172,354	152,017	133,120
<i>Estimated World Total</i> ..	2,990,000	3,050,000	2,990,000

(a) Estimated smelter production.

(b) Estimated.

6. **Prices of Silver, Lead and Zinc.**—The following table shows average prices in Australia and on the London Metal Exchange during the years 1954 to 1958. Lead and zinc prices were controlled in Australia and the United Kingdom after the outbreak of war in 1939, but were decontrolled in Australia on 21st April, 1953. Free trading in lead in the United Kingdom, after thirteen years of Government control, was resumed on 1st October, 1952, while the fixing by regulation of the price of zinc was abandoned from 1st January,

1953. In Australia, minimum prices for sales of zinc and lead were fixed on 1st January, 1958, and 22nd December, 1958, respectively. Silver prices have not been controlled in Australia or the United Kingdom.

PRICES OF SILVER, LEAD AND ZINC.

Particulars.	1954.	1955.	1956.	1957.	1958.
<i>Australian Prices, in Australian currency—</i>					
	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>
Silver, per fine oz. (a) ..	7 8	8 1	8 3	8 3	8 0
	£	£	£	£	£
Lead, per ton	114	127	140	117	(b) 87
Zinc, per ton	101	114	122	104	(c) 91
<i>London Metal Exchange Prices, in sterling—</i>					
	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>
Silver, per fine oz. ..	6 2	6 4	6 7	6 7	6 5
	£	£	£	£	£
Lead, per ton	96	106	116	97	73
Zinc, per ton	78	91	98	82	65

(a) Silver prices shown represent export parity calculated from London Metal Exchange prices.
 (b) Average market price was used for the periods shown prior to 23rd December, 1958, on which day the minimum price was fixed at £100 per ton.
 (c) Prior to 1st January, 1958, the prices shown were average market prices. On 1st January, 1958, a minimum price was fixed at £90 and this minimum was later raised to £100 on 22nd December, 1958.

7. **Employment in Silver, Lead and Zinc Mining.**—Particulars of the number of persons employed in mining for these metals are shown in paras. 4 (ii), page 1043 and 4 (iii), page 1044.

§ 6. Copper.

1. **Historical.**—Copper was first discovered in Australia in 1842, at Kapunda in South Australia and in the Northampton district of Western Australia. The subsequent large scale mining of the South Australian deposits contributed significantly to that State's development, but now only very small quantities are mined in South Australia.

The mining of copper commenced in New South Wales in 1847, near Rockley. Copper was first recognized in the Cobar district in 1869, and large scale mining continued at Cobar until 1952. Other fields were opened at Mt. Hope in 1878, Nymagee in 1880 and Captain's Flat in 1882 but of these, only Captain's Flat is still producing.

The first important discovery of copper in Queensland was made in 1862, when a rich lode was found near Clermont. Copper was discovered in the Herberton mineral field in 1879 and at Mt. Morgan in 1882. The copper ore body at Mt. Isa was not recognized as an outcrop when the lead-zinc ore body was discovered in 1923, and was discovered as a result of underground development.

Copper mining was first undertaken at Mt. Isa during the 1939-45 War, but it was not until the erection of a copper smelter at that centre that large scale production commenced. The Mt. Isa mine is today Australia's largest producer of copper.

In Tasmania, the Mt. Lyell deposit was discovered in 1886.

2. **Methods of Mining and Treatment.**—Most of the large copper ore bodies contain the mineral chalcopyrite, an iron-copper sulphide. Copper ore is mined by open-cut methods at Mt. Morgan and Mt. Lyell and by underground methods at Mt. Isa, Captain's Flat and Ravenshorpe (Western Australia). Oxidized copper ore is mined at Mt. Isa and at numerous other localities, mainly in Western Australia.

It is the practice for the sulphide ore to be finely ground and for the chalcopyrite to be recovered by flotation. At Mt. Lyell and Mt. Morgan, the tailings from the copper flotation are subjected to a further flotation and a pyrite concentrate is produced. The oxidized ore mined at Mt. Isa is not concentrated and is fed direct to the smelters.

3. **Mine Production.**—The following table shows for 1958 the copper content of all minerals produced in the several States and the Northern Territory:—

COPPER: CONTENT OF ORES AND CONCENTRATES PRODUCED: 1958
(Tons.)

Mineral in which Contained.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	Aust.
Copper Ore, Concentrate, etc.	1,054	..	49,748	1	1,107	10,544	8,660	71,114
Gold Ore, Concentrate, etc.	(a)	(a)
Lead Concentrate	2,507	..	763	3,270
Lead-Copper Concentrate	666	..	666
Zinc Concentrate	462	203	..	665
Total	4,023	..	50,511	1	1,107	11,413	8,660	75,715

(a) Less than half a ton.

The following were the principal sources of copper during 1958:—

- (i) *New South Wales.* Most of the copper produced in this State was contained in lead concentrate milled at Broken Hill. At Captain's Flat, copper was contained in both copper and lead concentrates. Small quantities of copper were precipitated from water pumped from old mine workings, mainly at Cobar.
- (ii) *Victoria.* No copper is produced in Victoria.
- (iii) *Queensland.* Mt. Isa Mines Ltd. was the most important producer in Queensland, with its output of copper concentrate contained in copper sulphide concentrate, oxidized copper ore and lead concentrate. Copper concentrate containing appreciable gold and silver, was also produced at Mt. Morgan.
- (iv) *South Australia.* Only a negligible quantity of copper was produced from areas which in the past were important for copper.
- (v) *Western Australia.* A copper concentrate was produced by Ravensthorpe Copper Mines N.L. However, oxidized ore, which is used for fertilizer manufacture, was mined at various other localities.
- (vi) *Tasmania.* Copper concentrate was produced at Mt. Lyell. Lead-copper concentrate and zinc concentrate milled at Rosebery made up the remainder of Tasmania's production. At Mt. Lyell, small amounts of copper were precipitated from water pumped from old mine workings in the vicinity.
- (vii) *Northern Territory.* Copper concentrates were produced at Tennant Creek by Peko Mines Ltd. At Rum Jungle, Territory Enterprises Pty. Ltd. produced a copper concentrate and a copper precipitate in association with uranium mining. Small quantities of ore were mined at other localities.

The table hereunder shows the quantities of copper contained in minerals produced in the several States and the Northern Territory during the years 1954 to 1958:—

COPPER: CONTENT OF ORES AND CONCENTRATES PRODUCED.
(Tons.)

State or Territory.	1954.	1955.	1956.	1957.	1958.
New South Wales	3,182	3,492	4,289	4,382	4,023
Queensland	27,857	31,858	35,708	35,786	50,511
South Australia	(a)	..	1	2	1
Western Australia	380	699	740	788	1,107
Tasmania	9,880	8,394	8,807	10,984	11,413
Northern Territory	592	2,869	5,002	7,313	8,660
Australia	41,891	47,312	54,547	59,255	75,715

(a) Less than half a ton.

4. **Smelter and Refinery Production of Copper.**—Most of the copper concentrate milled in Australia is smelted locally, blister copper being produced at Mt. Isa, Mt. Morgan, Mt. Lyell and Port Kembla. Port Kembla smelts all of the concentrate from Captain's Flat and some from Tennant Creek.

Blister copper smelted at Mt. Isa is railed to Townsville for electrolytic refining at the refinery which commenced production there in 1959. Mt. Lyell blister copper is electrolytically refined at Mt. Lyell and the bulk is remelted and cast into primary shapes at Port Kembla. Mt. Morgan blister copper is shipped to Port Kembla, where together with blister produced at Port Kembla, it is refined. Most Port Kembla copper is electrolytically refined, although fire refining, which is a cheaper process and undertaken when there are no other metals to be recovered, is used to a lesser extent. Copper from some copper drosses and speisses, by-products of lead refining operations at Port Pirie, is also extracted at Port Kembla.

At Port Kembla, gold and silver contained in electrolytic refining tank house slimes from Mt. Lyell and from Port Kembla, are recovered.

In the following table, details are given of the production of blister copper, and the production and sales of refined copper for the years 1954 to 1958:—

METALLIC COPPER: PRODUCTION AND SALES, AUSTRALIA.

(Tons.)

Particulars.	1954.	1955.	1956.	1957.	1958.
Blister Copper—					
Production (a) (b) ..	38,047	37,439	49,030	50,403	64,608
Refined Copper (c)—					
Production (a)	29,287	28,148	29,307	32,880	43,276
Sold to Australian Consumers (d)	29,361	27,366	29,038	34,114	43,035
Sold for Export (d)	650

(a) Source: Bureau of Mineral Resources.
(c) Refined from domestic primary copper.

(b) Production for refining in Australia or overseas.
(d) Source: Australian Mines and Metals Association.

5. **Production in Principal Countries and World Total.**—The following table shows the mine production of copper during 1956, 1957 and 1958 in the principal producing countries, as published by the Minerals Resources Division of the United Kingdom Overseas Geological Surveys and their estimate of total world production in those years.

COPPER: MINE PRODUCTION IN PRINCIPAL COUNTRIES.

(Tons.)

Country.	1956.	1957.	1958.
United States of America	985,854	970,410	874,401
Chile	482,004	477,952	475,350
U.S.S.R.	(a) 425,000	(a) 465,000	(a) 475,000
Rhodesia and Nyasaland	399,461	431,732	401,341
Canada	316,839	320,633	312,022
Belgian Congo(b)	246,016	238,418	229,610
Japan	77,230	80,417	79,827
Australia	54,547	59,255	75,715
Mexico	53,998	59,643	63,937
Peru	45,506	56,271	52,772
Union of South Africa	45,762	44,811	48,763
<i>Estimated World Total</i>	<i>3,440,000</i>	<i>3,500,000</i>	<i>3,400,000</i>

(a) Estimated.

(b) Smelter production.

6. **Prices.**—From the outbreak of war in 1939 to August, 1953, in the United Kingdom and to October, 1954, in Australia, the price of copper was fixed by regulation. Private trading has now been resumed in both countries. Details of the average market price for the years shown are given in terms of Australian currency and sterling in the following table:—

AVERAGE PRICE OF ELECTROLYTIC COPPER IN AUSTRALIA AND THE UNITED KINGDOM.

(£ per ton.)

Country.	1954.	1955.	1956.	1957.	1958.
Australia — in Australian currency(a)	310	437	435	341	284
United Kingdom—in sterling	249	352	304	220	193

(a) *Ex works Port Kembla.*

7. **Employment in Copper Mining.**—Particulars of the numbers of persons engaged in the mining of copper and copper-gold ores are shown in paras. 4 (ii), page 1043 and 4 (iii), page 1044.

8. **Assistance to the Copper-mining Industry.**—Following a Tariff Board inquiry which recommended that the industry should be assisted by stabilizing the price of copper at £330 a ton, the Government decided in 1958 to provide this assistance partly by duty and partly by bounty. The bounty is payable on copper sold on the Australian market, with a maximum of £45 a ton, or such lesser bounty as will give a return of 10 per cent. on assessed capital employed in the production of copper. The bounty reduced the net effective price of copper to Australian consumers from £330 to £285. A duty is imposed on imported copper when the Australian equivalent of the London Metal Exchange price falls below £275 (£Stg.220), increasing by £1 for each £1 that the Australian equivalent falls below £275. Including freight and other charges, the landed cost is thus expected to be maintained at about £285 so long as the Australian equivalent of the London Metal Exchange price is not in excess of £275.

§ 7. Tin.

1. **Historical.**—Although specimens of tin had been found in New South Wales as early as 1851 it was not until tin stone was discovered near Inverell in 1872 that mining operations commenced. The New England area is still the most important producing area in New South Wales.

The first notable discovery of tin in Queensland occurred in 1872, when rich deposits of stream tin were found in the country to the south of Warwick but these alluvial deposits soon became exhausted. In 1879, important discoveries were made in the Herbert River district and rich fields, including that at Herberton, were opened up.

Tin was first discovered in Western Australia in 1888, and since then has been found in several widely separated localities in the State. More than half of the production to date has come from the Greenbushes Mineral Field, and most of the remainder from the Pilbara goldfield.

Tin mining in Tasmania dates from the year 1871, when the Mount Bischoff mine was discovered. Soon after, rich deposits were located in the north-east of the State and near St. Helens. In 1875, tin was discovered at Mt. Heemskirk.

2. **Present Methods of Mining and Treatment.**—All tin produced in Australia is contained in tin concentrate, which is usually of the mineral cassiterite (tin oxide). The greater proportion of the production is obtained from alluvial workings as a gravity concentrate. In the lode deposits, tin is usually not associated with other recoverable minerals. However, at two mines in Tasmania tin is associated with wolfram and other sulphide minerals. At these mines, a gravity concentrate of tin, wolfram and sulphide minerals is obtained and from this the wolfram is separated by electromagnetic means. The tin and sulphide minerals are separated by flotation, the sulphides being floated off and the tin remaining as tailings.

3. **Mine Production.**—The following table sets out the tin content of tin concentrate produced in Australia during the years 1954 to 1958. No tin is included in minerals other than tin concentrate.

TIN: CONTENT OF TIN CONCENTRATES PRODUCED: STATES.

(Tons.)

State.	1954.	1955.	1956.	1957.	1958.
New South Wales	272	270	269	211	239
Victoria	26	2	..	(a)	..
Queensland	730	770	630	772	1,019
Western Australia	80	119	240	182	94
Tasmania	947	853	938	777	883
Northern Territory	20	3	1	10	2
Australia	2,075	2,017	2,078	1,952	2,237

(a) Less than half a ton.

The following were the principal sources of production in 1958:—

- (i) *New South Wales.* Virtually the whole of the State's production was from alluvial deposits. The New England region mainly around Tingha produced two-thirds of the total production.
- (ii) *Victoria.* No tin was produced in Victoria in 1958.
- (iii) *Queensland.* Most of the tin concentrate produced in Queensland was from the Herberton field, where the main producers were Tableland Tin N.L. and Ravenshoe Tin Dredging Ltd. Both of these operators produced alluvial tin concentrate. Tin concentrate was also produced in the Chillagoe, Kangaroo Hills and Cooktown districts.
- (iv) *South Australia.* No tin was produced in South Australia.
- (v) *Western Australia.* In 1958, nearly all of the tin concentrate produced in Western Australia was lode tin won from the Pilbara field.
- (vi) *Tasmania.* Most of the tin concentrate produced in Tasmania is won in the north-east part of the State, from both lode and alluvial deposits. The Aberfoyle Tin N.L., operating a lode deposit in north-east Tasmania, was the largest producer of tin concentrate in Australia during 1958 and this mine, together with Storey's Creek Tin Mining Co. N.L., produced wolfram concentrate, as well as tin concentrate.
- (vii) *Northern Territory.* In 1958, small quantities were won at various localities.

4. **Smelting and Refining.**—Except for occasional small parcels of concentrate shipped to oversea smelters, all local production is treated by the two tin smelters located in Sydney. The combined capacity of the two smelters is well in excess of the domestic supply of concentrates and there seems little prospect of this capacity being fully utilized in the foreseeable future unless concentrates could be economically imported and smelted.

The production of refined tin in Australia from locally produced tin concentrate during recent years, as recorded by the Bureau of Mineral Resources, was as follows:—1954, 2,063 tons; 1955, 2,004 tons; 1956, 1,850 tons; 1957, 1,806 tons and 1958, 2,121 tons.

5. **Production in Principal Countries and World Total.**—World production of tin reached its maximum in 1941 when 241,400 tons were recorded. The chief producing countries are—Federation of Malaya, Indonesia, China, Bolivia, Belgian Congo and Thailand and in recent years these countries have produced approximately 90 per cent. of the total production. Australia's share of the world's tin production is about 1 per cent.

The production of tin ore (metal content) as published by the Mineral Resources Division of the United Kingdom Overseas Geological Surveys, for the principal producing countries in 1957 and 1958 was as follows.

TIN : PRODUCTION IN PRINCIPAL COUNTRIES.

(Tons.)

Country.	Production.		Country.	Production.	
	1957.	1958.		1957.	1958.
Malaya, Federation of	59,293	38,458	Australia ..	1,952	2,237
Indonesia	27,721	23,200	Union of South Africa	1,463	1,416
China(a)	16,000	18,000	Portugal	1,127	1,249
Bolivia	27,796	17,731	Burma	694	(b) 1,200
Belgian Congo ..	14,281	11,214	United Kingdom ..	1,080	1,116
Thailand	13,528	7,726	<i>Estimated World</i>		
Nigeria	7,534	6,154	<i>Total(c)</i> ..	180,000	134,000

(a) Estimated smelter production.

(b) Estimated.

(c) Excludes U.S.S.R.

6. Prices.—At the outbreak of war in September, 1939, the price of tin in Australia and in London was fixed by regulation. London control of tin prices ceased on 14th November, 1949, while the Australian price was decontrolled on 21st April, 1953. Details of the movement in average market prices for the years 1954 to 1958 are given in terms of Australian currency and sterling in the following table.

AVERAGE PRICE OF TIN IN AUSTRALIA AND THE UNITED KINGDOM.

(£ per ton.)

Country.	1954.	1955.	1956.	1957.	1958.
Australia — in Australian currency	911	947	1,014	992	995
United Kingdom—in sterling	720	741	788	755	735

7. Employment in Tin Mining.—The number of persons employed in tin mining is shown in paras. 4 (ii), page 1043 and 4 (iii), page 1044.

§ 8. Iron.

1. Historical.—Iron ore was first mined in New South Wales to supply raw material for the ironworks that were established near Mittagong in 1852. Iron ore for the ironworks established later at Lithgow was drawn from Carcoar, near Bathurst.

In South Australia, the iron ore deposits of the Middleback Ranges, near Whyalla, were first mined by the Broken Hill Proprietary Co. Ltd. in 1900 to provide a flux for lead smelting operations at Port Pirie. When that Company opened its Newcastle steelworks in 1915, it greatly expanded ore production from the Middleback Ranges and most of the Australian steel industry's requirements of iron ore still come from this source.

Regular shipments of iron ore from Yampi Sound, north of Derby in Western Australia, to the steel works at Port Kembla commenced in 1951. Iron ore for the iron smelter at Wundowie which commenced operations in 1948, has in recent years been provided entirely from the deposits at Koolyanobbing, near Southern Cross.

Besides the large quantities of iron ore that are mined for metal extraction purposes, smaller quantities of iron oxide are mined for other purposes, such as gas purification, cement manufacture, coal washing and fluxing.

2. **Methods of Mining and Treatment.**—All iron ore and iron oxide is won by opencut mining. The ore is selectively mined and crushed and screened to provide a standard assay and size for blast furnace use. No concentration is carried out. However, the iron ore from Yampi Sound is powdery and friable and it has to be sintered, or agglomerated, before making up the furnace charge.

3. **Mine Production of Iron Ore.**—Iron oxide deposits exist in all States and in the Northern Territory but at present iron oxide for metal extraction purposes, termed iron ore in this chapter, is produced in two States only. The following table shows the estimated iron content of iron ore produced during the years 1954 to 1958.

IRON : ESTIMATED IRON CONTENT OF IRON ORE PRODUCED.

(Tons.)

State.	1954.	1955.	1956.	1957.	1958.
South Australia	1,863,589	1,978,586	2,331,611	2,203,004	2,179,187
Western Australia	410,741	325,579	211,215	262,519	365,275
Australia	2,274,330	2,304,165	2,542,826	2,465,523	2,544,462

The producing centres during 1958 were as follows:—

- (i) *South Australia.* During 1958, 3,352,600 tons of iron ore were drawn from the Iron Monarch and Iron Baron deposits in the Middleback Ranges. Selected foundry grade ore was diverted as required to the Whyalla blast furnace, but the greater part was shipped to Newcastle and Port Kembla for smelting. A small quantity was dispatched to Port Pirie for use as a flux in lead smelting operations.
- (ii) *Western Australia.* During the year, 536,713 tons of ore were shipped from Yampi Sound, north of Derby, to New South Wales for sintering and smelting. A quantity of 36,215 tons was mined at Koolyanobbing, near Southern Cross, for pig iron production at Wundowie.

4. **Mine Production of Iron Oxide.**—Production of iron oxide, excluding that used for metal extraction (iron ore) and mineral pigments, in the several States during 1958, according to end use, is shown in the following table. Small quantities of iron ore mined in the Middleback Ranges are used for fluxing purposes, mainly at Port Pirie, but this production is included with "iron ore" in para. 3 above. Only total quantities of iron oxide produced are recorded; particulars of metallic content are not available.

IRON OXIDE PRODUCTION, 1958.

(Tons.)

Use.	New South Wales.	Victoria.	Queensland.	Tasmania.	Australia.
For gas purification ..	2,106	758	2,864
For cement manufacture ..	831	..	996	4,266	6,093
For coal washing ..	25	25
Total(a)	2,962	758	996	4,266	8,982

(a) Excludes iron oxide for fluxing which is included with iron ore in para. 3 above.

The principal sources of iron oxide production during 1958 were as follows:—

- (i) *New South Wales.* Quantities of iron oxide for gas purification were obtained from deposits near Port Macquarie, while that used for cement manufacture was mined from the Mudgee and Rylstone mining divisions. Magnetite, used in coal washing, was produced from beach sand deposits near Murwillumbah.
- (ii) *Victoria.* Limonite ore used for gas purification was mined at Buchan.
- (iii) *Queensland.* Iron oxide produced for cement manufacture was mined near Townsville.
- (iv) *Tasmania.* Iron oxide for cement manufacture was mined in the vicinity of Penguin.

Particulars of Australian production of iron oxide for the years 1954 to 1958, according to end use, are shown in the following table.

IRON OXIDE PRODUCTION: AUSTRALIA.

(Tons.)

Use.	1954.	1955.	1956.	1957.	1958.
For gas purification ..	3,515	5,328	6,479	5,338	2,864
For cement manufacture ..	6,453	7,400	9,126	9,759	6,093
For coal washing ..	1,795	183	..	4	25
Total(a) ..	11,763	12,911	15,605	15,101	8,982

(a) Excludes iron oxide for fluxing which is included with iron ore in para. 3 above.

5. **Iron and Steel Production.**—(i) *Australia.* The production of pig-iron and steel ingots in Australia, of which New South Wales is the main producing State, is shown in the following table for each of the years ended 31st May, 1950 to 1959.

PIG-IRON AND INGOT STEEL: PRODUCTION(a), AUSTRALIA.

(Tons.)

Year Ended 31st May.	Pig-iron. (b)	Steel Ingots.	Year Ended 31st May.	Pig-iron. (b)	Steel Ingots.
1950	1,097,635	1,217,971	1955	1,868,841	2,208,708
1951	1,313,332	1,443,831	1956	1,910,521	2,320,289
1952	1,430,027	1,521,386	1957	2,098,352	2,773,995
1953	1,691,693	1,801,028	1958	2,283,925	3,037,705
1954	1,826,711	2,116,813	1959	2,293,709	3,203,584

(a) Includes recovery from scrap.

(b) Includes pig-iron for castings; excludes ferro-alloys.

In 1958, eight blast furnaces were operating in Australia; three at Newcastle and three at Port Kembla, in New South Wales, one at Whyalla, South Australia, and one at Wundowie, Western Australia. During 1958, ingot steel was produced from 27 open-hearth furnaces (17 at Newcastle and 10 at Port Kembla) and from 10 electric furnaces (5 at Newcastle, 3 at Melbourne, 1 at Whyalla and 1 at Port Kembla).

(ii) *New South Wales.* The principal producers in Australia, both in New South Wales, are the Broken Hill Proprietary Co. Ltd. at Newcastle and Port Kembla, and its subsidiary, Australian Iron and Steel Ltd. at Port Kembla.

(iii) *South Australia.* At Whyalla in South Australia, the Broken Hill Proprietary Co. Ltd. produces pig iron using locally produced raw materials together with metallurgical coke from New South Wales. A small quantity of steel ingots is produced from an electric furnace.

(iv) *Western Australia.* In Western Australia, the State-owned Wundowie Wood-distillation, Charcoal Iron and Steel Industry produces pig iron using charcoal for smelting. This high grade iron is used in the manufacture of spheroidal graphite cast iron, and considerable quantities are exported. At Kwinana, The Broken Hill Proprietary Co. Ltd. produces steel products from billets imported from New South Wales.

6. **Production of Iron and Steel in Principal Countries.**—Particulars of the production in the principal countries and the estimated world total production during the years 1957 and 1958 according to figures published by the Mineral Resources Division of the United Kingdom Overseas Geological Surveys, are shown in the next table.

IRON AND STEEL: PRODUCTION IN PRINCIPAL COUNTRIES.

('000 Tons.)

Country.	Pig-iron and Ferro-alloys.		Steel Ingots and Castings.

(a) Estimated.

(b) Excludes ferro-alloys.

§ 9. Mineral Sands.

1. **Historical.**—In recent years, the growing world demand for titanium metal has brought about a rapid expansion of Australian mineral sands mining. Australia is the largest producer of rutile and zircon in the world and nearly all of this production comes from the mineral sands deposits along the beaches of the east coast. The ilmenite produced on the east coast has proved unsuitable for titanium oxide pigment manufacture and most of the production is discarded. However, ilmenite produced from mineral sands mined in Western Australia since 1956 has a much lower chromic oxide content than east coast ilmenite and is therefore suitable for paint manufacture.

The first commercial development of the mineral sands deposits commenced at Byron Bay in New South Wales in 1934, when a mixed zircon-rutile-ilmenite concentrate was prepared. Large scale production of zircon-rutile concentrate commenced in Queensland in 1941 when electromagnetic separators were installed to separate the ilmenite. In 1943, after the installation of electrostatic separators, a rutile concentrate was produced. The Commonwealth Government banned the export of mixed concentrates in 1944, and all producers now turn out separate concentrates of rutile, zircon, ilmenite and monazite.

Production of rutile and zircon in 1958 was considerably lower than that of the previous year, mainly because of reduced prices offering on world markets. Virtually all rutile and zircon concentrates are exported overseas.

2. **Present Methods of Mining and Treatment.**—Mineral bearing sands are usually recovered from sand dunes but deposits occurring below sea level are recovered by suction dredges. The mineral sands and beach sand (quartz) are gravity concentrated, either by shaking tables or by spiral concentrators, resulting in the complete elimination of quartz and leaving a mixed concentrate of heavy minerals. Magnetic ilmenite and monazite are separated by electromagnetic methods and are then separately recovered using increasing magnetic intensities. The remaining zircon and rutile are separated using electrostatic separators. The above method is employed at nearly all plants, but Zircon Rutile Ltd., at Byron Bay, recovers a zircon concentrate from the raw sand using froth flotation.

3. **Mine Production.**—(i) *Titanium Dioxide.* The following table shows the quantities of titanium dioxide contained in rutile and ilmenite concentrates produced during the years 1954 to 1958.

TITANIUM DIOXIDE: CONTENT OF CONCENTRATES PRODUCED.

(Tons.)

State.	1954.	1955.	1956.	1957.	1958.
CONTAINED IN RUTILE CONCENTRATE.					
New South Wales	21,872	33,045	62,470	83,363	44,915
Queensland	21,139	24,198	30,772	41,500	35,755
Western Australia	285
Australia	43,011	57,243	93,242	124,863	80,955

CONTAINED IN ILMENITE CONCENTRATE.

New South Wales	228	230	481	485	59
Queensland	2	32	..	78	..
Western Australia	1,779	38,325	38,219
Australia	230	262	2,260	38,888	38,278

(ii) *Zircon.* The quantities of zircon mineral contained in zircon concentrate produced during the years 1954 to 1958 are shown in the table below.

ZIRCON: CONTENT OF ZIRCON CONCENTRATE PRODUCED.

(Tons.)

State.	1954.	1955.	1956.	1957.	1958.
New South Wales	27,037	32,465	50,135	58,747	32,230
Queensland	13,883	15,745	21,634	28,956	26,412
Western Australia	103
Australia	40,920	48,210	71,769	87,703	58,745

(iii) *Other Products.* Small quantities of monazite concentrate, tin concentrate, magnetite and garnet concentrate were also recovered from mineral sands.

(iv) *Sources of Production.* The principal sources of mineral sands treated during 1958 were:—

(a) *New South Wales and Queensland.* The main deposits of mineral sands occur along 300 to 400 miles of the eastern Australian coast from Swansea, New South Wales to Curtis Island, Queensland. At present, the principal mining operations are located within a 90 mile stretch of coast extending from Byron Bay, New South Wales to North Stradbroke Island, Queensland.

(b) *Western Australia.* Deposits of mineral sands occur on the south-west coast of Western Australia, in the Bunbury and Albany districts.

4. *Employment in Mineral Sands Mining.*—Particulars of the number of persons employed in mineral sands mining are shown in paras. 4 (ii), page 1043 and 4 (iii), page 1044.

§ 10. Aluminium.

1. *Mine Production.*—The source of aluminium is the ore bauxite, which is produced in small quantities in New South Wales, Victoria and Queensland. Australian production is used for the manufacture of refractories, all bauxite used for metal extraction during 1958 being imported from Indonesia. Large deposits of bauxite outcrop exist on the Cape York Peninsula in North Queensland and it is expected that this raw material will be refined in Australia when mining commences. The alumina content of bauxite produced in Australia during the years 1954 to 1958 is shown in the following table:—

ALUMINA : CONTENT OF BAUXITE PRODUCED.

(Tons.)

State.	1954.	1955.	1956.	1957.	1958.
New South Wales	710	902	1,578	1,354	633
Victoria	1,320	1,644	2,600	1,910	2,304
Queensland(a)	410	860	440	494	596
Australia	2,440	3,406	4,618	3,758	3,533

(a) Estimated.

2. *Refinery Production.*—A refinery for the production of alumina and refined aluminium was constructed at Bell Bay on the Tamar River, in Northern Tasmania. The location of this refinery was determined by the availability of large supplies of hydro-electric power. Production of alumina commenced in February, 1955, and of refined aluminium in September, 1955. The following table shows the production of alumina and refined aluminium in Australia during the years 1955 to 1958:—

ALUMINA AND REFINED ALUMINIUM : PRODUCTION, AUSTRALIA.

(Tons.)

Refinery Product.	1955.	1956.	1957.	1958.
Alumina	(a) 4,134	16,863	20,116	22,490
Refined Aluminium	(b) 1,248	9,143	10,624	10,869

(a) Production commenced February.

(b) Production commenced September.

Source: Bureau of Mineral Resources.

§ 11. Uranium.

Uranium concentrate has been produced in Australia since 1954 but particulars of the quantity of U_3O_8 concentrate produced and its value are not available for publication. All U_3O_8 concentrate is exported overseas. During 1958, the principal producing centres were as follows:—

- (i) *Queensland.* Uranium ore was mined by opencut methods at Mary Kathleen, 33 miles east of Mt. Isa, by Mary Kathleen Uranium Ltd. A treatment plant producing U_3O_8 concentrate commenced operating at this site in June, 1958.
- (ii) *South Australia.* The South Australian Department of Mines mined uranium ore by underground methods at Radium Hill, 289 miles north-east of Adelaide. A concentrate of heavy minerals is produced at the mine and this is railed to a treatment plant at Port Pirie for the chemical extraction of U_3O_8 concentrate.
- (iii) *Northern Territory.* At Rum Jungle, Territory Enterprises Pty. Ltd., acting on behalf of the Australian Atomic Energy Commission, mined and treated uranium-copper and copper ores to produce U_3O_8 concentrate, copper concentrate and copper precipitate. Mining operations ceased at Rum Jungle in November, 1958, but sufficient ore was stockpiled to permit the continuation of full scale production of uranium concentrate for some years.

During 1958, ore was mined in the South Alligator River area. Two companies, the United Uranium N.L. and the South Alligator Uranium N.L. opened treatment plants in 1959.

§ 12. Other Metallic Minerals.

1. *Tungsten.*—In recent years, Tasmania has been the principal State producing tungsten ores, scheelite being mined on King Island in Bass Strait and wolfram being mined in association with tin ores in the north-east part of the State. Because of low world prices, scheelite production on King Island ceased in August, 1958, but the operator, King Island Scheelite (1947) Ltd., recommenced production on a limited scale in 1960.

Particulars of the production of tungstic oxide contained in scheelite and wolfram concentrates produced during the years 1954 to 1958 are shown in the following table.

TUNGSTIC OXIDE (WO_3) : CONTENT OF CONCENTRATES PRODUCED.
(Tons.)

State.	1954.	1955.	1956.	1957.	1958.
CONTAINED IN SCHEELITE CONCENTRATE.					
New South Wales	6	7	2	1	1
Queensland	(a)	(a)	3	1	..
Western Australia	3	5
Tasmania	852	948	985	948	477
Australia	861	960	990	950	478
CONTAINED IN WOLFRAM CONCENTRATE.					
New South Wales	2	1	2	(a)	..
Queensland	38	51	46	19	5
Tasmania	420	389	443	391	360
Northern Territory	51	81	101	49	7
Australia	511	522	592	459	372

(a) Less than half a ton.

2. **Manganese.**—There has been considerable expansion of manganese ore production in recent years, due mainly to the relaxation of some provisions of the embargo on export of manganese ores. Western Australia, where activities were centred around Horseshoe in the Peak Hill District and Ant Hill and Mt. Sunday in the Pilbara District, continues as the main producing State. Northern Territory production is at Mucketty, near Renner Springs.

The following table shows the manganese content of metallurgical grade and the manganese dioxide content of battery and other grades of manganese ore produced during the years 1954 to 1958:—

MANGANESE : CONTENT OF MANGANESE ORE PRODUCED.
(Tons.)

Year.	Metallurgical Grade.				Battery and Other Grades.			
	In terms of Manganese (Mn) Content.				In terms of Manganese Dioxide (MnO ₂) Content.			
	N.S.W.	Q'land. (a)	W. Aust.	Australia.	N.S.W.	W. Aust.	N. Terr.	Australia.
1954 ..	322	60	12,336	12,718	644	644
1955 ..	443	35	19,984	20,462	403	..	975	1,378
1956 ..	436	140	25,280	25,856	371	179	914	1,464
1957 ..	391	557	33,956	34,904	385	186	668	1,239
1958 ..	516	3,181	21,926	25,623	511	195	2,113	2,819

(a) Estimated.

Zinc concentrates produced at Broken Hill and Rosebery, in Tasmania, contain manganese. However, in 1958, only 306 tons of manganese dioxide, recovered as a by-product of zinc refining at Risdon, near Hobart, were utilized.

3. **Other.**—The production, in 1958 (1957 shown in parentheses) of other metallic minerals worthy of note, was as follows:—

Antimony. The antimony content of antimony-bearing minerals produced was 1,356 tons (1,209 tons). Of this amount, 664 tons (724 tons) were in lead concentrate and 692 tons (485 tons) in 1,116 tons (852 tons) of antimony ore and concentrate.

Beryllium. Production of beryllium ore was 247 tons (395 tons) which came mainly from Western Australia where the Pilbara gold field was the main producing area. The beryllium oxide content of the ore was 2,900 units of 22.4 lb. (4,570 units).

Chromite. Production of chromite was 776 tons (3,049 tons) with chromic oxide content of 386 tons (1,420 tons). This production came from Rockhampton in Queensland and Gundagai in New South Wales.

Tantalite-Columbite. The production of tantalite-columbite concentrate was 13,507 lb. (50,038 lb.) and the whole of this output came from Western Australia. The tantalum pentoxide and columbium pentoxide content of the concentrates was 6,736 lb. (23,499 lb.).

Other. Other metallic minerals produced in Australia in small quantities during 1958 were molybdenite concentrate, native osmiridium, and platinum concentrate.

§ 13. Coal.

1. **Historical.**—Coal was probably the first of Australia's mineral products to be discovered, being reported from the neighbourhood of Newcastle in 1796. In the following year, outcrop coal was discovered at Coalcliff, 40 miles south of Sydney, and at the entrance to the Hunter River in the Newcastle district. By 1799, outcrop coal was being exported overseas from the latter field. All production was from the Newcastle district until 1857 when the first coal was produced from the southern field. The estimated production in 1830 was 4,000 tons and this increased to 30,000 tons in 1840, 70,000 tons in 1850 and 370,000 tons in 1860. In 1864, the first coal was discovered in the Greta-Cessnock-Maitland field which has since become the principal Australian source of gas coal.

The discovery of coal in Victoria dates from the year 1825, when the mineral was reported to have been found at Cape Paterson, but only a small quantity of coal was mined in Victoria prior to the opening of the State-owned mine at Wonthaggi in 1909. Present day Victorian production is obtained almost exclusively from this mine. In Victoria, brown coal was discovered at Lal Lal in 1857 and in the Latrobe Valley in 1874. Mining operations were first undertaken in 1889 but it was not until after the 1914-18 War that large scale mining began.

In Queensland, coal was first discovered near Ipswich in 1827 and the first colliery was established there in 1846. At Blair Athol, 240 miles west of Rockhampton, coal was discovered in 1864. This field is unique in that the field's total reserves of 200 million tons are available for opencut mining in a seam attaining a thickness of over 90 feet, the greatest thickness of black coal yet found in Australia.

The deposits of black coal at Leigh Creek, 377 miles north of Adelaide, were discovered in 1888 during dam-sinking operations. Small quantities of coal were mined in 1907 and 1917 but it was not until 1944 that extensive opencut mining operations began.

In Western Australia, coal was first discovered on the Irwin River in 1846 but the discovery of the Collie field in 1883 proved to be of far greater importance. This field is located 120 miles south of Perth and commercial mining began there in 1898.

There appear to be no reliable records of the earliest discoveries of coal in Tasmania. Coal was mined on the Tasman Peninsula to provide fuel for penal settlements in the vicinity and for Hobart, and mining continued there until about 1877. In 1824, coal was discovered at South Cape Bay near the most southerly part of the island. The most important deposit is the Mt. Nicholas-Fingal-Dalmayne (St. Marys) field in the north-east part of the State.

The mining of black coal on a large scale by opencut methods first began in Australia at Blair Athol in Queensland, where in 1937, the first year of production, 18,494 tons were produced. Opencut mining of black coal was introduced in New South Wales in 1940, in Western Australia in 1943, in South Australia in 1944, and in Tasmania in 1950. The output from opencuts rose slowly up to 1943 when 119,406 tons were produced, increasing rapidly from 1944 and reaching an output of over four million tons in 1952. Since then however, the output from opencut mining has declined and in 1958 it was only 2,065,331 tons. This decline has been mainly due to the closing down of large opencuts in New South Wales, as over-production of coal began to occur late in 1952.

2. Mine Production of Black Coal.—Production of black coal according to rank in the several States during the years 1954 to 1958 is set out in the following table. The tonnages produced by underground mining and opencut mining are also shown.

(a) Bituminous coal from underground mines. (b) Sub-bituminous coal from an opencut mine.
(c) Sub-bituminous coal.

The principal producing centres during 1958 were as follows:—

- (i) *New South Wales.* The principal deposits worked were in the vicinity of Newcastle, Cessnock and Singleton (northern field), Lithgow (western field) and Wollongong (southern field). Tonnages mined in 1958 were: northern field, 9,583,595 tons; southern field, 4,693,170 tons and western field, 1,574,183 tons. All open-cut coal was from the northern field.
The coal fields of New South Wales, predominately bituminous, are the most important in Australia, in respect of the magnitude, quality and accessibility of reserves and the extent to which the deposits are being worked. Coal from the various seams differs in properties, coal from the Greta seam worked in the vicinity of Cessnock being particularly suitable for gas making, while coal from the Victoria tunnel, Dudley, Young Wallsend and Borehole seams, all of which are mined near Newcastle, have coking properties and are used in the steel works. Coking coal is also obtained from the Bulli seam which is mined near Wollongong and in the Burragorang Valley. A multi-purpose coal is available in the Singleton area and steaming coals are mined around Newcastle, Lithgow, Cessnock and Wollongong.
- (ii) *Victoria.* Production of black coal in Victoria is restricted to the Gippsland district. The State Coal Mine at Wonthaggi is the main producer, the remaining production coming from small privately-owned mines.
- (iii) *Queensland.* The principal producing centres were Ipswich, 1,490,735 tons; Collinsville, 431,482 tons; Blair Athol, 190,285 tons and Callide, 131,916 tons. Open-cut coal was mined at Blair Athol, Callide and Collinsville and the total coal won by this means was 19 per cent. of total production.
- (iv) *South Australia.* Coal was mined only at Leigh Creek, 377 miles north of Adelaide.
- (v) *Western Australia.* The only coal deposits which have been developed on a commercial scale are at Collie in the south-west of the State and all production during 1958 was from this source.
- (vi) *Tasmania.* Of the total production, 267,491 tons were produced from the Avoca and Mt. Nicholas-Fingal-Dalmayne fields in the north-east of the State. Of the remainder, 2,006 tons of semi-anthracite were produced at the Sandfly mine, near Hobart.

3. **Mine Production of Brown Coal.**—Brown coal is mined only in Victoria and production in recent years has been as follows:—1954, 9,331,255 tons; 1955, 10,112,206 tons; 1956, 10,559,801 tons; 1957, 10,740,989 tons and 1958, 11,643,629 tons. In the past ten years, the output of brown coal has nearly doubled.

4. **Australia's Coal Reserves.**—The latest available estimate of the measured and indicated coal reserves of Australia is that prepared by the Coal and Lignites Panel of the Power Survey Sectional Committee of the Standards Association of Australia, and is shown in the following table. It should be noted that reserves can only be included in the "measured and indicated" categories when sufficient exploratory and testing work has been completed.

COAL RESERVES OF AUSTRALIA.
(Million Tons.)

State.				Bituminous Coal.(a)	Sub-bituminous Coal.	Brown Coal. (Lignite).
New South Wales	8,650	800	..
Victoria	12	..	56,100
Queensland	749
South Australia	144	230
Western Australia	274	..
Tasmania	240
Australia	9,651	1,218	56,330

(a) Includes reserves of a small quantity of semi-anthracite coal.

5. **Production in Principal Countries.**—The following table shows the production of the principal countries in 1957 and 1958 as published by the Mineral Resources Division of the United Kingdom Overseas Geological Surveys.

COAL : PRODUCTION IN PRINCIPAL COUNTRIES.
(’000 Tons.)

Country.	Black Coal.		Brown Coal and Lignite.	
	1957.	1958.	1957.	1958.

Grand Total	19,426	19,357	19,037	19,717	20,371

(a) Includes miners' and colliery coal. change in stocks.

(b) Government railways only.

(c) Includes net

After the 1939-45 War, it was found necessary to augment local supplies of black coal in Australia by increasing imports. The quantity imported reached a post-war peak of 597,866 tons in 1950-51, but since then has declined, as in recent years production has expanded considerably. Since 1952-53, exports have exceeded imports by a wide margin; in 1958-59, exports of black coal were 645,249 tons and imports were 7,526 tons.

(ii) *Brown Coal.* The table following shows the production and distribution of brown coal and the production of briquettes in Victoria for the years 1953-54 to 1957-58.

BROWN COAL: PRODUCTION AND UTILIZATION, VICTORIA.
(*000 Tons.)

Year.	Production.	Consumption as Fuel.			Consumption as Raw Material in Briquette Manufacture.	Briquettes Manufactured.
		Electricity Generation.	Briquette Factory.	Other Factories. (a)		
1953-54	8,731	5,307	780	920	1,560	587
1954-55	9,668	5,899	842	1,088	1,684	631
1955-56	10,383	6,517	843	1,191	1,686	634
1956-57	10,772	6,943	806	1,309	1,613	618
1957-58	10,869	7,020	810	1,297	1,619	626

(a) Recorded consumption.

The briquetting plant of the State Electricity Commission at Yallourn started operations in November, 1924, and the output, which in 1926 was 95,477 tons, had increased to 180,905 tons in 1930 and to 671,779 tons in 1959. Approximately two and a half tons of brown coal are required to make one ton of briquettes. In December, 1956, the Lurgi high pressure brown coal gasification plant at Morwell was opened. This plant is operated by the Gas and Fuel Corporation of Victoria and produces town gas which is sent to Melbourne through 103 miles of pipeline.

7. *Exports.*—The quantities and values of the overseas exports of Australian coal and of bunker coal for overseas vessels for the five years 1954-55 to 1958-59 are shown in the following table. These shipments were made mainly from New South Wales.

COAL: OVERSEA EXPORTS AND BUNKER, AUSTRALIA.

Year.	Oversea Exports.(a)		Bunker Coal for Oversea Vessels.	
	Quantity.	Value.	Quantity.	Value.
	Tons.	£A f.o.b.	Tons.	£A f.o.b.
1954-55	291,226	1,147,441	25,363	111,625
1955-56	193,813	780,284	38,749	165,224
1956-57	545,101	2,196,044	9,065	44,116
1957-58	836,336	3,390,628	11,608	50,656
1958-59	645,249	2,676,042	8,187	37,808

(a) Excludes bunker coal.

New South Wales in addition to meeting requirements within that State supplies considerable quantities of coal to other States and for export overseas. Of the total of 15,762,000 tons produced in 1958-59, 1,859,000 tons (12 per cent.) were exported interstate and 645,000 tons (4.1 per cent.) were exported overseas. The demand for bunker coal continues to decline and in 1957-58 a total of 182,000 tons (1 per cent.) of New South Wales production was supplied for interstate and overseas vessels.

8. Value at the Mine in New South Wales.—Particulars of the average values at the mine (or at screens or mine washeries where these are at a distance from the mine) of saleable coal for each district and for New South Wales as a whole are shown in the following table for the years 1954 to 1958. Saleable coal excludes miners' coal, coal consumed at the mines and refuse, etc., removed by the use of hand picking belts or at mine washeries. In calculating these values, coal won by producer consumers is also excluded and in respect of stocks of coal held at grass by the Commonwealth Government only actual sales have been taken into account. No deduction has been made in respect of excise duty operative from 1st November, 1949.

**AVERAGE SELLING VALUE AT THE MINE PER TON OF SALEABLE COAL:
NEW SOUTH WALES.**

(s. d.)

Year.	Northern District.	Southern District.	Western District.	Average for State.
1954.. .. .	60 3	59 0	57 3	59 7
1955.. .. .	59 11	58 10	55 9	59 2
1956.. .. .	59 3	58 1	55 1	58 6
1957.. .. .	58 3	55 7	50 7	56 9
1958.. .. .	56 1	55 0	47 5	54 10

9. Values in New South Wales, United Kingdom and the United States of America.—The following table shows, for the years 1954 to 1958, average values of coal produced in New South Wales, Great Britain and the United States of America. The figures give an indication of changes in average value or price within each country but they do not necessarily show the relative levels as between the countries concerned.

PRODUCTION VALUES OF COAL PER TON: NEW SOUTH WALES, UNITED KINGDOM AND UNITED STATES OF AMERICA.

Country.	1954.	1955.	1956.	1957.	1958.
	s. d.	s. d.	s. d.	s. d.	s. d.
New South Wales—Bituminous(a)	59 7	59 2	58 6	56 9	54 10
United Kingdom—Deep mined(b)	63 6	68 0½	77 0	82 1	85 7
United States of America—Bituminous and lignite(c) ..	\$ 4.51	\$ 4.50	\$ 4.82	\$ 5.08	\$ 4.86

(a) Average selling value at the mine per ton of 2,240 lb.; the figures relate to saleable coal and include excise duty. (b) Average value in sterling at the mine per ton of 2,240 lb. (c) Average value in United States currency at the mine per ton of 2,000 lb.

10. Employment in Coal-mines.—The number of persons employed, both above and below ground, in coal-mines in each State for each of the years 1954 to 1958 is shown in the following table.

COAL-MINES: PERSONS EMPLOYED.(a)

Year.	New South Wales.	Victoria.		Queensland.	South Australia.	Western Australia.	Tasmania.	Australia.
		Black.	Brown.					
1954	19,979	786	1,598	3,638	270	1,583	358	28,212
1955	19,260	687	1,502	3,634	280	1,432	367	27,162
1956	17,918	610	1,566	3,568	260	1,190	349	25,461
1957	16,622	561	1,579	3,493	223	1,145	301	23,924
1958	15,463	516	1,540	3,295	230	999	292	22,335

(a) Average number of persons employed (including working proprietors) during whole year.

The year of maximum employment was 1926 when 31,774 persons were engaged in the coal-mines of Australia. Shortly after that year, the industrial depression and a prolonged stoppage of work on one of the principal fields of New South Wales during 1929 and 1930 seriously affected the figures of employment. After 1933, there was a gradual increase up to a level of about 23,000 which was maintained during the war years. There was a further increase after the war to 28,303 in 1952, but since then the number in employment has fallen again. In 1958, it was 22,335. In New South Wales, during 1958, 12,354,000 tons of coal or 81.6 per cent. of the total output of underground coal, were loaded by machinery as compared with 1,101,000 tons or 9.8 per cent. in 1939 and 3,089,000 tons (32.9 per cent.) in 1949. Similar details for other States are not available but machinery is used to a considerable extent in Western Australian mines and to a lesser extent in Queensland.

11. **Production of Black Coal per Man-shift.**—(i) *Underground Mines.* The following table shows particulars of estimated black coal output per man-shift worked, (a) at the coal face, and (b) by all employees, in respect of underground mines for each State concerned and for Australia for the years 1954 to 1958. These estimates have been calculated by the Joint Coal Board from data collected fortnightly in respect of coal production and the number of man-shifts actually worked. In South Australia, black coal is won only by open-cut mining.

PRODUCTION OF BLACK COAL PER MAN-SHIFT: UNDERGROUND MINES.
(Tons.)

Year.	N.S.W.	Vic.	Q'land.	W. Aust.	Tas.	Australia.
PRODUCTION PER MAN-SHIFT WORKED AT COAL FACE.						
1954	10.16	2.03	6.54	4.82	5.95	8.81
1955	10.76	2.13	6.61	4.74	6.54	9.24
1956	11.43	2.05	6.79	5.14	7.04	9.77
1957	13.19	2.01	7.13	5.88	7.60	11.02
1958	14.48	2.04	7.28	6.67	8.01	11.96

PRODUCTION PER MAN-SHIFT WORKED BY ALL EMPLOYEES.

1954	3.25	0.82	2.61	1.91	3.07	3.00
1955	3.29	0.86	2.66	2.06	3.08	3.14
1956	3.55	0.83	2.65	2.35	3.41	3.28
1957	3.99	0.85	2.82	2.77	3.76	3.65
1958	4.35	0.89	2.90	3.02	3.91	3.95

(ii) *Opencut Mines.* In the next table, the Joint Coal Board's estimates of production of black coal per man-shift worked by all employees in opencut mines are shown for the years 1954 to 1958. There are no opencuts producing black coal in Victoria.

PRODUCTION OF BLACK COAL PER MAN-SHIFT: OPENCUT MINES.
(Tons.)

Year.	N.S.W.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
1954	8.97	12.27	4.52	4.71	7.91	7.31
1955	9.18	11.42	6.02	5.77	7.78	8.11
1956	10.36	13.06	6.72	6.37	8.56	9.19
1957	11.11	12.17	9.89	6.04	7.68	10.25
1958	11.31	13.63	11.46	6.78	10.42	11.47

12. Joint Coal Board.—After the 1939–45 War, the Governments of the Commonwealth and New South Wales agreed to create jointly a coal authority with powers similar to, and in some respects wider than, those possessed under Commonwealth war-time legislation. Following this agreement, the Joint Coal Board was created and has functioned as from 1st March, 1947. Briefly, it is the responsibility of the Board to ensure that the coal of the State is conserved, developed, worked, distributed and used to the best advantage in the public interest, and to promote the welfare of the workers in the industry. Further details of the powers and functions of the Board are contained in earlier issues of the Official Year Book.

§ 14. Coke and Other By-products from Coal.

1. Coke.—The production of metallurgical coke in Australia was limited to about 250,000 tons per annum prior to the 1914–18 War. This was below local requirements and necessitated an annual import of about 27,000 tons. By 1920, production had risen to more than 500,000 tons, by 1938–39 to 1,164,873 tons, and in 1957–58 it reached the record level of 2,295,737 tons. Imports exceeded exports prior to 1952–53 but in 1952–53 and later years there has been a net export surplus. In 1958–59, exports amounted to 8,823 tons while imports were 6,845 tons. Most of the tonnage imported is petroleum coke for use in the production of aluminium.

In addition to metallurgical coke referred to above (which is produced by specialized coke works), considerable quantities of coke are produced in gas works as a by-product of the manufacture of gas. Production in gas works in 1958–59 was 815,464 tons. To date, there has been no production of petroleum coke at Australian oil refineries.

In order to avoid duplication with coal values, the figures for coke have not been included in the general tables of mineral production in the early part of this chapter.

In the following table, particulars of the production of coke in coke works and gas works in Australia are shown for the years 1954–55 to 1958–59. The figures exclude output of coke breeze, which amounted to 328,586 tons in 1957–58 and 435,450 tons in 1958–59.

COKE PRODUCTION: AUSTRALIA.

(Tons.)

Industry.	1954–55.	1955–56.	1956–57.	1957–58.	1958–59.
Coke Works	2,046,790	2,058,426	2,234,458	2,295,737	2,210,621
Gas Works	1,099,859	1,031,135	954,756	831,615	815,464
Total	3,146,649	3,089,561	3,189,214	3,127,352	3,026,085

2. Other By-products from Coal.—In addition to coke, other products are obtained from the treatment of coal by coke and gas works. Some of the main items produced, principally in coke and gas works, during 1958–59 (1957–58 in parentheses) were: crude tar, 49,708,000 gallons (50,429,000 gallons); refined tar 28,696,000 gallons (28,277,000 gallons); and ammonium sulphate 117,489 tons (118,732 tons).

§ 15. Mineral Oils.

In 1959, the search for oil continued throughout the Australian mainland and in Papua-New Guinea. While petroleum in commercial quantities has not yet been discovered, several interesting shows of gas and/or oil have been found.

In Papua, oil, gas and condensate were discovered in Puri No. 1. Subsequent tests indicated that no commercial production was obtainable. At Port Campbell in Victoria gas was discovered in a well drilled by Frome-Broken Hill Co. Pty. Ltd. and further testing is in progress to determine the potential of this discovery.

The Petroleum Search Subsidy Act 1957–58 continued to attract applications for subsidy of the drilling of stratigraphic test wells in areas not previously investigated. On 4th December, 1959, the Petroleum Search Subsidy Act 1959 received the Royal Assent. This

Act widens the scope of the original Act to include the grant of subsidy on approved geo-physical and bore-hole surveys and off-structure drilling. The response to this new Act indicates a continued upward trend in exploration.

Drilling programmes are being carried out in all States and Territories with the exception of Tasmania. The year 1959 saw the commencement of the first stratigraphic test well in the Northern Territory at Spirit Hill.

In the following table, details are given of the footage drilled in the search for oil in the Commonwealth of Australia and the Territory of Papua and New Guinea during the years 1955 to 1959.

FOOTAGE DRILLED IN THE SEARCH FOR OIL, STATES OF AUSTRALIA AND TERRITORIES OF PAPUA AND NEW GUINEA.(a)

State or Territory.	1955.	1956.	1957.	1958.	1959.
	feet.	feet.	feet.	feet.	feet.

(a) Source: Bureau of Mineral Resources, based on figures obtained from State and Territory Departments of Mines.

§ 16. Sulphur.

1. **Mine Production of Sulphur.**—There is no production of elemental sulphur (brimstone) in Australia but, although sulphur is itself non-metallic, considerable quantities are contained in certain metallic minerals produced.

It should be noted that large quantities of the lead and zinc concentrates produced are exported and the sulphur they contain is not available for utilization in Australia.

The following table shows the sulphur content of the metallic minerals produced during 1958 from which sulphur was subsequently recovered.

SULPHUR: CONTENT OF METALLIC MINERALS PRODUCED, 1958.
(Tons.)

Mineral in which contained.	N.S.W.	Q'land.	S. Aust.	W. Aust.	Tas.	Australia.
Lead concentrate..	49,559	324	2,056	51,939
Pyrite Concentrate	17,715	4,011	(a) 32,129	22,311	32,470	108,636
Zinc concentrate	130,462	(a) 10,636	19,878	160,976
Total ..	197,736	(b) 14,647	(a) 32,129	22,635	54,404	321,551

(a) Estimated. (b) Partly estimated.

The principal producing centres during 1958 were—

(i) *New South Wales.* All of the sulphur produced in New South Wales was contained in lead and zinc concentrates produced at Broken Hill and in lead, zinc and pyrite concentrates produced at Captain's Flat.

(ii) *Queensland.* In Queensland, sulphur was contained in zinc concentrate milled at Mt. Isa and in pyrite concentrate produced at Mt. Morgan. No sulphur was recovered in Australia from zinc concentrate produced in Queensland.

(iii) *South Australia.* A pyrite concentrate containing sulphur was produced from ore mined at Nairne, 22 miles east of Adelaide.

(iv) *Western Australia.* Marketable pyrite concentrates were produced at Norseman and at Kalgoorlie. Although both of these concentrates are auriferous, the gold was recovered only from that produced at Kalgoorlie. A small quantity of sulphur was contained in lead concentrates produced in the Northampton Mineral Field.

(v) *Tasmania.* A pyrite concentrate was recovered at Mt. Lyell after the prior separation of the copper sulphide mineral. Recoverable sulphur was also contained in lead and zinc concentrates milled at Rosebery, but only that contained in zinc concentrate was recovered in Australia.

The following table shows for the years 1954 to 1958 the sulphur content of minerals from which sulphur was subsequently recovered.

SULPHUR: CONTENT OF METALLIC MINERALS PRODUCED.
(Tons.)

State.	1954.	1955.	1956.	1957.	1958.

(a) Partly estimated. (b) Estimated.

2. **Production of Sulphuric Acid.** The principal use of sulphur is in the manufacture of sulphuric acid which is produced in all States and in the Northern Territory. Most of this is used for fertilizer manufacture although small quantities are used in the rubber and chemical industries and in the preparation of uranium concentrates. Sulphur contained in lead concentrate is used for acid manufacture at Port Pirie and sulphur in zinc concentrates is used at Risdon. Pyrite concentrate is used as a source of sulphur for acid manufacture at Cockle Creek, near Newcastle, and at Port Kembla in New South Wales, and at Melbourne, Brisbane, Adelaide, Perth and Fremantle. However, half of the sulphuric acid produced in Australia is made from imported elemental sulphur. The next table shows the Australian production of sulphuric acid and the quantity of sulphur in the acid produced from various sources.

SULPHUR USED IN SULPHURIC ACID PRODUCTION: AUSTRALIA.
(Tons.)

Item.	1954.	1955.	1956.	1957.	1958.
<i>Production of Sulphuric Acid (Mono.)</i>	<i>778,008</i>	<i>895,765</i>	<i>841,225</i>	<i>971,976</i>	<i>1,009,064</i>

(a) All imported.

§ 17. Non-metallic Minerals.

1. **Asbestos.**—The production of asbestos in Australia at present is only sufficient to meet about one-sixth of domestic requirements. Production in recent years has been of two types, chrysotile (white) and crocidolite (blue). The deposits of chrysotile, however, are relatively small and widely scattered, and during 1958, it was produced mainly at Nunyerry and Lionel in Western Australia and at Baryulgil in New South Wales. Production of crocidolite, which is confined to the Hammersley Ranges in Western Australia, about 200 miles south-east of Roebourne, has expanded greatly in recent years. Large scale operations were commenced there in 1943 at Wittenoom Gorge by Australian Blue Asbestos Ltd., and reserves in seams over which the company holds leases are estimated at two million tons.

The production of chrysotile and crocidolite in Australia during the five years 1954 to 1958 is shown in the following table:—

PRODUCTION OF ASBESTOS : STATES.
(Short Tons of 2,000 lb.)

Year.	Chrysotile.			Crocidolite.	
	New South Wales.	Western Australia.	Australia.	Western Australia.	Australia.
1954	690	339	1,029	4,249	4,249
1955	661	308	969	5,025	5,025
1956	697	852	1,549	8,160	8,160
1957	676	1,556	2,232	12,438	12,438
1958	712	1,543	2,255	13,313	13,313

2. **Clays.**—Statistics of clay production in Australia are not entirely satisfactory, mainly because of differences between States in the classification of the various types of clays. In addition, the statistics are somewhat incomplete as some clays are outside the normal administrative control of some State Mines Departments. In the following table, the recorded production of the main types of clays produced in each State of Australia is shown for the year 1958.

PRODUCTION OF CLAYS : STATES, 1958.
(Tons.)

Type.	New South Wales.	Victoria.	Queensland	South Australia.	Western Australia.	Tasmania.	Australia.
Bentonite and Bentonitic Clay ..	30	..	86	..	37	..	153

(a) Estimated.

(b) Not available.

(c) Incomplete.

3. **Gypsum.**—There are very extensive deposits of gypsum in Australia, but only the more accessible and easily worked deposits have been exploited. These deposits lie in four main regions, (a) in New South Wales stretching from around Griffith to near Broken Hill, (b) in the north-west corner of Victoria, the south-west corner of New South Wales and adjoining parts of South Australia, (c) in South Australia on both sides of St. Vincent Gulf and extending to Lake MacDonnell in the west, and (d) between Perth and Kalgoorlie in Western Australia. The South Australian deposits are the most important and more than half of the total Australian production of gypsum in 1958 came from that State, where the main centres of production are Stenhouse Bay on Yorke Peninsula and Lake MacDonnell.

The building industry is the main user of the gypsum produced in Australia. The greatest part is used in the manufacture of plaster and most of the remainder in cement manufacture. A small amount is also used as fertilizer. A considerable quantity is exported, mainly to New Zealand for use in the plaster industry, and to New Caledonia for use in nickel smelting operations.

The production of gypsum in Australia is set out in the following table for the five years 1954 to 1958.

PRODUCTION OF GYPSUM : STATES.

(Tons.)

Year.	New South Wales.	Victoria.	South Australia.	Western Australia.	Australia.
1954	128,790	75,012	194,772	41,142	439,716
1955	136,356	89,190	204,522	39,946	470,014
1956	94,203	78,895	263,136	27,121	463,355
1957	101,491	68,647	274,945	33,353	478,436
1958	90,664	72,010	306,749	35,515	504,938

4. **Limestone.**—Limestone is quarried in all States, being used mainly for the manufacture of cement. Other uses are in agriculture, the steel industry, as a metallurgical flux, and in the chemical industry.

The recorded statistics of limestone production in each State of Australia for the years 1955 to 1958 are shown in the following table. Details of limestone produced for use as building or road material are not included.

PRODUCTION OF LIMESTONE(a) : STATES.

('000 Tons.)

Year.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	Australia.
1955 ..	1,690	714	(b)	987	(b)	206	3,998
1956 ..	1,700	814	(b)	1,076	(b)	179	4,264
1957 ..	1,897	846	(b)	1,135	(b)	205	4,572
1958 ..	2,061	859	(b)	1,386	(b)	235	5,490

(a) Includes shell and coral.

(b) Not available for publication, included in total for Australia.

5. **Magnesite.**—The major sources of magnesite at present are deposits at Fifield and Thuddungra in central New South Wales. Most of the output of magnesite in Australia is used for refractory purposes, particularly in the steel industry, and small amounts are used in chemical, paper, glass, rubber, and ceramic industries. Particulars of the production of magnesite in each State for the years 1954 to 1958, are set out in the table below.

PRODUCTION OF MAGNESITE : STATES.

(Tons.)

Year.	New South Wales.	Queensland.	South Australia.	Western Australia.	Australia.
1954	42,825	..	235	92	43,152
1955	57,262	..	412	..	57,674
1956	63,050	..	831	804	64,685
1957	83,271	..	202	..	83,473
1958	69,030	20	341	..	69,391

6. *Mica*.—Almost all Australian production of muscovite mica comes from the Northern Territory, though small quantities of inferior grades have been obtained from most of the States. The centre of mica production in the Northern Territory is the Harts Range area about 130 miles north-east of Alice Springs, where mining has been carried on intermittently since 1892, and the Plenty River field, 50 miles north-east of Harts Range.

The Commonwealth Mica Pool, details of which are given in § 19.2 on page 1094, purchases all mica which is in accordance with certain specifications. The following table shows the quantity of muscovite mica produced in Australia during the five years 1954 to 1958.

MUSCOVITE MICA PRODUCTION.
(lb.)

Particulars.	1954.	1955.	1956.	1957.	1958.
New South Wales—					
Scrap	15,680	20,160	15,680
Queensland—					
Scrap	21,728
Northern Territory—					
Trimmed	84,619	56,649	28,837	36,713	31,391
Crude and Film	35,840
Scrap	65,184	40,600	11,088

7. *Salt*.—Salt is obtained in Australia by evaporation of saline lakes and clay pans. Production satisfies local requirements and provides a considerable surplus for export. Recorded production in South Australia (the chief producing State) is shown in the following table for the years 1954 to 1958. Estimates of total Australian production are also shown.

SALT PRODUCTION.
(‘000 Tons.)

Estimated Australian Total ..	379	369	409	428	430

8. *Other Non-metallic Minerals*.—(i) *General*. Many other non-metallic minerals are produced in Australia in considerable quantities, and are listed separately in the following paragraphs.

(ii) *Barite*. The principal centre producing first-grade quality barite is at Oraparinna in the North Flinders Range in South Australia. The production of barite in Australia during 1958 was 6,802 tons, of which 3,991 tons came from New South Wales, and 2,811 tons from South Australia.

(iii) *Diatomite*. Production of diatomite is carried on mainly in the eastern States of Australia. In 1958, 4,240 tons were produced, and of this total, New South Wales produced 3,100 tons.

(iv) *Dolomite*. Up to 1950, New South Wales was the main producer of dolomite, but in that year the Broken Hill Pty. Co. Ltd. opened up a large deposit of dolomite at Ardrossan in South Australia which now produces over 90 per cent. of the total output. In 1958, New South Wales produced 3,957 tons; Queensland, 2,779 tons; South Australia, 148,631 tons; Western Australia, 196 tons; and Tasmania, 2,585 tons, making an Australian total of 158,148 tons.

(v) *Felspar*. The main demand for felspar comes from the glass and ceramic industries. Most of the Australian production of felspar comes from New South Wales which produced 5,302 tons of the Australian total of 7,016 tons in 1958. Of the remainder, 1,033 tons came from South Australia and 681 tons from Western Australia.

(vi) *Gemstones.* (a) *Diamonds.* Gem quality diamonds are not produced in Australia but, in 1958, 158 carats of industrial diamonds valued at £2,000 were recovered during gold dredging operations on the Macquarie River in New South Wales.

(b) *Opals.* Most of the opals won in recent years came from the Coober Pedy and Andamooka fields in South Australia which produced opals worth £190,000 in 1958. Other production in 1958 was from Lightning Ridge in New South Wales, valued at £25,000, and the Quilpie district in Queensland, valued at £1,000.

(c) *Sapphires.* In 1958, sapphires produced in the Inverell District of New South Wales were valued at £1,000 and production from the Anakie Field in Central Queensland was also valued at £1,000.

(vii) *Silica.* The production of silica is not recorded in Victoria while production recorded in all other States may not be complete. The output of silica, which includes glass sand, quartz, quartzite, sand, sandstone, and silicious abrasives, but does not include production for use as building or road material, was 120,502 tons in New South Wales; 4,280 tons from Queensland; 7,552 tons in South Australia; 6,510 tons in Western Australia; and 6,639 tons in Tasmania, giving a total of 145,483 tons for those States during 1958.

(viii) *Sillimanite.* In 1958, 1,696 tons of sillimanite were produced in Australia. New South Wales contributed 863 tons and the remaining 833 tons came from South Australia.

(ix) *Talc.* The Australian output of talc (including steatite), was 15,393 tons in 1958. New South Wales produced 998 tons, South Australia 11,894 tons and Western Australia 2,501 tons.

(x) *Other.* Other non-metallic minerals produced in Australia in small quantities during 1958 were fluorite, garnet concentrate, glauconite, loam, mineral pigments, pebbles for grinding, perlite, petalite, phosphate rock, pyrophyllite, serpentine and slate.

§ 18. Oversea Trade in Minerals and Mineral Products.

Particulars of the quantity and value of the principal mineral and mineral product items imported into and exported from Australia during the years 1956, 1957 and 1958 are shown in the following table.

IMPORTS AND EXPORTS OF PRINCIPAL MINERALS AND MINERAL PRODUCTS: AUSTRALIA.

Item.	Unit of Quantity.	Quantity.			Value. (£A'000 Port of Shipment).

§ 19. Government Aid to Mining, and Mineral Control.

1. *Aid to Mining.*—(i) *Commonwealth.* (a) *Assistance to the Gold Mining Industry.* For particulars of the subsidy paid to gold producers in Australia, see para. 9, page 1058.

(b) *Rewards for Discovery of Uranium Ore.* To encourage the search for and discovery of deposits of uranium ore, the Commonwealth Government approved the granting of monetary rewards up to a maximum of £25,000 for any one deposit.

(c) *Copper Bounty.* For particulars of the bounty paid on copper sold on the Australian market, see para. 8, page 1067.

(d) *Bureau of Mineral Resources, Geology and Geophysics.* The Bureau of Mineral Resources, Geology and Geophysics has sections dealing with geology, geophysics, mining engineering, petroleum technology and mineral economics. The geological section provides geologists to conduct all surveys required in Commonwealth Territories and makes detailed and regional surveys in conjunction with or by arrangement with the State Mines Departments, surveys of possible oil-fields in Australia and New Guinea, surveys of mines for which financial assistance is sought, and investigations of deposits of radio-active minerals. The geophysical section conducts investigations throughout Australia and New Guinea connected with the search for metalliferous radio-active and other mineral deposits; investigations connected with exploration for coal, oil and water; regional magnetic and gravity surveys; engineering and military geophysics; and the operation of geophysical (magnetic and seismic) observatories. The Bureau works in close co-operation with the Mines Departments of the States. It has assumed full responsibility for geological and geophysical surveys in Commonwealth Territories, but suitable arrangements have been made to ensure that the local Administrations have the necessary technical advice directly available to them.

(e) *Diamond Drilling.* The drilling plant operated by the Bureau of Mineral Resources consists of two medium and five light prospecting drills. These drills are used mainly in connexion with the Bureau's comprehensive programme of prospecting by aerial, geological, geophysical and geochemical methods.

(f) *Search for Oil.* No variation has been made in the policy described in Official Year Book No. 37, page 850, regarding the search for petroleum throughout Australia and its Territories. In addition to its activities set out in that Year Book, the Bureau of Mineral Resources, Geology and Geophysics in Canberra tests bore cores for density, porosity, permeability and fluid content on behalf of companies engaged in drilling for oil. The Bureau also maintains three portable rotary plants for scout boring for geological information.

The Commonwealth Government has encouraged the search for oil in Australia, Papua and New Guinea; details of the efforts made are outlined in earlier issues of the Official Year Book and in § 15, Mineral Oils (p. 1084).

(g) *Ore-dressing and Mineragraphic Investigations.* These investigations are conducted by the Commonwealth Scientific and Industrial Research Organization as required by the industry. Ore-dressing investigations are carried out at the Ore-Dressing Laboratory, situated in the Department of Mining, University of Melbourne, and at the Ore-Dressing Laboratory, Kalgoorlie, situated at the School of Mines. The Mineragraphic Investigations Section is located in the Geology Department, University of Melbourne.

These two groups of laboratories perform complementary services—The Mineragraphic Investigations Section assesses microscopically the state of dispersion and the mineral association of ore bodies while the Ore-Dressing Laboratories investigate the composition of ores and provide advice on suitable methods for their full-scale treatment. Much of this research is carried out on a co-operative research basis with the mining industry.

(ii) *States.* (a) *General.* In addition to free assays and determinations of rocks and minerals carried out for prospectors by the Mines Departments of the States and Territories, technical officers of these departments provide advice to the mining and allied industries where required, carry out field examinations of mining prospects, advise on exploration and development, select sites for water supply, and in general give a free technical service to the mining industry.

(b) *New South Wales.* State aid to assist metalliferous mining may consist of grants to assist the prospecting and/or mining for gold and minerals and for the purchase, removal and installation of mining plant or equipment.

(c) *Victoria.* Loans may be granted to assist prospecting and development or the purchase of machinery. The Mines Department has stamp batteries in different parts of the State to crush ore for prospectors at nominal rates. Small mining companies may avail themselves of these facilities. Drilling with diamond, rotary and percussion drills is carried out by the Mines Department for mining companies and for general mineral exploration. A survey of the State's underground water reserves is in progress, in conjunction with the opening up of town water supplies from underground sources for which new deep-drilling equipment has been obtained.

(d) *Queensland.* Various forms of assistance to mining are made available by the Queensland Department of Development and Mines. Grants are made from the Consolidated Revenue Fund for use on construction and maintenance of roads in mining areas. Advances are made from the Gold Mining Encouragement Fund for mining development work. This assistance is restricted to gold mines and advances are repayable from proceeds of the mine, if any. From the Assistance to Metalliferous Mining Fund, plant, such as jackhammers, compressors and pumps, is purchased and maintained. Such plant is made available on hire, the rental payments being credited back to the fund. Prospecting assistance is made available in approved cases, the rates being £2 10s. per week for a single man and £3 10s. per week for a married man with dependants. This is not repayable. From the Advances to Mining Fund, assistance by way of subsidy is advanced for mine development. Such is repayable from proceeds of the mine. The Department also maintains a treatment works for tin ores, etc., at Irvinebank, an assay office at Cloncurry, and diamond-drilling plants in several parts of the State. The Venus State mill at Charters Towers is available for the treatment of gold-bearing ores.

(e) *South Australia.* The Department of Mines provides the following services and facilities to the mineral industry:—(i) Hire of boring plant and mining equipment; boring and testing of mineral deposits; financial subsidies in approved cases for prospecting and mining development; development of sub-surface water supplies for farming, pastoral, irrigation and mining purposes; purchase of basic metal ores from prospectors. (ii) Geological examination of mineral deposits, water supply, dam foundation and drainage problems; guidance on mining legislation; publication and issue of geological bulletins and maps. Through the Australian Mineral Development Laboratories, chemical and metallurgical analytical and assay investigations; testing and treatment of ores and minerals; petrographic, mineragraphic and radiometric determinations. Pilot scale metallurgical and chemical treatment plants are maintained and operated for the development of mineral extraction processes.

(f) *Western Australia.* Assistance is given to prospectors to the extent of £5 a week south of the 26th parallel of latitude, and of £6 a week north of that parallel; also provision is made of some tools required for prospecting.

There are twenty State batteries operating throughout the gold-fields for the treatment of ore from prospectors and small mine-owners, at a nominal charge. A cartage subsidy is also granted to such operators sending ore to State batteries for treatment.

Provision is made for loans to mine-owners who require assistance to develop mines. The Government also has a drilling scheme, financing mine-owners on a £1 for £1 basis.

(g) *Tasmania.* The Department of Mines provides financial assistance to mining lessees for the purchase of plant and machinery, for sinking, repairing or dewatering of shafts, for construction of dams and water races, for testing and proving a deposit of any mining product, for developmental work and for diamond and other types of drilling. The Department has available for hire percussion and diamond drills for exploration, as well as a complete plant for small shaft sinking and tunnelling. Other assistance is rendered to the industry by geological and engineering advice and through ore-dressing research into metallurgical recoveries and the selection and design of treatment plant.

(h) *Northern Territory.* In order to encourage the development of the mining industry, the Northern Territory Administration has erected Government batteries at Tennant Creek, Hatches Creek, and Maranboy for the treatment of miners' ores. The Tennant Creek battery is the only one now in operation. After reconstruction, it was re-opened for public crushing in October, 1958, and has been fully employed since that date. The re-opening of the Hatches Creek and Maranboy batteries will depend on the revival of small scale wolfram and tin mining, respectively, in these areas. The crushing charges are subsidized by Government grants. In addition, the Administration provides cartage subsidies and financial advances to encourage miners to carry out developmental work. Roads and water supply services are provided and maintained for mines under active development throughout the Territory.

2. **Control of Minerals.**—(i) *Mica Production.* The Commonwealth Mica Pool purchases mica won in the Harts Range and Plenty River mica fields, Northern Territory, thus ensuring the miners a ready market for their output at fixed prices and also permitting an orderly distribution of mica to the trade. The Pool is controlled by a Committee of Management consisting of representatives of the Commonwealth Government, producers and consumers.

(ii) *Control of Exports of Metals and Minerals.* Certain metals and minerals produced in Australia are subject to export control for one or more of the following reasons:—

- (a) the necessity of conserving resources;
- (b) the inadequacy of local production to fulfil domestic demand;
- (c) the strategic importance of the minerals.

Minerals and metals subject to export control include iron ore; manganese ore; beryllium ores, concentrates and metal; monazite; uranium ore, concentrates, residuals and metal. Mixed concentrates of beach sand minerals are prohibited exports but the major constituent minerals (rutile, zircon and ilmenite) may be exported.

(iii) *Radio-active Minerals.* Since the discovery of the possibility of using atomic energy, considerable attention has been paid to the occurrence of uranium in Australia. To encourage the search for and discovery of deposits of uranium ore, the Commonwealth Government grants monetary rewards for such discoveries.

The Bureau of Mineral Resources is carrying out ground and airborne geophysical surveys and geological surveys and diamond drilling operations, with a view to discovering further deposits and to assessing the value of known deposits.

During 1953, Commonwealth Legislation was enacted to set up an Atomic Energy Commission which is responsible, in an overall sense, for the production and utilization of uranium in Australia. This Act, the Atomic Energy Act of 1953, supersedes the Atomic Energy (Control of Materials) Act of 1946, but retains a provision of that Act which provides for control of substances which could be used for production or use of atomic energy. It gives the Commonwealth power to acquire such substances in their natural state and in waste materials from mining operations, to carry on mining and other operations necessary for the recovery of such substances, and to pay compensation for such acquisition. It also gives the Commonwealth power to obtain possession of such substances held by any person.

Further reference to the Atomic Energy Commission appears in Chapter XXX.—Miscellaneous.

CHAPTER XXVIII.

DEFENCE.

§ 1. Department of Defence.

1. **Functions and Organization.**—(i) *Functions.* Subject to the authority of Cabinet, the Minister and Department of Defence are responsible for:—

- (1) The formulation and general application of a unified defence policy relating to the Defence Forces and their requirements, including:—(a) co-operation in British Commonwealth and regional defence and the defence aspect of the Charter of the United Nations; (b) the supply aspect of defence policy, including the review of production programmes and capacity; (c) the scientific aspect of defence policy; and (d) the financial requirements of defence policy, and the allocation of funds made available.
- (2) The defence aspect of armistice and peace terms, control commissions, and forces of occupation.
- (3) Matters of policy or principle and important questions having a joint Service or inter-departmental defence aspect.
- (4) The defence aspect of questions relating to the organization and machinery for:—(a) co-operation in British Commonwealth defence; (b) co-operation in regional security, including obligations under the United Nations Charter; (c) higher direction in war; and (d) higher direction of the Services.
- (5) The Commonwealth War Book, which is a summary of national plans for an emergency as developed in departmental war books.
- (6) The administration of inter-Service organizations, such as the joint intelligence machinery.
- (7) The defence aspect of:—the strength and organization of the forces, higher appointments in the Services, honours and awards.
- (8) Advice on the military aspect of civil defence.

(ii) *Organization, higher defence machinery and the control of the joint Service machinery.* The joint Service and inter-departmental advisory machinery of the Department consists of various committees headed by the Defence Committee, the Chiefs of Staff Committee, the Defence Administration Committee and the Joint War Production Committee.

The Defence Committee is a statutory body consisting of the Secretary, Department of Defence, who is Chairman of the Chiefs of Staff Committee, the Chiefs of Staff of the three Services, the Secretary, Prime Minister's Department, the Secretary, Department of External Affairs, and the Secretary to the Treasury. Its function is to advise the Minister for Defence on—

- (a) The defence policy as a whole and also to co-ordinate military, strategic, economic, financial and external affairs aspects in framing defence programmes.
- (b) Matters of policy or principle and important questions having a joint Service or an inter-departmental defence aspect.
- (c) Such other matters having a defence aspect as are referred to the Committee by or on behalf of the Minister for Defence.

The Chiefs of Staff Committee meets regularly for the discussion of technical matters on a joint service basis, and is responsible in peace for the preparation of strategic appreciations and military plans. The functions of the Defence Administration Committee, in addition to the regular review of the progress of the Defence Programme, relate to the co-ordination and integration of Service activities and the improvement of methods and organization. The function of the Joint War Production Committee is, briefly, to examine the relation between strategic plans and their requirements to ensure that the war potential for them exists. The major committees subordinate to the Defence Committee and/or the Chiefs of Staff Committee comprise the Principal Administrative Officers Committee (Maintenance and *Matériel*), the Principal Administrative Officers Committee (Personnel), the Defence Research and Development Policy Committee, the Joint Planning Committee, the Joint Intelligence Committee and the Joint Administrative Planning Committee.

(iii) *Defence Business Board.* The Defence Business Board furnishes advice on business matters of common interest to the three Services, or important subjects on which the collective advice of the Board is desired from the business aspect, with a view to promoting efficiency and economy in the execution of the Defence Programme. The Board comprises businessmen who serve in a part-time honorary capacity and consists of an independent chairman and deputy chairman and the business advisers of the three Service Departments.

2. Basis of Current Defence Policy.—The main strategic factors affecting current defence policy may be summarized as follows:—

(i) Because of the nuclear deterrent, the outbreak of limited or local wars is more likely than a global or full-scale war.

(ii) In any likely war in the foreseeable future, Australia's interests will most likely be centred in South East Asia, which is its first line of defence.

(iii) The defence of South East Asia and Australia is to be sought through the concept of collective security. Australia attaches the greatest importance in defence policy and planning to participation in the collective defence arrangements developed in its area of strategic interest—SEATO, ANZUS and British Commonwealth arrangements for defence co-operation. Such arrangements are entirely in accord with the United Nations Charter.

3. The Defence Programme.—(i) *Programme.* The level of national defences must be adequate to enable Australia to meet her regional and home defence responsibilities. The proportion of national resources that can be allotted to defence is, however, affected by the concurrent demands of the programmes of national development, industrial expansion and migration, which add to our basic defence capacity. A comprehensive review of defence policy was undertaken in 1959, and a new three year defence programme to June, 1962, was approved. The new programme is designed to meet present strategic requirements and has, as its primary aim, the continual improvement of the ability of the Australian forces to act swiftly and effectively, in co-operation with allied forces, to meet limited or local war situations. Emphasis is placed in the new programme on two major points: First, to have the forces, both regular and citizen, more readily available than they have been in the past; secondly, to provide them with modern equipment, in greater quantity and more varied type. Equipment used by the Australian forces will be standard or compatible, as far as possible, with that used by United States forces, with whom they are associated in defence arrangements.

Australia has a modern and efficient Naval Force in which special emphasis is being placed on anti-submarine capabilities. The naval construction programme of four new type anti-submarine frigates is being continued, and possible new naval projects are being further examined. The operational fleet comprises an aircraft carrier, three Daring class ships, three fast anti-submarine frigates, training and survey ships and miscellaneous small craft.

Important decisions have been taken on Army organization which will improve considerably the availability and operational effectiveness of the Australian Army, both regular and citizen forces. The Army is to be composed entirely of volunteers, and the combat elements will be based on the new pentropic division, which will give greater flexibility and mobility to meet modern war conditions in tropical areas. There will be two divisions of five battle groups each, comprising two regular and eight Citizen Military Force battle groups, in addition to the regular battalion group in Malaya. Some £30 million is being provided in the programme for modern Army equipment, including the F.N. rifle, the United States 105 mm. howitzer, a general purpose machine gun and a new recoilless rifle. Other modern weapons and armoured vehicles are to be obtained, and provision is made to increase the mobility of the Army with light aircraft support (both fixed and rotary wing) and amphibious and water craft.

The R.A.A.F. has 12 operational squadrons, and the fighter squadrons are being re-armed with the Sidewinder air-to-air missile. The maritime element will be greatly strengthened by the acquisition of 12 P.2.V.7 Neptune aircraft, and the British Bloodhound surface-to-air guided weapons system will be purchased. Helicopters will be obtained for joint Army and Air Force use, and provision is also made for commencement in the programme period of the acquisition of a new fighter aircraft.

In the field of research and development, Australia is making its principal contribution through the Long Range Weapons Establishment which is a joint United Kingdom—Australian effort for the testing of guided weapons. The executive authority for this project is the Department of Supply which is also responsible for the provision of the material requirements of the forces including the manufacture and supply of munitions and aircraft.

The estimated cost of the defence programme for 1959–60 was £192.8 million.

(ii) *Financial.* Details of defence expenditure for 1958-59 and the allocation of the Defence Vote for 1959-60 are set out in the two tables which follow:—

ALLOCATION OF DEFENCE VOTE OF £192,800,000 FOR 1959-60.
(£'000.)

Service or Department.	Maintenance.	Capital Material Requirements, Machinery, Plant and Equipment.	Capital Buildings, Works and Acquisition of Sites.	Total Expenditure.
Defence	1,194	42	22]	1,258
Navy	33,030	7,986	1,596	42,612
Army	52,740	8,894	3,920	65,554
Air	42,283	13,398	4,480	60,161
Supply	13,862	2,395	4,729	20,986
Other Services	1,435	84	710	2,229
Total	144,544	32,799	15,457	192,800

DEFENCE EXPENDITURE, 1958-59.
(£'000.)

Service or Department.	Maintenance.	Capital Material Requirements, Machinery, Plant and Equipment.	Capital Buildings, Works and Acquisition of Sites.	Total Expenditure.
Defence	963	14	30	1,007
Navy	32,289	7,670	1,472	41,431
Army	49,479	11,878	3,954	65,311
Air	41,764	13,127	4,632	59,523
Supply	14,569	2,373	4,019	20,961
Other Services	861	2	212	1,075
Total	139,925	35,064	14,319	189,308

(iii) *Personnel Strengths.* The personnel strengths of the Services at 31st December 1959 were:—

Category.	Navy.	Army.	Air Force.	Total.
Permanent Forces	(a) 10,578	21,843	15,320	47,741
Citizen Forces—				
Volunteers	(b) 7,670	21,923	880	30,473
National Service Personnel	33,197	..	33,197
<i>Total Citizen Forces</i>	(b) 7,670	55,120	880	63,670
Total Permanent and Citizen Forces	18,248	76,963	16,200	111,411

(a) Excludes 16 cadet midshipmen not on pay. (b) Excludes 2,672 National Service Trainees who have completed training and are held on reserve and 162 nominal reservists.

4. *Australian Forces Serving in Malaya.*—Australia has participated with the United Kingdom and New Zealand in the Commonwealth Strategic Reserve in Malaya since it was first established in 1955. At the request of the Government of the Federation of Malaya, the Strategic Reserve continues to be stationed in that country and to assist in the campaign against the communist terrorists.

5. *National Service.*—The National Service training scheme came into active operation in May, 1951 but was suspended in November, 1959. Its principal features are given below.

The liability to register extended to virtually all male persons ordinarily resident in Australia who attained the age of 18 years on or after 1st November, 1950. The only persons exempt from this liability were members of the permanent forces, aboriginal natives of Australia, and certain diplomatic personnel and officials in the service of international bodies. In all, twenty successive age-groups were called upon to register, the first in May, 1951, and he last in July, 1959. When operations were suspended, a total of 527,224 young men had registered.

All persons registered or required to register incurred the liability to render service but after registration exemption could be granted to theological students, ministers of religion, members of religious orders, conscientious objectors and registrants suffering from certain prescribed physical or mental disabilities. Registrants not entitled to exemption remained liable for call-up in one of the three Services provided they attained the required standard of medical fitness. The actual training obligation was 140 days in the Citizen Military Forces but 154 days in the Citizen Naval Forces or the Citizen Air Force. In addition, trainees were required to remain members of the Citizen Forces, Military, Naval or Air as the case may be, for five years from the date of their enlistment.

Temporary deferment of call-up could be granted to students and apprentices so as to avoid undue interruption to their studies or trade training and to registrants able to establish before a court that the rendering of service would cause exceptional hardship to themselves, their parents or dependants. In 1955, provision was made to defer the call-up of registrants living outside approved C.M.F. training centres and of rural workers engaged permanently and full-time on a rural holding in the production of food or raw materials.

In 1957, a new selection procedure was introduced in the form of a ballot conducted for each new age-group called upon to register. Registrants selected by ballot remained available for call-up subject to medical fitness and the existing rules and procedures for exemption or deferment. Those not selected were granted indefinite deferment but were given the opportunity to volunteer for training and, if accepted as volunteers, were called up in the normal way. Training, hitherto given in all three Services, was restricted to the Army and the total annual intake was reduced from 34,000 to 12,000. The active Army training obligation remained at 140 days to be carried out in one continuous period of 77 days followed by 21 days part-time training in each of the ensuing three years. The requirement to remain on the reserve of the Citizen Military Forces for five years after enlistment remained unchanged.

In all 227,021 registrants were called up for training, 6,967 in the Navy, 22,267 in the Air Force and 197,787 in the Army.

Provision was made for protection in respect of civil employment, notably with regard to reinstatement in civilian employment after completing a period of training, of registrants called up for service.

§ 2. Naval Defence.

1. **Administration.**—The Royal Australian Navy is administered, under the Naval Defence Act 1910–1952, by the Naval Board, which consists of the Minister for the Navy, four Naval Members, and the Secretary, Department of the Navy.

2. **Historical.**—Prior to 1901, naval defence systems were organized under the State Governments. Information regarding these systems is given in Official Year Book No. 2, page 1084. An outline of the development of Australian Naval policy is given in Official Year Books No. 3, page 1060, and No. 12, page 1012. An account of the building of the Australian Navy, its cost, the compact with the Imperial Government, and other details appears in Official Year Book No. 15, pages 921–23. The growth and the activities of the Royal Australian Navy during the 1939–45 War are shown in Official Year Book No. 36, pages 1023–27.

3. **Link with the Royal Navy.**—Strong links with the Royal Navy are maintained by a constant exchange of officers for extended tours of duty, and by a full exchange of information and ideas. A liaison staff is maintained by the Royal Australian Navy in London, and by the Royal Navy in Australia. Advanced training and staff courses in the United Kingdom are provided by the Royal Navy for Royal Australian Navy Officers.

4. **Strength of the Fleet.**—Ships in commission at June, 1960, were:—

H.M.A. Fleet.

- 1 Aircraft carrier.
- 3 Destroyers.
- 3 Fast Anti-submarine frigates.
- 5 Frigates.
- 7 Auxiliary vessels.

5. **Personnel.**—The authorized establishment strength of the Royal Australian Navy has been pegged at 12,800 comprising 1,430 officers and 11,370 ratings. At 31st December, 1959, the actual strength of the Naval Forces, permanent and reserves, serving full-time, was 1,251 officers and 9,008 ratings including 99 native ratings of the Papua and New Guinea Division of the Royal Australian Navy. 59 cadet midshipmen were undergoing training at the Naval College. 13 officers and 263 ratings were serving in the Women's Royal Australian Naval Service. Reserve strength comprised 1,178 officers and 9,326 ratings, serving part-time.

6. **Women's Royal Australian Naval Service.**—The established personnel strength of the W.R.A.N.S. is 14 officers and 370 ratings. They serve in the shore establishments in the following categories: Radio-operators, Regulating, Writers, Stores Assistants, Sick Berth Attendants, Motor Transport Drivers, Wrans (Radar Plot), Cooks and Stewards.

7. **Reserve Training.**—Members of the Royal Australian Naval Reserve carry out limited training at night or on Saturday afternoons, plus 13 days annual continuous training; engagements are for 3 years and pay is approximately that of the Permanent Naval Forces. Special courses and service of longer duration are available to selected members. The Royal Australian Fleet Reserve consists of former ratings of the R.A.N., R.N., or a Dominion Navy whose obligation to perform training is determined by the length of their permanent naval service.

8. **Fleet Air Arm.**—The Fleet Air Arm of the Royal Australian Navy maintains two front line squadrons, embarked in the operational carrier, H.M.A.S. *Melbourne*. This ship is fitted with an angled deck, steam catapult and mirror deck-landing sights. Training and support squadrons for H.M.A.S. *Melbourne's* Sea Venom jet all-weather fighter and ground attack aircraft and Gannet turbo-prop anti-submarine aircraft are based at the Naval Air Station H.M.A.S. *Albatross* at Nowra, New South Wales.

9. **Ship Construction and Repair.**—Provision is made for the maintenance in Australia of a ship construction and repair industry capable of rapid expansion in war. Under the present programme, two anti-submarine frigates are fitting out and two more of the same type are under construction.

Two general purpose vessels and one sea-air rescue craft are also under construction.

10. **Naval College.**—The Royal Australian Naval College, transferred from Jervis Bay, A.C.T., to Flinders Naval Depot in 1930, was re-established at Jervis Bay in January, 1958, and was commissioned as H.M.A.S. *Creswell*.

11. **Training Establishments.**—Flinders Naval Depot, at Crib Point, Westernport, Victoria, is the basic training establishment for ratings in the permanent forces, while several advanced training schools are established in Sydney, New South Wales. The Apprentice Training Establishment at Quaker's Hill, New South Wales, provides secondary education as well as training in trades in which the lads will be employed during their service in the Royal Australian Navy. Introduction of junior recruits training will be effected at Fremantle, Western Australia, during the latter half of 1960. A large proportion of instructional hours will be devoted to school subjects, and the remaining instructional time to basic naval training and disciplinary training, so that on leaving the junior recruits training, ratings will be ready to undergo technical and specialist courses.

12. **The Australia Naval Station.**—Defined limits of the Australia Station are as follows:—

Eastern—

From 3° 30' North, 169° East, south to 1° South, thence east to 170° East, thence south along this meridian to 30° South, thence to 45° South, 160° East, thence south along this meridian.

Northern—

From 3° 30' North, 169° East, west to 125° East, thence south to the Coast of Celebes, thence west along the Coast of Celebes to 120° East, thence south along this meridian to 10° South, thence west to 78° East.

Western—

From 10° South, 78° East, south along this meridian.

13. *Ships Service Outside Australian Waters.*—During the year ended June, 1960, H.M.A. Ships *Melbourne*, *Anzac*, *Tobruk*, *Voyager*, *Quickmatch* and *Queenborough* served on the Far East Station as units of the Commonwealth Strategic Reserve with headquarters at Singapore. H.M.A. Ships *Vampire*, *Swan* and *Gascoyne* made visits beyond the limits of the Australia Station.

14. *Papua and New Guinea Division of the Royal Australian Navy.*—A Papua and New Guinea Division of the Royal Australian Navy, consisting of native ratings, was inaugurated in July, 1951, as a separate part of the Permanent Naval Forces for employment in Papua and New Guinea and adjacent waters.

15. *Ships of the Royal Australian Navy.*—The following ships were in commission or in reserve in June, 1960:—

SHIPS OF THE ROYAL AUSTRALIAN NAVY, JUNE, 1960.

Vessel.	Description.	Displacement.
In Commission—		Tons.
<i>Melbourne</i>	Aircraft Carrier	15,680
<i>Vampire</i>	Destroyer	2,789
<i>Vendetta</i>	"	2,789
<i>Voyager</i>	"	2,801
<i>Queenborough</i>	Frigate	2,020
<i>Quiberon</i>	"	2,020
<i>Quickmatch</i>	"	2,020

(a) Commissions June, 1961.

§ 3. Military Defence.

1. *State Systems.*—A detailed historical account of the Australian defence forces prior to federation appears in Official Year Book No. 2, pages 1075-80. *See also* Official Year Book No. 12, page 999.

The strength of the military forces of the States at 31st December, 1900 (the eve of federation) was:—New South Wales, 9,338; Victoria, 6,335; Queensland, 4,028; South Australia, 2,932; Western Australia, 2,696; Tasmania, 2,024; total for Australia, 27,353. This total is exclusive of cadets, reservists and rifle club members.

2. *Commonwealth Systems.*—(i) *General.* Under the terms of the Constitution Act 1900, the Commonwealth took over control of defence matters in March, 1901. The growth of the Commonwealth Military Forces may be considered to have taken place in sixteen phases. For particulars of the phases which cover the period from the welding together of the military forces of the States into one homogeneous army in 1902 up to the decision to increase the training strength of the militia to 70,000 in the year before the 1939-45 War (phases 1-7), *see* Official Year Book No. 36, and earlier issues.

Phases 8-10, covering the period immediately prior to, and just following, the outbreak of the 1939-45 War, relate to the initial steps necessary to put the Australian Military Forces on a war-time basis, and to its organization into commands.

The eleventh phase, in January, 1942 was the division of Northern, Eastern and Southern Commands into separate commands and base headquarters to handle operational and administrative matters respectively, and the twelfth phase was the revision of the machinery for command administration of lines of communication areas. The thirteenth phase was the appointment of Lieutenant-General Sir Iven Mackay as G.O.C.-in-C. Home Forces commanding the forces in Northern, Eastern and Southern Commands. The fourteenth phase covered the period following the outbreak of war with Japan and the entry of United States of America Forces into the South-West Pacific Area, and related to the appointment of General Sir Thomas Blamey as Commander-in-Chief, Australian Military Forces, the cessation of the Military Board and the replacement of the system of commands and bases by the field army and lines of communication areas. In March, 1943, First and Second Armies took over from Queensland, New South Wales and Victoria Lines of Communication Areas the command of all coast and static anti-aircraft artillery defences and training establishments. On 16th June, 1944, Western Command was re-established and took over the combined responsibilities of Third Australian Corps and Western Australia Line of Communication Area.

The fifteenth phase was the re-introduction in March, 1946, of the Military Board and the organization of commands and military districts, and the sixteenth phase was the commencement of the National Service Training Scheme in August, 1951 (*see* para. 5 p. 1097 and sub-para. (iv.) (c) p. 1102).

For greater detail on phases 8-14, *see* Official Year Book No. 38 and earlier issues.

(ii) *Population of Military Age, 30th June, 1959.* The following particulars show the estimated numbers of males of military age in the population of Australia as at 30th June, 1959. The total number of cadet age, 14 and under 18, was 319,968; of citizen soldier age, 18 and under 26, 535,392; and 26 and under 35, 675,309; making a total of 1,210,701 aged 18 and under 35, which is considered the best period for military service. In addition, there were 1,549,462 males 35 and under 60 in Australia at 30th June, 1959.

(iii) *Allotment of Units.* Under the Command Organization (*see* above), units are raised on a territorial basis, each State supplying its proportion of the personnel required for the fighting services.

The organization at 30th June, 1959, was as follows:—

Command Organization	..	Army Headquarters.
Northern Command	..	All formations and units in the Command.
Eastern Command	..	All formations and units in the Command.
Southern Command	..	All formations and units in the Command.
Central Command	..	All formations and units in the Command.
Western Command	..	All formations and units in the Command.
Tasmania Command	..	All formations and units in the Command.
Northern Territory Command	..	All formations and units in the Command.

Commands conform generally to state boundaries as follows:—Northern Command, Queensland; Eastern Command, New South Wales; Southern Command, Victoria; Central Command, South Australia; Western Command, Western Australia; Tasmania Command, Tasmania; and Northern Territory Command, Northern Territory; New Guinea is the responsibility of Northern Command.

(iv) *Military Training Systems.* (a) *General.* Particulars of the Military training systems in operation prior to the 1939–45 War, first on a compulsory basis and later voluntary, will be found in Official Year Book No. 38 and earlier issues.

The current plan for the Australian Regular Army provides for an average of 21,000 full time duty personnel, plus 4,700 civilians and a Citizen Military Force of 30,000 volunteers in peace. The A.R.A. order of battle comprises an infantry brigade group, and its logistic support force, a battalion group serving in Malaya, a battalion of the Pacific Islands Regiment, and appropriate headquarters and administrative staffs, maintenance and training units. The C.M.F. order of battle is designed to provide for six infantry brigade groups with appropriate combat and logistic support elements. A further proposal designed to increase the efficiency of the Army in modern conditions is currently under consideration. This relates to a reorganization of the operational units in the order of battle both A.R.A. and C.M.F. on lines similar to the United States Army which is based on the pentomic division comprising five strong battle groups, instead of the division—brigade—battalion structure.

(b) *The Australian Cadet Corps.* The Australian Cadet Corps is a voluntary organization comprised of School Cadet units. It serves as a training ground to provide, to some extent, the future officers and non-commissioned officers of the Australian Military Forces, and, as such, occupies a foremost position in the scheme of national defence. School Cadet units are raised at educational establishments throughout the Commonwealth, except in the Northern Territory. The minimum age for enrolment is the year in which the applicant reaches the age of 14 years, and cadets, who in the large majority of schools receive a free issue of A.M.F. pattern uniform, may remain in the Cadet Corps until they cease to be pupils of the educational establishments concerned. A few units retain their own pattern school uniform and are not issued with A.M.F. pattern uniforms. Provision is made for the appointment of officers, cadet under-officers, warrant and non-commissioned officers on an authorized establishment scale from within school units. School Cadet units may be, and in many cases are, affiliated with Citizen Military Force units.

The establishment of the Corps is 33,500 all ranks, and at 30th September, 1959, comprised 279 School Cadet units with a posted strength of 32,460 all ranks.

(c) *National Service Training Scheme.* The Scheme introduced on 14th July, 1950, has been suspended and no further call up of trainees is planned. National Servicemen serving part time with Citizen Military Force units were however required to continue serving until 30th June, 1960, after which they had no further training obligation, unless they volunteered.

(v) *Women's Services.* In July, 1950, approval was given for the enlistment of women into the Australian Regular Army on a limited scale. Enlistment into the Royal Australian Army Nursing Service commenced in November, 1950, and into the Australian Women's Army Corps early in 1951. In February, 1951, the Royal Australian Army Nursing Service became a Corps and was designated the Royal Australian Army Nursing Corps (R.A.A.N.C.). During June, 1951, the Australian Women's Army Corps was redesignated the Women's Royal Australian Army Corps (W.R.A.A.C.). The Women's Services in the Australian Regular Army now comprises two Corps only.—

(a) Royal Australian Army Nursing Corps.

(b) Women's Royal Australian Army Corps.

Women's Services are incorporated in the Citizen Military Forces and one company of the Women's Royal Australian Army Corps is located in each Command excluding Northern Territory Command. One Company of the Royal Australian Nursing Corps is located in each Command excluding Northern Territory Command and Tasmania Command.

(vi) *Korea*. On 2nd August, 1950, the Commonwealth Government announced its decision to raise and dispatch to Korea one infantry battalion as part of Australia's contribution of military assistance to the United Nations. 3rd Battalion, The Royal Australian Regiment stationed in Japan, brought up to strength by special enlistments flown to Japan from Australia, became the Special Korean Force. 3rd Battalion, The Royal Australian Regiment, sailed from Japan on 27th September, 1950, for Korea, where it joined 27th British Brigade, later designated as 27th British Commonwealth Brigade. For its gallantry on 24th and 25th April, 1951, 3rd Battalion was awarded the United States Presidential Citation by the President of the United States of America. On the 4th October, 1951, the Commonwealth Government announced that a second infantry battalion would be sent to Korea to join 3rd Battalion. On 3rd March, 1952, 1st Battalion, The Royal Australian Regiment, which had been brought up to strength at Ingleburn (N.S.W.), embarked for Japan where it was equipped before moving to Korea. 1st Battalion joined 3rd Battalion now under operational control of 28th British Brigade, 1st Commonwealth Division, on 1st June, 1952. 2nd Battalion, the Royal Australian Regiment, after training at Puckapunyal, Victoria, relieved 1st Battalion in Korea on 21st March, 1953, the latter battalion returning to Australia. 2nd Battalion was relieved by 1st Battalion and returned to Australia in April, 1954, while 3rd Battalion returned to Australia in November, 1954. Following a reduction in the size of the British Commonwealth contribution to the United Nations Force in Korea and the decision to close the British Commonwealth Base in Japan, 1st Battalion was withdrawn from Korea on 24th March, 1956, and the Australian Army's contribution to the theatre was reduced to 90 all ranks. During 1957, the Australian Army's component in the theatre was progressively withdrawn except for two members with the Commonwealth Liaison Mission.

(vii) *Malaya*. On 1st April, 1955, the Commonwealth Government announced its decision to dispatch troops to Malaya as an Australian component of the British Commonwealth Far East Strategic Reserve. 2nd Battalion, Royal Australian Regiment, and 105th Field Battery, Royal Australian Artillery, and other minor units embarked from Australia on 6th October, 1955, and disembarked at Penang on 20th October, 1955. Since then an infantry battalion group and certain other personnel with integrated units have been stationed in Malaya, and this force has been relieved every two years or so. Members of minor units, and those posted to integrated units are replaced individually as necessary. The 1st Battalion Royal Australian Regiment, and 101st Field Battery Royal Australian Artillery are at present stationed in Malaya.

(viii) *The Staff College*. Until 1938, the training of staff officers was carried out in the various Military Districts throughout Australia, except in cases where officers were selected from time to time to attend courses abroad. In 1938, an Australian Command and Staff School, located in the original Officers' Mess at Victoria Barracks, Sydney, was established. Between 1939 and 1945, the training of staff officers was carried out under varying conditions by different schools in accordance with the changing needs of the war.

Early in 1946, the Staff School (Australia) was established at Seymour in Victoria and re-designated the Staff College in conformity with other Empire training establishments for training officers for command and staff appointments. The College was later moved to Queenscliffe, Victoria, where it is at present situated. The courses are of ten months' duration and are held from January to November each year. The normal intake is 40 students and on successfully completing the course, an officer is awarded the symbol "psc". The course is designed to train selected officers for war, and in so doing to fit them for Command or Grade II. staff appointments. Each course includes, among the students, Army representatives of the United Kingdom and other Dominions and countries.

Included in the 1960 course are students from the United Kingdom, Canada, New Zealand, India, Pakistan, Ceylon, United States of America, Thailand, Malaya, the Philippines and Burma. Vacancies on each course are reserved also for officers who may be nominated by the Royal Australian Navy, the Royal Australian Air Force and the Commonwealth Public Service.

In order to ensure common standards in tactical doctrine and staff and command training throughout the British Commonwealth, liaison is maintained with other Staff Colleges, and to this end, there is also a reciprocal exchange of instructors between the United Kingdom and Australia. An instructor is now also provided by New Zealand. To this extent, it may be said that the Staff College is imperial in character.

(ix) *The Royal Military College*. The Royal Military College was established in 1911 at Duntroon in the Australian Capital Territory for the purpose of providing trained officers for the Army. The conditions of entry are laid down in the Royal Military College

Regulations and provide for admission by "normal", "service", and "special" entries. The length of the "normal" course is four years; "service" entry cadets attend for three years; and "special" entries for one year.

While at the College, Staff Cadets are wholly maintained, and, in addition, are paid the following weekly rates, which include 17s. 6d. a week clothing allowance:—1st year £6 10s. 8d; 2nd year £6 19s. 5d.; 3rd year £7 15s. 2d.; 4th year £9 19s. 6d. An additional 3s. 6d. a week is payable when cadets reach 18 years of age. The course of instruction is organized into military and civil departments and the instructional staff comprises officers of the army and civilian professors. On graduation, cadets are appointed lieutenants in the Australian Regular Army. The College also trains New Zealand cadets for commissions in the New Zealand Permanent Forces under an agreement made with the Government of that Dominion.

(x) *The Officer Cadet School.* The Officer Cadet School was established in 1951 at Portsea, Victoria, for the purpose of speeding up the production of junior regimental officers for the Australian Regular Army. Serving members of the Australian Regular Army, the Citizen Military Forces, National Servicemen, and civilians between the ages of eighteen and twenty-three years are eligible to apply for entrance. The course is of 44 weeks' duration, and on graduation, cadets are appointed second-lieutenants in the Australian Regular Army. They then normally proceed to further training at the Army School of the Arm or Service to which they have been allotted before being posted to regimental duties.

(xi) *The Women's Royal Australian Army Corps School.* The W.R.A.A.C. School, established in 1952 at Mildura, Victoria, moved to Mosman, New South Wales in 1958. It has two wings, one whose primary task is the training of officer cadets for the W.R.A.A.C. the other being for the training of non-commissioned officers at all levels and for other special courses. The officer cadets are selected from eligible applicants, who may be serving members between 21 and 32 years of age, or civilians between 21 and 30 years of age. The course is of six months' duration and, on graduation, cadets are appointed lieutenants in the Women's Royal Australian Army Corps.

(xii) *The Army Apprentices' School.* The Army Apprentices' School was opened in 1948 at Balcombe, Victoria, with the aim of training youths as skilled tradesmen for the Australian Regular Army, and to form a background for an Army career with prospects of promotion. The course is open to boys between the ages of 15 and 17 years and provides training in a number of highly skilled trades. A three-year course of intensive theoretical and practical work at the Apprentices' School is followed by one year in an appropriate Army workshop or technical unit. At the end of their third year, boys are given their Army trade test and also take the Victorian Apprenticeship Commission's final grade public examinations, which ensures that they will be accepted as qualified tradesmen in civil life, when they eventually leave the Army. In addition to trade training, the Apprentices' School provides general educational facilities up to the School Leaving Standard.

(xiii) *Rifle Clubs.* The Australian Rifle Club movement, which had its origin in 1888 is provided for in the Defence Act and comprises an Australian Council of State Rifle Associations, State Rifle Associations, District Rifle Club Unions and Rifle Clubs. Prior to 1931, the administration of the organization was the responsibility of the Secretary for Defence. From that year, its control passed to the Department of the Army. This organization continued until the outbreak of the 1939–45 War. In 1941, Rifle Clubs were placed in recess, until August, 1946, when approval was given for the re-establishment of the movement on a civilian basis under the control of the Secretary, Department of the Army. Approximately 20 per cent. of the members served overseas and a further 60 per cent. performed home service duties during the 1939–45 War. Rifle shooting activities were resumed in 1946 and the strength of the movement as at 31st December, 1959, was 977 clubs and 43,115 members.

By decision of the Government, from 1st July, 1960, the Australian Rifle Club Movement was established as an independent organization outside the control of the Department of the Army and no further financial assistance will be provided for its maintenance.

(xiv) *Army Schools.* Army Schools have been established for the major Arms and Services for the purpose of training officers and other ranks in the up-to-date techniques of their own Arm or Service, to qualify them for promotion requirements, and to produce trained instructors. Courses at Army Schools are conducted for members of both the Australian Regular Army and the Citizen Military Forces.

The following Army Schools have been established:—

Jungle Training Centre.	Royal Australian Army Service Corps School.
Armoured School.	Royal Australian Army Ordnance Corps School.
School of Artillery.	Royal Australian Electrical and Mechanical Engineers' Training Centre.
School of Military Engineering.	Transportation Training Centre.
School of Survey.	Women's Royal Australian Army Corps School.
School of Signals.	School of Music.
Infantry Centre.	Air Support Unit.
Intelligence Centre.	School of Army Health.
Royal Australian Army Medical Corps.	

(xv) *The Australian Battles Nomenclature Committee.* The Minister for the Army gave approval on 25th July, 1947, for the formation of the Australian Battles Nomenclature Committee to tabulate and classify the operations fought in the Pacific Zones in the 1939–45 War which involved the Australian Military Forces, to define their geographical and chronological limits and to advise the United Kingdom Battles Nomenclature Committee regarding operations in zones other than the Pacific Zone in which the Australian Military Forces participated. Sub-committees were later appointed to study the various campaigns in order to classify the operations into battles, actions and engagements. In 1956, the terms of reference of the Australian Battles Nomenclature Committee were extended to cover the operations in Korea 1950–53.

Major-General Sir George F. Wootten, K.B.E., C.B., D.S.O., E.D., a distinguished soldier of both World Wars, was appointed by the Military Board to be Chairman of the Australian Battles Nomenclature Committee.

The final report of the United Kingdom Battles Nomenclature Committee was published in November, 1957.

3. **Strength of Australian Military Forces.**—The effective strength of the Australian Military Forces at 31st December, 1959, was as follows:—Australian Regular Army, 16,564; Regular Army Special Reserve, 3,384; other Permanent (including Women's Services, Trainees, etc.), 1,895; Citizen Military Force (including National Service Trainees), 55,120; Australian Cadet Corps, 30,073.

4. **Design and Inspection Branch.**—The control of this Branch reverted to the Department of the Army from the Department of Supply as from 12th March, 1959.

§ 4. Air Defence.

1. **General.**—A statement regarding the preliminary steps taken in connexion with the development of air defence appears in Official Year Book No. 18, page 610, and one on the expansion and development and zones and operations of the Royal Australian Air Force during the 1939–45 War in Official Year Book No. 36, page 1027.

2. **Administration and Organization.**—The Department of Air is responsible for policy for the organization and control of the Royal Australian Air Force. The Air Board is responsible, subject to approved policy, for the control and administration of the Royal Australian Air Force, and is constituted as follows:—Chief of the Air Staff, Air Member for Technical Services, Air Member for Personnel, Air Member for Supply and Equipment, Citizen Air Force Member and the Secretary, Department of Air.

Headquarters of the Royal Australian Air Force is in the process of moving from Melbourne to Canberra. A R.A.A.F. Representative is located at London and an Air Attache at Washington.

The units of the Royal Australian Air Force are organized in two functional Commands throughout Australia and its Territories.

The Commands are:—

Operational Command.—Operational Command is responsible for the command of operational units and the conduct of their operations within Australia and its territories.

Support Command.—Support Command is responsible for the command of training units, supply and servicing units; recruitment and individual training in the R.A.A.F., and supply and servicing including technical servicing of the R.A.A.F. in Australia.

The organization of the Royal Australian Air Force includes the following types of formations and units:—

- (a) *Formations.* These comprise a headquarters unit to control the activities of a number of units at one location. Each formation has a base squadron which provides common services to all units at the location.
- (b) *Flying Squadrons.* These bomber, fighter, transport and maritime reconnaissance squadrons undertake the operational and, in conjunction with operational conversion units, the operational training flying commitments of the R.A.A.F.
- (c) *Operational Conversion Units.* These units specialize in operational conversion training of aircrew for the bomber and fighter squadrons.
- (d) *Aircraft Depots.* These units specialize in major overhauls, etc., of aircraft and equipment and relieve flying unit ground staff of these commitments.
- (e) *Stores Depots.* Stores and equipment ordered by the R.A.A.F. are delivered to these centrally located depots for distribution to units.
- (f) *Flying Training, Ground Training, Navigation, Radio and Air Armament Training Units.* These units specialize in the aircrew and ground staff training required by the R.A.A.F.
- (g) *Airfield Construction Squadrons.* These units specialize in the construction of R.A.A.F. aerodromes and associated buildings and works services.
- (h) *Royal Australian Air Force College.* This unit is the training college for officer cadet entrants to the R.A.A.F.
- (i) *Telecommunications Units.* These units are responsible for the communications services of the R.A.A.F.
- (j) *R.A.A.F. Staff College.* This college trains specially selected R.A.A.F. officers for higher staff and command posts.

3. *Aircraft.*—Some of the aircraft which are at present being used in the Royal Australian Air Force are: bomber squadrons—Canberra; fighter squadrons—Vampire and Avon Sabre; transport squadrons—Metropolitan Hercules and Dakota; maritime reconnaissance squadrons—Lincoln and Neptune; air observation post—Cessna; training—Dakota, Canberra, Winjeel, Vampire, Meteor and Avon Sabre.

4. *Establishment.*—The Royal Australian Air Force establishment, as proposed, comprises an operational element and a support element consisting in all of approximately 16,328 personnel. The operational element consists of (a) Field Operational Force, (b) Operational Force, (c) Home Defence Force. The support element comprises the remainder of the R.A.A.F., and includes headquarters and administrative staffs and the organization for training, supply and maintenance.

5. *Strength of Royal Australian Air Force.*—At 1st March, 1960, the strength of the Royal Australian Air Force was as follows:—Permanent Air Force, 14,886; Active Citizen Air Force, 578; Active Reserve, 274 and General Reserve, 13,493.

6. *Women's Royal Australian Air Force.*—At 1st March, 1960, the Women's Royal Australian Air Force had an establishment of 890, with an enlisted strength of 715 (not included in the R.A.A.F. strength in para. 5, above). There are 28 musterings, excluding members of the W.R.A.A.F. in training. Details of enlistment and service in the W.R.A.A.F. are given in Official Year Book No. 44, page 1058.

7. *Operations in Korea and Malaya.*—Reference to R.A.A.F. participation in operations in Korea is contained in Official Year Book No. 40, pages 1112–13.

Australian assistance in the form of one transport squadron provided to the Malayan authorities is detailed in Official Year Book No. 40, page 1113.

One bomber squadron was provided for operations in Malaya. No. 1 (Bomber) Squadron, equipped with Lincolns and operating from a Royal Air Force base on Singapore Island, served in this capacity from July, 1950, until withdrawn in July, 1958. During this period, the squadron dropped approximately 35 million lb. of bombs during operations against communist bandits.

Subsequent to the withdrawal of No. 1 (Bomber) Squadron, the R.A.A.F. component of the British Commonwealth Strategic Reserve was deployed to the R.A.A.F. base at Butterworth, Malaya. The force includes No. 2 (Bomber) Squadron, No. 3 (Fighter) Squadron and No. 77 (Fighter) Squadron. Deployment was completed in March, 1959.

§ 5. War Gratuities.

Reference is made in earlier issues of the Official Year Book to the payments made under the provisions of the War Gratuity Acts 1920 (*see* No. 15, p. 930) and the War Gratuity Act 1945–1947 (*see* No. 41, p. 999).

§ 6. Department of Supply.

1. **General.**—Reference to the creation of the Department of Supply is contained in Official Year Book No. 39, page 1257. On 24th April, 1958, the Department of Defence Production was abolished and the functions previously undertaken by that Department were transferred to the Department of Supply. References to those functions and to the activities of the various branches and establishments of the former Department of Defence Production are contained in Official Year Book No. 44, pages 1059–61.

2. **Functions of the Department.**—The functions of the Department of Supply include—

- (i) Defence research and development, including the operation of the Joint United Kingdom—Australia Long Range Weapons Project, and Australian research and development through the Weapons Research Establishment, the Aeronautical Research Laboratories, the Defence Standards Laboratories and associated establishments;
- (ii) Manufacture, acquisition, provision and supply of munitions (including aircraft) and miscellaneous goods and services required by the defence forces;
- (iii) Arrangement of contracts for the supply of goods and the performance of services;
- (iv) Operation and management of factories, workshops and undertakings concerned in the production of munitions (including aircraft), clothing, canvasware and other defence goods;
- (v) Acquisition, maintenance and disposal of strategic materials;
- (vi) Planning and establishment of manufacturing facilities for the production of munitions and other defence goods;
- (vii) Investigation and development of Australian sources of supply in connexion with defence;
- (viii) Sale or disposal of surplus Commonwealth property other than land or buildings;
- (ix) Provision of Commonwealth transport facilities outside the Australian Capital Territory;
- (x) Provision and control of stores required for or in connexion with matters administered by the Department of Supply, and general storage for other Departments as required;
- (xi) Provision of security services within the Department;
- (xii) Arrangements for ascertaining costs and the control and limitation of profits in connexion with the production of munitions and other defence goods.

3. *Act Administered.*—The Minister for Supply administers the Supply and Development Act 1939–1948, except insofar as it concerns the building, repair and maintenance of merchant ships and the building, extension, operation, repair and maintenance of shipyards, drydocking and repair facilities for merchant ships.

4. *Research and Development Branch.*—(i) *General.* The Research and Development Branch, which is under the control of the Chief Scientist, is responsible for research and scientific development in relation to war *matériel* including the operation of the Joint United Kingdom—Australia Long Range Weapons Organization. The Chief Scientist is also the Chairman of the Board of Management for Research and Development, which is responsible for the efficient and economical conduct of research and development undertakings. The headquarters of the Branch is situated at 339 Swanston-street, Melbourne, and the following establishments are included in the Branch:—Weapons Research Establishment, Salisbury, South Australia; Defence Standards Laboratories, Maribyrnong, Victoria; Aeronautical Research Laboratories, Fishermen's Bend, Victoria.

(ii) *Weapons Research Establishment, Salisbury, South Australia.* This Establishment has three main sections, namely, the Trials and Instrumentation Wing, the Weapons Research and Development Wing and the Engineering Wing.

The Trials and Instrumentation Wing is concerned with the Joint United Kingdom—Australia Long Range Weapons Project and is responsible for the testing of guided missiles developed in the United Kingdom. The Weapons Research and Development Wing is engaged chiefly on Australian-initiated research but also provides a supporting research service for the Joint Project. The Engineering Wing designs the technical features of new installations on the range and operates the engineering facilities of the Establishment.

The headquarters of Weapons Research Establishment consisting of the main laboratory workshop and administrative services, is located at Salisbury.

Accommodation has been provided in the area for a number of United Kingdom firms which are developing guided weapons under contract to the British Ministry of Supply.

A modern airfield (Edinburgh Field) has been established adjacent to the Headquarters at Salisbury to meet the flying requirements of the establishment, the flying effort being provided by the R.A.A.F.

Testing ranges have been provided at Woomera, which is approximately 280 miles north-west of Salisbury and 9 miles north of Pimba, which is on the trans-continental railway line. A number of these testing ranges are now in operation. A modern township of 500 houses and extensive barracks accommodation has been built, complete with community store, hospital, school and all amenities usually found in an Australian country town.

(iii) *Defence Standards Laboratories.* The Defence Standards Laboratories at Maribyrnong continue to give comprehensive service to industry, the armed services and to other Commonwealth and State Departments.

The broad function of these laboratories is the application of scientific knowledge and research to the problems arising in design, development, manufacture, inspection, storage, and use of war *matériel*. Research is also carried out in connexion with the development of new and improved materials, methods and equipment of known or potential interest.

(iv) *Aeronautical Research Laboratories.* The broad function of the Aeronautical Research Laboratories is the application of scientific knowledge in the field of aeronautics to the operational and technical problems of the armed Services and industry, and to the development of new weapons and military equipment. More specifically, the Laboratories conduct investigations in aerodynamics, structures, materials, and power plants with particular attention to aeronautical defence problems, especially those of missile design and operational effectiveness. These Laboratories also collaborate with the United Kingdom on aeronautical research matters of mutual interest.

5. *Production.*—(i) *Munitions.* The Department is responsible for the production in Australia of munitions (other than specialized Navy requirements) for the Armed Services. The production is undertaken both in government-operated factories and in industry. Broadly this production is allocated as follows:—

(a) Some processes are undertaken entirely by the government factories in peace and war because of special requirements.

- (b) Some classes of equipment and components are produced entirely by industry in peace and war.
- (c) Production techniques of advanced equipment and components, which may be mass-produced by industry in war, are developed in the government factories in peace.
- (d) Requirements of standard equipment and components produced by the government factories in limited quantities in peace are, in war, produced on a mass production basis in industry.

The following government factories are currently in operation:—Ammunition—Footscray, Victoria; Explosives and Filling—Albion and Maribyrnong, Victoria; Mulwala and St. Mary's, New South Wales; Ordnance—Maribyrnong, Bendigo and Port Melbourne, all in Victoria; Small Arms—Lithgow, New South Wales; Clothing—Victoria.

With the exception of the Clothing Factory, these factories are complementary to each other in the manufacture of a range of basic munitions. The Ammunition Factory makes the brass and non-ferrous components of gun ammunition, including melting and rolling and these components are then passed to the Filling Factories for filling with explosives. However, the factory makes the complete round for small arms ammunition, the propellant being supplied by the Explosives Factories. The Ordnance Factories make guns principally. In addition, steel shell bodies are produced by these establishments and passed to the Filling Factories to be filled with explosives and assembled with the brass and other components received from the Ammunition Factory.

The Bendigo factory is specially equipped to produce also main propulsion gearing for Naval destroyers and frigates. The Port Melbourne works produces marine engines.

The Explosives Factories make the propellant and high explosives for the brass components produced at the Ammunition Factory and for the steel components made at the Ordnance Factory. The Explosives Factories also assemble the gun ammunition.

The Small Arms Factory is equipped to make the rifles and other small arms for which the Ammunition Factory makes the ammunition. The factory is currently producing the F.N. 7.62 mm. automatic rifle for the Australian Army to replace the .303 Lee Enfield rifle. Orders for the new rifle have also been received from the Ghana and New Zealand Governments.

Production of munitions is also a joint effort between the Government factories and private contractors in industry. In peace, industry produces many components for ammunition and other stores plus complete units such as electronic equipment and motor vehicles for the Services. In war, industry would provide the major capacity for mass production not only of these and many other new items, but also of equipment and components using engineering techniques developed in peacetime in the Government factories.

(ii) *Aircraft.* (a) *General.* The production in Australia of military types of aircraft and aero engines and of other aircraft components required by the Royal Australian Air Force is administered by the Department of Supply. The planning of capacity and the negotiation of contractual arrangements in connexion with aircraft repair and overhaul activities carried out for the Services in civilian establishments, as distinct from Service workshops, are also functions of the Department, together with the responsibility for the supply of certain aircraft and engine spare parts and airborne equipment.

(b) *Aircraft, Engine and Other Production.* The approved production programmes for the major aircraft manufacturing organizations in Australia comprised Jindivik radio-controlled jet-propelled target aircraft and the Malkara guided missile at the Government Aircraft Factory, Melbourne; Avon-Sabre jet-engined fighters and Rolls-Royce Avon Turbo-jet engines at Commonwealth Aircraft Corporation Pty. Ltd., Melbourne; and Vampire jet-trainers at De Havilland Aircraft Pty. Ltd., Sydney.

Production activities included the manufacture of engine parts at the Aircraft Engine Factory, Sydney, of aircraft pressed metal parts at Chrysler Australia Ltd., Adelaide, and of turbine and compressor blades for jet engines at National Forge Pty. Ltd., Melbourne.

(c) *Repair and Overhaul.* During the year, the broad policy was continued by the R.A.A.F. of returning to the factories in which they were produced all Australian-made aircraft and aero engines requiring major overhaul and the incorporation of modifications. Repair and overhaul of R.A.A.F. aircraft of certain other types and of carrier-based aircraft operated by the R.A.N. were undertaken by civilian personnel in the aircraft factories or in the works of contractors specially equipped to handle this type of work.

Canberra bomber and Jindivik target aircraft were repaired and modified at the Government Aircraft Factory. Avon-Sabre fighter aircraft were repaired and modified and Rolls-Royce Nene and Avon turbo-jet engines were overhauled by Commonwealth Aircraft Corporation Pty. Ltd., Melbourne. Pratt and Whitney Twin Row Wasp engines from the R.A.A.F., Armstrong-Siddeley Double Mamba turbo-prop engines from the R.A.N., and Rover Meteor tank engines from the Department of the Army were overhauled at the Aircraft Engine Factory, Sydney. Propellers from the R.A.A.F. and R.A.N. were overhauled at the Propeller Annexe, Alexandria, N.S.W. Wright turbo-compound engines from R.A.A.F. Neptune aircraft were overhauled by Qantas Empire Airways Ltd., Sydney.

Carrier-based Sea Venom aircraft, Vampire fighters and trainers, together with Ghost turbo-jet engines from Sea Venoms and Goblin turbo-jet engines from Vampire trainers were repaired and overhauled at De Havilland Aircraft Pty. Ltd. Dakota transport and other miscellaneous aircraft were reconditioned and serviced at the Government workshops at Parafield, South Australia.

The repair and overhaul of carrier-based Fairey "Gannet" aircraft for the R.A.N. and the erection of "Meteor" target aircraft for the Woomera Rocket Range were handled by the Fairey Aviation Company of Australasia Ltd., Sydney.

Sycamore helicopter aircraft, Bristol freighter aircraft, Alvis Leonides and Bristol Hercules engines were repaired and overhauled by Bristol Aviation Services, also in Sydney.

The reconditioning and servicing of aircraft instruments, electrical, electronic and other ancillary equipment and airframe components were carried out by various contractors.

(d) *Avalon Test Field.* The final assembly, fitting out and flight testing of military aircraft built, overhauled or modified at the Melbourne aircraft factories was continued during the year at the Avalon Airfield, near Geelong, Victoria. The airfield was also used for the training of civil flight crews on Boeing jet-aircraft operated by Qantas Empire Airways Ltd. and on other civil airliners operated by Trans-Australia Airlines and Ansett-A.N.A.

(e) *Rationalization of Aircraft Industry.* Certain proposals for the rationalization of the aircraft industry in New South Wales were approved by the Government during the year, involving—

- (i) the termination of the arrangement under which the Lidcombe engine factory had been managed as an annexe by the Commonwealth Aircraft Corporation Pty. Ltd. and the leasing of the factory to De Havilland Aircraft Pty. Ltd.
- (ii) the closing down of the propeller annexe, formerly managed by the De Havilland Company on behalf of the Commonwealth.
- (iii) the transfer to the Lidcombe factory of engine and propeller overhaul activities from the De Havilland Bankstown works and the propeller annexe respectively.

(f) *Telecommunications.* Developmental and production orders were placed with industry for new and improved types of Service telecommunications equipment.

6. *Contract Board.*—(i) *General.* Under the Supply and Development Act 1939–1948, the Contract Board is the authority responsible for purchasing supplies and arranging services for the Military, Naval and Air Forces of the Commonwealth, as well as for the Department of Supply. It is also responsible for the sale or disposal of all surplus or unserviceable war *matériel* and other goods approved for disposal. In addition, the Board purchases and arranges disposals on behalf of other Commonwealth Government departments and authorities which have no public contract organization of their own, e.g., Immigration, National Development and External Affairs (Colombo Plan supplies).

(ii) *The Board and its Administrative Organization.* The Contract Board meets in Melbourne, and comprises representatives of the Departments of Supply, Navy, Army and Air. The Board's administrative organization is the Directorate of Contracts. In each State other than Victoria, there is a District Contract Board with an administrative organization similar to the Directorate of Contracts. The table following shows, in respect of the Contract Board organization, the purchases and realizations from disposals for the years 1957–58 and 1958–59.

CONTRACT BOARD ORGANIZATION : PURCHASES AND REALIZATIONS FROM DISPOSALS.**(£.)**

State.	Purchases.		Realizations from Disposals.	
	1957-58.	1958-59.	1957-58.	1958-59.

7. Defence Supply Planning.—The central planning authority of the Department is the Planning Branch, the principal functions of which are—

- (i) to plan for and to assist in the development of additional production capacity to meet the Services' munitions requirements for mobilization and war;
- (ii) to provide and administer stockpiles of relevant materials and reserve pools of plant and equipment considered essential for expansion of production in the event of war;
- (iii) to prepare and progress co-ordinated production programmes against Service orders and to analyse and interpret achievement against these programmes for the information of the Department and the Services;
- (iv) to provide advisory service in the field of instrumentation and inspection to Government factories and contractors engaged in the production of munitions requirements; and
- (v) to carry out surveys of production capacity and to indicate steps necessary to augment capacity in the event of war.

Attached to the Planning Branch is the Defence Supply Planning Committee which acts as a reviewing body in defence production matters for submission to the Higher Defence Machinery. Its membership includes representatives of the three Services and the Departments of Defence, Supply and Trade.

A series of Industry Advisory Committees has been established to advise the Minister and the Department in the development of industrial mobilization plans to meet the Services *matériel* requirements for mobilization and war. The Committees are: Ammunition; Electrical; Explosives and Chemicals; Machine Tools and Gauges and Munitions Factory Equipment; Materials; Military Vehicles; Radar and Telecommunications; Weapons and their Equipment; Hard Fibres; Raw Cotton; and Rubber and Allied Materials.

Members of the Committees include industrialists of wide experience and the highest ability in their chosen fields.

8. Stores and Transport Branch.—This Branch, administered by a Board of Management and working under the direction of a General Manager, functions as the Central Storage Authority and the Central Transport Authority for all Commonwealth Departments. It is the authority for the arrangement of furniture removals at departmental expense in all States but not in the Australian Capital Territory and the Northern Territory. It has agents in Canberra and Darwin. It also operates a Shipping and Customs Section and the England-Australia Bulk Air Freight Scheme for Commonwealth Departments.

On 30th June, 1959, it had under its control land, buildings and works, vehicles, plant and equipment valued at £8,705,852 and 3,397,373 sq. ft. of storage space as well as storage facilities for large quantities of chemicals, bulk liquids and explosives.

9. Finance Branch.—The expenditure on Department of Supply activities during the year 1958–59 is shown in the following table:—

SUPPLY : TOTAL EXPENDITURE.

(£'000.)

Particulars.	Expenditure 1958–59.
Parliamentary Appropriations	20,961
Trust Fund Accounts—	
Stores and Transport	4,680
Government Factories and Establishments	15,161
Munitions Production	10,009
Defence Production Materials	54
Aircraft Production	8,676
<i>Total Trust Accounts</i>	38,580
<i>Total Expenditure</i>	59,541

CHAPTER XXIX.

REPATRIATION.

§ 1. General.

The Repatriation Commission, established under the Repatriation Act 1920-1959, is a body corporate consisting of three full-time members. The head office is in Melbourne, but there is a branch office in each State under the control of a Deputy Commissioner.

Its principal functions are—

- (i) the payment of war and service pensions to ex-service men and women and their dependants;
- (ii) the provision of medical treatment to ex-service men and women for injuries and illnesses caused or aggravated by their war service;
- (iii) the provision of medical treatment in certain circumstances to ex-service men and women, and to their dependants, who are suffering from injuries and illnesses not caused or aggravated by war service.

Other functions of the Repatriation Commission are outlined in a later section of this chapter (*see* § 5, General Benefits and Miscellaneous, page 1121).

During the year 1958-59, the Repatriation Act was amended by the Repatriation Act, No. 58 of 1959, which increased certain rates of war pension and service pension, and allowances payable under the Fifth Schedule to the Act in respect of certain specified disabilities.

The Repatriation (Far East Strategic Reserve) Act 1956, which provided benefits for members of the defence forces who served with the British Commonwealth Far East Strategic Reserve in Malaya, came into force on 1st September, 1957.

§ 2. War Pensions.

1. *General.*—The first provision for the payment of war pensions to members of the forces and their dependants was made by the Commonwealth Parliament in the War Pensions Act 1914, which came into operation on 21st December, 1914. This Act was repealed in 1920 by the Australian Soldiers' Repatriation Act (amended from 31st December, 1950, to the Repatriation Act). Owing to limitations of space, only some of the main features relating to war pensions under the Repatriation Act 1920-1959 are set out in the following paragraphs:—

(i) *Eligibility for Pension.* The 1943 amendments to the Repatriation Act considerably widened the provisions in this respect, to the benefit, mainly, of members of the Citizen Military Forces who have not served outside Australia. These provisions are summarized as follows:—

- (a) A member of the forces who served (1) outside Australia, (2) in the Territories of Australia, such as Papua and New Guinea, or (3) within Australia in

circumstances which can be regarded as combat against the enemy, is covered for war pension purposes in respect of incapacity or death which may result from any occurrence that happened during the period from the date of his enlistment to the date of the termination of his service in respect of that enlistment.

(b) In other cases where a member served only in Australia, incapacity or death to be pensionable must have been attributable to service.

(c) There is a third ground applicable to all in (a) and those in (b) who have had at least six months' camp service. This provides that, where a condition existed at enlistment, a pension may accrue if it is considered that the condition was aggravated by service.

(ii) *Pensions for Incapacity.* From 1st October, 1959, the 100 per cent. pension rate for a member's incapacity was increased from £5 2s. 6d. to £5 10s. 0d. a week (higher rates were payable in respect of certain commissioned ranks). The rates for wives and children of incapacitated members are £1 15s. 6d. and 13s. 9d. a week, respectively.

(iii) *Supplementation of Pensions.* Where a member is, because of his war disability, temporarily (for at least three months) precluded from earning other than a negligible percentage of a living wage an additional pension may be granted to bring the total pension to the member up to £12 5s. a week, an increase of 15s. from 1st October, 1959.

(iv) *Women's Nursing and Auxiliary Services.* Members of Women's Services are eligible for pensions and other benefits as prescribed in the Act on the same basis as male members of the Forces.

(v) *Pulmonary Tuberculosis.* If at any time after discharge, a member of the Forces who served in a theatre of war became or becomes incapacitated, or died or dies, from pulmonary tuberculosis, war pension is payable as if the incapacity or death resulted from an occurrence on service. (See also § 3. Service Pensions.) Medical treatment may also be provided on application.

(vi) *Special Rates.* Those who have been totally blinded as a result of war service and those who are permanently and totally incapacitated receive a special pension which was increased from £11 10s. to £12 5s. a week from 1st October, 1959. The rate for Tuberculars, Class "B" (fit for light employment) was similarly increased from £8 2s. 6d. to £8 12s. 6d. a week. In addition to the special pension, an attendant's allowance of £2 15s. a week is granted to the war-blinded and to certain others who are deemed to be in need of an attendant. A war-blinded member who is also affected with total loss of speech or total deafness is entitled to an attendant's allowance of £4 10s. a week in lieu of that referred to above. The wife and any children under 16 years of age receive the same rates as shown in sub-para. (ii).

(vii) *Clothing Allowance.* As from 1st October, 1959, provision was made for ex-members of the Forces to receive a clothing allowance ranging from 3s. 9d. to 7s. 6d. weekly for damage to clothing caused by the use of an artificial limb or other appliance where the incapacity is due to war service or by the use of oils, ointments, or other substances used in the necessary treatment of accepted disabilities, e.g. skin diseases, suppurating wounds, etc.

(viii) *Specified Disabilities.* Where the disability is amputation of a limb or limbs or total loss of vision in one eye, amounts ranging from 13s. 6d. to £6 15s. a week in addition to the statutory rate of pension are payable as from 1st October, 1959. In addition, attendants' allowances of either £2 15s. or £4 10s. a week are payable in certain double amputation cases.

(ix) *Time Limit Removed for Wives and Children.* Prior to the 1950 amending Act, wives who were married and children who were born after specified dates, were ineligible to receive a war pension. This time limit was removed as from 2nd November, 1950.

(x) *Rates of Pension for Death. (a) Widows.* From 1st October, 1959, the rates of pension were increased by 7s. 6d. a week, the minimum rate being increased from £4 17s. 6d. to £5 5s. a week (higher rates are payable in respect of certain commissioned ranks). In addition to the pension, the widow, if she has dependant children, receives an allowance if she is permanently unemployable, or if she is over 50 years of age; this allowance was increased from £2 7s. 6d. to £2 15s. a week as from 1st October, 1959. The allowance may also be paid to a widow under 50 years of age, in certain cases, so long as the child (or one of the children if more than one child) over the age of sixteen, is undergoing education or training but has not qualified for (or is not receiving) the adult wage in the occupation for which he or she is training.

(b) *Children.* From 2nd October, 1958, the rate of pension for the eldest child (under 16 years of age) was increased from £1 6s. 6d. a week to £1 11s. 6d. a week, and that for each younger child from 18s. 6d. a week to £1 2s. 6d. a week. Additional pension of 6s. a week may be paid in certain circumstances. Where both parents are dead, pension payable to each child was increased from £2 8s. a week to £3 3s. a week.

(xi) *Widowed Mother on Death of Member.* A pension ranging from £2 5s. to £4 3s. a week, according to the rank of the member, may be granted to the widowed mother of a deceased unmarried son, provided widowhood occurred either prior to or within three years after the death of the member. The pension may be supplemented by payment of an additional amount (not exceeding £4 15s. a week as from 1st October, 1959) according to the extent of other income of the pensioner. The value of property owned does not affect the pension.

2. *Appeals Tribunals.*—The principal Act was amended, as from 1st June, 1929, to create tribunals to hear appeals in respect of war pensions. The War Pensions Entitlement Appeal Tribunal is empowered to hear and decide any appeal by or on behalf of ex-members of the Forces or their dependants against a decision of the Repatriation Commission that the incapacity or death of an ex-member did not arise out of war service. Assessment Appeal Tribunals were created to hear and decide any appeal against a current assessment or a "Nil" assessment of war pension made by the Repatriation Commission in respect of the incapacity of an ex-member of the Forces which had been accepted as arising out of war service. Provision was made by subsequent legislation to enable the Tribunals to hear appeals by certain members whose application for a service pension had been refused.

3. *Summary of War Pensions, 1958-59.*—At 30th June, 1959, the number of war pensions for the 1914-18 War was 127,460, for the 1939-45 War 509,698, and for the Korea and Malaya Operations 4,889, making a total of 642,047 with a liability of £51,206,075 per annum. The amount paid in war pensions during the year 1958-59 was £50,857,423. The general details for 1958-59 for each war are listed in the following table:—

WAR PENSIONS: SUMMARY, AUSTRALIA, 1958-59.

Particulars.	1914-18 War.	1939-45 War.	Korea and Malaya Operations.	Total.
New claims granted	2,098	27,829	834	30,761

(a) Not available.

4. **Classes of War Pensions, Australia, 1958-59.**—(a) *New Claims Granted.* The following is an analysis of the total number of new claims granted during 1958-59:—

WAR PENSIONS: NEW CLAIMS GRANTED, AUSTRALIA, 1958-59.

Class.	1914-18 War.	1939-45 War.	Korea and Malaya Operations.	Total.
Members	767	5,552	205	6,524
Wives of Members	1,028	5,705	192	6,925
Children	204	15,860	421	16,485
Other Dependants	99	712	16	827
Total	2,098	27,829	834	30,761

(b) *Pensions in Force.* The following table shows the number of pensions in force at 30th June, 1959, for each war and for each class of pensioner:—

WAR PENSIONS IN FORCE, AUSTRALIA, 30th JUNE, 1959.

Class.	Number of Pensioners at 30th June, 1959.			
	1914-18 War.	1939-45 War.	Korea and Malaya Operations.	Total.
Members	54,005	151,249	1,670	206,924
Wives	48,096	126,137	1,109	175,342
Children	2,711	205,942	1,858	210,511
War widows	20,739	12,208	63	33,010
Children of deceased members	382	6,807	102	7,291
Orphans	30	115	..	145
Parents	1,201	7,000	84	8,285
Brothers and sisters	70	104	3	177
Others	226	136	..	362
Total(a)	127,460	509,698	4,889	642,047

(a) In addition, 16 pensions were being paid to members of the Far East Strategic Reserve and their dependants.

(c) *Special Rate Pensions.* At 30th June, 1959, special rate pensions were being paid to the following classes of members of the Forces:—

WAR PENSIONS: MEMBERS ON SPECIAL RATES, AUSTRALIA, 30th JUNE, 1959.

Class.	1914-18 War.	1939-45 War.	Korea and Malaya Operations.	Total.
Blinded members	246	219	3	468
Tubercular members	578	551	8	1,137
Totally and permanently incapacitated members	11,573	5,121	16	16,710
Tuberculars, Class "B"	137	278	2	417

5. **Number of War Pensioners and Annual Liability, States, etc., 30th June, 1959.**—The following table shows the number of pensions in force and annual liability for each war at 30th June, 1959, according to place of payment. (The amount paid is shown on p. 1118.,

WAR PENSIONS: NUMBER OF PENSIONERS AND ANNUAL LIABILITY, 30th JUNE, 1959.

(a) Includes the Australian Capital Territory.

(b) Includes the Northern Territory.

§ 3. Service Pensions.

1. **General.**—The Repatriation Act 1920–1959, administered by the Repatriation Department, provides for a service pension to be paid, subject to a means test of income and property, to:—

- (i) A male member of the Forces who is sixty years of age and who served in a theatre of war, or to a female member of the Forces who is 55 years of age and who served abroad. No pension is payable to the wife or children under 16 years of age of a member granted a service pension on account of age.
- (ii) A member of the Forces who is permanently unemployable and who served in a theatre of war (or, in the case of a female member, who served abroad). Service pensions are also payable to a pensioner's wife and up to four children under 16 years of age.
- (iii) A member of the Forces suffering incapacity from pulmonary tuberculosis whether or not the person served in a theatre of war. Service pensions are also payable to a pensioner's wife and up to four children under 16 years of age.

Only those persons who qualify under (iii) are entitled to receive both service and invalid pensions at the same time.

2. **Rate of Pension.**—The maximum rate of service pension is the same as that for age and invalid pensions paid by the Department of Social Services, namely, £4 15s. a week. A member service pensioner with two or more children under 16 years of age in his care, custody and control, is eligible for a further 10s. a week for each child except the first, if he receives a service pension on the ground of being permanently unemployable, or suffering from pulmonary tuberculosis. In addition, a service pensioner in receipt of service pension at the maximum rate may also receive Supplementary Assistance of 10s. a week if he pays rent and is entirely dependent upon his service pension.

The maximum rate for a member's wife is £1 15s. a week; the rate for the first child under sixteen years of age is 11s. 6d. a week and for each other child (not exceeding three) 2s. 6d. a week.

A member who is single may have income up to £3 10s. a week from sources other than his pension and still receive the maximum service pension. If income from other sources exceeds £3 10s. a week, the pension is reduced by the amount of the excess. No service pension is payable if income from other sources reaches or exceeds £8 5s. a week. For this purpose, the term "income" includes a war pension, and income derived from any source other than from property, but does not include a gift or allowance from a claimant's parents, children, brothers or sisters, maternity allowance, child endowment or other payments in respect of children, a benefit not being a payment of a gratuity from any friendly society, a payment not being a payment of a gratuity in respect of illness, infirmity or old age from any trade union, the value of State food relief or like assistance granted under any law of a State or Territory, Commonwealth hospital and medical benefits (including an amount received from a registered benefit organization up to the total amount of fees), pharmaceutical benefits or a tuberculosis allowance, or interest on Commonwealth war gratuities.

The rate of pension is further reduced by 4½d. a week for every complete £10 by which the value of property owned by a member exceeds £200. No pension is payable if the value of the property exceeds £2,250. For this purpose, the term "property" includes all real and personal property such as houses or land or interests therein, money in a bank or invested, or lent to any person, bonds, shares, interests in estates of deceased persons, and livestock, but excludes the value of the home of the pensioner and of his furniture and personal effects, the surrender value (up to £750) of any life assurance policies, the capital value of any life interest, annuity or contingent interest, the present value of any reversionary interest, property to which the claimant or spouse is entitled from the estate of a deceased person but which has not been received, and the amount of any Commonwealth war gratuity.

For the purposes of the administration of the means test, the income and property of a married person are deemed to be half the total income and property of the husband and wife (unless they are legally separated or in certain other special circumstances). This

provision means that the pension of a married person, whether or not his spouse is a pensioner, will not be reduced because of the income he receives from sources other than his pension unless that income exceeds £8 5s. a week, nor will his pension be reduced on account of the value of his property unless that value exceeds £400.

Eligibility for service pensions was extended on 1st November, 1941, to veterans of the South African War 1899–1902 and in 1943 to members of the Forces of the 1939–45 War. Members who served in Korea, and those who served in Malaya prior to the commencement of the Repatriation (Far East Strategic Reserve) Act 1956, are also eligible.

3. **Operations, 1958–59.**—The following table gives a summary relating to service pensions during 1958–59:—

Claims granted during year—

Members of the Forces	4,869
Wives	1,727
Children	1,017
<i>Total</i>	<u>7,613</u>

Claims rejected during year—

Members of the Forces	1,164
Wives	587
Children	473
<i>Total</i>	<u>2,224</u>

Service pensions cancelled or discontinued during year	..	4,029
Deaths of pensioners during year	..	2,087
Pensions in force at 30th June, 1959	..	44,372
Annual pension liability at 30th June, 1959	..	£6,244,617

4. **Number of Service Pensioners and Amount Paid.**—(i) *Summary, Australia.* The following table shows the number of service pensions in force and the amount paid in pensions for the five years 1954–55 to 1958–59:

SERVICE PENSIONS : SUMMARY, AUSTRALIA.

(a) Includes the Australian Capital Territory.

(b) Includes the Northern Territory.

§ 4. Medical Treatment of Ex-Servicemen Suffering from War Service Disabilities.

At 30th June, 1959, there were 4,022 in-patients in Repatriation medical institutions and State mental hospitals, including a number whose care was undertaken by the Repatriation Commission on behalf of other countries or Commonwealth departments. There were 381,756 out-patient attendances for treatment during the year, excluding approximately 1,224,507 treatments by local medical officers resident in metropolitan and country areas and in New Guinea. The expenditure for the year ended 30th June, 1959, was £12,173,009.

§ 5. General Benefits and Miscellaneous.

1. *Other Departmental Activities.*—(i) *General.* During the 1939-45 War, the ordinary activities of the Department in the way of general benefits for the welfare of members and dependants were carried on without interruption. They were mainly education and training of children under the Soldiers' Children Education Scheme, medical benefits for widows and children of deceased members and for widowed mothers of deceased unmarried members, funeral expenses for certain classes of members and dependants, and allowances to certain classes of dependants.

By legislation passed in June, 1940, these benefits were extended to members engaged in the 1939-45 War and in November, 1950, to those engaged in the Korea and Malaya Operations, and new benefits designed for the re-establishment of members after discharge from the Forces were made available. The re-establishment benefits administered by the Repatriation Commission are:—payment of re-employment allowance while awaiting employment; provision of tools of trade and equipment where such are necessary to the member's employment; transportation expenses to meet the cost of fares and removal of household belongings, where a member takes up training, employment, or a business, or settles on the land; supplementing of wages of apprentices whose apprenticeships were interrupted by war service; re-establishment loans to enable members and widows to establish themselves in business, practices or other occupations, including (until the Division of War Service Land Settlement began operations early in 1946) agricultural occupations; payment of re-establishment allowance during the early stages of establishment in business; gifts up to £75 for furniture to members who are blind or totally and permanently incapacitated, also to widows with children under 16 years of age; and free passages to Australia for wives, widows and children of members who married abroad (and passages outward from Australia in certain cases of members and dependants).

In 1949, the Commission took over the functions of the Re-establishment Division of the former Department of Post-war Reconstruction, and is now responsible for the co-ordination of all matters relating to training under the Commonwealth Reconstruction Training Scheme. Re-establishment of the more seriously disabled, where ordinary training is not sufficient, continues to be a function of the Commission, and special means have to be found to overcome each problem.

(ii) *General Repatriation Benefits.* The following table gives a summary of expenditure during 1958–59 on the more important general repatriation benefits for all wars.

GENERAL REPATRIATION BENEFITS, 1958–59.

2. **Expenditure by the Repatriation Commission, 1958-59.**—The gross expenditure by the Repatriation Commission for the year ended 30th June, 1959, was £78,094,207, distributed as follows:—

<i>Repatriation Benefits—</i>		£	£
War and Service Pensions and Widows' Allowances ..		60,638,740	
Operation of Medical Institutions, Medical Treatment, etc.		12,456,829	
Soldiers' Children Education Scheme		608,442	
			73,704,011
<i>Other Benefits—Seamen's War Pensions, etc.</i>			130,705
<i>Administration</i>			3,186,513
<i>Capital Works and Services</i>			1,072,978
Total..			78,094,207

3. **Settlement of Returned Service Personnel on the Land.**—Reference to the settlement of returned service personnel on the land will be found in Chapter IV.—Land Tenure and Settlement.

4. **The Services Canteens Trust Fund.**—(i) *Introduction.* The Services Canteens Trust Fund was established under the Services Trust Funds Act 1947. This Act transferred to the Fund the profits and assets of the Army, Navy and Air Force canteens, the mess and regimental funds of disbanded wartime units, money derived from the sale of amenities supplied to the defence forces between 3rd September, 1939, and 30th June, 1947, and funds held by the A.M.F. Special Benefits Committee, the trustees of the R.A.N. Relief Fund and the trustees of the R.A.A.F. Welfare Fund.

(ii) *Establishment and Administration of the Fund.* The total amount transferred to the Fund to 31st December, 1959, was £5,526,723. The Act prescribed that of this, £2,500,000 and such further amounts as the trustees of the Fund may from time to time decide should be devoted to the provision of education facilities for the children of eligible ex-servicemen and women, and that the balance of the fund should be used to provide relief for ex-servicemen and women and their dependants in necessitous circumstances.

The Fund is administered by ten honorary trustees, appointed by the Commonwealth Government. The trustees have power to determine the persons or groups of persons to benefit from the Fund and the extent of benefits to be granted within the provisions of the Act, and to appoint regional committees to assist with the administration.

Regional committees have been established in all Australian States, the Australian Capital Territory, the Northern Territory (Darwin and Alice Springs), New Zealand and London. All Australian diplomatic and consular posts also act as local representatives of the trustees. They have delegated to them by the trustees specific powers to deal with applications for assistance from the Fund.

Members of regional committees are all persons who served in the 1939-45 War or are widows of men who served during the war, and, with the exception of regional chairmen and deputy chairmen, have been selected by the trustees from nominees of the major ex-service organizations. They also serve in an honorary capacity.

(iii) *Assistance from the Fund.* Persons eligible for assistance from the Fund are those who between 30th September, 1939, and 30th June, 1947, served in the Australian Naval, Military or Air Forces, including members of the Canteens Staff of any ship of the Royal Australian Navy, persons duly accredited to any part of the Defence Force who served in an official capacity on full-time paid duty, and their dependants.

The trustees are charged under the Services Trust Funds Act with:—

(a) providing educational assistance including professional and trade training—

- (i) for the children of deceased or incapacitated eligible servicemen or of eligible servicemen who are in needy circumstances; and
- (ii) for the children of other eligible servicemen, which children are in the opinion of the trustees particularly deserving of assistance by reason of exceptional circumstances;

b) providing benefits for—

- (i) eligible servicemen in necessitous or deserving circumstances;
- (ii) the dependants of deceased or totally or partially incapacitated eligible servicemen or of eligible servicemen in necessitous or deserving circumstances;
- (iii) the dependants of eligible servicemen other than those mentioned in paragraph (ii) above, which dependants are, in the opinion of the trustees, in necessitous circumstances or particularly deserving of assistance;
- (iv) the provision of relief or benefit for eligible servicemen and their dependants in such other cases as the trustees think fit.

The trustees have introduced schemes for providing—

- (a) welfare relief for ex-service men and women who are eligible for benefits and for their dependants;
- (b) benefits for children of eligible ex-service men and women who are suffering from serious and incapacitating afflictions; and
- (c) education benefits for the children of eligible ex-service men and women.

Because over 1,000,000 men and women and all their dependants are eligible for benefits, the assistance that can be provided in individual cases is limited and the trustees have prescribed a policy for welfare relief which makes assistance available only to those who are in genuine distress from which they cannot extricate themselves by their own efforts. Family counselling services are provided wherever practicable. In determining the nature or amount of relief to be granted, care is taken to use the fund constructively with the object of assisting the applicant to achieve independence, and of discouraging any tendency towards increasing dependence on social welfare organizations. For example, the regular supplementing of pension or low income for an indefinite period is contrary to the policy of the trustees, as it is quite impossible for the fund to assume a general responsibility of that nature. Instead, every effort is made to assist the applicant to adjust his mode of living or to increase his income himself so that he may live within it. Either the applicant, or his dependants, should be deserving of assistance.

From its inauguration in 1947, the Fund is to be available for 40 years for welfare relief and for 30 years for educational benefits.

Applications are carefully investigated to determine the bona fides of the applicant and the case presented, and to help regional committees in deciding the kind of assistance, if any, to be given. Where possible, investigations are made by trained social workers on the staff either of the Fund or of recognized agencies.

The following amounts of welfare relief have been granted from the Fund:—

Recipients.	Year 1959.	Total to 31st December, 1959.
	£	£
Ex-service men and women and dependants	51,436	776,201
Widows and orphans	25,136	318,741
Total	76,572	1,094,942

A total of 25,487 ex-service men and women, and 9,629 widows and orphans were granted welfare assistance from the Fund to 31st December, 1959.

Of all persons eligible for assistance from the Fund, widows and orphans are likely to be in greatest need, especially in the period immediately following the death of an ex-serviceman. Consequently, every effort is made to locate these widows and orphans and their degree of need is interpreted more liberally than is that of ex-servicemen.

Also particularly deserving of assistance are dependent children suffering from afflictions which permanently disable or seriously retard their progress or prevent the enjoyment of normal health and strength, and present a prospect of complete or partial dependence on others for all or part of their lives. The trustees introduced a plan to ensure that any

eligible child suffering from a serious affliction may be assisted as necessary to have access to whatever treatment or facilities are available to help the child to become as normal, self-reliant, self-supporting, socially acceptable, mobile, and happy as possible, despite his or her handicap. The extent to which assistance will be granted in a particular case depends largely on the nature of the child's affliction, the facilities available, the family circumstances, and the funds that can be made available.

Up to 31st December, 1959, 1,946 afflicted children had been assisted under the Afflicted Children's Scheme, involving an expenditure of £93,559.

Educational assistance is restricted to children who are 15 years of age and over, except in exceptional circumstances, when it may be granted from the age of 13, and in the case of orphans, when assistance may commence from the age of 12 years. The object of the trustees is to assist eligible children to obtain the highest education within their capacity.

Educational assistance from the Fund is in the form of awards ranging from £5 to £200 a year depending on the cost of the course undertaken and the family circumstances. These awards are granted for practically every type of course of education, whether secondary, tertiary or commercial. They are designed to cover, or contribute towards, the cost of essential books, fees in cases where government school courses are not available, fares between the child's home and school, essential equipment and material, a uniform allowance in certain years and a maintenance allowance for the child while at school.

The educational scheme also provides for one post-graduate scholarship each year for study overseas, valued at £1,000 per annum for three years.

Higher training education awards are also provided for selected students for post-graduate study in such fields as Physiotherapy, Speech Therapy, Occupational Therapy, Orthoptic Therapy, Laboratory Technique, etc.

The number of children assisted under the educational scheme to 31st December, 1959, was 27,528, and the expenditure on educational awards, post-graduate scholarships and higher training education awards to 31st December, 1959, was £1,406,896.

§ 6. Seamen's War Pensions and Allowances.

The Seamen's War Pensions and Allowances Act 1940 provides for the grant of—

- (a) pensions to Australian mariners and their dependants if the mariner, during the course of his employment, sustained injury through enemy action;
- (b) pensions to dependants of Australian mariners who, while in employment, were killed by enemy action;
- (c) detention allowances to Australian mariners and their dependants (if any) during any period of detention of mariners after capture by the enemy; and
- (d) compensation to Australian mariners in respect of personal effects lost or damaged through enemy action.

Regulations passed in 1942 provided that the wages of an Australian mariner, less the amount of any detention allowance, should continue if, while employed in sea-going service under articles of agreement entered into in Australia, or in the case of a pilot while employed on pilot duty, he fell into the hands of the enemy as a result of that employment and that the wages so continuing should be applied for the benefit of the mariner and his dependants. The wages would be paid by the Government of the Commonwealth of Australia for the first 18 months of the mariner's detention if he was employed in a ship owned by, or under requisition to, that Government, the United Kingdom Government or the Government of any country in the British Commonwealth, and thereafter irrespective of his employment.

Subsequent amendments to the Act and regulations raised pensions to rates corresponding to those payable under the Repatriation Act, and made mariners eligible for general benefits on the same scale as those available under that Act.

The following table gives a summary of the main statistics relating to seamen's war pensions and allowances.

SEAMEN'S WAR PENSIONS AND ALLOWANCES : SUMMARY, AUSTRALIA.

CHAPTER XXX.

MISCELLANEOUS.

This chapter comprises miscellaneous statistics and other descriptive information not directly related to the subjects of the preceding chapters, arranged in sections as follows:—

1. Valuation of Australian Production; 2. Indexes of Production; 3. Consumption of Foodstuffs and Beverages; 4. Patents, Trade Marks and Designs; 5. Copyright; 6. Australian Shipbuilding Board; 7. Commonwealth Scientific and Industrial Research Organization; 8. Mount Stromlo Observatory; 9. Standards Association of Australia; 10. Industrial Design Council of Australia; 11. Film Censorship Board; 12. Australian National Film Board and the Film Division; 13. National Safety Council of Australia; 14. Australian Road Safety Council; 15. Australian Atomic Energy Commission; 16. The United Nations; 17. Australian Representation Abroad; Oversea Representation in Australia; 18. Retail Trade.

§ 1. Valuation of Australian Production.

1. General.—The value of production for Australia is computed in accordance with the decisions reached at the Conferences of Australian Statisticians and principally at the Conference held in 1935. The figures published below have been compiled by the Statisticians in the various States from the latest data available, and relate to 1958–59. The adoption of substantially uniform methods of valuing production and of estimating elements of costs of production and marketing renders the results comparable as between States.

Attention is directed to the fact that the values shown in the tables herein refer only to the production of primary industries and factories and exclude the building and construction industry, those industrial establishments not classified as factories, and certain agricultural and farmyard produce obtained from areas of less than one acre.

The following is a brief explanation of the terms used:—

- (a) *Gross Value of Production* is the value placed on recorded production at the wholesale price realized at the principal markets. In cases where primary products are consumed at the place of production or where they become raw material for a secondary industry, these points of consumption are presumed to be the principal markets.
- (b) *Local Value* (i.e., the gross production valued at the place of production) is ascertained by deducting marketing costs from the gross value. Marketing costs include freight, cost of containers, commission, and other charges incidental thereto.
- (c) *Net Value of Production* represents local value less value of materials used in the process of production. Materials used in the process of production include seed, power, power kerosene, petrol and other oils, fodder consumed by farm stock, manures, dips, sprays and other costs. No deductions have been made for depreciation or certain maintenance costs as particulars are not available for all States. The Net Value of Production is the only satisfactory measure to use when comparing or combining the value of primary industries with those of other industries.

For the years shown in the following tables, no allowance for power, power kerosene, petrol and other oils has been made in New South Wales; and in the case of Tasmania, allowance for these items has been made in 1958–59 only. In the case of the mining and quarrying industry, however, this allowance has been made throughout. Costs of materials used in the process of production are not available for all States in respect of Bee-farming, Trapping, Forestry and Fisheries, and local values have been used for these industries with consequent overstatement in net values.

2. Value of Production, Australia, 1958-59.—The following table shows particulars of the gross, local and net values of production in Australia by industries during the year 1958-59.

GROSS, LOCAL AND NET VALUE OF PRODUCTION OF PRIMARY INDUSTRIES AND FACTORIES : AUSTRALIA, 1958-59.

(£'000.)

Industry.	Gross Production Valued at Principal Markets.	Local Value— Gross Production Valued at Place of Production.	Net Value of Production (with- out deduction of depreciation or maintenance).

(b) Local value.

In the chapters dealing with the respective industries (except trapping and mines and quarries), tables will be found showing the total value of production and the value per head of population for the industry by States for a series of years up to 1958-59.

§ 2. Indexes of Production.

In the first two tables in this section, indexes of price and quantum (i.e. value at constant prices) of production are given for the following industrial groups, namely:—Agriculture, Pastoral, Farmyard and Dairying, and All Farming combined (including separate indexes for Wool and Products other than Wool). In the third table, indexes of quantum (i.e. value at constant prices) of production, exports and consumption of farm products for food use are shown.

1. **Farm Production Prices Indexes.**—The Farm Production Price Indexes shown in the following table relate to average "prices" of agricultural, pastoral, farmyard and dairying products realized at the principal markets of Australia. The "price" data used are average unit values for the total quantities of the relevant commodities produced or marketed in each year and the index numbers therefore measure both the effects of changes in prices (as such) and of variations in the quality, type, usage, etc., of products marketed. The index numbers for any year relate to the average values of products produced or marketed in that year, irrespective of the periods in which payment is received by producers.

The indexes have been calculated by the fixed-base weighted aggregative method. "Prices" for each commodity in any year are obtained by dividing gross value of production by the quantity produced in that year. In the original published series of Production Price Index Numbers, the average quantities of the relevant commodities *produced* in the period 1923–24 to 1927–28 were used as fixed weights. This series, re-computed to the base, average 1936–37 to 1938–39 = 100, was published in earlier issues of the Official Year Book (see No. 43, page 1050). For 1936–37 and later years, the original series was replaced in December, 1952, by a revised series in which average quantities of each product *marketed* during the period 1946–47 to 1950–51 were used as fixed weights. In the revised series, the regimen was extended and modified to include farm products (as defined by Australian Statisticians) in all cases. Certain other refinements were also incorporated in the revised indexes, the principal of which was the omission from the weights used for the All Farming Index of quantities of crops marketed for livestock feeding in Australia.

FARM PRODUCTION : INDEXES OF PRICES AT PRINCIPAL MARKETS, AUSTRALIA.

(Base: Average 1936–37 to 1938–39 = 100.)

1958–59	322	396	386	369	370	369

(a) Revised.

2. **Indexes of Quantum (i.e. Value at Constant Prices) of Farm Production.**—The indexes shown in the following table relate to gross output of farm products valued at constant prices. They have been calculated by revaluing quantities of each farm product included in the indexes at the average unit gross value of each product for the base years.

In the original published series, the period 1923–24 to 1927–28 was adopted as the base for revaluing each farm product. This series, re-computed to the base, average 1936–37 to 1938–39 = 100, was published in earlier issues of the Official Year Book (*see* No. 43, page 1051). For 1936–37 and later years, the original series was replaced in December, 1952 by a revised series in which average unit values for the period 1936–37 to 1938–39 were used. The regimen used for the revised series was extended and modified to include farm products (as defined by Australian Statisticians) in all cases. Certain other refinements were incorporated in the revised indexes, the principal of which was the omission, in calculating the All Farming Index, of quantities of crops fed to livestock in Australia.

INDEXES OF QUANTUM(*a*) OF FARM PRODUCTION, AUSTRALIA.

(Base: Average 1936–37 to 1938–39 = 100.)

1958–59	165	159	119	149	164	145

(*a*) Indexes of value at constant prices, i.e., quantities revalued at average unit values for the base years (*see* text preceding table).

3. **Farm Products for Food Use: Indexes of Quantum (i.e. Value at Constant Prices) of Production, Exports and Consumption.**—The indexes shown in the following table have been calculated by revaluing quantities of each farm product included in the indexes at the average unit gross value of each product for the years 1936–37 to 1938–39. The items included comprise products in the form in which they are sold from farms in all cases except live-stock sold for slaughter for meat, which are included in terms of dressed carcass weight of meat. Quantity data relating to exports include exports of processed food in terms of farm product equivalent. The indexes of production relate basically to gross output of farm products for food use, including crops exported for stock-feeding overseas. Particulars are not available prior to 1946–47 except for the base years.

**FARM PRODUCTS FOR FOOD USE: INDEXES OF QUANTUM^(a) OF
PRODUCTION, EXPORTS AND CONSUMPTION.**

(Base: Average 1936-37 to 1938-39 = 100.)

Year.	Production.		Exports.		Consumption in Australia.

(a) Indexes of value at constant prices, i.e., quantities revalued at average unit values for the base years (1936-37 to 1938-39). (b) Subject to revision.

§ 3. Consumption of Foodstuffs and Beverages.

1. **Quantities Consumed.**—Issues of the Official Year Book up to No. 36 included a statistical survey of the movement in the consumption in Australia, in total and per head of population, of a selected number of commodities over a period of years up to 1940-41 (see Official Year Book No. 36, pp. 1098-1100). In issue No. 37, these long-term comparisons were replaced by more detailed information covering consumption of the principal foodstuffs and beverages in annual periods since 1944 in comparison with average annual consumption during the three years ended 1938-39. In this issue, the annual periods extend from 1954-55 to 1958-59.

The estimates of total consumption and consumption per head of population in Australia in the two tables which follow have been compiled by deducting net exports from production and allowing for recorded movements in stocks of the respective commodities. While the estimates may be accepted generally as reasonably accurate, there are some deficiencies to which attention should be directed. These relate chiefly to the quantities of poultry, game and fish (fresh and shell) and the quantities of visible oils and other fats entering consumption. In addition, little information is available on the quantities of vegetables, fruit, eggs, etc., which householders produce for their own requirements and the extent of wastage occurring in the marketing of foodstuffs. In all these cases, careful estimates have been compiled from the best available data, and the quantities shown as entering consumption in Australia have been adjusted to allow for these circumstances. The absence of particulars for stocks of certain commodities has resulted in some inaccuracies in the estimates of annual consumption. Consumption of foodstuffs is measured in general at "producer" level. As a result, no allowance is made for wastage before the foodstuffs are consumed. In recent years, wastage of foodstuffs has possibly been less than hitherto because of more efficient distribution and storage methods. Furthermore, it is likely that the quantities of foodstuffs shown in the following pages as available for consumption have been supplemented by an increase in the aforesaid production by householders for their own requirements. Neither of these factors has been taken into account, and it is possible that, as a result, some understatement has occurred in the following consumption estimates. Except in a few special cases, no adjustment has been made for changes in stocks held by wholesalers and retailers. Where no allowance is made, it is considered unlikely that these stocks would make any appreciable difference to consumption estimates. Allowance has

not been made for the purchase of foodstuffs for dispatch overseas as gifts in bulk and by parcel post. These deficiencies, however, do not seriously impair the accuracy of the estimates compiled.

The estimates of consumption per head of population shown in the second of the following tables have been checked, wherever possible, with data from other sources (principally from the Food Consumption Survey conducted in 1944 by the Nutrition Committee of the National Health and Medical Research Council) which confirm the reliability of the methods used.

More detailed information on the consumption of foodstuffs and beverages is contained in the Statistical Bulletin: *Food Production and the Consumption of Foodstuffs and Nutrients in Australia*, issued by this Bureau.

2. **Level of Nutrient Intake.**—The table below shows details of the estimated supplies of nutrients available for consumption in Australia during annual periods since 1954-55 in comparison with the annual average for the three years 1936-37 to 1938-39. The table has been compiled by the Nutrition Section of the Commonwealth Department of Health and is based on the estimates of the quantity of foodstuffs available for consumption per head of population shown in the preceding table.

ESTIMATED SUPPLIES OF NUTRIENTS AVAILABLE FOR CONSUMPTION:
AUSTRALIA.

(Per Head per Day.)

Nutrient.	Unit.	Average 1936-37 to 1938-39.	1954-55.	1955-56.	1956-57.	1957-58.	1958-59. (a)

NOTE.—The conversion factors used are based on factors contained in the “*Table of Composition of Australian Foods*” (Anita Osmond and Winifred Wilson, Canberra, 1954).

§ 4. Patents, Trade Marks and Designs.

1. **Patents.**—(i) *General.* Patents for inventions are granted under the Patents Act 1952–1955, which applies to the Commonwealth of Australia and the Territories of Norfolk Island, Papua and New Guinea. The Act is administered by a Commissioner of Patents. The principal fees payable up to and including the grant of a patent amount to £17 10s. Renewal fees are payable as follows:—£5 before the expiration of the fourth year, and an amount progressively increasing by £1 before the expiration of each succeeding year up to the final fee of £16, payable before the expiration of the fifteenth year. An extension of time for six months for payment of a renewal fee may be obtained. Patents granted under the repealed Acts (Patents Act 1903–1950) are subject to the renewal fees under those Acts.

(ii) *Summary.* The number of separate inventions in respect of which applications were filed and the number of letters patent sealed during the years 1955 to 1959 are shown in the following table.

PATENTS : AUSTRALIA.

Particulars.	1955.	1956.	1957.	1958.	1959.
Applications	8,869	9,396	9,899	10,511	11,430
Applications accompanied by provisional specifications ..	3,220	3,465	3,683	3,919	4,063
Letters patent sealed	5,931	6,056	6,407	6,093	5,488

2. **Trade Marks and Designs.**—(i) *Trade Marks.* Under the Trade Marks Act 1955–1958 the Commissioner of Patents is also Registrar of Trade Marks. This Act has replaced the Trade Marks Act 1905–1948.

Provision is made for the registration of users of Trade Marks and for their assignment with or without the goodwill of the business concerned.

A new classification of goods has been adopted and Trade Marks registered under the repealed Acts are reclassified on renewal.

(ii) *Designs.* Under the Designs Act 1906–1950, the Commissioner of Patents is also Registrar of Designs.

(iii) *Summary.* The following table shows the applications for trade marks and designs received and registered during the years 1955 to 1959.

TRADE MARKS AND DESIGNS : AUSTRALIA.

Particulars.	1955.	1956.	1957.	1958.	1959.
Trade Marks—					
Received	4,630	4,402	4,589	5,331	5,436
Registered	1,848	5,360	3,569	4,219	3,792
Designs—					
Received	1,330	1,130	1,394	1,362	1,366
Registered	819	458	917	1,758	819

3. *Revenue.*—Revenue of the Commonwealth Patent, Trade Marks, Design and Copyright Offices for the years 1955 to 1959 was as follows:—1955, £234,125; 1956, £293,918; 1957, £302,279; 1958, £347,659; 1959, £348,523.

§ 5. Copyright.

1. *Legislation.*—Copyright is regulated by the Commonwealth Copyright Act 1912–1950 wherein, subject to modifications relating to procedure and remedies, the British Copyright Act of 1911 has been adopted and scheduled to the Australian Law. The Act is administered by the Commissioner of Patents.

Reciprocal protection of unpublished works was extended in 1918 to citizens of Australia and of the United States of America, under which copyright may be secured in the latter country by registration at the Library of Congress, Washington. The Commonwealth Government promulgated a further Order in Council which came into operation on 1st February, 1923, and extended the provisions of the Copyright Act to the foreign countries of the Copyright Union, subject to the observance of the conditions contained therein.

2. *Applications and Registrations.*—The following table shows under the various headings the number of applications for copyright received and registered for the years 1955 to 1959.

§ 6. Australian Shipbuilding Board.

1. *Constitution.*—Originally established in 1941 under National Security Regulations, the Board has been reconstituted a number of times since its inception and in 1948 was constituted on a permanent basis under the Supply and Development Act. At present, it operates under the control of the Minister for Shipping and Transport. The membership of the Board consists of a Chairman, who is the General Manager, a Deputy Chairman, a Finance Member and two other members, one of whom represents the Naval Board.

2. Functions.—The existing functions of the Board which have been summarized in earlier issues of the Official Year Book, are set out in detail in regulation 22 (4) of the Supply and Development Regulations.

In April, 1960, the Government announced that legislation was to be introduced to re-define the Board's functions in the light of the acceptance by the Government of recommendations by the Tariff Board for continued Commonwealth assistance to the Australian shipbuilding industry. It is expected that the legislation will be introduced to Parliament at an early date.

At the same time, the Government decided that the present temporary staff organization, which has been carried on since establishment of the Board in 1941, would be replaced by a permanent organization. This would mean that superannuation and similar Public Service benefits would be available to members of the staff.

In the exercise of its functions, the Board is responsible for—(i) the design of vessels; (ii) the calling of tenders and placement of orders; (iii) co-ordination of the Board's supplies to shipbuilders, e.g., machinery and certain equipment; (iv) supervision of construction; (v) acceptance of vessels after sea trials; and (vi) administration associated with ship repairs, marine engines, spare parts, etc.

The Board is also responsible for recommending, within the limits prescribed by the Commonwealth Government, the amount of subsidy to be paid on merchant ships constructed in Australia. In April 1956, the Government accepted a recommendation made by the Tariff Board that the maximum subsidy on ships built in Australia for the coastal trade should be increased from 25 per cent. to 33½ per cent. of the cost of construction. The method and level of assistance to the industry was again re-examined by the Tariff Board following the public hearings during November and December, 1958, and as a result of its examination, the Tariff Board recommended, and the Government accepted, that the present method of assistance to the shipbuilding industry be retained and the maximum rate of subsidy remain at 33½ per cent. of the cost of construction.

In order to take advantage of the subsidy, private shipowners are required to place their orders for vessels through the Board, which has thus become the ordering authority for all vessels built in Australian yards on which a subsidy is paid.

The Board has also undertaken the preparation of plans and drawings for most of the yards, as the level of ship construction in Australia does not warrant each yard employing specialists in naval architecture. In this way, the Board has assisted in raising the efficiency of the industry as a whole and also in the development of individual yards. (For a more detailed reference to the constitution and functions of the Board *see* Official Year Book No. 37, p. 1170).

In order to assist the shipbuilding industry further, the Board has also encouraged the construction of marine engines in Australia including steam engines and several well known types of diesel engines manufactured under licence. The larger marine diesel engines under construction at 1st May, 1960, were three "Doxford" type, two of 5,500 b.h.p. and one of 4,400 b.h.p., and one "Polar" type of 1,310 b.h.p.

3. Construction Programme.—From its inception to 1st May, 1960, the Board had arranged for the construction of 65 vessels of over 300 gross tons and totalling 395,151 tons deadweight. During the war, the Board was also responsible for the construction of numerous small craft and a 1,000 ton floating dock.

Current orders at 1st May, 1960, placed by the Board, were for the construction of 10 vessels totalling 119,150 deadweight tons. The vessels consisted of one 32,250 d.w.t. oil tanker on behalf of Ampol Petroleum Ltd., one bulk ore carrier of 19,000 d.w.t. on behalf of the Broken Hill Pty. Co. Ltd., two bulk ore carriers each of 16,400 d.w.t. on behalf of Bulkships Ltd., one 2,500 d.w.t. passenger/cargo vessel for the State Shipping Service of Western Australia, one 2,000 d.w.t. container vessel for Wm. Holyman & Sons Pty. Ltd., one 850 d.w.t. roll-on roll-off passenger/cargo ferry for the Adelaide Steamship Co. Ltd., together with two bulk carriers of 14,000 d.w.t. each, and one roll-on roll-off cargo ferry of 1,750 d.w.t. all for the Australian National Line.

In addition, orders have been placed by the Board for one 90 foot general purpose vessel for the Department of the Navy and two 70 foot landing craft for the Department of the Army.

§ 7. Commonwealth Scientific and Industrial Research Organization.

1. **General.**—By the Science and Industry Research Act 1949, the previously existing Commonwealth Council for Scientific and Industrial Research was re-organized under the title of the Commonwealth Scientific and Industrial Research Organization. An account of the organization and work of the former Council, and of the earlier Commonwealth Institute of Science and Industry from which the Council was formed, was given in earlier issues of the Official Year Book. (*See* No. 14, p. 1061 and No. 37, p. 1183.)

2. **Science and Industry Research Act 1949-1959.**—This Act provides for—

- (a) an Executive of the Organization consisting of nine members to be appointed by the Governor-General, at least five of whom shall be persons possessing scientific qualifications; and
- (b) an Advisory Council of the Organization, consisting of the members of the Executive, the Chairman of each State Committee constituted under the Act, and such other members as the Advisory Council, with the consent of the Minister, co-opts by reason of their scientific knowledge.

The powers and functions of the Organization are as follows:—(a) To initiate and carry out scientific research in connexion with primary or secondary industries in Australia; (b) to train research workers and to establish industrial research studentships and fellowships; (c) to make grants in aid of pure scientific research; (d) to establish and make grants to industrial research associations in any industry; (e) to test and standardize scientific apparatus and instruments; (f) to collect and disseminate scientific and technical information; (g) to publish scientific and technical reports and periodicals; and (h) to act as a means of liaison between Australia and other countries in matters of scientific research.

3. **Science and Industry Endowment Act 1926-1949.**—Under this Act, the Government established a fund of £100,000, the income from which is used to provide assistance (a) to persons engaged in scientific research; and (b) in the training of students in scientific research. Provision is made for gifts or bequests to the fund which is controlled by a trust consisting of the Executive of the Organization. In accordance with the Act, arrangements have been made to send a number of qualified graduates abroad for training in special fields of work.

4. **Work of the Organization.**—The activities of the Commonwealth Scientific and Industrial Research Organization have necessitated a widespread and adaptable arrangement of its research laboratories. Undesirable centralization has been avoided mainly in two ways. In the first place, the policy has been followed of establishing laboratories in different places in the Commonwealth wherever the necessary facilities, contacts and other suitable conditions could best be found. Secondly, the Act provides for the establishment of a State Committee in each of the six States. These Committees are widely representative of scientific and industrial interests, and advise the Executive or the Advisory Council on general matters and on particular questions of investigation and research.

For about twelve years after its establishment, the work of the previous Council was devoted mainly to the solution of problems affecting the agricultural and pastoral industries. Unlike manufacturing concerns, which often employ their own scientific staffs, the farmers and the pastoralists are dependent on outside help for the solution of their problems which require research. It was a recognition of the greater need of the primary producer which directed the Council's early policy. In 1937, however, the Commonwealth Government decided to extend the activities of the C.S.I.R. so as to provide assistance to secondary industries, and several laboratories have been established for work in that field; it was thus in the fortunate position of being able to render to these industries assistance of vital importance almost immediately after the outbreak of war. In fact, the remarkable technological advances and developments in secondary industrial production during the war would have been to a large extent impossible had it not been for the assistance rendered by scientific research, and this may well serve as a forceful illustration of what may be accomplished in times of peace.

For the purpose of carrying out its research work, there are established within the Organization a number of Divisions and Sections. The Divisions, of which there are now twenty-five comprise the major establishments for which special laboratory buildings have been erected and equipped; the Sections generally include establishments which have not reached a stage of development, so far as the scope and magnitude of their operations are concerned, to justify their designation as Divisions. As the Organization's investigations

extend on a Commonwealth-wide basis and as many of the investigations which are being conducted—particularly those concerned with problems affecting the agricultural and pastoral industries—necessitate experimental work in the field, a number of field stations are established in various parts of Australia.

The Divisions which have been established are as follows:—

- Plant Industry, with main laboratories at Canberra and Brisbane and field stations.
- Entomology, with main laboratories at Canberra and field stations.
- Animal Health (main laboratory in Melbourne), Animal Genetics (main laboratory in Sydney) and Animal Physiology (main laboratory in Sydney) which together comprise the Animal Research Laboratories.
- Biochemistry and General Nutrition, with main laboratories at Adelaide and field stations.
- Soils, with main laboratories at Adelaide and extensive operations in the field.
- Forest Products, with main laboratories in Melbourne and field experiments.
- Food Preservation and Transport, with main laboratories at Homebush (New South Wales) and a subsidiary laboratory in Brisbane.
- Fisheries and Oceanography, with main laboratories at Cronulla (New South Wales), subsidiary laboratory at Thursday Island, and experimental work in coastal waters of Australia.
- Metrology, Physics and Electrotechnology, comprising the National Standards Laboratory at Sydney.
- Radiophysics, with main laboratory at Sydney.
- Physical Chemistry, Chemical Physics and Mineral Chemistry, which together with the Sections of Organic Chemistry, Cement and Ceramics and Chemical Engineering, comprise the Chemical Research Laboratories in Melbourne.
- Tribophysics, with laboratories in Melbourne.
- Building Research, with laboratories in Melbourne.
- Mathematical Statistics, with main laboratory in Adelaide.
- Meteorological Physics, with main laboratory in Melbourne and field station.
- Land Research and Regional Survey, with headquarters in Canberra, and field stations at Alice Springs and Katherine (Northern Territory) and Ivanhoe (Kimberley, Western Australia).
- Protein Chemistry (Melbourne), Textile Industry (Geelong, Victoria) and Textile Physics (Sydney), which together comprise the Wool Research Laboratories.

The following are the Sections:—

- Commonwealth Research Station, Murray Irrigation Area, Merbein (Victoria).
- Irrigation Research Station, Griffith (New South Wales).
- Upper Atmosphere, with laboratory at Camden (New South Wales).
- Dairy Research, Melbourne.
- Mineragraphic Investigations, Melbourne.
- Ore-dressing Investigations, Melbourne and Kalgoorlie.
- Fodder Conservation, Melbourne.
- Physical Metallurgy, Melbourne.
- Wool Textile Research Laboratories, Geelong, Melbourne and Sydney.
- Coal Research, Sydney.
- Wildlife Survey, with main laboratory in Canberra, subsidiary laboratory at Albury, and field experiments.
- Soil Mechanics, Melbourne.
- Engineering, Melbourne.
- Agricultural Research Liaison Section, Melbourne.
- Industrial Research Liaison Section, Melbourne.
- Editorial and Publications Section, Melbourne.

In addition to its investigational work, the Organization deals with inquiries covering a wide range of scientific and technical subjects and maintains Scientific Liaison Offices in London and Washington.

An Agricultural Research Liaison Section established at the Organization's Head Office assists in making results in agricultural research speedily available to State Departments of Agriculture for use in their extension work.

An Industrial Research Liaison Section has also been established at Head Office to foster liaison in the secondary and manufacturing fields.

The Organization's Head Office, with administrative and executive staff, is in Melbourne, and associated with it are the Organization's Central Library, Agricultural Research Liaison Section, Industrial Research Liaison Section and Editorial and Publications Section. The funds for the Organization are provided from two main sources, namely, from Commonwealth revenue by Parliamentary appropriation, and from industry directly or indirectly by way of contributions and special grants. The fact that contributions and grants account for over one-eighth of the total annual expenditure indicates that the C.S.I.R.O. has succeeded in a very large measure in gaining the confidence of the public.

The activities of the C.S.I.R.O. are now so comprehensive in their scope and so widely distributed that it is not an easy matter to present an adequate picture of them in a concise form. For details of the investigations in progress, reference should be made to the Annual Report of the Organization.

§ 8. Mount Stromlo Observatory.

Mount Stromlo Observatory—since 1957 incorporated into the Australian National University—is the largest observatory of the southern hemisphere. In its instrumental resources, it is second only to some of the great observatories of America. Since it is located south of the Equator, it is placed especially advantageously for the conduct of research into the structure of the Milky Way System and of the Star Clouds of Magellan. The telescopes and auxiliary equipment at the Observatory provide access to parts of the sky that are forever hidden from the view of northern hemisphere astronomers. Mount Stromlo astronomers have therefore a special responsibility to do research on stars and other celestial objects at far southern declinations.

Mount Stromlo Observatory is in effect the Department of Astronomy of the Australian National University and its staff members have therefore the two-fold assignment of carrying out their personal researches and of assisting in the training of the future astronomers of Australia.

Mount Stromlo is a ridge of hills, approximately one mile long, situated at 35° 19' 16" South Latitude and 149° 0' 20" East Longitude, seven miles west of the city of Canberra. Its highest point is about 2,560 feet above sea level, which means that the mountain top is 700 feet above the surrounding countryside. Mount Stromlo is the highest easily accessible point in the vicinity of Canberra which is well screened from the lights of the city. The view from the top of Mount Stromlo is one of the finest in the Australian Capital Territory.

The first permanent installation on the site was established in 1911, but, because of the war and other circumstances, the development of the Observatory was delayed. It was only in 1925 that regular astronomical work could be undertaken, at which time the Oddie Telescope came into regular use. The first Director and Founder of the Observatory was Dr. W. B. Duffield, who, unfortunately, died in 1929 at the early age of 50 years. Following an interval with Mr. W. B. Rimmer as Officer-in-Charge, the second Director, Dr. Richard van der Riet Woolley, arrived late in 1939 and he left his post in 1956 to become Her Majesty's Astronomer Royal at the Royal Greenwich Observatory at Herstmonceux. During 1956, Dr. A. R. Hogg was Acting Director and in 1957 the third and present Director, Dr. Bart J. Bok, took up office.

Not counting the foreign visitors, the scientific staff of Mount Stromlo Observatory consists of twelve astronomers and five Scholars in residence. Taking into account the technical, clerical and maintenance personnel, the total staff list comes to approximately sixty persons.

Mount Stromlo Observatory possesses eight telescopes with apertures ranging from five inches for the Zeiss Camera mounted on the side of the Oddie Telescope to 74 inches for the Giant Reflector, one of the two largest of the southern hemisphere. In addition to the major telescopes, there are two instruments which assist the Time Service in its work and two oversea groups have major telescopes on the Observatory grounds. The Yale-Columbia Station, maintained and operated by a special staff member appointed jointly by the Yale and Columbia Observatories in America, has a 26-inch Refractor mounted at Mount Stromlo and the Upsala Observatory of Sweden maintains and operates its own 26-inch Schmidt Telescope, with a resident Swedish Observer.

The principal areas of research at Mount Stromlo are:—

(i) Studies of the structure and dynamics of the Milky Way system with special emphasis on evolutionary aspects of these problems. The observational data which are gathered are the magnitudes, colours, spectral types, and radial velocities of selected stars. Star clusters and variable stars receive much attention. Photographic and photoelectric techniques are blended in about equal proportions.

(ii) Comparable work on the Large and Small Magellanic Clouds, the two satellite systems of the Milky Way system which are the special responsibility of southern hemisphere astronomers.

(iii) Studies of the interstellar medium of gas and dust, its relation to the spiral structure of our galaxy, its physical properties—generally considered in conjunction with radio-astronomical data—and its evolutionary status.

(iv) Studies of the physics of the stars of the southern hemisphere by spectrographic means and by photoelectric techniques, the latter employing selected colour filters with narrow transmission bands. In these purely astrophysical researches, special attention is being given to supergiant stars, eclipsing variables, cepheid and RR Lyrae variables, planetary nebulae and white dwarfs.

(v) Mount Stromlo maintains the National Time Service, which operates currently a photographic zenith tube, a moon camera and a small transit instrument. The studies of the variable rotation of the earth and of the variation of latitude are the principal topics for research.

Mount Stromlo Observatory is at present engaged in a major expansion of equipment and staff. The principal projects that are already on the way toward completion are the following:—

(i) A major spectroscopic development is that of the construction of a Coudé Spectrograph for the 74-inch reflector. The spectrograph is housed in a newly-constructed pit, which goes to a depth of 28 feet underground in the rock surface at the end of the north pier of the 74-inch reflector. This instrument should open up the whole field of high-dispersion spectroscopy of the southern heavens.

(ii) A Nebular Spectrograph is under construction to permit spectrographic research on faint stars, nebulae and distant galaxies.

(iii) Much time and effort is being spent upon the improvement of photoelectric techniques and instrumentation, which should permit measurement with confidence of far fainter stars than have hitherto been observed in the southern sky. The research is to be combined in the future with applications of image converter tubes and other means for extending the photographic limits of the Mount Stromlo telescopes.

(iv) An IBM 610 Computer is now installed at the Observatory and it serves all research divisions.

(v) The observing and measuring equipment for the Mount Stromlo Time Service is undergoing a steady improvement and much attention is being given to the whole problem of digitation and automatization of telescopic and measuring equipment.

(vi) The programme of graduate education in astronomy is being gradually enlarged to provide for a total of 6 to 8 scholars at any one time, preferably with two from overseas included.

Mount Stromlo Observatory suffers from excessive cloudiness and plans are well on the way for the establishment of a permanent Field Station at a locality either in New South Wales or in Victoria with 50 per cent. to 60 per cent. of clear skies at night. Toward the end of 1959, the most promising site available (on top of Mount Bingar near Yenda and Griffith in New South Wales) was selected as the site for extensive testing, and it will serve as a Control Station for observations at other favoured sites. At Mount Bingar, there is at present in operation a 26-inch reflector, which is used primarily for photoelectric research and for the visual inspection of star images. The results to date at Mount Bingar have been quite pleasing and the site looks definitely promising, but it is still too early to tell how it will compare with the other sites selected for special study, near Condobolin and near Coonabarabran in New South Wales, and near Natimuk in Victoria. The next major instrument for the Observatory will be mounted at the Field Station—it will be in all probability a 40-inch reflector of modern design.

The Observatory has always prided itself on its visitors from overseas. At all times at least one and often two distinguished visitors from overseas are in residence at Mount Stromlo for purposes of scientific research; they generally stay for periods of six months to one year. The study leave provisions for the Australian National University permit staff members to go overseas periodically and thus remain in contact with the flow of

astronomical thought and new developments in instrumentation of importance for the future of the Observatory. Mount Stromlo astronomers play leading parts in the International Astronomical Union, which meets once every three years, and they are members of many Commissions of this Union.

Major research papers of the Observatory are published in monograph form as "Memoirs of the Mount Stromlo Observatory", a collection which is now in its third volume. On publication, these memoirs are immediately distributed to all observatories, astronomical institutions and other interested bodies of the world, and they are also deposited with the Commonwealth National Library and the universities of Australia. On an exchange basis, the Observatory Library receives many publications from overseas.

Shorter contributions are published in professional astronomical journals in Great Britain, the United States and Australia. Reprints of many of these papers are distributed in the same manner as are the Memoirs.

The Observatory caters for visitors according to a carefully arranged plan. Day-time visits without previous arrangement may be made on weekdays which are not holidays either at 11 a.m. or 3 p.m., and on Saturdays, Sundays and Public Holidays between 2 p.m. and 4.30 p.m., with the tours starting at half-hourly intervals (no scheduled morning tours on these days). It is more difficult for the Observatory to accommodate visitors at night, but there are some eight or nine special nights each year, with an attendance limited to 100, when the heavens may be viewed through several major telescopes. Groups of ten to fifteen persons may visit the Observatory for limited inspection on Wednesday evenings. Special arrangements must be made in advance for any one who wishes to visit the Observatory at night. No interference with the regular night-time observing can be tolerated on nights other than those listed. It may be of interest to note that during 1959 the number of day-time visitors ran to well over 15,000 and that at night approximately 1,700 people visited the Observatory. Mount Stromlo Observatory publishes a descriptive illustrated booklet as well as a set of photographic postcards.

Mount Stromlo Observatory is at present the major observatory in Australia, but it is by no means the only institution of its kind. The field of radio astronomy is covered by the Radiophysics Laboratory of the C.S.I.R.O. in Sydney which is recognized the world over as one of the finest institutions of this sort. The C.S.I.R.O. also maintains in Sydney an important Solar Physics Division, which is a part of the National Standards Laboratory. Other observatories in Australia are the century-old Sydney Observatory and the Observatory in Perth, both of which devote their time largely to the measurement of positions and motions of the stars.

Sooner or later, Australia will have to house, or build for itself, a really large telescope, say a reflector with an aperture of 120 inches. Before it can be decided where to put such an instrument, extensive studies of astronomical conditions for observation at night should be made on an Australia-wide basis. Mount Stromlo Observatory has undertaken the task of collecting such much-needed material. At twenty selected sites in Australia (in New South Wales, Victoria, South Australia and Western Australia) nightly observations are made of cloudiness, transparency of sky and the so-called scintillation (trembling) of the stars. Statistics of such observations give a first indication of the quality of each site and the present plan is to study the most promising sites further with relatively powerful test equipment, with the ultimate purpose of obtaining a clear indication where any future major telescope development in Australia should be made.

§ 9. Standards Association of Australia.

The Standards Association of Australia is the national standardizing organization of Australia, and issues Australian standard specifications for materials and codes of practice.

The Association was established in July, 1929, by the amalgamation of the Australian Commonwealth Engineering Standards Association and the Australian Commonwealth Association of Simplified Practice. It is an independent body in close touch with modern industrial requirements and has the full recognition and support of the Commonwealth and State Governments and industry. It was incorporated by Royal Charter in 1950.

The sole executive authority of the Association is vested in the Council, on which industry is fully represented, together with official representatives of the Commonwealth and State Governments and their technical departments, and of scientific, professional and commercial organizations. Voluntary assistance is rendered in the drafting of specifications

and codes by several thousand individuals who are experts in their particular fields, and are organized into some hundreds of committees. These committees are grouped under broad industry headings including civil engineering and building construction, mechanical engineering, electrical engineering, chemicals, timber, transportation, aircraft materials, ferrous and non-ferrous metallurgy, textiles, mining, ceramics, medical and dental materials, household and domestic economy and plastics.

These committees are comprised of nominated representatives of manufacturing, distributing and purchasing organizations, and of scientific and other expert authorities in the particular field of the project being dealt with. The operations of these committees are co-ordinated and supervised by committees broadly representative of the whole industry within which the respective projects are included.

The specifications of the Association provide a suitable standard of performance, quality and dimension and an equitable basis for tendering. They help to eliminate redundant qualities and sizes. They enable purchasers to obtain their requirements with greater assurance of satisfaction, with more rapid delivery and without the necessity of drafting individual specifications.

The underlying principles covering the preparation of the specifications and codes are that they shall be in accordance with the needs of industry; that the common interests of producer and consumer be maintained; that periodical revision should keep the work abreast with progress; and that standardization be arrived at by general consent without coercion.

Organizations, companies, firms and individuals interested in the work of the Association are eligible for subscription membership. Members are entitled to free copies of the publications of the Association and to the use of the library and its Special Information Service. Bibliographical research is undertaken for committees, members of the Association, and industry in general. Many hundreds of inquiries are answered each year.

The Association has international affiliations and the standards of all British and foreign countries are filed in the library and are accessible to members. It is a member, representing Australia, of the International Organization for Standardization (ISO). The Association also administers the Australian National Committees of the International Electrotechnical Commission and the International Commission on Large Dams.

The Association is also the representative of the British Standards Institution, and all British standards may be purchased from headquarters and branch offices in the various States.

The headquarters of the Association are at Science House, Gloucester Street, Sydney, and branches of the Association are situated at Temple Court, 422 Collins Street, Melbourne; School of Arts Building, 166 Ann Street, Brisbane; Alliance Building, Grenfell Street, Adelaide; 10 Hooper Street, West Perth; c/o Engineering School, University of Tasmania, Sandy Bay; and Howard Smith Chambers, Watt Street, Newcastle.

§ 10. Industrial Design Council of Australia.

The Industrial Design Council of Australia was established in June, 1958, for the purpose of encouraging better design in Australian-made goods and fostering an appreciation of good design throughout the community. The decision to set up the Council arose from a realization on the part of representatives of industry and government, designers and educationists, that there was a pressing need in Australia for an independent and authoritative body to promote better design in the interests of trade development.

The Council has a membership fully representative of industry, commerce and government, together with designers and educationists. Initial finance has been raised by donations from industry and commerce, and a grant of £10,000 has been made by the Commonwealth Government for establishment purposes.

The Council aims at assisting Australian industry in every possible way in the field of design. One of its first activities was a lecture series on product design, held in Sydney and Melbourne, and there has been a demand for further lectures on aspects of industrial design.

Other projects include the setting-up of a Design Index, providing a photographic catalogue of well-designed Australian goods, for reference by manufacturers, retailers, architects, designers and the public; a Register of Designers, providing a comprehensive reference to Australian designers to assist those seeking their services; Displays and exhibitions of well-designed goods, both local and overseas; Design Training, the council is aware of the urgent need to raise the standard of training in industrial design and will co-operate with education authorities to this end; Information services, it is intended to establish information offices in both Sydney and Melbourne, and later in other States, to provide information on all matters concerned with design.

The offices of the Council are in ICI House, 1 Nicholson Street, Melbourne, C.2.

§ 11. Film Censorship Board.

1. **Legislation.**—The Commonwealth Government's powers over censorship of films extend only to imported films and imported advertising matter and stem from the Customs Act. Under that Act, the Customs (Cinematograph Films) Regulations provide for the appointment of a Film Censorship Board whose function is to ensure that films and related advertising material coming within certain defined categories are not admitted into Australia. Under those regulations, the Film Censorship Board may pass films in their original form, reject them, or pass them after eliminations have been made. The Commonwealth Regulations give the Board no power to classify films.

Legislation passed by the State Governments of Victoria, Queensland, Western Australia and Tasmania names the Commonwealth Film Censorship Board as the censorship authority and vests in it the power to classify films as suitable for general exhibition or otherwise.

The State Acts give the Commonwealth Board the authority to censor films made in Australia for commercial exhibition and advertising matter made in Australia.

The Censorship organization comprises a Censorship Board of seven persons and an Appeal Censor, the headquarters being in Sydney. Importers have a right of appeal to the Minister against decisions of the Board and the Appeal Censor.

2. **Import of Films.**—(a) *35mm. Films for Exhibition in Motion Picture Theatres.* In 1959, 1,017 films comprising approximately 4½ million feet were censored. This represents approximately 812 hours' screening time. 483 of these films originated in the United States of America, 283 in the United Kingdom and 251 in other countries. Of the last-mentioned, U.S.S.R. 42, Germany 34, France 33, Italy 26, Greece 22, and China 13 were the principal suppliers.

Included in the above were 457 full-length feature films which constitute the main theatrical attractions. This was a decrease of 6 compared with the imports for 1958. Feature films came mainly from the United States of America 208, the United Kingdom 120, Germany 22, Greece 21, France 20, Italy 18, U.S.S.R. 18, and Japan 7.

Twenty feature films were rejected and cuts were made from 121, mainly because of excessive violence.

Feature films classified as suitable for general exhibition numbered 254 and 203 were not suitable for children. Of the latter, 29 carry the special condition that all advertising shall indicate that they are suitable only for adults. These classifications are advisory only and are designed to enable picture-goers and particularly parents to obtain a general idea of the nature of any particular film.

In addition to the above imported films, 201 35mm. films of 206,264 feet produced in Australia were cleared. These were mainly newsreels and documentaries and concerned the Board only when intended for commercial exhibition or export. This figure does not represent the total production in Australia.

(b) *16mm. Films.* The use of 16mm. films on television programmes has given this type of film a new and significant importance from the censorship standpoint.

In the past, 16mm. films were largely confined to those commercially produced for use in certain country picture theatres, in theatrettes used by business undertakings for advertising and instructional purposes, in churches, schools and universities, and on home movies. These are of all types—dramatic, scenic, topical, medical, advertising, educational, religious, etc.

Excluding those imported for television use, 4,440 16mm. films of approximately 4 million feet were examined. Three were rejected and eliminations were made from 62.

16mm. films imported for television are dealt with below (*see (d)).*

(c) *8mm. and 9.5mm. Films.* The Board's responsibilities in regard to these have been removed to a large extent following the decision to discontinue the censorship of films brought in by travellers depicting incidents during their travels. Periodical checks are made and only commercially produced films are examined. Of these, approximately 20,000 feet were censored. Two films were rejected.

(d) *Television Films.* 10,446 films, predominantly 16mm., of approximately 10½ million feet, for use on television were censored.

The number of films is not a true indication of volume because many of these were of very short duration. The footage, however, transposed to a time factor, shows that the screening time of films censored for television amounted to approximately 4,755 hours.

On a footage basis, the United States of America supplied approximately 90 per cent. of the total imports and the United Kingdom 8 per cent.

Forty-two television films were rejected outright and an additional 13 were classified as unsuitable for televising. Eliminations were made from 1,594. There were four appeals, two of which were successful.

(e) *Foreign Films.* Countries other than the United Kingdom and the United States of America supplied 251 of the 35mm. films imported for theatrical exhibition. Of these 129 were feature films.

Generally, the dialogue is in a foreign language with explanatory English captions. A few have an English commentary, and in isolated cases the dialogue is turned into English by the process known as "dubbing". The main countries of origin are shown above (see (a)).

Of 4,440 16mm. commercial films censored, 724 were of foreign origin. The chief supplying countries were Germany 92, France 80, Italy 57, India 33, Japan 29, China 29, Holland 29, and Switzerland 28.

An interpreter attends all censor screenings of films in a foreign language.

3. **Export of Films.**—The quantity of films exported for the year was approximately 1,800,000 feet. This footage includes, in many cases, several prints of the one film.

§ 12. Australian National Film Board and the Film Division.

1. **The Australian National Film Board.**—The Australian National Film Board was inaugurated in April, 1945, on the recommendations of a Commonwealth Government inter-departmental committee which considered the suggestions of a conference of interested individuals and Commonwealth and State officials, including Directors of Education, called in November, 1944, by the Ministers for Information and Post-war Reconstruction. It was attached, for administrative purposes, to the Department of Information.

With the abolition of the Department of Information in March, 1950, administration of the Board was transferred to the News and Information Bureau, Department of the Interior.

In November, 1950, the Board was reconstituted as an advisory body to the Minister for the Interior on matters concerned with the production, acquisition and distribution of films required by Commonwealth departments for the following purposes:—

- (a) for use within Australia on important matters of national interest and welfare, such as school and adult education, rehabilitation, social development, international understanding, trade and tourist expansion, and immigration;
- (b) for dissemination abroad to expand trade and commerce with other countries, to encourage tourist traffic with Australia, to improve Australia's relations with other countries and, where necessary, to explain Australia's national policies and encourage immigration.

The constitution provides for a membership of ten, with the Secretary of the Department of the Interior, Chairman, the Director of the News and Information Bureau, Deputy Chairman, and the remainder representative of Commonwealth departments, State Government instrumentalities and organizations interested in the production, distribution or utilization of films for national publicity.

2. The Film Division of the News and Information Bureau.—The first Australian Government organization for the production of motion pictures for national publicity purposes was the Cinema and Photographic Branch of the Department of Commerce, set up in Melbourne in 1920. Early in the 1939–45 War, the newly-established Department of Information was made responsible for the operation of the Cinema Branch and for an Official War Photography Unit. Production and distribution of all films required by Commonwealth Departments is undertaken now by the staff of the Film Division, News and Information Bureau, Department of the Interior, or by commercial enterprises under the supervision of officers of the Film Division. Theatrical distribution in Australia, and both theatrical and non-theatrical distribution overseas, of all Film Division productions are organized by the News and Information Bureau's home office or its oversea representatives. Non-theatrical distribution in Australia is organized through the National Library, Canberra, in co-operation with State film distribution agencies.

Since 1946, the Film Division has produced 367 films for general exhibition, as well as training and special purpose films. Prints are dispatched to 46 oversea centres, where distribution is arranged by News and Information Bureau officers or other Australian representatives. In Britain, there is regular distribution through more than a thousand theatres, and a large non-theatrical and educational series of circuits. By arrangement with the British Broadcasting Corporation, items of topical interest photographed by the Film Division are flown to London for television. In the United States of America, there is wide non-theatrical distribution and considerable use of the films by television networks. An exchange arrangement with the National Film Board of Canada secures extensive distribution in Canada. Selected films have been recorded in French, Dutch, German, Italian, Japanese, Hindustani, Tamil and other Indian dialects.

In addition to films made on the initiative of the News and Information Bureau, the Film Division produces films under the sponsorship of, or with the co-operation of, Commonwealth Departments and many other bodies such as the Commonwealth Bank of Australia, the Road Safety Council, Overseas Telecommunications Commission, Snowy Mountains Hydro-electric Authority, Australian Wine Board, the Australian National University and the Australian Broadcasting Commission.

The co-operation of the Australian motion picture industry with the Commonwealth, spontaneously offered at the outset of the 1939–45 War, continues. Special films for urgent national appeals are planned, produced and distributed, with the assistance of the National Films Council of the motion picture industry and its Film Production Advisory Committee.

§ 13. The National Safety Council of Australia.

The National Safety Council of Australia was founded in Melbourne in 1927 with the object of developing, mainly by education, safety in all spheres—on the road, in industry, in the home and on the farm.

In 1959, its work in industry was consolidated and developed by the formation of an Advisory Committee composed of leading industrialists with Australia-wide associations and in February, 1960, His Excellency the Governor of Victoria, General Sir Dallas Brooks, launched a five-year plan for industrial safety.

Under this plan, an Industrial Safety Service of four posters a month, slips for pay envelopes and the Council's bi-monthly journal, "Safety News", is available to industry by subscription. This service also provides advice on setting up safety programmes, information on safety problems, safety surveys of plants and work, safety instruction for foremen and technical library facilities.

Posters and other literature are distributed to schools in connexion with road safety lessons and special films are available for child and adult road safety instruction.

A "Safe Driving" campaign for individual motor drivers and a "Freedom from Accidents" campaign for employee drivers, are conducted and those completing a year free from any accident for which they were responsible are given a certificate or other award in recognition.

In 1959, the Council, with the co-operation of other interested organizations, launched a pilot School Driver Training course in two Melbourne schools, and in 1960 this was extended to eight schools.

The Council, a non-profit organization, is supported by Government grants, public subscriptions and payments for service. Its work is carried on by a small staff controlled by committees and governed by an executive.

The Road Safety Division, which handles all road safety matters, is the Victorian constituent of the Australian Road Safety Council.

§ 14. Australian Road Safety Council.

1. Origin and Organization.—The Australian Road Safety Council was formed in June, 1947, through the instrumentality of the Australian Transport Advisory Council.

The prime movers for the establishment of the Council were the Australian Automobile Association, which submitted a comprehensive plan; the New South Wales Minister for Transport, who advocated expansion, on a nation-wide basis, of road safety activities on lines similar to those of the Road Safety Council of New South Wales; and the National Safety Council of South Australia, which conveyed recommendations from a Special Safety Convention held in Adelaide in 1946.

At that time, in addition to the above-named organizations in New South Wales and South Australia, there were road safety organizations in Victoria and Western Australia. Steps were immediately taken to form Councils in Queensland and Tasmania, and subsequently in the Australian Capital Territory and the Northern Territory.

The Australian Road Safety Council is the composite body of Road Safety Councils of the following States and Territories of Australia:—

Governmental.—Queensland, Road Safety Council of Queensland; Tasmania, Road Safety Council of Tasmania; the Australian Capital Territory; Road Safety Council of the Australian Capital Territory.

Non-Governmental.—New South Wales, Road Safety Council of New South Wales; Victoria, Road Safety Division, National Safety Council of Australia; South Australia, Road Safety Division, National Safety Council of South Australia; Western Australia, Road Safety Division, National Safety Council of Western Australia; Northern Territory, Northern Territory Road Safety Council.

The Council is representative, geographically and technically, of the whole Commonwealth and comprises nominees of practically all classes of road users, together with representatives of road transport, the Department of the Army (representing all Services) and police administrations from each State. National organizations represented on the Council are:—Australian Automobile Association, Australian Road Transport Federation, Auto Cycle Council of Australia, Council of Fire and Accident Underwriters, The Federal Chamber of Automotive Industries, Federation of Motor Cycle Importers and Distributors of Australia, and Transport Workers' Union of Australia.

The Council meets annually and an Executive Committee operates between conferences. The principal effort of the Council is directed through educational, advertising and public relations media.

An annual grant was made available by the Commonwealth Government, under the Commonwealth Aid Roads Act, for the promotion of road safety to 30th June, 1959. From 1st July, 1959, the grant has been made available from the vote of the Department of Shipping and Transport. Hitherto £100,000 annually, it was increased to £150,000 for the four years commencing 1st July, 1955. Of this, £90,000 is allocated to State Road Safety Councils for local activities in the following proportions:—New South Wales, £22,500; Victoria, £18,000; Queensland, £16,650; Western Australia, £14,850; South Australia, £11,250; and Tasmania, £6,750. The remaining £60,000 is applied to the National Campaign, spread over the entire Commonwealth.

2. Mode of Operation.—The role of the Australian Road Safety Council is primarily in the field of Public Education. Its task is to inculcate the habit of safe use of the roads by all who travel on them and to promote the cause of road safety as a humanitarian and community ideal of the highest importance. To this end, it constantly strives to increase

public awareness of the road accident problem, which for the year ended 30th June, 1959, resulted in 40,544 accidents, causing the deaths of 2,264 persons and injuries to another 53,955 persons. (For further information on the subject of Traffic Accidents, see pp. 364–366, 370, 547.)

The campaign for road accident prevention resolves broadly into two main elements relating to (i) Road Users and (ii) Roads and Vehicles. The attack falls into three main divisions—(i) Education, (ii) Enforcement, and (iii) Engineering. The link between the components is, broadly:—

Road Users.—Education (public relations media, instruction in schools, homes, etc.). Enforcement (of correct road usage—through the police and the courts, uniform traffic laws, etc.).

Roads and Vehicles.—Engineering (technical improvements of all kinds, safer roads and vehicles, improved illumination, uniform vehicle standards, etc.).

In addition to the foregoing activities, the Council convenes special national conferences, as required by the Australian Transport Advisory Council, to consider specific road safety problems. Typical of these have been the special committee appointed in 1951 to discuss level crossing accidents, which recommended, among other measures, the appointment in each State of a committee to investigate level crossings and report on safety provisions, the elimination of some railway level crossings and the closure of others where practicable and desirable; a special meeting held in June, 1953, to discuss methods of reducing the high incidence of motor cycle accidents, at which various measures to offset the greater vulnerability of both the machine and its rider were recommended; and special meetings held in May, 1954, and April, 1955, to consider the problems of "Youth and Road Safety" and "Pedestrian Behaviour" respectively. Road safety and traffic authorities from overseas countries took part in special "International Sessions" of the 1956 Congress of the Council. The Australian Road Safety Council has pioneered the advocacy of voluntary blood tests for intoxication in cases of suspected driving under the influence of drugs or alcohol, and the wearing of "approved" safety helmets by motor cyclists, motor scooterists and their pillion riders. An Educational-Enforcement campaign to link more closely the work of the road safety movement and the police was launched in all States and the Australian Capital Territory during 1958 and 1959.

The Council works in close collaboration with two other bodies also established by the Australian Transport Advisory Council, namely, the Australian Motor Vehicle Standards Committee and the Australian Road Traffic Code Committee. All three bodies are administered by the Commonwealth Department of Shipping and Transport, which is the executive department for the Australian Transport Advisory Council.

The Australian Motor Vehicle Standards Committee develops and promulgates essential basic motor vehicle standards such as maximum lengths, weights, heights, carrying capacity of vehicles, and minimum lighting, braking and other mechanical efficiencies. In addition to ensuring a greater safety factor, these standards have helped to eliminate many conflicting State requirements which had an adverse effect on design and production costs.

The Australian Road Traffic Code Committee is responsible for drafting recommendations for uniform road traffic laws for the entire Commonwealth in keeping with existing motoring conditions.

The initial approach to this task was consideration of the more important aspects of traffic legislation in which uniformity was most desirable. To date, its recommendations concerning right-of-way at intersections, drivers signals, pedestrian crossings and uniform conditions for overseas motorists visiting Australia are typical of those which have been approved by the Australian Transport Advisory Council for adoption throughout the Commonwealth.

The Australian Transport Advisory Council, in March, 1958, appointed a special sub-committee consisting of one representative of each State and the Australian Capital Territory/Northern Territory with a Commonwealth representative as Chairman, to draft a complete Australian Uniform Road Traffic Code.

Substantial progress has been made in reaching agreement on the principles involved, but this is essentially a long range project and the code, having been prepared, will not remain static but will require periodical review in order to incorporate new ideas which emerge from changing traffic conditions.

§ 15. Australian Atomic Energy Commission.

In November 1952, a Commission of three members was appointed to control the Commonwealth's activities in relation to uranium and atomic energy, and in April 1953, upon the enactment of the Atomic Energy Act 1953, the Commission was established as a statutory authority, with powers and functions as defined in the Act. Under amending legislation, the number of Commissioners was increased to five in April, 1958. The Commission is a corporate and autonomous body, controlling its own service. It functions under the direction of the Minister for National Development.

The functions of the Commission fall under two main headings. Firstly, it is responsible for undertaking and encouraging the search for and mining of uranium, and is empowered to co-operate with the appropriate authorities of the States in connexion with these and related matters. Secondly, it is authorized to develop the practical uses of atomic energy by constructing and operating plant for this purpose, carrying out research and generally fostering the advancement of atomic energy technology. These powers and functions are set out in detail in Part II. of the 1953 Act. In general, and subject to the Commonwealth's defence powers and particular provisions of the Act, they are exercisable only in or in relation to the Territories of the Commonwealth.

Uranium prospecting and mining in the Territories of the Commonwealth are freely open to private enterprise, subject to the Atomic Energy Act 1953 and the Ordinances of the Territories. To help private prospectors, and to ascertain the uranium resources of the Territories, aerial and geological surveys are carried out for the Commission by the Bureau of Mineral Resources of the Department of National Development. Rewards are paid for uranium discoveries, and tax concessions are allowed in respect of income from uranium mining. In addition, the Atomic Energy Commission, the Bureau of Mineral Resources and other Commonwealth agencies provide prospectors and mining companies with a wide range of technical and advisory services.

The development of the uranium resources of the States is governed by the legislation and policies of the States. Commonwealth aerial survey facilities are available to the States, and the State Mines Departments test uranium ores, and do research on ore treatment problems, for the Commonwealth.

Uranium oxide is being produced in Australia from ore deposits at Rum Jungle and South Alligator River, in the Northern Territory, Radium Hill, in South Australia, and Mary Kathleen, in Queensland. The Rum Jungle deposits have been worked under arrangements between the Commonwealth and the Combined Development Agency, a joint procurement organization of the United States and United Kingdom Governments. The mining and treatment operations are conducted for the Commonwealth by an Australian mining company. A treatment plant began operations on the field in September, 1954, the substantial production being sold to the Agency for defence purposes. Mining was completed in November 1958, all the ore having been extracted from the known Rum Jungle deposits. Treatment operations continued on the same scale as before, with ore from stockpiles, which are more than sufficient to complete the contract with the Combined Development Agency. The area is being systematically explored for further ore.

The Radium Hill deposits are being worked by the South Australian Government, which has an ore concentration plant on the field and a plant for the treatment of the concentrates at Port Pirie. As at Rum Jungle, the operations at Radium Hill and Port Pirie are carried out under arrangements with the Combined Development Agency, and the output from the operations is sold to the Agency.

The Mary Kathleen lease in the Mt. Isa-Cloncurry district in Queensland contains a large body of ore. It is being worked by commercial interests, which have established a mine, treatment plant and township in the area at a cost of more than £10 million. Production from the plant is being sold to the United Kingdom Atomic Energy Authority, under arrangements approved by the Commonwealth Government. Two other companies, in the South Alligator region, also have contracts with the Authority for smaller tonnages, and both began production in 1959.

The Commission has undertaken a research programme into the civil uses of atomic energy, with special reference to Australian needs. Its research establishment at Lucas Heights near Sydney is equipped with a high flux nuclear reactor of an advanced type, with associated services and various laboratories. So that the specialized facilities at Lucas

Heights may be available to the universities for research and training, the Australian Institute of Nuclear Science and Engineering has been established. This is a joint venture of the Commission and the Australian universities. Within Australia, in addition to its programme at Lucas Heights, the Commission is supporting atomic energy research on a considerable scale in the various universities, and it has established a wide range of post-graduate studentships in the universities to train scientists for future work in atomic energy fields.

The broad objects of the Commission's research programme are to develop the production of electric power from nuclear fuels, and to investigate and promote the application of atomic energy and radioactive isotopes in industry, agriculture, medicine and biological research and other fields. The Commission's Isotopes Advisory Service has dealt with an increasing number of inquiries from industrial and other users, and production of radio-isotopes has begun. Equipment has been installed to utilize the intense radiation from used reactor fuel elements for research into the industrial applications of radiation to food preservation, medical and industrial sterilization, and other purposes.

In these endeavours, the Atomic Energy Commission is working in close co-operation with the United Kingdom Atomic Energy Authority, under arrangements which give Australia access to results of United Kingdom research on peaceful atomic energy uses. Results of research in Australia will in like manner be available to the United Kingdom. Work in Australia, though constituting a self-contained programme, is co-ordinated with the United Kingdom programme, to avoid overlapping of research objectives and duplication of investigations. Australia also has bilateral arrangements with the United States and Canada, and is taking part in the promotion of the peaceful uses of atomic energy through the International Atomic Energy Agency.

In the light of the vast amount of research overseas, and the programmes of many nations for the establishment of full-scale power-producing reactors, it seems clear that nuclear power is steadily approaching the stage of being economically practicable. The planned Australian research effort will enable Australia to make a full contribution to the advancement of atomic energy technology, both in power production and in other fields, and will, at the same time, place the country in a position to take advantage of the practical uses of atomic energy as they are developed.

§ 16. The United Nations.

1. *General.*—The Moscow Declaration of 1943 concerning a new international organization for the maintenance of international peace and security marked the end of the League of Nations. The dissolution of the League and the transfer of certain of its functions to the new body, the United Nations, took place over subsequent years. Information concerning the League of Nations was given in issue No. 35 and earlier issues of the Official Year Book.

The Charter of the United Nations was drawn up by the delegates of 50 nations at the United Nations Conference on International Organization at San Francisco from 25th April to 26th June, 1945. Australia's ratification was deposited on 1st November, 1945. Following the admission of 16 new members during the Tenth Session and 17 more subsequently and the replacement of Egypt and Syria by the United Arab Republic, there are now* 82 member States:—Afghanistan, Albania, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Bulgaria, Burma, Byelorussia, Cambodia, Canada, Ceylon, Chile, China, Colombia, Costa Rica, Cuba, Czechoslovakia, Denmark, the Dominican Republic, Ecuador, El Salvador, Ethiopia, Finland, France, Ghana, Greece, Guatemala, Guinea, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iran, Iraq, the Republic of Ireland, Israel, Italy, Japan, Jordan, Laos, Lebanon, Liberia, Libya, Luxembourg, Malaya, Mexico, Morocco, Nepal, the Netherlands, New Zealand, Nicaragua, Norway, Pakistan, Panama, Paraguay, Peru, the Philippines, Poland, Portugal, Romania, Saudi Arabia, Spain, Sudan, Sweden, Thailand, Tunisia, Turkey, the Ukraine, the Union of South Africa, the Union of Soviet Socialist Republics, the United Arab Republic, the United Kingdom, the United States of America, Uruguay, Venezuela, Yemen, and Yugoslavia.

The full record of the Conference is contained in the Report by the Australian Delegates on the United Nations Conference on International Organization held at San Francisco from 25th April to 26th June, 1945.

* April, 1960.

At San Francisco, an Executive Committee and a Preparatory Commission were established, and when these bodies had completed their work of preparation for the first meeting of the United Nations, the General Assembly met in London on 10th January, 1946.

The principal organs of the United Nations are the General Assembly, the Security Council, the Economic and Social Council, the Trusteeship Council, the International Court of Justice, and the Secretariat.

2. General Assembly.—This is the forum of the United Nations. In it, each member State is represented and has one vote. It meets in regular annual sessions from the middle of September and has provision for special sessions. With the exception of disputes which are before the Security Council and matters essentially within the domestic jurisdiction of any State, it has power to discuss any matter within the scope of the Charter and to make recommendations upon it. The Assembly elects the non-permanent members of the other major organs and considers annual reports from them. Upon the recommendation of the Security Council, it may expel a member which has persistently violated the principles of the Charter.

3. The Security Council.—This has the primary responsibility for the maintenance of international peace and security. It is composed of five permanent members, namely China, France, the United Kingdom, the Union of Soviet Socialist Republics and the United States of America, and six non-permanent members with two-year periods of office, of whom three retire at the end of each year. At the initial election three countries, including Australia, were elected for a term of two years and three others for a term of one year only. The following are the non-permanent members of the Security Council at present*: Argentina, Italy and Tunisia (whose terms commenced on 1st January, 1959), and Ceylon, Ecuador and Poland (whose terms commenced on 1st January, 1960). On procedural matters, decisions are taken by an affirmative vote of any seven members, but on all other matters, decisions can be made only on the affirmative vote of seven members, including the concurring votes of all the permanent members. However, the powers which are parties to a dispute for peaceful settlement do not vote.

The Security Council is assisted by a Military Staff Committee consisting of the Chiefs of Staff of the permanent members of the Council or their representatives.

4. The Economic and Social Council.—This body consists of eighteen members, each elected for a period of three years. Its main functions are to make, or initiate, studies and reports, and to make recommendations to the General Assembly or to members of the United Nations upon international, economic, social, cultural, educational, health and related matters. It may make recommendations for the purpose of promoting respect for, and observance of, human rights and fundamental freedoms for all.

The present* members of the Economic and Social Council are: Chile, China, Costa Rica, France, the Netherlands and Sudan (retiring 1960); Afghanistan, Bulgaria, New Zealand, Spain, the United States of America and Venezuela (retiring 1961) and Brazil, Denmark, Japan, Poland, the United Kingdom and the Union of Soviet Socialist Republics (retiring 1962).

5. The Trusteeship Council.—The Charter declares the political, social, cultural and economic advancement of the Trust Territories to be a sacred trust. The Trusteeship Council is composed of those members of the United Nations who are administering trust territories and an equal number of members who are not administering trust territories (including any permanent members of the Security Council who are not administering trust territories). Territories which may be placed under trusteeship in accord with individual trusteeship agreements are those previously held under mandate, those detached from enemy states as a result of the 1939–45 War and those dependent territories placed under the system by the States responsible for their administration. Australia is automatically a member of the Trusteeship Council, as the power administering the Trust Territories of New Guinea and Nauru. The present* members of the Trusteeship Council are: Australia, Belgium, France, Italy, New Zealand, the United Kingdom and the United States of America (administering States), and Bolivia, Burma, China, India, Paraguay, United Arab Republic and the Union of Soviet Socialist Republics. China and the Union of Soviet Socialist Republics are members of the Trusteeship Council by virtue of their permanent membership of the Security Council.

* April, 1960.

The Council has among its duties the consideration of annual reports submitted by the trustee States, the carrying out of periodic inspections by agreement with them, and the formulation of questionnaires on the welfare and advancement of the dependent peoples.

6. **The International Court of Justice.**—This consists of fifteen judges, no two of whom may be nationals of the same State. Its jurisdiction comprises all cases which the parties refer to it, and all matters especially provided for in the Charter or in treaties and conventions in force. Provision exists in the Statute of the Court whereby States, parties to the Statute, may accept the jurisdiction of the Court as compulsory, either conditionally or unconditionally in certain international disputes.

The present* members of the Court are: Judges Hackworth (United States of America), Sir Zafrullah Khan (Pakistan), Klaestad (Norway), Kojevnikov (U.S.S.R.), and Armand-Ugon (Uruguay)—all retiring in 1961; Judges Alfaro (Panama), Lauterpacht (United Kingdom), Basdevant (France), Cordova (Mexico), and Quintana (Argentina)—all retiring in 1964; and Judges Badawi (United Arab Republic), Wellington Koo (China), Winiarski (Poland), Sir Percy Spender (Australia) and Spiropoulos (Greece)—all retiring in 1967.

7. **The Secretariat.**—The Secretary-General is the head of the Secretariat of the organization. He is appointed by the General Assembly upon the recommendation of the Security Council, and he appoints his staff in accordance with the rules approved by the General Assembly. Mr. Trygve Lie (Norway) was appointed first Secretary-General, and at the Sixth Session of the General Assembly in 1950 was re-appointed for a further three years as from 1st February, 1951. In November, 1952, Mr. Lie announced his intention of retiring and in April, 1953, Mr. Dag Hammarskjöld (Sweden) was appointed in his place. Mr. Hammarskjöld was re-appointed for a further five years in September, 1957.

8. **Specialized Agencies.**—In addition to these organs of the United Nations, there are specialized agencies which co-operate closely with the United Nations in many fields on economic and social questions.

Those now* in operation are: The International Labour Organization; Food and Agriculture Organization; United Nations Educational, Scientific and Cultural Organization; International Civil Aviation Organization; International Bank for Reconstruction and Development; International Monetary Fund; Universal Postal Union; World Health Organization; International Telecommunication Union; World Meteorological Organization; Intergovernmental Maritime Consultative Organization.

To enable co-ordination of the work of the specialized agencies, arrangements have been made for them to submit reports on their activities and budgets to the United Nations where they are discussed by the Economic and Social Council and the General Assembly.

§ 17. Australian Representation Abroad : Oversea Representation in Australia.

1. **General.**—The following statements show particulars of the various Australian diplomatic and other representatives overseas and of overseas representatives in Australia at 30th September, 1960. Full details of Commonwealth and foreign representation in Australia—diplomatic and consular—and of permanent Australian missions overseas may be obtained from publications issued by the Department of External Affairs, Canberra. A statement is issued each quarter by the Department of Trade, showing the latest particulars of the Australian Trade Commissioner Service overseas.

2. Australian Representation Overseas—

AUSTRALIAN DIPLOMATIC AND OTHER REPRESENTATIVES OVERSEAS.

Her Majesty's Australian Ambassador Extraordinary and Plenipotentiary to—
Belgium (Brussels)—Sir Edwin McCarthy, C.B.E.
Brazil (Rio de Janeiro)—S. Jamieson.
Burma (Rangoon)—A. H. Loomes.
Cambodia (Phnom Penh)—F. H. Stuart.

* April, 1960.

France (Paris)—Dr. E. R. Walker, C.B.E.
Germany, Federal Republic of (Bonn)—Sir Alan Watt, C.B.E.
Indonesia (Djakarta)—P. Shaw, C.B.E.
Ireland (Dublin)—(Vacant); N. St. C. Deschamps (Chargé d'Affaires *ad interim*).
Italy (Rome)—H. A. McClure-Smith, C.V.O.
Japan (Tokyo)—L. R. McIntyre, C.B.E.
The Netherlands (The Hague)—Sir Edwin McCarthy, C.B.E.
The Philippines (Manilla)—A. T. Stirling, C.B.E.
Thailand (Bangkok)—M. R. Booker.
Union of Soviet Socialist Republics (Moscow)—J. K. Waller, O.B.E.
United States of America (Washington, D.C.)—The Hon. Howard Beale, Q.C.
Viet Nam (Saigon)—W. D. Forsyth, O.B.E.

High Commissioners for Australia in—

Canada (Ottawa)—(Vacant); K. Desmond (Acting).
Ceylon (Colombo)—J. C. G. Kevin.
Ghana (Accra)—B. C. Ballard.
India (New Delhi)—W. R. Crocker, C.B.E.
Malaya, Federation of (Kuala Lumpur)—T. K. Critchley.
New Zealand (Wellington)—Vice-Admiral Sir John Collins, K.B.E., C.B.
Nigeria (Lagos)—(Vacant); L. E. Phillips (Acting).
Pakistan (Karachi)—A. R. Cutler, V.C., C.B.E.
Union of South Africa (Pretoria)—O. L. Davis.
United Kingdom of Great Britain and Northern Ireland (London)—The Rt. Hon. Sir Eric Harrison, K.C.V.O.

Her Majesty's Australian Envoy Extraordinary and Minister Plenipotentiary to—

Israel (Tel Aviv)—J. M. McMillan.
Laos (Vientiane)—W. D. Forsythe, O.B.E.
United Arab Republic (Cairo)—J. P. Quinn, O.B.E.

Australian Military Mission—

Germany, Federal Republic of (Berlin)—Head, Sir Alan Watt, C.B.E.

Australian Mission—

United Nations (New York)—Ambassador, J. Plimsoll, C.B.E.
United Nations (Geneva)—Permanent Representative, L. J. Arnott.

Australian Commissioner in—

Singapore, Brunei, Sarawak and North Borneo (Singapore)—G. A. Jockel.

Consuls-General—

Greece (Athens)—G. V. Greenhalgh.
Switzerland (Geneva)—L. J. Arnott.
United States of America (New York)—The Hon. Sir Josiah Francis.
United States of America (San Francisco)—T. W. Cutts.

Consuls—

Denmark (Copenhagen)—G. A. Cole.
New Caledonia (Noumea)—K. R. Douglas-Scott.
Portugese Timor (Dili)—W. A. Luscombe.
United States of America (New York)—W. H. Bray.

Trade Commissioner Service of the Commonwealth of Australia—

Canada—R. R. Ellen, M.B.E. (Montreal); C. A. Allen, M.V.O. (Vancouver), W. R. Hudspeth (Ottawa).
Ceylon—D. F. J. McSweeney (Colombo).
France—A. P. Fleming, O.B.E., Commercial Counsellor and Trade Commissioner (Paris).
Germany, Federal Republic of—R. K. Scott, Commercial Counsellor and Trade Commissioner (Bonn).

- Ghana*—D. R. Cristofani, Commercial Counsellor and Trade Commissioner (Accra).
Hong Kong—G. R. B. Patterson, O.B.E., Senior Trade Commissioner, R. J. C. Schneeman, Trade Commissioner (Victoria).
India—F. R. Gullick, Commercial Counsellor and Senior Trade Commissioner (New Delhi); D. R. McPhee, O.B.E., E.D., (Bombay); K. C. Gale (Calcutta).
Indonesia—M. J. S. Knowles (Acting), Commercial Counsellor and Trade Commissioner (Djakarta).
Italy—H. K. H. Cook, Commercial Counsellor and Trade Commissioner (Rome).
Japan—A. J. Day, M.B.E., Commercial Counsellor and Trade Commissioner (Tokyo).
Kenya—G. W. S. Temby, Australian Trade Commissioner (Nairobi).
Malaya, Federation of—W. Cairns, Commercial Counsellor and Trade Commissioner (Kuala Lumpur).
New Zealand—H. C. Menzies, Senior Trade Commissioner (Wellington); C. L. Steele, Trade Commissioner (Auckland); D. M. Walker, Trade Commissioner (Christchurch).
Pakistan—A. R. Taysom, Commercial Counsellor and Trade Commissioner (Karachi).
Philippines, The—D. L. Crawford, Commercial Counsellor and Trade Commissioner (Manilla).
Rhodesia and Nyasaland, Federation of—H. M. LeMarchand (Salisbury).
Singapore—J. S. Nicholls, Acting Commercial Counsellor and Trade Commissioner (Singapore).
Sweden—W. R. Carney, Senior Trade Commissioner; A. C. Slater, Trade Commissioner (Stockholm).
Thailand—S. D. Shubart, Commercial Counsellor and Trade Commissioner (Bangkok).
Union of South Africa—J. L. Chapman, Commercial Counsellor and Trade Commissioner (Johannesburg).
United Kingdom of Great Britain and Northern Ireland—P. R. Searcy, Senior Trade Commissioner; N. N. Ellis (London).
United States of America—A. R. Callaghan, C.M.G., Commercial Counsellor and Trade Commissioner; R. S. Livingston, Commercial Counsellor (Washington); B. T. Connolly (New York); B. G. Dawson (San Francisco); E. E. Jarvis (Chicago).
West Indies, Federation of—J. J. Molan (Port of Spain).

Australian Government Trade Correspondents—

- Fiji*—D. E. Morgan (Nadi Airport).
Formosa—E. J. N. Mycock (Taipei).
Hawaii—R. K. Wetherell (Honolulu).
Mauritius—J. L. B. Cowan (Curepipe).
Mexico—N. Pelham Wright (Mexico City).
South America—Captain H. Cross (Montevideo Ro Del Uruguay).

3. **Oversea Representation in Australia.**—Consular representatives are not included in the following statement. Particulars of these are contained in a publication *Consular Representatives and Trade Commissioners in Australia*, issued by the Department of External Affairs, Canberra. There are more than 180 such representatives in Australia, and 53 countries are represented.

DIPLOMATIC REPRESENTATIVES IN AUSTRALIA.

Ambassador Extraordinary and Plenipotentiary of—

- Belgium*—His Excellency Monsieur Willy Stevens (Sydney FB 1325).
Brazil—His Excellency Senhor Affonso Portugal (Canberra X 2680).
Burma—(Vacant); U Than Hl A. (Chargé d'Affaires *ad interim*) (Canberra U 1451).
Cambodia—His Excellency Mr. Poc Thieun (Canberra 9.0066).
China—His Excellency Dr. Chen Chi-Mai (Canberra U 2368).
France—His Excellency Monsieur P. Monod (Canberra U 1454).
Germany, Federal Republic of—His Excellency Dr. Hans Mühlendorf (Canberra U 1553).

Greece—His Excellency Monsieur G. K. A. Christodulo (Canberra X 1553).
Indonesia—His Excellency Dr. A. Y. Helmi (Canberra U 1221).
Ireland—(Vacant); Mr. Sean Kennan (Chargé d'Affaires *ad interim*) (Canberra J 3251).
Italy—His Excellency Signor Eugenio Prato (Canberra J 3263).
Japan—His Excellency Mr. Katsushiro Narita (Canberra U 1251).
The Netherlands—His Excellency Dr. J. G. de Beus (Canberra U 1256).
The Philippines—His Excellency Mr. M. Ezpeleta (Sydney FL 4168).
Thailand—His Excellency Nai Vadhana Isarabhakdi (Canberra U 8101).
United States of America—His Excellency Mr. William J. Sebald (Canberra U 1351).

C. Harries and H. F. Stevens (Melbourne MU 5556); Mr. K. R. Allen (Brisbane B. 2307); Mr. J. D. Leithead (Perth BA 2042).

§ 18. Retail Trade.

1. General.—The statistics in this section relate to the number of retail establishments throughout Australia and the value of retail sales of goods by these establishments.

Information of this nature was first collected in respect of the year ended 30th June, 1948, by a full census of all retail establishments. As this was the first census of its type in Australia, its scope and the data sought were the minima consistent with the objective

of securing a record of the number of such establishments, their type, their geographical distribution, their aggregate sales of goods and a simple commodity dissection together with a record of the value of certain services provided. This census was followed by a second census of all retail establishments trading during the year ended 30th June, 1949.

A third census was taken for the year ended 30th June, 1953, in which retailers were asked to furnish more detailed information concerning the dissection of their turnover into commodity groups and questions were asked about stocks of goods on hand, the number of persons engaged in the business and credit sales.

A further Census was taken in respect of the year ended 30th June, 1957. The scope of this Census followed the same general principles adopted for the previous Census but some additional questions were asked about type of organization, purchases and customers' indebtedness.

In general terms, the censuses covered the retail trading activities of establishments which normally sell goods by retail to the general public from fixed premises (i.e. shops, rooms, kiosks and yards). Certain types of "service" establishments were also included, e.g., boot repairers, hairdressers, motor garages and service stations and cafes. The censuses included the retail sales of those factories or wholesalers who conducted a regular retail business, but excluded those who only occasionally sold goods by retail. Both new and second-hand goods were included in sales recorded by relevant retail establishments.

During the period between censuses, variations in the value of retail sales have been measured by means of quarterly sample surveys. Annual totals derived from these surveys and some of the results of the 1956-57 census are contained in this section.

2. **Value of Retail Sales in Each Commodity Group, Australia.**—The following table shows the value of retail sales of goods in each of the commodity groups specified in the years 1952-53 to 1958-59 on a comparable basis throughout. The figures for the years 1952-53 and 1956-57 were obtained from censuses taken in respect of those years, whereas figures for the other years shown are estimates based on sample surveys.

VALUE OF RETAIL SALES: COMMODITY GROUPS, AUSTRALIA.(a)
(£ million.)

Commodity Group.	Year ended 30th June—						
	1953.	1954.	1955.	1956.	1957.	1958.	1959.(b)

(a) All figures refer to establishments with total retail sales in 1956-57 of £500 or more, and are the total value of all commodities sold by the types of business shown. (b) Not available for publication. (c) These figures differ from their counterparts in the table on p. 1160 because they include retail sales of motor vehicles, etc., made by establishments whose main type of business is other than motor vehicles, and exclude retail sales of goods other than motor vehicles, etc., made by establishments whose main type of business is motor vehicles.

CHAPTER XXXI.

STATISTICAL ORGANIZATION AND SOURCES OF INFORMATION.

§ 1. Statistical Organization in Australia.

1. **Early Development of Australian Statistics.**—(i) *Crown Colony "Blue Books"*. Statistical organization in Australia was founded in the "Blue Books" which, in the Crown Colony days, were prepared annually for the information of the Colonial Office. Although primarily intended for administrative purposes, these documents have been important sources of statistical data, even though some important matters are not covered, and others only partially so. These "Blue Books" formed the basis from which later statistical publications were developed. This led to an element of uniformity in statistical compilation within the British Empire.

(ii) *Statistical Registers*. Following the advent of Responsible Government, which was granted during the period 1851–1860 to all Australian States except Western Australia—and to that State in 1890—the "Blue Book" was succeeded in all States by "Statistical Registers". These were in many respects the old "Blue Books" in a new form, and were largely confined to summaries of the "by-product" statistics of Government administrative departments.

The first example of extensive Governmental organization for purely statistical purposes was the taking of periodic population censuses, which were initiated in all States under the Crown Colony régime. The growing need for quantitative data concerning the progress of the several young communities of Australia eventually led to the appointment of official Statisticians commissioned to prepare and publish such data.

(iii) *Statistical Conferences*. To enable the interchange of ideas between States and to obtain uniform State statistics which could be aggregated to Australian totals, conferences were held in the several States from as early as 1861. Altogether, six conferences were held prior to the formation of the Commonwealth Bureau of Census and Statistics in 1906. These were held in 1861, 1875, 1890, 1900, 1902 and 1903. The holding of these conferences has been continued since the formation of the Commonwealth Bureau, and a representative from New Zealand attended up to 1928.

2. **Creation of the Commonwealth Bureau of Census and Statistics.**—Under the provisions of section 51 of the Commonwealth Constitution, power is conferred on the Commonwealth Parliament "to make laws for the peace, order and good government of the Commonwealth with respect to—" (*inter alia*) "(XI.) Census and statistics". In compliance with this provision, the Census and Statistics Act 1905 was passed, and in 1906 the Commonwealth Bureau of Census and Statistics was created. A conference of Statisticians in 1906 defined the relations between the Commonwealth and State Bureaux, and in each case the State Statistician became the representative in his own state of the Commonwealth Statistician for the purpose of administering the Commonwealth Act. In addition, each State has its own "Statistics Act", and although these are not identical in all States, they embody common principles. The Commonwealth Bureau did not attempt to duplicate the existing statistical organization, but endeavoured to use the services of the State statistical offices whenever possible, and to undertake the initial collection of statistics only in fields not already occupied by the States, or in which efficiency demanded complete centralization.

3. **Integration of Statistical Services.**—The creation and development of the Commonwealth Bureau of Census and Statistics, the frequent conferences of Commonwealth and State Statisticians, and the close and increasing liason between officers dealing with the same subjects in the State and Commonwealth fields, did much to promote uniformity in the official statistical collections and methods employed throughout Australia. The complete realization of this aim could not, however, be achieved, even with the utmost co-operation of those concerned, while seven distinct statistical systems operated.

This became apparent after the 1914–18 War, when the economic problems that then arose drew attention to deficiencies in the Australian statistical data. With a view to overcoming these weaknesses the Prime Minister of the day proposed to the Premiers' Conference that State statistical offices be transferred to the Commonwealth. Tasmania alone agreed to this, and the transfer was effected in 1924. Since then, an amalgamated office has functioned satisfactorily in that State as a Commonwealth office which also serves State statistical needs.

The boom of the 1920's, the depression of the 1930's, the 1939-45 War, and the post-war boom, each with its special economic problems, imposed a severe strain on the Commonwealth and State statistical systems. Moreover, the development during and since the 1939-45 War of a very considerable volume of new statistics added greatly to the complexities of the several administrations in their efforts to secure, and maintain, uniformity in statistical collections. The establishment of Commonwealth statistical offices in some State capitals ameliorated the situation to some extent—indeed, without their establishment the new and expanded statistical collections could not have been carried out at all. However, this did not solve the problem and constituted only one of a number of improvisations devised to obtain uniform data essential for national purposes, and to satisfy urgent demands for new series of statistics. Furthermore, the excessive amount of time and effort entailed in such improvisations made it impossible to devote the necessary time to the major question of meeting growing statistical needs promptly.

The emergence of the problem of providing uniform statistical services throughout Australia, adequate to meet present-day demands, was foreseen during the 1939-45 War, and in 1949 discussions with the Premiers were initiated by the Prime Minister, with the object of integrating the statistical services of the Commonwealth and the States by agreement. These negotiations were continued by correspondence, and subsequently all State Governments accepted the terms of draft agreements to integrate their respective statistical offices with that of the Commonwealth.

The Statistics (Arrangements with States) Bill was introduced into the Commonwealth Parliament on 17th April, 1956, its purpose being to seek parliamentary approval of the making of arrangements with individual States for, and the setting up of, integrated statistical services. This legislation, permissive in nature, was designed to enable the Commonwealth to enter into an agreement with any State to effect an amalgamation of Commonwealth and State statistical offices and services. The object of such an agreement was that, in each State accepting it, there would be an integrated statistical service operated by Commonwealth statistical officers under the immediate direction of a statistician in the State who would hold office under both the Commonwealth and State governments. Both Commonwealth and State were to be adequately served with statistics, and no State would be required to surrender its existing powers in the field of statistics. The rights of officers transferred under any agreement entered into were provided for. After passing through the usual stages of Parliament, the bill became law on 12th May, 1956.

Integration of the Commonwealth and State statistical services was finally accomplished when the integration arrangement with Victoria came into effect on 15th September, 1958.

4. Scope of the Commonwealth Bureau of Census and Statistics.—The scope of the Commonwealth Bureau of Census and Statistics has constantly been widened, more particularly during the 1939-45 War, when the Bureau responded to the urgent demands of administration for immediate and accurate statistical information in various fields. Since the war, requirements in the administrative, industrial, financial and scientific spheres have led to the development of many new statistical collections. All the activities of the Bureau are covered by the Census and Statistics Act, which confers authority to collect information and contains stringent provisions to ensure that the information obtained is treated in strictest secrecy.

The following sections of this paragraph relate specifically to the organization and operation of the Commonwealth Bureau of Census and Statistics in Canberra. In the State Offices, the pattern is broadly similar, although local requirements have naturally given rise to differences in detail.

For administrative purposes, the Commonwealth Bureau, Canberra, is divided into a number of Divisions. These are:—Census, Compiling, Development, Methodology and Sampling, Publications, Research and Social Accounts, Mechanical Tabulation and Administrative.

(a) *Census Division.* This Division of the Bureau is responsible for the taking of periodic population censuses and the tabulation, summarization and preparation for publication of the results obtained.

(b) *Compiling Division.* The Compiling Division is divided into the following Branches which compile statistics dealing with specific fields of activity:—

Trade and Transport Branch—Responsible for the original compilation, tabulation and analysis of statistics relating to imports and exports, and for the compilation of statistics relating to road and rail transport, aviation, shipping, posts, telegraphs and telephones, and broadcasting and television.

Employment and Labour Branch—Compiles all employment estimates, wage and labour statistics.

Primary Production Branch—Deals with statistics relating to agricultural and pastoral activities, mining, forestry and fishing. Original data are supplied largely by State Statisticians.

Secondary Production Branch—Compiles all factory statistics both annual and monthly. Collates on a Commonwealth basis original data supplied by State Statisticians.

Finance and Taxation Branch—Compiles statistics of private finance (banking, insurance, exchange rates, etc.), public finance (Commonwealth, State and Local and Semi-Governmental authorities), and statistics relating to all aspects of Commonwealth taxation.

Demography Branch—Concerned with statistics of births, deaths, marriages and migration, and the making of periodic estimates of population.

(c) *Development Division*. This Division was created in order to develop new statistical collections to meet post-war demands for more adequate and up-to-date statistics, and also to examine current collections in the light of such requirements. It is divided into three Branches, namely:—

Development Branch—Develops new statistical collections and examines current collections in the light of present-day requirements. Included in the latter are Social Statistics.

Prices Branch—Deals with the collection of retail and wholesale prices and the compilation of retail and wholesale price index numbers. A staff of trained field officers is maintained in the several States to facilitate the collection of accurate information.

Business Statistics Branch—Conducts censuses and surveys and analyses statistics relating to internal trade (retail), business and hire purchase activities, and company investments and profits.

(d) *Methodology and Sampling Division*. Undertakes the development of sampling procedures and their application to statistical collections and furnishes technical advice to other Divisions and Departments.

(e) *Publications Division*. This Division is responsible for the editing and graphical illustration of all Bureau publications, and, in collaboration with other Divisions, for the initiation, development and co-ordination of statistical publications. It also maintains a regular flow of statistical series to certain international organizations, and revises statistical material in certain overseas and local publications.

(f) *Research and Social Accounts Division*. This Division is responsible for the preparation of all estimates in the field of social accounts and for research into this and other fields of statistics. It is divided into four branches as follows:—

National Income and Expenditure Branch—Prepares and analyses estimates of national income and expenditure and tables of social accounts.

Balance of Payments Branch—Prepares and analyses estimates of Australia's balance of international payments.

Quantum Indexes Branch—Prepares indexes of quantum of imports, exports, etc., and undertakes research into quantum of production, national expenditure, etc.

Research Branch—Carries out research into specific fields of statistics.

(g) *Mechanical Tabulation Division*. This Division is equipped with modern tabulating equipment including three electronic units and is responsible for all machine tabulating work required by other Divisions of the Bureau with the exception of the Census Division. It also carries out work for other Commonwealth Departments as capacity is available.

(h) *Administrative Division*. The Administrative Division is responsible for all aspects of staff recruitment and direction, supplies, payment of accounts, etc. The Reproduction Section of the Division is equipped with multilith and duplicating machines for processing statistical statements for more immediate requirements. In addition, a section of this Division is responsible for the co-ordination of statistics in Commonwealth Departments (see para. 5 below). The specialized library of official and unofficial publications on statistics and economics is controlled by the Administrative Division.

5. Relation of the Bureau to other Commonwealth Departments.—In October, 1950, the Commonwealth Public Service Board issued a circular relative to the compilation of statistics in other Commonwealth Departments, in which it stated that the Commonwealth Statistician should be the co-ordinating authority on all statistics in Commonwealth Departments, and that, as a general principle, where any new statistical field is to be established involving the regular collection of statistics, the Commonwealth Statistician should be consulted to ensure that they are necessary and that they are based on sound statistical methods; furthermore, that the Commonwealth Statistician should make a regular inspection, at least once every twelve months, of all statistical work done by Departments to ensure that their needs are met by the most economical means and without duplication of effort.

This project of co-ordination is being implemented as statistical developments require and as time and circumstances permit.

§ 2. Statistical Publications of Australia.

1. **General.**—The official statistical publications of Australia may be divided bibliographically into two main divisions, namely:—(i) Commonwealth publications dealing both individually and collectively with the several States of Australia; and (ii) State publications dealing with individual States only.

2. **Commonwealth Publications.**—Commonwealth publications containing statistics may be grouped under two heads, namely:—(i) Publications issued by the Commonwealth Statistician; and (ii) Parliamentary and Departmental Reports and Papers.

(i) *Publications issued by the Commonwealth Statistician.* The following is a list of the principal statistical publications issued from the Commonwealth Bureau of Census and Statistics since its inauguration to October, 1960:—

Australian Balance of Payments.—Statements Nos. 1 to 3, 1928–29 to 1951–52.

Australian Life Tables, 1901–1910. *Australian Joint Life Tables, 1901–1910.*

Australian Life Tables, 1920–1922.

Australian Life Tables, 1932–1934. *Australian Joint Life Tables, 1932–1934.*

Australian Life Tables, 1946–1948.

Australian Life Tables, 1953–1955.

Australian Mineral Industry Statistics (formerly *Minerals and Metals Bulletin*).—Part 2 of Quarterly Bulletin issued jointly with the Bureau of Mineral Resources.

Australian Primary Industries.—Report prepared for the Empire Producers Conference, Sydney, March, 1938.

Census (1911) Results.—Bulletins. Vols. I. (Statistician's Report), II., and III., with Appendix *Mathematical Theory of Population*.

Census (1921) Results.—Bulletins, Nos. 1 to 26. Parts I. to XVI., forming Vol. I., and Parts XVII. to XXIX., forming, with the Statistician's Report, Vol. II. NOTE.—Part XXVII., Life Tables.

Census (1933) Results.—Bulletins, Nos. 1 to 25. Parts I. to XIV., forming Vol. I., Parts XV. to XXVIII., forming Vol. II., and Parts XXIX. to XXXVII., forming, with the Statistician's Report and Australian Life Tables, 1932–1934, Vol. III.

Census (1947) Results.—Bulletins, Nos. 1 to 25. Parts I. to XVI., forming Vol. I., Parts XVII. to XIX., forming Vol. II., and Parts XX. to XXVIII., forming, with the Statistician's Report and Australian Life Tables, 1946–1948, Vol. III.

Census (1954) Results.—See Price List at end of this volume.

Census of Motor Vehicles, 1947–48 (see *Survey of Motor Vehicles, 1947–48*).

Census of Motor Vehicles, 31st December, 1955.—Bulletins, Nos. 1 to 8.

* *Census of Retail Establishments (1947–48) Results.*—Bulletins, Nos. 1 to 7.

* *Census of Retail Establishments (1948–49) Results.*—Bulletins, Nos. 1 to 7.

* *Census of Retail Establishments (1952–53) Results.*—Bulletins, Nos. 1 to 14.

* *Dairying Industry* (formerly *Summary of Dairying Industry*).—Statistical Bulletin, monthly; first issue, September, 1937.

Demography.—Bulletin, annually, 1911 to 1958.

* *Digest of Current Economic Statistics.*—Monthly, since August, 1959.

* *Factories, Principal Statistics, Summary.*—Annually, 1948–49 to 1957–58.

Finance.—Bulletin, 1907 to 1916–17 annually; 1917–18 and 1918–19 (one vol.); 1919–20 and 1920–21 (one vol); 1922–23 to 1957–58 annually. From 1955–56 issued in two parts; Part I., Public and Private Finance; Part II., Commonwealth Taxation.

* *Food Production and the Consumption of Foodstuffs and Nutrients in Australia, Statistical Bulletin.* Half-yearly, 1946–47 to 1947–48; annually, 1948–49 to 1958–59.

* *Fruit Growing Industry Summary.*—Annually, 1944–45 to 1958–59.

Labour and Industrial Statistics.—Memoranda and Reports, various, to 1913.

Labour Report.—Annually, 1913 to 1958.

* *Livestock Numbers* (formerly *Summary of Livestock Statistics*)—Statistical Bulletin, annually, 1943 to 1960.

Local Government in Australia.—July, 1919.

* *Manufacturing Industries.*—Bulletins on Individual Industries, annually, 1936–37 to 1939–40, 1940–41 (issue incomplete), and 1944–45 to 1958–59.

Monthly Review of Business Statistics.—First issue, October, 1937.

* *Occupation Survey (1945) Results.*—Detailed tables.

Official Year Book of the Commonwealth of Australia.—Annually, 1907 to present issue (No. 46). Issues Nos. 40 to 46 also published in parts.

* Distributed by the Commonwealth Statistician—for methods of obtaining other publications still in print see back page of this volume.

- Oversea Trade*.—Bulletin, annually, 1906 to 1959–60.
- **Oversea Trade*.—Preliminary Bulletin. Annually, 1952–53 to 1959–60.
- **Oversea Trade Statistics: Imports Cleared for Home Consumption classified according to Individual Items of the Customs Tariff*, 1950–51 to 1959–60.
- Australian Exports*. Annually, 1958–59 to 1959–60.
- Pocket Compendium of Australian Statistics* (formerly *Statistical Digest*).—1913, 1914, 1916, and 1918 to 1960 annually.
- Population and Vital Statistics*.—Bulletins and Reports, various, 1906–1910.
- Primary Industries*.—Bulletins, annually, 1950–51 to 1957–58, in two parts—Part I. Rural Industries; Part II. Non-Rural Industries and Value of Production.
- Production*.—Bulletin, annually, 1906 to 1949–50. From 1936–37 to 1949–50 issued in two parts—Part I. Secondary Industries; Part II. Primary Industries (including Total Recorded Production); thereafter separate Bulletins (see *Primary Industries* and *Secondary Industries*).
- Professional Papers*.—Various. A full list appears in Official Year Book No. 13. p. 3.
- Quarterly Summary of Australian Statistics*.—First issue, No. 70. December, 1917, replacing *Monthly Summary of Australian Statistics* (Bulletins Nos. 1 to 69).
- **Registrations of New Motor Vehicles*.—Statistical Bulletin, monthly and annually.
- **Report of Proceedings of the Conference of British Commonwealth Statisticians*, 1951.
- **Rural Land Use and Crop Statistics* (formerly *Summary of Crop Statistics*).—Statistical Bulletin, annually, 1943–44 to 1958–59.
- Secondary Industries*.—Bulletin, annually, 1950–51 to 1957–58.
- **Size Classification of Rural Holdings*, 1955–56, Bulletins Nos. 1 to 7.
- Social Insurance*.—Report to the Hon. the Minister for Trade and Customs, 1910.
- Social Statistics*.—Bulletin, 1907 to 1915 annually, and 1918.
- Superannuation for the Commonwealth Public Service*.—Report to the Hon. the Minister for Home Affairs, 1910.
- **Survey of Motor Vehicles (1947–48) Results*.—Bulletins Nos. 1 to 7.
- **Survey of Private Pensions and Retiring Allowance Schemes*, 1955–56 (reprinted in *Finance*, Part I., Bulletin No. 47).
- **Survey of Private Superannuation Schemes 1951–52* (reprinted in *Finance* Bulletin No. 44).
- Transport and Communication*.—Bulletin, 1906, 1908 to 1916 annually, 1919 to 1930 annually, and 1932 to 1958–59 annually.
- Wealth*.—The Private Wealth of Australia and its Growth as ascertained by various methods, together with a Report on the War Census in 1915.
- **Wheat Industry* (formerly *Summary of the Wheat Situation*).—Statistical Bulletin, periodically; first issue, July, 1936.
- **Wool Production and Utilization*.—Bulletin, annually, 1952–53 to 1958–59.

The foregoing list includes all the printed publications issued from the Bureau, and certain more important mimeographed publications issued for the most part annually. Other mimeographed statements are distributed by the Commonwealth Statistician and deal with a wide variety of subjects, as follows:—

Annually—Bee Farming; Bulletin of Oversea Investments; Commonwealth, State and Territory Taxation Collections; Factory Products (Principal); Fire, Marine and General Insurance; Fishing and Whaling; Milking Machines on Rural Holdings; Mining and Quarrying; Trade of Australia with Eastern Countries; Rural Statistics of the Australian Capital Territory; Tractors on Rural Holdings; University Statistics; Value of Production; Wheat Industry; Wine and Brandy Statistics; Wool Production.

Half-yearly—Australian Balance of Payments; Capital and Maintenance Expenditure; Labour Turnover; Trade of Australia with the United Kingdom.

Quarterly—Building; Consumer Price Index; New Capital Raisings; Retail Sales of Goods; "C" Series Retail Price Index; Road Traffic Accidents; Tractor Statistics; Trade of Australia with Monetary Groups.

Monthly—Banking; Demographic Review; Employment; Exports of Wool; Export Prices Index; Gold Mining Industry; Life Assurance; Meat Industry; Oversea Trade; Production Statistics; Retail Hire Purchase Operations of Finance Businesses; Savings Bank Statistics; Wholesale Price (Basic Materials and Foodstuffs) Index.

* Distributed by the Commonwealth Statistician—for methods of obtaining other publications still in print see back page of this volume.

(ii) *Commonwealth Parliamentary and Departmental Reports and Papers.* Lists of the principal official reports and other documents containing statistical information issued from the inauguration of the Commonwealth appear in the Official Year Books up to No. 13, but it is not now practicable to undertake the preparation of such lists.

3. **State Publications.**—The chief statistical publications of each State are set out hereunder. As with the Commonwealth Parliamentary and Departmental Reports and Papers, it is not practicable to enumerate the various Departmental Reports, statements of accounts, etc., issued by officials, boards, local and semi-governmental authorities, etc., in each State.

- (a) *New South Wales*—Statistical Register (annually); Official Year Book of New South Wales (annually); Pocket Year Book (annually); Statistical Bulletin (monthly to December, 1919, quarterly to June, 1943, then discontinued to September, 1948); Monthly Summary of Business Statistics.
- (b) *Victoria*—Statistical Register (annually to 1916, then discontinued); Victorian Year-Book (annually); Victorian Pocket Year Book (annually); Statistical Abstract (quarterly to 1917, then discontinued to December, 1946, quarterly to March, 1958, then discontinued); Victorian Monthly Statistical Review.
- (c) *Queensland*—Statistical Register (annually); Official Year Book, 1901; A.B.C. of Queensland Statistics (annually to 1936, then discontinued); Queensland Year Book (annually 1937 to 1941, then discontinued to 1945); Queensland Pocket Year Book (annually).
- (d) *South Australia*—Statistical Register (annually); Official Year Book, 1912 and 1913; Statesman's Pocket Year Book of South Australia (annually); Quarterly Summary of Statistics.
- (e) *Western Australia*—Statistical Register (annually); Statistical Abstracts (quarterly, previously issued monthly to July, 1917); Pocket Year Book of Western Australia (annually); Official Year Book of Western Australia (new series) from 1957.
- (f) *Tasmania*—Statistical Register (annually); Pocket Year Book of Tasmania (annually); Monthly Review of Business Statistics.

§ 3. The Third Conference of British Commonwealth Statisticians, Canberra, 1951.

Conferences of the Government Statisticians of the British Commonwealth were held first in London in 1920 and then in Ottawa in 1935. The third Conference was held in Canberra, from 12th to 23rd November, 1951. Delegates were present from Australia, Canada, Ceylon, India, New Zealand and the United Kingdom (including a representative of the Colonial Office). Ireland, the Commonwealth Economic Committee and the United Nations were represented by observers, and the Australian State Government Statisticians were also present. A summary of the activities of the conference may be found in Official Year Book No. 39, page 1320. The fourth Conference was held in London in 1956 and the fifth will be held in New Zealand in November, 1960.

§ 4. Select List of Works about, or published in, Australia.

(Compiled by the Librarian of the Commonwealth National Library.)

This list is designed to meet the growing need, in Australia as publishing develops, and overseas as interest in Australia widens, for an authoritative current reference and reading list of books dealing with Australia or of Australian authorship, wherever published.

Australians will find these books in the National Library and in their State Libraries as well as in leading bookshops. Oversea readers may have access to them in the collections which the National Library maintains at 44 Australian posts abroad. They will be found also, increasingly, in leading libraries and bookshops in many countries. In the United States, for example, Australian books are included in the Farmington Plan in which 62 libraries and research institutions co-operate to ensure that at least one copy of all material published in any part of the world and likely to be required for a serious purpose will be available promptly somewhere in the country. Under a similar arrangement, Australian books are supplied to the National Library of Canada.

The list is classified broadly by subject and under each heading there is first a list of the principal standard books still in print, then a list of selected books and official publications (excluding annual reports) published in the last few years. To ensure that, so far as is

possible, an evenness of standard is maintained in the compilation of the list, the advice of a representative range of experts in the various subject fields has been sought. Where known the retail price in the country of publication is given, but this is subject to fluctuation.

The Library also issues a series of select lists which include:—*Australian Public Affairs Information Service* (monthly and, since 1955, cumulated annually); a subject index of material in new books, pamphlets, current periodicals and government publications from English-speaking countries, with an important bearing on investigations into Australian political, economic, cultural and social affairs; and the following full bibliographies.

Australian Government Publications, a monthly list covering both the Commonwealth and the States;

Books Published in Australia, a monthly list of books supplied to the National Library under copyright.

The two last-mentioned publications are cumulated annually as the *Annual Catalogue of Australian Publications* which includes also a list of books published overseas of Australian interest or by authors resident in Australia, a select list of the more important Australian periodical and serial publications and a directory of publishers.

DIARY OF PRINCIPAL ECONOMIC EVENTS, 1956 to 1959.

The principal economic events for the years 1931 to 1938 were shown on pages 968 to 977 of Official Year Book No. 33, those for the years 1939 to 1944 on pages 1129 to 1141 of Official Year Book No. 36, those for the years 1945 to 1948 on pages 1235 to 1245 of Official Year Book No. 37, while those for the years 1949 to 1955 were covered by Official Year Books Nos. 39 to 42. To conserve space, some of the items originally shown for the years 1956 and 1957 have been omitted from this issue. Previous issues should be consulted for additional information for these years.

1956.

In order to arrest inflationary tendencies and the decline in international reserves, additional measures were found necessary early in 1956. Despite import restrictions, overseas balances had fallen by £55 million in the six months ended December, 1955. New taxation measures were passed to provide a brake on consumption and investment spending. Taxation increased on motor vehicles and petrol, higher customs and excise duties on beer, spirits, tobacco, cigars and cigarettes, increased company taxation and increased sales tax on less essential goods. Banks agreed to raise interest rates on fixed deposits by 1 per cent. and overdraft rate from 5 per cent. to an average of 5½ per cent. In June, new import cuts estimated at £40 million a year were imposed on motor vehicles and chassis. Overseas reserves had fallen by a further £18 million in the six months ended June, 1956. Imports fell from £863 million in 1955 to £765 million in 1956 and exports rose from £778 million to £840 million. Exports of wool were £23 million higher at £377 million and exports of wheat and flour £19 million higher at £84 million. Overseas reserves at December, 1956, stood at £425 million, £70 million higher than in June, 1956.

Production of wool in 1955-56 was 1,410 million pounds. Wheat production in 1955-56 was 195 million bushels. Preliminary estimates of the total value of production of primary industries suggested an increase of 8 or 9 per cent. in 1956-57.

Secondary production generally was at the same high level as in 1955.

Although total civil employment (excluding rural and household domestic employees) was somewhat higher in the year, the number of persons receiving unemployment benefits was over 13,000 at the end of 1956, compared with 3,245 at the end of 1955. Nominal wages were nearly 5 per cent. higher, the main increase occurring in June, when an increase of 10s. a week in the Commonwealth basic wage was granted by the Full Arbitration Court.

Although there was little change in gross private investment on fixed capital equipment during 1956, significant changes occurred in some of the components of investment. Private dwelling construction was about £10 million lower, the value of motor cars purchased was about £15 million lower, investment in commercial vehicles and other capital equipment was at much the same level and other new building and construction was about £20 million higher than in 1955.

5th January.—Rent control lifted in Tasmania.

18th January.—Federal Executive Council empowered all trading banks to operate Savings Banks on conditions broadly the same as those governing State Savings Banks. (Bank of New South Wales Savings Bank Limited and Australia and New Zealand Savings Bank Limited opened 19th January, C.B.C. Savings Bank Limited opened 16th July, 1956.)

23rd January.—General Australian waterside strike over pay rates and working conditions for waterside workers. Queensland floods destroyed tobacco crops in south-west, floodwaters created widespread havoc, heavy losses of sheep.

1st February.—Loan Council meeting in Canberra decided not to alter the £190 million programme for State public works in this financial year. It agreed also to increase the interest rate on public loans by semi-governmental authorities from 4½ to 4¾ per cent. but decided against making any change in the Commonwealth bond rate.

15th February.—Waterside workers resumed work in all Australian ports after 23 days strike (see 23rd January).

17th February.—Conciliation Commissioner reduced award wages for shearers in all States except Queensland by 5 per cent. from 5th March.

20th February.—Commonwealth Government set up Advisory Panel of experts to advise Economic Committee of Commonwealth Ministry on economic problems.

24th February.—Federal Council of Australian Workers' Union called on shearers and other pastoral workers not to work under new rates fixed by Conciliation Commissioner (*see* 17th February).

1st March.—British Atomic Energy Commission contracted to buy more than £40 million worth of uranium oxide from Mary Kathleen leases near Mt. Isa.

5th March.—Improvements to working of the arbitration system discussed at round-table conference by Ministry of Labour Advisory Council which included leading trade-unionists, employers' organizations and Government experts.

14th March.—Prime Minister, in a statement to the House of Representatives, announced a number of new economic measures proposed by the Government to achieve economic stability. These included increases in sales tax on motor vehicles, jewellery and other goods of a less essential character, increases in customs and excise duties on petrol, beer, spirits, tobacco, cigarettes and cigars and increased income tax on companies. In addition, bank overdraft rates would be permitted to rise from 5 per cent. to an average of $5\frac{1}{2}$ per cent. with a maximum of 6 per cent. and bank fixed deposit rates would be increased by 1 per cent.

21st March.—Australian Loan Council approved Commonwealth proposal that interest rate on new semi-governmental loans be raised. Three new loans issued at rates of $5\frac{1}{4}$ per cent. and $5\frac{3}{8}$ per cent.

27th March.—Announced that banks would be free to fix their own rates for individual loans within the limits announced by the Prime Minister on 14th March (*see* above).

30th March.—Agreement completed between Australia and Netherlands under which 75,000 Dutch settlers would come to Australia in next five years.

4th April.—Rural and Industries Bank of Western Australia opened savings bank department.

7th April.—Commonwealth Bank increased rates of interest payable on savings bank accounts by one-quarter per cent. Other savings banks followed suit.

19th April.—Bill introduced in Commonwealth Parliament to set up Export Payments Insurance Corporation. (Act assented to 19th June.)

27th April.—New agreement finalized by United Nations Wheat Conference; to come into force on 1st August, for a period of three years.

25th May.—Full Arbitration Court announced 10s. increase in Commonwealth Basic Wage and restated decision not to make automatic quarterly adjustments.

29th May.—Bill introduced in Commonwealth Parliament to replace Stevedoring Industry Board by Australian Stevedoring Industry Authority. (Act assented to 30th June.)

Announced that, as part of Commonwealth Government's world-wide trade promotion drive, Australian trade missions would visit New Zealand, India, Ceylon, Japan, Pakistan, the Middle East and, possibly, the Philippines to try to boost Australian exports.

19th June.—Announcement made of successful conclusion of negotiations for an Australian loan of \$25 million to be raised in New York.

21st June.—Executive of Australian Council of Trades Unions, at special congress in Melbourne, empowered to take nation-wide strike action against Stevedoring Industry Act (*see* 29th May).

24th June.—Biggest floods for 70 years on Darling and Murrumbidgee Rivers covered vast areas of country in south-west New South Wales and also affected northern Victoria.

26th–28th June.—At Loan Council Meeting, Commonwealth rejected proposals by the States for a substantially increased loan programme to finance State works during 1956–57. With Commonwealth dissenting, Loan Council approved a governmental borrowing programme of £210,000,000 for 1956–57. (*See* p. 1134 of Official Year Book No. 44 for details.)

28th June.—At Premiers Conference, Acting Prime Minister and Treasurer announced that the Commonwealth Government would make a supplementary grant to the States of £19,400,000. This would bring the total of tax reimbursement grant and supplementary grant to £173,000,000 or £16,000,000 more than similar grants in 1955–56.

Acting Prime Minister announced new £40 million a year import cuts to reduce imports of fully assembled motor vehicles by 50 per cent. and unassembled chassis by 30 per cent. Dollar licences for import of motor vehicles from North America reduced by 30 per cent.

10th July.—By decision of Privy Council, New South Wales Government held liable for repayment of £1 million to interstate road hauliers in respect of licence fees and mileage charges paid since July, 1952.

13th July.—Tasmanian wages boards decided to suspend quarterly adjustments of State Basic Wage after 16s. adjustment made for June quarter.

1st August.—New International Wheat Agreement commenced to operate. Australian quota 30 million bushels out of total of 303 million bushels (*see* Chapter XXII., p. 901).

14th August.—New Conciliation and Arbitration Act became effective. (*See* Chapter XII., page 416.)

16th August.—Special Premiers' Conference. Commonwealth asked States to freeze basic wage but failed to reach agreement.

22nd August.—Large deposit of bauxite discovered on west coast of Cape York Peninsula.

29th August.—1956–57 Budget introduced into the New South Wales Legislative Assembly. (For details *see* p. 1134 of Official Year Book No. 44.)

30th August.—Commonwealth Budget for 1956–57 introduced into the House of Representatives. (For details, *see* p. 1134 of Official Year Book No. 44.)

11th September.—1956–57 Budget introduced into the Victorian Legislative Assembly. (For details, *see* p. 1135 of Official Year Book No. 44.)

18th September.—1956–57 Budget introduced into the South Australian Legislative Assembly. (For details, *see* p. 1135 of Official Year Book No. 44.)

20th September.—1956–57 Budget introduced into the Queensland Legislative Assembly. (For details, *see* p. 1135 of Official Year Book No. 44.)

28th September.—All price controls suspended in New South Wales.

4th October.—Minister for Trade stated that United Kingdom asked Government for its reactions to suggestion that United Kingdom should join in partial free trade area in Western Europe.

10th October.—Victorian Legislative Assembly passed legislation to abolish cost of living adjustments for employees under State awards.

11th October.—Prime Minister announced signing of new five-year Sugar Agreement between Commonwealth and Queensland governments.

12th October.—Queensland State Industrial Court granted an interim shearing award for payment of £7 11s. per 100 sheep shorn. This was accepted by shearers and 10 months old industrial dispute ended.

26th October.—Eight metal trades unions, backed by A.C.T.U., applied to newly formed Commonwealth Industrial Commission for basic wage increases and restoration of quarterly cost-of-living adjustments.

31st October.—1956–57 Budget introduced into the Tasmanian House of Assembly. (For details, *see* p. 1135 of Official Year Book No. 44.)

8th November.—1956–57 Budget introduced into the Western Australian Legislative Assembly. (For details, *see* p. 1136 of Official Year Book No. 44.)

12th November.—Australia and United Kingdom agreed on comprehensive trade pact to replace 24-year-old Ottawa Agreement.

22nd November.—Commonwealth Treasurer announced that Minister for External Affairs had signed loan agreements on behalf of Commonwealth for a total of \$27 million (£A12.1 million).

29th November.—First gas from brown-coal gasification plant at Morwell (Victoria) reached Melbourne through 103 mile high-pressure pipeline.

4th December.—World Bank announced \$50 million loan to Australia for development of agriculture, transport, industry and mining.

1957.

Throughout 1957, exports of merchandise continued at a high level, and for 1956-57 reached a total of £973 million. During the second half of 1957, there was a tendency for the level to fall off in comparison with 1956. Imports during the early months of the year continued at the low level established following the restrictions imposed in 1956; but, in the later months of the year, rose considerably following an easing of restrictions in the second quarter. Australia's international reserves rose by £142 million to £567 million during the first six months of the year and by a further £23 million to £590 million during the remainder of the year. Internal trade was at a higher level than in 1956.

Drought conditions in the Eastern States during 1957 considerably reduced the production of many primary products, the total gross value of primary production in 1957-58 being about 10 per cent. below the 1956-57 level.

During the year, secondary industries continued to expand. Employment in factories rose during the year and there were increases in output of most commodities for which information is available.

Employment in the building and construction, mining and quarrying, and transport industries fell during the year by 13,000, 3,700 and 2,600 respectively. These falls, however, were offset to some extent by increases in employment in factories and in the commercial and professional fields. Overall there was a small increase of 9,000 in the number of civil employees (excluding rural and household domestic employees).

Average nominal wage rates for adult males rose approximately 2 per cent. The main increase occurred in the second quarter following an increase of 10s. a week in the Commonwealth basic wage. Average earnings for employees (male units) rose by about 3 per cent. over the year.

1st February.—Shipping freights to the United Kingdom and European countries rose by 14 per cent.

7th February.—Consolidated Zinc Corporation Ltd. announced £8 million construction programme for a zinc smelter and production of sulphuric acid and superphosphate at Cockle Creek (New South Wales).

1st March.—Commonwealth Savings Bank increased its maximum housing loan from £1,750 to £2,500.

2nd April.—Details of easing of import restrictions released. The ceiling for imports in 1957-58 was raised to £775 million but the modified restrictions operated from 1st April, the start of the quota year.

29th April.—Commonwealth Conciliation and Arbitration Commission announced 10s. increase in Commonwealth Basic Wage to operate from 15th May.

New South Wales Government declared eight districts of the State drought areas.

23rd May.—Duties reduced on over 800 items imported from foreign countries.

24th May.—Australian Loan Council approved a government borrowing programme of £200 million for financial year 1957-58. This included £166,840,000 for State Works and £33,160,000 for housing under agreement between the Commonwealth and States. In addition, borrowing programmes of £89,000,000 were approved for semi-governmental and local authorities.

30th May.—Commonwealth Government passed legislation imposing a levy on wheat-growers to finance more wheat research.

4th June.—Consolidated Zinc Corporation announced a major undertaking in the development of Weipa Bauxite on Cape York peninsula.

22nd June.—Acting Prime Minister officially closed Adaminaby Dam outlet gates and water started filling the Adaminaby Reservoir.

26th June.—Commonwealth Government decided to grant United States additional air traffic rights from Australia to Antarctica, South Africa, and South-east Asia for reciprocal rights across the United States for Australian airlines flying to Europe.

2nd July.—High Court ruled that interstate vehicles could not be compelled to register in New South Wales.

6th July.—Agreement on Commerce between Japan and Australia signed in Tokyo by Japanese Prime Minister and Minister for Foreign Affairs and Australian Minister for Trade, on "most favoured nation" basis.

5th August.—First plant in Australia to produce tinplate, built for flat products division of B.H.P. Co. Ltd. at Port Kembla, was officially opened.

15th August.—British migrants enabled to claim pensions as soon as they arrive in Australia. Previously they had waiting period of 5 years for invalid pensions and 20 years for age pensions.

23rd August.—Full High Court upheld validity of Uniform Taxation Legislation but declared invalid the section giving priority to the Commonwealth.

24th August.—Ansett Transport Industries Ltd. purchased A.N.A. as a going concern for £3.3 million.

25th August.—Of growers who exercised their rights to vote, four out of five voted in favour of the Commonwealth Government's stabilization offer for currants and sultanas.

31st August.—Full High Court upheld the validity of a Victorian tax on commercial vehicles, including those engaged in interstate trade, imposed solely for the maintenance of roads.

3rd September.—Commonwealth Budget for 1957–58 introduced into House of Representatives. (For details, see p. 1142 of Official Year Book No. 45.)

4th September.—1957–58 Budget introduced into South Australian House of Assembly. (For details, see p. 1143 of Official Year Book No. 45.)

5th September.—1957–58 Budget introduced into Tasmanian House of Assembly. (For details, see p. 1143 of Official Year Book No. 45.)

11th September.—1957–58 Budgets introduced into New South Wales and Victorian Legislative Assemblies. (For details, see p. 1143 of Official Year Book No. 45.)

12th September.—1957–58 Budget introduced into Western Australian Legislative Assembly. (For details, see p. 1143 of Official Year Book No. 45.)

14th September.—New South Wales Government gazetted maximum interest rates and minimum deposits applicable under hire purchase and credit sales agreements prescribed in the Hire Purchase (Amendment) Act.

26th September.—1957–58 Budget introduced into Queensland Legislative Assembly. (For details, see p. 1143 of Official Year Book No. 45.)

30th September.—Conference of British Commonwealth Finance ministers opened at Mount Tremblant, Canada.

1st October.—Australia entered into double-tax agreement with Canada similar to those existing between Australia and the United Kingdom, and Australia and the United States of America.

17th October.—Applications invited for grant of licences for commercial television stations in the Brisbane, Adelaide, Perth and Hobart areas.

24th October.—Treasurer introduced new banking legislation in House of Representatives. Bills later defeated in Senate (27th November).

4th November.—First shipment of drought-relief wheat left Western Australia for New South Wales and Queensland.

20th November.—Wheat Industry Research Council and Wheat Industry Research Committees appointed.

10th December.—Commonwealth Bank advises trading banks to increase advances.

12th December.—Bill introduced in Victoria to allow cheque facilities to depositors with State Savings Bank of Victoria.

13th December.—Minister for Trade announced that Commonwealth Government had decided to import 1½ million bushels of wheat from Canada into New South Wales.

17th December.—Commonwealth ammunition filling and assembly factory opened at St. Marys, near Sydney.

1958.

Towards the end of 1957, the Australian economy started to feel the effect of the decline in economic activity overseas. Conditions overseas throughout 1958 were such that the prices received for exports, particularly wool and metals, were considerably below those

received in 1956 and 1957. Export income was further reduced by the small quantities of wheat and other grains available for export as a result of the drought conditions in the Eastern States during 1957.

By the beginning of 1958, unemployment was at a higher level than at any time since 1953 although this was mainly restricted to areas affected by the drought and to several mining areas.

To help offset the effect of the fall in export income, the Commonwealth Bank, in April, ceased the restrictions on bank lending and advised banks that there was a need to increase advances, especially in the rural and building industries. At the same time, the bank released £20 million of the special deposits of the trading banks. Further releases later in the year resulted in a reduction in the amount of these deposits from £340,300,000 in December, 1957, to £265,100,000 in December, 1958. In addition, the Commonwealth Government took action to increase public expenditure. In February, the States were offered an additional £5 million revenue grant and the 1957-58 borrowing programmes for local authorities were increased by £3 million.

During the first six months of the year exports of merchandise were only £360 million compared with £530 million in the same period of 1957. There was, during the second half of the year, a slight improvement, and exports of merchandise for the period were £378 million compared with £453 million for the same period of 1957. Imports of merchandise in 1958 were £793 million. £41 million greater than in 1957. During the year, international reserves fell by £90 million to £500 million.

A high level of internal trade continued throughout 1958 and increases in sales of most types of commodities were recorded. Sales under hire purchase agreements were higher than in 1957 and, as a result, balances outstanding increased by £72,800,000 compared with an increase of £34,900,000 in 1957.

The small wheat harvest in 1957-58 (97,600,000 bushels) following the 1957 drought and low prices for wool and other primary products considerably reduced the value of primary production. Towards the end of the year, however, prospects improved and it was estimated that the wheat crop for 1958-59 would exceed 200 million bushels. Wool production (1,433,400,000 lb.) in 1957-58 was 131 million lb. lower than in the previous year.

During the year, large increases in production were recorded in the radio and television industries and motor vehicle industries and substantial increases in many other industries. On the other hand, there was a reduction in the output of many important items of clothing and textiles and of some foodstuffs.

The number of persons in civilian employment (excluding rural and household domestic employees) increased by 29,100 during the year. In the mining and quarrying industries, there was a fall of 3,000 but in most other industries there were substantial increases. There was a slight increase in the number of persons registered for unemployment benefit, the number registered at the end of 1958 being 27,600, compared with 26,000 at the end of 1957.

The average nominal wage rates for adult males rose by approximately 1.7 per cent. during the year. The main increase occurred in the second quarter following an increase of 5s. a week in the Commonwealth basic wage. Average weekly earnings by employees (male units) were about 3 per cent. higher in 1958 than in 1957. The interim index of retail prices was 3 per cent. higher in the December quarter of 1958 than a year earlier.

2nd January.—New Zealand imposed import restrictions resulting in temporary set back to expansion of Australia's exports to New Zealand.

14th January.—Qantas commenced first regular round the world air service via San Francisco and New York.

6th February.—Wheat Industry Research Council inaugurated to study soil fertility and problems of production and marketing of wheat.

9th February.—Commonwealth Government sold two coal mines to State Electricity Commission of New South Wales for £1,800,000.

13th February.—Commonwealth Government made special grant of £5 million to States to assist their general financial position and to counter unemployment.

30th March.—Ceiling for import licences to remain fixed at £800 million per annum with some basic raw materials (e.g. petroleum) to be exempted from licensing.

1st April.—New reciprocal Social Services agreement made with United Kingdom came into operation (*see* p. 700).

18th April.—Australia's first nuclear reactor opened at Lucas Heights, near Sydney, by Prime Minister.

22nd April.—Loan of \$25 million at 4½ per cent. was raised in New York.

12th May.—Conciliation and Arbitration Commission announced a Commonwealth Basic Wage increase of 5s.

14th May.—Commonwealth Government undertook to assist the copper industry to maintain Australian price at £330 a ton, partly by duty, partly by bounty.

5th June.—Australian Loan Council approved of a borrowing programme for the financial year 1958–59 of £210,000,000, including £35,810,000 for housing under Commonwealth–State Housing Agreement and £174,190,000 for State Works. Borrowing programmes for semi-Governmental bodies and Local Authorities amounting to £95,000,000 were also approved.

1st July.—Commonwealth Bank at request of Commonwealth Government made available £10 million credit to New Zealand at 4½ per cent.

4th July.—Netherlands Government raised loan of £1,354,000 from United States Government to help support co-operative housing project for Dutch migrants to Australia. Additional finance to be raised in Australia and Holland to total of £8 to £12 million in next ten years.

17th July.—Agreement reached between New South Wales, Victoria, South Australia and Commonwealth on Snowy Mountains and Murray Waters.

31st July.—Minister for Trade announced easing of restrictions on imports of capital equipment from dollar areas and exemption from licensing on other items.

5th August.—Commonwealth Budget for 1958–59 introduced into House of Representatives.

In 1957–58, receipts of the Consolidated Revenue Fund (excluding self balancing items) were £1,311,400,000. The expenditure (excluding self balancing items and the payment to the Loan Consolidation and Investment Reserve) amounted to £1,207,000,000. There was thus £104,400,000 available for payment to the Loan Consolidation and Investment Reserve. The main items of revenue were (1956–57 receipts shown in parentheses):—Income taxes, £650,400,000 (£620,300,000); Excise Duties, £232,600,000 (£217,400,000); Customs Duties, £71,700,000 (£68,600,000); and Sales Tax, £137,800,000 (£125,800,000). The main items of expenditure were Payments to or for the States, £270,600,000 (£244,100,000 in 1956–57); Social and Health Services, £247,500,000 (£223,900,000); Defence Services, £185,100,000 (£188,500,000); War and Repatriation Services, £127,900,000 (£125,700,000); and Capital Works and Services, £123,500,000 (£107,800,000).

The Budget for 1958–59 provided for an estimated expenditure of £1,278,100,000. In addition, it was expected that £102,000,000 would be available for payment to the Loan Consolidation and Investment Reserve.

The Budget proposals provided for an increase of 10s. a week for age, invalid and widow pensioners who pay rent, a liberalization of the means test for all pensioners and increases in the special rate of War pension, pensions for children of deceased ex-servicemen and the domestic allowance paid to War widows. The living allowances paid to holders of Commonwealth scholarships were to be increased and the Commonwealth Scholarship Scheme extended to provide post-graduate awards. Income Tax concessions included increases in the Zone allowances and the deduction for calls paid on shares in Oil Exploration Companies.

13th September.—Prime Minister opened Tumut Ponds dam on the Snowy River Scheme.

16th September.—1958–59 Budget introduced into New South Wales Legislative Assembly. During 1957–58, the transactions of the Consolidated Revenue Fund, Railways, Metropolitan and Newcastle Transport Services and Sydney Harbour Services resulted in a surplus of £47,000. After providing for debt charges, there were deficits of £8,200,000 on the Railways and £1,400,000 on the Metropolitan and Newcastle Transport Services. The 1958–59 Budget provided for an overall surplus of £31,000. After meeting debt charges, it was estimated that there would be deficits of £6,500,000 on the Railways and £1,600,000 on the Metropolitan and Newcastle Transport Services.

17th September.—1958–59 Budget introduced into Victorian Legislative Assembly. In 1957–58, expenditure exceeded revenue by £3,200,000. The deficit on the Railways was £6,000,000 and on the State Coal Mines £300,000. There was a surplus of £3,100,000 on

General account. The Budget for 1958-59 provided for a total expenditure of £154,200,000. It was estimated that revenue would be £152,500,000 leaving a deficit of £1,700,000. It was estimated that the deficit on the Railways would be £3,600,000 after providing for debt charges. Budget proposals provided for increases in suburban rail fares, stamp duties on land transfers and hire purchase agreements, licence fees for insurance business and probate and gift duties. The general exemption limit for land tax would be raised from £1,000 to £1,250.

18th September.—1958-59 Budget introduced into South Australian House of Assembly. In 1957-58, revenue amounted to £70,600,000 and expenditure to £71,000,000 leaving a deficit of £400,000. For 1958-59, it was estimated that expenditure would be £73,400,000 and revenue £72,400,000 thus leaving a deficit of £1,000,000.

1958-59 Budget introduced into Tasmanian House of Assembly. The transactions of the Consolidated Revenue Fund in 1957-58 resulted in a deficit of £812,000. Receipts of the Consolidated Revenue Fund totalled £20,800,000 and expenditure £21,600,000. For 1958-59 it was estimated that expenditure would be £22,800,000 and revenue £21,700,000 leaving a deficit of £1,100,000.

25th September.—1958-59 Budget introduced into Western Australian Legislative Assembly. Financial transactions for the year 1957-58 resulted in a deficit of £1,100,000. For 1958-59, it was estimated that expenditure would be £61,800,000 and revenue £59,800,000 resulting in a deficit of £2,000,000.

2nd October.—1958-59 Budget introduced into Queensland Legislative Assembly. In 1957-58 receipts of the Consolidated Revenue Fund were £88,000,000. Expenditure was £89,500,000 leaving a deficit of £1,500,000. Excluding the amount provided for reduction of the accumulated debit balance in the Consolidated Revenue Fund (£5,200,000) it was estimated that expenditure in 1958-59 would be £96,000,000. With revenue estimated at £94,200,000 there would be a deficit of £1,800,000.

8th October.—First issue of new "Special" Bonds of £10 units, with a limit of £5,000, bearing variable rates of interest and redemption bonuses according to the period held.

High Court ruled Queensland road transport levies valid.

9th October.—Victorian State Electricity Commission $5\frac{1}{2}$ per cent. loan for 7, 10, or 25 years undersubscribed by £800,000 and Queensland S.E.C. loan of $5\frac{3}{8}$ per cent. under-subscribed by £115,000.

15th October.—£Stg. 15,000,000 Loan floated in London, the first Australian loan floated in London for 19 years. At $5\frac{1}{2}$ per cent., issued at £98 Stg., this loan was over-subscribed.

1st November.—Savings Bank interest raised $\frac{1}{4}$ per cent. to 3 per cent. on balances up to £2,000.

7th November.—Work commenced on new £30,000,000 power station at Wangi, N.S.W. with a planned capacity of 60,000 kW.

10th November.—The full bench of the Industrial Commission granted marginal increases of 15-25 per cent. to steel workers.

1959.

Early in 1959, it was evident that the recession overseas in 1958 had not seriously affected the Australian economy. The prices received for wool, which had been falling during 1958, commenced to rise again. Production and building activity were still expanding. There were also indications of an improvement in the employment position.

In the course of the year there were further improvements in the prices received overseas for wool, hides, butter and metals. The price of wheat however declined. These increased prices combined with a greater wool clip and near record wheat harvest resulted in an increase of more than £150 million in exports over the previous year. Imports of merchandise also increased following relaxation of import restrictions in April and August. During the year international reserves increased by £47 million.

The 1958-59 wheat harvest of 215 million bushels was only 5 million bushels less than the record harvest in 1947-48. It was more than double that of the previous year which had been seriously affected by drought conditions.

Weather conditions throughout the year were generally favourable for agricultural and pastoral production with the notable exception of South Australia where severe drought conditions prevailed. By the end of the year, it was apparent that another big wheat crop

(nearly 200 million bushels) would be produced. Wool production which had increased by over 10 per cent. to a record of 1,591 million lb. in 1958-59 was expected to be substantially higher again in 1959-60.

The expansion of internal trade was maintained. Retail sales of motor vehicles, petrol, etc., were 11 per cent. higher than in 1958 and other commodities over 5 per cent. higher. Sales under hire purchase agreements again increased and the balances outstanding under agreements increased by £62 million compared with an increase of £72,700,000 in 1958.

The number of persons in civilian employment increased by 73,800 during the year compared with an increase of 36,400 in 1958. Increased employment was recorded in all major industries except the mining and quarrying industry where the fall of recent years was continued. The number of persons in receipt of unemployment benefit fell by 5,000 during the year.

Throughout the year industrial production continued to expand. There were significant increases in the production of iron and steel, some building materials and in the generation of electricity. The lower level of production of clothing and textiles in 1958 continued into the early months of 1959. However, during the later months of the year there was a considerable improvement in the output of the clothing industry. Building activity was rising rapidly during the year with the number and value of new houses commenced rising about 10 per cent. above 1958, and the value of other new building commenced rising about 25 per cent.

In June the Commonwealth Basic Wage was increased by 15s. a week for males and 11s. 3d. a week for females. This was followed by an increase in margins for skill (28 per cent. in most industries) in December. As a result the minimum weekly wage rate index increased by 7 per cent. during the year and average weekly earnings increased by 5 per cent. Retail prices, measured by the Consumer Price Index, rose by 2 per cent.

1st January.—New South Wales Acts, Industrial Arbitration (Female Rates) Amendment Act 1958, providing for equal pay for male and female employees performing work of same or like nature, and Annual Holidays Act 1944-1958, providing for three weeks annual holidays for all New South Wales workers under State awards, became operative.

19th January.—Australian Exchange Control Regulations eased to allow of payment for imports in convertible sterling or any major non-sterling currencies instead of dollars and sterling and other adjustments removing differences between remittances to dollar area and other non-sterling countries.

24th January.—Contracts let by Electricity Commission of New South Wales for construction of new £14,500,000 power station at Vales Point, Lake Macquarie.

29th January.—Export controls lifted on 25 items, including newsprint, copra, margarine and iron and steel products.

7th February.—Queensland Government lifted price controls on all items other than basic foods and groceries.

15th February.—Seven-man committee set up to examine the case for the introduction of decimal currency into Australia.

18th February.—Commonwealth Government maintained allocation for grants to States for works and housing (*see* 5th June, 1958) at £210,000,000 but raised Local Government ceiling for borrowing from £16,500,000 to £20,500,000.

25th February.—Australia's first government sponsored trade mission to North America left to examine and develop export markets.

4th March.—Premiers' Conference opened. Conference accepted Commonwealth plan for roads and bridges involving an expenditure of £720,000,000 over next five years, of which Commonwealth was to contribute £250,000,000.

23rd March.—Republic of China sent first trade mission to Australia led by Chairman of Bank of Taiwan.

2nd April.—Licensing restrictions on dollar imports removed from 330 items. Minister for Trade left for trade talks in Washington.

6th April.—First government sponsored New Zealand trade mission to visit Australia arrived in Sydney.

16th April.—High Court of Australia ruled that provisions of Commonwealth Re-establishment and Employment Act giving priority in employment to ex-servicemen were invalid because of lapse of time since end of 1939-45 War.

23rd April.—Royal assent given to Reserve Bank Act, Commonwealth Banks Act, Banking Act and Banking (Transitional Provisions) Act. (*See p. 759.*)

Production of lead at Mt. Isa reduced by 25 per cent. to help world lead position. Corresponding increase in copper production.

1st May.—Commonwealth government decided to increase subsidy on oil search by £1,000,000 a year for each of next three years.

4th May.—T.1 underground power station, first major station of Snowy Mountains Scheme, commenced operation with output capacity of 160,000 kW.

16th May.—Indian railways mission visited Australia as guest of Commonwealth Government to arrange for purchase of wide range of railway equipment.

20th May.—New Zealand eased import restrictions (*see* 2nd January, 1958). Market for Australian canned and dried fruits in New Zealand expected to increase by 16 per cent. as a result.

1st June.—Migration Act 1958, providing *inter alia* for abolition of Dictation Test, and adoption of entry permit system (*see* p. 324), became operative.

5th June.—Commonwealth Conciliation and Arbitration Commission, in majority decision on Basic Wage Inquiry, increased Federal basic wage by 15s. for males and 11s. 3d. for females from first pay period after 11th June. Federal awards higher than State awards for first time in 20 years.

8th June.—£10,000,000 blast furnace began production at Port Kembla with a capacity of 600,000 tons of pig iron a year, making a total of 3,000,000 tons for Australia.

9th June.—Working hours in State-owned coal mines in New South Wales reduced from 40 to 37½ a week.

24th June.—Premiers' Conference accepted Commonwealth proposal for new plan of tax reimbursements based on population and wage levels, grants to be increased from £225,750,000 to £244,500,000 for 1959–60.

Loan Council approved of borrowing programme for 1959–60 of £220,000,000 (£183,900,000 for States, £36,100,000 for Commonwealth–State Housing). Local and Semi-governmental borrowing ceiling fixed at £100,000,000.

26th June.—Expert committee on coal formed to advise Government on all aspects of uses of coal.

29th June.—Australia's quota to International Monetary Fund increased from \$200,000,000 to \$300,000,000.

30th June.—Fourteen mile, £19,000,000, Eucumbene–Tumut tunnel in Snowy Mountains Hydro-electric Scheme completed four months ahead of schedule.

2nd July.—S.S. *Delfino* left Sydney with 30,000 live sheep for export to United States of America, the first significant shipment of this kind ever made.

First 707 jet-liner arrived in Sydney for Qantas, part of major re-equipment programme on overseas services and conversion to jet-planes of major internal air-lines in Australia.

19th July.—Remaining undistributed profits of Joint Organization marketing of wool (about £2,400,000) transferred to Wool Research Fund.

1st August.—Import restrictions further eased by about £50,000,000 annually (*see also* 2nd April) and licensing discrimination removed from almost all imports from dollar areas.

11th August.—Commonwealth Budget for 1959–60 introduced into House of Representatives.

In 1958–59, receipts of the Consolidated Revenue Fund (excluding self-balancing items) were £1,287,882,000. The expenditure (excluding self balancing items and the payment to the Loan Consolidation and Investment Reserve) amounted to £1,259,935,000. There was thus £27,947,000 available for payment to the Loan Consolidation and Investment Reserve. The main items of revenue were (1957–58 receipts shown in parentheses):—Income taxes, £608,700,000 (£650,400,000); Excise Duties, £237,200,000 (£232,600,000); Customs Duties, £71,700,000 (£71,700,000); and Sales Tax, £143,600,000 (£137,800,000). The main items of expenditure were Payments to or for the States, £286,600,000 (£270,600,000); Social and Health Services, £278,200,000 (£247,500,000); Defence Services, £152,000,000, excluding £37,300,000 provided from Loan Fund, (£185,100,000); War and Repatriation Services, £128,200,000 (£127,900,000); and Capital Works and Services, £132,400,000 (£123,500,000).

The Budget for 1959-60 provided for an estimated expenditure of £1,645,300,000 of which £1,348,300,000 would be provided from the Consolidated Revenue Fund and £297,000,000 from the Loan Fund. In addition it was expected that £37,000,000 would be available for payment to the Loan Consolidation and Investment Reserve.

8th September.—1959-60 Budget introduced into Victorian Legislative Assembly. In 1958-59, expenditure exceeded revenue by £2,500,000. The deficit on the Railways was £3,900,000 and on the State Coal Mines £200,000. There was a surplus of £1,600,000 on General Account. The Budget for 1959-60 provided for a total expenditure of £165,100,000. It was estimated that revenue would be £163,900,000 leaving a deficit of £1,200,000. It was estimated that the deficit on the Railways would be £5,200,000 after providing for debt charges.

16th September.—1959-60 Budget introduced into New South Wales Legislative Assembly. During 1958-59, the transactions of the Consolidated Revenue Fund, Railways, Metropolitan and Newcastle Transport Services and Sydney Harbour Services resulted in a surplus of £43,000. After providing for debt charges, there were deficits of £6,400,000 on the Railways and £1,800,000 on the Metropolitan and Newcastle Transport Services. The 1959-60 Budget provided for an overall surplus of £58,000. After meeting debt charges, it was estimated that there would be deficits of £6,000,000 on the Railways and £2,300,000 on the Metropolitan and Newcastle Transport Services.

22nd September.—1959-60 Budget introduced into Western Australian Legislative Assembly. Financial transactions for the year 1958-59 resulted in a deficit of £1,700,000. For 1959-60, it was estimated that expenditure would be £64,800,000 and revenue £63,300,000 resulting in a deficit of £1,500,000.

24th September.—1959-60 Budget introduced into South Australian House of Assembly. In 1958-59, revenue amounted to £72,700,000 and expenditure to £73,700,000 leaving a deficit of £1,000,000. For 1959-60, it was estimated that expenditure would be £80,300,000 and revenue £79,500,000 thus leaving a deficit of £800,000.

29th September.—1959-60 Budget introduced into Queensland Legislative Assembly. In 1958-59, receipts of the Consolidated Revenue Fund were £93,800,000. Expenditure was £95,000,000 leaving a deficit of £1,200,000. For 1959-60, it was estimated that the Budget would be approximately balanced with revenue and expenditure both amounting to £101,900,000.

1959-60 Budget introduced into Tasmanian House of Assembly. The transactions of the Consolidated Revenue Fund in 1958-59 resulted in a deficit of £900,000. Receipts of the Consolidated Revenue Fund totalled £21,900,000 and expenditure £22,800,000. For 1959-60 it was estimated that expenditure would be £24,700,000 and revenue £24,100,000 leaving a deficit of £600,000.

15th October.—Approval of new import levels by Japanese government expected to increase Australia's wool exports substantially.

16th October.—New trade agreement with Germany provided for increases in exports of meat, grain, fruit, and wine.

30th October.—£15,000,000 special deposits (first for 2½ years) called in from Trading Banks by Commonwealth Bank; (further £20,000,000 called in 30th November, and more calls anticipated next year).

16th November.—Currency restrictions for Australians travelling abroad relaxed substantially. Limit £2,000 a year to any part of the world, an increase of 25 per cent. for Sterling areas and 150 per cent. for all other areas.

25th November.—First issue of 3 per cent. seasonal Treasury Notes, totalling £12,100,000. Further issues to be made fortnightly until March, 1960.

26th November.—Full Bench of New South Wales State Industrial Commission interpreting Industrial Arbitration (Female Rates) Amendment Act, 1958 (assented to 31st December, 1958), provided for 5 per cent. annual increase in female wages from 1st January, 1960, to 1st January, 1963.

27th November.—Commonwealth Conciliation and Arbitration Commission in judgment on Metal Trades case, granted increase of 28 per cent. in margins to fitters and other skilled metal trades employees. Followed by similar awards by other tribunals.

9th December.—Contracts let for construction of new £120,000,000 power station at Hazlewood (Vic.) planned to double amount of electricity available in Victoria.

CHRONOLOGICAL TABLE.

CHRONOLOGICAL TABLE OF CHIEF EVENTS SINCE THE ESTABLISHMENT OF SETTLEMENT IN AUSTRALIA.

NOTES.—For each earlier year this Table rarely contains more than two or three items; for recent years, however, in order to provide a wide cover of events, etc., it includes a much greater number. Both the nature of the Table and considerations of space render necessary a continual reduction in these items, and for more information the reader should therefore consult earlier issues.

The Government was centralized in Sydney, New South Wales, up to 1825, when Tasmania (Van Diemen's Land) was made a separate colony. In the Table, the names now borne by the States serve to indicate the localities.

Year.

- 1788 N.S.W.—Arrival of "First Fleet", under Captain Arthur Phillip, at Botany Bay. Land in vicinity being found unsuitable for settlement, the expedition moved to Sydney Cove, and formal possession of the colony was taken on 26th January. Formal proclamation of colony and establishment of regular government on 7th February. Branch settlement established at Norfolk Island. French navigator La Perouse visited Botany Bay. First cultivation of wheat and barley. First grape vines planted.
- 1789 N.S.W.—First wheat harvested at Parramatta, near Sydney. Discovery of Hawkesbury River.
- 1790 N.S.W.—Scarcity of provisions. "Second Fleet" reached Port Jackson. Landing of the New South Wales Corps.
- 1791 N.S.W.—Arrival of "Third Fleet". Territorial seal brought by Governor King.
- 1792 N.S.W.—Visit of *Philadelphia*, first foreign trading vessel.
- 1793 N.S.W.—First free immigrants arrived in *Bellona*. First Australian church opened at Sydney. Tas.—D'Entrecasteaux discovered the Derwent River.
- 1794 N.S.W.—Establishment of settlement at Hawkesbury River.
- 1795 N.S.W.—Erection of the first printing press at Sydney. Descendants of strayed cattle discovered at Cowpastures, Nepean River.
- 1796 N.S.W.—First Australian theatre opened at Sydney. Coal discovered by fishermen at Newcastle.
- 1797 N.S.W.—Introduction of merino sheep from Cape of Good Hope.
- 1798 Tas.—Insularity of Tasmania proved by voyage of Bass and Flinders.
- 1800 N.S.W.—Hunter River coal-mines worked. First customs house in Australia established at Sydney. Flinders' charts published.
- 1801 N.S.W.—First colonial manufacture of blankets and linen.
- 1802 Vic.—Discovery of Port Phillip by Lieut. Murray. Qld.—Discovery of Port Curtis and Port Bowen by Flinders. S.A.—Discovery of Spencer and St. Vincent Gulfs by Flinders.
- 1803 N.S.W.—First Australian wool taken to England by Captain Macarthur. Issue of *The Sydney Gazette*, first Australian newspaper. Vic.—Attempted settlement at Port Phillip by Collins. Discovery of Yarra by Grimes. Tas.—First settlement formed at Risdon by Lieut. Bowen.
- 1804 Vic.—Abandonment of settlement at Port Phillip. Tas.—Foundation of settlement at Hobart by Collins.
- 1805 N.S.W.—First extensive sheep farm established at Camden by Captain Macarthur.
- 1806 N.S.W.—"The great flood" on the Hawkesbury. Shortage of provisions. Tas.—Settlement at Launceston.
- 1807 N.S.W.—First shipment of merchantable wool (245 lb.) to England.
- 1808 N.S.W.—Deposition of Governor Bligh.
- 1809 N.S.W.—Free school established.
- 1810 N.S.W.—Post Office officially established at Sydney.
- 1813 N.S.W.—Passage across Blue Mountains discovered by Blaxland, Lawson and Wentworth. Macquarie River discovered by Evans.

- Year.
- 1814 N.S.W.—Flinders suggested the name "Australia" instead of "New-Holland". Creation of Civil Courts.
- 1815 N.S.W.—First steam engine in Australia erected at Sydney. Lachlan River discovered by Evans. Tas.—Arrival of first immigrant ship with free settlers. First export of wheat to Sydney.
- 1816 N.S.W.—Sydney Hospital opened.
- 1817 N.S.W.—Oxley's first exploration inland. Discovery of Lakes George and Bathurst and the Goulburn Plains by Meehan and Hume. First bank in Australia—Bank of New South Wales—opened at Sydney.
- 1818 N.S.W.—Liverpool Plains and the Peel, Hastings and Manning Rivers discovered by Oxley, and Port Essington (N.T.) by Captain King.
- 1819 N.S.W.—First savings bank in Australia opened at Sydney.
- 1820 Tas.—First importation of pure merino sheep from Camden Park (N.S.W.) flocks.
- 1821 Tas.—Establishment of penal settlement at Macquarie Harbour.
- 1822 N.S.W.—Formation of Agricultural Society of New South Wales.
- 1823 N.S.W.—New South Wales Judicature Act passed. Discovery of gold at Fish River by Assistant Surveyor McBrien. Qld.—Brisbane River discovered by Oxley.
- 1824 N.S.W.—Constituted a Crown colony. Executive Council formed. Establishment of Supreme Court at Sydney, and introduction of trial by jury. First Australian Enactment (Currency Bill) passed by the Legislative Council. Proclamation of freedom of the press. First manufacture of sugar. Vic.—Hume and Hovell, journeying overland from Sydney, arrived at Corio Bay. Qld.—Penal settlement founded at Moreton Bay (Brisbane). Fort Dundas settlement formed at Melville Island, N.T.
- 1825 Tas.—Van Diemen's Land (Tasmania) proclaimed a separate colony. Qld.—Major Lockyer explored Brisbane River to its source and discovered coal.
- 1826 N.S.W.—Settlement in Illawarra district. Vic.—Settlement at Corinella, Western Port, formed by Captain Wright.
- 1827 Qld.—Darling Downs and the Condamine River discovered by Allan Cunningham. W.A.—Military settlement founded at King George Sound by Major Lockyer. First official claim of British sovereignty over all Australia.
- 1828 N.S.W.—Second Constitution. First census. Sturt's expedition down Darling River. Gas first used at Sydney. Richmond and Clarence Rivers discovered by Captain Rous. Vic.—Abandonment of settlement at Western Port. Qld.—Cunningham discovered a route from Brisbane to the Darling Downs and explored Brisbane River.
- 1829 N.S.W.—Sturt's expedition down Murrumbidgee River. W.A.—Foundation of settlement at Swan River. Foundation of Perth.
- 1830 N.S.W.—Sturt, voyaging down Murrumbidgee and Murray Rivers, arrived at Lake Alexandrina. Tas.—Black line organized to force aborigines into Tasman's Peninsula but failed. Small remnant subsequently (1830 to 1835) persuaded to settle on Flinders Island.
- 1831 N.S.W.—Crown lands first disposed of at auction. Mitchell's explorations north of Liverpool Plains. SS. *Surprise*, first steamship built in Australia, launched at Sydney. First coal shipped from Australian Agricultural Company's workings at Newcastle, N.S.W. First assisted immigration to N.S.W. S.A.—Wakefield's first colonization committee. W.A.—Appointment of Executive and Legislative Councils.
- 1832 N.S.W. State Savings Bank established.
- 1833 N.S.W.—First school of arts established at Sydney.
- 1834 N.S.W.—First settlement at Twofold Bay. Vic.—Settlement formed at Portland Bay by Henty Brothers. S.A.—Formation of the South Australian Association. W.A.—Severe reprisals against Murray River natives at Pinjarra for continued attacks on settlers.
- 1835 Vic.—John Batman arrived at Port Phillip; foundation of Melbourne.

Year.

- 1836 N.S.W.—Mitchell's overland journey from Sydney to Cape Northumberland (S.A.). Vic.—Proclamation of Port Phillip district as open for settlement. S.A.—Settlement founded at Adelaide under Governor Hindmarsh.
- 1837 N.S.W.—Appointment in London of Select Committee on Transportation. Vic.—First overlanders from Sydney arrived at Port Phillip.
- 1838 N.S.W.—Discontinuance of assignment of convicts. Qld.—Settlement of German missionaries at Brisbane—first free colonists. S.A.—“Overlanding” of cattle from Sydney to Adelaide along the Murray route by Hawden and Bonney. Settlement at Port Essington, Northern Territory, formed by Captain Bremer.
- 1839 N.S.W.—Gold found at Vale of Clwydd by Count Strzelecki. S.A.—Lake Torrens discovered by Eyre. Port Darwin discovered by Captain Stokes. W.A.—Murchison River discovered by Captain Grey.
- 1840 N.S.W.—Abolition of transportation to New South Wales. Land regulations—proceeds of sales to be applied to payments for public works and expenditure on immigration. Vic.—Determination of northern boundary. Qld.—Penal settlement broken up and Moreton Bay district thrown open. S.A.—Eyre began his overland journey from Adelaide to King George Sound.
- 1841 N.S.W.—Gold found near Hartley. W.A.—Completion of Eyre's overland journey from Adelaide to King George Sound. New Zealand proclaimed a separate colony.
- 1842 N.S.W.—Incorporation of Sydney. Vic.—Incorporation of Melbourne. S.A.—Discovery of copper at Kapunda.
- 1843 N.S.W.—First Representative Constitution (under Act of 1842). Qld.—Moreton Bay granted legislative representation as a distinct electoral division.
- 1844 Qld.—Leichhardt's expedition to Port Essington (N.T.). S.A.—Sturt's last expedition inland.
- 1845 N.S.W.—Mitchell's explorations on the Barcoo. Qld.—Explorations by Mitchell and Kennedy. S.A.—Discovery of the Burra copper deposits. Sturt discovered Cooper's Creek.
- 1846 N.S.W.—Initiation of meat-preserving. Qld.—Foundation of settlement at Port Curtis. S.A.—Proclamation of North Australia.
- 1847 N.S.W.—Iron-smelting commenced near Berrima. Overland mail established between Sydney and Adelaide. Qld.—Explorations by Leichhardt, Burnett and Kennedy.
- 1848 N.S.W.—National and Denominational School Boards established. Qld.—Leichhardt's last journey. Kennedy speared by the blacks at York Peninsula. Chinese brought in as shepherds.
- 1849 N.S.W.—Indignation of colonists at arrival of convict ship *Hashemy*. Exodus of population to gold-fields of California. Vic.—*Randolph* prevented from landing convicts. Qld.—Assignment of *Hashemy* convicts to squatters on Darling Downs. W.A.—Commencement of transportation to Western Australia.
- 1850 N.S.W.—Final abolition of transportation. Sydney University founded. Vic.—Gold discovered at Clunes. Representative government granted. S.A.—Representative government granted. W.A.—Pearl oysters found by Lieut. Helpman at Saturday Island Shoal. Tas.—Representative government granted.
- 1851 N.S.W.—Payable gold discovered by Hargreaves at Lewis Ponds and Summerhill Creek. Vic.—Port Phillip created an independent colony under the name of Victoria. Discovery of gold in various localities. W.A.—Proclamation of Legislative Council Act.
- 1852 N.S.W.—Arrival of *Chusan*, first P. and O. mail steamer from England. S.A.—First steamer ascended the Murray River to the junction with the Darling. Tas.—Meeting of first elective Council protested against transportation. Payable gold discovered at The Nook, near Fingal, and at Nine Mile Springs.
- 1853 Tas.—Abolition of transportation. Vic.—Melbourne University founded.
- 1854 Vic.—Opening of first Australian railway—Flinders Street to Port Melbourne. Riots on Ballarat gold-fields. Storming of the Eureka Stockade, 3rd Dec. Telegraph first used.

- Year.
- 1855 N.S.W.—Opening of railway—Sydney to Parramatta. Mint opened.
- 1856 N.S.W.—Pitcairn Islanders placed on Norfolk Island. W.A.—A. C. Gregory's expedition in search of Leichhardt.
Responsible Governments in N.S.W., Vic., S.A. and Tas. (Act of 1855).
- 1857 N.S.W.—Select Committee on Federation. Vic.—Manhood suffrage and vote by ballot. S.A.—Passage of Torrens' Real Property Act.
- 1858 N.S.W.—Establishment of manhood suffrage and vote by ballot. Telegraphic communication between Sydney, Melbourne and Adelaide. Qld.—Canoona gold rush.
Population of Australia reached 1,000,000.
- 1859 Qld.—Proclamation of Queensland as separate colony. Tas.—First submarine cable, via Circular Head and King Island to Cape Otway.
- 1860 Vic.—Burke and Wills left Melbourne and crossed to Gulf of Carpentaria. S.A.—Copper discoveries at Wallaroo and Moonta. McDouall Stuart reached centre of continent and named "Central Mount Stuart".
- 1861 N.S.W.—Anti-Chinese riots at Lambing Flat and Burrangong gold-fields. Opening of first tramway in Sydney. Regulation of Chinese immigration. Vic.—Burke and Wills perished at Cooper's Creek, near Innamincka, S.A.
- 1862 N.S.W.—Abolition of State aid to religion. Real Property (Torrens) Act passed. S.A.—Stuart crossed the Continent from south to north. W.A.—First export of pearl-shell.
- 1863 Vic.—Intercolonial Conference at Melbourne. S.A.—Northern Territory taken over. W.A.—Initiation of settlement in the north-west district. Henry Maxwell Lefroy discovered and traversed area now comprised in the Coolgardie-Kalgoorlie gold-field.
- 1864 Qld.—First sugar made from Queensland cane.
- 1865 N.S.W.—Destruction by fire of St. Mary's Cathedral, Sydney.
- 1866 N.S.W.—Passage of Public Schools Act of (Sir) Henry Parkes. S.A.—Introduction of camels for exploration, etc.
- 1867 Vic.—Imposition of protective tariff. Qld.—Discovery of gold at Gympie.
- 1868 W.A.—Arrival of *Hougomont*, last convict ship.
- 1869 Vic.—Record gold nugget "Welcome Stranger" 2,284 oz. found near Dunolly. W.A.—First telegraph line opened from Perth to Fremantle.
- 1870 N.S.W.—Intercolonial Exhibition opened at Sydney. Imperial troops withdrawn. Vic.—Intercolonial Congress at Melbourne. S.A.—Commencement of transcontinental telegraph.
- 1871 N.S.W.—Permanent military force raised. W.A.—Forrest's explorations. Tas.—Discovery of tin at Mount Bischoff.
- 1872 Vic.—Mint opened. S.A.—Cable from Java to Port Darwin. Completion of transcontinental telegraph line.
- 1873 N.S.W.—Intercolonial Conference at Sydney. First volunteer encampment. Inauguration of mail service with San Francisco.
- 1874 N.S.W.—Triennial Parliaments Act passed. Intercolonial Conference. S.A.—University of Adelaide founded. W.A.—John and Alexander Forrest arrived at Overland Telegraph from Murchison.
- 1875 Qld.—Transfer of Port Albany Settlement to Thursday Island.
- 1876 N.S.W.—Completion of cable—Sydney to Wellington. W.A.—Giles crossed colony from east to west. Tas.—Death of Truganini, last representative of Tasmanian aboriginals.
- 1877 W.A.—Opening of telegraphic communication with South Australia.
Population of Australia reached 2,000,000.
- 1878 Qld.—Restriction of Chinese immigration.
Introduction of telephone into Australia.

Year.

- 1879 N.S.W.—First artesian bore at Kallara Station, near Bourke. First steam tramway.
W.A.—A. Forrest's explorations in the Kimberley district, and discovery of the Fitzroy pastoral country.
- 1880 N.S.W.—Public Instruction Act passed. Vic.—First Australian Telephone Exchange opened in Melbourne.
Federal Conference at Melbourne and Sydney.
- 1881 N.S.W.—Further restrictions on Chinese immigration.
First Australia-wide censuses on same date taken.
- 1882 W.A.—Nugget of gold found between Roebourne and Cossack.
- 1883 N.S.W.—Discovery of silver at Broken Hill. Completion of railway between New South Wales and Victoria. Qld.—Annexation of New Guinea—repudiated by Imperial authorities.
Federal Conference held at Sydney. Federal Council created.
- 1884 Federation Bill passed in Victoria and rejected in New South Wales. British protectorate declared over New Guinea.
- 1885 N.S.W.—Military contingent sent to the Sudan. Opening of the Broken Hill Proprietary Silver Mines. W.A.—Gold found by prospectors on the Margaret and Ord Rivers in the Kimberley district. Tas.—Silver-lead discovered at Mount Zeehan.
- 1886 Tas.—Discovery of gold and copper at Mount Lyell.
First session of Federal Council held at Hobart on 26th January.
- 1887 W.A.—Gold discovered at Southern Cross.
First "Colonial" Conference in London. Australasian Naval Defence Force Act passed.
- 1888 N.S.W.—Restrictive legislation against Chinese, imposing poll-tax of £100. Qld.—Railway communication opened between Sydney and Brisbane.
Conference of Australian Ministers at Sydney to consider question of Chinese immigration. First meeting of the Australasian Association for the Advancement of Science held in Sydney.
- 1889 Qld.—Railway communication established between Brisbane and Adelaide. W.A.—Framing of new Constitution.
Population of Australia reached 3,000,000.
- 1890 W.A.—Responsible Government granted. Tas.—University of Tasmania founded.
Meeting at Melbourne of Australasian Federation Conference.
- 1891 N.S.W.—Arrival of Australian Auxiliary Squadron. Cessation of assisted immigration. W.A.—Discovery of gold on the Murchison.
First Federal Convention in Sydney, draft bill framed and adopted.
- 1892 W.A.—Discovery of gold at Coolgardie.
- 1893 Financial crisis, chiefly affecting the eastern States.
- 1894 S.A.—Women's suffrage granted—first State to do so.
- 1895 N.S.W.—Free-trade tariff. Land and income taxes introduced.
Conference of Premiers on Federation at Hobart.
- 1896 N.S.W.—People's Federal Convention at Bathurst. Vic.—Wages Board system established by Act of Parliament.
- 1897–8 Sessions of Federal Convention at Adelaide, Sydney and Melbourne.
- 1898 Draft Federal Constitution Bill submitted to electors in Victoria, New South Wales, South Australia and Tasmania. Requisite statutory number of votes not obtained in New South Wales.
- 1899 First contingent of Australian troops sent to South Africa. Conference of Premiers in Melbourne to consider amendments to Federal Constitution Bill. Referendum—Bill accepted by New South Wales, Victoria, Queensland, South Australia and Tasmania. First Labour Government (Queensland).
- 1900 N.S.W.—Old-age pensions instituted.
Contingents of naval troops sent to China. Commonwealth Constitution Act received Royal Assent, 9th July. Proclamation of Commonwealth signed 17th September. Sir Edmund Barton formed first Federal Ministry.

Year.

- 1901 Proclamation of the Commonwealth at Sydney. First Commonwealth Parliament opened at Melbourne by the Duke of Cornwall and York. Interstate free-trade established.
- 1902 Completion of Pacific Cable (all-British). First Commonwealth Tariff.
- 1903 Coolgardie and Kalgoorlie Water Supply Scheme completed. Inauguration of the Federal High Court.
- 1904 Commonwealth Conciliation and Arbitration Act.
- 1905 Population of Australia reached 4,000,000. Re-introduction of assisted immigration in New South Wales.
- 1906 Wireless telegraphy installed between Queenscliffe, Vic., and Devonport, Tas. Papua taken over by Commonwealth.
- 1907 First telephone trunk line service between Capital Cities, i.e., Sydney and Melbourne. Imperial Conference in London. Declaration of first basic wage in "Harvester Judgment".
- 1908 Canberra chosen as site of Australian Capital.
- 1909 Imperial Defence Conference in London. Visit of Lord Kitchener to report and advise on Australian military defence. Queensland University founded. Establishment of Commonwealth Age Pension Scheme.
- 1910 Penny Postage. Arrival of *Yarra* and *Parramatta*, first vessels built for the Royal Australian Navy. Australian Notes Act passed and first Commonwealth notes issued. Admiral Sir R. Henderson visited Australia to advise on naval defence.
- 1911 First Commonwealth Census. Transfer of Australian Capital Territory and Northern Territory to Commonwealth. Introduction of compulsory military training.

- 1913 Australian Capital named Canberra and foundation stone laid. Appointment of Interstate Commission.
- 1914 Visit of General Sir Ian Hamilton to report on military defence scheme. Double dissolution of Commonwealth Parliament. Transfer of Norfolk Island to Commonwealth.
European War declared 4th August. German possessions in South West Pacific seized by Australian Naval and Military Expeditionary Force. German cruiser *Emden* destroyed by H.M.A.S. *Sydney* at Cocos Islands, 9th November. Australian and New Zealand Army Corps (ANZAC.) formed under Sir William Birdwood.
- 1915 Opening of Broken Hill Proprietary's Ironworks at Newcastle, N.S.W.
Australian and New Zealand troops landed at Gallipoli, 25th April, Evacuation, 18th-20th December. Australian warships with Grand Fleet.
- 1916 Purchase of steamships by the Commonwealth.
Australian and New Zealand mounted troops organized in mounted divisions and camel corps, operating thereafter in Egypt, Palestine and Syria. Other troops transferred to France. First proposal for compulsory military service overseas defeated by referendum.
- 1917 National Ministry formed under Rt. Hon. W. M. Hughes. Transcontinental (Kalgoorlie-Port Augusta) Railway completed.
Australian Flying Corps operating with R.F.C. in Palestine and France. Second proposal for compulsory military service overseas defeated by referendum.
- 1918 Population of Australia reached 5,000,000. Australia House (Strand, London) opened by King George V.
Armistice with Germany, 11th November. Repatriation Commission created.
- 1919 Peace Conference. Return of Australian troops. England to Australia flight by Capt. (Sir) Ross Smith and Lieut. (Sir) Keith Smith. Peace Treaty signed at Versailles, 28th June.
- 1920 Visit to Australia of H.R.H. the Prince of Wales. Imperial Statistical Conference in London.

- Year.
- 1921 Mandate over Territory of New Guinea given to Australia. First direct wireless press message, England to Australia. Second Commonwealth Census.
- 1922 First lock on River Murray opened at Blanchetown, South Australia. Queensland Legislative Council abolished.
- 1923 First sod turned on the site of Commonwealth Parliament House at Canberra.
- 1924 Directorate of Commonwealth Bank appointed. Australian Loan Council formed.
- 1925 Population of Australia reached 6,000,000. Solar Observatory established at Canberra.
- 1926 Council for Scientific and Industrial Research established. Imperial Conference. Dominion Status defined.
- 1927 Transfer of Seat of Commonwealth Government from Melbourne to Canberra. Beam wireless established. Financial agreement between Commonwealth and States.
- 1928 State Debts referendum carried.
- 1929 Commonwealth Bank empowered to mobilize gold reserve. Abolition of peacetime compulsory military training in favour of voluntary system.
- 1930 Effects of world-wide severe economic depression felt throughout Australia. Brisbane-Grafton (N.S.W.) railway, first step towards uniform gauge railway communication between capitals of mainland States, opened. First Australian—Rt. Hon. Sir Isaac Alfred Isaacs, G.C.M.G., Chief Justice of the High Court—appointed Governor-General of Australia.
- 1931 Depression continued. Initiation of Premiers' Conference plan to meet the financial situation. Commonwealth Bank Act amended to provide for temporary lower reserve against notes. England departed from gold standard. Commonwealth Bank assumed control of exchange rate and lowered it to 125 (previously 130).
- 1932 Sydney Harbour Bridge opened. Australian Broadcasting Commission established. Legislation passed enabling note reserve to be held in sterling securities. Imperial Economic Conference at Ottawa.
- 1933 World Economic Conference in London. Secession Referendum carried (Western Australia). Antarctica and Ashmore and Cartier Islands taken over by the Commonwealth. Third Commonwealth Census.
- 1934 Inauguration of England-Australia Air Mail Service.
- 1935 Empire Statistical Conference at Ottawa.
- 1936 Joint Commonwealth and State Marketing Schemes invalidated by decision of the Privy Council in the James case. Tasmania linked with mainland by submarine telephone cable.
- 1937 Imperial Conference in London. Report of the Royal Commission on Monetary and Banking Systems in Australia.
- 1938 New Defence Programme involving expenditure of £63,000,000 over three years. New Trade Treaty with Japan.
- 1939 Population of Australia reached 7,000,000.
War declared on Germany, 3rd September. Royal Australian Navy placed at disposal of Great Britain. Advance party of Australians embarked for Middle East, 15th December.
- 1940 Exchange of Ministers between Australia and United States of America marked Australia's entry into field of direct diplomatic representation with countries other than the United Kingdom.
First Australian convoy (6th Australian Division) sailed for Middle East. Cruiser *Sydney* crippled Italian cruiser *Bartolomeo Colleoni*.
- 1941 Establishment of Commonwealth Child Endowment Scheme. United States Congress passed Lend-Lease Bill.
Arrival of units of Eighth Australian Division in Malaya. *Sydney* lost after fight with *Kormoran*. R.A.A.F. in defence of Britain, in Middle East and at Singapore. Australian forces engaged in Middle East, Greece, Crete and Syria. Japanese attack on Pearl Harbour. Australia declared war on Japan, 9th December.

Year.

- 1942 Federal uniform taxation adopted. Commonwealth widows' pensions introduced. Rationing of commodities.
Japanese landed at Rabaul. Fall of Singapore. Darwin bombed. United States armed forces arrived in Australia and headquarters of South-West Pacific Command set up by General Douglas MacArthur in Melbourne. Coral Sea Battle. Japanese midget submarines in Sydney Harbour. Owen Stanley Ranges offensive. Ninth Australian Division at El Alamein (North Africa). Kokoda recaptured.
- 1943 Price Stabilization Scheme. Mortgage Bank Department of Commonwealth Bank opened. National Works Council formed.
Australian forces combined with American forces to recapture many places in New Guinea. Commencement of long series of amphibious operations. R.A.A.F. from 1943 till end of war operated on all fronts.
- 1944 Pay-as-you-earn taxation operated from 1st July. Referendum refused Commonwealth Government increased powers in post-war period.
Australian advances in northern New Guinea. Allied invasion of France. Australians landed on New Britain; took over from Americans in Bougainville, Solomon Islands, and at Aitape, New Guinea.
- 1945 Captain Cook Dock opened. Re-establishment and Employment Act. Banking Act to regulate banking and to protect the currency and public credit. Australia ratified United Nations Charter.
Cessation of hostilities in Europe, 8th May. Cessation of hostilities against Japan, 15th August. General demobilization commenced.
- 1946 Cessation of man-power controls. Commonwealth Government accepted responsibility for supply and maintenance of BCOF in Japan. Inauguration of Commonwealth Employment Service. Joint Organization (Wool Disposal) commenced operations. Act to establish National University at Canberra. Commonwealth and State agreement on housing. Trans-Australia Airlines (Government) began operations. Constitution Alteration Referendum granted powers in respect of social services to Commonwealth.
- 1947 End of demobilization. Census of Australia—first since 1933. Australian National Antarctic Research Expedition to establish scientific research station at Heard Island. First "displaced persons" reached Australia.
- 1948 Forty-hour week effective throughout Australia. Membership of Commonwealth Parliament increased.
- 1949 Nationality and Citizenship Act operative. Broadcasting Control Board came into operation. New Guinea placed under international trusteeship and administrative union of Papua and New Guinea established. Certain Australian aborigines for first time granted franchise at Commonwealth elections. Establishment of New South Wales University of Technology. Australian Whaling Commission established. Devaluation of Australian pound against American dollar to two dollars twenty-four cents. Commencement of Snowy Mountains Hydro-electric Power Scheme. Australia's population reached 8,000,000.
- 1950 Severe flooding in New South Wales. United Nations members engage in military operations to assist South Korea. Adult franchise for Victorian Legislative Council replaced existing franchise dependent on property qualifications. Conference of Commonwealth Prime Ministers in London.
- 1951 Opening of Jubilee celebrations to mark fiftieth year of Australian federation. British Government's confirmation of transfer of Heard Island and Macdonald Islands to Australia. Double dissolution of Commonwealth Parliament. Official cessation of hostilities with Germany. Security Treaty signed in Washington by the United States of America, Australia and New Zealand for action in the event of an armed attack in the Pacific. Japanese Peace Treaty signed. Third Conference of Government Statisticians of the British Commonwealth held in Canberra. Opening of new Legislative Council of Papua and New Guinea, which included, for the first time in the history of Australian Legislature, representatives of the native peoples.

- 1952 Nuclear experiments commenced at National University, Canberra. Important high-grade uranium deposits discovered at Rum Jungle, Northern Territory. 1st Battalion, The Royal Australian Regiment, sailed for service in Korea. Severe restrictions imposed on imports from all sources and on amounts available for Australians travelling overseas. Agreement between Commonwealth and South Australian Governments and Combined Development Agency of British and American Governments, on development of uranium deposits at Radium Hill, South Australia. Representatives of New Zealand, United States of America and Australia met at Honolulu to consider Pacific defence pact (ANZUS.). Qantas Empire Airways began first direct service between Sydney and Johannesburg, South Africa. Britain's first atomic weapon detonated on Monte Bello Islands, near north-west coast of Australia. British Commonwealth Economic Conference in London.
- 1953 Premier's Conference in Canberra failed to reach agreement on return of income tax powers to States. 2nd Battalion sailed for service in Korea. Bill introduced into Northern Territory Legislative Council to give citizenship rights to Northern Territory aborigines, except those committed to State care. Atomic Energy Act 1953 established Atomic Energy Commission. Coronation of Her Majesty Queen Elizabeth the Second. Britain and Australia signed agreement for reciprocity in social services benefits. Conference of Commonwealth Prime Ministers in London. Korean armistice signed. Commonwealth Court of Conciliation and Arbitration granted employers' applications for abandonment of the system of automatic adjustment of the basic wage in accordance with retail price index numbers.
- 1954 Her Majesty the Queen, with H.R.H. the Duke of Edinburgh, made first tour of Australia by reigning sovereign. Australian National Antarctic Research Expedition established station at Mawson to conduct meteorological and other research. Inaugural meeting of Nuclear Research Foundation. Mr. and Mrs. Vladimir Petrov of the Soviet Embassy granted political asylum. Soviet Government recalled its Embassy in Australia and Australian Embassy left Moscow. Royal Commission into espionage in Australia set up. Two new uranium fields found in north-east of South Australia. Australian population census taken. At Manila Conference, Australia signed treaty pledging collective defence against aggression in South-East Asia and South-West-Pacific. 3rd Battalion withdrawn from Korea. First uranium treatment plant in Australia opened at Rum Jungle. Atomic Energy Commission authorized to construct nuclear reactor and research laboratories as part of programme of co-operation in atomic research with United Kingdom.
- 1955 Conference of British Commonwealth Prime Ministers in London. Prime Minister visited Washington to talk on defence policy and Australia's role in South-East Asia. First power generated from Snowy Mountains fed into New South Wales electricity system. Australian population reached 9,000,000. Salk polio vaccine made at Melbourne. Messrs. Brown and Fitzpatrick committed to prison for three months by Commonwealth Parliament for breach of privilege. Commonwealth Full High Court declared invalid recent legislation imposing road tax on interstate hauliers. South Australian State Government's uranium treatment plant at Port Pirie began operations. Australian task force left for Malaya. New South Wales Government reintroduced quarterly automatic basic wage adjustments. Cocos (Keeling) Islands became Territory under authority of Commonwealth.
- 1956 SEATO military advisers conference opened in Melbourne. High Court ruled that Arbitration Court had no power to impose penalties on those disobeying its orders. Australia and Netherlands completed agreement under which 75,000 Dutch settlers would come to Australia in next five years. Australia and United Kingdom agreed on new multi-million pound programme for Woomera rocket range. Sweeping changes made in Commonwealth system of conciliation and arbitration by new Conciliation and Arbitration Act (see p. 416). Bilateral agreement signed between Australia and U.S.A. for peaceful uses of atomic energy. Dispute over control of Suez Canal resulted in London conference of Canal users. Australian Prime Minister appointed as chairman of committee to place views of conference before the Egyptian President.

Year.

- Diplomatic relations between Australia and Egypt subsequently broken off. Regular television transmissions commenced in Australia. First atomic tests at Maralinga (South Australia). Australian Government agreed to provide sanctuary for up to 10,000 refugees from Hungarian political oppression. Australia and United Kingdom agreed on comprehensive trade pact to replace 24-year-old Ottawa Agreement. Olympic games held in Melbourne. Antarctic expedition sailed to establish a new station at Vestfold Hills and extend existing bases.
- .1957 Commonwealth Government representatives and chiefs of private trading banks met in Canberra to discuss changes in the banking system. (Government introduced legislation to give effect to proposals, but bills defeated in Senate. Third SEATO Council meeting held in Canberra, preceded by conference of military advisers. South-Pacific Commission Conference held in Canberra. Adaminaby Dam outlet gates closed and water started to fill reservoir. Conference of British Commonwealth Prime Ministers in London. Commonwealth Government granted United States additional air traffic rights from Australia to Antarctica, South Africa and South-East Asia for reciprocal rights across the United States for Australian airlines flying to Europe. International Geophysical Year commenced; over 250 Australian scientists participated. High Court ruled that interstate vehicles could not be compelled to register in New South Wales but upheld validity of a Victorian tax on commercial vehicles, including those engaged in interstate trade, imposed solely for the maintenance of roads. Agreements made with State Governments of Western Australia, South Australia and New South Wales for integration of statistical services. Full High Court upheld validity of uniform taxation legislation but declared invalid section giving priority to the Commonwealth. Commonwealth established National Capital Development Commission to co-ordinate the expansion of Canberra as the centre of Commonwealth administration. Australia set up remote automatic weather station at Taylor Glacier, 60 miles west of Mawson base. Applications invited for grant of licences for commercial television stations in Brisbane, Adelaide, Perth and Hobart areas. Agreement made for standardization of gauge of Melbourne-Albury railway line. Murray Committee, appointed by Commonwealth Government to inquire into the future of Australian Universities. Japanese Prime Minister, Mr. Kishi, visited Australia. Committee, under chairmanship of Lieut.-General Sir Leslie Morshead, to review organization of Defence Departments recommended amalgamation of Supply and Defence Production Departments.
- .1958 Queensland and Victorian State statistical offices integrated with Commonwealth statistical services. Qantas commenced first regular round the world air service via San Francisco and New York. Mr. Macmillan, British Prime Minister, made a two-week visit to Australia, the first by a British Prime Minister in office, and discussed defence and economic affairs with the Australian Prime Minister and other leading politicians. Queen Elizabeth, the Queen Mother, made tour of Australia. Prime Minister of New Zealand visited Australia as guest of the Government and later returned for discussions with Prime Minister. Monash University Act provided for establishment of new university in Victoria, and authorized expenditure of up to £2 million for land and buildings. Australia co-operated with United States in maintaining research station at Wilkes, in Antarctica. Prime Minister officially opened Australia's first nuclear reactor at Lucas Heights, near Sydney. First radio-active isotopes produced by the station. Adaminaby Dam, in Snowy Mountains Hydro-electric Scheme, completed two years ahead of schedule and tenders accepted for work on Upper Tumut. Tumut Ponds Dam opened by Prime Minister. Agreement reached between Commonwealth and States of New South Wales, Victoria and South Australia, on Snowy Mountains and Murray Waters. Christmas Island (Indian Ocean) transferred to Australian Administration. High Court ruled Queensland road transport levies valid (c.f. N.S.W. & Vic., 1957). Conference in Canberra between Australia and Netherlands reached agreement on administrative problems of New Guinea. Prime Minister of Canada visited Australia for talks in Canberra with Federal Cabinet. New South Wales Act passed providing for equal pay for male and female workers performing similar tasks.

Year.

- 1959 Annual Holidays Act, 1944-1958, of New South Wales, provided for three weeks annual holidays for all New South Wales workers. British Commonwealth Defence conference opened in Canberra. Australia took over custody of Wilkes Antarctic station from United States of America. Indonesian Foreign Minister (Dr. Subandrio) visited Australia as official guest for talks with Cabinet. Seven man committee appointed to investigate case for introduction of decimal currency into Australia. International Antarctic Analysis Centre set up at Melbourne within Commonwealth Bureau of Meteorology. National roads conference convened by Prime Minister attended by State Ministers of Transport, Works, or Highways and commercial bodies considered all aspects of transport problems. Commonwealth later put forward plan for Roads and Bridges Construction involving expenditure of £720,000,000, accepted by Premiers' Conference. Fifteenth session of ECAFE held at Broadbeach, Queensland. Australia-Brazil and Australia-Belgium diplomatic missions raised to embassy level. Population reached 10,000,000. High Court ruled that provisions of Commonwealth Re-establishment and Employment Act giving priority in employment to ex-servicemen were invalid because of lapse of time since end of 1939-45 War. Legislation passed in New Guinea providing for income tax at half Australian rates with higher concessional allowances. T1. underground power station, first major station of Snowy Mountains Scheme, commenced operation with output capacity of 160,000 kW. New Immigration Act, abolishing Dictation Test, and making a number of other changes, became operative. Diplomatic relations resumed with Soviet Russia and with United Arab Republic. New South Wales State Cabinet reduced working hours in State-owned coal mines from 40 to 37½ a week. Fourteen mile, £19,000,000 Eucumbene-Tumut tunnel, in Snowy Mountains, completed four months ahead of schedule. Mr. Poc Thieun first Cambodian Minister to Australia; status of mission later raised to that of Embassy. Status of Australian mission to Viet-nam raised to that of Embassy. S.S. *Delfino* left Sydney with 30,000 live sheep for export to United States of America. Remaining profits of Joint Organization (Wool Marketing) transferred to Wool Research Fund. Australian Universities Commission constituted. Australia entered into bilateral agreement with Canada for co-operation in peaceful uses of Atomic Energy. H.R.H. Princess Alexandra visited Australia on six week tour associated with Queensland centenary celebrations. Commonwealth Treasurer attended Commonwealth Finance Ministers Conference in London and meetings of International Monetary Fund and International Bank for Reconstruction and Development in Washington. Malayan Prime Minister (Tunku Abdul Rahman) and Minister of Interior made official visit to Australia. Commonwealth Parliamentary Association Conference held at Canberra. Viscount Dunrossil Governor-General designate. New South Wales State Industrial Commission outlined programme for putting into effect principle of equal pay for women over five-year period. Report of Constitutional Review Committee tabled in House of Representatives. National Service Training suspended. Commonwealth Conciliation and Arbitration Commission granted increase of 28 per cent. in margins of metal trades employees. Prime Minister made official visit to Indonesia and Malaya. Australia signed Antarctic Treaty at Washington relating to activities in and the use of Antarctica. Contracts let for construction of first stage of £120,000,000 power station at Hazlewood (Vic.) planned to double amount of electricity available in Victoria.

STATISTICAL SUMMARY, AUSTRALIA.

NOTE.—(1) In most cases where figures are available back to 1861, these were shown in Official Year Book No. 39, pp. xxviii-xxix.

(2) Most of the statistics in this Summary relate to the periods shown in the table headings. In those comparatively few cases where the statistics relate to other periods, this is indicated in footnotes.

All Causes	50,293	38,919	89,212

(a) No deaths were recorded in the following categories for 1959:—B5, Cholera (043); B11, Plague (058); B13, Smallpox (084); B16, Malaria (110-117). (b) 030-039, 041, 042, 044, 049, 052-054, 059-074, 081-083, 086-096, 120-138. (c) 140-148, 160, 161, 164, 165, 190-203, 205.

CHAPTER XI.—HOUSING, ETC.

§ 4. Statistical Summary—New Building.

New Houses, p. 397.—The number of new houses commenced, completed and under construction in each State and Territory during 1959 was as follows:—

NEW HOUSES: NUMBER, 1959.

(Including Owner-built Houses.)

Particulars.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.(a)	A.C.T.	Aust.
Commenced ..	27,184	22,362	8,548	8,665	5,469	2,478	395	1,322	76,423
Completed ..	28,681	23,997	8,736	8,628	5,862	2,673	345	1,188	80,110
Under construction at 31st December, 1959..	15,008	15,620	2,759	4,968	3,079	1,877	215	1,013	44,539

(a) Includes flats.

Of the 80,110 new houses completed during 1959, 30,755 had outer walls of brick, brick veneer, concrete or stone, 27,747 of wood (weatherboard, etc.), 21,066 of fibro-cement and 542 of other materials.

New Flats, p. 399.—The following table shows the number of new flats commenced, completed and under construction in each State and the Australian Capital Territory during 1959:—

NEW FLATS: NUMBER, 1959.

(Individual Flats.)

Particulars.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	A.C.T.	Aust.(a)
Commenced ..	3,842	2,463	905	713	254	168	358	9,703
Completed ..	2,520	1,694	803	591	224	120	486	6,438
Under construction at 31st December, 1959 ..	2,834	1,645	461	554	101	211	324	6,130

(a) Excludes figures for the Northern Territory, which are not available for publication.

Value of New Buildings, p. 400.—The values of all new buildings commenced, completed and under construction in each State and Territory are shown in the following table for the year 1959:—

NEW BUILDINGS: VALUE, 1959.

(Including Estimated Value of Owner-built Houses.)

(£'000.)

Particulars.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Commenced ..	178,009	140,468	48,175	47,199	27,210	16,734	2,850	13,390	474,035
Completed ..	162,263	142,608	47,546	44,126	28,376	14,128	2,528	15,215	456,790
Under construction at 31st December, 1959 ..	130,264	118,110	27,782	36,460	20,003	15,455	2,193	12,298	362,565

The value of new buildings completed in Australia during 1959, according to kind of building, was as follows:—*Houses*—Brick, brick veneer, concrete and stone, £118,743,000; wood (weatherboard, etc.), £82,596,000; fibro-cement, £51,790,000; other, £1,648,000; Total, £254,777,000; *Other Buildings*—Flats, £16,311,000; hotels, guest-houses, etc., £6,879,000; shops, £15,217,000; factories, £43,243,000; offices, £21,944,000; other business

premises, £25,497,000; educational, £28,919,000; religious, £7,266,000; health, £13,407,000; entertainment and recreation, £9,269,000; miscellaneous, £14,061,000; Total, £202,013,000; Grand Total, New Buildings, £456,790,000.

Persons Engaged in New Building, p. 401.—The number of persons engaged on jobs carried out by builders of new buildings in Australia at 16th December, 1959, was as follows:—Carpenters, 47,999; bricklayers, 12,196; painters, 11,455; electricians, 6,513; plumbers, 10,704; builders' labourers, 20,591; other, 17,577; total, 127,035. Of this total, contractors actually working on jobs numbered 9,820, sub-contractors actually working on jobs 19,555 and wage earners 97,660.

CHAPTER XII.—LABOUR, WAGES AND PRICES.

A. RETAIL PRICES AND PRICE INDEXES.

§ 4. Tabular Statements of Retail Price Index Numbers.

The Consumer Price Index.—A new retail price index, entitled the Consumer Price Index, was published for the first time in Statistical Bulletin No. 837 of 12th August, 1960. The bulletin contains a brief description of the index together with index numbers for periods from June Quarter, 1949, to June Quarter, 1960. For current statistical purposes the new index replaces both the "C" Series Retail Price Index and the Interim Retail Price Index. The Interim Index was discontinued after the issue for March Quarter, 1960. A summary of Consumer Price Index Numbers is given in the two following tables.

CONSUMER PRICE INDEX NUMBERS.

§ 4. Basic Wages in Australia.

Basic Wage Inquiry, 1960.—On 16th February, 1960, the Commonwealth Conciliation and Arbitration Commission, constituted in Presidential Session by Kirby, C.J. (President), Ashburner and Moore J.J. (Deputy Presidents), commenced hearing an application by respondent unions for variation of the Metal Trades Award, firstly, by increasing the amounts of basic wage prescribed therein to the figure each would have reached had the quarterly adjustment system based on the "C" Series retail price index numbers been retained, plus a further amount of 17s., representing the unions' minimum estimate of the increase in productivity which had occurred since the automatic adjustment system was abolished, and secondly, by restoring the system of automatic quarterly adjustments.

In the judgment delivered on 12th April, 1960, the Commission unanimously refused the unions' application. Some very brief extracts from the reasons for judgment are given in the following paragraphs:—

Application for Restoration of Quarterly Adjustments.—The Commission stated "We must decide the question of automatic quarterly adjustments in the light of existing situations and practices The Commission is considering a situation in which in practice the basic wage is each year re-assessed. The alternatives which emerge from the submissions in these proceedings are either the fixation of a basic wage for an undefined period, the money amounts of the wage being automatically adjustable by movements in a price index, or the fixation of a basic wage each year. In our view, bearing in mind the interest of employees, employers and the public generally, the second alternative is preferable, and the Commission should continue to fix that basic wage which it considers to be just and reasonable knowing that the amount which it fixes will be the basic wage for the ensuing twelve months and will then be reviewed".

Application to Increase the Basic Wage.—The Commission referred to the somewhat unusual circumstances in which an increase in the basic wage was being considered and said “Thus when the Commission as now constituted faces its present task of deciding whether the basic wage should be again increased it has to do so in the setting that less than a year ago the basic wage was increased by 15s. and margins generally were increased by an amount making them 28 per cent. greater than 1954 margins. That has been the general result of the application of the 1959 Metal Trades decision and it is that result with which this Commission is now concerned.”

“We accept the submission made by the private employers and by the Commonwealth Government that we should not award an increase in the basic wage, bearing in mind that employees under federal awards have in the past twelve months received substantial increases in both basic and secondary wages. It is our view that at the present time, before the effects of these previous wage increases have been reflected in the economy, we cannot find that its capacity is such that a further basic wage increase can be awarded.

We consider that it would be unsafe and perhaps dangerous to increase the basic wage at this point of time. We have formed this opinion with a full sense of the obligation which this Commission has to fix the basic wage from time to time at the highest amount that the economy can sustain so that the wage and salary earner may obtain his proper share of goods and services. On the other hand we are mindful of the danger to the whole community, including the wage and salary earner, of the basic wage being fixed at an amount which might increase inflation and upset the stability of the economy.”

As a result, there was no change in the basic wage rates of the Commonwealth Conciliation and Arbitration Commission which had been payable from the beginning of the first pay period commencing on or after 11th June, 1959. The rates payable for adult males in the capital city of each State are as follows:—Sydney, £14 3s.; Melbourne, £13 15s.; Brisbane, £12 18s.; Adelaide, £13 11s.; Perth, £13 16s.; Hobart, £14 2s.; Six Capital Cities (weighted average), £13 16s.

State Basic Wage Rates, p. 445.—The table below shows the “basic” weekly wage rates of State industrial tribunals, operative in May and August, 1960.

(a) Where dates are not quoted wage rates operate from the beginning of the first pay-period commencing in the month shown. (b) No basic wage declared. Rates shown are those adopted by most Wages Boards. (c) During June and July, 1959, Wages Boards varied determinations by adopting the Commonwealth basic wage rate. (d) The “living wage” declared for the metropolitan area is also adopted for country areas, except at Whyalla, where a loading of 5s. a week is generally payable. (e) Most Wages Boards adopted the Commonwealth basic wage rate from July, 1959.

E. EMPLOYMENT AND UNEMPLOYMENT.

§ 1. Employment.

Wage and Salary Earners in Civilian Employment, pp. 452-5.—The following are particulars of wage and salary earners in civilian employment, excluding rural wage earners, female private domestics and defence forces, for the month of June, 1960.

WAGE AND SALARY EARNERS IN CIVILIAN EMPLOYMENT, JUNE, 1960.

(Excluding Rural Wage Earners, Female Private Domestic and Defence Forces.)
(£'000.)

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.(a)

(a) Silver, copper, tin, zinc, lead. (b) Beef, lamb, mutton, pork. Guaranteed minimum prices are used when operative. (c) Sultanas, raisins, currants. (d) Cattle hides, calfskins. (e) Actual price realized not yet fully known; provisional series are included in "All Groups" Indexes which are subject to revision. (f) Preliminary.

§ 21. The Australian Balance of Payments.

The tables in this section show revised balance of payments estimates for the years 1957-58, 1958-59 and preliminary estimates for 1959-60. In some cases the form of presentation is slightly different from that in Chapter XIII.—Trade. Further details of balance of payments estimates will be found in *The Australian Balance of Payments, 1928-29 to 1951-52* and in the mimeographed publication *The Australian Balance of Payments, 1955-56 to 1959-60*.

Current Account, p. 508.—Revised estimates of the balance of payments on current account for the years 1957-58, 1958-59 and preliminary estimates for 1959-60 are shown in the following table:—

CHAPTER XIV.—TRANSPORT AND COMMUNICATION.

PART I.—TRANSPORT.

E. MOTOR VEHICLES.

Motor Vehicle Registrations, p. 546.—Motor vehicles registered at 30th June, 1960, and new motor vehicles registered during 1959–60 were as follows:—

MOTOR VEHICLES: REGISTRATIONS, 1959-60.

State or Territory.	Number of Motor Vehicles Registered at 30th June, 1960. (a)				Number of New Motor Vehicles Registered, 1959-60. (a)			
	Motor Cars. (b)	Commercial Vehicles. (c)	Motor Cycles.	Total.	Motor Cars. (b)	Commercial Vehicles. (c)	Motor Cycles.	Total.
New South Wales ..	628,072	314,832	28,773	971,677	69,353	42,077	2,211	113,641
Victoria (d) ..	652,289	172,535	22,006	846,830	74,036	16,334	2,220	92,590
Queensland ..	241,613	147,184	17,946	406,743	25,664	11,859	1,548	39,071
South Australia ..	192,853	67,693	15,934	276,480	20,847	5,588	1,561	27,996
Western Australia ..	127,863	70,325	13,609	211,797	13,692	5,695	1,949	21,336
Tasmania ..	64,751	26,083	3,123	93,957	6,527	2,114	97	8,738
Northern Territory ..	4,324	4,651	717	9,692	482	390	25	897
Aust. Capital Territory ..	12,413	3,757	382	16,552	1,820	497	81	2,398
Total ..	1,924,178	807,060	102,490	2,833,728	212,421	84,554	9,692	306,667

(a) Excludes Defence Service vehicles, trailers, road tractors, etc., and dealer's plates. (b) Includes taxis, hire cars and station wagons. (c) Includes utilities, panel vans, lorries and omnibuses. (d) Registration in Victoria is according to purpose of use and not type of vehicle; consequently, motor car registrations are overstated by the inclusion of commercial vehicles registered for private use.

PART II.—COMMUNICATION.

A. POSTS; TELEGRAPHS; TELEPHONES; CABLE AND RADIO COMMUNICATION.

§ 5. Cable and Radio Communication.

Radio-communication Stations Authorized, p. 570.—The following radio-communication stations were authorized in Australia and the External Territories at 30th June, 1960. The figures in parentheses refer to the External Territories and are included in the totals preceding them:—Transmitting and receiving stations—Fixed—aeronautical, 113 (25); services with other countries, 88 (12); outpost, 1,628 (405); other, 863 (79); Land—aeronautical, 97 (16); land mobile services, 2,740 (18); harbour mobile services, 78 (—); coast, 96 (14); special experimental, 173 (8); Mobile—aeronautical, 544 (36); land mobile services, 24,260 (73); harbour mobile services, 398 (18); outpost, 1,013 (50); ship, 2,442 (131); Amateur, 3,987 (72). In addition, there were 398 (—) fixed and 55 (—) mobile stations for the purpose of receiving only.

B. BROADCASTING AND TELEVISION.

§ 4. Licences, etc.

Broadcast Listeners' and Television Viewers' Licences, p. 578.—Broadcast listeners' licences in force at 30th June, 1960, were as follows:—New South Wales, 832,659; Victoria 606,587; Queensland, 344,198; South Australia, 249,148; Western Australia, 171,693; Tasmania, 78,900; Australia, 2,283,185. Figures for the Northern Territory and the Australian Capital Territory have been included with those for South Australia and New South Wales respectively.

Television viewers' licences in force at 30th June, 1960, were as follows:—New South Wales, 409,334; Victoria, 353,091; Queensland, 67,337; South Australia, 84,967; Western Australia, 35,604; Tasmania, 4,662; Australia, 954,995.

CHAPTER XVIII.—WELFARE SERVICES.

A. COMMONWEALTH SOCIAL SERVICE BENEFITS.

§ 2. Commonwealth Expenditure on Social and Health Services.

States, p. 686.—The following table shows particulars of payments of social and health services in each State during 1959–60.

COMMONWEALTH EXPENDITURE ON SOCIAL AND HEALTH SERVICES,
1959–60.

(a) Includes claims paid overseas.

(b) Pensions paid to widows who maintain at least one child under 16 years of age.

(c) Includes payments to migrants.

CHAPTER XX.—PRIVATE FINANCE:

A. CURRENCY.

§ 2. Coinage.

Issues of Australian Coins, p. 753.—The net issues of Australian coins to 30th June, 1960, were:—silver, £39,371,000; bronze, £3,201,000; total, £42,572,000.

§ 3. Notes.

The Australian Note Issue, p. 756.—The average value of notes in circulation for the year 1959–60 was £416,499,000. This amount was distributed in denominations as follows:—10s., £11,919,000; £1, £69,638,000; £5, £186,144,000; £10, £146,393,000; £20, £3,000; £50, £34,000; £100, £38,000; and £1,000, £2,330,000. The amount held by the banks was £53,084,000 and by the public £363,415,000.

B. BANKING.

§ 1. Cheque-Paying Banks.

Reserve Bank, p. 763.—The average liabilities of the Central Banking Business (including Note Issue Department) of the Reserve Bank for the year ended June, 1960, amounted to £985,355,000. Capital and Reserve Funds amounted to £25,029,000; Notes on Issue to £413,592,000; Statutory Reserve Deposit Accounts of Trading Banks to £280,786,000; Other Deposits of Trading Banks to £19,580,000; Other Liabilities to £246,368,000.

Particulars of the average assets were as follows:—Gold and Balances held abroad, £442,164,000; Australian Notes and Coin, £3,566,000; Cheques and Bills of other Banks, £3,084,000; Government and Other Securities (including Treasury Bills), £475,189,000; Bills Receivable and Remittances in Transit, £4,014,000; and Other Assets, £57,338,000.

Commonwealth Trading Bank, p. 768.—The average liabilities in Australia of the Commonwealth Trading Bank for the year ended June, 1960, were £269,640,000. Of this amount, fixed Deposits amounted to £62,526,000 and current Deposits (including current Deposits bearing interest £10,856,000) to £191,911,000; Balances due to other Banks to £743,000; Other Liabilities to £14,460,000.

The average assets in Australia, £267,843,000; included Cash and Cash Balances £10,719,000; Treasury Bills and Seasonal Securities, £3,043,000; Other Commonwealth and State Government Securities, £60,189,000; Loans to Authorized Dealers in the Short Term Money Market, £2,556,000; Statutory Reserve Deposits with Reserve Bank, £41,429,000; Cheques, Bills and Balances with other Banks, £3,606,000; Loans (other than Loans to Authorized Dealers in the Short Term Money Market), Advances and Bills Discounted, £133,735,000; Other Assets, £11,566,000.

Private Trading Banks, p. 769.—Average liabilities in Australia of the Private Trading Banks for the year ended June, 1960, were £1,481,958,000. Fixed Deposits amounted to £281,237,000 and Current Deposits (including Current Deposits bearing interest, £104,317,000) to £1,164,884,000; Balances due to other Banks to £4,804,000; Other Liabilities to £24,008,000.

The average assets in Australia, £1,506,610,000, included Cash and Cash Balances, £57,730,000; Treasury Bills and Seasonal Securities, £24,408,000; Other Commonwealth and State Government Securities, £236,890,000; Loans to Authorized Dealers in the Short Term Money Market, £21,757,000; Statutory Reserve Deposits with Reserve Bank, £238,774,000; Cheques, Bills and Balances with other Banks, £23,196,000; Loans (other than Loans to Authorized Dealers in the Short Term Money Market), Advances and Bills Discounted, £818,308,000; Other Assets, £85,547,000.

Classification of Advances within Australia—Commonwealth Trading Bank and Private Trading Banks, p. 773.—Advances within Australia at the end of December, 1959, dissected by industries were:—Resident Borrowers: Business Advances—Agriculture, Grazing and Dairying, £222,657,000; Manufacturing, £172,694,000; Transport, Storage and Communication, £15,067,000; Finance, £55,915,000; Commerce, £188,562,000; Building and Construction, £26,427,000; Other Business and Services, £64,795,000; Unclassified, £5,040,000; Total Business advances, £751,157,000; Advances to Public Authorities, £16,556,000; Personal advances, £154,624,000; Advances to Non-Profit Organizations, £17,497,000; Total Resident Borrowers, £939,834,000; Total Non-Resident Borrowers, £177,000; Total advances, £940,011,000.

Clearing House Returns, p. 777.—The average weekly bank clearings in each capital city for the year ended June, 1960, were as follows:—Sydney, £167,858,000; Melbourne, £156,625,000; Brisbane, £34,202,000; Adelaide, £30,461,000; Perth, £19,579,000; Hobart, £6,062,000; Total £414,787,000.

Debits to Customers' Accounts—All Cheque-paying Banks, p. 777.—The average weekly debits to customers' accounts in each State for the year 1959–60 for all cheque-paying banks (excluding debits to accounts of Australian Governments in capital cities) were as follows:—New South Wales, £296,295,000; Victoria, £264,561,000; Queensland, £79,172,000; South Australia, £53,374,000; Western Australia, £34,852,000; Tasmania, £15,483,000; Northern Territory, £942,000; Australian Capital Territory, £2,678,000; Total, £747,357,000.

§ 2. Savings Banks.

All Savings Banks, p. 780.—The numbers of operative accounts in the several States at end of June, 1960, were:—New South Wales, 3,013,000; Victoria, 2,692,000; Queensland, 1,140,000; South Australia, 931,000; Western Australia, 551,000; Tasmania, 311,000; Northern Territory, 15,000 and Australian Capital Territory, 34,000; Total, 8,687,000. The amounts on deposit in the several States at 30th June, 1960, were:—New South Wales, £541,572,000; Victoria, £499,592,000; Queensland, £182,586,000; South Australia, £165,998,000; Western Australia, £78,623,000; Tasmania, £46,355,000; Northern Territory, £2,582,000 and Australian Capital Territory, £5,396,000; Total, £1,522,704,000. Total excess of deposits over withdrawals during 1959–60 was £91,203,000 and interest added was £40,169,000.

D. INSURANCE.

§ 2. Life Assurance.

Life Assurance, p. 791.—The following is a summary of the life assurance business transacted in Australia during 1959 (figures for 1958 in parentheses) compiled from monthly returns collected from the 30(27) companies registered under the Life Insurance Act 1945–1959, and excluding the Government Insurance Office of New South Wales and the Queensland State Government Insurance Office which operate only within their respective States. Particulars shown are therefore not entirely comparable with those in Chapter XX., which are derived from annual returns and include business of the State Government Offices.

Ordinary Department and Industrial Department, respectively:—New Policies issued in Australia—Number 347,706 (297,674), 189,282 (198,611); Sum Assured, £609,649,000 (£482,263,000), £32,338,000 (£32,710,000); Policies Matured or Otherwise Discontinued in Australia—Number 199,633 (182,083), 273,196 (287,139), Sum Assured, £182,464,000 (£154,221,000), £28,211,000 (£27,304,000). Particulars of annuities are excluded.

Premium receipts of Ordinary and Industrial Departments in Australia in 1959 amounted, respectively, to £100,465,000 (£91,253,000) and £15,412,000 (£15,305,000); Claims, etc., paid amounted to £38,884,000 (£35,112,000) and £10,695,000 (£10,397,000), respectively. Particulars of annuities are included.

CHAPTER XXI.—PUBLIC FINANCE.

A. COMMONWEALTH FINANCE.

Consolidated Revenue Fund, pp. 814 and 825.—The table below shows details of revenue and expenditure for the year 1959–60:—

COMMONWEALTH CONSOLIDATED REVENUE FUND: REVENUE AND EXPENDITURE, 1959–60.

(£'000.)

Revenue.		Expenditure.	
Item.	Amount.	Item.	Amount.
<i>Taxation—</i>		Defence Services (a) ..	146,770
Customs	84,381	War and Repatriation Services	137,478
Excise	252,111	Subsidies and Bounties ..	17,345
Sales Tax	164,185	Departmental	140,266
Income Taxes	671,294	National Welfare Fund—	
Pay-roll Tax	55,162	Expenditure on Social Services	299,363
Estate Duty	13,753		
Other Taxes	8,904	<i>Business Undertakings—</i>	
<i>Total</i>	1,249,790	Postmaster-General's Department	111,610
<i>Business Undertakings—</i>		Broadcasting and Television	
Postmaster-General's Department	121,631	Services	9,983
Broadcasting and Television		Railways	4,749
Services	10,460	<i>Total</i>	126,342
Railways	5,147	Territories	25,936
<i>Total</i>	137,238	<i>Capital Works and Services—</i>	
<i>Territories</i>	4,198	Defence Services	36,066
<i>Other Revenue</i>	47,060	Business Undertakings	44,579
		Other	94,875
		<i>Total</i>	175,520
<i>Grand Total</i>	1,438,286	Payments to or for States ..	321,415
		Loan Consolidation and Investment Reserve	41,382
		Other Expenditure	6,469
		<i>Grand Total</i>	1,438,286

(a) In addition, £11,987,000 was spent from Loan Fund on Defence Services—General Services, Works, Armaments, etc.

C. COMMONWEALTH AND STATE FINANCE.

Revenue and Expenditure, p. 855.—Preliminary information relating to Commonwealth and State revenue and expenditure during 1959–60 is given below.

COMMONWEALTH AND STATE REVENUE AND EXPENDITURE, 1959-60.
(£'000.)

Government of—	Consolidated Revenue Fund.			Loan Fund— Net Expenditure on Works and Services.
	Revenue.	Expenditure.	Surplus (+) or Deficit (—)	
New South Wales	(a)263,537	(a)263,469	+ 68	57,966
Victoria	168,310	167,997	+313	46,219
Queensland	103,103	103,268	—165	22,223
South Australia	76,078	76,389	—311	25,148
Western Australia	64,388	65,794	—1,406	17,696
Tasmania	24,296	25,328	—1,032	13,182
Six States	699,712	702,245	—2,533	182,434
Commonwealth	1,438,286	1,438,286	..	(c) 47,620
Grand Total—Unadjusted	2,137,998	2,140,531	—2,533	230,054
Adjusted(b)	1,856,547	1,859,080	—2,533	230,054

(a) Represents the combined transactions of the Consolidated Revenue Fund and the Business Undertakings—Railways, Tramways and Omnibuses and Sydney Harbour Section of the Maritime Services Board—included in the annual Budget Papers. Adjustments have been made to exclude duplications.
(b) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals have been adjusted to exclude State payments to the Commonwealth in respect of pay-roll tax and Commonwealth payments to the States included in State Consolidated Revenue Funds in respect of interest on State debts, special grants, uniform taxation, special financial assistance, grants to universities, tuberculosis, capital expenditure and National Welfare payments. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated.
(c) Excludes expenditure of £11,987,000 on Defence Services—General Services, Works, Armaments, etc.

D. COMMONWEALTH AND STATE GOVERNMENT SECURITIES.

§ 3. Commonwealth and State Public Debt Outstanding.

Public Debt and Annual Interest Payable, p. 859.—The following table shows details of the Commonwealth and State Government Public Debt and the annual interest payable thereon at 30th June, 1960.

COMMONWEALTH AND STATE GOVERNMENT SECURITIES ON ISSUE AND

CHAPTER XXVII.—MINERAL INDUSTRY.

§ 3. Mineral Production.

Quantity and Value of Production, pp. 1049-51.—In the table hereunder particulars are given of the quantity and value of production in Australia of the principal minerals during the year 1959:—

MINERAL PRODUCTION: QUANTITIES AND VALUES, AUSTRALIA, 1959.(a)

METALLIC MINERALS.

Year.	Principal Contents of Metallic Minerals Produced.							Total Value of Output of Metal Mining.
	Copper.	Gold.	Iron.	Lead.	Silver.	Tin.	Zinc.	
	Tons.	Fine oz.	'000 tons.	Tons.	'000 fine oz.	Tons.	Tons.	£'000.
1959	94,699	1,085,119	2,706	316,294	15,076	2,350	248,778	76,709

NON-METALLIC AND FUEL MINERALS.

Year.	Quantities Produced.						Total Value of Output of Non-metal and Fuel Mining.
	Coal.		Gypsum.	Limestone. (b)	Mica.	Salt.	
	Black.	Brown.					
1959	'000 tons. 20,298	'000 tons. 13,035	Tons. 516,791	'000 tons. 5,314	lb. 174,785	Tons. 454,863	£'000. 66,296

(a) Subject to revision.

(b) Excludes limestone used as a construction material.

§ 4. Gold, § 5. Lead, Silver, Zinc, § 6. Copper, § 7. Tin,
pp. 1051, 1059, 1064 and 1067.

Smelter and refinery production of the principal metals in Australia during the year 1959 is shown below.

SMELTER AND REFINERY PRODUCTION OF PRINCIPAL METALS: AUSTRALIA, 1959.

Year.	Refined Gold.	Refined Silver. (a)	Refined Lead. (a)	Lead Content of Lead Bullion Produced for Export. (a)	Refined Zinc. (a)	Refined Copper. (a)	Refined Tin. (a)
1959	'000 fine oz. 1,209	'000 fine oz. 7,856	Tons. 185,806	Tons. 50,310	Tons. 116,454	Tons. 51,925	Tons. 2,221

(a) Source: Bureau of Mineral Resources.

The figures below indicate, respectively, the number and page of the Official Year Book to which reference is made. In cases where matter was published in more than one previous issue, the volume and page for the last issue containing such matter are given. For possible revisions, however, issues immediately following the one referred to should also be consulted.

GENERAL INDEX.*

NOTE.—This index is preceded by a list of special articles, etc., in previous issues of the Official Year Book. A list of maps and graphs contained in this issue will be found on pp. ix and x. Area, population, etc., of particular localities are indexed under the locality concerned. Subject matter extending continuously over more than one page is indexed according to the first page only. *Where more than one reference to a subject is given, the chief reference, wherever it has been possible to determine it, is indicated by italic type. Two references to a subject as indicated signify major, and approximately equal, importance.*
